NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

(in thousands, except share data)

Note 1 - Organization and Nature of Business Operations

Business

NV5 Global, Inc. and its subsidiaries (collectively, the “Company” or “NV5 Global”) is a provider of professional and technical engineering and consulting solutions to public and private sector clients in the infrastructure, energy, construction, real estate and environmental markets, operating nationwide and abroad in Macau, Hong Kong and the UAE. The Company’s clients include the U.S. federal, state and local governments, and the private sector. NV5 Global provides a wide range of services, including, but not limited to, planning, design, consulting, permitting, inspection and field supervision, testing inspection and certification, management oversight, forensic engineering, litigation support, condition assessment and compliance certification.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements of the Company are presented in U.S. dollars in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”) and have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”) for reporting of interim financial information. Pursuant to such rules and regulations, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. The consolidated financial statements include the accounts of NV5 Global, Inc. and those of its wholly owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

In the opinion of management, the accompanying unaudited interim consolidated financial statements of the Company contain all adjustments necessary to present fairly the financial position and results of operations of the Company as of the dates and for the periods presented. Accordingly, these statements should be read in conjunction with the consolidated financial statements and notes contained in the Company's Annual Report on Form 10-K for the year ended December 30, 2017. The accompanying consolidated balance sheet as of December 30, 2017 has been derived from those financial statements. The results of operations and cash flows for the interim periods presented are not necessarily indicative of the results to be expected for any future interim period or for the full 2018 fiscal year.

Fiscal Year

The Company reports its financial results on a 52/53 week fiscal year ending on the Saturday closest to December 31st (whether or not in the following calendar year), with interim calendar quarters ending on the Saturday closest to the end of such calendar quarter (whether or not in the following calendar quarter).

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. These estimates and assumptions are based on management's most recent assessment of underlying facts and circumstances using the most recent information available. Actual results could differ significantly from these estimates and assumptions, and the differences could be material.

Estimates and assumptions are evaluated periodically and adjusted when necessary. The more significant estimates affecting amounts reported in the consolidated financial statements relate to the fair value estimates used in accounting for business combinations (including the valuation of identifiable intangible assets) and contingent consideration, fair value estimates in determining the fair value of the Company's reporting units for goodwill impairment assessment, revenue recognition over time, allowances for uncollectible accounts and provision for income taxes.

(in thousands, except share data)

Concentration of Credit Risk

Trade receivable balances carried by the Company are comprised of accounts from a diverse client base across a broad range of industries and are not collateralized. However, approximately 32% of the Company's gross revenues for both the nine months ended September 29, 2018 and September 30, 2017, respectively, is from California-based projects. The Company does not have any clients individually representing more than 10% of gross revenues during the nine months ended September 29, 2018 and September 30, 2017. Furthermore, approximately 74% and 73% of the Company's accounts receivable as of September 29, 2018 and December 30, 2017, respectively, are for public and quasi-public projects. Management continually evaluates the creditworthiness of these and future clients and provides for bad debt reserves as necessary.

Fair Value of Financial Instruments

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of valuation hierarchy are defined as follows:

Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company considers cash and cash equivalents, billed and unbilled receivables, accounts payable, income taxes payable, accrued liabilities and debt obligations to meet the definition of financial instruments. As of September 29, 2018 and December 30, 2017, the carrying amount of cash and cash equivalents, billed and unbilled receivables, accounts payable, income taxes payable and accrued liabilities approximate their fair value due to the relatively short period of time between their origination and their expected realization or payment. The carrying amounts of debt obligations approximate their fair values as the terms are comparable to terms currently offered by local lending institutions for arrangements with similar terms to industry peers with comparable credit characteristics.

The Company applies the provisions of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 805, *Business Combinations*, in the accounting for its acquisitions, which requires recognition of the assets acquired and the liabilities assumed at their acquisition date fair values, separately from goodwill. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition date fair values of the tangible and identifiable intangible assets acquired and liabilities assumed. The allocation of the purchase price to identifiable intangible assets (customer relationships, customer backlog, trade name and non-compete) is based on valuations performed to determine the fair values of such assets as of the acquisition dates. Generally, the Company engages a third-party independent valuation specialist to assist in management’s determination of fair values of tangible and intangible assets acquired and liabilities assumed. The fair values of earn-out arrangements are included as part of the purchase price of the acquired companies on their respective acquisition dates. The Company estimates the fair value of contingent earn-out payments as part of the initial purchase price and records the estimated fair value of contingent consideration as a liability on the consolidated balance sheet. Changes in the estimated fair value of contingent earn-out payments are included in General and Administrative expenses on the Consolidated Statements of Net Income and Comprehensive Income.

Several factors are considered when determining contingent consideration liabilities as part of the purchase price, including whether (i) the valuation of the acquisitions is not supported solely by the initial consideration paid, and the contingent earn-out formula is a critical and material component of the valuation approach to determining the purchase price; and (ii) the former owners of the acquired companies that remain as key employees receive compensation other than contingent earn-out payments at a reasonable level compared with the compensation of other key employees. The contingent earn-out payments are not affected by employment termination.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

(in thousands, except share data)

The Company reviews and re-assesses the estimated fair value of contingent consideration liabilities on a quarterly basis, and the updated fair value could differ materially from the initial estimates. The Company measures contingent consideration recognized in connection with business combinations at fair value on a recurring basis using significant unobservable inputs classified within Level 3, as defined in the accounting guidance. The Company uses a probability-weighted discounted cash flow approach as a valuation technique to determine the fair value of the contingent consideration liabilities on the acquisition date and at each reporting period. The significant unobservable inputs used in the fair value measurements are projections over the earn-out period, and the probability outcome percentages that are assigned to each scenario. Significant increases or decreases to either of these inputs in isolation could result in a significantly higher or lower liability with a higher liability capped by the contractual maximum of the contingent consideration liabilities. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate on the acquisition date and amount paid will be recorded in earnings (see Note 10).

Goodwill and Intangible Assets

Goodwill is the excess of consideration paid for an acquired entity over the amounts assigned to assets acquired, including other identifiable intangible assets and liabilities assumed in a business combination. To determine the amount of goodwill resulting from a business combination, the Company performs an assessment to determine the acquisition date fair value of the acquired company's tangible and identifiable intangible assets and liabilities.

Goodwill is required to be evaluated for impairment on an annual basis or whenever events or changes in circumstances indicate the asset may be impaired. An entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. These qualitative factors include: macroeconomic and industry conditions, cost factors, overall financial performance and other relevant entity-specific events. If the entity determines that this threshold is met, then performing the two-step quantitative impairment test is unnecessary. The two-step impairment test requires a comparison of the carrying value of the assets and liabilities associated with a reporting unit, including goodwill, with the fair value of the reporting unit. The Company determines fair value through multiple valuation techniques, and weights the results accordingly. NV5 Global is required to make certain subjective and complex judgments in assessing whether an event of impairment of goodwill has occurred, including assumptions and estimates used to determine the fair value of its reporting units. If the carrying value of a reporting unit exceeds the fair value of the reporting unit, the Company would calculate the implied fair value of its reporting

unit goodwill as compared to the carrying value of its reporting unit goodwill to determine the appropriate impairment charge, if any. The Company has elected to perform its annual goodwill impairment review on August 1 of each year. The Company conducts its annual impairment tests on the goodwill using the quantitative method of evaluating goodwill.

Identifiable intangible assets primarily include customer backlog, customer relationships, trade names and non-compete agreements. Amortizable intangible assets are amortized on a straight-line basis over their estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate that the assets may be impaired. If an indicator of impairment exists, the Company compares the estimated future cash flows of the asset, on an undiscounted basis, to the carrying value of the asset. If the undiscounted cash flows exceed the carrying value, no impairment is indicated. If the undiscounted cash flows do not exceed the carrying value, then impairment, if any, is measured as the difference between fair value and carrying value, with fair value typically based on a discounted cash flow model.

On August 1, 2018, the Company conducted its annual impairment tests using the quantitative method of evaluating goodwill. Based on the quantitative analyses the Company determined the fair value of each of the reporting units exceeded its carrying value. Therefore, the goodwill was not impaired and the Company did not recognize an impairment charge relating to goodwill as of August 1, 2018. Furthermore, there were no indicators, events or changes in circumstances that would indicate goodwill was impaired during the period from August 2, 2018 through September 29, 2018.

See Note 7 for further information on goodwill and identified intangibles.

Earnings per Share

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. In accordance with the FASB ASC 260, *Earnings per Share*, the effect of potentially dilutive securities is not considered during periods of loss or if the effect is anti-dilutive. The weighted average number of shares outstanding in calculating basic earnings per share for the nine months ended September 29, 2018 and September 30, 2017 exclude 588,430 and 560,689 non-vested restricted shares, respectively, issued since 2010. These non-vested restricted shares are not included in basic earnings per share until the vesting requirements are met. The weighted average number of shares outstanding in calculating diluted earnings per share for the three and nine months ended September 29, 2018 and September 30, 2017 includes, if outstanding, non-vested restricted shares and units, issuable shares related to acquisitions, and the warrants associated with the Company's initial public offering. In calculating diluted earnings per share for the three and nine months ended September 29, 2018 and September 30, 2017, there were no potentially anti-dilutive securities.

The following table represents a reconciliation of the net income and weighted average shares outstanding for the calculation of basic and diluted earnings per share for the three and nine months ended September 29, 2018 and September 30, 2017:

Warrant exercise

In conjunction with the Company's initial public offering on March 26, 2013, the underwriter received a warrant to acquire up to 140,000 units ("Unit Warrant"). On March 23, 2016, the underwriter paid \$1,008 to the Company to exercise the Unit Warrant. Each of the units delivered upon exercise consisted of one share of the Company's common stock and one warrant to purchase one share of the Company's common stock at an exercise price of \$7.80 per share ("Warrant"), which warrant expired on March 27, 2018. On March 19, 2018, the underwriter paid \$1,092 to the Company to exercise the Warrant. On March 21, 2018, the Company delivered 140,000 shares of common stock to the underwriter.

Secondary offering

On August 9, 2018, the Company priced an underwritten follow-on offering of 1,270,000 shares of the Company's common stock (the "Firm Shares") at an offering price of \$79.00 per share. The shares were sold pursuant to an effective registration statement on Form S-3 (Registration No. 333-224392). In addition, a selling stockholder of the Company granted the underwriters of the offering a 30-day option to purchase up to 190,500 shares (the "Option Shares") of the Company's common stock at the public offering price less the underwriting discount. On August 13, 2018, the Company closed on the Firm Shares, for which we received net proceeds of approximately \$93,500 after deducting the underwriting discount and estimated offering expenses payable by the Company, and the selling stockholder of the Company closed on the sale of all Option Shares. The Company did not receive any proceeds associated with the sale of the Option Shares by the selling stockholder.

Revenue Recognition

On the first day of fiscal year 2018, the Company adopted ASC Topic 606, *Revenue from Contracts with Customers* (“Topic 606”), using the modified retrospective approach to all contracts that were not completed as of the beginning of fiscal year 2018. Topic 606 is a comprehensive new revenue recognition model that required a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. Topic 606 became effective for the Company in the first quarter of fiscal year 2018. Results for reporting periods beginning after December 30, 2017 are presented under Topic 606, while prior period amounts and disclosures are not adjusted and continue to be reported under the accounting standards in effect for the prior period. Adoption of Topic 606 did not have an impact on the Company’s consolidated net income, financial position, and cash flows however it has resulted in expanded disclosures. Revenue from the vast majority of the Company’s contracts will continue to be recognized over time because of the continuous transfer of control to the customer. The impact to revenues from adopting Topic 606 for the three and nine months ended September 29, 2018 was immaterial.

To determine the proper revenue recognition method, the Company evaluates whether two or more contracts should be combined and accounted for as one single contract and whether the combined or single contract should be accounted for as more than one performance obligation. The majority of the Company’s contracts have a single performance obligation as the promise to transfer the individual goods or services is not separately identifiable from other promises in the contracts and therefore, not distinct. The Company may also promise to provide distinct goods or services within a contract in which case the Company separates the contract into multiple performance obligations. For contracts with multiple performance obligations, the Company allocates the contract transaction price to each performance obligation using the best estimate of the standalone selling price of each distinct good or service in the contract. Typically, the Company sells a customer a specific service, and in these cases the Company uses the expected cost plus a margin approach to estimate the standalone selling price of each performance obligation.

The Company’s performance obligations are satisfied as work progresses or at a point in time. Gross revenues from services transferred to customers over time accounted for 92% of the Company’s revenues for the three and nine months ended September 29, 2018. For the Company’s cost-reimbursable contracts, revenue is recognized over time using direct costs incurred or direct costs incurred to date as compared to the estimated total direct costs for performance obligations because it best depicts the transfer of control to the customer which occurs as the Company incurs costs on its contracts. Contract costs include labor, subcontractors’ costs and other direct costs. Gross revenue

from services transferred to customers at a point in time accounted for 8% of the Company's revenues for the three and nine months ended September 29, 2018. Revenue from these contracts is recognized when the customer obtains control of the asset, which is generally upon delivery and acceptance by the customer of the reports and/or analysis performed.

As of September 29, 2018, the Company had \$467,135 of remaining performance obligations, or backlog, of which \$342,338 or 73% is expected to be recognized over the next 12 months and the remaining over the next 24 months. Only the contracts for which funding has been provided and work authorizations have been received are included in backlog. Not included in backlog is work awarded to the Company under master services agreements but not under contract. Project cancellations or scope adjustments may occur, from time to time, with respect to contracts reflected in backlog. Most of the Company's government contracts are multi-year contracts for which funding is appropriated on an annual basis, therefore backlog includes only those amounts that have been funded and authorized and does not reflect the full amounts the Company may receive over the term of such contracts. In the case of non-government contracts, backlog includes future revenue at contract rates, excluding contract renewals or extensions that are at the discretion of the client. For contracts with a not-to-exceed maximum amount, the Company includes revenue from such contracts in backlog to the extent of the remaining estimated amount. The Company's backlog for the period beyond 12 months may be subject to variation from year-to-year as existing contracts are completed, delayed, or renewed or new contracts are awarded, delayed, or cancelled. As a result, the Company believes that year-to-year comparisons of the portion of backlog expected to be performed more than one year in the future are difficult to assess and not necessarily indicative of future revenues or profitability.

Contract modifications are common in the performance the Company's contracts. Contracts modified typically result from changes in scope, specifications, design, performance, sites, or period of completion. In most cases, contract modifications are for services that are not distinct, and, therefore, are accounted for as part of the existing contract.

Contract estimates are based on various assumptions to project the outcome of future events. These assumptions are dependent upon the accuracy of a variety of estimates, including engineering progress, achievement of milestones, labor productivity and cost estimates. Due to uncertainties inherent in the estimation process, it is possible that actual completion costs may vary from estimates. If estimated total costs on contracts indicate a loss or reduction to the percentage of total contract revenues recognized to date, these losses or reductions are recognized in the period in which the revisions are known. The effect of revisions to revenues, estimated costs to complete contracts, including penalties, incentive awards, change orders, claims, anticipated losses and others are recorded on the cumulative catch-up basis in the period in which the revisions are identified and the loss can be reasonably estimated. Such revisions could occur in any reporting period and the effects on the results of operations for that reporting period may be material depending on the size of the project or the adjustment. During the three and nine months ended September 29, 2018, the cumulative catch-up adjustment for contract modifications was not material.

A significant amount of the Company's revenues are derived under multi-year contracts. The Company enters into contracts with its clients that contain two principal types of pricing provisions: cost-reimbursable and fixed-unit price. The majority of the Company's contracts are cost-reimbursable contracts that fall under the category of time and materials contracts.

Cost-reimbursable contracts. Cost-reimbursable contracts consist of the following:

Time and materials ("T&M") contracts are common for smaller scale professional and technical consulting and certification services projects. Under these types of contracts, there is no predetermined fee. Instead, the Company negotiates hourly billing rates and charges the clients based upon actual hours expended on a project. In addition, any direct project expenditures are passed through to the client and are typically reimbursed. These contracts may have an initial not-to-exceed or guaranteed maximum price provision.

Cost-plus contracts are the predominant contracting method used by U.S. federal, state, and local governments. Under these type contracts, the Company charges clients for its costs, including both direct and indirect costs, plus a negotiated fee. The total estimated cost plus the negotiated fee represents the total contract value.

Lump-sum contracts typically require the performance of all of the work under the contract for a specified lump-sum fee, subject to price adjustments if the scope of the project changes or unforeseen conditions arise. Many of the Company's lump-sum contracts are negotiated and arise in the design of projects with a specified scope and project deliverables. In most cases, we can bill additional fees if the project schedule is modified and lengthened.

Fixed-unit price contracts. Fixed unit-price contracts consist of the following:

Fixed-unit price contracts typically require the performance of an estimated number of units of work at an agreed price per unit, with the total payment under the contract determined by the actual number of units performed.

Federal Acquisition Regulations (“FAR”), which are applicable to the Company’s federal government contracts and may be incorporated in local and state agency contracts, limit the recovery of certain specified indirect costs on contracts. Cost-plus contracts covered by FAR or certain state and local agencies also may require an audit of actual costs and provide for upward or downward adjustments if actual recoverable costs differ from billed recoverable costs.

Contract Balances

The timing of revenue recognition, billings and cash collections results in billed receivables, unbilled receivables (contract assets), and billings in excess of costs and estimated earnings on uncompleted contracts (contract liabilities) on the Consolidated Balance Sheet.

Billed receivables, net represents amounts billed to clients that remain uncollected as of the balance sheet date. The amounts are stated at their estimated realizable value. The Company maintains an allowance for doubtful accounts to provide for the estimated amount of receivables that will not be collected. The allowance is estimated based on management’s evaluation of the contracts involved and the financial condition of clients. Factors the Company considers include, but are not limited to: client type (governmental or commercial client), historical performance, historical collection trends and general economic conditions. Billed receivables are generally collected within less than 12 months. The allowance is increased by the Company’s provision for doubtful accounts which is charged against income. All recoveries on receivables previously charged off are included in income, while direct charge-offs of receivables are deducted from the allowance.

Unbilled receivables, net represents recognized amounts pending billing pursuant to contract terms or accounts billed after period end, and are expected to be billed and collected within the next 12 months. Generally, billing occurs subsequent to revenue recognition, resulting in contract assets. Unbilled receivables (contract assets) are generally classified as current. The increase in unbilled receivables during the nine months ended September 29, 2018, is primarily due to the timing of billings in both INF and BTS reportable segments as discussed in Note 14.

In certain circumstances, the contract may allow for billing terms that result in the cumulative amounts billed in excess of revenues recognized. The liability “Billings in excess of costs and estimated earnings on uncompleted contracts” represents billings in excess of revenues recognized on these contracts as of the reporting date. This liability is generally classified as current. Revenue recognized for the three and nine months ended September 29, 2018 that was included in the contract liability balance at the beginning of fiscal year 2018 was approximately \$222 and \$434, respectively.

Practical Expedients and Exemptions

The Company utilizes the portfolio method practical expedient which allows companies to account for multiple contracts as a portfolio, instead of accounting for them on a contract by contract basis (commonly known as the contract method).

For the Company’s T&M contracts, the Company applies the as-invoiced practical expedient, which permits the Company to recognize revenue as the right to invoice for services performed.

Note 3 – Recent Accounting Pronouncements

In January 2017, the FASB issued ASU 2017-04, *Intangibles-Goodwill and Other (Topic 350) Simplifying the Test for Goodwill Impairment*. This ASU eliminates Step 2 of the goodwill impairment test and simplifies how the amount of an impairment loss is determined. The update is effective for public companies in the beginning of fiscal year 2020 and shall be applied on a prospective basis. The Company will adopt this ASU at the beginning of fiscal year 2020. The Company does not expect the impact of this ASU to be material to its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230), Classification of Certain Cash Receipts and Cash Payments*. This ASU clarifies guidance for cash flow classification to reduce current and potential future diversity in practice. The update is effective for public companies in the beginning of fiscal 2018. The amendments should be applied using a retrospective transition method to each period presented. For items that are impractical to apply the amendments retrospectively, they shall be applied prospectively as of the earliest date practicable. The Company adopted this ASU at the beginning of fiscal year 2018 and the impact did not have a material effect on the Company's consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-2, *Leases (Topic 842)*, which requires lessees to recognize a right-to-use asset and a lease obligation for all leases. Lessees are permitted to make an accounting policy election to not recognize an asset and liability for leases with a term of twelve months or less. Lessor accounting under the new standard is substantially unchanged. Additional qualitative and quantitative disclosures, including significant judgments made by management, will be required. In July 2018, the FASB issued ASU 2018-11, *Leases (Topic 842): Targeted Improvements*, which provides another transition method allowing entities to initially apply the new leases standard at the adoption date and recognize a cumulative-effect adjustment to retained earnings in the period of adoption rather than recasting the prior periods presented. The Company will adopt the new standard as of the beginning of fiscal 2019 using the modified retrospective approach with the optional transition relief. The Company expects the adoption of this standard to have a significant impact on our consolidated balance sheets, but not our statement of operations.

Note 4 – Business Acquisitions

On August 24, 2018, the Company acquired all of the outstanding equity interests in CALYX Engineers and Consultants, Inc. ("CALYX"), an infrastructure and transportation firm based in Cary, North Carolina. CALYX provides roadway and structure design, transportation planning, water resources, construction services, utility services, building structure design, land development, traffic services, cultural resources, surveying, and environmental services. CALYX serves both public and private clients, including state departments of transportation, municipalities, developers, higher education, and healthcare systems. The acquisition of CALYX will expand our infrastructure engineering service in the southeast United States. The purchase price of this acquisition is \$34,000, subject to customary closing working capital adjustments, including \$25,000 in cash, \$4,000 in promissory notes (bearing interest at 3.75%), payable in four installments of \$1,000, due on the first, second, third and fourth anniversaries of August 24, 2018 (see Note 9), \$3,000 of the Company's common stock (36,379 shares) as of the closing date of the acquisition, and \$2,000 in cash payable within 120 days of the closing date. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for CALYX, the Company engaged a third-party independent valuation specialist to assist in the determination of fair values. The Company expects to finalize the purchase price allocation with respect to this transaction by the end of the second quarter of 2019.

On February 2, 2018, the Company acquired CSA (M&E) Ltd. (“CSA”), a leading provider of Mechanical, Electrical, and Plumbing (MEP) engineering and sustainability consulting services. CSA provides MEP and sustainability services for the retail, education, healthcare, industrial, corporate, hospitality and infrastructure market sectors with offices in Hong Kong, Macau and the UAE. CSA serves private and public sector clients throughout Asia and the Middle East. The purchase price of this acquisition was up to \$4,200, including \$2,000 in cash; \$600 in promissory notes (bearing interest at 3%), payable in four installments of \$150, due on the first, second, third and fourth anniversaries of February 2, 2018, the effective date of the acquisition; and \$150 of the Company’s common stock (2,993 shares) issued as of the closing date. The purchase price also includes \$250 of the Company’s common stock payable in two installments of \$125, due on the first and second anniversaries of the acquisition. The purchase price also included a non-interest bearing earn-out of up to \$1,200 payable in cash and stock, subject to the achievement of certain agreed upon financial metrics for fiscal year 2018. The earn-out of \$1,200 is non-interest bearing and was recorded at its estimated fair value of \$899, based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. The note and the earn-out are due to a related party individual who became an employee of the Company upon the acquisition. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for CSA, the Company engaged a third-party independent valuation specialist to assist in the determination of fair values. The Company expects to finalize the purchase price allocation with respect to this transaction by the end of the fourth quarter of 2018.

On January 12, 2018, the Company acquired all of the outstanding equity interest in Butsko Utility Design, Inc. (“Butsko”). Butsko is leading provider of utility planning and design services serving both public and private sector clients through its offices in Southern California and Washington. The purchase price of this acquisition was up to \$4,250, including \$1,500 in cash; \$1,000 in promissory notes (bearing interest at 3%), payable in four installments of \$250, due on the first, second, third and fourth anniversaries of January 12, 2018, the effective date of the acquisition; and \$300 of the Company’s common stock (5,630 shares) issued as of the closing date. The purchase price also includes \$600 of the Company’s common stock payable in two installments of \$300, due on the first and second anniversaries of the acquisition. The purchase price also included a non-interest bearing earn-out of up to \$850 payable in cash and stock, subject to the achievement of certain agreed upon financial metrics for fiscal year 2018. The earn-out of \$850 is non-interest bearing and was recorded at its estimated fair value of \$666, based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. The note and the earn-out are due to a related party individual who became an employee of the Company upon the acquisition. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for Butsko, the Company engaged a third-party independent valuation specialist to assist in the determination of fair values. The Company expects to finalize the purchase price allocation with respect to this transaction by the end of the fourth quarter of 2018.

On September 6, 2017, the Company acquired all of the outstanding equity interests in Marron and Associates, Inc. (“Marron”), a leading environmental services firm with offices in Albuquerque and Las Cruces, New Mexico. Marron provides environmental planning, natural and cultural resources, environmental site assessment, and GIS services. Marron primarily serves public and private clients throughout the Southwest, including the New Mexico Department of Transportation, Bureau of Land Management, Bureau of Indian Affairs, Federal Highway Administration, U.S. Department of Agriculture, U.S. Fish and Wildlife Service, and U.S. Forest Service. The purchase price of this acquisition is up to \$990 including \$400 in cash, \$300 in promissory notes (bearing interest at 3.0%), payable in three installments of \$100, due on the first, second and third anniversaries of September 6, 2017, the effective date of the acquisition (see Note 9), \$67 of the Company’s common stock (1,510 shares) as of the closing date of the acquisition and \$133 in stock or a combination of cash and shares of the Company’s stock, at its discretion, payable in two equal installments, due on the first and second anniversaries of September 6, 2017. The purchase price also included an earn-out of \$90, subject to the achievement of certain agreed upon metrics for calendar year 2017. The note and the earn-out are due to a related party individual who became an employee of the Company upon the acquisition. The Company internally determined the preliminary fair values of tangible and intangible assets acquired and liabilities assumed.

On June 6, 2017, the Company acquired all of the outstanding equity interests in Richard D. Kimball Co. ("RDK"), an established leader in the provision of energy efficiency and mechanical, electric and plumbing (MEP) services based in Boston, Massachusetts. In addition to MEP and fire protection services, RDK offers commissioning services, technology design services, and energy and sustainability services, including Whole Building Energy Modeling and ASHRAE Level Energy Audits, Green Building Certification, Energy Code Consulting, Carbon Emissions Management, and Renewable Energy Management. RDK primarily serves commercial, healthcare, science and technology, education, government, and transportation clients. The purchase price of this acquisition is up to \$22,500, subject to customary closing working capital adjustments, including \$15,000 in cash, \$5,500 in promissory notes (bearing interest at 3.0%), payable in four installments of \$1,375, due on the first, second, third and fourth anniversaries of June 6, 2017 (see Note 9), \$667 of the Company's common stock (18,072 shares) as of the closing date of the acquisition, and \$1,333 in stock or a combination of cash and shares of the Company's stock, at our discretion, payable in two equal installments, due on the first and second anniversaries of June 6, 2017. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for RDK, we engaged a third-party independent valuation specialist to assist in the determination of fair values.

On May 4, 2017, the Company acquired all of the outstanding equity interests in Holdrege & Kull, Consulting Engineers and Geologists ("H&K"), a full-service geotechnical engineering firm based in Northern California. H&K provides services to public, municipal and special district, industrial, and private sector clients. The purchase price of this acquisition is up to \$2,200 including \$1,000 in cash, \$600 in promissory notes (bearing interest at 3.0%), payable in four installments of \$150, due on the first, second, third and fourth anniversaries of May 4, 2017, the effective date of the acquisition (see Note 9), and \$100 of the Company's common stock (2,628 shares) as of the closing date of the acquisition. The purchase price also included an interest bearing earn-out of \$500 promissory note, subject to the achievement of certain agreed upon metrics for calendar year 2017. The earn-out promissory note is payable in four installments of \$125, due on the first, second, third and fourth anniversaries of May 4, 2017. The earn-out of \$500 was recorded at its estimated fair value of \$405, based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. The note and the earn-out are due to a related party individual who became an employee of the Company upon the acquisition. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for H&K, we engaged a third-party independent valuation specialist to assist in the determination of fair values.

On May 1, 2017, the Company acquired all of the outstanding equity interests in Lochrane Engineering Incorporated ("Lochrane"), an Orlando, Florida based civil engineering firm, which specializes in the provision of services on major roadway projects, and its major clients include the Florida Department of Transportation and Florida's Turnpike Enterprise. The purchase price of this acquisition is up to \$4,940 including \$2,690 in cash, \$2,200 in promissory notes

(bearing interest at 3.0%), payable in four installments of \$550, due on the first, second, third and fourth anniversaries of May 1, 2017, the effective date of the acquisition (see Note 9), \$17 of the Company's common stock (441 shares) as of the closing date of the acquisition, and \$33 in stock or a combination of cash and shares of the Company's stock, at our discretion, payable in two equal installments, due on the first and second anniversaries of May 1, 2017. Included in the \$2,200 promissory notes, is an earn-out of \$550, subject to the achievement of certain agreed upon metrics for calendar year 2017. The earn-out of \$550 is interest bearing and was recorded at its estimated fair value of \$413, based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. The note and the earn-out are due to a related party individual who became an employee of the Company upon the acquisition. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for Lochrane, we engaged a third-party independent valuation specialist to assist in the determination of fair values.

On April 14, 2017, the Company acquired all of the outstanding equity interests in Bock & Clark Corporation ("B&C"), an Akron, Ohio based surveying, commercial zoning, and environmental services firm. The acquisition of B&C will expand our cross-selling opportunities within our infrastructure engineering, surveying, and program management groups and with our financial and transactional real estate clients. The aggregate purchase price consideration paid by the Company in connection with the acquisition was \$42,000, subject to customary closing working capital adjustments, funded entirely in cash. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed for Bock & Clark, we engaged a third-party independent valuation specialist to assist in the determination of fair values.

Total Consideration	41,660	72,347
Excess consideration over the amounts assigned to the net assets acquired (Goodwill)	\$ 15,155	\$ 40,658

Goodwill was recorded based on the amount by which the purchase price exceeded the fair value of the net assets acquired and the amount is attributable to the reputation of the business acquired, the workforce in place and the synergies to be achieved from these acquisitions. See Note 7 for further information on goodwill and identified intangibles.

The consolidated financial statements of the Company for the three and nine months ended September 29, 2018 include the results of operations from any business acquired during 2018 from their respective dates of acquisition to

September 29, 2018. For the three and nine months ended September 29, 2018, the results include gross revenues of \$4,984 and \$11,374, respectively, and income before taxes of \$1,356 and \$2,008, respectively. For the three and nine months ended September 30, 2017, the results include gross revenues of \$21,316 and \$35,524, respectively, and income before taxes of \$3,905 and \$6,847, respectively. Included in general and administrative expense for the three and nine months ended September 29, 2018 is \$213 and \$583, respectively, of acquisition-related costs pertaining to the Company's acquisition activities. Included in general and administrative expense for the three and nine months ended September 30, 2017 is \$315 and \$892, respectively, of acquisition-related costs pertaining to the Company's acquisition activities.

Senior Credit Facility

On December 7, 2016, the Company entered into a Credit Agreement (the “Credit Agreement”) with Bank of America, N.A. (“Bank of America”) and Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPFS”). Pursuant to the Credit Agreement, Bank of America agreed to be the sole administrative agent for a five-year \$80,000 Senior Secured Revolving Credit Facility (“Senior Credit Facility”) to the Company and, together with PNC Bank, National Association and Regions Bank as the other lenders under the Senior Credit Facility, has committed to lend to the Company all of the Senior Credit Facility, subject to certain terms and conditions. MLPFS has undertaken to act as sole lead arranger and sole book manager for the Senior Credit Facility. In addition, the Senior Credit Facility includes an accordion feature permitting the Company to request an increase in the Senior Credit Facility by an additional amount of up to \$60,000. The Senior Credit Facility includes a \$5,000 sublimit for the issuance of standby letters of credit and a \$15,000 sublimit for swingline loans. The proceeds of the Senior Credit Facility are intended to be used (i) to finance permitted acquisitions, (ii) for capital expenditures, and (iii) for general corporate purposes.

Borrowings under the Credit Agreement are at variable rates which are, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base rate denominated in U.S. dollars. Interest rates are subject to change based on our Consolidated Senior Leverage Ratio (as defined in the Credit Agreement).

The Senior Credit Facility contains certain financial covenants, including a maximum leverage ratio of 3.0:1 and minimum fixed charge coverage ratio of 1.20:1. Furthermore, the Senior Credit Facility also contains financial reporting covenant provisions and other covenants, representations, warranties, indemnities, and events of default that are customary for facilities of this type. As of September 29, 2018 and December 30, 2017, the Company is in compliance with these financial and reporting covenants. As of September 29, 2018 and December 30, 2017, the outstanding balance on the Senior Credit Facility was \$0 and \$36,500, respectively.

Note 11 – Commitments and Contingencies*Litigation, Claims and Assessments*

The Company is subject to certain claims and lawsuits typically filed against the engineering, consulting and construction profession, alleging primarily professional errors or omissions. The Company carries professional liability insurance, subject to certain deductibles and policy limits, against such claims. However, in some actions, parties are seeking damages that exceed our insurance coverage or for which we are not insured. While management does not believe that the resolution of these claims will have a material adverse effect, individually or in aggregate, on its financial position, results of operations or cash flows, management acknowledges the uncertainty surrounding the ultimate resolution of these matters.

The Company's office leases are classified as operating leases and rent expense is included in facilities and facilities related expense in the Company's Consolidated Statements of Net Income and Comprehensive Income. Some lease terms include rent and other concessions and rent escalation clauses which are included in computing minimum lease payments. Minimum lease payments are recognized on a straight-line basis over the minimum lease term. The variance of rent expense recognized from the amounts contractually due pursuant to the underlying leases is included in accrued liabilities in the Company's consolidated balance sheets.

Note 12 – Stock-Based Compensation

In October 2011, the Company's stockholders approved the 2011 Equity Incentive Plan, which was subsequently amended and restated in March 2013 (as amended, the "2011 Equity Plan"). The 2011 Equity Plan provides directors, executive officers, and other employees of the Company with additional incentives by allowing them to acquire ownership interest in the business and, as a result, encouraging them to contribute to the Company's success. The Company may provide these incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and units, and other cash-based or stock-based awards. As of September 29, 2018, 1,049,102 shares of common stock are authorized and reserved for issuance under the 2011 Equity Plan. This reserve automatically increases on each January 1 from 2014 through 2023, by an amount equal to the smaller of (i) 3.5% of the number of shares issued and outstanding on the immediately preceding December 31, or (ii) an amount determined by the Company's Board of Directors. The restricted shares of common stock granted generally provide for service-based vesting after two to four years following the grant date.

Share-based compensation expense relating to restricted stock awards during the three and nine months ended September 29, 2018 was \$1,902 and \$4,541, respectively, and \$1,161 and \$2,743, for the three and nine months ended September 30, 2017, respectively. Approximately \$14,416 of deferred compensation, which is expected to be recognized over the remaining weighted average vesting period of 2.04 years, is unrecognized at September 29, 2018. The total fair value of restricted shares vested during the nine months ended September 29, 2018 and September 30, 2017 was \$7,422 and \$3,443, respectively.

Note 13 – Income Taxes

On December 22, 2017 the Tax Cuts and Jobs Act (“2017 Tax Reform”) was enacted in the United States. Among its many provisions, the 2017 Tax Reform reduced the U.S. corporate income tax rate from 35% to 21%, effective January 1, 2018. The 2017 Tax Reform requires a one-time transition tax on undistributed foreign earnings and creates a new provision designed to tax global intangible low-taxed income (“GILTI”). Also, the SEC issued guidance in Staff Accounting Bulletin No. 118 which provides for a measurement period of up to one year after the enactment for companies to complete their accounting for the 2017 Tax Reform.

As a result of the 2017 Tax Reform, during the fourth quarter of 2017, the Company recorded a provisional liability of \$357 with a corresponding adjustment to income tax expense related to the one-time transition tax on undistributed foreign earnings. The provisional adjustment related to the 2017 Tax Reform was determined using reasonable estimates. During the three and nine months ended September 29, 2018, the Company did not recognize adjustments to the provisional amount recorded at December 30, 2017. The Company has not yet collected and analyzed all necessary tax and earnings data of its foreign operations and therefore, the Company has not yet completed its accounting for the income tax effects of the transition tax. The Company will continue to make and refine its calculations as additional analysis is complete. The Company currently anticipates finalizing and recording any resulting adjustments by the end of fiscal year 2018.

The 2017 Tax Reform subjects a U.S. shareholder to tax on GILTI earned by certain foreign subsidiaries. At September 29, 2018, because the Company is still evaluating the GILTI provisions, the Company has included tax expense related to GILTI for the current year in its estimated annual effective tax rate and has not provided additional GILTI on deferred items.

The ultimate impact of the 2017 Tax Reform may differ from these preliminary conclusions due to changes in interpretations and assumptions made by us as well as additional regulatory guidance that may be issued. At this time, we believe all preliminary conclusions reported are reasonably estimated but may adjust them over time as more information becomes available. Further adjustments, if any, will be recorded by us during the measurement period in 2018 as permitted by SEC Staff Accounting Bulletin 118, Income Tax Accounting Implications of the 2017 Tax Reform. The 2017 Tax Reform provides that the measurement period must be completed by December 22, 2018.

(in thousands, except share data)

As of September 29, 2018 and December 30, 2017, the Company had net deferred income tax liabilities of \$11,966 and \$10,905, respectively. No valuation allowance against the Company's deferred income tax assets is needed as of September 29, 2018 and December 30, 2017 as it is more-likely-than-not that the positions will be realized upon settlement. Deferred income tax liabilities primarily relate to intangible assets and accounting basis adjustments where the Company has a future obligation for tax purposes. During the nine months ended September 29, 2018, the Company recorded deferred income tax liabilities of \$496 in conjunction with the purchase price allocation of CSA as a result of the intangibles acquired in the acquisition and vesting of restricted stock.

The Company's consolidated effective income tax rate was 24.5% and 24.8% for the three and nine months ended September 29, 2018, respectively, and 31.3% and 33.4% for the three and nine months ended September 30, 2017, respectively. The difference between the effective income tax rate and the combined statutory federal and state income tax rate is principally due to research and development credits. Furthermore, during the three and nine months ended September 29, 2018, the Company recorded reductions in income tax expense of \$95 and \$1,210, and for the three and nine months ended September 30, 2017, respectively, the Company recorded reductions in income tax expense of \$114 and \$974, respectively, relating to the income tax benefit received in conjunction with the vesting of restricted stock during the periods.

The Company evaluates tax positions for recognition using a more-likely-than-not recognition threshold, and those tax positions eligible for recognition are measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon the effective settlement with a taxing authority that has full knowledge of all relevant information. The California Franchise Tax Board ("CFTB") challenged research and development tax credits generated for the years 2012 to 2014. Fiscal years 2012 through 2017 are considered open tax years in the State of California and 2015 through 2017 in the U.S. federal jurisdiction and other state jurisdictions. The Company's 2014 income tax return was being reviewed by the Internal Revenue Service (the "IRS"), however during the second quarter of 2018, the IRS closed the examination with no changes to the Company's previously filed 2014 federal income tax return.

At September 29, 2018 and December 30, 2017, the Company had \$437 of unrecognized tax benefits. Included in the balance of unrecognized tax benefits at September 29, 2018 and December 30, 2017 were \$437 of tax benefits that, if recognized, would affect our effective tax rate. It is not expected that there will be a significant change in the unrecognized tax benefits in the next 12 months.

Note 14 – Reportable Segments

The Company reports segment information in accordance with ASC Topic No. 280 “*Segment Reporting*” (“Topic No. 280”). The Company’s Chief Executive Officer is the chief operating decision maker and organized the Company into two operating and reportable segments: Infrastructure (INF), which includes our engineering, civil program management, and construction quality assurance practices; and Building, Technology & Sciences (BTS), which includes our energy, environmental practices and buildings program management practices.

The Company evaluates the performance of these reportable segments based on their respective operating income before the effect of amortization expense related to acquisitions and other unallocated corporate expenses. The Company accounts for inter-segment revenues and transfers as if the sales and transfers were to third parties. All intercompany balances and transactions are eliminated in consolidation.

Upon adoption of Topic 606, the Company disaggregates its gross revenues from contracts with customers by geographic location, customer-type and contract-type for each of its reportable segments. Disaggregated revenues include the elimination of inter-segment revenues which has been allocated to each segment. The Company believes this best depicts how the nature, amount, timing and uncertainty of its revenues and cash flows are affected by economic factors.

Note 15 – Subsequent Events

On November 2, 2018, the Company acquired CHI Engineering, Inc. (“CHI”), a leading provider of engineering, procurement, and construction management services for the LNG, Natural Gas, and LPG industries. The aggregate purchase price paid by the Company is up to \$53,000, paid with a combination of cash, stock and promissory notes at closing and future cash, stock and note payments.

Under the acquisition method of accounting, the Company will recognize the assets acquired and the liabilities assumed at their fair values and will record an allocation of the purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date. The Company expects goodwill will be recorded based on the amount by which the purchase price exceeds the fair value of the net assets acquired, the amount attributable to the reputation of the business acquired, the workforce in place and the backlog from this acquisition. In order to determine the fair values of tangible and intangible assets acquired and liabilities assumed, the Company will engage a third party independent valuation specialist to assist in management’s determination of fair values total of tangible and intangible assets acquired and liabilities of this acquisition. The initial accounting for this acquisition is incomplete at this time due to the recent closing of the transaction. The Company expects to establish a preliminary purchase price allocation with respect to this transaction by the end of the fourth quarter of 2018.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of the financial condition and results of operations of NV5 Global, Inc. and its subsidiaries (collectively, the “Company,” “we,” “our” or “NV5 Global”) should be read in conjunction with the financial statements included elsewhere in this Quarterly Report and the audited financial statements for the year ended December 30, 2017, included in our Annual Report on Form 10-K (File No. 001-35849). This Quarterly Report contains, in addition to unaudited historical information, forward-looking statements, which involve risk and uncertainties. The words “believe,” “expect,” “estimate,” “may,” “will,” “could,” “plan,” or “continue” and similar expressions are intended to identify forward-looking statements. Our actual results could differ materially from the results those anticipated in such forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, those discussed under the headings “Risk Factors” in our Annual Report on Form 10-K for the year ended December 30, 2017 and this Quarterly Report on Form 10-Q, if any. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to (and we expressly disclaim any obligation to) revise or update any forward-looking statement, whether as a result of new information, subsequent events, or otherwise (except as may be required by law), in order to reflect any event or circumstance which may arise after the date of this Quarterly Report on Form 10-Q. Amounts presented are in thousands, except per share data.

Overview

We are a provider of professional and technical engineering and consulting solutions to public and private sector clients. We focus on the infrastructure, energy, construction, real estate, and environmental markets. We primarily focus on the following business service verticals: construction quality assurance, infrastructure, energy, program management, and environmental solutions. Our primary clients include U.S. federal, state, municipal, and local government agencies, and military and defense clients. We also serve quasi-public and private sector clients from the education, healthcare, energy, and public utilities, including schools, universities, hospitals, health care providers, insurance providers, large utility service providers, and large to small energy producers.

Recent Acquisition, Developments and Challenges

Recent Acquisitions.

On November 2, 2018, the Company acquired CHI Engineering, Inc. (“CHI”), a leading provider of engineering, procurement, and construction management services for the LNG, Natural Gas, and LPG industries. The aggregate purchase price paid by the Company is up to \$53,000, paid with a combination of cash, stock and promissory notes at closing and future cash, stock and note payments.

On August 24, 2018, we acquired all of the outstanding equity interests in CALYX Engineers and Consultants, Inc. (“CALYX”), an infrastructure and transportation firm based in Cary, North Carolina. CALYX provides roadway and structure design, transportation planning, water resources, construction services, utility services, building structure design, land development, traffic services, cultural resources, surveying, and environmental services. CALYX serves both public and private clients, including state departments of transportation, municipalities, developers, higher education, and healthcare systems. The purchase price of this acquisition is \$34,000, paid with a combination of cash at closing, stock and future note payments.

On February 2, 2018, we acquired CSA (M&E) Ltd. (“CSA”), a leading provider of Mechanical, Electrical, and Plumbing (MEP) engineering and sustainability consulting services. CSA provides MEP and sustainability services for the retail, education, healthcare, industrial, corporate, hospitality and infrastructure market sectors with offices in Hong Kong, Macau and the UAE. CSA serves private and public sector clients throughout Asia and the Middle East. The purchase price of this acquisition was up to \$4,200, paid with a combination of cash at closing, stock and future note payments.

On January 12, 2018, we acquired all of the outstanding equity interest in Butsko Utility Design, Inc. (“Butsko”). Butsko is leading provider of utility planning and design services serving both public and private sector clients through its offices in Southern California and Washington. The purchase price of this acquisition was up to \$4,250, paid with a combination of cash at closing, stock and future note payments.

Secondary offering

On August 9, 2018, we priced an underwritten follow-on offering of 1,270,000 shares of the Company's common stock (the "Firm Shares") at an offering price of \$79.00 per share. The shares were sold pursuant to an effective registration statement on Form S-3 (Registration No. 333-224392). In addition, a selling stockholder of the Company granted the underwriters of the offering a 30-day option to purchase up to 190,500 shares (the "Option Shares") of our common stock at the public offering price less the underwriting discount. On August 13, 2018, we closed on the Firm Shares, for which we received net proceeds of approximately \$93,500 after deducting the underwriting discount and estimated offering expenses payable by the Company, and the selling stockholder of the Company closed on the sale of all Option Shares. We did not receive any proceeds associated with the sale of the Option Shares by the selling stockholder.

U.S. Tax Reform

On December 22, 2017 the Tax Cuts and Jobs Act ("2017 Tax Reform") was enacted in the United States. Among its many provisions, the 2017 Tax Reform reduced the U.S. corporate income tax rate from 35% to 21%, effective January 1, 2018. The 2017 Tax Reform requires a one-time transition tax on undistributed foreign earnings and creates a new provision designed to tax global intangible low-taxed income ("GILTI"). Also, the SEC issued guidance in Staff Accounting Bulletin No. 118 which provides for a measurement period of up to one year after the enactment for companies to complete their accounting for the 2017 Tax Reform.

As a result of the 2017 Tax Reform, during the fourth quarter of 2017, we recorded a provisional liability of \$357 with a corresponding adjustment to income tax expense related to the one-time transition tax on undistributed foreign earnings. The provisional adjustment related to the 2017 Tax Reform was determined using reasonable estimates. During the three and nine months ended September 30, 2018, we did not recognize adjustments to the provisional amount recorded at December 30, 2017. We have not yet collected and analyzed all necessary tax and earnings data of our foreign operations and therefore, we have not yet completed its accounting for the income tax effects of the transition tax. We will continue to make and refine its calculations as additional analysis is complete. We currently anticipate finalizing and recording any resulting adjustments by the end of fiscal year 2018.

The 2017 Tax Reform subjects a U.S. shareholder to tax on GILTI earned by certain foreign subsidiaries. At September 29, 2018, because we are still evaluating the GILTI provisions, we have included tax expense related to GILTI for the current year in our estimated annual effective tax rate and has not provided additional GILTI on deferred items.

The ultimate impact of the 2017 Tax Reform may differ from these preliminary conclusions due to changes in interpretations and assumptions made by us as well as additional regulatory guidance that may be issued. At this time, we believe all preliminary conclusions reported are reasonably estimated but may adjust them over time as more information becomes available. Further adjustments, if any, will be recorded by us during the measurement period in 2018 as permitted by SEC Staff Accounting Bulletin 118, Income Tax Accounting Implications of the 2017 Tax Reform. The 2017 Tax Reform provides that the measurement period must be completed by December 22, 2018.

Tax credit.

We are currently under examination by the CFTB about certain research and development tax credits generated for the years 2012 to 2014. Fiscal years 2012 through 2017 are considered open tax years in the State of California and 2015 through 2017 in the U.S. federal jurisdiction and other state jurisdictions. At September 29, 2018 and December 30, 2017, we had \$437 of unrecognized tax benefits.

Backlog.

As of September 29, 2018, we had \$467,135 of remaining performance obligations, or backlog, of which \$342,338 or 73% is expected to be recognized over the next 12 months and the remaining over the next 24 months. We include in backlog only those contracts for which funding has been provided and work authorizations have been received. Not included in backlog is work awarded to us under master services agreements but not under contract. We cannot guarantee that the revenue projected in our backlog will be realized or, if realized, will result in profits. In addition, project cancellations or scope adjustments may occur, from time to time, with respect to contracts reflected in our backlog. For example, certain of our contracts with the U.S. federal government and other clients are terminable at the discretion of the client, with or without cause. These types of backlog reductions could adversely affect our revenue and margins. Accordingly, our backlog as of any particular date is an uncertain indicator of our future earnings.

Table of Contents

Segments.

The Company operations are organized into two reportable segments: (i) Infrastructure (INF), which includes our engineering, civil program management, and construction quality assurance practices; and (ii) Building, Technology & Sciences (BTS), which includes our energy, environmental practices and buildings program management practices.

For additional information regarding our reportable segments, see "Reportable Segments" of the "Notes to Consolidated Financial Statements" included elsewhere herein.

Jumpstart Our Business Startups Act of 2012

We are an emerging growth company within the meaning of the rules under the Securities Act, and we utilize certain exemptions from various reporting requirements that are applicable to public companies that are not emerging growth companies. For example, we did not have to provide an auditor's attestation report on our internal controls in the Annual Report on Form 10-K for the year ended December 30, 2017 as otherwise required by Section 404(b) of the Sarbanes-Oxley Act. As December 29, 2018 represents the last day of the fifth fiscal year following our IPO, we will therefore no longer qualify for such status commencing December 29, 2018. As an accelerated filer not entitled to emerging growth company status, we will be subject to certain disclosure requirements that are applicable to other public companies that have not been applicable to us as an emerging growth company, including the provision of an auditor's attestation report on our internal controls, beginning with our Annual Report on Form 10-K filed for the fiscal year ending December 29, 2018. The JOBS Act also permits us, as an "emerging growth company," to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies. We have chosen to "opt out" of this provision and, as a result, we will comply with new or revised accounting standards when they are required to be adopted by issuers. This decision to opt out of the extended transition period under the JOBS Act is irrevocable.

Critical Accounting Policies and Estimates

The discussion of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with GAAP. During the preparation of these financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses, and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. We base our estimates on

historical experience and on various other assumptions that we believe are reasonable under the circumstances. The results of our analysis form the basis for making assumptions about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions, and the impact of such differences may be material to our financial statements. The more significant estimates affecting amounts reported in the consolidated financial statements relate to the fair value estimates used in accounting for business combinations (including the valuation of identifiable intangible assets) and contingent consideration, fair value estimates in determining the fair value of the Company's reporting units for goodwill impairment assessment, revenue recognition over time, allowances for uncollectible accounts and provision for income taxes.

During the three months ended September 29, 2018, we did not experience any significant changes in estimates or judgments inherent in the preparation of our consolidated financial statements other than adoption of Topic 606 as discussed below. A summary of our significant accounting policies is contained in Note 2 to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 30, 2017.

On the first day of fiscal year 2018, we adopted ASC Topic 606, *Revenue from Contracts with Customers* ("Topic 606"), using the modified retrospective approach to all contracts that were not completed as of the beginning of fiscal year 2018. Topic 606 is a comprehensive new revenue recognition model that required a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. Topic 606 became effective for us in the first quarter of fiscal year 2018. Results for reporting periods beginning after December 30, 2017 are presented under Topic 606, while prior period amounts and disclosures are not adjusted and continue to be reported under the accounting standards in effect for the prior period. Adoption of Topic 606 did not have an impact on our consolidated net income, financial position, and cash flows, however it has resulted in expanded disclosures. Revenue from the vast majority of our contracts will continue to be recognized over time because of the continuous transfer of control to the customer. The impact to revenues from adopting Topic 606 for the three and nine months ended September 29, 2018 was immaterial.

Table of Contents

To determine the proper revenue recognition method, we evaluate whether two or more contracts should be combined and accounted for as one single contract and whether the combined or single contract should be accounted for as more than one performance obligation. The majority of our contracts have a single performance obligation as the promise to transfer the individual goods or services is not separately identifiable from other promises in the contracts and therefore, not distinct. We may also promise to provide distinct goods or services within a contract in which case we separate the contract into multiple performance obligations. For contracts with multiple performance obligations, we allocate the contract transaction price to each performance obligation using the best estimate of the standalone selling price of each distinct good or service in the contract. Typically, we sell a customer a specific service, and in these cases we use the expected cost plus a margin approach to estimate the standalone selling price of each performance obligation.

Our performance obligations are satisfied as work progresses or at a point in time. Gross revenues from services transferred to customers over time accounted for 92% of our revenues for the three and nine months ended September 29, 2018. For our cost-reimbursable contracts, revenue is recognized over time using direct costs incurred or direct costs incurred to date as compared to the estimated total direct costs for performance obligations because it best depicts the transfer of control to the customer which occurs as we incur costs on its contracts. Contract costs include labor, subcontractors' costs and other direct costs. Gross revenue from services transferred to customers at a point in time accounted for 8% of our revenues for the three and nine months ended September 29, 2018. Revenue from these contracts is recognized when the customer obtains control of the asset, which is generally upon delivery and acceptance by the customer of the reports and/or analysis performed.

Contract modifications are common in the performance of our contracts. Contracts modified typically result from changes in scope, specifications, design, performance, sites, or period of completion. In most cases, contract modifications are for services that are not distinct, and, therefore, are accounted for as part of the existing contract.

Contract estimates are based on various assumptions to project the outcome of future events. These assumptions are dependent upon the accuracy of a variety of estimates, including engineering progress, achievement of milestones, labor productivity and cost estimates. Due to uncertainties inherent in the estimation process, it is possible that actual completion costs may vary from estimates. If estimated total costs on contracts indicate a loss or reduction to the percentage of total contract revenues recognized to date, these losses or reductions are recognized in the period in which the revisions are known. The effect of revisions to revenues, estimated costs to complete contracts, including penalties, incentive awards, change orders, claims, anticipated losses and others are recorded on the cumulative catch-up basis in the period in which the revisions are identified and the loss can be reasonably estimated. Such revisions could occur in any reporting period and the effects on the results of operations for that reporting period may be material depending on the size of the project or the adjustment. During the nine months ended September 29, 2018, the cumulative catch-up adjustment for contract modifications was not material.

A significant amount of our revenues are derived under multi-year contracts. We enter into contracts with our clients that contain two principal types of pricing provisions: cost-reimbursable and fixed-unit price. The majority of our contracts are cost-reimbursable contracts that fall under the category of time and materials contracts.

Cost-reimbursable contracts. Cost-reimbursable contracts consist of the following:

Time and materials contracts are common for smaller scale professional and technical consulting and certification services projects. Under these types of contracts, there is no predetermined fee. Instead, the Company negotiates hourly billing rates and charges the clients based upon actual hours expended on a project. In addition, any direct project expenditures are passed through to the client and are typically reimbursed. These contracts may have an initial not-to-exceed or guaranteed maximum price provision.

Cost-plus contracts are the predominant contracting method used by U.S. federal, state, and local governments. Under these type contracts, the Company charges clients for its costs, including both direct and indirect costs, plus a negotiated fee. The total estimated cost plus the negotiated fee represents the total contract value.

Lump-sum contracts typically require the performance of all of the work under the contract for a specified lump-sum fee, subject to price adjustments if the scope of the project changes or unforeseen conditions arise. Many of the Company's lump-sum contracts are negotiated and arise in the design of projects with a specified scope and project deliverables. In most cases, we can bill additional fees if the project schedule is modified and lengthened.

Table of Contents

Fixed-unit price contracts. Fixed unit-price contracts consist of the following:

Fixed-unit price contracts typically require the performance of an estimated number of units of work at an agreed price per unit, with the total payment under the contract determined by the actual number of units performed.

Federal Acquisition Regulations (“FAR”), which are applicable to our federal government contracts and may be incorporated in local and state agency contracts, limit the recovery of certain specified indirect costs on contracts. Cost-plus contracts covered by FAR or certain state and local agencies also may require an audit of actual costs and provide for upward or downward adjustments if actual recoverable costs differ from billed recoverable costs.

Net Revenues is not a measure of financial performance under GAAP. Gross revenues include sub-consultant costs and other direct costs which are generally pass-through costs. The Company believes that Net Revenues, (1) which is a non-U.S. GAAP financial measure commonly used in our industry, enhances investors' ability to analyze our business trends and performance because it substantially measures the work performed by our employees.

Three and Nine Months Ended September 29, 2018 compared to the Three and Nine Months Ended September 30, 2017

Gross and Net Revenues.

Our consolidated gross revenues increased approximately \$12,922 and \$63,679 or approximately 14% and 27%, for the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. Our consolidated net revenues increased approximately \$9,484 and \$50,786 or approximately 13% and 26% for the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. The increases in gross and net revenues are due primarily to the contribution from various acquisitions completed subsequent to the third quarter of 2017 as well as organic growth from our existing platform. The increases in gross revenues for the three and nine months ended September 29, 2018 includes gross revenues of \$4,984 and \$11,374, respectively, related to acquisitions closed during the first nine months of 2018. Also contributing to the increase in net revenues for the three and nine months ended September 29, 2018 is an increased utilization of our billable employees. The growth in revenues was primarily attributable to increases in energy distribution services; construction materials testing; infrastructure engineering services; energy and environmental services. We are currently unaware of any long-term delays in current projects and therefore are not anticipating such to influence future revenues. Such revenues could be affected by changes in economic conditions and the impact thereof on our public and quasi-public sector funded projects.

Table of Contents

Gross Profit.

As a percentage of gross revenues, our gross profit margin was 48.0% and 48.7%, for the three and nine months ended September 29, 2018, respectively, compared to 51.2% and 50.1% for the three and nine months ended September 30, 2017. The decrease in gross profit margin was due primarily to the mix of projects worked on where there was an increased use of sub-consultants used to perform services. Gross profit includes direct costs of contracts such as direct labor and all costs incurred in connection with and directly for the benefit of client contracts. The level of direct costs of contracts may fluctuate between reporting periods due to a variety of factors, including the amount of sub-consultant costs we incur during a period. On those projects where we are responsible for subcontract labor or third-party materials and equipment, we reflect the amounts of such items in both gross revenues and costs. To the extent that we incur a significant amount of pass-through costs in a period, our direct costs of contracts are likely to increase as well.

Operating expenses.

Our operating expenses increased approximately \$2,213 and \$20,200, or 6% and 20% for the three and nine months ended September 29, 2018, respectively, compared to the three and nine months ended September 30, 2017. The increases in operating expenses were due primarily to operating expenses associated with acquisitions closed during 2017 and 2018. Also contributing to the increase in operating costs is the increased amortization of intangible assets. During the three and nine months ended September 29, 2018, amortization of intangible assets were approximately \$2,980 and \$8,549, respectively, compared to \$3,028 and \$7,528, during the three and nine months ended September 30, 2017, respectively. Operating expenses typically fluctuate as a result of changes in headcount (both corporate and field locations) and the amount of spending required to support our professional services activities, which normally require additional overhead costs.

Interest expense.

Our interest expense decreased \$73 during the three months ended September 29, 2018, compared to the three months ended September 30, 2017. The decrease in interest expense is due primarily to the decrease in outstanding borrowings during this period. Our interest expense increased \$670 during the nine months ended September 29, 2018, compared to the nine months ended September 30, 2017. The increase in interest expense is due primarily to the increase in outstanding borrowings during this period.

Income taxes.

Our consolidated effective income tax rate was 24.5% and 24.8% for the three and nine months ended September 29, 2018, respectively, compared to a consolidated effective income tax rate of 31.3% and 33.4% for the three and nine months ended September 30, 2017, respectively. The difference between the effective income tax rate and the combined statutory federal and state income tax rate is principally due to research and development credits. Furthermore, during the three and nine months ended September 29, 2018, we recorded a reduction in income tax expense of \$95 and \$1,210, respectively, and \$114 and \$974 during the three and nine months ended September 30, 2017, respectively, relating to the income tax benefit received in conjunction with the vesting of restricted stock during the period.

On December 22, 2017, the U.S. enacted tax legislation commonly referred to as the Tax Cuts and Jobs Act (“2017 Tax Reform”), which significantly revises the U.S. tax code by, among other things, lowering the corporate income tax rate from 35% to 21%; limiting the deductibility of interest expense; implementing a territorial tax system, and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries.

Three and Nine Months Ended September 29, 2018 compared to the Three and Nine Months Ended September 30, 2017

Our gross revenues from INF reportable segment increased approximately \$15,029 and \$46,165, or 31% or 34%, respectively, during the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. The increases in gross revenues is due primarily to the contribution from various acquisitions completed during 2017 and 2018 as well as organic growth from our existing platform. The increases during the three and nine months ended September 29, 2018, includes approximately \$5,395 and \$7,587, respectively, related to acquisitions closed during the first nine months of 2018. The increases in revenues the three and nine months ended September 29, 2018 reflects increases in energy distribution services; construction materials testing; infrastructure engineering services; and energy services.

Segment Income before Taxes from INF increased \$1,549 and \$5,202, or 16% and 22%, respectively, during the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. The increases were primarily due to increased revenues from organic growth and contributions from acquisitions

completed during 2017 and 2018.

Our gross revenues from BTS reportable segment decreased approximately \$1,821 and increased \$17,347, or 4% and 16%, respectively, during the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. The increase in gross revenues during the nine months ended September 29, 2018 is due primarily to the contribution from various acquisitions completed during 2017 and 2018 as well as organic growth from our existing platform. Gross revenues during the three and nine months ended September 29, 2018 includes approximately \$505 and \$3,786, respectively, related to acquisitions closed during the first nine months of 2018. The growth in revenues from BTS was primarily attributable to increases in facilities program management and environmental services. The decrease in gross revenues during the three months ended September 29, 2018 is due to temporary delays in project starts in our technology services.

Segment Income before Taxes from BTS increased \$262 and \$6,004, or 4% and 40%, respectively, during the three and nine months ended September 29, 2018 compared to the three and nine months ended September 30, 2017. The increases were primarily from contributions from acquisitions completed during 2017 and 2018.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash and cash equivalents balances, cash flows from operations, borrowing capacity under our Senior Credit Facility, and access to financial markets. Our principal uses of cash are operating expenses, working capital requirements, capital expenditures, repayment of debt, and acquisition expenditures. We believe our sources of liquidity, including cash flows from operations, existing cash and cash equivalents and borrowing capacity under our Senior Credit Facility will be sufficient to meet our projected cash requirements for at least the next twelve months. We will monitor our capital requirements thereafter to ensure our needs are in line with available capital resources.

Table of Contents

We believe our experienced employees and management team are our most valuable resources. Attracting, training, and retaining key personnel have been and will remain critical to our success. To achieve our human capital goals, we intend to remain focused on providing our personnel with entrepreneurial opportunities to increase client contact within their areas of expertise and to expand our business within our service offerings.

Cash Flows

As of September 29, 2018, our cash and cash equivalents totaled \$56,202 and billed receivables, net of allowance for doubtful accounts, totaled \$85,835, compared to \$18,751 and \$70,686, respectively, on December 30, 2017. As of September 29, 2018, our accounts payable and accrued liabilities were \$17,638 and \$19,602, respectively, compared to \$18,373 and \$18,994, respectively, on December 30, 2017. In addition, as of September 29, 2018, we had notes payable and other obligations and contingent consideration of \$33,253 and \$2,995, respectively, compared to \$68,557 and \$1,890, respectively, on December 30, 2017.

Operating activities

For the nine months ended September 29, 2018, net cash provided by operating activities amounted to \$17,570, primarily attributable to net income of \$19,197, which included non-cash charges of \$16,201 from stock based compensation and depreciation and amortization, and decreases of \$3,938 in accounts payable and accrued liabilities and an increase of \$10,155 in billed and unbilled receivables. During the first nine months of 2018, we made income tax payments of approximately \$10,696.

For the nine months ended September 30, 2017, net cash provided by operating activities amounted to \$5,671, primarily attributable to net income of \$12,501, which included non-cash charges of \$12,285 from stock based compensation and depreciation and amortization, and decreases of \$5,078 in accounts payable and accrued liabilities partially offset by an increase of \$17,031 in accounts receivable. During the first nine months of 2017, we made income tax payments of approximately \$4,962.

Investing activities

For the nine months ended September 29, 2018, net cash used in investing activities amounted to \$30,042, resulting from cash used for our acquisitions during 2018 of \$28,460 and the purchase of property and equipment of \$1,582 for our ongoing operations.

For the nine months ended September 30, 2017, net cash used in investing activities amounted to \$61,832, resulting from cash used for our acquisitions during 2017 of \$60,241 and the purchase of property and equipment of \$1,591 for our ongoing operations.

Financing activities

For the nine months ended September 29, 2018, net cash provided by financing activities amounted to \$49,923, primarily due to the net proceeds the secondary offering of \$93,469 and Warrant exercise of \$1,092 offset by principal repayments of \$43,910 towards the Senior Credit Facility and notes payable and \$728 towards contingent consideration.

For the nine months ended September 30, 2017, net cash provided by financing activities amounted to \$36,077, primarily due to net proceeds from borrowing under the Senior Credit Facility of \$42,000 offset by principal repayments of \$5,360 towards notes payable and \$563 towards contingent consideration.

Financing

Senior Credit Facility

On December 7, 2016, we entered into a Credit Agreement (the “Credit Agreement”) with Bank of America, N.A. (“Bank of America”) and Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPFS”). Pursuant to the Credit Agreement, Bank of America agreed to be the sole administrative agent for a five-year \$80,000 Senior Secured Revolving Credit Facility (“Senior Credit Facility”) to the Company and, together with PNC Bank, National Association and Regions Bank as the other lenders under the Senior Credit Facility, has committed to lend to the Company all of the Senior Credit Facility, subject to certain terms and conditions. MLPFS has undertaken to act as sole lead arranger and sole book manager for the Senior Credit Facility. In addition, the Senior Credit Facility includes an accordion feature permitting the Company to request an increase in the Senior Credit Facility by an additional amount of up to \$60,000. The Senior Credit Facility includes a \$5,000 sublimit for the issuance of standby letters of credit and a \$15,000 sublimit for swingline loans. The proceeds of the Senior Credit Facility are intended to be used (i) to finance permitted acquisitions, (ii) for capital expenditures, and (iii) for general corporate purposes.

Borrowings under the Credit Agreement are at variable rates which are, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base rate denominated in U.S. dollars. Interest rates are subject to change based on our Consolidated Senior Leverage Ratio (as defined in the Credit Agreement).

The Senior Credit Facility contains certain financial covenants, including a maximum leverage ratio of 3.0:1 and minimum fixed charge coverage ratio of 1.20:1. Furthermore, the Senior Credit Facility also contains financial reporting covenant provisions and other covenants, representations, warranties, indemnities, and events of default that are customary for facilities of this type. As of September 29, 2018 and December 30, 2017, we were in compliance with these financial and reporting covenants. As of September 29, 2018 and December 30, 2017, the outstanding balance on the Senior Credit Facility was \$0 and \$36,500, respectively.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of September 29, 2018.

Effects of Inflation

Based on our analysis of the periods presented, we believe that inflation has not had a material effect on our operating results. There can be no assurance that future inflation will not have an adverse impact on our operating results and financial condition.

Recently Issued Accounting Pronouncements

For information on recently issued accounting pronouncements, see Note 2 of the notes to the unaudited consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

Cautionary Statement about Forward-Looking Statements

Our disclosure and analysis in this Quarterly Report on Form 10-Q, contain “forward-looking” statements within the meaning of Section 27A of the Securities Act Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Forward-looking statements include, statements regarding our “expectations,” “hopes,” “beliefs,” “intentions,” or “strategies” regarding the future. In addition, any statements that refer to projections, forecasts, or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. We have tried, wherever possible, to identify such statements by using words such as “anticipate,” “believe,” “expect,” “intend,” “estimate,” “predict,” “project,” “may,” “might,” “should,” “would,” “will,” “likely,” “will likely result,” “continue,” “could,” “future,” “potential,” “target,” “forecast,” “goal,” “observe,” “seek,” “strategy” and other words and terms of similar meaning, but the absence of these words does not mean that a statement is not forward looking. The forward-looking statements in this Current Report on Form 10-Q reflect the Company’s current views with respect to future events and financial performance.

Table of Contents

Forward-looking statements are not historical factors and should not be read as a guarantee or assurance of future performance or results, and will not necessarily be accurate indications of the times at, or by, or if such performance or results will be achieved. Forward-looking statements are based on information available at the time those statements are made or management's good faith beliefs, expectations and assumptions as of that time with respect to future events. Because forward-looking statements relate to the future, they are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include:

our ability to retain the continued service of our key professionals and to identify, hire and retain additional qualified professionals;

changes in demand from the local and state government and private clients that we serve;

general economic conditions, nationally and globally, and their effect on the demand and market for our services;

fluctuations in our results of operations;

the government's funding and budgetary approval process;

the possibility that our contracts may be terminated by our clients;

our ability to win new contracts and renew existing contracts;

our dependence on a limited number of clients;

our ability to complete projects timely, in accordance with our customers' expectations, or profitability;

our ability to successfully execute our mergers and acquisitions strategy, including the integration of new companies into our business;

our ability to successfully manage our growth strategy;

our ability to raise capital in the future;

competitive pressures and trends in our industry and our ability to successfully compete with our competitors;

our ability to avoid losses under fixed-price contracts;

the credit and collection risks associated with our clients;

our ability to comply with procurement laws and regulations;

changes in laws, regulations, or policies;

the enactment of legislation that could limit the ability of local, state and federal agencies to contract for our privatized services;

our ability to complete our backlog of uncompleted projects as currently projected;

the risk of employee misconduct or our failure to comply with laws and regulations;

our ability to control, and operational issues pertaining to, business activities that we conduct with business partners and other third parties;

Table of Contents

our need to comply with a number of restrictive covenants and similar provisions in our senior credit facility that generally limit our ability to (among other things) incur additional indebtedness, create liens, make acquisitions, pay dividends and undergo certain changes in control, which could affect our ability to finance future operations, acquisitions or capital needs;

significant influence by our principal stockholder and the existence of certain anti-takeover measures in our governing documents; and

other factors identified throughout this Current Report on Form 10-Q, including those discussed under the headings “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and “Business.”

The forward-looking statements contained in this report are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties, or assumptions, many of which are beyond our control, which may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, those factors described in “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 30, 2017. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as may be required under applicable securities laws. You are advised, however, to consult any further disclosures we make on related subjects in our Form 10-Q, 8-K and 10-K reports filed with the SEC. Our Annual Report on Form 10-K filing for the fiscal year ended December 30, 2017 listed various important factors that could cause actual results to differ materially from expected and historic results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995, as amended. Readers can find them in “Item 1A. Risk Factors” of that filing and under the same heading of this filing. You may obtain a copy of our Annual Report on Form 10-K through our website, www.nv5.com. Information contained on our website is not incorporated into this report. In addition to visiting our website, you may read and copy any document we file with the SEC at the SEC’s Public Reference Room at 100 F. Street, NE, Washington, D.C. 20549 or at www.sec.gov. Please call the SEC at 1-800-SEC-0330 for information on the Public Reference Room.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to certain market risks from transactions that are entered into during the normal course of business. We have not entered into derivative financial instruments for trading purposes. We have no significant market risk exposure to interest rate changes related to the promissory notes related to acquisitions since these contain fixed interest rates. Our only debt subject to interest rate risk is the Senior Credit Facility which rates are variable, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base

rate denominated in U.S. dollars. Interest rates are subject to change based on our Consolidated Senior Leverage Ratio (as defined in the Credit Agreement). As of September 29, 2018, the outstanding balance on the Senior Credit Facility was \$0. A one percentage point change in the assumed interest rate of the Senior Credit Facility would not have a material impact on our market risk.

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company's disclosure controls and procedures, were effective such that the information relating to the Company required to be disclosed in our SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recently completed fiscal quarter. As disclosed under Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Recent Acquisitions, Developments and Challenges, in the third quarter of 2018 we completed the acquisition of privately-held CALYX. Other than incorporating the CALYX controls, and based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that there have not been any changes in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

From time to time, we are subject to various legal proceedings that arise in the normal course of our business activities. As of the date of this Quarterly Report on Form 10-Q, we are not a party to any litigation the outcome of which, if determined adversely to us, would individually or in the aggregate be reasonably expected to have a material adverse effect on our results of operations or financial position.

ITEM 1A. RISK FACTORS.

There have been no material changes to any of the principal risks that we believe are material to our business, results of operations and financial condition, from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 30, 2017 filed with the SEC.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Recent Sales of Unregistered Securities

During the three months ended September 29, 2018, we issued the following securities that were not registered under the Securities Act:

In August 2018, we issued 36,379 shares of our common stock as partial consideration for our acquisition of CALYX. In September 2018, we issued 767 shares of our common stock as partial consideration for our acquisition of Marron. These shares were issued in reliance upon Section 4(a)(2) of the Securities Act as a transaction by an issuer not involving a public offering. For a description of these acquisitions, see Note 4, Business Acquisitions, of the notes to the unaudited consolidated financial statements appearing under Part I of this Quarterly Report on Form 10-Q.

Issuer Purchase of Equity Securities
