and Independent Auditors' Report Review

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

Braskem S.A.

We have reviewed the accompanying condensed consolidated balance sheet of Braskem S.A. and its subsidiaries as of June 30, 2014, and the related condensed consolidated statements of operations and statement of comprehensive income, and statement of changes in shareholders' equity for the three month and six month periods ended June 30, 2014, and June 30, 2013 and the condensed consolidated statement of cash flows for the six month periods ended June 30, 2014 and June 30, 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with IAS 34 — Interim Financial Reporting issued by the International Accounting Standard Board (IASB).

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2013, and the related consolidated statements of operations, comprehensive income, and changes in equity, and of cash flows for the year then ended (not presented herein), and in our report dated February 13, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2013, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

The preparation of the quarterly information requires the use of certain critical accounting estimates. It also requires the Management of the Company to exercise its judgment in the process of applying its accounting policies. There were no significant changes in the assumptions and judgments made by the Company's management in the use of estimates for the preparation of the Quarterly Information in relation to those used in the December 31, 2013 financial statements.

On June 30, 2014, the Company started to include in its balance sheet the net value, per legal entity, of the amounts related to deferred income and social contribution tax assets and liabilities on its profit, due to due legal right of each entity to offset these amounts. The balance sheet at December 31, 2013 was revised to reflect such adjustment, as shown in Note 2.1.1 (a).

Level 1 – fair value obtained through prices quoted (without adjustments) in active markets for identical assets or liabilities, such as the stock exchange; and

Level 2 – fair value obtained from discounted cash flow models, when the instrument is a forward purchase or sale or a swap contract, or valuation models of option contracts, such as the Black-Scholes model, when the derivative has the characteristics of an option.

(c) Non-derivative liabilities designated for export hedge accounting

On May 1, 2013, Braskem S.A. designated non-derivative financial instrument liabilities, denominated in U.S. dollars, as hedge for the flow of its highly probable future exports.

Certain liabilities that were selected as hedge instruments are protecting dollar-denominated export flows scheduled to occur after the original maturities of these liabilities. For these cases, the Company maintains a strategy to refinance,

roll over or swap the liability. The column "Maturity" in the following table already presents the new maturities in accordance with the hedged flows, considering the refinancing, rollover or swap strategy. If these events do not occur, the exchange variation equivalent to the period for which the hedge ratio was effective will be recorded under shareholders' equity through the export period.

14.3. Sensitivity analysis

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

(a) Selection of risks

On June 30, 2014, the main risks that can affect the value of Braskem's financial instruments are:

- Brazilian real/U.S. dollar exchange rate;
- U.S. dollar/Mexican peso exchange rate;
- U.S. dollar/Euro exchange rate;
- Libor floating interest rate;
- CDI interest rate; and
- TJLP interest rate.

For the purposes of the risk sensitivity analysis, Braskem presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

(b) Selection of scenarios

(b.1) Probable scenario

The *Market Readout* published by the Central Bank of Brazil on June 27, 2014 was used to create the probable scenario for the U.S. dollar/Brazilian real exchange rate and the CDI interest rate, using the reference date of June 30, 2014. The *Market Readout* presents a consensus of market expectations based on a survey of the forecasts made by various financial and non-financial institutions.

The *Market Readout* does not publish forecasts for the interest rates Libor and TJLP. Therefore, Braskem considered the expectations for the CDI interest rate for determining the probable scenario for those rates, given their correspondence. The probable scenario for the TJLP is an increase of 0.5% from the current rate of 5%, in line with the size of the government's most recent decisions to increase or decrease the rate, and accompanying the forecast for the cumulative increase in the CDI rate by end-2014 of 0.50%.

Provisional Presidential Decree 627 of November 11, 2013 was made into Law 12,973 on May 13, 2014, which, among others, revoked the Transitional Tax System (RTT) and included additional measures, notably: (i) changes in the federal tax laws related to income and social contribution (IRPJ & CSLL), PIS/PASEP and COFINS taxes in order to align tax accounting with corporate accounting; (ii) provisions on the calculation of interest on equity; and (ii) considerations on investments valued using the equity accounting method. The provisions in this law are applicable as from 2015, except in the event of early adoption as from 2014, which is currently being assessed by the Management of the Company.

(a) Petros Plans

In August and October 2012, the Brazilian Private Pension Plan Superintendence (PREVIC - Superintendência Nacional de Previdência Complementar) approved the withdrawal of the sponsorship by Braskem of these plans, which required the payment of the mathematical reserves of the respective beneficiaries and in turn the monetization of the assets of the plans administered by Petros. In view of the unlikelihood of said monetization after almost two years since the approval by PREVIC, the Management of the Company had no alternative but to initiate the necessary procedures to resume sponsorship of the plans. This decision was formalized through a legal instrument, on April 3, 2014, to preserve Braskem's rights. The Company expects the conditions for resumption of sponsorship of the plans to be established in the coming months, based on discussions currently being held with PREVIC and Petros. Only after signing the cancelation of the withdrawal of sponsorship and the consequent preparation of actuarial reports will the company be able to measure and account for these plans as defined benefit plans, including the estimation of future contributions to be made by the Company and participants. The provision maintained by the Company is still measured based on the criteria that adopted after the decision to withdraw sponsorship. In the first quarter, the provision was increased based on the estimated costs of past services (Note 23), and was reclassified to non-current liabilities.
