<u>Risk Factors</u>		
Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including,		
but not limited to, the following:		
Depending on the performance of the Market Measure as measured shortly before the maturity date, your		
investment may result in a loss; there is no guaranteed return of principal.		
Payments on the notes are subject to the credit risk of BAC, and actual or perceived changes in the creditworthiness		
of BAC are expected to affect the value of the notes. If BAC becomes insolvent or is unable to pay its obligations,		
you may lose your entire investment.		

Your investment return is limited to the return represented by the Capped Value and may be less than a comparable investment directly in the stocks included in the Market Measure.

The initial estimated value of the notes on the pricing date will be less than their public offering price.

If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.

You will have no rights of a holder of the securities represented by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.

Your return on the notes and the value of the notes may be affected by exchange rate movements and factors affecting the international securities markets

An investment in the notes will involve risks associated with emerging markets.
