Item 8.01 Other Events.

On January 4, 2016 Cytokinetics, Inc. announced that its first Phase 2 clinical trial of CK-2127107, a novel fast skeletal muscle troponin activator, in patients with spinal muscular atrophy (SMA) has opened to enrollment. The clinical trial is designed to assess the effect of CK-2127107 on multiple measures of muscle function in both ambulatory and non-ambulatory patients with SMA, a severe, genetic neuromuscular disease that leads to debilitating muscle function and progressive, often fatal, muscle weakness. In collaboration with Astellas (Tokyo Stock Exchange: 4503, "Astellas"), Cytokinetics is developing CK-2127107 as a potential treatment for people living with SMA and certain other debilitating neuromuscular and non-neuromuscular diseases and conditions associated with skeletal muscle weakness and/or fatigue.

A copy of the press releases are filed as Exhibit 99.1 and 99.2 to this Current Report on Form 8-K, and is incorporated herein by reference.
