Non - GAAP Reconciliation 31 This presentation contains certain financial information determined by methods other than in accordance with accounting principles generally accepted in the United States (“GAAP”) . These non - GAAP financial measures include core net interest income, core net interest margin, return on average tangible common equity, and tangible common equity to tangible assets . We calculate core net interest income and core net interest margin by subtracting the impact of adjustments regarding changes in expected cash flows related to our pools of loans we acquired through FDIC - assisted transactions from reported net interest income and net interest margin . Management believes that the core net interest income and core net interest margin are useful in assessing the Company’s core performance and trends, in light of the fluctuations that can occur related to updated estimates of the fair value of the loan pools acquired in the 2009 , 2011 , 2012 and 2014 FDIC - assisted transactions . In calculating return on average tangible common equity and the ratio of tangible common equity to tangible assets, we subtract average intangible assets from average common equity and intangible assets from common equity and from total assets . Management believes that the presentation of these measures excluding the impact of intangible assets provides useful supplemental information that is helpful in understanding our financial condition and results of operations, as they provide a method to assess management’s success in utilizing our tangible capital as well as our capital strength . Management also believes that providing measures that exclude balances of intangible assets, which are subjective components of valuation, facilitates the comparison of our performance with the performance of our peers . In addition, management believes that these are standard financial measures used in the banking industry to evaluate performance . These non - GAAP financial measures are supplemental and are not a substitute for any analysis based on GAAP financial measures . Because not all companies use the same calculation of non - GAAP measures, this presentation may not be comparable to other similarly titled measures as calculated by other companies .
