QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from                    to                    .

Commission file number: 001-34728

DOUGLAS DYNAMICS, INC.

(Exact name of registrant as specified in its charter)

Delaware	134275891
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

7777 North 73rd Street

Milwaukee, Wisconsin 53223

(Address of principal executive offices) (Zip code)

(414) 354-2310

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  
No

Number of shares of registrant's common shares outstanding as of November 4, 2014 was 22,282,628.

Notes to Unaudited Consolidated Financial Statements

(in thousands except share and per share data)

1. Basis of presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for fiscal year-end financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the financial statements and related footnotes included in our 2013 Form 10-K (Commission File No. 001-34728) filed with the Securities and Exchange Commission on March 11, 2014.

We operate as a single business unit.

Interim Consolidated Financial Information

The accompanying consolidated balance sheet as of September 30, 2014 and the consolidated statements of operations and comprehensive income for the three and nine months ended September 30, 2014 and 2013 and cash flows for the nine months ended September 30, 2014 and 2013 have been prepared by the Company and have not been audited.

The Company is a counterparty to an interest-rate swap agreement to hedge against the potential impact on earnings from increases in market interest rates. Under the interest rate swap agreement, effective as of July 18, 2011 the Company either receives or makes payments on a monthly basis based on the differential between 6.335% and LIBOR plus 4.25% (with a LIBOR floor of 1.5%). The negative fair value of the interest rate swap, net of tax, of (\$50) at September 30, 2014 is included in "Accumulated other comprehensive loss" on the balance sheet. This fair value was determined using Level 2 inputs as defined in Accounting Standards Codification Topic ("ASC") 820. The interest rate swap contract on \$50,000 notional amount of the term loan expires in December 2014. Additionally, other comprehensive income includes the net income of the Company plus the Company's adjustments for its defined benefit retirement plans based on the measurement date as of the Company's year-end. For further disclosure, refer to Note 14 to the Unaudited Consolidated Financial Statements.

The Company's business is seasonal and consequently its results of operations and financial condition vary from quarter-to-quarter. Because of this seasonality, the Company's results of operations for any quarter may not be indicative of results of operations that may be achieved for a subsequent quarter or the full year, and may not be similar to results of operations experienced in prior years. The Company attempts to manage the seasonal impact of snowfall on its revenues in part through its pre-season sales program. This pre-season sales program encourages the Company's distributors to re-stock their inventory during the second and third quarters in anticipation of the peak fourth quarter retail sales period by offering favorable pre-season pricing and payment deferral until the fourth quarter. Thus, the Company tends to generate its greatest volume of sales during the second and third quarters. By contrast, its revenue and operating results tend to be lowest during the first quarter, as management believes the Company's end-users prefer to wait until the beginning of a snow season to purchase new equipment and as the Company's distributors sell off inventory and wait for the pre-season sales incentive period to re-stock inventory. Fourth quarter sales vary from year-to-year as they are primarily driven by the level, timing and location of snowfall during the quarter. This is because most of the Company's fourth quarter sales and shipments consist of re-orders by distributors seeking to restock inventory to meet immediate customer needs caused by snowfall during the winter months.

Table of Contents

## 2.Fair Value

Fair value is the price at which an asset could be exchanged in a current transaction between knowledgeable, willing parties. A liability's fair value is defined as the amount that would be paid to transfer the liability to a new obligor, not the amount that would be paid to settle the liability with the creditor. Fair value measurements are categorized into one of three levels based on the lowest level of significant input used: Level 1 (unadjusted quoted prices in active markets); Level 2 (observable market inputs available at the measurement date, other than quoted prices included in Level 1); and Level 3 (unobservable inputs that cannot be corroborated by observable market data).

The following table presents financial assets and liabilities measured at fair value on a recurring basis and discloses the fair value of long-term debt:

	Fair Value at September 30, 2014	Fair Value at December 31, 2013
Assets:		
Other long-term assets (a)	\$ 1,685	\$ 1,127
Total Assets	\$ 1,685	\$ 1,127
Liabilities:		
Long term debt (b)	\$ 109,715	\$ 110,439
Earnout - TrynEx (c)	3,987	3,587
Interest rate swaps (d)	64	282
Total Liabilities	\$ 113,766	\$ 114,308

---

(a) Included in other assets is the cash surrender value of insurance policies on various individuals that are associated with the Company. The carrying amounts of these insurance policies approximates their fair value.

(b) The fair value of the Company's long-term debt, including current maturities, is estimated using discounted cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements, which is a Level 2 input for all periods presented. Meanwhile, long-term debt is recorded at carrying amount, net of discount, as disclosed on the face of the balance sheet.

(c) Included in accrued expenses and other current liabilities and other long term liabilities in the amounts of \$2,200 and \$1,787, respectively, at September 30, 2014 is an obligation for a portion of the potential earn out incurred in conjunction with the acquisition of substantially all of the assets of TrynEx, Inc. ("TrynEx"). The carrying amount of the earn out approximates its fair value. Fair value is based upon Level 3 inputs of a monte carlo simulation analysis using key inputs of forecasted future sales and financial performance as well as a growth rate reduced by the market required rate of return. See reconciliation of liability included below:

	Three Months Ended September 30, 2014	Nine Months Ended September 30, 2014
Beginning Balance	\$ 3,587	\$ 3,587
Additions	—	—
Adjustments to fair value	400	400
Ending balance	\$ 3,987	\$ 3,987

(d) Interest rate swaps are included in accrued expenses and other current liabilities. Valuation models are calibrated to initial trade price. Subsequent valuations are based on observable inputs to the valuation model (e.g. interest rates and credit spreads). Model inputs are changed only when corroborated by market data. A credit risk adjustment is made on each swap using observable market credit spreads. Thus, inputs used to determine fair value of the interest rate swap are Level 2 inputs.

Table of Contents

3. Inventories

Inventories consist of the following:

	September 30, 2014	December 31, 2013
Finished goods and work-in-process	\$ 34,313	\$ 26,175
Raw material and supplies	2,105	1,802
	\$ 36,418	\$ 27,977

4. Property, plant and equipment

Property, plant and equipment are summarized as follows:

	September 30, 2014	December 31, 2013
Land	\$ 1,160	\$ 1,160
Land improvements	1,962	1,849
Buildings	16,840	16,743
Machinery and equipment	28,026	25,756
Furniture and fixtures	9,288	8,772
Mobile equipment and other	1,374	1,267
Construction-in-process	667	1,113
Total property, plant and equipment	59,317	56,660
Less accumulated depreciation	(33,678)	(31,794)
Net property, plant and equipment	\$ 25,639	\$ 24,866

#### 5. Long-Term Debt

Long-term debt is summarized below:

September 30, 2014	December 31, 2013
--------------------------	-------------------------

Term Loan, net of debt discount of \$631 and \$766 at September 30, 2014 and December 31, 2013, respectively	\$ 110,266	\$ 110,994
Less current maturities	971	971
	\$ 109,295	\$ 110,023

The Company's senior credit facilities consist of a \$125,000 term loan facility and an \$80,000 revolving credit facility with a group of banks. The agreement for the term loan (the "Term Loan Credit Agreement") provides for a senior secured term loan facility in the aggregate principal amount of \$125,000 and generally bears interest (at the Company's election) at either (i) 3.25% per annum plus the greatest of (a) the Prime Rate

Table of Contents

(as defined in the Term Loan Credit Agreement) in effect on such day, (b) the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers plus 0.50% and (c) 1.00% plus the greater of (1) the London Interbank Offered Rate for a one month interest period multiplied by the Statutory Reserve Rate (as defined in the Term Loan Credit Agreement) and (2) 1.50% or (ii) 4.25% per annum plus the greater of (a) the London Interbank Offered Rate for the applicable interest period multiplied by the Statutory Reserve Rate and (b) 1.50%. The revolving credit facility provides that the Company has the option to select whether borrowings will bear interest at either (i) 1.75% per annum plus the London Interbank Offered Rate for the applicable interest period multiplied by the Statutory Reserve Rate or (ii) 1.25% per annum plus the greatest of (a) the Prime Rate in effect on such day, (b) the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers plus 0.50% and (c) the London Interbank Offered Rate for a one month interest period multiplied by the Statutory Reserve Rate plus 1%. The maturity date for the Company's revolving credit facility is April 17, 2017, and the Company's term loan amortizes in nominal amounts quarterly with the balance payable on April 18, 2018.

The term loan was issued at a \$1,250 discount which is being amortized over the term of the term loan.

At September 30, 2014, the Company had \$33,500 in outstanding borrowings on the revolving credit facility and remaining borrowing availability of \$46,464.

The Company's senior credit facilities include certain negative and operating covenants, including restrictions on its ability to pay dividends, and other customary covenants, representations and warranties and events of default. The senior credit facilities entered into and recorded by the Company's subsidiaries significantly restrict its subsidiaries from paying dividends and otherwise transferring assets to Douglas Dynamics, Inc. The terms of the Company's revolving credit facility specifically restrict subsidiaries from paying dividends if a minimum availability under the revolving credit facility is not maintained, and both senior credit facilities restrict subsidiaries from paying dividends above certain levels or at all if an event of default has occurred. These restrictions would affect the Company indirectly since the Company relies principally on distributions from its subsidiaries to have funds available for the payment of dividends. In addition, the Company's revolving credit facility includes a requirement that, subject to certain exceptions, capital expenditures may not exceed \$10,000 in any calendar year and, if certain minimum availability under the revolving credit facility is not maintained, that the Company comply with a monthly minimum fixed charge coverage ratio test of 1.0:1.0. Compliance with the fixed charge coverage ratio test is subject to certain cure rights under the Company's revolving credit facility. At September 30, 2014, the Company was in compliance with the respective covenants. The credit facilities are collateralized by substantially all assets of the Company.

In accordance with the senior credit facilities, the Company is required to make additional principal prepayments over the above scheduled payments under certain conditions. This includes, in the case of the term loan facility, 100% of the net cash proceeds of certain asset sales, certain insurance or condemnation events, certain debt issuances, and, within 150 days of the end of the fiscal year, 50% of excess cash flow, as defined, including a deduction for certain distributions (which percentage is reduced to 25% or 0% upon the achievement of certain leverage ratio thresholds), for any fiscal year. Excess cash flow is defined in the senior credit facilities as consolidated adjusted EBITDA (earnings before interest, taxes, depreciation and amortization) plus a working capital adjustment less the sum of

repayments of debt and capital expenditures subject to certain adjustments, interest and taxes paid in cash, management fees and certain restricted payments (including dividends or distributions). Working capital adjustment is defined in the senior credit facilities as the change in working capital, defined as current assets excluding cash and cash equivalents less current liabilities excluding current portion of long term debt. As of September 30, 2014, the Company was not required to make an excess cash flow payment.

Each of the senior secured facilities includes a hedge provision, which required the Company to enter into an interest rate hedge commencing 90 days after the closing date. The hedging provision requires the Company to hedge the interest rate on at least 25% of the aggregate outstanding principal amount of the term loans. The purpose of the interest rate swap is to reduce the Company's exposure to interest rate volatility. Effective June 20, 2011, the Company entered into an interest rate swap agreement with a notional amount of \$50,000. The interest rate swap negative fair value at September 30, 2014 of \$64 is included in accrued expenses and other

Table of Contents

current liabilities on the Consolidated Balance Sheet. The Company has counterparty credit risk resulting from the interest rate swap, which it monitors on an on-going basis. This risk lies with one global financial institution. Under the interest rate swap agreement, effective as of July 18, 2011, the Company either receives or makes payments on a monthly basis based on the differential between 6.335% and LIBOR plus 4.25% (with a LIBOR floor of 1.5%). The interest rate swap contract on the term loan expires in December 2014.

## 6. Accrued Expenses and Other Current Liabilities

Accrued expenses and other liabilities are summarized as follows:

	September 30, 2014	December 31, 2013
Payroll and related costs	\$ 5,701	\$ 2,857
Employee benefits	2,963	4,522
Accrued warranty	4,736	3,808
Other	6,997	3,231
	\$ 20,397	\$ 14,418

## 7. Warranty Liability

The Company accrues for estimated warranty costs as sales are recognized and periodically assesses the adequacy of its recorded warranty liability and adjusts the amount as necessary. The Company's warranties generally provide, with

respect to its snow and ice control equipment, that all material and workmanship will be free from defect for a period of two years after the date of purchase by the end-user, and with respect to its parts and accessories purchased separately, that such parts and accessories will be free from defect for a period of one year after the date of purchase by the end-user. Certain snowplows only provide for a one year warranty. The Company determines the amount of the estimated warranty costs (and its corresponding warranty reserve) based on the Company's prior five years of warranty history utilizing a formula driven by historical warranty expense and applying management's judgment. The Company adjusts its historical warranty costs to take into account unique factors such as the introduction of new products into the marketplace that do not provide a historical warranty record to assess. The warranty reserve is included in Accrued Expenses and Other Current Liabilities in the accompanying consolidated balance sheets.

The following is a rollforward of the Company's warranty liability:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Balance at the beginning of the period	\$ 3,634	\$ 3,568	\$ 3,808	\$ 3,628
Establish warranty provision for TrynEx	-	-	-	600
Warranty provision	1,313	375	3,132	1,018
Claims paid/settlements	(211)	(62)	(2,204)	(1,365)
Balance at the end of the period	\$ 4,736	\$ 3,881	\$ 4,736	\$ 3,881

Table of Contents

## 8. Employee Retirement Plans

The components of net periodic pension cost consist of the following:

	Three months ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Component of net periodic pension cost:				
Service cost	\$ 54	\$ 62	\$ 162	\$ 185
Interest cost	374	362	1,122	1,087
Expected return on plan assets	(408)	(352)	(1,224)	(1,057)
Amortization of net loss	51	302	153	905
Net periodic pension cost	\$ 71	\$ 374	\$ 213	\$ 1,120

The Company estimates its total required minimum contributions to its pension plans in 2014 will be \$1,182.

Through September 30, 2014, the Company has made \$1,108 of cash contributions to the pension plans versus \$584 through the same period in 2013.

Components of net periodic other postretirement benefit cost (gain) consist of the following:

Three Months Ended	Nine Months Ended
-----------------------	-------------------

	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Component of periodic other postretirement benefit cost (gain):				
Service cost	\$ 40	\$ 63	\$ 119	\$ 188
Interest cost	53	61	160	184
Amortization of net gain	(100)	(43)	(299)	(129)
Net periodic other postretirement benefit cost (gain)	\$ (7)	\$ 81	\$ (20)	\$ 243

## 9.Earnings per Share

Basic earnings per share of common stock is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share of common stock is computed by dividing net income by the weighted average number of common shares and common stock equivalents related to the assumed exercise of stock options, using the two-class method. Stock options for which the exercise price exceeds the average fair value have an anti-dilutive effect on earnings per share and are excluded from the calculation.

Table of Contents

As restricted shares and restricted stock units both participate in dividends, in accordance with ASC 260, the Company has calculated earnings per share pursuant to the two-class method, which is an earnings allocation formula that determines earnings per share for common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends.

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013

Amended and Restated 2004 Stock Incentive Plan

As of September 30, 2014, 37,240 shares of common stock are reserved for issuance upon the exercise of outstanding options under the Company's Amended and Restated 2004 Stock Incentive Plan (the "A&R 2004

10

---

Table of Contents

Plan”). All outstanding options are fully vested. All options expire 10 years from the date of grant. No further awards are permitted to be issued under the A&R 2004 Plan.

There were no stock options exercised with respect to the Company’s stock under the A&R 2004 Plan for the three and nine months ended September 30, 2014.

2010 Stock Incentive Plan

In May 2010, the Company’s Board of Directors and stockholders adopted the 2010 Stock Incentive Plan (the “2010 Plan”). The Company’s Board of Directors approved an amendment and restatement of the 2010 Plan on March 5, 2014, contingent on stockholder approval of the performance goals under the 2010 Plan, and the amendment and restatement became effective upon stockholder approval of the performance goals at the 2014 annual meeting of stockholders held on April 30, 2014. The 2010 Plan provides for the issuance of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock awards and restricted stock units (“RSUs”), any of which may be performance-based, and for incentive bonuses, which may be paid in cash or stock or a combination of both, to eligible employees, officers, non-employee directors and other service providers to the Company and its subsidiaries. A maximum of 2,130,000 shares of common stock may be issued pursuant to all awards under the 2010 Plan.

Restricted Stock Awards

A summary of restricted stock activity for the nine months ended September 30, 2014 is as follows:

	Weighted Average Grant Date Fair value	Weighted Average Remaining Contractual Term
Shares		

Unvested at December 31, 2013	169,903	\$ 13.03	1.34 years
Granted	-	-	-
Vested	(84,882)	\$ 13.05	
Cancelled and forfeited	—	—	
Unvested at September 30, 2014	85,021	\$ 13.02	0.76 years
Expected to vest in the future at September 30, 2014	81,960	\$ 13.02	0.76 years

The fair value of the Company's restricted stock awards is the closing stock price on the date of grant. The Company recognized \$215 and \$660 of compensation expense related to restricted stock awards granted for the three and nine months ended September 30, 2014, respectively. The Company recognized \$264 and \$832 of compensation expense related to restricted stock awards granted for the three and nine months ended September 30, 2013, respectively. The unrecognized compensation expense calculated under the fair value method for shares expected to vest as of September 30, 2014 was approximately \$574 and is expected to be recognized over a weighted average period of 0.76 years.

#### Performance Share Unit Awards

The Company granted performance share units as performance based awards under the 2010 Plan in the first quarter of 2014 that are subject to performance conditions. Upon meeting the prescribed performance conditions, in the first quarter of the year subsequent to grant, employees will be issued RSUs a portion of which will be subject to vesting over the two years following the end of the performance period. In accordance with ASC 718, such awards are being expensed over the vesting period from the date of grant through the requisite service

Table of Contents

period, based upon the most probable outcome. The fair value per share of the awards is the closing stock price on the date of grant, which was \$16.30. The Company recognized \$171 and \$390 of compensation expense related to the awards in the three and nine months ended September 30, 2014, respectively. The unrecognized compensation expense calculated under the fair value method for shares that were, as of September 30, 2014, expected to be earned through the requisite service period was approximately \$479 and is expected to be recognized through 2017.

Restricted Stock Unit Awards

RSUs are granted to both non-employee directors and management. RSUs carry dividend equivalent rights but do not carry voting rights. Each RSU represents the right to receive one share of the Company's common stock and is subject to time based vesting restrictions. Participants are not required to pay any consideration to the Company at either the time of grant of a RSU or upon vesting.

RSUs issued to management include a retirement provision under which members of management who either (1) are age 65 or older or (2) have at least ten years of service and are at least age 55 will continue to vest in unvested RSUs upon retirement. As the retirement provision does not qualify as a substantive service condition, the Company incurred \$278 and \$261 in additional expense in the first quarter of 2014 and 2013, respectively, for employees who meet the thresholds of the retirement provision. In 2013, the Company's nominating and governance committee approved a retirement provision for the RSUs issued to non-employee directors that accelerates the vesting of such RSUs upon retirement. Such awards are fully expensed immediately upon grant in accordance with ASC 718, as the retirement provision eliminates substantive service conditions associated with the awards.

A summary of RSU activity for the nine months ended September 30, 2014 is as follows:

	Weighted Average Grant Date	Weighted Average Remaining Contractual Term
Shares	Fair value	Term

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

Unvested at December 31, 2013	43,348	\$ 14.46	1.55 years
Granted	140,291	\$ 15.29	0.73 years
Vested	(102,016)	\$ 15.13	
Cancelled and forfeited	—	—	
Unvested at September 30, 2014	81,623	\$ 15.05	1.34 years
Expected to vest in the future at September 30, 2014	78,685	\$ 15.05	1.34 years

The Company recognized \$160 and \$1,093 of compensation expense related to the RSU awards in the three and nine months ended September 30, 2014, respectively. The Company recognized \$70 and \$782 of compensation expense related to the RSU awards in the three and nine months ended September 30, 2013, respectively. The unrecognized compensation expense, net of expected forfeitures, calculated under the fair value method for shares that were, as of September 30, 2014, expected to be earned through the requisite service period was approximately \$772 and is expected to be recognized through 2017.

Vested director RSUs are “settled” by the delivery to the participant or a designated brokerage firm of one share of common stock per vested RSU as soon as reasonably practicable following a termination of service of the participant that constitutes a separation from service, and in all events no later than the end of the calendar year in which such termination of service occurs or, if later, two and one-half months after such termination of service. Vested management RSUs are “settled” by the delivery to the participant or a designated brokerage firm of one share of common stock per vested RSU as soon as reasonably practicable following vesting.

Table of Contents

11. Commitments and Contingencies

In the ordinary course of business, the Company is engaged in various litigation including product liability and intellectual property disputes. However, the Company does not believe that any pending litigation will have a material adverse effect on its consolidated financial position. In addition, the Company is not currently a party to any environmental-related claims or legal matters.

12. Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The largest item affecting deferred taxes is the difference between book and tax amortization of goodwill and other intangibles amortization. The Company's effective tax rate was 35.0% and 13.1% for the three months ended September 30, 2014 and 2013, respectively. The effective tax rate for the three months ended September 30, 2014 is higher than the corresponding period in 2013 due to changes in 2013 triggered by the TrynEx acquisition, including changes in apportionment of certain discrete period items among various taxing jurisdictions. The Company's effective tax rate for the nine months ended September 30, 2014 and 2013 was 34.8% and 29.6%, respectively. The effective tax rate for the nine months ended September 30, 2014 was higher than the corresponding period in 2013 due to the 2012 federal research and development credit being retroactively applied in 2013 in addition to the 2013 research and development credit, while the federal research and development credit is not being applied to 2014 as legislation approving such credit has not been approved.

13. Impairment of Assets Held For Sale

During the first quarter of 2013, the Company lowered the asking price for its assets held for sale. The Company recorded assets held for sale on its balance sheet in conjunction with the closure of the Johnson City, Tennessee location in 2010. The land and building had been held for sale since the closure. In an effort to stimulate sales activity, the Company lowered the listed sale price in the first quarter of 2013 which caused the Company to reassess the fair value of the assets held for sale. The Company valued the fair value of the assets held for sale based upon Level 2 market price inputs for similar assets. The Company used comparable properties sold and held for sale in the Johnson City, Tennessee industrial real estate market to determine an appropriate fair value. Consequently, the Company incurred a \$647 loss recognized on the impairment of assets held for sale, which is included in "Loss recognized on assets held for sale" on the Consolidated Statements of Operations and Comprehensive Income in the nine months ended September 30, 2013. On February 26, 2014, the Company entered into an agreement for the sale of the land and building at an amount approximating the carrying amount. The Company closed on the sale of the Johnson City assets on April 30, 2014 with a sales price of \$1,100 and closing costs of \$82. Consequently, the Company incurred a \$67 loss recognized on the disposal of assets held for sale and is included in "Loss recognized on

assets held for sale” on the Consolidated Statements of Operations and Comprehensive Income in the nine months ended September 30, 2014.

Tax benefit	(336)			
Reclassification net of tax	\$ 569			
Realized losses on interest rate swaps reclassified to interest expense	222			
Tax benefit	(82)			
Reclassification net of tax	\$ 140			

(a) These components are included in the computation of benefit plan costs in Note 8.

#### 15. Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2014-09 “Revenue from Contracts with Customers.” ASU 2014-09 provides a single principles-based, five-step model to be applied to all contracts with customers. The five steps are to identify the contract(s) with the customer,

15

---

Table of Contents

to identify the performance obligations in the contract, to determine the transaction price, to allocate the transaction price to the performance obligations in the contract and to recognize revenue when each performance obligation is satisfied. Revenue will be recognized when promised goods or services are transferred to the customer in an amount that reflects the consideration expected in exchange for those goods or services. ASU 2014-09 will be effective for the Company beginning on January 1, 2017 and the standard allows for either full retrospective adoption or modified retrospective adoption. The Company has begun the process of evaluating the impact that the adoption of this guidance will have on its financial condition, results of operations and the presentation of its financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes which are included in Item 1 of this Quarterly Report on Form 10-Q, as well as the information contained in our Form 10-K (Commission File No. 001-34728) filed with the Securities and Exchange Commission.

In this Quarterly Report on Form 10-Q, unless the context indicates otherwise: "Douglas Dynamics," the "Company," "we," "our," or "us" refer to Douglas Dynamics, Inc.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These statements include information relating to future events, product demand, the payment of dividends, future financial performance, strategies, expectations, competitive environment, regulation and availability of financial resources. These statements are often identified by use of words such as "anticipate," "believe," "intend," "estimate," "expect," "continue," "should," "could," "may," "project," "predict," "will" and similar expressions and include references to assumptions and relate to our future prospects, developments and business strategies. Such statements involve known and unknown risks, uncertainties and other factors that could cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: (i) weather conditions, particularly lack of or reduced levels of snowfall and timing of such snowfall; (ii) a significant decline in economic conditions; (iii) our inability to maintain good relationships with our distributors; (iv) lack of available or favorable financing options for our end-users or distributors; (v) increases in the price of steel or other materials necessary for the production of our products that cannot be passed on to our distributors; (vi) increases in the price of fuel; (vii) the inability of our suppliers to meet our volume or quality requirements; (viii) inaccuracies in our estimates of future demand for our products; (ix) our inability to protect or continue to build our intellectual property portfolio; (x) the effects of laws and regulations and their interpretations on our business and financial condition; (xi) our inability to develop new products or improve upon existing products in response to end-user needs; (xii) losses due to lawsuits arising out of personal injuries associated with our products; (xiii) factors that could impact the future declaration and payment of dividends;

(xiv) our inability to compete effectively against competition; (xv) our inability to achieve the projected financial performance with the assets of TrynEx, which we acquired in May 2013; and (xvi) unexpected costs or liabilities related to the acquisition of the TrynEx assets, as well as those discussed in the sections entitled “Risk Factors” in Part II, Item 1A of this Quarterly Report on Form 10-Q, if any, or in our most recent Annual Report on Form 10-K.

Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. In addition, the forward-looking statements in this Quarterly Report on Form 10-Q speak only as of the date hereof and we undertake no obligation, except as required by law, to update or release any revisions to any forward-looking statement, even if new information becomes available in the future.

## Results of Operations

### Overview

During the three months ended September 30, 2014 and 2013, we sold 19,682 and 13,434 units of snow and ice control equipment, respectively and during the nine months ended September 30, 2014 and 2013 we sold 46,857 and 29,684 units of snow and ice control equipment, respectively. The following table shows our sales of

Table of Contents

snow and ice control equipment and related parts and accessories as a percentage of net sales for the three and nine months ended September 30, 2014 and 2013.

	Three Months Ended			Nine Months Ended

## Net Sales

Net sales were \$78.8 million for the three months ended September 30, 2014 compared to \$52.0 million in the three months ended September 30, 2013, an increase of \$26.8 million, or 51.5%. Net sales were \$203.5 million for the nine months ended September 30, 2014 compared to \$121.3 million in the nine months ended September 30, 2013, an increase of \$82.2 million, or 67.8%. The increases in net sales for the three and nine months ended September 30, 2014 were driven by 46.5% and 57.9% increases in unit sales of snow and ice control equipment, respectively. Parts and accessories sales also increased for the three and nine months ended September 30, 2014 compared to the corresponding periods in 2013 by 106.4% and 102.5%, respectively. The increases in units of equipment sold as well as parts and accessories were due to higher than average snowfall in the October 2013 through March 2014 snow season in North America compared to only slightly higher than average snowfall in the October 2012 through March 2013 snow season. Sales related to TrynEx products (a business acquired in May of 2013) were \$8.0 million and

\$16.7 million for the three and nine months ended September 30, 2014, as compared to \$4.2 million and \$5.1 million for both the three and nine months ended September 30, 2013, respectively which also contributed to the increase in net sales. The increase in sales of TrynEx related products for the three months ended September 30, 2014 as compared to September 30, 2013 was also a result of higher than average snowfall in the October 2013 through March 2014 snow season in North America compared to only slightly higher than average snowfall in the October 2012 through March 2013 snow season.

#### Cost of Sales

Cost of sales was \$49.7 million for the three months ended September 30, 2014 compared to \$37.0 million for the three months ended September 30, 2013, an increase of \$12.7 million, or 34.3%. Cost of sales was \$125.8 million for the nine months ended September 30, 2014 compared to \$83.1 million for the nine months ended September 30, 2013, an increase of \$42.7 million, or 51.4%. The increase in cost of sales for the three and nine months ended September 30, 2014 compared to the corresponding periods in 2013 was driven by increases in equipment unit volume as discussed above under “—Net Sales”. The Company experienced lower cost of sales as a percent of sales of 63.1% for the three-month period ended September 30, 2014 compared to 71.1% for the three

## Table of Contents

month period ended September 30, 2013. The Company experienced lower cost of sales as a percent of sales of 61.8% for the nine-month period ended September 30, 2014 compared to 68.5% for the nine month period ended September 30, 2013. The decrease in cost of sales as a percentage of sales was due to lower unit costs resulting from higher sales volumes. As a percentage of cost of sales, fixed and variable costs were approximately 13% and 87%, respectively, for the three months ended September 30, 2014 versus approximately 17% and 83%, respectively, for the three months ended September 30, 2013 and approximately 14% and 86%, respectively, for the nine months ended September 30, 2014 versus approximately 19% and 81%, respectively, for the nine months ended September 30, 2013.

### Gross Profit

Gross profit was \$29.1 million for the three months ended September 30, 2014 compared to \$15.0 million in the three months ended September 30, 2013, an increase of \$14.1 million, or 94.0%. Gross profit was \$77.6 million for the nine months ended September 30, 2014 compared to \$38.2 million in the nine months ended September 30, 2013, an increase of \$39.4 million, or 103.1%. Gross profit increased for the three and nine month periods due to increases in both equipment units and parts and accessories sold. As a percentage of net sales, gross profit increased from 28.9% for the three months ended September 30, 2013 to 36.9% for the corresponding period in 2014. As a percentage of net sales, gross profit increased from 31.5% for the nine months ended September 30, 2013 to 38.2% for the corresponding period in 2014. The reasons for the increase in gross profit as a percentage of net sales are the same as those relating to the decrease in cost of sales as a percentage of sales discussed above under “—Cost of Sales.”

### Selling, General and Administrative Expense

Selling, general and administrative expenses, including intangibles amortization, were \$10.4 million for the three months ended September 30, 2014, compared to \$12.2 million for the three months ended September 30, 2013, a decrease of \$1.8 million, or 14.8%. The decrease compared to 2013 was mostly due to a decrease in earnout expense of \$3.3 million. Partially offsetting this decrease were \$0.7 million and \$0.5 million increases in performance based compensation expense and sales and marketing expense, respectively, as a result of better operating results in 2014. Selling, general and administrative expenses, including intangibles amortization, were \$30.1 million for the nine months ended September 30, 2014, compared to \$26.9 million for the nine months ended September 30, 2013, an increase of \$3.2 million, or 11.9%. The increase compared to 2013 was mostly due to increases of \$2.7 million and \$1.9 million in performance based compensation expense and sales and marketing expense, respectively, as a result of better operating results in 2014. Additionally, the Company incurred ongoing expenses related to TrynEx products of \$3.5 million for the nine months ended September 30, 2014 as compared to \$1.5 million in the same period in 2013, primarily driven by an increase in sales and marketing expense resulting from better operating results in 2014. These increases were partially offset by a decrease of \$3.0 million in earnout expense in the nine months ended September 30, 2014 compared to the comparable period in 2013.

### Loss Recognized on Assets Held for Sale

In the first quarter of 2013, in an effort to stimulate sales activity with respect to land and a building at the Johnson City, Tennessee location held by the Company for sale, the Company lowered the listed sale price of the assets which caused the Company to reassess the fair value of the assets held for sale. Consequently, the Company recorded an impairment charge of \$0.6 million in the first quarter of 2013 that is included in the nine months ended September 30, 2013 results. On February 26, 2014, the Company entered into an agreement for the sale of the land and building at an amount approximating the carrying value. The Company closed on the sale of the Johnson City assets on April 30, 2014 with a sales price of \$1.1 million and closing costs of \$0.1 million. Consequently, the Company incurred a \$0.1 million loss recognized on the disposal of assets held for sale in the nine months ended September 30, 2014

#### Interest Expense

Interest expense was \$2.0 million for the three months ended September 30, 2014 which was slightly less than the \$2.1 million incurred in the same period in the prior year. Interest expense was \$6.0 million for the nine

## Table of Contents

months ended September 30, 2014 which was slightly less than the \$6.2 million incurred in the same period in the prior year.

### Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The largest item affecting deferred taxes is the difference between book and tax amortization of goodwill and other intangibles amortization. The Company's effective tax rate was 35.0% and 13.1% for the three months ended September 30, 2014 and 2013, respectively. The effective tax rate for the three months ended September 30, 2014 is higher than the corresponding period in 2013 due to changes in 2013 triggered by the TrynEx acquisition, including changes in apportionment of certain discrete period items among various taxing jurisdictions. The Company's effective tax rate for the nine months ended September 30, 2014 and 2013 was 34.8% and 29.6%, respectively. The effective tax rate for the nine months ended September 30, 2014 was higher than the corresponding period in 2013 due to the 2012 federal research and development credit being retroactively applied in 2013 in addition to the 2013 research and development credit, while the federal research and development credit is not being applied to 2014 as legislation approving such credit has not been approved.

### Net Income

Net income for the three months ended September 30, 2014 was \$10.8 million compared to a net income of \$0.6 million for the corresponding period in 2013, an increase in net income of \$10.2 million. Net income for the nine months ended September 30, 2014 was \$26.9 million compared to net income of \$3.1 million for the corresponding period in 2013, an increase in net income of \$23.8 million. The increase in net income for the three and nine months ended September 30, 2014 was driven by the factors described above under "— Net Sales," "—Cost of Sales," "— Selling, General and Administrative Expense" and "— Loss Recognized on Assets Held for Sale." As a percentage of net sales, net income was 13.7% for the three months ended September 30, 2014 compared to 1.2% for the three months ended September 30, 2013. As a percentage of net sales, net income was 13.2% for the nine months ended September 30, 2014 compared to 2.6% for the nine months ended September 30, 2013.

### Adjusted EBITDA

Adjusted EBITDA for the three months ended September 30, 2014 was \$22.2 million compared to \$10.2 million in the corresponding period in 2013, an increase of \$12.0 million. Adjusted EBITDA for the nine months ended September 30, 2014 was \$58.3 million compared to \$24.8 million in the corresponding period in 2013, an increase of \$33.5 million. For the three and nine month periods ended September 30, 2014 the increase in Adjusted EBITDA is attributable to the increase in unit sales of snow and ice control equipment and increase in sales of parts and

accessories.

#### Free Cash Flow

Free cash flow for the three months ended September 30, 2014 was (\$31.1) million compared to (\$15.2) million in the corresponding period in 2013, an increase in cash used of \$15.9 million. The decrease in free cash flow is primarily a result of higher cash used by operating activities of \$15.5 million, as discussed below under “Liquidity and Capital Resources.” Meanwhile, acquisitions of property and equipment increased from \$0.3 million for the three months ended September 30, 2013 to \$0.7 million for the three months ended September 30, 2014. Free cash flow for the nine months ended September 30, 2014 was (\$21.4) million compared to (\$28.5) million in the corresponding period in 2013, a decrease in cash used of \$7.1 million. The decrease in cash used is primarily a result of lower cash used by operating activities of \$8.6 million, as discussed below under “Liquidity and Capital Resources.” Meanwhile, acquisitions of property and equipment increased from \$1.7 million for the nine months ended September 30, 2013 to \$3.3 million for the nine months ended September 30, 2014.

Table of Contents

Non-GAAP Financial Measures

This Quarterly Report on Form 10-Q contains financial information calculated other than in accordance with U.S. generally accepted accounting principles (“GAAP”).

These non-GAAP measures include:

- Free cash flow;
- Adjusted net income; and
- Adjusted EBITDA.

These non-GAAP disclosures should not be construed as an alternative to the reported results determined in accordance with GAAP.

Free cash flow is a non-GAAP financial measure which we define as net cash provided by operating activities less capital expenditures. Free cash flow should be evaluated in addition to, and not considered a substitute for, other financial measures such as net income and cash flow provided by operations. We believe that free cash flow represents our ability to generate additional cash flow from our business operations.

The following table reconciles net cash provided by (used in) operating activities, a GAAP measure, to free cash flow, a non-GAAP measure.

	Three Months Ended		Nine Months Ended	
	September	September	September	September
	30,	30,	30,	30,
	2014	2013	2014	2013
	(In Thousands)		(In Thousands)	
Net cash used in operating activities	\$ (30,390)	\$ (14,892)	\$ (18,133)	\$ (26,722)
Acquisition of property and equipment	(705)	(284)	(3,310)	(1,747)

Free cash flow    \$ (31,095)   \$ (15,176)   \$ (21,443)   \$ (28,469)

Adjusted net income represents net income as determined under GAAP, excluding a loss recognized on impairment of assets held for sale. We believe that the presentation of adjusted net income for the three and nine months ended September 30, 2014 and September 30, 2013 allows investors to make meaningful comparisons of our operating performance between periods and to view our business from the same perspective as our management. Because the excluded item is not predictable or consistent, management does not consider it when evaluating our performance or when making decisions regarding allocation of resources.

Table of Contents

The following table presents a reconciliation of net income, the most comparable GAAP financial measure, to adjusted net income for the three and nine months ended September 30, 2014 and September 30, 2013.

	Three Months Ended September 30, 2014 (in millions)		Nine Months Ended September 30, 2013 (in millions)	
Net income - (GAAP)	\$ 10.8	\$ 0.6	\$ 26.9	\$ 3.1
Addback expenses, net of tax at 38.0% for 2013:				
Loss recognized on impairment of assets held for sale	-	-	-	0.4
Adjusted net income - (Non-GAAP)	\$ 10.8	\$ 0.6	\$ 26.9	\$ 3.5

Adjusted EBITDA represents net income before interest, taxes, depreciation and amortization, as further adjusted for stock based compensation, non-cash purchase accounting adjustments related to the TrynEx acquisition, certain charges related to certain unrelated legal fees and consulting fees and impairment on assets held for sale. We use, and we believe our investors benefit from the presentation of Adjusted EBITDA in evaluating our operating performance because it provides us and our investors with additional tools to compare our operating performance on a consistent basis by removing the impact of certain items that management believes do not directly reflect our core operations. In addition, we believe that Adjusted EBITDA is useful to investors and other external users of our consolidated financial statements in evaluating our operating performance as compared to that of other companies, because it allows them to measure a company's operating performance without regard to items such as interest expense, taxes, depreciation and amortization, which can vary substantially from company to company depending upon accounting methods and book value of assets and liabilities, capital structure and the method by which assets were acquired. Our management also uses Adjusted EBITDA for planning purposes, including the preparation of our annual operating budget and financial projections. Management also uses Adjusted EBITDA to evaluate our ability to make certain payments, including dividends, in compliance with our senior credit facilities, which is determined based on a calculation of "Consolidated Adjusted EBITDA" that is substantially similar to Adjusted EBITDA.

Adjusted EBITDA has limitations as an analytical tool. As a result, you should not consider it in isolation, or as a substitute for net income, operating income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. Some of these limitations are:

- Adjusted EBITDA does not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our indebtedness;
  - Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such replacements;
- Other companies, including other companies in our industry, may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure; and
- Adjusted EBITDA does not reflect tax obligations whether current or deferred.

Table of Contents

The following table presents a reconciliation of net income, the most comparable GAAP financial measure, to Adjusted EBITDA as well as the resulting calculation of Adjusted EBITDA for the three and nine months ended September 30, 2014 and 2013:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
	(in thousands)		(in thousands)	
Net income	\$ 10,762	\$ 603	\$ 26,930	\$ 3,108
Interest expense - net	2,037	2,130	6,007	6,190
Income tax expense	5,793	91	14,385	1,304
Depreciation expense	872	804	2,537	2,258
Amortization	1,439	1,447	4,348	4,142
EBITDA	20,903	5,075	54,207	17,002
Stock based compensation expense	546	565	2,143	2,024
TrynEx purchase accounting (1)	537	4,369	810	4,369
Other charges (2)	232	179	1,131	1,399
Adjusted EBITDA	\$ 22,218	\$ 10,188	\$ 58,291	\$ 24,794

- 
- (1) Reflects \$537 and \$810 in earn-out compensation expense in the three and nine months ended September 30, 2014, respectively. Reflects \$3,814 and \$555 in earn out compensation and inventory that was written up for purchase accounting and sold in both the three and nine months ended September 30, 2013.
- (2) Reflects expenses of \$232 and \$179 for one time, unrelated legal and consulting fees for the three months ended September 30, 2014 and September 30, 2013, respectively; expenses of \$1,131 and \$752 for one time, unrelated legal and consulting fees for the nine months ended September 30, 2014 and September 30, 2013. Includes write down of asset held for sale of \$647 for the nine months ended September 30, 2013.

## Discussion of Critical Accounting Policies

For a discussion of our critical accounting policies, please see the disclosure included in our Form 10-K (Commission File No. 001-34728) filed with the Securities and Exchange Commission, under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operation — Critical Accounting Policies.”

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2014-09 “Revenue from Contracts with Customers.” ASU 2014-09 provides a single principles-based, five-step model to be applied to all contracts with customers. The five steps are to identify the contract(s) with the customer, to identify the performance obligations in the contract, to determine the transaction price, to allocate the transaction price to the performance obligations in the contract and to recognize revenue when each performance obligation is satisfied. Revenue will be recognized when promised goods or services are transferred to the customer in an amount that reflects the consideration expected in exchange for those goods or services. ASU 2014-09 will be effective for the Company beginning on January 1, 2017 and the standard allows for either full retrospective adoption or modified retrospective adoption. The Company has just begun the process of evaluating the impact that the adoption

Table of Contents

of this guidance will have on our financial condition, results of operations and the presentation of our financial statements.

Liquidity and Capital Resources

Our principal sources of cash have been and we expect will continue to be cash from operations and borrowings under our senior credit facilities.

Our primary uses of cash are to provide working capital, meet debt service requirements, finance capital expenditures, pay dividends under our dividend policy and support our growth, including through acquisitions such as the TrynEx acquisition and other potential acquisitions, and for other general corporate purposes. For a description of the seasonality of our working capital rates see “—Seasonality and Year-To-Year Variability.”

Our Board of Directors has adopted a dividend policy that reflects an intention to distribute to our stockholders a regular quarterly cash dividend. The declaration and payment of these dividends to holders of our common stock is at the discretion of our Board of Directors and depends upon many factors, including our financial condition and earnings, legal requirements, taxes and other factors our Board of Directors may deem to be relevant. The terms of our indebtedness may also restrict us from paying cash dividends on our common stock under certain circumstances. As a result of this dividend policy, we may not have significant cash available to meet any large unanticipated liquidity requirements. As a result, we may not retain a sufficient amount of cash to fund our operations or to finance unanticipated capital expenditures or growth opportunities, including acquisitions. Our Board of Directors may, however, amend, revoke or suspend our dividend policy at any time and for any reason.

As of September 30, 2014, we had \$50.8 million of total liquidity, comprised of \$4.3 million in cash and cash equivalents and borrowing availability of \$46.5 million under our revolving credit facility, compared with total liquidity as of December 31, 2013 of approximately \$68.2 million, comprised of approximately \$19.9 million in cash and cash equivalents and borrowing availability of approximately \$48.3 million under our revolving credit facility. The decrease in our total liquidity from December 31, 2013 is primarily due to working capital needs and our borrowing base. Borrowing availability under our revolving credit facility is governed by a borrowing base, the calculation of which includes cash on hand. Accordingly, use of cash on hand may also result in a reduction in the amount available for borrowing under our revolving credit facility. Furthermore, our revolving credit facility requires us to maintain at least \$10.5 million of borrowing availability and 15% of the aggregate revolving commitments at the time of determination. We expect that cash on hand and cash we generate from operations, as well as available credit under our senior credit facilities, will provide adequate funds for the purposes described above for at least the next 12 months.

The following table shows our cash and cash equivalents and inventories in thousands at September 30, 2014, December 31, 2013 and September 30, 2013.

	As of		
	September	December	September
	30,	31,	30,
	2014	2013	2013
Cash and cash equivalents	\$ 4,289	\$ 19,864	\$ 3,975
Inventories	36,418	27,977	35,964

We had cash and cash equivalents of \$4.3 million at September 30, 2014 compared to cash and cash equivalents of \$19.9 million and \$4.0 million at December 31, 2013 and September 30, 2013, respectively. The table below sets forth a summary of the significant sources and uses of cash for the periods presented in thousands.

Table of Contents

Cash Flows (in thousands)	Nine Months Ended		Change	% Change	
	September 30, 2014	September 30, 2013			
Net cash used in operating activities	\$ (18,133)	\$ (26,722)	\$ 8,589	(32.1)	%
Net cash used in investing activities	(2,292)	(28,481)	26,189	(92.0)	%
Net cash provided by financing activities	4,850	35,042	(30,192)	(86.2)	%
Decrease in cash	\$ (15,575)	\$ (20,161)	\$ 4,586	(22.7)	%

Net cash used by operating activities decreased \$8.6 million from the nine months ended September 30, 2013 to the nine months ended September 30, 2014. The decrease in cash used by operating activities was primarily due to a \$21.6 million increase in net income adjusted for reconciling items driven by the favorable operating results partially offset by unfavorable changes in working capital of \$13.0 million.

Net cash used in investing activities decreased \$26.2 million for the nine months ended September 30, 2014, compared to the corresponding period in 2013. This decrease was primarily due to the \$26.7 million acquisition of the TrynEx assets in 2013.

Net cash provided by financing activities decreased \$30.2 million for the nine months ended September 30, 2014 compared to the corresponding period in 2013. The decrease in cash provided by financing activities was primarily a result of having a draw on our revolving credit facility of \$50.0 million at September 30, 2013 as compared to \$33.5 million at September 30, 2014 slightly offset by the repayment of the \$13.0 million outstanding balance at December 31, 2013 which was repaid in the three months ended March 31, 2014.

#### Contractual Obligations

There have been no material changes to our contractual obligations in the nine months ended September 30, 2014.

#### Off-Balance Sheet Arrangements

We are not party to any off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our financial condition, changes in financial condition, revenues, expenses, results of operations, liquidity, capital expenditures or capital resources.

#### Seasonality and Year-to-Year Variability

Our business is seasonal and also varies from year-to-year. Consequently, our results of operations and financial condition vary from quarter-to-quarter and from year-to-year as well. In addition, because of this seasonality and variability, our results of operations for any quarter may not be indicative of results of operations that may be achieved for a subsequent quarter or the full year, and may not be similar to results of operations experienced in prior years. That being the case, while snowfall levels vary within a given year and from year-to-year, snowfall, and the corresponding replacement cycle of snow and ice control equipment, is relatively consistent over multi-year periods.

Sales of our products are significantly impacted by the level, timing and location of snowfall, with sales in any given year and region most heavily influenced by snowfall levels in the prior snow season (which we consider to begin in October and end in March) in that region. This is due to the fact that end-user demand for our products is driven primarily by the condition of their snow and ice control equipment, and in the case of professional snowplowers, by their financial ability to purchase new or replacement snow and ice control equipment, both of

Table of Contents

which are significantly affected by snowfall levels. Heavy snowfall during a given winter causes usage of our products to increase, resulting in greater wear and tear to our products and a shortening of their life cycles, thereby creating a need for replacement snow and ice control equipment and related parts and accessories. In addition, when there is a heavy snowfall in a given winter, the increased income our professional snowplowers generate from their professional snowplow activities provides them with increased purchasing power to purchase replacement snow and ice control equipment prior to the following winter. To a lesser extent, sales of our products are influenced by the timing of snowfall in a given winter. Because an early snowfall can be viewed as a sign of a heavy upcoming snow season, our end-users may respond to an early snowfall by purchasing replacement snow and ice control equipment during the current season rather than delaying purchases until after the season is over when most purchases are typically made by end-users.

We attempt to manage the seasonal impact of snowfall on our revenues in part through our pre-season sales program, which involves actively soliciting and encouraging pre-season distributor orders in the second and third quarters by offering our distributors a combination of pricing, payment and freight incentives during this period. These pre-season sales incentives encourage our distributors to re-stock their inventory during the second and third quarters in anticipation of the peak fourth quarter retail sales period by offering pre-season pricing and payment deferral until the fourth quarter. As a result, we tend to generate our greatest volume of sales (an average of over two-thirds over the last ten years) during the second and third quarters, providing us with manufacturing visibility for the remainder of the year. By contrast, our revenue and operating results tend to be lowest during the first quarter, as management believes our end-users prefer to wait until the beginning of a snow season to purchase new equipment and as our distributors sell off inventory and wait for our pre-season sales incentive period to re-stock inventory. Fourth quarter sales vary from year-to-year as they are primarily driven by the level, timing and location of snowfall during the quarter. This is because most of our fourth quarter sales and shipments consist of re-orders by distributors seeking to restock inventory to meet immediate customer needs caused by snowfall during the winter months.

Because of the seasonality of our sales, we experience seasonality in our working capital needs as well. In the first quarter, we typically require capital as we are generally required to build our inventory in anticipation of our second and third quarter pre-season sales. During the second and third quarters, our working capital requirements rise as our accounts receivable increase as a result of the sale and shipment of products ordered through our pre-season sales program and we continue to build inventory. Working capital requirements peak towards the end of the third quarter and then begin to decline through the fourth quarter through a reduction in accounts receivable when we receive the majority of the payments for pre-season shipped products.

We also attempt to manage the impact of seasonality and year-to-year variability on our business costs through the effective management of our assets. Our asset management and profit focus strategies include:

- the employment of a highly variable cost structure facilitated by a core group of workers that we supplement with a temporary workforce as sales volumes dictate, which allows us to adjust costs on an as-needed basis in response to changing demand;
- our enterprise-wide lean concept, which allows us to adjust production levels up or down to meet demand;
-

- the pre-season order program described above, which incentivizes distributors to place orders prior to the retail selling season; and
- a vertically integrated business model.

These asset management and profit focus strategies, among other management tools, allow us to adjust fixed overhead and sales, general and administrative expenditures to account for the year-to-year variability of our sales volumes.

Additionally, although modest, our annual capital expenditure requirements can be temporarily reduced by up to approximately 40% in response to actual or anticipated decreases in sales volumes. If we are unsuccessful in our asset management initiatives, the seasonality and year-to-year variability effects on our business may be compounded and in turn our results of operations and financial condition may suffer.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We do not use financial instruments for speculative trading purposes, and do not hold any derivative financial instruments that could expose us to significant market risk. Our primary market risk exposures are changes in interest rates and steel price fluctuations.

Interest Rate Risk

We are exposed to market risk primarily from changes in interest rates. Our borrowings, including our term loan and any revolving borrowings under our senior credit facilities, are at variable rates of interest and expose us to interest rate risk. A portion of our interest rate risk associated with our term loan is mitigated through an interest rate swap as discussed in Note 5 to the Consolidated Financial Statements, above. In addition, the interest rate on any revolving borrowings is subject to an increase in the interest rate based on our average daily availability under our revolving credit facility.

As of September 30, 2014, we had outstanding borrowings under our term loan of \$110.9 million. A hypothetical interest rate change of 1%, 1.5% and 2% on our term loan would have changed interest incurred for the three months ended September 30, 2014 by \$0.0 million, \$0.1 million and \$0.1 million, respectively. We have entered into an interest rate swap, which became effective beginning July 2011 and matures December 2014, to hedge the variability in future cash flows associated with our variable-rate term loans. The swap fixes the adjusting rate on \$50.0 million of our term loan to an interest rate of 2.085%. As of September 30, 2014, we had outstanding borrowings under our revolving credit facility of \$33.5 million. A hypothetical interest rate change of 1%, 1.5% and 2% on our revolving credit facility would have changed interest incurred for the three months ended September 30, 2014 by \$0.0 million, \$0.0 million and \$0.1 million, respectively.

Commodity Price Risk

In the normal course of business, we are exposed to market risk related to our purchase of steel, the primary commodity upon which our manufacturing depends. Our steel purchases as a percentage of revenue were 12.2% and 14.4% for the three and nine months ended September 30, 2014, compared to 12.1% and 14.8% for the three and nine months ended September 30, 2013, respectively. While steel is typically available from numerous suppliers, the price of steel is a commodity subject to fluctuations that apply across broad spectrums of the steel market. We do not use any derivative or hedging instruments to manage steel price risk. If the price of steel increases, our variable costs could also increase. While historically we have successfully mitigated these increased costs through the implementation of either permanent price increases and/or temporary invoice surcharges, in the future we may not be able to successfully mitigate these costs, which could cause our gross margins to decline. If our costs for steel were to increase by \$1.00 in a period where we are not able to pass any of this increase onto our distributors, our gross

margins would decline by \$1.00 in the period in which such inventory was sold.

#### Item 4. Controls And Procedures

##### Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this Quarterly Report our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and include controls and procedures designed to ensure that the information required to be disclosed by us in such reports is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Table of Contents

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business, we are engaged in various litigation primarily including product liability and intellectual property disputes. However, management does not believe that any current litigation is material to our operations or financial position. In addition, we are not currently party to any environmental-related claims or legal matters.

Item 1A. Risk Factors

There have been no significant changes in our risk factors from those described in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

During the three months ended September 30, 2014, the Company sold no securities that were not registered under the Securities Act of 1933, as amended.

Dividend Payment Restrictions

The Company's senior credit facilities include certain restrictions on its ability to pay dividends. The senior credit facilities also restrict the Company's subsidiaries from paying dividends and otherwise transferring assets to Douglas Dynamics, Inc. For additional detail regarding these restrictions, see Note 5 to the notes to the consolidated financial statements.

Item 3.Defaults Upon Senior Securities

None.

Item 4.Mine Safety Disclosures

None.

Item 5.Other Information

None.
