A press release regarding the second quarter 2011 results of JA Solar Holding Co., Ltd. (the “Registrant”), made by the Registrant in English on August 18, 2011.

JA Solar Announces Second Quarter 2011 Results

SHANGHAI, August 18, 2011 -- JA Solar Holdings Co., Ltd. (Nasdaq:JASO) ("JA Solar" or the "Company"), one of the world's largest manufacturers of high-performance solar cells and solar power products, today announced its financial results for its second quarter ended June 30, 2011.

Second Quarter 2011 Highlights

Second quarter shipments of 401MW, an increase of 28.9% year-over-year and a decrease of 11.1% sequentially

Second quarter revenue of \$413.0million, an increase of 12.1% year-over-year and a decrease of 26.7% sequentially

Gross margin of negative 2.7%, compared to 17.3% in the first quarter of 2011

Operating loss of \$31.3 million and operating margin of negative 7.6%

Second quarter net loss of \$35.4 million and diluted loss per share of \$0.22

Strong balance sheet with a cash balance of \$616.9 million and working capital of \$872.4million

Dr. Peng Fang, CEO of JA Solar, commented, "Our second quarter results reflect the market disruption that resulted from generally lower than anticipated installation levels in Germany and recent policy changes in Italy. Despite that challenging environment in the European market, demand for our high-efficiency, low-cost products remained healthy and ensured that we met our shipment goals. However, our gross margin and bottom line have been impacted by worse than anticipated market conditions and inventory provisions."

Dr. Fang continued, "In recent weeks, we have seen signs of market recovery with both orders and volume shipments increasing across our diverse customer base. Our strategic partners and key customers continue to value JA Solar's unyielding focus on technology leadership, innovation, quality, and customer service. We are particularly pleased to see growing demand for JA Solar's high-efficiency products, which underscores the success of our ongoing efforts to improve solar cell conversion efficiencies. With this healthy demand from our customers, we expect shipment volumes to increase in the second half of this year compared to the first half. We are also encouraged by a reduction in key raw material costs, as we continue to make progress on achieving our cost reduction targets. We have strong liquidity, with a cash balance in excess of \$600 million, and we are confident JA Solar is well positioned to take advantage of growth opportunities as the solar market recovers."
