NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Except as noted within the context of each footnote disclosure, the dollar amounts presented in the tabular data within these footnote disclosures are stated in millions of dollars.

1. Description of the Business and Basis of Presentation

Summary

Shell Midstream Partners, L.P. (“we,” “us,” “our” or “the Partnership”) is a Delaware limited partnership formed on March 19, 2014, to own and operate assets, including certain assets received from Shell Pipeline Company LP (“SPLC”). We conduct our operations through our wholly owned subsidiary Shell Midstream Operating, LLC (“Operating Company”). Our General Partner is Shell Midstream Partners GP LLC (“General Partner” or “GP”). References to “Shell” refer collectively to Royal Dutch Shell plc (“RDS”) and its controlled affiliates, other than us, our subsidiaries and our General Partner.

Description of the Business

We are a fee-based, growth-oriented master limited partnership recently formed by Shell to own, operate, develop and acquire pipelines and other midstream assets. Our assets consist of interests in entities that own crude oil and refined products pipelines serving as key infrastructure to transport growing onshore and offshore crude oil production to Gulf Coast refining markets and to deliver refined products from those markets to major demand centers. As of June 30, 2015, we own interests in two crude oil pipeline systems and two refined products systems. The crude oil pipeline systems, which are held by Zydeco Pipeline Company LLC (“Zydeco”) and Mars Oil Pipeline Company (“Mars”), are strategically located along the Texas and Louisiana Gulf Coast and offshore Louisiana. These systems link major onshore and offshore production areas with key refining markets. The refined products pipeline systems, which are held by Bengal Pipeline Company LLC (“Bengal”) and Colonial Pipeline Company (“Colonial”), connect Gulf Coast and southeastern U.S. refineries to major demand centers from Alabama to New York. On July 1, 2014, SPLC formed Zydeco as a wholly owned subsidiary. In anticipation of our initial public offering of common units by the Partnership, SPLC contributed the fixed assets and certain agreements of the crude oil pipeline system from Houston, Texas to Houma, Louisiana (“Ho-Ho”) and other related fixed assets of SPLC to Zydeco.

As of June 30, 2015, we own a 62.5% interest in Zydeco, a 28.6% interest in Mars, a 49.0% interest in Bengal and a 3.0% interest in Colonial. Zydeco is consolidated within our condensed consolidated financial statements as a subsidiary. We obtained control of this affiliate via a voting agreement with SPLC through which we have voting power over the ownership interests retained by SPLC in Zydeco. The 37.5% ownership interest in Zydeco retained by SPLC is reflected as noncontrolling interest in our condensed consolidated financial statements. We account for each of our investments in Mars and Bengal using the equity method of accounting, and we account for our investment in Colonial using the cost method of accounting.

Effective July 1, 2015, we acquired a 36.0% interest in Poseidon Oil Pipeline Company, L.L.C. (“Poseidon”), an offshore crude oil pipeline system located in the central region of the Gulf of Mexico (the “July 2015 Acquisition”). See Note 12 — Subsequent Events for additional details.

We generate the majority of our revenue under long-term agreements by charging fees for the transportation of crude oil and refined products through our pipelines. We do not engage in the marketing and trading of any commodities. Our operations consist of one reportable segment.

Basis of Presentation

Our condensed consolidated financial statements include all majority owned and non-majority owned subsidiaries required to be consolidated under generally accepted accounting principles in the United States (“GAAP”). Our reporting currency is U.S. dollars, and all references to dollars are U.S. dollars. The accompanying unaudited condensed consolidated financial statements and related notes have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete annual financial statements. The year-end condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. During interim periods, we follow the accounting policies disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014, filed with the United States Securities and Exchange Commission (“SEC”). The unaudited condensed consolidated financial statements for the three and six months ended June 30, 2015 and 2014 include all adjustments we believe are necessary for a fair statement of the results for the interim periods. These adjustments are of a normal recurring nature unless otherwise disclosed. Operating results for the three and six months ended June 30, 2015 are not necessarily indicative of the results that may be expected for the full year ended December 31, 2015. These unaudited condensed consolidated financial statements and other information included in this Quarterly Report should be read in conjunction with our

consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014.

The June 30, 2014 condensed consolidated financial statements were derived from the financial statements and accounting records of SPLC and Shell. References to the Partnership or other expressions defined above for time periods prior to November 3, 2014 refer to our predecessor for accounting purposes (“Predecessor”). These statements reflect the condensed combined historical results of operations and cash flows of our Predecessor as if such business had been a separate entity for the three and six months ended June 30, 2014. The condensed consolidated statements of income also include expense allocations to our Predecessor prior to July 1, 2014 for certain functions historically performed by SPLC and Shell, including allocations of general corporate expenses related to finance, legal, information technology, human resources, communications, ethics and compliance, shared services, employee benefits and incentives, insurance, and share-based compensation. Personnel and operating costs incurred by SPLC and Shell on our Predecessor’s behalf were charged to our Predecessor and are included in either general and administrative expenses or operations and maintenance expenses in the accompanying condensed consolidated statements of income, depending on the nature of the employee’s role in our operations. These allocated corporate costs relate primarily to the wages and benefits of SPLC’s and Shell’s employees supporting our Predecessor’s operations and have been allocated to our Predecessor on the basis of direct usage when identifiable, with the remainder allocated on the basis of fixed assets, headcount, labor or other measure. The expense allocations have been determined on a basis that we, SPLC and Shell consider to be a reasonable reflection of the utilization of services provided or the benefit received by our Predecessor during the periods presented. Nevertheless, the condensed consolidated financial statements may not include all of the expenses that would have been incurred as a separate, publicly-traded company during the three and six months ended June 30, 2014 and may not reflect our condensed consolidated statements of income and cash flows as a separate, publicly-traded company during the three and six months ended June 30, 2014. All employees performing services on behalf of our Predecessor’s operations are employees of SPLC or Shell. Beginning from July 1, 2014, Zydeco, our Predecessor, entered into an operating and management agreement with SPLC under which SPLC provides general management and administrative services to us. Therefore, we no longer receive allocated corporate expenses from SPLC. We will continue to receive direct and allocated field and regional expenses from SPLC including payroll expenses not covered under the Zydeco operating and management agreement. See details of related party transactions in Note 3 — Related Party Transactions and Agreements.

Prior to the contribution of fixed assets and certain agreements on July 1, 2014, the cash generated and used by our operations was deposited to SPLC’s centralized account which was comingled with the cash of other pipeline entities controlled by SPLC. SPLC funded our operating and investing activities as needed. Accordingly, we did not record any cash and cash equivalents held by SPLC on our behalf for any period prior to July 1, 2014. We reflected the cash generated by our operations and expenses paid by SPLC on behalf of our operations as “Net distributions to Parent” on the accompanying condensed consolidated statements of cash flows. On July 1, 2014, we established our own cash accounts for the funding of our operating and investing activities, with the exception of the capital expenditures incurred by SPLC on our behalf and then contributed to us.

All financial information presented represents the condensed consolidated statements of income, financial position and cash flows accordingly:

- Our condensed consolidated statements of income for the three and six months ended June 30, 2015 and condensed consolidated statement of cash flows for the six months ended June 30, 2015 consist of the consolidated results of the Partnership. Our condensed consolidated statements of income for the three and six months ended June 30, 2014 and condensed consolidated statement of cash flows for the six months ended June 30, 2014 consist entirely of the condensed combined results of our Predecessor.

Our condensed consolidated balance sheets at June 30, 2015 and December 31, 2014 consist of the consolidated balances of the Partnership.

Our condensed consolidated statement of changes in equity for the six months ended June 30, 2015 consists of the consolidated results of the Partnership.

Partners' Capital and Accounting Periods

Post-Offering Periods

On November 3, 2014, we completed our initial public offering (the "Offering") of 46,000,000 common units (including 6,000,000 common units issued pursuant to the exercise of the underwriters' over-allotment option). At the completion of the Offering, SPLC owned 21,475,068 common units and 67,475,068 subordinated units, representing an aggregate 65.9% limited partner interest. SPLC also owned a 100% interest in our General Partner, which in turn owned 2,754,084 general partner units, representing a 2% general partner interest.

References to the Partnership or other expressions defined above for time periods beginning November 3, 2014 refer to the post-Offering accounting periods of Shell Midstream Partners, L.P.

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

On May 18, 2015 (the “Issuance Date”), the Partnership completed the sale of 7,692,308 common units representing limited partner interests (the “Common Units”) to unaffiliated third parties in a private placement (the “Private Placement”) for approximately \$297.7 million net proceeds (\$300.0 million of gross proceeds less \$2.3 million of placement agent fees) and issued 156,986 general partner units (the “General Partner Units”) to our General Partner for \$6.1 million in order for our General Partner to maintain its 2.0% general partner interest. See Note 8 — Equity — Private Placement for additional detail.

Pre-Offering Periods

The Predecessor’s financial results included in our condensed consolidated statements of income and condensed consolidated statements of cash flows contain the financial results of the following Predecessor entities for the time periods indicated.

For the accounting periods prior to June 30, 2014, the Predecessor’s financial results are those of Ho-Ho, wholly owned by SPLC.

Summary of Significant Accounting Policies

The accounting policies are set forth in Note 2 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no significant changes to these policies during the six months ended June 30, 2015.

We account for equity and cost method investments acquired under common control prospectively from the date of acquisition consistent with our treatment of these investments in our Annual Report on Form 10-K for the year ended December 31, 2014.

Recent Accounting Pronouncements

For accounting pronouncements issued prior to 2015, refer to Note 2 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2014.

In January 2015, the FASB issued accounting standards update, Subtopic 225-20, “Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items.” The adoption of this guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance will not affect our current financial position or results of operations.

In February 2015, the FASB issued accounting standards update to topic 810, “Consolidation” to change the criteria for reporting entities that are required to evaluate whether they should consolidate certain legal entities. This standard update becomes effective prospectively for annual reporting periods beginning on or after December 15, 2015, and interim periods within those annual periods, with early adoption permitted. The adoption of this guidance will not affect our financial position or results of operations.

In April 2015, the FASB issued accounting standards update to Subtopic 835-30, “Interest – Imputation of Interest” to simplify the presentation of debt issuance costs. The amendments require that debt issuance costs related to a recognized debt liability be presented as a direct deduction from the carrying amount of that debt liability. These

provisions are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance will not have a material effect on our financial position or results of operations.

In April 2015, the FASB issued an accounting standards update to topic 260, "Earnings Per Share" to clarify the presentation of historical earnings per unit for periods prior to the effective date of a transfer of a business to a master limited partnership from the general partner accounted for as a transaction between entities under common control. The amendments in this update specify that for purposes of calculating historical earnings per unit under the two-class method, the earnings (losses) of a transferred business before the effective date of the transaction should be allocated entirely to the general partner. In that circumstance, the previously reported earnings per unit of the limited partners (which is typically the earnings per unit measure presented in the financial statements) would not change as a result of the transaction. Qualitative disclosures about how the rights to the earnings (losses) differ before and after the transaction occurs for purposes of computing earnings per unit under the two-class method are also required. These provisions are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted. We have elected early adoption for the fiscal year and interim periods within 2015 as this method of calculating earnings per unit is currently in effect.

In July 2015, the FASB affirmed its earlier proposal to defer the effective date of the new revenue standard topic 606, "Revenue from Contracts with Customers," for all entities by one year, to annual reporting periods beginning after December 15, 2017. The FASB also decided to permit early adoption, but not before the original public entity effective date of December 15, 2016. We are currently evaluating the effect that adopting this new standard will have on our consolidated financial statements and related disclosures.

2. Acquisition

On May 18, 2015, we acquired an additional 19.5% interest in Zydeco and an additional 1.388% interest in Colonial for \$448.0 million in cash (the “May 2015 Acquisition”). The May 2015 Acquisition closed pursuant to a Purchase and Sale Agreement dated May 12, 2015 (“Purchase and Sale Agreement”) among the Operating Company, the Partnership and SPLC and became effective on April 1, 2015, and is accounted for as a transaction between entities under common control. The Partnership funded the May 2015 Acquisition with net proceeds from the Private Placement, \$80.0 million of cash on hand and \$70.8 million in borrowings under our five year revolving credit facility (“Five Year Revolver”) with Shell Treasury Center (West) Inc. (“STCW”), an affiliate of Shell. Total transaction costs of \$0.5 million were incurred in association with the May 2015 Acquisition. The terms of the May 2015 Acquisition were approved by the Board of Directors of our General Partner (the “Board”) and by the conflicts committee of the Board, which consists entirely of independent directors. The conflicts committee engaged an independent financial advisor and legal counsel. In accordance with the Purchase and Sale Agreement, SPLC has agreed to reimburse us for our proportionate share of certain costs and expenses incurred by Zydeco after April 1, 2015 with respect to a directional drill project to address soil erosion over a two-mile section of our 22-inch diameter pipeline under the Atchafalaya River and Bayou Shaffer in Louisiana. Such reimbursements will be treated as an additional capital contribution from the General Partner at the time of payment.

In connection with the May 2015 Acquisition we acquired book value of net assets under common control as follows:

Other assets ⁽¹⁾	\$2.5
Partners' capital ⁽²⁾	52.9
May 2015 Acquisition	\$55.4

(1) Book value of 1.388% additional interest in Colonial contributed by SPLC.

(2) Book value of 19.5% additional interest in Zydeco from SPLC’s noncontrolling interest.

We recognized \$392.6 million of consideration in excess of the book value of net assets acquired as a capital distribution to our General Partner in accordance with our policy for common control transactions.

3. Related Party Transactions and Agreements

Related party transactions and agreements with SPLC and Shell, including those entities in which Shell has an ownership interest but does not have control.

Purchase and Sale Agreement

See the description of the Purchase and Sale Agreement relating to the May 2015 Acquisition as further described in Note 2 — Acquisition.

Formation of Zydeco

In connection with the formation of Zydeco and the Offering, the Partnership and our Predecessor have entered into various agreements with SPLC and Shell.

On July 1, 2014, in conjunction with its formation, Zydeco entered into a contribution agreement (the “Contribution Agreement”) and an operating and management agreement (the “Management Agreement”) with SPLC. Pursuant to the Contribution Agreement, Zydeco reimburses SPLC for capital expenditures incurred by SPLC on behalf of Zydeco subsequent to November 3, 2014. The Management Agreement requires Zydeco to pay SPLC an annual management fee for general and administrative services.

Concurrent with the Offering, Zydeco also entered into a tax sharing agreement with an affiliate of Shell whereby Zydeco has agreed to reimburse Shell for state, local and franchise taxes attributable to Zydeco’s portion of the activity included in Shell’s combined returns for the respective taxing jurisdictions.

Formation of the Partnership

In conjunction with the Offering, on November 3, 2014, we entered into an omnibus agreement (“Omnibus Agreement”) with SPLC and our General Partner providing for our payment of an annual general and administrative services fee to SPLC as well as our reimbursement of certain costs incurred by SPLC on our behalf. Under the Omnibus Agreement certain costs are indemnified by SPLC. SPLC owns the noncontrolling interest in Zydeco. As of June 30, 2015 we have filed two claims for indemnification.

Mars has incurred maintenance expense for an underground cavern integrity project including inspections, plug and abandonment, installations and integrity tests to return the Mars cavern 4 to service. During both the three and six months ended June 30, 2015 we recognized \$1.0 million in Other income and as a related party receivable related to the indemnification for the Partnership’s share of these expenses.

Zydeco has incurred general and administrative expenses including expert fees related to a legal matter regarding the Federal Energy Regulatory Commission, or FERC, tariff rates and has also recognized an estimated settlement provision. Refer to Note 11 – Commitments and Contingencies – Legal Proceedings for additional information. During both the three and six months ended June 30, 2015 we recognized \$1.0 million in general and administrative expense reimbursements and as a related party receivable related to the indemnification by SPLC for the Partnership’s share of these expenses.

Other Related Party Balances

Other related party balances consist of the following:

	June 30, 2015	December 31, 2014
Accounts receivable ⁽¹⁾	\$7.7	\$ 10.3
Prepaid expenses	0.7	1.8
Other assets	0.7	0.5
Total assets	\$9.1	\$ 12.6
Accounts payable ⁽²⁾	\$4.8	\$ 10.6
Debt payable	70.8	—
Distribution payable to SPLC	—	11.9
Distribution payable to noncontrolling interest	15.8	—
Deferred revenue	9.3	4.7
Accrued liabilities	1.3	1.4
Total liabilities	\$102.0	\$ 28.6

(1) Accounts receivable includes reimbursements from SPLC related to the indemnification for the Partnership’s share of expenses related to the FERC rate case and the Mars cavern repair.

(2) Accounts payable reflects amounts owed to SPLC for reimbursement of third-party expenses incurred by SPLC for our benefit.

Related Party Revolving Credit Facilities

As of June 30, 2015 and December 31, 2014 we had \$70.8 million and zero outstanding borrowings, respectively, on our Five Year Revolver. As of June 30, 2015 and December 31, 2014 Zydeco had no outstanding borrowings on its

senior unsecured revolving credit facility agreement (the “Zydeco Revolver”) with STCW.

On June 29, 2015, in connection with the July 2015 Acquisition, the Partnership entered into a \$100.0 million 364 day revolving credit facility agreement (“364 Day Revolver”) with STCW, as lender. The 364 Day Revolver will mature on June 29, 2016. As of June 30, 2015, we had no borrowings outstanding.

For additional information regarding these credit facilities, see Note 7 — Debt.

Related Party Revenues and Expenses

We provide crude oil transportation and storage services to related parties under long-term contracts. We entered into these contracts in the normal course of our business and the services are based on the same terms as those provided to third parties. Our transportation services revenue from related parties was \$10.5 million and \$20.3 million for the three and six months ended June 30, 2015, respectively, and \$10.1 million and \$18.8 million for the three and six months ended June 30, 2014, respectively. Revenues

related to storage services from related parties were \$0.6 million and \$1.2 million for the three and six months ended June 30, 2015, respectively, and \$0.9 million and \$1.9 million for the three and six months ended June 30, 2014, respectively.

During the three month period ended June 30, 2015, Zydeco, Mars, Bengal and Colonial declared or paid cash distributions to the Partnership of \$41.6 million, of which \$26.3 million related to Zydeco. During the six month period ended June 30, 2015, Zydeco, Mars, Bengal and Colonial declared or paid cash distributions to the Partnership of \$77.8 million, of which \$45.2 million related to Zydeco.

For a discussion of services performed by SPLC and Shell on our behalf, see Note 1 – Description of the Business and Basis of Presentation – Basis of Presentation. During the three and six months ended June 30, 2014, we were allocated \$4.4 million and \$6.8 million, respectively, of indirect general corporate expenses incurred by SPLC and Shell which are included within general and administrative expenses in the accompanying condensed consolidated statements of income.

Beginning July 1, 2014, we entered into the Management Agreement with SPLC under which SPLC provides general management and administrative services to us. We no longer receive allocated corporate expenses from SPLC or Shell. We will continue to receive direct and allocated field and regional expenses, including payroll expenses not covered under the Management Agreement. These expenses are primarily allocated to us on the basis of headcount, labor or other measure. These expense allocations have been determined on a basis that both SPLC and we consider to be a reasonable reflection of the utilization of services provided or the benefit received by us during the periods presented.

Prior to the Offering, we were covered by the insurance policies of SPLC. Subsequent to the Offering, the majority of our coverage is provided by Shell with the remaining coverage by third-party insurers. The related party portion of insurance expense for the three and six months ended June 30, 2015 was \$0.5 million and \$1.0 million, respectively.

The following table shows related party expenses, including personnel costs described above, incurred by Shell and SPLC on our behalf that are reflected in the accompanying condensed consolidated statements of income for the indicated periods:

	Three months ended June 30, 2015 2014		Six months ended June 30, 2015 2014	
		Predecessor		Predecessor
Operations and maintenance - related parties	\$3.4	\$ 3.6	\$7.3	\$ 7.2
General and administrative - related parties ⁽¹⁾	4.8	4.4	9.8	6.8

(1) For the three and six months ended June 30, 2015, we incurred \$1.8 million and \$3.6 million, respectively, under the Management Agreement and \$2.2 million and \$4.3 million, respectively, under the Omnibus Agreement for general and administrative services.

Pension and Retirement Savings Plans

Employees who directly or indirectly support our operations participate in the pension, postretirement health and life insurance, and defined contribution benefit plans sponsored by Shell, which include other Shell subsidiaries. Our share of pension and postretirement health and life insurance costs for the three and six months ended June 30, 2015 was \$0.9 million and \$1.8 million, respectively, and for the three and six months ended June 30, 2014 was \$1.1 million and \$2.2 million, respectively. Our share of defined contribution benefit plan costs for the three and six months ended June 30, 2015 was \$0.1 million and \$0.3 million, respectively, and for the three and six month periods ended June 30, 2014 was \$0.2 million and \$0.4 million, respectively. Pension and defined contribution benefit plan

expenses are included in either general and administrative expenses or operations and maintenance expenses in the accompanying condensed consolidated statements of income, depending on the nature of the employee's role in our operations.

Share-based Compensation

Shell's incentive compensation programs primarily consist of share awards, restricted share awards or cash awards (any of which may be a performance award). The Performance Share Plan ("PSP") was introduced in 2005 by Shell. Conditional awards of RDS shares are made under the terms of the PSP to some 15,000 employees each year. The extent to which the awards vest is determined over a three-year performance period. Half of the award is linked to the key performance indicators, averaged over the period. For the PSP awards made prior to 2010, the other half of the award was linked to the relative total shareholder return over the period compared with four main competitors of RDS. For awards made in 2010 and onwards, the other half of the award is linked to a comparison with four main competitors of RDS over the period on the basis of four relative performance measures. All shares that vest are increased by an amount equal to the notional dividends accrued on those shares during the period from the award date to the vesting date. None of the awards result in beneficial ownership until the shares are delivered.

Under the PSP, awards are made on a highly selective basis to senior personnel. Shares are awarded subject to a three-year vesting period.

Certain SPLC and Shell employees supporting our operations as well as other Shell operations were historically granted these types of awards. These share-based compensation costs have been allocated to us as part of the cost allocations from Shell prior to June 30, 2014 and have been immaterial. Beginning July 1, 2014, we did not receive any allocated share-based compensation. Share-based compensation expense is included in general and administrative expenses in the accompanying condensed consolidated statements of income. These costs totaled less than \$0.1 million and \$0.1 million for the three and six months ended June 30, 2014, respectively.

Equity and Cost Method Investments

We have equity and cost method investments in entities that own certain of our assets, including Mars, Bengal and Colonial. SPLC also owns interests in these entities. In some cases we may be required to make capital contributions or other payments to these entities. For information regarding the equity method investments, see Note 4 – Equity Method Investments for additional details.

4. Equity Method Investments

The equity method investment balances as of June 30, 2015 for Mars and Bengal are \$81.7 million and \$73.6 million, respectively. The income earned from equity method investments for the three and six months ended June 30, 2015 for Mars are \$5.7 million and \$13.1 million, respectively, and for Bengal are \$5.1 million and \$10.2 million, respectively. The cash distributions received for the three and six months ended June 30, 2015 from Mars are \$8.6 million and \$17.2 million, respectively, and from Bengal are \$4.4 million and \$11.5 million, respectively.

Summarized Financial Information

The following tables present aggregated selected unaudited income statement data for our equity method investments in Mars and Bengal (on a 100% basis):

	Three Months Ended	Six Months Ended
	June 30, 2015	June 30, 2015
Mars		
Statements of Income		
Total revenues	\$ 46.9	\$ 91.9
Total operating expenses	26.3	43.8
Operating income	\$ 20.6	\$ 48.1
Net income	\$ 20.7	\$ 48.2

	Three Months Ended	Six Months Ended
	June 30, 2015	June 30, 2015
Bengal		
Statements of Income		
Total revenues	\$ 17.3	\$ 33.6
Total operating expenses	6.9	13.0
Operating income	\$ 10.4	\$ 20.6

Net income	\$ 10.4	\$ 20.5
------------	---------	---------

5. Property, Plant and Equipment

Property, plant and equipment consist of the following as of June 30, 2015 and December 31, 2014:

	Depreciable Life	June 30, 2015	December 31, 2014
Land	—	\$1.4	\$ 1.1
Building and improvements	10 - 40 years	10.5	10.5
Pipeline and equipment	10 - 30 years	320.1	313.6
Other	5 - 25 years	5.5	5.5
		337.5	330.7
Accumulated depreciation		(73.4)	(66.5)
		264.1	264.2
Construction in progress		8.6	10.8
Property, plant and equipment, net		\$272.7	\$ 275.0

6. Accrued Liabilities

Third-party accrued liabilities consist of the following as of June 30, 2015 and December 31, 2014:

	June 30,	December 31,
	2015	2014
Transportation, project engineering	\$ 1.1	\$ 0.6
Property taxes	5.8	0.2
Other accrued liabilities	3.3	0.1
Accrued liabilities - third parties	\$ 10.2	\$ 0.9

7. Debt

Revolving Credit Facility Agreements

On May 12, 2015, the Partnership and STCW amended and restated the Five Year Revolver to increase the borrowing capacity amount from \$300.0 million to \$400.0 million. Loans advanced under the amended and restated Five Year Revolver have up to a one-year term. In connection with the amendment and restatement of the Five Year Revolver, the Partnership agreed to pay an issuance fee of \$0.2 million. The Five Year Revolver maturity date of October 31, 2019 and all other terms and conditions of the agreement were unchanged. During the three months ended June 30, 2015, we borrowed \$70.8 million to partially fund the May 2015 Acquisition. Outstanding borrowings as of June 30, 2015 and December 31, 2014 were \$70.8 million and zero, respectively.

On June 29, 2015, in connection with the July 2015 Acquisition, the Partnership entered into a second revolving credit facility with STCW as lender. The 364 Day Revolver has \$100.0 million borrowing capacity and will mature on June 29, 2016. All other terms and conditions are materially the same as those of the Five Year Revolver. The Partnership agreed to pay an issuance fee of \$0.1 million. As of June 30, 2015, we had no borrowings outstanding.

Zydeco Revolving Credit Facility Agreement

On August 6, 2014, Zydeco entered into a senior unsecured revolving credit facility agreement with STCW as the lender. The Zydeco Revolver matures on August 6, 2019 and has a borrowing capacity of \$30.0 million. Loans advanced under the agreement have up to a six-month term. There were no outstanding borrowings as of June 30, 2015 and December 31, 2014.

As of June 30, 2015, we were in compliance with the covenants contained in the Five Year Revolver, the 364 Day Revolver, and the Zydeco Revolver.

8. Equity

Private Placement

On the Issuance Date, the Partnership completed the sale of the Common Units in the Private Placement for approximately \$297.7 million net proceeds (\$300.0 million gross proceeds, or \$39.00 per Common Unit, less \$2.3 million of placement agent fees). In connection with the issuance of the Common Units, the Partnership issued the General Partner Units to the GP for consideration of approximately \$6.1 million in cash. The GP purchased the

General Partner Units in order to maintain its 2.0% general partner interest in the Partnership pursuant to the Partnership's First Amended and Restated Agreement of Limited Partnership, dated as of November 3, 2014 (the "Partnership Agreement"). The Partnership used the net proceeds of the Private Placement to partially fund the May 2015 Acquisition. See Note 2 — Acquisition for additional detail.

Registration Rights Agreement

In connection with the Private Placement, the Partnership entered into a Registration Rights Agreement with the investors, which granted them certain rights, including a requirement for us to file a shelf registration statement under the Securities Act with the SEC for the resale of the Common Units. See Note 12 — Subsequent Events, regarding the timely filing and effectiveness of the registration statement.

Units Outstanding

As of June 30, 2015, we had 75,167,376 common units outstanding. SPLC owned 21,475,068 common units and 67,475,068 subordinated units, representing an aggregate 62.4% limited partner interest, all of the incentive distribution rights, and 2,911,070 general partner units, representing a 2.0% general partner interest the Partnership.

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

The changes in the number of units outstanding from December 31, 2014 through June 30, 2015 are as follows:

(in units)	Common	Subordinated	General Partner	Total
Balance at December 31, 2014	67,475,068	67,475,068	2,754,084	137,704,220
Units issued in connection with private placement	7,692,308	—	156,986	7,849,294
Balance at June 30, 2015	75,167,376	67,475,068	2,911,070	145,553,514

Distribution to our Unitholders

The following table details the distributions declared and/or paid for the periods presented:

Date Paid or to be Paid	Three Months Ended	Public Common	SPLC Common	SPLC Subordinated	General Partner Incentive ^{2%}	Total	Distributions per Limited Partner Unit
(in millions, except per unit amounts)							
February 12, 2015	December 31, 2014 ⁽¹⁾	\$4.8	\$ 2.2	\$ 7.1	\$—	\$0.3	\$ 14.4 \$ 0.1042
May 14, 2015	March 31, 2015	8.0	3.8	11.8	—	0.5	24.1 0.1750
August 13, 2015	June 30, 2015	10.2	4.1	12.8	0.1	0.5	27.7 0.1900

(1) The fourth quarter 2014 minimum quarterly distribution was prorated for the 59-day period from November 3, 2014 to December 31, 2014 in accordance with the Partnership Agreement.

9. Net Income per Limited Partner Unit

Net income per unit applicable to common limited partner units and to subordinated limited partner units is computed by dividing the respective limited partners' interest in net income for the period by the weighted average number of common units and subordinated units, respectively, outstanding for the period. Because we have more than one class of participating securities, we use the two-class method when calculating the net income per unit applicable to limited partners. The classes of participating securities include common units, subordinated units, General Partner units, and incentive distribution rights. Basic and diluted net income per unit are the same because we do not have any potentially dilutive units outstanding for the period presented.

On July 21, 2015, the Board of Directors of our General Partner declared our quarterly cash distribution of \$0.19 per unit, or \$27.7 million in total, for the second quarter of 2015. This is an 8.6% increase over the first quarter distribution of \$0.1750 per unit. The second quarter distribution will be paid on August 13, 2015, to unitholders of record as of August 3, 2015. The following tables show the allocation of net income to arrive at net income per limited partner unit:

Three Months Ended	Six Months Ended
June 30, 2015	June 30, 2015

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

Net income attributable to the Partnership	\$ 32.2	\$ 55.8
Less:		
General Partner's distribution declared	0.6	1.1
Limited Partners' distribution declared	27.1	50.7
Income in excess of distributions	\$ 4.5	\$ 4.0

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

Three Months Ended June 30, 2015	General Partner	Limited Partners' Common	Limited Partner's Subordinated	Total
		Units	Units	
(in millions of dollars, except per unit data)				
Distributions declared	\$0.6	\$ 14.3	\$ 12.8	\$27.7
Income in excess of distributions	0.1	2.3	2.1	4.5
Net income attributable to the Partnership	\$0.7	\$ 16.6	\$ 14.9	\$32.2
Weighted average units outstanding (in millions):				
Basic		75.2	67.5	
Diluted		75.2	67.5	
Net income per Limited Partner Unit (in dollars):				
Basic		\$ 0.22	\$ 0.22	
Diluted		\$ 0.22	\$ 0.22	

Six Months Ended June 30, 2015	General Partner	Limited Partners' Common	Limited Partner's Subordinated	Total
		Units	Units	
(in millions of dollars, except per unit data)				
Distributions declared	\$1.1	\$ 26.1	\$ 24.6	\$51.8
Income in excess of distributions	0.1	2.1	1.8	4.0
Net income attributable to the Partnership	\$1.2	\$ 28.2	\$ 26.4	\$55.8
Weighted average units outstanding (in millions):				
Basic		71.3	67.5	
Diluted		71.3	67.5	
Net income per Limited Partner Unit (in dollars):				
Basic		\$ 0.39	\$ 0.39	
Diluted		\$ 0.39	\$ 0.39	

The weighted average units outstanding for the three and six months ended June 30, 2015 include the Common Units as if they were outstanding as of April 1, 2015 which is the effective date of the May 2015 Acquisition.

10. Income Taxes

We are not a taxable entity for U.S. federal income tax purposes or for the majority of states that impose an income tax. Taxes on our net income are generally borne by our partners through the allocation of taxable income. Our income tax expense results from partnership activity in the state of Texas. Income taxes for the three and six months ended June 30, 2015 were \$0.1 million and \$0.3 million, respectively, and for the three and six months ended June 30, 2014 were zero.

11. Commitments and Contingencies

Environmental Matters

We are subject to federal, state, and local environmental laws and regulations. We routinely conduct reviews of potential environmental issues and claims that could impact our assets or operations. These reviews assist us in identifying environmental issues and estimating the costs and timing of remediation efforts. In making environmental liability estimations, we consider the material effect of environmental compliance, pending legal actions against us and potential third-party liability claims. Often, as the remediation evaluation and effort progresses, additional information is obtained, requiring revisions to estimated costs. These revisions are reflected in our income in the period in which they are probable and reasonably estimable.

As of June 30, 2015 and December 31, 2014, there were no accruals for environmental clean-up costs.

Legal Proceedings

SPLC and certain affiliates are named defendants in lawsuits and governmental proceedings that arise in the ordinary course of business. For each of our outstanding legal matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies and the likelihood of an unfavorable outcome. While there are still uncertainties related to the ultimate costs we may incur, based upon our evaluation and experience to date, we do not expect that the ultimate resolution of these matters will have a material adverse effect on our financial position, operating results, or cash flows.

Effective July 31, 2014, a rate case was filed against Zydeco with the Federal Energy Regulatory Commission, or FERC. The Zydeco rates since July 31, 2014 are being collected subject to refund and reduction of future tariff rates pending the outcome of a hearing at FERC to determine whether the initial uncommitted (or non-contract) rates are just and reasonable. For more information on the rate case, please read Item 1A. “Risk Factors — Risks Related to Our Business” in our Annual Report on Form 10-K for the year ended December 31, 2014. At this stage, management has established an accrual of \$1.5 million for this matter, which is reflected in the condensed consolidated financial statements as of June 30, 2015. Management believes this amount is a reasonable estimate of the Partnership's exposure based on current available information. The Partnership has the right under the Omnibus Agreement to seek indemnity from SPLC for some of the costs incurred. On a prospective basis, a successful challenge of any of our rates, or any changes to FERC's approved rate or index methodologies, could adversely affect our revenue and cash flows, including our ability to make distributions to our unitholders.

12. Subsequent Events

In preparing the accompanying condensed consolidated financial statements, we have reviewed events that have occurred after June 30, 2015, up until the issuance of the condensed consolidated financial statements.

In connection with the July 2015 Acquisition, Shell Oil Products US (“SOPUS”) conveyed to us its 36.0% interest in Poseidon for \$350.0 million in cash. Poseidon is a Delaware Limited Liability Company formed in February 1996 to design, construct, own and operate an unregulated crude oil pipeline system located offshore Louisiana in the central region of the Gulf of Mexico. The July 2015 Acquisition was funded with borrowings of \$100.0 million under the 364 Day Revolver and \$250.0 million under the Five Year Revolver. As of July 1, 2015 we had outstanding borrowings of \$420.8 million. Because we and SOPUS are both consolidated subsidiaries of Shell, the acquisition of Poseidon will be accounted for under common control accounting. We will account for our interest in Poseidon using the equity method of accounting.

On June 12, 2015, the Partnership filed a Registration Statement on Form S-1 with the SEC to register for resale the 7,692,308 Common Units issued and sold in the Private Placement (see Note 8 — Equity — Private Placement). This registration statement was declared effective by the SEC on July 23, 2015.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Shell Midstream Partners, L.P. (“we,” “us,” “our” or “the Partnership”) is a Delaware limited partnership formed on March 19, 2014, to own certain assets received from Shell Pipeline Company LP (“SPLC”) and own other assets. We conduct our operations through our wholly owned subsidiary Shell Midstream Operating, LLC. Our General Partner is Shell Midstream Partners GP LLC (“General Partner” or “GP”). References to “Shell” refer collectively to Royal Dutch Shell plc and its controlled affiliates, other than us, our subsidiaries and our General Partner. We completed our initial public offering on November 3, 2014 (the “Offering”).

When discussing results of the accounting periods prior to the Offering, we are referring to the results of our Predecessor. See Note 1 — “Description of the Business and Basis of Presentation” to the condensed consolidated financial statements included in this report for additional information regarding the Predecessor’s accounting periods.

The following discussion and analysis should also be read in conjunction with Management’s Discussion and Analysis in Part II—Item 7 of our 2014 Annual Report and the consolidated financial statements and related notes therein. Our 2014 Annual Report contains a discussion of other matters not included herein, such as disclosures regarding critical accounting policies and estimates and contractual obligations. You should also read the following discussion and analysis together with the risk factors set forth in the 2014 Annual Report and the “Cautionary Statement Regarding Forward-Looking Information” in this report.

Partnership Overview

We are a fee-based, growth-oriented master limited partnership recently formed by Shell to own, operate, develop and acquire pipelines and other midstream assets. Our assets consist of interests in entities that own crude oil and refined products pipelines serving as key infrastructure to transport growing onshore and offshore crude oil production to Gulf Coast refining markets and to deliver refined products from those markets to major demand centers. We generate the majority of our revenue under long-term agreements by charging fees for the transportation of crude oil and refined products through our pipelines. We do not engage in the marketing and trading of any commodities.

Our assets consist of the following:

- A 62.5% ownership interest in Zydeco Pipeline Company LLC (“Zydeco”), which was wholly owned by SPLC prior to the Offering. Zydeco wholly owns the Houston-to-Houma crude oil pipeline system, or Ho-Ho, which is regulated by the Federal Energy Regulatory Commission, or FERC. Ho-Ho is situated within the largest refining market in the United States.
- A 28.6% ownership interest in Mars Oil Pipeline Company (“Mars”). Mars is a major corridor crude oil pipeline in a high-growth area of the offshore Gulf of Mexico, originating approximately 130 miles offshore in the deepwater Mississippi Canyon and terminating in salt dome caverns in Clovelly, Louisiana.
- A 49.0% ownership interest in Bengal Pipeline Company LLC (“Bengal”). Bengal’s refined products pipeline connects four refineries in the St. Charles, Norco, Garyville and Convent areas of Louisiana with refined products storage tankage in Baton Rouge, Louisiana. Bengal also connects with the Plantation and Colonial pipelines, providing major market outlets to the East Coast from the Gulf Coast.
- A 3.0% ownership interest in Colonial Pipeline Company (“Colonial”). Colonial is the largest refined products pipeline in the United States, transporting refined products such as gasoline, diesel fuel and jet fuel.
- Effective July 1, 2015, a 36.0% ownership interest in Poseidon Oil Pipeline Company, L.L.C. (“Poseidon”), a strategic link for central Gulf of Mexico oil to key markets in Louisiana (the “July 2015 Acquisition”). The discussion below does not reflect our ownership interest in Poseidon.

How We Generate Revenue

Our assets, including those owned and operated by Mars and Bengal, generate revenue under four types of long-term transportation agreements: transportation services agreements, throughput and deficiency agreements, life-of-lease

agreements and life-of-lease agreements with a guaranteed return. Our transportation services agreements have initial terms ranging from five to fifteen years; our throughput and deficiency agreements have initial terms of ten years or more; and our life-of-lease agreements have a term equal to the life of the applicable mineral lease. We also transport volumes on a short-term basis through posted tariffs, also known as a spot rate basis. Many of our transportation agreements include a provision to allow us to adjust the rate annually based on the FERC index. There is no requirement to reduce the rate when the FERC index is negative, other than spot rates if our rate were to exceed the adjusted index ceiling.

Zydeco's FERC-approved transportation services agreements entitle the customer to a specified amount of guaranteed capacity on a pipeline. This capacity cannot be pro-rated even if the pipeline is oversubscribed. In exchange, the customer makes a specified monthly payment regardless of the volume transported. If the customer does not ship its full guaranteed volume in a given month, it makes the full monthly cash payment and it may ship the unused volume in a later month for no additional cash payment for up to 12

months, subject to availability on the pipeline. The cash payment received is recognized as deferred revenue, and thereby not included in revenue or net income, until the earlier of the shipment of the unused volumes or the expiration of the 12-month period, as provided for in the applicable contract. If there is insufficient capacity on the pipeline to allow the unused volume to be shipped, the customer forfeits its right to ship such unused volume. We do not refund any cash payments relating to unused volumes.

Our throughput and deficiency agreements establish a minimum, annual average volume for each year during a fixed period. If the customer falls below the minimum volume in a year, it is required to pay a deficiency payment equal to the difference at the end of the year. Typically, surplus volumes in a year can be reserved for use in subsequent years where there is a deficiency. We refer to our transportation services agreements and our throughput and deficiency agreements as “ship-or-pay” contracts.

Our life-of-lease agreements, some of which have a guaranteed return for us, require producers to transport all production from the specified fields connected to the pipeline for the life of the lease. This means that the dedicated production cannot be transported by any other means, such as barges or another pipeline. These agreements can also include provisions to guarantee a return to the pipeline to enable the pipeline to recover its investment despite the uncertainty in production volumes by providing for an annual transportation rate adjustment over a fixed period of time to achieve a fixed rate of return. The calculation for the fixed rate of return is based on actual project costs and operating costs. At the end of the fixed period, the rate will be locked in at the last calculated rate and adjusted thereafter based on the FERC index.

Our long-term transportation agreements and tariffs for crude oil transportation include product loss allowance (“PLA”). PLA is an allowance for volume losses due to measurement difference set forth in crude oil product transportation agreements, including long-term transportation agreements and tariffs for crude oil shipments. PLA is intended to assure proper measurement of the crude oil despite solids, water, evaporation and variable crude types that can cause mismeasurement. The PLA provides additional revenue for us if product losses on our pipelines are within the allowed levels, and we are required to compensate our customers for any product losses that exceed the allowed levels. We take title to any excess loss allowance when product losses are within the allowed levels, and we sell that product several times per year at prevailing market prices.

How We Evaluate Our Operations

Our management uses a variety of financial and operating metrics to analyze our performance. These metrics are significant factors in assessing our operating results and profitability and include: (i) revenue (including PLA) from contracted capacity and throughput; (ii) operations and maintenance expenses; (iii) Adjusted EBITDA (defined below); and (iv) cash available for distribution.

Contracted Capacity and Throughput

The amount of revenue our business generates primarily depends on our long-term transportation agreements with shippers and the volumes of crude oil and refined products that we handle on our pipelines. If shippers do not meet the minimum contracted volume commitments under our ship-or-pay contracts, we have the right to charge for reserved capacity or for deficiency payments as described in “—How We Generate Revenue.” We also earn revenue by shipping crude oil and refined products on a spot rate basis in accordance with our tariff.

The commitments under our long-term transportation agreements with shippers and the volumes which we handle on our pipelines are primarily affected by the supply of, and demand for, crude oil and refined products in the markets served directly or indirectly by our assets. Our results of operations will be impacted by our ability to:

- utilize the remaining uncommitted capacity on, or add additional capacity to, our pipeline systems;

increase throughput volumes on our pipeline systems by making connections to existing or new third-party pipelines or other facilities, primarily driven by the anticipated supply of, and demand for, crude oil and refined products; and

- identify and execute organic expansion projects.

Operations and Maintenance Expenses

Our management seeks to maximize our profitability by effectively managing operations and maintenance expenses. These expenses are comprised primarily of labor expenses (including contractor services), utility costs (including electricity and fuel) and repairs and maintenance expenses. Utility costs fluctuate based on throughput volumes and the grades of crude oil and types of refined products we handle. Our other operations and maintenance expenses generally remain relatively stable across broad ranges of throughput volumes, but can fluctuate from period to period depending on the mix of activities, particularly maintenance activities, performed during that period. We will seek to manage our maintenance expenditures on the pipelines we operate by scheduling maintenance over time to avoid significant variability in our maintenance expenditures and minimize their impact on our cash flow, without compromising our commitment to safety and environmental stewardship.

Adjusted EBITDA and Cash Available for Distribution

We define Adjusted EBITDA as net income before income taxes, net interest expense, gain or loss from dispositions of fixed assets, allowance oil reduction to net realizable value, and depreciation and amortization, plus cash distributed to the Partnership from equity investments for the applicable period, less income from equity investments. We define Adjusted EBITDA attributable to the Partnership as Adjusted EBITDA less Adjusted EBITDA attributable to noncontrolling interests. We present these financial measures because we believe replacing our proportionate share of our equity investments' net income with the cash received from such equity investments more accurately reflects the cash flow from our business, which is meaningful to our investors.

We compute and present cash available for distribution and define it as Adjusted EBITDA attributable to the Partnership less maintenance capital expenditures attributable to the Partnership, net interest paid, cash reserves and income taxes paid, plus net adjustments from volume deficiency payments attributable to the Partnership. Cash available for distribution will not reflect changes in working capital balances.

Adjusted EBITDA and cash available for distribution are non-GAAP supplemental financial measures that management and external users of our condensed consolidated financial statements, such as industry analysts, investors, lenders and rating agencies, may use to assess:

- our operating performance as compared to other publicly traded partnerships in the midstream energy industry, without regard to historical cost basis or, in the case of Adjusted EBITDA, financing methods;
- the ability of our business to generate sufficient cash to support our decision to make distributions to our unitholders;
- our ability to incur and service debt and fund capital expenditures; and
- the viability of acquisitions and other capital expenditure projects and the returns on investment of various investment opportunities.

We believe that the presentation of Adjusted EBITDA and cash available for distribution provides useful information to investors in assessing our financial condition and results of operations. The GAAP measures most directly comparable to Adjusted EBITDA and cash available for distribution are net income and net cash provided by operating activities. Adjusted EBITDA and cash available for distribution should not be considered as an alternative to GAAP net income or net cash provided by operating activities. Adjusted EBITDA and cash available for distribution have important limitations as an analytical tool because it excludes some but not all items that affect net income and net cash provided by operating activities. You should not consider Adjusted EBITDA or cash available for distribution in isolation or as a substitute for analysis of our results as reported under GAAP. Additionally, because Adjusted EBITDA and cash available for distribution may be defined differently by other companies in our industry, our definition of Adjusted EBITDA and cash available for distribution may not be comparable to similarly titled measures of other companies, thereby diminishing its utility. Please refer to the "Reconciliation of non-GAAP measures" section of Results of Operations for the reconciliation of net income and cash provided by operating activities to Adjusted EBITDA and cash available for distribution.

Factors Affecting the Comparability of Our Financial Results

Our results of operations for the three month period ended June 30, 2015 (the "Current Quarter") and the six month period ended June 30, 2015 (the "Current Period") will not be comparable to our Predecessor's historical results of operations for the three month period ended June 30, 2014 (the "Comparable Quarter") and the six month period ended June 30, 2014 (the "Comparable Period") for the reasons described below:

- For the Comparable Quarter and Comparable Period, our ownership interests in Mars, Bengal and Colonial were not included in the results of operations, as we accounted for these investments prospectively from the date of the Offering.
- The completion of several expansion projects on Zydeco, including the installation of new pump stations and the addition of a new connection at Nederland provide operational benefits to the Current Quarter and Current Period as

compared to the Comparable Quarter and Comparable Period. As a result of pipeline upgrades, we have experienced an increase in depreciation and a corresponding increase in property taxes associated with Zydeco in the Current Quarter and Current Period as compared to the Comparable Quarter and Comparable Period.

Mars completed an expansion project that became operational in February 2014. The expansion added approximately 41 miles of 16- to 18-inch diameter pipeline that connects the new Olympus platform to Mars' existing pipeline at the West Delta 143 platform. The Olympus platform, which is the largest tension-leg platform in the Gulf of Mexico, accesses the deepwater South Deimos, West Boreas and Mars fields. The expansion project is supported by life-of-lease agreements with certain producers. As a result of the expansion, as well as increased volumes from the Amberjack pipeline, which connects with Mars, we experienced higher revenue, volumes, and operating costs in 2014. Mars has experienced higher revenue, volumes, and operating costs in the Current Quarter and Current Period.

20

Our operations and maintenance and general and administrative expenses historically included direct charges for the management and operation of our assets and certain overhead and shared services expenses allocated by SPLC. Allocations for operations and maintenance services included such items as engineering and logistics support. Allocations for general and administrative services included such items as information technology, legal, human resources and other financial and administrative services. These expenses were charged or allocated to our Predecessor based on the nature of the expenses and on the basis of fixed assets, headcount, labor or other measure. In conjunction with the Offering, on November 3, 2014, we entered into an omnibus agreement (“Omnibus Agreement”) with SPLC and our General Partner providing for our payment of an annual general and administrative services fee to SPLC as well as our reimbursement of certain costs incurred by SPLC on our behalf. Under our Omnibus Agreement, we pay an annual fee of \$8.5 million to SPLC for general and administrative services. For the Current Quarter and Current Period, we incurred \$2.2 million and \$4.3 million, respectively, for such services. For more information about this term fee and the services covered by it, please read Part III, Item 13. “Certain Relationships and Related Party Transactions — Distributions and Payments to Our General Partner and Its Affiliates — Omnibus Agreement” in our Annual Report on Form 10-K for the year ended December 31, 2014. We also incur an additional expense relating to commercial insurance for our ownership interest in Mars. The results of our Predecessor do not include the full amount of this annual fee or additional general and administrative expenses we incur as a result of being a publicly traded partnership.

Factors Affecting Our Business and Outlook

Substantially all of our revenue is derived from long-term transportation agreements with shippers, including ship-or-pay agreements and life-of-lease agreements, some of which provide a guaranteed return. We believe these long-term transportation agreements substantially mitigate volatility in our cash flows by limiting our direct exposure to reductions in volumes due to supply or demand variability. Our business can, however, be negatively affected by sustained downturns or sluggishness in the economy in general, and is impacted by shifts in supply and demand dynamics, the mix of services requested by the customers of our pipelines, competition and changes in regulatory requirements affecting our operations.

We believe key factors that impact our business are the supply of, and demand for, crude oil and refined products in the markets in which our business operates. We also believe that our customers’ requirements and government regulation of crude oil and refined products pipelines, discussed in more detail below, play an important role in how we manage our operations and implement our long-term strategies.

Changes in Crude Oil Sourcing and Refined Product Demand Dynamics

To effectively manage our business, we monitor our market areas for both short-term and long-term shifts in crude oil and refined products supply and demand. Changes in crude oil supply such as new discoveries of reserves, declining production in older fields and the introduction of new sources of crude oil supply, affect the demand for our services from both producers and consumers. One of the strategic advantages of our crude oil pipeline systems is their ability to transport attractively priced crude oil from multiple supply markets. Our crude oil shippers periodically change the relative mix of crude oil grades delivered to the refineries and markets served by our pipelines. While these changes in the sourcing patterns of crude oil transported are reflected in changes in the relative volumes of crude oil by type handled by our pipelines, our total crude oil transportation revenue is primarily affected by changes in overall crude oil supply and demand dynamics.

Similarly, our refined products pipelines have the ability to serve multiple major demand centers. Our refined products shippers periodically change the relative mix of refined products shipped on our refined products pipelines, as well as the destination points, based on changes in pricing and demand dynamics. While these changes in shipping patterns are reflected in relative types of refined products handled by our various pipelines, our total product transportation revenue is primarily affected by changes in overall refined products supply and demand dynamics.

As these supply and demand dynamics shift, we anticipate that we will continue to actively pursue projects that link new sources of supply to producers and consumers. Similarly, as demand dynamics change, we anticipate that we will create new services or capacity arrangements that meet customer requirements.

Changes in Commodity Prices

We do not engage in the marketing and trading of any commodities. Except for PLA, we do not take ownership of the crude oil or refined products we transport. As a result, our direct exposure to commodity price fluctuations is limited to the PLA provisions in our tariffs. We also have indirect exposure to commodity price fluctuations to the extent such fluctuations affect the shipping patterns of our customers.

The current global geopolitical and economic uncertainty may contribute to continued volatility in financial and commodity markets in the near to medium term. We have not experienced a significant impact to throughput volumes on Zydeco and Mars, our

crude oil pipeline systems, as a result of lower crude oil prices. In addition to benefitting from the long-term fee based arrangements described above, these pipeline systems are strategically positioned to connect crude oil volumes originating from key onshore and offshore production basins to the Texas and Louisiana refining markets, where demand for throughput has remained strong even in the current weak price environment. We expect that transportation volumes on Mars and Zydeco will continue to increase as significant deepwater production areas ramp up production, we execute continued debottlenecking efforts, and Zydeco brings a new connection on line (see “Factors Affecting the Comparability of Our Financial Results”). However, if crude oil prices remain weak for a sustained period, we could see a gradual impact on our transportation volumes if production coming into our systems is deferred and a related reduction in income from our allowance oil sales.

Our throughput volumes on our refined products pipeline systems depend primarily on the volume of refined products produced at connected refineries and the desirability of our end markets. These factors in turn are driven by refining margins, maintenance schedules and market differentials. Refining margins depend on the cost of crude oil or other feedstocks and the price of refined products. These prices are affected by numerous factors beyond our control, including the domestic and global supply of and demand for crude oil and refined products.

Major Maintenance Projects

We have two major maintenance projects planned for 2015.

Zydeco. On the Zydeco pipeline system, we are currently in the permitting stage of a directional drill project to address soil erosion over a two-mile section of our 22-inch diameter pipeline under the Atchafalaya River and Bayou Shaffer in Louisiana. If permitting is completed for work to begin this year, Zydeco expects to incur approximately \$23.0 million in maintenance capital expenditures for the total project, of which approximately \$14.4 million would be attributable to the Partnership’s ownership share. Approximately one-fourth of this project work is expected to occur in 2015 and is accounted for in income and cash flow projections. In connection with the Zydeco Acquisition, SPLC agreed to reimburse the Partnership against the Partnership’s proportionate share of certain costs and expenses incurred by Zydeco after April 1, 2015 with respect to the pipeline replacement project. If permitting is not completed in time for the work to be performed in the fourth quarter of 2015, the project will likely be postponed to the fourth quarter of 2016 to allow performance of the work during optimal weather and water conditions. As of June 30, 2015, Zydeco has not incurred any capitalized costs related to this project.

Mars. In addition, Mars incurred an expense for maintenance of a storage cavern leased at LOOP’s Clovelly Dome Storage Terminal. Pursuant to the Omnibus Agreement, SPLC confirmed it will indemnify the Partnership for its share of expenses for the Mars storage cavern project to the extent they exceed the applicable \$0.5 million deductible applicable to environmental claims. Also, there was a planned partial corridor shutdown on the Mars pipeline system which was completed in the Current Quarter. Better than expected performance of system throughput and revenue more than offset the expected impact of the shutdown.

Customers

We transport crude oil and refined products for a broad mix of customers, including crude oil producers, refiners, marketers and traders, and are connected to other crude oil and refined products pipelines. In addition to serving directly-connected Gulf Coast markets, our pipelines have access to customers in various regions of the United States through interconnections with other major pipelines. Our customers use our transportation services for a variety of reasons. Refiners typically require a secure and reliable supply of crude oil over a prolonged period of time to meet the needs of their specified refining diet and frequently enter into long-term firm transportation agreements to ensure a ready supply of crude oil, rate surety and sometimes sufficient transportation capacity over the life of the contract. Producers of crude oil require the ability to deliver their product to market and frequently enter into firm transportation contracts to ensure that they will have sufficient capacity available to deliver their product to delivery points with greater market liquidity. Marketers and traders generate income from buying and selling crude oil and

refined products to capitalize on price differentials over time or between markets. Our customer mix can vary over time and largely depends on the crude oil and refined products supply and demand dynamics in our markets.

Competition

Our pipeline systems compete primarily with other interstate and intrastate pipelines and with marine and rail transportation. Some of our competitors may expand or construct transportation systems that would create additional competition for the services we provide to our customers. In addition, future pipeline transportation capacity could be constructed in excess of actual demand, which could reduce the demand for our services, in the market areas we serve, and could lead to the reduction of the rates that we receive for our services. As a result of a substantial majority of our capacity being reserved on a long-term, fixed-rate basis, our revenue is not significantly affected by variation in customers' actual usage during the term of those contracts.

Regulation

Our interstate common carrier pipelines are subject to regulation by various federal, state and local agencies. For more information on federal, state and local regulations affecting our business, please read Part I, Items 1 and 2, Business and Properties in our Annual Report on Form 10-K for the year ended December 31, 2014.

Acquisition Opportunities

We plan to pursue acquisitions of complementary assets from SPLC as well as third parties. We also may pursue acquisitions jointly with SPLC. Given the size and scope of SPLC's footprint and its significant ownership interest in us, we expect acquisitions from SPLC will be an important growth mechanism over the next few years. We intend to execute three acquisitions from SPLC in 2015, including the acquisition of an additional interest in Zydeco (the "May 2015 Acquisition") and July 2015 Acquisition which have already been completed. Neither SPLC nor any of its affiliates is under any obligation, however, to sell or offer to sell us additional assets or to pursue acquisitions jointly with us, and we are under no obligation to buy any additional assets from them or to pursue any joint acquisitions with them. We will initially focus our acquisition strategy on transportation and midstream assets within the crude oil and refined products sectors. We believe that we will be well positioned to acquire midstream assets from SPLC and third parties should such opportunities arise. Identifying and executing acquisitions will be a key part of our strategy. However, if we do not make acquisitions on economically acceptable terms or if we incur a substantial amount debt in connection with the acquisitions, our future growth will be limited, and the acquisitions we do make may reduce, rather than increase, our available cash.

Seasonality

We do not expect that our operations will be subject to significant seasonal variation in demand or supply.

Results of Operations

(in millions of dollars)	Three Months Ended June 30,		
	2015	2014 Predecessor	\$ variance

Three month period ended June 30, 2015 compared to three month period ended June 30, 2014

Revenues

Total revenue for the Current Quarter increased by \$14.2 million over the Comparable Quarter primarily due to \$14.1 million in higher third-party transportation services revenue. Total transportation services revenue increased \$14.5 million, or 34%, due to 15% higher delivered volumes and higher average tariffs partly attributable to the start of one of the committed volume transportation agreements during the second quarter 2014.

Costs and Expenses

Total costs and expenses in the Current Quarter increased by \$9.0 million over the Comparable Quarter primarily due to \$2.7 million of additional general and administrative expenses, \$3.4 million higher property taxes from higher property appraisals of the Zydeco assets, and \$1.9 million of higher operations and maintenance expenses.

Operations and maintenance expenses in the Current Quarter increased by \$1.9 million primarily due to:

- \$1.2 million higher power and fuel expense due to increased throughput volumes of Zydeco; and
- \$1.1 million lower materials and supplies expense in the Comparable Quarter due to an environmental clean-up provision taken in the Comparable Quarter;

partially offset by,

- \$0.5 million higher gain on pipeline operations due to gains on the sale of allowance oil.

General and administrative expenses in the Current Quarter increased by \$2.7 million over the Comparable Quarter primarily due to:

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

- \$2.5 million of the fee payable to SPLC under the Omnibus Agreement and additional costs of being a publicly traded partnership;
- \$1.1 million of legal and expert fees in connection with the FERC rate case;
- \$1.5 million of Zydeco expense to accrue for the settlement of the FERC rate case; and

27

Edgar Filing: Shell Midstream Partners, L.P. - Form 10-Q

·\$1.0 million of higher Zydeco expenses related to the management fee initiated in July 1, 2014; partially offset by,

·\$2.6 million lower legal expenses due to the lack of allocated legal expenses in the Current Quarter as compared to those allocated to the Predecessor in the Comparable Quarter; and

·\$1.0 million indemnity from SPLC to the Partnership for the legal and expert fees in connection with the FERC rate case.

Depreciation expense of Zydeco in the Current Quarter increased by \$1.0 million over the Comparable Quarter due to capital additions related to the Zydeco pipeline expansion projects.

Investment, dividend and other income in the Current Quarter was \$14.1 million due to the earnings from Mars and Bengal equity investments, the dividend income from Colonial, and other income from the Mars cavern repair indemnity. We did not have an investment in these entities in the Comparable Quarter, nor did we have any other income.

Six month period ended June 30, 2015 compared to six month period ended June 30, 2014

Revenues

Total revenue for the Current Period increased by \$29.8 million over the Comparable Period primarily due to \$29.1 million in higher third-party transportation services revenue. Total transportation services revenue increased by \$30.6 million, or 39%, due to an 18% increase in delivered volumes and higher average tariffs, partly attributable to the start of one of the committed volume transportation agreements during the second quarter 2014.

Costs and Expenses

Total costs and expenses in the Current Period increased by \$11.9 million over the Comparable Period primarily due to \$6.5 million of additional general and administrative expenses, \$3.3 million in higher property taxes from higher property appraisals of the Zydeco assets, and \$1.6 million depreciation expense due to capital additions related to the Zydeco pipeline expansion projects.

Operations and maintenance expenses in the Current Period increased by \$0.5 million primarily due to:

·\$2.5 million higher power and fuel expense due to increased throughput volumes of Zydeco; and
·\$1.0 million higher insurance expense due to the creation of the Partnership;
partially offset by,

·\$3.0 million lower environmental expense due to the clean-up provisions taken in the Comparable Period.

General and administrative expenses in the Current Period increased by \$6.5 million over the Comparable Period primarily due to:

·\$5.2 million of the fee payable to SPLC under the Omnibus Agreement and additional costs of being a publicly traded partnership;

·\$1.7 million of legal and expert fees in connection with the FERC rate case;

·\$1.8 million of higher Zydeco expenses related to the management fee initiated in July 1, 2014; and

·\$1.5 million of Zydeco expense to accrue for the settlement of the FERC rate case;
partially offset by,

·\$2.4 million lower legal expenses due to the lack of allocated legal expenses in the Current Period as compared to those allocated to the Predecessor in the Comparable Period; and

\$1.0 million indemnity from SPLC to the Partnership for the legal and expert fees in connection with the FERC rate case.

Investment, dividend and other income in the Current Period was \$28.2 million due to the earnings from Mars and Bengal equity investments, the dividend income from Colonial, and other income from the Mars cavern repair indemnity. We did not have an investment in these entities in the Comparable Period, nor did we have any other income.

Capital Resources and Liquidity

After July 1, 2014, we established our own cash accounts. We expect our ongoing sources of liquidity to include cash generated from operations and borrowings under our revolving credit facility. We believe that cash generated from these sources will be

sufficient to meet our short-term working capital requirements and long-term capital expenditure requirements and to make quarterly cash distributions. Our liquidity as of June 30, 2015 was \$572.2 million consisting of \$113.0 million cash on hand and \$459.2 million available capacity under our revolving credit facility agreements.

Revolving Credit Facility Agreements

Zydeco Revolver

Zydeco entered into a revolving credit facility (the “Zydeco Revolver”) with Shell Treasury Center (West) (“STCW”), an affiliate of Shell as the lender. The Zydeco Revolver has a borrowing capacity of \$30.0 million. Loans advanced under the agreement have up to a six-month term. Borrowings under the credit facility bear interest at the three-month LIBOR rate plus a margin. The credit agreement governing the Zydeco Revolver provides for covenants such as requiring pari passu ranking with any new indebtedness and contains customary events of default, such as nonpayment of principal when due, nonpayment of interest, fees or other amounts, violation of covenants, and cross-payment default (due to indebtedness in excess of \$100.0 million). The Zydeco Revolver also requires payment of customary fees, including issuance and commitment fees and matures on August 6, 2019. There were no outstanding borrowings on the Zydeco Revolver as of June 30, 2015 and December 31, 2014.

Five Year Revolver

To provide additional liquidity following the Offering, we entered into a revolving credit facility agreement (“Five Year Revolver”) with STCW with an initial borrowing capacity of \$300.0 million. Loans advanced under the initial agreement had up to a six-month term.

On May 12, 2015, the Partnership and STCW amended and restated the Five Year Revolver to increase the borrowing capacity amount from \$300.0 million to \$400.0 million. Loans advanced under the amended and restated Five Year Revolver have up to a one-year term. In connection with the amendment and restatement of the Five Year Revolver, the Partnership agreed to pay an issuance fee of \$0.2 million.

The Five Year Revolver, as amended and revised, provides for covenants such as restricting additional indebtedness above \$600.0 million and requiring pari passu ranking with any new indebtedness, and contains customary events of default, such as nonpayment of principal when due; nonpayment of interest, fees or other amounts; violation of covenants; and cross-payment default (due to indebtedness in excess of \$100.0 million). Borrowings under the Five Year Revolver bear interest at the three-month LIBOR rate plus a margin. The Five Year Revolver also provides for customary fees, including issuance and commitment fees. Commitment fees began to accrue on the date the Partnership entered into the Five Year Revolver agreement. The Five Year Revolver matures on October 31, 2019. There were \$70.8 million outstanding borrowings as of June 30, 2015 and zero as of December 31, 2014.

364 Day Revolver

On June 29, 2015, in connection with the July 2015 Acquisition, the Partnership entered into a second revolving credit facility (“364 Day Revolver”) with STCW as lender. The 364 Day Revolver has a \$100.0 million borrowing capacity and will mature on June 29, 2016. All other terms and conditions are materially the same as those of the Five Year Revolver. As of June 30, 2015, we had no borrowings outstanding.

Cash Flows from Operations

Operating Activities. We generated \$110.2 million in cash flow from operating activities in the first six months of 2015 compared to \$50.1 million in the prior year period. The \$60.1 million increase in cash flows primarily resulted from higher third-party transportation services revenue and income from equity investments. These increases were partially offset by higher general and administrative expenses.

Investing Activities. Our cash flow used in investing activities was \$65.5 million in the first six months of 2015 compared to \$46.3 million in the prior year period. The increase in cash flow used in investing activities was primarily due to the May 2015 Acquisition and the payment of pre-Offering distributions from investments, partially offset by a decrease in expansion capital expenditures on the Ho-Ho pipeline system.

Financing Activities. Our cash flow used in financing activities was \$81.9 million in the first six months of 2015 compared to \$3.8 million in the prior year period. The increase in cash flow used in financing activities was primarily due to the capital distribution to the General Partner, quarterly distributions paid to the unitholders and the General Partner, and distributions paid to the noncontrolling interest, partially offset by net proceeds from private placement, borrowings on the Revolver and cash contribution from the General Partner.

Capital Expenditures

Our operations can be capital intensive, requiring investments to expand, upgrade or enhance existing operations and to meet environmental and operational regulations. Our capital requirements consist of maintenance capital expenditures and expansion capital expenditures. Examples of maintenance capital expenditures are those made to replace partially or fully depreciated assets, to maintain the existing operating capacity of our assets and to extend their useful lives, or other capital expenditures that are incurred in maintaining existing system volumes and related cash flows. In contrast, expansion capital expenditures are those made to acquire additional assets to grow our business, to expand and upgrade our systems and facilities and to construct or acquire new systems or facilities.

We incurred capital expenditures of \$4.6 million and \$31.1 million for the first six months of 2015 and 2014, respectively. The decrease in capital expenditures is primarily due to higher direct investment to expand the system in 2014 on the Zydeco pipeline as compared to 2015.

A summary of our capital expenditures is shown in the table below:

	Three Months Ended		Six Months Ended	
	June 30, 2015	June 30, 2014	June 30, 2015	June 30, 2014
(in millions of dollars)		Predecessor		Predecessor
Expansion capital expenditures	\$0.7	\$ 24.1	\$2.0	\$ 42.6
Maintenance capital expenditures	0.4	0.8	1.6	3.7
Total capital expenditures	\$1.1	\$ 24.9	\$3.6	\$ 46.3
(Decrease) increase in accrued capital expenditures	1.5	(10.5)	1.0	(15.2)
Total capital expenditures incurred	\$2.6	\$ 14.4	\$4.6	\$ 31.1

We expect total capital expenditures by Zydeco to be \$18.4 million in 2015, of which \$4.6 million has been incurred in the first six months of 2015. We expect Zydeco's maintenance capital expenditures, which are asset integrity projects in nature, to be approximately \$10.1 million for the year ending December 31, 2015, of which approximately \$5.8 million is to replace a two-mile section of a 22-inch diameter pipe under the Atchafalaya River and Bayou Shaffer. In connection with the Zydeco Acquisition, SPLC agreed to indemnify the Partnership against the Partnership's proportionate share of certain costs and expenses incurred by Zydeco after April 1, 2015 with respect to the pipeline replacement project. We expect Zydeco's expansion capital expenditures to be \$8.3 million for 2015. With the exception of this pipe replacement project, we anticipate that both maintenance and expansion capital expenditures for the remainder of the year will be funded primarily with cash from operations. As of June 30, 2015, Zydeco has not incurred any capitalized costs related to this project.

Contractual Obligations

There were no material changes in our contractual obligations as of and during the three and six months ended June 30, 2015.

Off-Balance Sheet Arrangements

We have not entered into any transactions, agreements or other contractual arrangements that would result in off-balance sheet liabilities.

Environmental Matters and Compliance Costs

We are subject to extensive federal, state and local environmental laws and regulations. These laws, which change frequently, regulate the discharge of materials into the environment or otherwise relate to protection of the environment. Compliance with these laws and regulations may require us to obtain permits or other approvals to conduct regulated activities, remediate environmental damage from any discharge of petroleum or chemical substances from our facilities or install additional pollution control equipment on our equipment and facilities. Our failure to comply with these or any other environmental or safety-related regulations could result in the assessment of administrative, civil or criminal penalties, the imposition of investigatory and remedial liabilities, and the issuance of injunctions that may subject us to additional operational constraints.

Future additional expenditures may be required to comply with the Clean Air Act and other federal, state and local requirements for our assets. These requirements could result in additional compliance costs and additional operating restrictions on our business, each of which could have an adverse impact on our financial position, results of operations and liquidity.

If we do not recover these expenditures through the rates and other fees we receive for our services, our operating results will be adversely affected. We believe that our competitors must comply with similar environmental laws and regulations. However, the specific impact on each competitor may vary depending on a number of factors, including, but not limited to, the type of competitor and location of its operating facilities.

We accrue for environmental remediation activities when the responsibility to remediate is probable and the amount of associated costs can be reasonably estimated. As environmental remediation matters proceed toward ultimate resolution or as additional remediation obligations arise, charges in excess of those previously accrued may be required. New or expanded environmental requirements, which could increase our environmental costs, may arise in the future. We believe we comply with all legal requirements regarding the environment, but since not all of them are fixed or presently determinable (even under existing legislation) and may be affected by future legislation or regulations, it is not possible to predict all of the ultimate costs of compliance, including remediation costs that may be incurred and penalties that may be imposed.

Critical Accounting Policies and Estimates

As of June 30, 2015, there have been no significant changes to our critical accounting estimates since our Annual Report on Form 10-K for the year ended December 31, 2014 was filed. Please read Note 1 — “Recent Accounting Pronouncements” to our condensed consolidated financial statements.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements. You can identify our forward-looking statements by the words “anticipate,” “estimate,” “believe,” “budget,” “continue,” “could,” “intend,” “may,” “plan,” “potential,” “predict,” “seek,” “show,” “expect,” “objective,” “projection,” “forecast,” “goal,” “guidance,” “outlook,” “effort,” “target” and similar expressions.

We based the forward-looking statements on our current expectations, estimates and projections about us and the industries in which we operate in general. We caution you these statements are not guarantees of future performance as they involve assumptions that, while made in good faith, may prove to be incorrect, and involve risks and uncertainties we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Any differences could result from a variety of factors, including the following:

- The continued ability of Shell and our non-affiliate customers to satisfy their obligations under our commercial and other agreements.
- The volume of crude oil and refined petroleum products we transport.
- The tariff rates with respect to volumes that we transport through our regulated assets, which rates are subject to review and possible reduction and refund imposed by federal and state regulators.
- Changes in revenue we realize under the loss allowance provisions of our regulated tariffs resulting from changes in underlying commodity prices.
- Fluctuations in the prices for crude oil and refined petroleum products.
- Changes in global economic conditions and the effects of a global economic downturn on the business of Shell and the business of its suppliers, customers, business partners and credit lenders.
- Liabilities associated with the risks and operational hazards inherent in transporting and storing crude oil and refined petroleum products.
- Curtailment of operations or expansion projects due to severe weather disruption; riots, strikes, lockouts or other industrial disturbances; or failure of information technology systems due to various causes, including unauthorized access or attack.
- Costs or liabilities associated with federal, state and local laws and regulations relating to environmental protection and safety, including spills, releases and pipeline integrity.
- Costs associated with compliance with evolving environmental laws and regulations on climate change.
- Costs associated with compliance with safety regulations, including pipeline integrity management program testing and related repairs.
- Changes in the cost or availability of third-party vessels, pipelines, rail cars and other means of delivering and transporting crude oil and refined petroleum products.
- Direct or indirect effects on our business resulting from actual or threatened terrorist incidents or acts of war.
- Availability of acquisitions and financing for acquisitions on our expected timing and acceptable terms.
- The factors generally described in Part I, Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2014 and our other filings with the SEC.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information about market risks for the three and six months ended June 30, 2015 and 2014 does not differ materially from that disclosed in the section entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures About Market Risk” in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Management of the Company, with the participation of its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company’s disclosure controls and procedures as of the end of the period. Our disclosure controls and procedures have been designed to provide reasonable assurance that the information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on their evaluation, as of the end of the period covered by this Form 10-Q, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures (as defined in Rules 13(a)-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended) were not effective because of the material weaknesses in our internal control over financial reporting described below.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

We did not maintain effective internal control over the completeness and accuracy of revenues. Specifically, controls were not designed or effectively operating to review the completeness and accuracy of journal entries required to properly accrue revenues and record loss/gain from pipeline operations. This control deficiency did not result in any material adjustments to our consolidated financial statements for the year ended December 31, 2014 but resulted in the revision of our Predecessor’s unaudited financial statements for the three-month period ended March 31, 2013. This control deficiency could result in misstatements of the aforementioned accounts and related disclosures that would result in a material misstatement of the financial statements that would not be prevented or detected. Accordingly, our management has determined that this control deficiency constitutes a material weakness.

In addition, we did not maintain effective internal control over the accuracy of tariff rate allocations between Shell pipeline systems and associated inputs which impacts the accuracy and reporting of revenues. Specifically, effective controls were not designed or effectively operating to review the accuracy of tariff rate allocations between Shell pipeline systems and associated inputs. This control deficiency resulted in the restatement of our combined audited financial statements as of and for the year ended December 31, 2013 and the revision of our combined financial statements as of and for the period ended June 30, 2014 as described below.

On November 20, 2014, Shell Midstream Partners, L.P. concluded that the audited 2013 combined financial statements of its accounting predecessor, the Houston-to-Houma crude oil pipeline system (“Ho-Ho”), in which the Partnership owned a 43% interest, contained an error that resulted in a \$2.8 million understatement of Ho-Ho’s total revenue and net income for 2013. As a result of this error, Ho-Ho’s net parent investment and total assets were understated by \$1.9 million for the year ended December 31, 2013 and \$1.0 million as of June 30, 2014, after giving

effect to certain payments made on accounts receivable. There was no impact on Ho-Ho's revenue, net income or total cash flow for the six months ended June 30, 2014. The error was the result of revenue attributable to Ho-Ho that was instead recorded by administrative error to an unrelated pipeline system owned by an affiliate of the Partnership. The error resulted from a manual data entry mistake. Additionally, this control deficiency could result in misstatements of revenue, accounts receivable, allowance oil and net parent investment and related disclosures that would result in a material misstatement of the combined financial statements that would not be prevented or detected. Accordingly, our management has determined that this control deficiency constitutes a material weakness.

As previously disclosed regarding the material weaknesses described above, we standardized processes, segregated financial data within the accounting system, and implemented further controls to validate our financial data. Further, we engaged a third-party internal controls specialist firm to assist our management in a review of our existing control framework, the determination, development and implementation of new controls, the documentation of processes and the performance of control testing. Additional controls have been implemented to mitigate the associated risks and to support the completeness and accuracy of our financial reporting.

Remediation Plan

Additionally, our management, including the Chief Executive Officer, Chief Financial Officer and Controller have been committed to remediating these material weaknesses in our internal control over financial reporting. Our management has been enhancing existing controls and introducing new controls in the necessary areas by implementing a remediation plan in 2015. This plan has been designed to ensure each area affected by a material weakness is put through a comprehensive remediation process.

The ongoing status of our remediation efforts is reviewed by our Audit Committee who is advised of issues encountered and key decisions reached by management.

As described above, as of December 31, 2014, we did not maintain effective internal control over the completeness and accuracy of revenues. Specifically, controls were not designed or effectively operating to review the completeness and accuracy of journal entries required to properly accrue revenues and record loss/gain from pipeline operations.

During 2015, we have designed and implemented the following controls to address this material weakness:

- A quarterly analysis of the prior quarter's journal entries is prepared to ensure each entry is reversed, recorded or excluded as nonrecurring as appropriate in the current quarter. This analysis is reviewed, approved and retained.
- All journal entries are recorded, documented, reviewed, approved and processed in accordance with our manual journal entry policy to ensure the transaction is valid, the entry is properly coded, and has the appropriate and sufficient supporting information.
- A quarterly checklist is maintained, reviewed and approved by the Controller to ensure all recurring closing activities, including required recurring journal entries, are completed prior to filing annual and quarterly reports.

We are currently in the testing and measurement phase of our remediation plan. As some of the mitigating controls are performed on a quarterly basis, we currently do not have a sufficient number of transactions to evaluate the design and operating effectiveness of each control or the effectiveness of our remediation plan. We may implement additional processes and controls as part of our remediation plan and, although management is committed to fully remediating our material weaknesses, our remediation plan as described above may not be fully effective.

Also described above, as of December 31, 2014, we did not maintain effective internal control over the accuracy of tariff rate allocations between Shell pipeline systems and associated inputs which impacts the accuracy and reporting of revenues. Specifically, effective controls were not designed or effectively operating to review the accuracy of tariff rate allocations between Shell pipeline systems and associated inputs.

During 2015, we have updated our revenue recognition system to track changes to our tariff rate allocations and implemented a control to review and approve the monthly change log to verify the accuracy of the rate allocation changes.

We are currently in the testing and measurement phase of our remediation plan. As some of the mitigating controls are performed on a quarterly basis, we currently do not have a sufficient number of transactions to evaluate the design and operating effectiveness of each control or the effectiveness of our remediation plan. We may implement additional processes and controls as part of our remediation plan and, although management is committed to fully remediating our material weaknesses, our remediation plan as described above may not be fully effective.

Despite the material weaknesses, we have concluded that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

Internal Control Over Financial Reporting and Changes in Internal Control Over Financial Reporting

The Securities and Exchange Commission (“SEC”), as required by Section 404 of the Sarbanes-Oxley Act, adopted rules that generally require every company that files reports with the SEC to include a management report on the company’s internal control over financial reporting in its annual report. We are not required to comply with the auditor attestation requirement of Section 404 of

the Sarbanes-Oxley Act while we qualify as an “emerging growth company” as defined in the Jumpstart Our Business Startups Act of 2012.

Except as described above, there have been no other changes in our internal control over financial reporting during the quarter ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

35

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Information regarding legal proceedings is set forth in Note 11 — Commitments and Contingencies to the Partnership's condensed combined financial statements included in Item 1 of Part I of this Quarterly Report on Form 10-Q and is incorporated herein by reference.

Item 1A. Risk Factors

We are subject to various risks and uncertainties in the course of our business. Risk factors relating to the Partnership are set forth under "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014 and in Exhibit 99.2 to our Current Report on Form 8-K dated June 29, 2015. No material changes to such risk factors have occurred as of the date of this quarterly report.

Item 2. Unregistered Sales of Equity Securities

On May 18, 2015, we completed the sale of 7,692,308 common units representing limited partner interests to unaffiliated third parties in a private placement for \$297.7 million of net proceeds (\$300.0 million of gross proceeds less \$2.3 million of placement agent fees), which were used to partially fund the July 2015 Acquisition from Shell Oil Products US. Barclays Capital acted as sole placement agent. We also issued an additional 156,986 general partner units to our General Partner for \$6.1 million in cash in order for our General Partner to maintain its 2.0% general partner interest. The foregoing transactions were undertaken in reliance upon the exemption from the registration requirements in Section 4(a)(2) of the Securities Act of 1933, as amended. The Partnership believes that exemptions other than the foregoing exemption may exist for these transactions. In connection with the private placement, we entered into a registration rights agreement with the unaffiliated investors, pursuant to which we agreed to file and maintain a registration statement with respect to the resale of the common units acquired in the private placement. The registration statement was declared effective by the SEC on July 23, 2015. We will receive no proceeds from any sales of common units by the investors under the registration statement.

Item 5. Other Information

Disclosures Required Pursuant to Section 13(r) of the Securities Exchange Act of 1934

In accordance with our General Business Principles and Code of Conduct, Shell seeks to comply with all applicable international trade laws including applicable sanctions and embargoes.

Under the Iran Threat Reduction and Syria Human Rights Act of 2012, and Section 13(r) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), we are required to include certain disclosures in our periodic reports if we or any of our "affiliates" (as defined in Rule 12b-2 under the Exchange Act) knowingly engaged in certain specified activities during the period covered by the report. Because the SEC defines the term "affiliate" broadly, it includes any entity controlled by us as well as any person or entity that controls us or is under common control with us.

The disclosure below relates solely to activities conducted outside the US by non-US affiliates of Royal Dutch Shell plc that may be deemed to be under common "control" with us. The disclosure does not relate to any activities conducted directly by us or our General Partner and does not involve our or the General Partner's management.

For purposes of this disclosure, we refer to Royal Dutch Shell plc and its subsidiaries other than us, the General Partner and Shell Midstream LP Holdings LLC as the "RDS Group". References to actions taken by the RDS Group

mean actions taken by the applicable RDS Group company. None of the payments disclosed below were made in US dollars however, for disclosure purposes, all have been converted into US dollars at the appropriate exchange rate. We do not believe that any of the transactions or activities listed below violated US sanctions.

In 2010, the RDS Group ceased all of its upstream commercial activities in Iran and suspended new business development, as a direct consequence of the international sanctions imposed on the country.

In 2013, the RDS Group closed its small representative office in Iran. In the second quarter of 2015, the RDS Group paid \$85 in stamp duties to the Iranian Ministry of Finance. This payment was made through the RDS Group's Iranian accountant Bayat Rayan. This transaction did not generate gross revenue or net profit. However, the RDS Group's cash deposits in Bank Karafarin (balance of \$2.8 million at June 30, 2015) generated non-taxable interest income of \$0.1 million in the second quarter of 2015. In the future, the RDS Group expects to make additional payments as a result of the ongoing liquidation process, including tax payments.

Payments to the Iranian Civil Aviation Authority for the clearance of overflight permits for RDS Group aircraft over Iranian airspace amounted to \$742 in the second quarter of 2015. There was no gross revenue or net profit associated with these transactions. On occasion, RDS Group aircraft may be routed over Iran and therefore these payments may continue in the future.

At June 30, 2015, the RDS Group has \$2,009 million payable to, and \$12 million receivable from, the National Iranian Oil Company (“NIOC”). The payable amount increased by \$65 million during the second quarter of 2015 as a result of currency movements. There was no change in the principal amount. The RDS Group is unable to settle the payable position as a result of applicable sanctions. In the second quarter of 2015, RDS Group officials met Iranian officials in Tehran. They discussed the RDS Group’s outstanding debt to NIOC (any settlement continues to be subject to sanctions), and potential areas for cooperation should sanctions be lifted. In order to obtain visas for these officials, an amount of \$442 was paid to the Iranian embassy in The Netherlands and \$59 to the Iranian Consulate in Pakistan. There was no gross revenue or net profit associated with these transactions. The RDS Group expects to continue discussions with Iranian officials and therefore similar payments may continue in the future in full compliance with all applicable international trade laws including applicable sanctions and embargoes.
