-

Item 2.02. Results of Operations and Financial Condition.

On July 22, 2005, Cummins Inc. ("Cummins," the "Company," "our," or "we") issued the attached press release reporting its financial results for the second quarter of 2005 and revised financial guidance for full-year 2005. The press release, including attachments, is furnished as Exhibit 99 and incorporated herein by reference.

The press release contains a non-GAAP financial measure, as defined by Securities and Exchange Commission rules. Specifically, "EBIT" which is defined as earnings before interest expense, provision for income taxes and minority interests in earnings of consolidated subsidiaries and is not a measure defined in accordance with generally accepted accounting principles ("GAAP"). This measure is used internally to evaluate the company's operating performance without regard to financing methods, capital structure and income taxes. Management encourages investors to review our consolidated financial statements and publicly filed reports in their entirety and to not rely on any single financial measure.

Item 9.01. Financial Statements and Exhibits.

For Immediate Release

July 22, 2005

Cummins reports record earnings and sales in second quarter; raises earnings guidance for 2005

COLUMBUS, IND. - Cummins Inc. (NYSE: CMI) today reported record earnings for the second quarter, driven by increased sales in each of its business segments as well as improved profit margins.

For the quarter, the Company reported net income of \$141 million, or \$2.83 per diluted share - a 72 percent increase from \$82 million, or \$1.76 a share for the same period in 2004. Second-quarter sales of \$2.49 billion also were a record and represent a 17 percent increase from \$2.12 billion in the second quarter of 2004.

Earnings before interest and taxes (EBIT) were \$235 million, or 9.4 percent of sales, compared to \$148 million, or 7.0 percent of sales, for the same period in 2004.

For the first six months of 2005, Cummins reported net income of \$238 million on sales of \$4.70 billion - compared to net income of \$115 million and sales of \$3.90 billion for the same period of 2004.

"Sales growth in many of our markets continues to be extremely strong, but our ability to convert those sales into sharply higher earnings speaks to our cost structure improvements and the focused efforts of our employees," said Cummins Chairman and Chief Executive Officer Tim Solso. "We are well on our way to exceeding last year's record performance."

As a result of the Company's continued strong performance and the expectation for robust demand in key businesses for the remainder of the year, Cummins today has increased its earnings guidance for 2005 to \$10.10-\$10.30 a share, from its previous guidance of \$9.00 - \$9.20. The Company expects to earn between \$2.40 and \$2.50 a share in the third quarter.

The Company continued to strengthen its balance sheet, generating \$217 million in cash from operations in the second quarter. Debt reduction also remains a focus as the Company has lowered its total debt by \$258 million since the beginning of the year.

The Company's strong second-quarter performance was led by the Engine Segment, which reported a record \$1.67 billion in sales in the second quarter, a 21 percent increase from \$1.37 billion in the same period in 2004. Segment EBIT for the Engine Segment rose more than 70 percent, due to the higher volume, improved pricing and improvements to the segment's cost structure.

Segment EBIT for the Company's Power Generation Segment nearly doubled from the second quarter of last year on a 7 percent increase in sales, with growing demand for Cummins products both in the United States and internationally. The Company's Distribution Segment also reported higher sales and Segment EBIT for the quarter, and once again achieved its goal of growing earnings faster than sales.

The Company's joint venture operations, most notably its largest engine joint ventures in China and India, performed well in the second quarter. Cummins profits from its unconsolidated joint ventures were \$35 million, compared to \$29

million for the same period in 2004.

Second-quarter details

Engine Segment

Segment EBIT rose 73 percent to \$156 million, from \$90 million for the same period in 2004. Heavy-duty truck market revenues worldwide rose 30 percent to \$553 million in the quarter, while shipments increased 27 percent. North American heavy-duty truck engine shipments rose 26 percent and international heavy-duty truck engine shipments increased 34 percent from the second quarter 2004.

Medium-duty truck and bus market revenues increased 39 percent in the quarter, led by a 46 percent increase in medium-duty truck engine shipments in the United States and Canada, and a 14 percent increase in international shipments. Global bus engines shipments also were strong, rising 38 percent from last year on improved demand at key original equipment manufacturers (OEMs) in North America, Europe, Latin America and Brazil.

Revenues from the light-duty automotive and recreational vehicle markets fell 8 percent to \$269 million in the quarter, as Dodge Ram engine shipments fell 10 percent. The decrease was the result of inventory management by DaimlerChrysler in advance of the launch of its 2006 model year introduction in July of this year. Cummins and DaimlerChrysler expect an increase in Dodge Ram sales in the second half of this year, and the Company anticipates another strong year of sales to DaimlerChrysler in 2005.

Power Generation Segment

Segment revenues rose 7 percent to \$493 million, while Segment EBIT was a record \$35 million, compared to \$18 million for the same period in 2004. The segment saw strong demand in its alternator and commercial generator set businesses worldwide.

Demand is in excess of engine capacity in most of the product ranges, which limits further growth. Margins, however, are expected to continue to improve as product price increases and cost improvements outpace commodity price inflation.

Components Segment

The Components Segment is composed of the Filtration, Emission Solutions, Fuel Systems and Holset businesses. The segment posted \$511 million in revenues for the quarter, a 15 percent increase over the same period in 2004. Segment EBIT in the quarter fell to \$21 million, from \$24 million for the same period in 2004.

The strong sales volume led to increases in manufacturing and logistics inefficiencies. Cummins also has made incremental investment in this segment, particularly in research and engineering, to prepare components that enable the Company to meet the 2006 Euro IV and 2007 U.S. EPA emissions standards.

Distribution Segment

The segment includes the Company's international distribution business and its ownership in several of Cummins North American distributors. Sales for the segment rose 17 percent to \$297 million in the quarter, while Segment EBIT grew by 30 percent to \$26 million. Revenue gains were strongest in engine and service markets, particularly in Europe.

Webcast information

Cummins management will host a teleconference to discuss these results at 9 a.m. CDT (10 a.m., EDT). This teleconference will be webcast and available on the Investor Relations section of the Cummins website at www.cummins.com.

Historical Segment Presentations

In May 2005, Cummins announced an internal reorganization that required modifications to the presentation of its segment results. On July 21, 2005, Cummins filed a Form 8-K with the U.S. Securities and Exchange Commission, which presented its historical segment results on the basis consistent with the current structure of our product lines. The 2004 information presented in this release is consistent with that 8-K filing.

Presentation of Non-GAAP Financial Information

EBIT is a non-GAAP financial measure used in this release. EBIT is defined and reconciled to what management believes to be the most comparable GAAP measure in a schedule attached to this release. Cummins presents this information as it believes it is useful to understanding the Company's operating performance, and because EBIT is a measure used internally to assess the performance of the operating units.

About Cummins Inc.

Cummins Inc., a global power leader, is a corporation of complementary business units that design, manufacture, distribute and service engines and related technologies, including fuel systems, controls, air handling, filtration, emission solutions and electrical power generation systems. Headquartered in Columbus, Indiana, (USA) Cummins serves customers in more than 160 countries through its network of 550 Company-owned and independent distributor facilities and more than 5,000 dealer locations. With more than 28,000 employees worldwide, Cummins reported sales of \$8.4 billion in 2004. Press releases can be found on the Web at www.cummins.com.

Information provided and statements on the webcast and in this release that are not purely historical are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding the company's expectations, hopes beliefs and intentions on strategies regarding the future. It is important to note that the company's actual future results could differ materially from those projected in such forward-looking statements because of a number of factors, including, but not limited to, general economic, business and financing conditions, labor relations, governmental action, competitor pricing activity, expense volatility and other risks detailed from time to time in Cummins Securities and Exchange Commission filings.
