Table of Contents 8

EQUUS TOTAL RETURN, INC.**SCHEDULE OF INVESTMENTS – (Continued)****JUNE 30, 2014****(Unaudited)**

Except for our holding of notes issued by Orco Property Group S.A. (“OPG”) and shares of MVC Capital, Inc. (“MVC”), substantially all of our portfolio securities are restricted from public sale without prior registration under the Securities Act of 1933 or other relevant foreign regulatory authority. We negotiate certain aspects of the method and timing of the disposition of our investment in each portfolio company, including registration rights and related costs.

We may invest up to 30% of our assets in non-qualifying portfolio investments, as permitted by the Investment Company Act of 1940 (hereafter, the “1940 Act”). Specifically, we may invest up to 30% of our assets in entities that are not considered “eligible portfolio companies” (as defined in the 1940 Act), including companies located outside of the United States, entities that are operating pursuant to certain exceptions under the 1940 Act, and publicly-traded entities with a market capitalization exceeding \$250 million. As of June 30, 2014, except for our holdings in OPG and MVC, all of our investments are in enterprises that are considered eligible portfolio companies under the 1940 Act. We provide significant managerial assistance to portfolio companies that comprise 64.4% of the total value of the investments in portfolio securities as of June 30, 2014.

Our investments in portfolio securities consist of the following types of securities as of June 30, 2014 (in thousands):

Type of Securities	Cost	Fair Value	Fair Value as Percentage of Net Assets	
Limited liability company investments	\$ 12,900	\$ 9,016	23.7	%
Secured and subordinated debt	4,340	5,104	13.4	%
Common stock	5,934	6,094	16.0	%
Total	\$ 23,174	\$ 20,214	53.1	%

Interest payments are being received and/or accrued on notes with a fair value of \$2.1 million, while accrued interest has been impaired on notes receivable included in secured and subordinated debt with a fair value of \$3.0 million.

The following is a summary by industry of the Fund's investments in portfolio securities as of June 30, 2014 (in thousands):

Industry	Fair Value	Fair Value as Percentage of	Net Assets
Energy	\$8,800	23.1 %	
Financial services	5,126	13.5 %	
Business products and services	3,528	9.3 %	
Real estate	1,576	4.1 %	
Shipping products and services	968	2.5 %	
Media	216	0.6 %	
Total	\$20,214	53.1 %	

The accompanying notes are an integral part of these financial statements.

EQUUS TOTAL RETURN, INC.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2014

(Unaudited)

(1) Description of Business and Basis of Presentation

Description of Business— Equus Total Return, Inc. (“we,” “us,” “our,” “Equus,” the “Company,” and the “Fund”), a Delaware corporation, was formed by Equus Investments II, L.P. (the “Partnership”) on August 16, 1991. On July 1, 1992, the Partnership was reorganized and all of the assets and liabilities of the Partnership were transferred to the Fund in exchange for shares of common stock of the Fund. Our shares trade on the New York Stock Exchange under the symbol ‘EQS’. On August 11, 2006, our shareholders approved a change of the Fund’s investment strategy to a total return investment objective. This new strategy seeks to provide the highest total return, consisting of capital appreciation and current income. In connection with this strategic investment change, the shareholders also approved the change of name from Equus II Incorporated to Equus Total Return, Inc.

We attempt to maximize the return to stockholders in the form of current investment income and long-term capital gains by investing in the debt and equity securities of companies with a total enterprise value of between \$5.0 million and \$75.0 million, although we may engage in transactions with smaller or larger investee companies from time to time. We seek to invest primarily in companies pursuing growth either through acquisition or organically, leveraged buyouts, management buyouts and recapitalizations of existing businesses or special situations. Our income-producing investments consist principally of debt securities including subordinate debt, debt convertible into common or preferred stock, or debt combined with warrants and common and preferred stock. Debt and preferred equity financing may also be used to create long-term capital appreciation through the exercise and sale of warrants received in connection with the financing. We seek to achieve capital appreciation by making investments in equity and equity-oriented securities issued by privately-owned companies in transactions negotiated directly with such companies. Given market conditions over the past several years and the performance of our portfolio, our management and Board of Directors believe it is prudent to continue to review alternatives to refine and further clarify the current strategies.

We elected to be treated as a Business Development Company (“BDC”) under the Investment Company Act of 1940 (“1940 Act”). We currently qualify as a regulated investment company (“RIC”) for federal income tax purposes and, therefore, are not required to pay corporate income taxes on any income or gains that we distribute to our stockholders. We have certain wholly owned taxable subsidiaries (“Taxable Subsidiaries”) each of which holds one or more portfolio investments listed on our Schedules of Investments. The purpose of these Taxable Subsidiaries is to permit us to hold certain income-producing investments or portfolio companies organized as limited liability companies, or LLCs, (or other forms of pass-through entities) and still satisfy the RIC tax requirement that at least 90% of our gross revenue for income tax purposes must consist of investment income. Absent the Taxable

Subsidiaries, a portion of the gross income of these income-producing investments or of any LLC (or other pass-through entity) portfolio investment, as the case may be, would flow through directly to us for the 90% test. To the extent that such income did not consist of investment income, it could jeopardize our ability to qualify as a RIC and, therefore, cause us to incur significant federal income taxes. The income of the LLCs (or other pass-through entities) owned by Taxable Subsidiaries is taxed to the Taxable Subsidiaries and does not flow through to us, thereby helping us preserve our RIC status and resultant tax advantages. We do not consolidate the Taxable Subsidiaries for income tax purposes and they may generate income tax expense because of the Taxable Subsidiaries' ownership of the portfolio investments. We reflect any such income tax expense on our Statements of Operations.

Basis of Presentation—In accordance with Article 6 of Regulation S-X under the Securities Act of 1933 and Securities Exchange Act of 1934, we do not consolidate portfolio company investments, including those in which we have a controlling interest. Our interim unaudited financial statements were prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP, for interim financial information and in accordance with the requirements of reporting on Form 10-Q and Article 10 of Regulation S-X, under the Securities Exchange Act of 1934, as amended. Accordingly, they are unaudited and exclude some disclosures required for annual financial statements. Management believes it has made all adjustments, consisting solely of normal recurring accruals, necessary for the fair presentation of these interim financial statements.

The results of operations for the three and six months ended June 30, 2014 are not necessarily indicative of results that ultimately may be achieved for the year. The interim unaudited financial statements and notes thereto should be read in conjunction with the financial statements and notes thereto included in the Fund's Form 10-K for the fiscal year ended December 31, 2013, as filed with the Securities and Exchange Commission ("SEC").

[Table of Contents](#) 12

(2) Liquidity and Financing Arrangements

Liquidity—There are several factors that may materially affect our liquidity during the reasonably foreseeable future. We view this period as the twelve month period from the date of the financial statements in this Form 10-Q, *i.e.*, the period through June 30, 2015. We are evaluating the impact of current market conditions on our portfolio company valuations and their ability to provide current income. We have followed valuation techniques in a consistent manner; however, we are cognizant of current market conditions that might affect future valuations of portfolio securities. We believe that our operating cash flow and cash on hand will be sufficient to meet operating requirements and to finance routine follow-on investments, if any, through the next twelve months.

Cash and Cash Equivalents—As of June 30, 2014, we had cash and cash equivalents of \$17.2 million. We had \$20.2 million of our net assets of \$38.0 million invested in portfolio securities.

As of December 31, 2013, we had cash and cash equivalents of \$19.1 million. We had \$13.5 million of our net assets of \$33.2 million invested in portfolio securities. We also had \$15.2 million of restricted cash and temporary cash investments, including primarily the proceeds of a quarter-end margin loan that we incurred to maintain the percentage of qualifying investments applicable to a RIC to maintain our pass-through tax treatment. Of this amount, \$15.0 million was invested in U.S. Treasury bills and \$0.2 million represented a required 1% brokerage margin deposit. These securities were held by a securities brokerage firm and pledged along with other assets to secure repayment of the margin loan. The U.S. Treasury bills were sold on January 2, 2014 and we subsequently repaid this margin loan. The margin interest was paid on January 22, 2014.

Dividends— We will pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the 1940 Act.

Investment Commitments—As of June 30, 2014, we had no outstanding commitments to our portfolio company investments.

Under certain circumstances, we may be called on to make follow-on investments in certain portfolio companies. If we do not have sufficient funds to make follow-on investments, the portfolio company in need of the investment may be negatively impacted. Also, our equity interest in the estimated fair value of the portfolio company could be reduced.

RIC Borrowings, Restricted Cash and Temporary Cash Investments—We may periodically borrow sufficient funds to maintain the Fund's RIC status by utilizing a margin account with a securities brokerage firm. There is no assurance

that such arrangement will be available in the future. If we are unable to borrow funds to make qualifying investments, we may no longer qualify as a RIC. We would then be subject to corporate income tax on the Fund's net investment income and realized capital gains, and distributions to stockholders would be subject to income tax as ordinary dividends. Failure to continue to qualify as a RIC could be materially adverse to us and our stockholders.

We had no RIC borrowings or restricted cash as of June 30, 2014.

As of December 31, 2013, we borrowed \$15.0 million to maintain our RIC status by utilizing a margin account with a securities brokerage firm. We collateralized such borrowings with restricted cash and temporary cash investments in U.S. Treasury bills of \$15.2 million. The U.S. Treasury bills were sold on January 2, 2014 and the total amount borrowed was repaid at that time. The margin interest was paid on January 22, 2014.

Certain Risks and Uncertainties— Economic conditions since 2008 and resulting market dislocations have resulted in a significant decline in the availability of debt and equity for smaller and medium-sized enterprises. Generally, the limited amount of available debt financing has shorter maturities, higher interest rates and fees, and more restrictive terms than debt facilities available in the past. In addition, during these years and continuing into the first six months of 2014, the price of our common stock continued to fall well below our net asset value, thereby making it undesirable to issue additional shares of our common stock below net asset value. Because of these challenges, our near-term strategies shifted from originating debt and equity investments to preserving liquidity necessary to meet our operational needs. Key initiatives that we have previously undertaken to provide necessary liquidity include monetizations, the suspension of dividends and the internalization of management. Although we cannot assure you that such initiatives will be sufficient, we believe we have sufficient liquidity to meet our 2014 operating requirements.

(3) Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements:

Use of Estimates—The preparation of financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Although we believe the estimates and assumptions used in preparing these financial statements and related notes are reasonable in light of known facts and circumstances, actual results could differ from those estimates.

Valuation of Investments—Portfolio investments are carried at fair value with the net change in unrealized appreciation or depreciation included in the determination of net assets. Valuations of portfolio securities are performed in accordance with accounting principles generally accepted in the United States of America and the financial reporting policies of the SEC. The applicable methods prescribed by such principles and policies are described below:

Publicly-traded portfolio securities—Investments in companies whose securities are publicly traded are generally valued at their quoted market price at the close of business on the valuation date.

Privately-held portfolio securities—The fair value of investments for which no market exists is determined on the basis of procedures established in good faith by our Board of Directors. As a general principle, the current “fair value” of an investment would be the amount we might reasonably expect to receive for it upon its current sale, in an orderly manner. Appraisal valuations are necessarily subjective and the estimated values arrived at by the Fund may differ materially from amounts actually received upon the disposition of portfolio securities.

Thinly Traded and Over-the-Counter Securities—Generally, we value securities that are traded in the over-the-counter market or on a stock exchange at the average of the prevailing bid and ask prices on the date of the relevant period end. However, we may apply a discount to the market value of restricted or thinly traded public securities to reflect the impact that these restrictions have on the value of these securities. We review factors, including the trading volume, total securities outstanding and our percentage ownership of securities to determine whether the trading levels are active (Level 1) or inactive (Level 2) or unobservable (Level 3). These securities represented 14.0% and 11.0% of our investments in portfolio securities as of June 30, 2014 and December 31, 2013, respectively. We utilized independent pricing services with certain of our fair value estimates. To corroborate “bid/ask” quotes from independent pricing services, we perform a market-yield approach to validate prices obtained or obtain other evidence.

During the first twelve months after an investment is made, the original investment value is utilized to determine the fair value unless significant developments have occurred during this twelve month period which would indicate a material effect on the portfolio company (such as results of operations, changes in general market conditions, or a default by the issuer). After the twelve month period, or if material events have occurred within the twelve month period, we consider a two-step process when appraising investments of privately held companies. The first step involves determining the enterprise value of the portfolio company. During this step, we consider three different valuation approaches: a market approach, an income approach, and an asset approach. The particular facts and circumstances of each portfolio company determine which approach, or combination of approaches, will be utilized. The second step when appraising equity investments of privately held companies involves allocating value to the various debt and equity securities of the company. We allocate value to these securities based on their relative priorities. For equity securities such as warrants, we may also incorporate alternative methodologies including the Black-Scholes Option Pricing Model.

Market approach—The market approach typically employed by our management calculates the enterprise value of a company as a multiple of earnings before interest, taxes, depreciation and amortization (“EBITDA”) generated by the company for the trailing twelve month period. Adjustments to the company’s EBITDA, including those for non-recurring items, may be considered. Multiples are estimated based on current market conditions and past experience in the private company marketplace and are subjective in nature. We will apply liquidity and other discounts it deems appropriate to equity valuations where applicable. We may also use, when available, third-party transactions in a portfolio company’s securities as the basis of valuation (the “private market method”). The private market method will be used only with respect to completed transactions or firm offers made by sophisticated, independent investors.

Income approach—The income approach typically utilized by our management calculates the enterprise value of a company utilizing a discounted cash flow model incorporating projected future cash flows of the company. Projected future cash flows consider the historical performance of the company as well as current and projected market participant performance. Discount rates are estimated based on current market conditions and past experience in the private company marketplace and are subjective in nature. We will apply liquidity and other discounts we deem appropriate to equity valuations where applicable.

[Table of Contents](#) 14

Asset approach—We consider the asset approach to determine the fair value of significantly deteriorated investments demonstrating circumstances indicative of a liquidation analysis. This situation may arise when a portfolio company: 1) cannot generate adequate cash flow to meet the principal and interest payments on its indebtedness; 2) is not successful in refinancing its debt upon maturity; 3) we believe the credit quality of a loan has deteriorated due to changes in the business and underlying asset or market conditions which may result in the company's inability to meet future obligations; or 4) the portfolio company's reorganization or bankruptcy. Consideration is also given as to whether a liquidation event would be orderly or forced.

We base adjustments upon such factors as the portfolio company's earnings, cash flow and net worth, the market prices for similar securities of comparable companies, an assessment of the company's current and future financial prospects and various other factors and assumptions. In the case of unsuccessful operations, we may base a portfolio company's fair value upon the company's estimated liquidation value. Fair valuations are necessarily subjective, and management's estimate of fair value may differ materially from amounts actually received upon the disposition of its portfolio securities. Also, any failure by a portfolio company to achieve its business plan or obtain and maintain its financing arrangements could result in increased volatility and result in a significant and rapid change in its value.

Our general intent is to hold our loans to maturity when appraising our privately held debt investments. As such, we believe that the fair value will not exceed the cost of the investment. However, in addition to the previously described analysis involving allocation of value to the debt instrument, we perform a yield analysis to determine if a debt security has been impaired.

The Audit Committee of the Board of Directors may engage independent, third-party valuation firms to conduct independent appraisals and review management's preliminary valuations of each privately-held investment in order to make their own independent assessment. Any third-party valuation data would be considered as one of many factors in a fair value determination. The Audit Committee then would recommend the fair values for all privately-held securities based on all relevant factors to the Board of Directors for final approval.

Because of the inherent uncertainty of the valuation of portfolio securities which do not have readily ascertainable market values, amounting to \$15.1 million and \$13.3 million as of June 30, 2014 and December 31, 2013, respectively, our fair value determinations may materially differ from the values that would have been used had a ready market existed for the securities. As of June 30, 2014, one of our portfolio investments, 395,839 common shares of MVC was publicly listed on the NYSE and our holding of €1,200,790 [\$1.5 million] in 6-year notes of OPG was publicly listed on the Luxembourg Stock Exchange. As of December 31, 2013, the 73,666 ordinary shares of OPG were publicly listed on the NYSE Euronext Paris Exchange, and our holding of €1,200,790 [\$1.5 million] in 6-year OPG Notes was listed on the Luxembourg Stock Exchange. On April 3, 2014, we sold all of our 73,666 remaining shares of OPG, wherein we received \$61,867 in net proceeds and reported a realized loss of \$0.06 million. However, during the six months ended June 30, 2014 and the year ended December 31, 2013, there had been no significant trading activity in the OPG Notes.

We adjust our net asset value for the changes in the value of our publicly held securities, if applicable, and material changes in the value of private securities, generally determined on a quarterly basis or as announced in a press release, and reports those amounts to Lipper Analytical Services, Inc. Our net asset value appears in various publications, including *Barron's* and *The Wall Street Journal*.

Foreign Exchange—We record temporary changes in foreign exchange rates of portfolio securities denominated in foreign currencies as changes in fair value. These changes are therefore reflected as unrealized gains or losses until realized.

Investment Transactions—Investment transactions are recorded on the accrual method. Realized gains and losses on investments sold are computed on a specific identification basis.

We classify our investments in accordance with the requirements of the 1940 Act. Under the 1940 Act, “Control Investments” are defined as investments in companies in which we own more than 25% of the voting securities or maintain greater than 50% representation on the portfolio company’s governing board. Under the 1940 Act, “Affiliate Investments” are defined as those non-control investments in companies in which we own between 5% and 25% of the voting securities. Under the 1940 Act, “Non-affiliate Investments” are defined as investments that are neither Control Investments nor Affiliate Investments.

[Table of Contents](#) 15

Interest Income Recognition—We record interest income, adjusted for amortization of premium and accretion of discount, on an accrual basis to the extent that we expect to collect such amounts. We stop accruing interest on investments when we determine that interest is no longer collectible. We may also impair the accrued interest when we determine that all or a portion of the current accrual is uncollectible. If we receive any cash after determining that interest is no longer collectible, we treat such cash as payment on the principal balance until the entire principal balance has been repaid, before we recognize any additional interest income. We accrete or amortize discounts and premiums on securities purchased over the life of the respective security using the effective yield method. The amortized cost of investments represents the original cost adjusted for the accretion of discount and/or amortization of premium on debt securities.

Payment in Kind Interest (PIK)—We have loans in our portfolio that may pay PIK interest. We add PIK interest, if any, computed at the contractual rate specified in each loan agreement, to the principal balance of the loan and record it as interest income. To maintain our status as a RIC, we may be required to pay out to stockholders this non-cash source of income in the form of dividends even if we have not yet collected any cash in respect of such investments.

Cash Flows—For purposes of the Statements of Cash Flows, we consider all highly liquid temporary cash investments purchased with an original maturity of three months or less to be cash equivalents. We include our investing activities within cash flows from operations. We exclude “Restricted Cash & Temporary Cash Investments” used for purposes of complying with RIC requirements from cash equivalents. See Note 2 for further discussion of the Fund’s RIC borrowings.

Income Taxes—We intend to comply with the requirements of the Internal Revenue Code necessary for us to qualify as a RIC. So long as we comply with these requirements, we generally will not be subject to corporate-level federal income taxes on otherwise taxable income (including net realized capital gains) distributed to stockholders. Therefore, we did not record a provision for federal income taxes in our financial statements. We borrow money from time to time to maintain our tax status under the Internal Revenue Code as a RIC. See Note 2 for further discussion of our RIC borrowings.

All corporations incorporated in the State of Delaware are required to file an Annual Report and to pay a franchise tax. As a result, we paid Delaware Franchise tax in the amount of \$0.01 million for the year ended December 31, 2013.

Texas margin tax applies to legal entities conducting business in Texas. The margin tax is based on our Texas sourced taxable margin. The tax is calculated by applying a tax rate to a base that considers both revenue and expenses and therefore has the characteristics of an income tax. As a result, we did not owe Texas state income tax for the year ended December 31, 2013.

Fair Value Measurement—Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. We have categorized all investments recorded at fair value based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities, are as follows:

Level 1—Inputs are unadjusted, quoted prices in active markets for identical assets at the measurement date. The types of assets carried at Level 1 fair value generally are equities listed in active markets.

Level 2—Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset in connection with market data at the measurement date and for the extent of the instrument's anticipated life. Fair valued assets that are generally included in this category are warrants held in a public company.

Level 3—Inputs reflect our best estimate of what market participants would use in pricing the asset at the measurement date. It includes prices or valuations that require inputs that are both significant to the fair value measurement and unobservable. Generally, assets carried at fair value and included in this category are debt, warrants and/or other equity investments held in a private company. As previously described, we consider a two step process when appraising investments of privately held companies. The first step involves determining the enterprise value of the portfolio company. During this step, we consider three different valuation approaches: a market approach, an income approach, and a cost approach. The particular facts and circumstances of each portfolio company determine which approach, or combination of approaches, will be utilized. The second step when appraising equity investments of privately held companies involves allocating value to the various debt and equity securities of the company. We allocate value to these securities based on their relative priorities. For equity securities such as warrants, we may also incorporate alternative methodologies including the Black-Scholes Option Pricing Model. Yield analysis is also employed to determine if a debt security has been impaired.

We will record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and will record unrealized appreciation when we determine that the fair value is greater than its cost basis.

Table of Contents 16

Edgar Filing: EQUUS TOTAL RETURN, INC. - Form 10-Q

As of June 30, 2014, investments measured at fair value on a recurring basis are categorized in the tables below based on the lowest level of significant input to the valuations (unaudited):

Fair Value Measurements as of June 30, 2014				
(in thousands)	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Investments:				
Control investments	\$12,044	\$ —	\$ —	\$ 12,044
Affiliate investments	968	—	—	968
Non-affiliate investments	7,202	—	5,126	2,076
Total investments	\$20,214	\$ —	\$ 5,126	\$ 15,088

As of December 31, 2013, investments measured at fair value on a recurring basis are categorized in the tables below based on the lowest level of significant input to the valuations:

Fair Value Measurements as of December 31, 2013				
(in thousands)	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Input (Level 2)	Significant Unobservable Inputs (Level 3)

Fair value as of June 30, 2013 (unaudited)	\$7,057	\$ 150	\$ 1,398	\$8,605

Significant Unobservable Inputs — Our investment portfolio is not composed of homogeneous debt and equity securities that can be valued with a small number of inputs. Instead, the majority of our investment portfolio is composed of complex debt and equity securities with distinct contract terms and conditions. As such, our valuation of each investment in our portfolio is unique and complex, often factoring in numerous different inputs, including historical and forecasted financial and operational performance of the portfolio company, project cash flows, market multiples comparable market transactions, the priority of our securities compared with those of other investors, credit risk, interest rates, independent valuations and reviews and other inputs.

The following table summarizes the significant observable inputs in the fair value measurements of our level 3 investments by category of investment and valuation technique as of June 30, 2014 (unaudited):

(in thousands)	Fair Value	Valuation Techniques	Unobservable Inputs	Range				
				Minimum		Maximum		
Secured and subordinated debt	\$5,104	Yield analysis	Market interest rate	2.5	%	10.5	%	
			Yield analysis	Discount for lack of marketability	2.5	%	12.0	%
			Yield analysis	Discount for lack of marketability	7.2	%	25	%
			Yield analysis	Control premium	12	%	171	%
			New transaction	Discount	0	%	100	%
Common stock	968	Income/market approach	Market multiple/discount for lack of marketability/control premium	0	%	100	%

(4) Related Party Transactions and Agreements

Except as noted below, as compensation for services to the Fund, each Independent Director receives an annual fee of \$20,000 paid quarterly in arrears, a fee of \$2,000 for each meeting of the Board of Directors attended in person, a fee of \$1,000 for participation in each telephonic meeting of the Board and a fee of \$1,000 for each committee meeting attended, and reimbursement of all out-of-pocket expenses relating to attendance at such meetings. A quarterly fee of \$15,000 is paid to the Chairman of the Audit Committee and a quarterly fee of \$3,750 is paid to the Chairman of the Independent Directors. We may also pay other one-time or recurring fees to members of our Board of Directors in special circumstances. None of our interested directors receive annual fees for their service on the Board of Directors.

In 2011, Equus Energy, LLC, a wholly-owned subsidiary of the Fund, entered into a consulting agreement with Global Energy Associates, LLC (“Global Energy”) to provide consulting services for energy related investments. Henry W. Hankinson, Director, is a managing partner and co-founder of Global Energy. Payments to Global Energy totaled \$37,500 for each of the six months ended June 30, 2014 and 2013.

In respect of services provided to the Fund by members of the Board not in connection with their roles and duties as directors, the Fund pays a rate of \$250 per hour for services rendered.

(5) Dividends

We will pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the 1940 Act.

(6) Portfolio Securities

On April 3, 2014, we sold all of our 73,666 remaining shares of OPG, wherein we received \$61,867 in net proceeds and reported a realized loss of \$0.06 million.

During the six months ended June, 2014, we capitalized legal and consulting expenses of \$0.1 million relating to Spectrum Management. We also received a semi-annual interest payment of \$0.04 million in cash and \$0.1 million in the form of PIK'd interest in respect of our €1.2 million [\$1.5 million] in OPG notes. On May 14, 2014, we sold to MVC 2,112,000 shares of the Fund's common stock in exchange for 395,839 shares of MVC. (see *Plan of Reorganization* below).

During the six months ended June, 2014, we realized net capital gains of \$0.7 million related to our Share Exchange with MVC (see *Plan of Reorganization* below).

Net unrealized depreciation on investments decreased \$1.0 million during the six months ended June 30, 2014, to a net unrealized depreciation of \$3.0 million. Such decrease in unrealized depreciation is largely due to the following changes:

(i) Increase in fair value of our holding in Equus Energy, LLC of \$0.8 million due to an increase in comparable transactions for mineral leases, continued improved economic conditions, industry outlook, pricing assumptions, as well as additional proved reserves from new drilling and recompletion activities.

(ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$0.7 million due to an improvement in the industry sector for packaging companies and continued revenue and earnings growth.

(iii) Decrease in fair value of our shareholding in MVC of \$0.4 million due to a difference between our cost basis in the MVC shares and the closing trading price of the MVC shares on June 30, 2014. Our cost basis included the closing trading price of the shares on May 14, 2014 (the closing date of the Share Exchange) as well as capitalized transaction costs of \$0.5 million incurred in connection with the Share Exchange.

During the six months ended June 30, 2013, we capitalized legal and consulting expenses of \$0.2 million relating to Spectrum Management, LLC. We also received a semi-annual interest payment of \$0.03 million and a 5.75% partial principal repayment of \$0.01 million in respect of our €1.2 million [\$1.5 million] in OPG notes.

During the six months ended June 30, 2013, we realized capital losses of \$1.8 million due to the asset sale of The Bradshaw Group to PartsNow! LLC. The structure and pricing of the transaction was such that only the Class A preferred shareholders received any proceeds. There were no proceeds to the other equity classes, including the Classes B, D, and E preferred stock and warrants owned by the Fund. The Fund invested in Bradshaw in May 2000 and the Fund's investment has been valued at \$0 since 2002.

[Table of Contents](#) 19

Net unrealized depreciation on investments decreased to \$16.0 million during the six months ended June 30, 2013, from a net unrealized depreciation of \$17.2 million. Such decrease in unrealized depreciation is largely due to the following changes:

- (i) Decrease in fair value of our holding in Equus Energy, LLC of \$0.1 million due to operating expenses.
- (ii) Decrease in fair value of our holdings in Spectrum Management, LLC of \$0.3 million due to a decline in operating performance and \$0.2 million in capitalized legal and consulting expenses.
- (iii) Transfer of unrealized loss to realized loss of our holding in The Bradshaw Group (“Bradshaw”) of \$1.8 million upon the asset sale of the investment.

(7) Plan of Reorganization - Share Exchange with MVC Capital

On May 14, 2014, we announced that the Fund intended to effect a reorganization pursuant to Section 2(a)(33) of the 1940 Act. As a first step to consummating the reorganization, we sold to MVC 2,112,000 newly-issued shares of the Fund’s common stock in exchange for 395,839 shares of MVC (such transaction is hereinafter referred to as the “Share Exchange”). MVC is a business development company traded on the New York Stock Exchange that provides long-term debt and equity investment capital to fund growth, acquisitions and recapitalizations of companies in a variety of industries. The Share Exchange was calculated based on the Fund’s and MVC’s respective net asset value per share. The number of MVC shares received by Equus represents approximately 1.73% of MVC’s total outstanding shares of common stock.

Our shares were issued at the EQS closing stock price on May 14, 2014. The investment in MVC was recorded at MVC’s closing stock price on the same date. This transaction resulted in a realized gain of \$0.7 million.

Pursuant to the terms of a Share Exchange Agreement, dated May 14, 2014, entered into by Equus and MVC which memorialized the Exchange, we intend to finalize the reorganization by pursuing a merger or consolidation with MVC, or a subsidiary of MVC, or one or more of MVC’s portfolio companies (the “Consolidation”). Absent Equus merging or consolidating with/into MVC, our current intention is for Equus to (i) consummate the Consolidation, (ii) terminate its election to be classified as a business development company under the 1940 Act, and (iii) be restructured as a publicly-traded operating company focused on the energy and/or financial services sector.

(8) Equus Energy, LLC

Equus Energy, LLC (“Equus Energy”) was formed in November 2011 as a wholly-owned subsidiary of the Fund to make investments in companies in the energy sector, with particular emphasis on income-producing oil & gas properties. In December 2011, we contributed \$250,000 to the capital of Equus Energy. On December 27, 2012, we invested an additional \$6.8 million in Equus Energy for the purpose of additional working capital and to fund the purchase of \$6.6 million in working interests in 132 producing and non-producing oil and gas wells. The working interests include associated development rights of approximately 21,620 acres situated on 13 separate properties in Texas and Oklahoma. The working interests range from a *de minimus* amount to 50% of the leasehold that includes these wells.

The wells are operated by a number of experienced operators, including Chevron USA, Inc., which has operating responsibility for all of Equus Energy’s 40 producing well interests located in the Conger Field, a productive oil and gas field on the edge of the Permian Basin that has experienced successful gas and hydrocarbon extraction in multiple formations. Equus Energy, which holds a 50% working interest in each of these Conger Field wells, is working with Chevron in a recompletion program of existing Conger Field wells to the Wolfcamp formation, a zone containing oil as well as gas and natural gas liquids. Two recompletions in the Conger Field have been effected since the closing date of the acquisition of the working interests and a third recompletion is planned during the third quarter of 2014, with additional recompletions anticipated for the remainder of 2014 and beyond. Part of Equus Energy’s acreage rights described above also includes a 50% working interest in possible new drilling to the base of the Canyon formation (appx. 8,500 feet) on 2,400 acres in the Conger Field. Also included in the interests acquired by Equus Energy are working interests of 7.5% and 2.5% in the Burnell and North Pettus Units, respectively, which collectively comprise approximately 13,000 acres located in the area known as the “Eagle Ford Shale” play.

We do not consolidate Equus Energy or its wholly owned subsidiaries and accordingly only the value of our investment in Equus Energy is included on our statement of assets and liabilities. Our investment in Equus Energy is valued in accordance with our normal valuation procedures and is based on the values of the underlying assets held by EQS Energy Holdings, Inc. a wholly-owned subsidiary of Equus Energy, net of associated liabilities.

Table of Contents 20

Below is summarized consolidated financial information for Equus Energy as of June 30, 2014 and December 31, 2013 and for the three and six months ended June, 2014 and 2013, respectively, (in thousands).

Table of Contents 21

Revenue and direct operating expenses for the various oil and gas assets included in the accompanying statements represent the net collective working and revenue interests acquired by Equus Energy. The revenue and direct operating expenses presented herein relate only to the interests in the producing oil and natural gas properties and do not represent all of the oil and natural gas operations of all of these properties. Direct operating expenses include lease operating expenses and production and other related taxes. General and administrative expenses, depletion, depreciation and amortization (“DD&A”) of oil and gas properties and federal and state taxes have been excluded from direct operating expenses in the accompanying statements of revenue and direct operating expenses because the allocation of certain expenses would be arbitrary and would not be indicative of what such costs would have been had Equus Energy been operated as a stand-alone entity. The statements of revenue and direct operating expenses presented are not indicative of the financial condition or results of operations of Equus Energy on a go forward basis due to changes in the business and the omission of various operating expenses.

Critical Accounting Policies for Equus Energy – Equus Energy and its wholly-owned subsidiary EQS Energy Holdings, Inc. (collectively, the “Company”) follow the *Full Cost Method of Accounting* for oil and gas properties. Under the full cost method, all costs associated with property acquisition, exploration, and development activities are capitalized. Capitalized costs include lease acquisitions, geological and geophysical work, delay rentals, costs of drilling, completing and equipping successful and unsuccessful oil and gas wells and related costs. Gains or losses are normally not recognized on the sale or other disposition of oil and gas properties. Gains or losses are normally reflected as an adjustment to the full cost pool.

The capitalized costs of oil and gas properties, plus estimated future development costs relating to proved reserves and estimated cost of dismantlement and abandonment, net of salvage value, are amortized on a unit-of-production method

over the estimated productive life of the proved oil and gas reserves. Unevaluated oil and gas properties are excluded from this calculation. Depletion, depreciation and amortization expense for the Company's oil and gas properties totaled \$0.3 million and \$0.2 million for the three months ended June 30, 2014 and 2013, respectively and \$0.5 million for the six months ended June 30, 2014 and 2013, respectively.

Table of Contents 22

Capitalized oil and gas property costs are limited to an amount (the ceiling limitation) equal to the sum of the following:

- (a) As of June 30, 2014, the present value of estimated future net revenue from the projected production of proved oil and gas reserves, calculated at the simple arithmetic average, first-day-of-the-month prices during the twelve-month period before the balance sheet date (with consideration of price changes only to the extent provided by contractual arrangements) and a discount factor of 10%;
- (b) The cost of investments in unproved and unevaluated properties excluded from the costs being amortized; and
- (c) The lower of cost or estimated fair value of unproved properties included in the costs being amortized.

When it is determined that oil and gas property costs exceed the ceiling limitation, an impairment charge is recorded to reduce its carrying value to the ceiling limitation. The Company did not recognize an impairment loss on their oil and gas properties during the six months ended June 30, 2014 and 2013.

The costs of certain unevaluated leasehold acreage and certain wells being drilled are not amortized. The Company excludes all costs until proved reserves are found or until it is determined that the costs are impaired. Costs not amortized are periodically assessed for possible impairment or reduction in value. If a reduction in value has occurred, costs being amortized are increased accordingly.

Revenue Recognition - Revenue is recognized for oil and natural gas sales under the sales method of accounting. Under this method, revenue is recognized on production as it is taken and delivered to its purchasers. The volumes sold may be more or less than the volumes entitled to, based on the owner's net leasehold interest. These differences result from production imbalances, which are not significant, and are reflected as adjustments to proven reserves and future cash flows in the unaudited summarized oil and gas information included herein.

Accounting Policy on Depletion - The Company employs the "Units of Production" method in calculating depletion of its proved oil and gas properties, wherein capitalized costs, as adjusted for future development costs and asset retirement obligations, are amortized over the total estimated proved reserves.

Asset Retirement Obligations - The fair value of asset retirement obligations are recorded in the period in which they are incurred if a reasonable estimate of fair value can be made, and the corresponding cost is capitalized as part of the carrying amount of the related long-lived asset. The fair value of the asset retirement obligation is measured using expected future cash outflows discounted at the Company's credit-adjusted risk-free interest rate. Fair value, to the extent possible, should include a market risk premium for unforeseeable circumstances. No market risk premium was included in the Company's asset retirement obligation fair value estimate since a reasonable estimate could not be

made. The liability is accreted to its then present value each period, and the capitalized cost is depleted or amortized over the estimated recoverable reserves using the units-of-production method.

(8) Subsequent Events

Management performed an evaluation of the Fund's activity through the date the financial statements were issued, noting there were no subsequent events.

Table of Contents 23

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations Overview

Equus Total Return, Inc. (“we,” “us,” “our,” “Equus,” the “Company,” and the “Fund”), a Delaware corporation, was formed by Equus Investments II, L.P. (the “Partnership”) on August 16, 1991. On July 1, 1992, the Partnership was reorganized and all of the assets and liabilities of the Partnership were transferred to the Fund in exchange for shares of common stock of the Fund. Our shares trade on the New York Stock Exchange under the symbol EQS. On August 11, 2006, our shareholders approved the change of the Fund’s investment strategy to a total return investment objective. This new strategy seeks to provide the highest total return, consisting of capital appreciation and current income. In connection with this strategic investment change, the shareholders also approved the change of name from Equus II Incorporated to Equus Total Return, Inc.

We attempt to maximize the return to stockholders in the form of current investment income and long-term capital gains by investing in the debt and equity securities of companies with a total enterprise value of between \$5.0 million and \$75.0 million, although we may engage in transactions with smaller or larger investee companies from time to time. We seek to invest primarily in companies pursuing growth either through acquisition or organically, leveraged buyouts, management buyouts and recapitalizations of existing businesses or special situations. Our income-producing investments consist principally of debt securities including subordinate debt, debt convertible into common or preferred stock, or debt combined with warrants and common and preferred stock. Debt and preferred equity financing may also be used to create long-term capital appreciation through the exercise and sale of warrants received in connection with the financing. We seek to achieve capital appreciation by making investments in equity and equity-oriented securities issued by privately-owned companies in transactions negotiated directly with such companies. Given market conditions over the past several years and the performance of our portfolio, our management and Board of Directors believe it is prudent to continue to review alternatives to refine and further clarify the current strategies.

We elected to be treated as a Business Development Company (“BDC”) under the Investment Company Act of 1940 Act (“1940 Act”). We currently qualify as a regulated investment company (“RIC”) for federal income tax purposes and, therefore, are not required to pay corporate income taxes on any income or gains that we distribute to our stockholders. We have certain wholly owned Taxable Subsidiaries each of which holds one or more portfolio investments listed on our Schedules of Investments. The purpose of these Taxable Subsidiaries is to permit us to hold certain income-producing investments or portfolio companies organized as limited liability companies, or LLCs, (or other forms of pass-through entities) and still satisfy the RIC tax requirement that at least 90% of our gross revenue for income tax purposes must consist of investment income. Absent the Taxable Subsidiaries, a portion of the gross income of these income-producing investments or of any LLC (or other pass-through entity) portfolio investment, as the case may be, would flow through directly to us for the 90% test. To the extent that such income did not consist of investment income, it could jeopardize our ability to qualify as a RIC and, therefore, cause us to incur significant federal income taxes. The income of the LLCs (or other pass-through entities) owned by Taxable Subsidiaries is taxed to the Taxable Subsidiaries and does not flow through to us, thereby helping us preserve our RIC status and resultant tax advantages. We do not consolidate the Taxable Subsidiaries for income tax purposes and they may generate income tax expense because of the Taxable Subsidiaries’ ownership of the portfolio investments. We reflect any such income tax expense on our Statements of Operations.

Plan of Reorganization

On May 14, 2014, we announced that the Fund intended to effect a reorganization pursuant to Section 2(a)(33) of the 1940 Act. As a first step to consummating the reorganization, we sold to MVC 2,112,000 newly-issued shares of the Fund's common stock in exchange for 395,839 shares of MVC (such transaction is hereinafter referred to as the "Share Exchange"). MVC is a business development company traded on the New York Stock Exchange that provides long-term debt and equity investment capital to fund growth, acquisitions and recapitalizations of companies in a variety of industries. The Share Exchange was calculated based on the Fund's and MVC's respective net asset value per share. The number of MVC shares received by Equus represents approximately 1.73% of MVC's total outstanding shares of common stock. The number of Equus shares sold to MVC pursuant to the Share Exchange represents approximately 16.7% of our issued and outstanding shares of common stock at June 30, 2014.

Pursuant to the terms of a Share Exchange Agreement, dated May 14, 2014, entered into by Equus and MVC which memorialized the Exchange, we intend to finalize the reorganization by pursuing a merger or consolidation with MVC, or a subsidiary of MVC, or one or more of MVC's portfolio companies (the "Consolidation"). Absent Equus merging or consolidating with/into MVC, our current intention is for Equus to (i) consummate the Consolidation, (ii) terminate its election to be classified as a business development company under the 1940 Act, and (iii) be restructured as a publicly-traded operating company focused on the energy and/or financial services sector.

Table of Contents 24

Critical Accounting Policies

Our financial statements are based on the selection and application of significant accounting policies, which require management to make significant estimates and assumptions. We believe that the following are some of the more critical judgment areas in the application of our accounting policies that currently affect our financial condition and results of operations.

Valuation of Investments—Portfolio investments are carried at fair value with the net change in unrealized appreciation or depreciation included in the determination of net assets. Valuations of portfolio securities are performed in accordance with accounting principles generally accepted in the United States of America and the financial reporting policies of the SEC. The applicable methods prescribed by such principles and policies are described below:

Publicly-traded portfolio securities—Investments in companies whose securities are publicly traded are generally valued at their quoted market price at the close of business on the valuation date.

Privately-held portfolio securities—The fair value of investments for which no market exists is determined on the basis of procedures established in good faith by our Board of Directors. As a general principle, the current “fair value” of an investment would be the amount we might reasonably expect to receive for it upon its current sale, in an orderly manner. Appraisal valuations are necessarily subjective and the estimated values arrived at by the Fund may differ materially from amounts actually received upon the disposition of portfolio securities.

Thinly Traded and Over-the-Counter Securities—Generally, we value securities that are traded in the over-the-counter market or on a stock exchange at the average of the prevailing bid and ask prices on the date of the relevant period end. However, we may apply a discount to the market value of restricted or thinly traded public securities to reflect the impact that these restrictions have on the value of these securities. We review factors, including the trading volume, total securities outstanding and our percentage ownership of securities to determine whether the trading levels are active (Level 1) or inactive (Level 2) or unobservable (Level 3). These types of securities represented 14.0% and 11.0% of our investments in portfolio securities as of June 30, 2014 and December 31, 2013, respectively. We utilized independent pricing services with certain of our fair value estimates. To corroborate “bid/ask” quotes from independent pricing services, we perform a market-yield approach to validate prices obtained or obtain other evidence.

During the first twelve months after an investment is made, the original investment amount is utilized to determine the fair value unless significant developments have occurred during this twelve month period which would indicate a material effect on the portfolio company (such as results of operations or changes in general market conditions). After the twelve month period, or if material events have occurred within the twelve month period, Fund management

considers a two-step process when appraising investments of privately held companies. The first step involves determining the enterprise value of the portfolio company. During this step, our management considers three different valuation approaches: a market approach, an income approach, and an asset approach. The particular facts and circumstances of each portfolio company determine which approach, or combination of approaches, will be utilized. The second step when appraising equity investments of privately held companies involves allocating value to the various debt and equity securities of the company. Fund management allocates value to these securities based on their relative priorities. For equity securities such as warrants, the Fund may also incorporate alternative methodologies including the Black-Scholes Option Pricing Model.

Market approach—The market approach typically employed by our management calculates the enterprise value of a company as a multiple of earnings before interest, taxes, depreciation and amortization (“EBITDA”) generated by the company for the trailing twelve month period. Adjustments to the company’s EBITDA, including those for non-recurring items, may be considered. Multiples are estimated based on current market conditions and past experience in the private company marketplace and are subjective in nature. We will apply liquidity and other discounts we deem appropriate to equity valuations where applicable. We may also use, when available, third-party transactions in a portfolio company’s securities as the basis of valuation (the “private market method”). The private market method will be used only with respect to completed transactions or firm offers made by sophisticated, independent investors.

Income approach—The income approach typically utilized by our management calculates the enterprise value of a company utilizing a discounted cash flow model incorporating projected future cash flows of the company. Projected future cash flows consider the historical performance of the company as well as current and projected market participant performance. Discount rates are estimated based on current market conditions and past experience in the private company marketplace and are subjective in nature. We will apply liquidity and other discounts we deem appropriate to equity valuations where applicable.

[Table of Contents](#) 25

Asset approach—We consider the asset approach to determine the fair value of significantly deteriorated investments demonstrating circumstances indicative of a liquidation analysis. This situation may arise when a portfolio company: 1) cannot generate adequate cash flow to meet the principal and interest payments on its indebtedness; 2) is not successful in refinancing its debt upon maturity; 3) we believe the credit quality of a loan has deteriorated due to changes in the business and underlying asset or market conditions which may result in the company's inability to meet future obligations; or 4) the portfolio company's reorganization or bankruptcy. Consideration is also given as to whether a liquidation event would be orderly or forced.

We base adjustments upon such factors as the portfolio company's earnings, cash flow and net worth, the market prices for similar securities of comparable companies, an assessment of the company's current and future financial prospects and various other factors and assumptions. In the case of unsuccessful operations, we may base a portfolio company's fair value upon the company's estimated liquidation value. Fair valuations are necessarily subjective, and management's estimate of fair value may differ materially from amounts actually received upon the disposition of its portfolio securities. Also, any failure by a portfolio company to achieve its business plan or obtain and maintain its financing arrangements could result in increased volatility and result in a significant and rapid change in its value.

Our general intent is to hold our loans to maturity when appraising our privately held debt investments. As such, we believe that the fair value will not exceed the cost of the investment. However, in addition to the previously described analysis involving allocation of value to the debt instrument, we perform a yield analysis to determine if a debt security has been impaired.

The Audit Committee of the Board of Directors may engage independent, third-party valuation firms to conduct independent appraisals and review management's preliminary valuations of each privately-held investment in order to make their own independent assessment. Any third-party valuation data would be considered as one of many factors in a fair value determination. The Audit Committee then would recommend the fair values for all privately-held securities based on all relevant factors to the Board of Directors for final approval.

Because of the inherent uncertainty of the valuation of portfolio securities which do not have readily ascertainable market values, amounting to \$15.1 million and \$13.3 million as of June 30, 2014 and December 31, 2013, respectively, our fair value determinations may materially differ from the values that would have been used had a ready market existed for the securities. As of June 30, 2014, one of our portfolio investments, 395,839 common shares of MVC was publicly listed on the NYSE and our holding of €1,200,790 [\$1.5 million] in 6-year Orco Property Group, S.A. ("OPG") Notes was publicly listed on the Luxembourg Stock Exchange. As of December 31, 2013, the 73,666 ordinary shares of OPG were publicly listed on the NYSE Euronext Paris Exchange, and our holding of €1,200,790 [\$1.5 million] in 6-year OPG Notes was listed on the Luxembourg Stock Exchange. On April 3, 2014, we sold all of our 73,666 remaining shares of OPG, wherein we received \$61,867 in net proceeds and reported a realized loss of \$0.06 million. However, during the six months ended June 30, 2014 and year the ended December 31, 2013, there had been no significant trading activity in the OPG Notes.

We adjust our net asset value for the changes in the value of our publicly held securities, if applicable, and material changes in the value of private securities, generally determined on a quarterly basis or as announced in a press release, and reports those amounts to Lipper Analytical Services, Inc. Our net asset value appears in various publications, including Barron's and *The Wall Street Journal*.

Federal Income Taxes

On May 15, 2014, we announced that we had adopted a Plan of Reorganization, which may involve the transformation of the Fund into an operating company, which will likely result in the loss of our status as a RIC for Federal income tax purposes. However, if we do not effect a transformation of the Fund into an operating company, we intend to comply with the requirements of the Internal Revenue Code necessary for us to qualify as a RIC. So long as we comply with these requirements, we generally will not be subject to corporate-level federal income taxes on otherwise taxable income (including net realized capital gains) distributed to stockholders. Therefore, we did not record a provision for federal income taxes in our financial statements. As of December 31, 2013, we had a capital loss carry-forward of \$32.5 million which may be used to offset future capital gains. We may borrow money from time to time to maintain our status as a RIC under the Internal Revenue Code. See Note 2 for further discussion of our RIC borrowings. See also "*Subsequent Events*" and "*Risk Factors*" below.

[Table of Contents](#) 26

Interest Income Recognition

We record interest income, adjusted for amortization of premium and accretion of discount, on an accrual basis to the extent that we expect to collect such amounts. We stop accruing interest on investments when we determine that interest is no longer collectible. We may also impair the accrued interest when we determine that all or a portion of the current accrual is uncollectible. If we receive any cash after determining that interest is no longer collectible, we treat such cash as payment on the principal balance until the entire principal balance has been repaid, before we recognize any additional interest income. We accrete or amortize discounts and premiums on securities purchased over the life of the respective security using the effective yield method. The amortized cost of investments represents the original cost adjusted for the accretion of discount and/or amortization of premium on debt securities.

Payment in Kind Interest

We have loans in our portfolio that may pay PIK interest. We add PIK interest, if any, computed at the contractual rate specified in each loan agreement, to the principal balance of the loan and record it as interest income. To maintain the Fund's status as a RIC, we may be required to pay out to our stockholders this non-cash source of income in the form of dividends even if we have not yet collected any cash in respect of such investments.

Current Market Conditions

Overall economic conditions in the United States have improved, albeit marginally. However, the economic recovery has been hampered by slower growth and persistent high unemployment levels. The U.S. Bureau of Economic Analysis reported a decrease of 2.1% in real GDP during the first quarter of 2014 and an increase of 4.0% for the second quarter of 2014. The U.S. Congressional Budget Office is forecasting continued growth in 2014 (3.1%), with a projected unemployment rate exceeding 6.0% until 2017. The U.S. housing market has also largely recovered from its nadir of 2009. Nevertheless, future economic expansion and business investment is threatened by perceptions of higher taxes and healthcare costs, as well as the high levels of government deficit spending.

Market conditions for business transactions including mergers and acquisitions and private equity investments improved significantly in 2013 compared with previous years, and has continued through the first half of 2014, as corporations have been deleveraging and are holding significant amounts of cash and many have begun to focus on acquisitions as part of future growth plans. Private equity firms as a group enjoyed more success in 2013 in monetizing their investments through sales and public listings, and are looking to continue this trend throughout 2014.

During the second quarter of 2014, our net asset value decreased to \$3.00 per share from \$3.09 per share. As of June 30, 2014, the closing price of our common stock closed was \$2.48, which is a discount of approximately 17.4% to our net asset value.

Over the past several years, we have executed certain initiatives to enhance liquidity, achieve a lower operational cost structure, provide more assistance to portfolio companies and realize certain of our portfolio investments. Specifically, we changed the composition of our Board of Directors and management, terminated certain of our follow-on investments, internalized the management of the Fund, suspended our managed distribution policy, modified our investment strategy to pursue shorter term liquidation opportunities, pursued non-cash investment opportunities, and sold certain of our legacy and underperforming investment holdings. We believe these actions continue to be necessary to protect capital and liquidity during this turbulent economic period in order to preserve and enhance shareholder value. Because our management is internalized, certain of our expenses should not increase commensurate with an increase in the size of the Fund and, therefore, we expect to achieve efficiencies in our cost structure if we are able to grow the Fund.

Liquidity and Capital Resources

We generate cash primarily from maturities, sales of securities and borrowings, as well as capital gains realized upon the sale of portfolio investments. We use cash primarily to make additional investments, either in new companies or as follow-on investments in the existing portfolio companies and to pay the dividends to our stockholders.

Because of the nature and size of the portfolio investments, we may periodically borrow funds to make qualifying investments to maintain our tax status as a RIC. We often borrow such funds by utilizing a margin account with a securities brokerage firm. There is no assurance that such arrangement will be available in the future. If the Fund is unable to borrow funds to make qualifying investments, it may no longer qualify as a RIC. The Fund would then be subject to corporate income tax on its net investment income and realized capital gains, and distributions to stockholders would be subject to income tax as ordinary dividends.

Table of Contents 27

The Fund has the ability to borrow funds and issue forms of senior securities representing indebtedness or stock, such as preferred stock, subject to certain restrictions. Net taxable investment income and net taxable realized gains from the sales of portfolio investments are intended to be distributed at least annually, to the extent such amounts are not reserved for payment of expenses and contingencies or to make follow-on or new investments.

The Fund reserves the right to retain net long-term capital gains in excess of net short-term capital losses for reinvestment or to pay contingencies and expenses. Such retained amounts, if any, will be taxable to the Fund as long-term capital gains and stockholders will be able to claim their proportionate share of the federal income taxes paid on such gains as a credit against their own federal income tax liabilities. Stockholders will also be entitled to increase the adjusted tax basis of their Fund shares by the difference between their undistributed capital gains and their tax credit.

We are evaluating the impact of current market conditions on our portfolio company valuations and their ability to provide current income. We have followed valuation techniques in a consistent manner; however, we are cognizant of current market conditions that might affect future valuations of portfolio securities. We believe that our operating cash flow and cash on hand will be sufficient to meet operating requirements and to finance routine capital expenditures through the next twelve months.

Results of Operations

Investment Income and Expense

Net investment gain (loss) was \$0.7 million and (\$1.4) million for the three months ended June 30, 2014 and 2013, respectively and \$1.2 million and \$2.1 million for the six months ended June 30, 2014 and, 2013, respectively. The decrease in net investment loss generated at June 30, 2014 compared to June 30, 2013 is due primarily to increase in total investment income and a decrease in settlement expense.

Total investment income (loss) from portfolio securities was \$0.06 million and \$0.01 million for the three months ended June 30, 2014 and 2013, respectively, and \$0.3 million and (\$0.1) million for the six months ended June 30, 2014 and 2013, respectively. The increase was primarily due to the increase in income producing investments, along with the impairment of accrued interest receivable of Spectrum Management, LLC at June 30, 2013.

Excluding the \$0.5 million in settlement expense that was incurred at June 30, 2013, total expenses were relatively unchanged for the three months and six months ended June 30, 2014 and June 30, 2013, respectively.

Realized Gains and Losses on Sales of Portfolio Securities

On April 3, 2014, we sold all of our 73,666 remaining shares of OPG, wherein we received \$61,867 in net proceeds and reported a realized loss of \$0.06 million.

During the six months ended June, 2014, we capitalized legal and consulting expenses of \$0.1 million relating to Spectrum Management. We also received a semi-annual interest payment of \$0.04 million in cash and \$0.1 million in the form of PIK'd interest in respect of our €1.2 million [\$1.5 million] in OPG notes. On May 14, 2014, we sold to MVC 2,112,000 shares of the Fund's common stock in exchange for 395,839 shares of MVC. (see *Plan of Reorganization* below).

During the six months ended June, 2014, we realized net capital gains of \$0.7 million related to our Share Exchange with MVC (see *Plan of Reorganization* below).

During the six months ended June 30, 2013, we realized capital losses of \$1.8 million due to the asset sale of The Bradshaw Group ("Bradshaw") to PartsNow! LLC. The structure and pricing of the transaction was such that only the Class A preferred shareholders received any proceeds. There were no proceeds to the other equity classes, including the Classes B, D, and E preferred stock and warrants owned by the Fund. The Fund invested in Bradshaw in May 2000 and the Fund's investment has been valued at \$0 since 2002.

Changes in Unrealized Appreciation/Depreciation of Portfolio Securities

Net unrealized depreciation on investments decreased \$1.0 million during the six months ended June 30, 2014, to a net unrealized depreciation of \$3.0 million. Such decrease in unrealized depreciation is largely due to the following changes:

Increase in fair value of our holding in Equus Energy, LLC of \$0.8 million due to an increase in comparable (i) transactions for mineral leases, continued improved economic conditions, industry outlook, pricing assumptions, as well as additional proved reserves from new drilling and recompletion activities.

- (ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$0.7 million due to an improvement in the industry sector for packaging companies and continued revenue and earnings growth.

- (iii) Decrease in fair value of our shareholding in MVC of \$0.4 million due to a difference between our cost basis in the MVC shares and the closing trading price of the MVC shares on June 30, 2014. Our cost basis included the closing trading price of the shares on May 14, 2014 (the closing date of the Share Exchange) as well as capitalized transaction costs of \$0.5 million incurred in connection with the Share Exchange.

Net unrealized depreciation on investments decreased to \$16.0 million during the six months ended June 30, 2013, from a net unrealized depreciation of \$17.2 million. Such decrease in unrealized depreciation is largely due to the following changes:

- (i) Decrease in fair value of our holding in Equus Energy, LLC of \$0.1 million due to operating expenses.
- (ii) Decrease in fair value of our holdings in Spectrum Management, LLC of \$0.3 million due to a decline in operating performance and \$0.2 million in capitalized legal and consulting expenses.
- (iii) Transfer of unrealized loss to realized loss of our holding in The Bradshaw Group (“Bradshaw”) of \$1.8 million upon the asset sale of the investment.

Dividends

We will pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the Investment Company Act of 1940.

Portfolio Securities

During the six months ended June 30, 2013, we capitalized legal and consulting expenses of \$0.2 million relating to Spectrum Management, LLC. We also received a semi-annual interest payment of \$0.03 million and a 5.75% partial principal repayment of \$0.01 million in respect of our €1.2 million [\$1.5 million] in OPG notes. On May 14, 2014, we sold to MVC 2,112,000 shares of the Fund’s common stock in exchange for 395,839 shares of MVC (see Plan of Reorganization above).

During the six months ended June 30, 2013, we capitalized legal and consulting expenses of \$0.2 million relating to Spectrum Management. We also received a semi-annual interest payment of \$0.03 million and a 5.75% partial principal repayment of \$9,000 in respect of our €1.2 million [\$1.5 million] in OPG notes.

Subsequent Events

Management performed an evaluation of the Fund's activity through the date the financial statements were issued, noting that there were no subsequent events.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

We are subject to financial market risks, including changes in interest rates with respect to investments in debt securities and outstanding debt payable, as well as changes in marketable equity security prices. In the future, in addition to our investment in OPG shares and the OPG Notes, we may invest in companies outside the United States, including in Europe and Asia, which would give rise to exposure to foreign currency value fluctuations. We do not use derivative financial instruments to mitigate any of these risks. The return on investments is generally not affected by foreign currency fluctuations.

Our investments in portfolio securities consist of some fixed-rate debt securities. Since the debt securities are generally priced at a fixed rate, changes in interest rates do not directly affect interest income. In addition, changes in market interest rates are not typically a significant factor in the determination of fair value of these debt securities, since the securities are generally held to maturity. We determine their fair values based on the terms of the relevant debt security and the financial condition of the issuer.

A major portion of our investment portfolio consists of debt and equity investments in private companies. Modest changes in public market equity prices generally do not significantly impact the estimated fair value of these investments. However, significant changes in market equity prices can have a longer-term effect on valuations of private companies, which could affect the carrying value and the amount and timing of gains or losses realized on these investments. A small portion of the investment portfolio also consists of common stock in publicly traded companies. These investments are directly exposed to equity price risk, in that a hypothetical ten percent change in these equity prices would result in a similar percentage change in the fair value of these securities.

[Table of Contents](#) 29

We are classified as a “non-diversified” investment company under the 1940 Act, which means we are not limited in the proportion of our assets that may be invested in the securities of a single user. The value of one segment called “Energy” includes one portfolio company and was 23.1% of the net asset value and 43.5% of our investments in portfolio company securities (at fair value) as of June 30, 2014. Changes in business or industry trends or in the financial condition, results of operations, or the market’s assessment of any single portfolio company will affect the net asset value and the market price of our common stock to a greater extent than would be the case if we were a “diversified” company holding numerous investments.

Item 4. Controls and Procedures

The Fund maintains disclosure controls and other procedures that are designed to ensure that information required to be disclosed by the Fund in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to the Fund’s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Fund’s management, with the participation of the Fund’s Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the design and operations of the Fund’s “disclosure controls and procedures” (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of June 30, 2014. Based on their evaluation, the Fund’s Chief Executive Officer and Chief Financial Officer concluded that the Fund’s disclosure controls and procedures were effective at a reasonable assurance level. There has been no change in the Fund’s internal control over financial reporting during the quarter ended June 30, 2014, that has materially affected, or is reasonably likely to materially affect, the Fund’s internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

Champion Window Arbitration Claim—In January 2006, we sold our 31.5% ownership interest in Champion Window, Inc. (“Champion”), a portfolio company of the Fund, to Atrium Companies Inc. (“Atrium”) pursuant to a Stock Purchase Agreement (“SPA”) dated December 22, 2005. The SPA contained certain limited rights of indemnification for Atrium in connection with its purchase of such ownership interest.

More than five years after the closing of the sale of our Champion interest, Atrium filed suit in the District Court of Harris County, Texas against two former officers of Atrium's subsidiary, Champion, alleging, amongst other matters, that the former officers breached their fiduciary duties to Champion by hiring undocumented workers. This action was commenced primarily as a result of an investigation by the U.S. Immigration and Customs Enforcement agency ("ICE") into Atrium's hiring practices. On March 12, 2012, to protect its interests, we filed a Petition in Intervention in the State Court Action seeking a declaration from the Court that Equus did not owe any obligation to indemnify Atrium or Champion for any penalties, costs or fees associated with the investigation by ICE.

On March 16, 2012, Atrium and Champion filed a claim with the American Arbitration Association in Dallas, Texas, against Equus and a number of the other sellers under the SPA. In September 2013, all of Atrium and Champion's claims including claims against its former officers described above, were also consolidated in the Arbitration Action.

In the Arbitration Action, Atrium and Champion seek damages arising from Equus' and the other sellers' indemnity obligations set forth in the SPA. Atrium claims it is entitled to indemnification under the SPA for costs it has incurred in responding to an ongoing investigation by ICE. Atrium entered into a Non-Prosecution Agreement with ICE. It appears that one condition of the Non-Prosecution Agreement required Atrium to pay ICE \$2,000,000. Atrium and Champion asserted two counts of breach of contract against Equus, both arising out of the alleged obligation to indemnify Atrium and Champion pursuant to certain provisions of the SPA. Atrium and Champion also asserted claims for fraudulent inducement against two former officers and directors of Champion. Through the arbitration, Atrium and Champion seek to recover an unspecified amount in the form of alleged "losses, damages, assessments, penalties, interest, reasonable attorneys' and accountants' fees, settlement costs, and other costs and expenses arising directly or indirectly out of or incident to," the alleged breach of the indemnity provisions in the SPA. As a consequence of their fraudulent inducement claim against the two former officers and directors, Atrium and Champion alternatively seek equitable rescission of the SPA and exemplary damages from the two former officers and directors.

Atrium and Champion recently disclosed damages in the range of \$5.8 to \$6.0 million. The claimed damages include a \$2.0 million fine paid to ICE, fees and costs incurred in responding to ICE's investigation, and additional labor charges allegedly incurred by Atrium and Champion to comply with federal law in their hiring practices.

Table of Contents 30

We filed an answer to Atrium and Champion's claims on December 6, 2013. In our answer, we denied that we owed any indemnity obligations to Atrium or Champion and further denied that the Fund is in any way liable to Atrium or Champion. To the extent Atrium and Champion are able to establish a right to an indemnity, we will further contest the amount of the claimed indemnity, inasmuch as we believe (among other defenses) that the indemnity obligation can only exist, if at all, with respect to damages arising as a direct and proximate result of employees who were hired prior to the closing date of the 2006 sale of Champion and remained in continuous employment after the 2006 sale, and not to any employee who may have been hired in the six years after the sale.

While we believe the Atrium claim is without merit and we intend to continue to vigorously dispute the claim, there is a reasonable possibility of an adverse ruling which may require the Fund to indemnify Atrium. If Equus is required to indemnify Atrium and Champion, we estimate that such indemnity obligation could vary from \$2.0 million to \$3.0 million. Pursuant to the SPA, the indemnification obligation of Equus and the other sellers is several and not joint, and any such indemnity, however uncertain, would likely be reduced proportionately to our percentage ownership in Champion at the time of sale, which was 31.5% of Champion's shares outstanding.

Indemnification Settlement—Effective June 13, 2013, the Fund entered into a settlement agreement with Sam Douglass, a former director and executive officer of the Fund, in respect of a claim for indemnification pursuant to the General Corporation Law of Delaware and an indemnification agreement entered into by the Fund with Mr. Douglass on May 3, 2001. The settlement agreement provides for the reimbursement to Mr. Douglass of actual expenses incurred, excluding any fines or penalties, in connection with an enforcement action initiated by the Securities and Exchange Commission against Mr. Douglass in 2009. The settlement payment of \$125,000 was made on June 24, 2013.

Lawsuit Settlement—On August 12, 2012, Paula Douglass filed a lawsuit against the Fund and members of the Board of Directors in the District Court of Harris County, Texas. Ms. Douglass' complaint alleged various causes of action, including minority shareholder oppression, dilution, and breach of fiduciary duty, and sought unspecified damages and attorney's fees. Effective June 13, 2013, the Fund entered into a settlement agreement with Ms. Douglass, Sam Douglass, as well as certain trusts controlled by them. Pursuant to the settlement agreement and in view of the estimated costs of protracted litigation and the associated disruption to the operations of the Fund, the Board of Directors approved a payment of \$402,254, in complete settlement of the lawsuit, as being in the best interests of the Fund and its shareholders. The settlement payment was made on July 30, 2013. Ms. Douglass filed a motion to dismiss the lawsuit with prejudice on August 8, 2013.

From time to time, the Fund is also a party to certain proceedings incidental to the normal course of our business including the enforcement of our rights under contracts with our portfolio companies. While the outcome of these legal proceedings cannot at this time be predicted with certainty, we do not expect that these proceedings will have a material effect upon the Fund's financial condition or results of operations.

Item 1A. Risk Factors

In addition to the various risks identified in the Fund's Annual Report on Form 10-K for the year ended December 31, 2013, filed on March 31, 2014, are the following:

If we reorganize as an operating company, we will likely not continue to qualify as a RIC under the Code.

On May 15, 2014, we announced that we had adopted a Plan of Reorganization (also referred to hereinafter as the "Plan") within the meaning of Section 2(a)(33) of the 1940 Act. The Plan contemplates the possible merger of the Fund with and into another BDC, or the restructuring of the Fund as an operating company no longer subject to the 1940 Act. If we were to reorganize as an operating company, we may lose our status as a RIC. If we fail to qualify as a RIC, we will be subject to corporate income tax, which would substantially reduce the amount of income we might otherwise distribute to our shareholders. See "*Plan of Reorganization*" on page above.

If we reorganize as an operating company, we will not continue to operate as a BDC.

We have elected to be classified as a BDC under the 1940 Act. In connection with our announcement on May 15, 2014 to effect a Plan of Reorganization, if we effect a reorganization of the Fund into an operating company, we will seek to terminate our BDC classification. If we were to terminate our election to be classified as a BDC and were still determined by the Securities and Exchange Commission to constitute an "investment company," we would be subject to significantly greater regulatory requirements and constraints than under which we presently operate, the result of which would have a material adverse effect on our results and financial condition.

Table of Contents 31

If we reorganize as an operating company, we may not be able to utilize our capital losses.

As of March 31, 2014, we have incurred cumulative capital losses of \$32.5 million, of which \$15.6 million will begin expiring after 2017, with the remainder carried over indefinitely. Pursuant to the Plan of Reorganization announced on May 15, 2014, we may reorganize as an operating company. If we reorganize as an operating company, we may lose our ability to offset future income against our cumulative capital losses, including capital losses that would otherwise continue past 2017. If we reorganized as an operating company and were unable to offset future income against these capital losses, the result could have a material adverse effect on our future operating results and our financial condition.

Other than the foregoing, there have been no material changes to the Fund's risk factors from the disclosure set forth in the Annual Report on Form 10-K for the year ended December 31, 2013.

Readers should carefully consider these risks and all other information contained in the annual report on Form 10-K, including the Fund's financial statements and the related notes thereto. The risks and uncertainties described below are not the only ones facing the Fund. Additional risks and uncertainties not presently known to the Fund, or not presently deemed material by the Fund, may also impair its operations and performance.

Table of Contents 32

Item 6. Exhibits

3. Articles of Incorporation and by-laws

- (a) Restated Certificate of Incorporation of the Fund, as amended. [Incorporated by reference to Exhibit 3(a) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2007]
- (b) Certificate of Merger dated June 30, 1993, between the Fund and Equus Investments Incorporated [Incorporated by reference to Exhibit 3(c) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2007]
- (c) Amended and Restated Bylaws of the Fund. [Incorporated by reference to Exhibit 3(b) to Registrant's Current Report on Form 8-K filed on June 30, 2014.]

10. Material Contracts.

- (c) Safekeeping Agreement between the Fund and Amegy Bank dated August 16, 2008. [Incorporated by reference to Exhibit 10(c) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2008.]
- (d) Form of Indemnification Agreement between the Fund and its directors and certain officers. [Incorporated by reference to Exhibit 10(d) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2011.]
- (e) Form of Release Agreement between the Fund and certain of its officers and former officers. [Incorporated by reference to Exhibit 10(h) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2004.]
- (f) Code of Ethics of the Fund (Rule 17j-1) [Incorporated by reference to Exhibit 10(f) to Registrant's Annual Report on Form 10-K for the year ended December 31, 2009.]
- (g) Share Exchange Agreement between the Fund and MVC Capital, Inc., dated May 14, 2014. [Incorporated by reference to Exhibit 10.1 to Current Report on Form 8-K, filed on May 15, 2014.]

31. Rule 13a-14(a)/15d-14(a) Certifications

1. Certification by Chief Executive Officer

2. Certification by Chief Financial Officer

32. Section 1350 Certifications

1. Certification by Chief Executive Officer

2. Certification by Chief Financial Officer
