MESSAGE FROM MANAGEMENT

GOL posted operating income (EBIT) of R\$37 million in 3Q13, a R\$238 million improvement over 3Q12, accompanied by a margin of 1.7%, up by 12 percentage points. This increase was achieved despite the 13% average period depreciation of the Real against the Dollar and the highest jet fuel price in the Company's history.

In the first nine months, revenue grew by R\$244 million despite the 9.7% reduction in domestic seat supply, resulting in a positive 1.7% operating margin. We also reduced operating costs by around R\$407 million in the period.

This upturn in revenue was achieved thanks to the Company's strategy of continuously managing PRASK, combining business travelers, who seek flexibility, punctuality and last-minute competitive fares, with passengers who plan their trips well ahead of time, typically for leisure, and look for lower fares. Consequently, our PRASK grew by 21.1% in 3Q13 and by 14.6% year-to-date.

The leadership in punctuality was maintained in the first nine months. In 2013, we were the company which registered the smallest percentage of delays, just 5.6%. In order to achieve this, we have been continuously improving our passengers' check-in experience. Remote check-in already accounts for more than 60% of the total at those airports most used by business flyers. We implemented the "fast travel" concept to reduce boarding times and launched a new airport visual identity, aiming to simplify and clarify communications at the check-in counters and in stores. This new identity is already present at the Congonhas, Confins, Santos Dumont and Brasília airports, among others.

In addition, in November we launched a new seat configuration in airplanes, offering the GOL+, a new product exclusive to the Rio-São Paulo shuttle which provides a unique flying experience. With these changes, GOL will have the greatest offer of A-seal seats (an ANAC classification standard) on the shuttle route. All this in order to serve our passengers better every time and become an even more efficient company.

The Company is maintaining its commitment to high liquidity, crucial in times of high macroeconomic volatility. We closed September with a cash position of R\$2.9 billion, or 35.1% of LTM net revenue. In 9M13 we also paid debt of around R\$346 million, reducing the Company's financial cost.

Our leverage ratio continues to decline due to the recovery of operating margins and the EBITDAR recomposition, thereby further strengthening our balance sheet. This quarter, the adjusted gross revenue/ LTM EBITDAR ratio fell by 30% over 2Q13. This downward trend should continue until the end of the year, thanks to prospects of a positive operating result in the period.

Our Smiles loyalty program has also become increasingly strong. In September, it launched Clube Smiles and in October it entered into an investment agreement with Netpoints, a loyalty company specializing in retail, with the purpose of increasing the program's exposure to this segment and fueling its growth.

The ongoing monitoring of macroeconomic and market conditions as well as the speed of the Company's response and decision-making, have led to an improvement in operating and financial indicators in the quarter. In 2014, we expect a scenario of stable supply in the Brazilian domestic market, with variation close to 0%, as we believe the Company is close to its appropriate size given the current economic scenario.

The Company is reaffirming its commitment to obtaining an operating margin of between 1% and 3% in 2013.

Once again, we would like to thank our Team of Eagles for their hard work, motivation and commitment.

**Paulo Sérgio Kakinoff**

CEO of GOL Linhas Aéreas Inteligentes S.A.

(\* ) Figures for July 2013 are preliminary; National Civil Aviation Agency (ANAC) figures for other periods.

**Domestic Market**

In line with its capacity adjustment process, in 3Q13 GOL's domestic supply **declined by 7.0%** over 3Q12, giving a year-to-date **downturn of 9.7%**.

Domestic demand **fell by 12.1%** in the quarter, mainly as a result of the supply reduction. Consequently, the domestic load factor came to 70.2%, 4.1 percentage points lower than in 3Q12.

### International Market

In 3Q13, international market supply **moved up by 25.8%** over the same period last year, mainly due to the new flights to Santo Domingo, Miami and Orlando launched at the end of 2012. In year-to-date terms, international supply **increased by 31.1%**. GOL continues focused on assessing potential new markets.

The upturn in supply in 3Q13 contributed to the **18.1% increase** in international demand. As a result, the international load factor stood at 64.2% in the quarter, 4.2 percentage points down on 3Q12. The increased representativeness of the flights to Santo Domingo, where around 85% of our seats are available for sale on our 737-800 NG aircraft, reduces our load factor indicator. In accordance with ANAC's methodology, the load factor is calculated over the aircraft's total capacity.

### PRASK, RASK and Yield

In 3Q13, yield grew by **28.4% year-over-year**, due to the Company's strategy of attracting more high-value passengers, who prioritize flexibility, punctuality and last-minute competitive fares. As a result, **PRASK and RASK moved up by 21.1% and 17.1%**, respectively. In the coming months, we expect lower PRASK and yield growth, due to the strong comparative base in the same period last year.

The graph below shows that **PRASK growth has outpaced the reduction in supply**.

### Operational Fleet

The Company closed the quarter with an operational fleet of 140 Boeing 737-700 and 800 NG aircraft with an average age of 7.2 years, and a total fleet of 149 aircraft.

\* Aircraft not in GOL's operations (Non-operational)

In 3Q13, the Company took delivery of six aircraft under operating lease contracts and returned one aircraft under an operating lease contract. In the first nine months, the Company also sub-leased five aircraft to Transavia Airlines, permitting greater seat supply flexibility, in line with the seasonality of the Brazilian and European markets.

The Company currently has eight B737-300s, five of these in the process of sale negotiations and the other three to be returned to the lessors by the end of the current year. In the first nine months of 2013, GOL returned 10 of these aircraft, one of which in September.

The Company leases its fleet through a combination of finance and operating leases. Out of the total of 141 aircraft, excluding Webjet's, 95 were under operating leases and 46 were under finance leases. Of the 46 under finance leases, 40 have a purchase option when their leasing contracts terminate.

On September 30, 2013, the Company had 140 firm aircraft acquisition orders with Boeing, **totaling around R\$34.4 billion, excluding contractual discounts.**

**Also on September 30, 2013, of the commitments mentioned above, the Company had obligations of R\$4.6 billion in pre-delivery payments, which will be disbursed as per the table below:**

Pre-Delivery Payments	35.1	226.2	323.4	140.9	3,830.4	4,556.1
-----------------------	------	-------	-------	-------	---------	---------

The portion financed through long-term loans by U.S. Exim Bank with aircraft guarantees accounted for around 85% of the total aircraft cost. Other agents finance the acquisitions with equal or higher percentages, reaching up to 100%.

The Company has been paying for the aircraft acquisitions with its own resources, loans, cash flow from operations, short and long-term credit lines and financing by the supplier.

**Capex**

GOL invested around R\$188 million in 3Q13, 28% of which in the acquisition of aircraft (pre-delivery payments); around 71% in aircraft parts, reconfigurations and improvements; and around 1% in bases, IT and the expansion of the maintenance center in Confins, Minas Gerais (construction of the Wheel and Brake Workshop).

The amounts described above include only additions to fixed assets (excluding divestments, write-offs and the reimbursement of aircraft pre-delivery deposits), and do not include additions related to the entry of aircraft under finance leases due to the non-occurrence of cash effects at the moment of acquisition, as a result of the financing structure for this type of operation.

For more information on fixed assets, see note 17 to the financial statements.

**NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

IAS 34 requires the use of certain accounting estimates by Company's Management. The consolidated interim financial information - ITR were prepared based on historical cost, except for certain financial assets and liabilities, which are measured at fair value.

The interim financial informations of the Parent Company were prepared in accordance with the technical pronouncement CPC 21 (R1) – “Demonstração Intermediária” (Interim Financial Reporting).

The individual interim financial information, prepared for statutory purposes, measures investments in subsidiaries by the equity method, according to Brazilian legislation. Thus, the individual interim financial information is not in accordance with IFRS, which requires the valuation of these investments on the individual financial statements of the Parent Company at fair value or cost.

These Interim Financial Information - ITR individual and consolidated do not include all the information and disclosure items required in the consolidated annual financial statements and, therefore, it must be read along with the consolidated financial statements referring the year ended December 31, 2012 filed on March 25, 2013, which were prepared in accordance with Brazilian accounting practices and IFRS. There were no changes in accounting policies adopted on December 31, 2012 to September 30, 2013.

The shareholder's equity individual and consolidated quarterly financial information do not present differences on its composition, except in respect of the non-controlling interest in Smiles S.A., highlighted in the consolidated shareholder's equity.

**3. Seasonality**

The Company expects that revenues and profits from its flights reach the highest levels during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the season holidays. Given the high portion of fixed costs, this seasonality tends to result in fluctuations in our operational quarter-on-quarter income.

**GOLLINHAS AÉREAS INTELIGENTES S.A.****NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

The tax credits arising from tax loss carryforwards and negative social contribution basis were valued based on the reasonably expected generation of future taxable income of the parent company and its subsidiaries, subject to legal limitations.

Estimates of deferred tax asset recovery were based on projections of taxable profits when taking into consideration the above assumptions, in addition to several financial, business assumptions and internal and external factors, all based on considerations at the end of the financial year. Consequently, the estimates may not materialize in the future due to the uncertainties inherent in these predictions.

The Company and its subsidiaries have the total amount of tax credits of R\$1,343,658, of which R\$84,327 are from the parent Company GLAI and R\$1,259,331 are from the operating subsidiaries VRG and Webjet. On December 31, 2012, the projections for GLAI and its indirect subsidiary Webjet do not result in sufficient taxable profits to compensate all available tax credits over the next 10 years and, as a result, there has been recorded a provision for tax credit losses of R\$40,937 for GLAI and R\$233,582 for Webjet. For the direct subsidiary VRG, such projections indicate the existence of sufficient taxable profits for realization of all deferred tax credits recognized in up to 10 years. However, due to tax losses reported in the last years, the Administration conducted a sensitivity analysis on the results and projections and significant changes in the macro-economic scenario, which resulted in recognition of deferred assets on the tax losses and the negative basis at the lowest value derived from this analysis. As a result, the Company recognized a provision for loss of R\$489,845 related to its subsidiary VRG.

The Company's management considers that the deferred assets recognized on September 30, 2013 arising from temporary differences will be realized when the provisions are settled and the related future events are resolved.

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

On November 23, 2012, the Company initiated the winding up of Webjet's activities and the consequent discontinuation of its brand. The winding up of Webjet's activities aims at the optimization of the organizational structure of the companies and unification of their operations, reducing costs and bringing new synergies.

Assets held for sale

Due to not representing a component according to IFRS 5 and CPC 31 "Noncurrent assets held for sale and discontinued operations", with operations and cash flows that could be clearly distinguished, operationally and for disclosure purposes in the financial statements of the Company, Webjet was not considered a "discontinued Operation". This understanding is supported by the fact that the routes previously operated by Webjet will continue to be operated by the Company. Given that Webjet's fleet is available for immediate sale and their sale is considered to be highly probable, the accounting balance of aircraft was reclassified in accordance with IFRS 5 and CPC 31, to the Group of "assets held for sale" and are recorded at the recoverable amount estimated by the Company as detailed below:

	<b>09/30/2013</b>	<b>12/31/2012</b>

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. Rather, preferred shareholders are entitled to receive dividends per share in the same amount of the dividends per share paid to common shareholders. Therefore, the Company understands that, substantially, there is no difference between preferred shares and common shares, and, accordingly, basic and diluted earnings or loss per share are calculated equally for both shares.

Consequently, basic (earnings or loss) per share are computed by dividing income or losses by the weighted average number of all classes of shares outstanding during the period. Diluted (earnings or loss) per share are computed including stock options granted to key management and employees using the treasury stock method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

(a) Smiles granted the Stock Options Plan to its employees on August 08, 2013. These equity instruments have a dilutive effect on earnings per share of this subsidiary, impacting, therefore, on the loss considered on the basis calculation of Company's diluted result per share, in accordance with CPC 41.

Diluted earnings or loss per share are calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares.

The stock options owned by General Atlantic (as detailed in Note 15) are not included on the assessment basis of earnings per share because they have no dilutive effect.

Diluted earnings or loss per share are calculated by considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, discussed in Note 14. **a) Provision for anticipated return of aircraft**

In 2011, according to the strategic planning of Webjet, a provision for the anticipated return of aircraft was recorded. This provision was calculated based on the expected return of 18 aircraft Boeing 737-300 with operating leases contracts, as part of the Company's fleet renewal. The anticipated return of aircraft are scheduled to occur between 2012 and 2013 and the original termination of leases was between 2012 and 2014. For the period ended September 30, 2013, the Company completed 10 aircraft returns with prefixes: PR-WJS, PR-WJT, PR-WJM, PR-WJL, PR-WJE, PR-WJO, PR-WJQ, PR-WJR, PR-WJU and PR-WJN.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

**b) Return of aircraft and engines**

The return provision considers the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as prescribed in the return conditions of the lease contracts, and which is capitalized in fixed assets (aircraft reconfigurations/overhauling), as described in Note 17.

**c) Provision for restructuring**

The provision for restructuring represents the costs due to the closure of Webjet's activities and the discontinuation of its brand. The first step of the restructuring plan was the extinction of flight operations and discontinuity of the Boeing 737-300 fleet, announced on November 23, 2012. The Company settled all the obligations during the nine-month period ended September 30, 2013.

**d) Lawsuits**

As of September 30, 2013 the Company and its subsidiaries are parties to 23,286 (6,743 labor and 16,543 civil) lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operation (those arising from the Company's normal course of operations), and Succession (those arising from the succession of former Varig S.A. obligations). Under this classification, the number of proceedings is as follows:

	<b>Operation</b>	<b>Succession</b>	<b>Total</b>
Civil lawsuits	13,717	490	<b>14,207</b>
Civil proceedings	2,322	14	<b>2,336</b>

Labor proceedings	188	2	<b>190</b>
	<b>19,368</b>	<b>3,918</b>	<b>23,286</b>

The civil lawsuits are primarily related to compensation claims generally related to flight delays, flight cancellations, baggage loss and damages. The labor claims primarily consist of discussions related to overtime, hazard pay, and wage differences.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

	<b>09/30/2013</b>	<b>12/31/2012</b>
Civil	<b>44,029</b>	38,484
Labor	<b>63,461</b>	54,456
	<b>107,490</b>	92,940

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other lawsuits assessed by management and its legal counsel as possible risks, in the estimated amount as of September 30, 2013 of R\$19,795 for civil claims and R\$5,609 for labor claims (R\$37,250 and R\$16,354 as of December 31, 2012 respectively), for which no provisions are recognized.

GLAI has been challenging in the courts the taxation of PIS and COFINS in respect of revenue associated with interest on capital in the amount of R\$37,750, received in the period between 2006 and 2008 from its subsidiary GTA Transportes Aéreos S.A., succeeded by VRG on September 25, 2008. According to the opinion of the legal counsel and based on the recent precedents, the Company classified this process as possible loss, with no provision for the amount involved. Additionally, the Company maintains with the Bic Banco a letter of credit with a partial guarantee on the value of the process as described in Note 6.

The Company and its subsidiaries are challenging in the court the ICMS levied on aircraft and engines imported under aircraft lease transactions without purchase options in transactions carried out with lessors headquartered in foreign countries. The Company and its subsidiaries' management understand that these transactions represent simple leases in view of the contractual obligation to return the assets that are the subject matter of the contract.

Management believes that there is no evidence of goods circulation and so, there are no legal events to generate the ICMS taxation. Based on the legal counsel opinion and supported by similar lawsuits with favorable decisions to taxpayers by the Superior Court of Justice (STJ) and Supreme Federal Court (STF) in the second quarter of 2007, the Company understands that the likelihood of loss is remote, and thus did not recognize provisions for these amounts. As of September 30, 2013 the estimated aggregated amount of the ongoing lawsuits related to the non-levy of ICMS tax on said imports is R\$226,223 (R\$217,279 as of December 31, 2012) adjusted for inflation, not including late payment charges.

**29. Operating segment**

Operating segments are defined as business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the relevant decision makers to allocate resources and evaluate the segments' performance.

As a result of Smiles Program operations as an independent entity, which only started on January 1, 2013, the structure of presentation of segment information has been broken down into two operating segments. The information

of these segments presented to decision makers in order to allocate the resources and evaluate the segment performance emphasizes the two types of services as below:

- Flight transportation segment;
- Customer's loyalty program segment.

This note has not been presented with comparative figures for September 30, 2012 because the business model used by the Smiles Program until December 31, 2012 was an extension of the Flight transportation segment, for example, the costs of services provided were embedded and diluted in the operating costs of the Flight transportation segment. With the separation of the operations from January 1, 2013, operating agreements for sale tickets and purchase of miles were signed between the segments and these transactions represent a significant portion of revenues and costs of the "Smiles Loyalty Program". Therefore, any comparisons with prior period information would be inappropriate because the comparative figures would not reflect the current business model. The information below presents the summarized financial position related to reportable segments for the period ended on September 30, 2013. The amounts provided to the decision makers related to the income and the total assets are consistent with the balances recorded in the financial statements and the accounting policies applied.

**GOLLINHAS AÉREAS INTELIGENTES S.A.****NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

On the individual financial statements of the subsidiary Smiles S.A., which represents the segment "Smiles Loyalty Program" and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under the perspective of "Smiles Loyalty Program" segment, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the income/loss, consolidated assets and liabilities, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated financial statements, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

**30. Commitments**

As of September 30, 2013 the Company has 140 firm orders with Boeing. These aircraft purchase commitments include estimates for the contractual price increase during the construction phase. The approximate amount of firm orders, not including the contractual discount, is R\$34,394,318 (corresponding to US\$15,423,461 at the reporting date) and such are segregated according to the following periods:

**GOLLINHAS AÉREAS INTELIGENTES S.A.****NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

As of September 30, 2013, in addition to the firm orders mentioned above, the Company has commitments in the amount of R\$4,556,081 (corresponding to US\$2,043,086 at the reporting date), related to advances for aircraft purchases to be disbursed in accordance with the following schedule:

	<b>09/30/2013</b>	<b>12/31/2012</b>
2013	<b>35,136</b>	283,693

After 2016	<b>3,830,422</b>	2,782,181
	<b>4,556,081</b>	4,046,547

The installments financed by long-term debt, collateralized by the aircraft through the U.S. Ex-Im Bank (“Exim”) correspond to approximately to 85% of total cost of the aircraft. Other agents finance the acquisitions with equal or higher percentages, reaching up to the limit of 100%.

The Company makes payments related to the acquisition of aircraft using its own funds, short and long term debt, cash provided by operating activities, short- and medium-term credit facilities, and supplier financing.

The Company leases its entire fleet of aircraft through a combination of operating and financial leases. As of September 30, 2013, the total leased fleet was comprised of 141 aircrafts, excluding 3 aircraft under operating leases which are in the final phase of return and finance lease 5 of Webjet, of which 95 were operating leases and 46 were recorded as finance leases. The Company has 40 financial aircraft with purchase options. During the three-month period ended on September 30, 2013, the Company received 6 aircraft based on operating lease contracts and 1 aircraft based on financial lease contracts. There was 1 operating lease aircraft returned during the period.

**a) Operating leases**

Future payments of non-cancelable operating lease contracts are denominated in U.S. Dollars, and are as follows:

	<b>09/30/2013</b>	<b>12/31/2012</b>
2013	<b>171,558</b>	720,708

2014	<b>539,595</b>	520,677
2015	<b>401,783</b>	358,766
2016	<b>344,121</b>	292,357
After 2016	<b>1,584,238</b>	1,141,234
Total Minimum Lease Payments	<b>3,041,295</b>	3,033,742

**b) Sale-leaseback transactions**

As of September 30, 2013, the Company recognized R\$6,693 and R\$3,565, as 'Other payables' in current and noncurrent liabilities, respectively (R\$7,564 and R\$8,367 as of December 31, 2012), related to gains on sale-leaseback transactions performed by its subsidiary GAC Inc in 2006, related to 8 aircraft 737-800 Next Generation. These gains were deferred and are being amortized proportionally to the monthly payments, 3 of these aircraft have the contractual term of 144 months and the other 5 aircraft have lease agreements over the contractual term of 120 months.

**GOLLINHAS AÉREAS INTELIGENTES S.A.**

**NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

On the same date, the Company recorded R\$9,202 and R\$28,596, as 'Prepaid expenses', in current and noncurrent assets, respectively (R\$9,373 and R\$35,456 as of December 31, 2012), related to losses on sale-leaseback transactions performed by its subsidiary GAC Inc of nine aircraft. During the years 2007, 2008 and 2009, these losses were deferred and are being amortized proportionally to the payments of the operational lease agreements over the contractual term of 120 months.

Additionally, during the three and nine-month period ended on September 30, 2013, the Company recorded a gain of R\$42,426 and R\$109,128 directly in profit or loss, respectively. These gains result from 14 aircraft received during the nine-month period and 6 aircraft received during the quarter that were subject to sale-leaseback transactions and resulted in operating leases. Given that the calculation of gains and losses on sale-leaseback will not be offset against future lease payments and the sale-leasebacks were all negotiated at fair value, the gains were recognized in profit or loss.

**31. Financial instruments**

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks related to the Company operation. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks are mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. Dollar and interest markets. The contracts may be held by means of exclusive investment funds, as described in the Risk Management Policy of the Company.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), and approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available on the market and according to valuation methodologies.

Most of the derivative financial instruments are engaged with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, a significant portion of the transactions presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

**Risks**

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least quarterly in compliance with the strategies determined in the Risk Policies Committees.

**GOLLINHAS AÉREAS INTELIGENTES S.A.****NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE PERIOD ENDED ON SEPTEMBER 30, 2013**

The Individual and Consolidated Interim Financial Information as of September 30, 2013 were reviewed by Independent Auditors to the extent described in the Report on the Review of Interim Financial Information dated on November 11, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise.)

The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

**a) Fuel Price Risk**

As of September 30, 2013, fuel expenses accounted for 43% of the costs and operating expenses of the Company and its subsidiaries. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the Company and its subsidiaries contract derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives; are also contracted, directly with the local supplier, future fuel deliveries to aircraft at predetermined prices.

**b) Exchange Rate Risk**

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated leases and financing.

The Company's and its subsidiaries' revenues are mainly denominated in *Reais*, except for a small portion in U.S. Dollars, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay Guarani, Uruguayan peso, Venezuela bolivar etc.

To mitigate the risk of exchange rate, the Company and its subsidiaries hold derivative financial instruments that are referenced to the U.S. Dollar.

The currency exposure of the Company on September 30, 2013 and December 31, 2012 is shown below:
