ITEM 5. OTHER EVENTS

On April 18, 2001, a news release was issued on the subject of first quarter consolidated earnings for General Motors Corporation (GM). The news release did not include certain financial statements, related footnotes and certain other financial information that will be filed with the Securities and Exchange Commission as part of GM's Quarterly Report on Form 10-Q. The following is the first quarter earnings release for GM, and their subsidiary Hughes Electronics Corporation's (Hughes) earnings release dated April 17, 2001.

GM EARNS \$225 MILLION, OR \$0.50 PER SHARE, IN FIRST QUARTER

DETROIT -- General Motors Corp. (NYSE: GM) today reported that it earned \$225 million, or \$0.50 diluted earnings per share, in the first quarter of 2001 -- excluding special items -- on revenues of \$42.6 billion. The results exclude the \$12 million, or \$0.03 per share, favorable effect of the initial adoption of an accounting change (SFAS No. 133) relating to the treatment of derivatives. Including the accounting change, GM's first-quarter 2001 income totaled \$237 million, or \$0.53 per share.

GM's first-quarter performance, although better than expected, was down significantly from the record \$2.80 per share in the first quarter of 2000 on net income of \$1.8 billion and revenues totaling \$46.9 billion.

GM financial results described throughout the remainder of this release exclude the special item relating to SFAS No. 133 unless otherwise noted.

"Our first-quarter performance was better than expected, considering significantly reduced production volumes in North America," said GM Chairman Jack Smith. "While the economic and competitive environment is challenging, we remain focused on our key customer and business priorities."

GM President and Chief Executive Officer Rick Wagoner said, "The entire GM organization is moving fast to bring new products to market, grow our business, and improve our financial performance. We are committed to doing even better by aggressively attacking costs while we focus on bringing innovative new products and services to markets around the world."

Strong first-quarter earnings at General Motors Acceptance Corp. (GMAC) and lower costs in the North American automotive business only partially offset the effect of lower vehicle sales and intense pricing pressures in North America and Europe.

GMAC earnings of \$431 million in the first quarter reflected lower interest rates and increased wholesale business, partially offset by weaker vehicle-residual values. Mortgage operations also continued to perform very strongly in this period.

The significant decline in automotive earnings versus last year's first quarter are attributable primarily to North America and Europe. GM North America's (GMNA) income was \$120 million in the first quarter of 2001, down more than \$1.1 billion from the same period last year, as net price fell 1.0 percent and vehicle sales to dealers fell by more than 300,000 units, reflecting significant first-quarter production cuts designed to reduce dealer inventories.

"Continued progress in reducing costs helped offset the nearly 20-percent reduction in North American production volume. Our dealer inventory levels are much improved compared with levels at the end of last year," Wagoner said. "Our U.S. and North American market share was stable in the first quarter and up

Edgar Filing: GENERAL MOTORS CORP - Form 8-K

- 2 -

from the fourth quarter of 2000. While the North American industry volume is down compared with the record highs of last year, we are still seeing a lot of underlying strength in demand. As we continue to roll out new products and expand industry-leading services such as OnStar, we are focused on growing our market share and our revenue base."

GM Europe (GME) lost \$86 million during the first quarter, down significantly from a profit of \$221 million in the same quarter last year. Results were primarily affected by lower volume, continued pricing pressures, particularly in the United Kingdom, a shift in demand to smaller, lower-profit vehicles, and unfavorable country mix. While vehicle deliveries were down in line with the overall industry, GME's market share increased slightly during the quarter, and Opel/Vauxhall was the number-one brand for passenger-car sales in Western and Central Europe in the month of March. "We've taken tough actions to restructure our European operations, but the market is proving to be weaker than expected. We are focusing intensely on our new product introductions to strengthen our brands, and we are pushing even harder to reduce costs to meet the pricing challenges in this demanding market," Wagoner said.

GM's Latin America/Africa/Mid-East (GMLAAM) region increased its profitability to \$6 million in the first quarter of 2001, primarily from improved volume. The Asia Pacific (GMAP) region had a loss of \$20 million in the first quarter, which was more than accounted for by losses at GM's affiliate Isuzu.

Hughes' net loss of \$96 million in the first quarter of 2001 was related primarily to the continued growth of DIRECTV. Hughes added 441,000 net new DIRECTV subscribers in the first quarter, bringing the total subscriber base to 11.2 million.

LOOKING AHEAD

General Motors continues to expect that total U.S. vehicle sales in calendar-year 2001 will be about 16.5 million units.

While there are considerable uncertainties in the economic environment, the present consensus among automotive analysts that GM is expected to earn approximately \$0.95 per share for the second quarter of 2001 is consistent with GM's internal expectations.

"We have a number of major vehicle introductions this year in key market segments throughout the world as we continue to strengthen our global portfolio," Wagoner said.

Key new products in North America include the Chevrolet Avalanche; the Chevrolet Trailblazer, GMC Envoy and Oldsmobile Bravada midsize sport utilities; the Cadillac Escalade and Escalade EXT; Buick Rendezvous, and the Saturn VUE.

In Europe, the new Corsa and Zafira offerings, Astra convertible, Speedster, Vivaro commercial van, and improved availability of diesel engines are important for building market momentum.

In Latin America, the Chevrolet Zafira and Grand Vitara are new entries, joining the Celta, which was introduced last year.

The Buick Sail, the third distinct model from the Shanghai GM joint venture, and the Chevrolet Blazer and the S-10 crewcab pickups, which will be produced by the Jinbei GM joint venture, are important entries in this key growth market.

Edgar Filing: GENERAL MOTORS CORP - Form 8-K

- 3 -

The Zafira was recently introduced in Asia and is produced at GM's Thailand plant. GM will begin production in September of a small Chevrolet 4X4 lifestyle vehicle at Suzuki's Kosai plant in Japan. That vehicle will initially be sold in Japan and Australia.

#

In this press release and related comments by General Motors management, our use of the words "expect," "anticipate," "estimate," "forecast," "objective," "plan," "goal" and similar expressions is intended to identify forward looking statements. While these statements represent our current judgment on what the future may hold, and we believe these judgments are reasonable, actual results may differ materially due to numerous important factors that are described in GM's most recent report on SEC Form 10-K (at page II-10,11) which may be revised or supplemented in subsequent reports on SEC Forms 10-Q and 8-K. Such factors include, among others, the following: changes in economic conditions, currency exchange rates or political stability; shortages of fuel, labor strikes or work stoppages; market acceptance of the corporation's new products; significant changes in the competitive environment; changes in laws, regulations and tax rates; and, the ability of the corporation to achieve reductions in cost and employment levels to realize production efficiencies and implement capital expenditures at levels and times planned by management.

Hughes Reports First Quarter 2001
Financial Results

DIRECTV U.S. Business Grows Revenue by 25%; EBITDA by 61%

El Segundo, Calif., April 17, 2001 -- Hughes Electronics Corporation, a world-leading provider of digital television entertainment, broadband services, satellite-based private business networks, and global video and data broadcasting, today reported first quarter 2001 revenues increased 11.2% to \$1,893.0 million, compared with \$1,703.1 million in the first quarter of 2000. EBITDA for the quarter was \$113.2 million and EBITDA margin was 6.0%, compared to EBITDA of \$152.7 million and EBITDA margin of 9.0% in the first quarter of

Edgar Filing: GENERAL MOTORS CORP - Form 8-K

2000.

"Our DIRECTV U.S. business continues to be our primary growth driver," explained Michael T. Smith, HUGHES chairman and chief executive officer. "Despite uncertain economic conditions, we activated a record number of DIRECTV U.S. customers--on a gross basis--for the 14th consecutive quarter."

Smith continued, "As a result, DIRECTV generated more than \$1.3 billion in revenues in the quarter, an increase of 25% over the first quarter of 2000, and \$50 million in EBITDA, a 61% improvement over the same period last year. DIRECTV Latin America also contributed to our growth with \$165 million in revenues, a 45% increase over the previous year's first quarter."

Smith added that the improved DIRECTV U.S. EBITDA in the quarter was more than offset by changes in sales and sales-type leases of PanAmSat satellite transponders, increased investment in Hughes Network Systems' (HNS) DirecPC(R) broadband business, and fewer sales of HNS' DIRECTV receiving systems.

"Given the slowing economy, we believe it's prudent to adopt a cautious approach to growth at DIRECTV, while focusing even more on maximizing our returns," Smith continued. "As such, we will manage our subscriber acquisition costs (SAC) to ensure we maintain or increase our return on investment, redouble our efforts to minimize churn, and generate increasing EBITDA."

HUGHES had a first quarter 2001 net loss of \$105.3 million, compared to a net loss of \$81.9 million in the same period of 2000. The decline was due to the reduced EBITDA and increased depreciation expense associated with PanAmSat's larger satellite fleet and the increased number of leased DIRECTV set-top boxes in Latin America, partially offset by the elimination of operating losses and one-time after-tax charges related to the discontinued DIRECTV Japan business.

Segment Financial Review

Direct-To-Home Broadcast

First quarter revenues for the segment increased 26.9% to \$1,489.9 million from \$1,173.8 million in the first quarter of 2000. The segment had EBITDA of \$6.0 million compared with negative EBITDA of \$9.2 million in the first quarter of 2000.

United States: DIRECTV reported quarterly revenues of \$1,324 million, an increase of 25% from last year's first quarter revenues of \$1,059 million. The increase was primarily due to continued strong subscriber growth.

DIRECTV added 840,000 gross subscribers in the quarter. After accounting for expected churn, this resulted in net subscriber additions in the quarter of 340,000. As of March 31, 2001, DIRECTV had more than 9.8 million subscribers, representing an 18% increase over the 8.3 million customers attained as of March 31, 2000.

EBITDA for the first quarter of 2001 was \$50 million compared to EBITDA of \$31 million in last year's first quarter. This increase was principally due to increased EBITDA resulting from the larger subscriber base, which more than offset the higher marketing costs associated with the record first quarter gross subscriber additions.

Latin America: DIRECTV Latin America generated \$165 million in revenues

Edgar Filing: GENERAL MOTORS CORP - Form 8-K

for the quarter compared with \$114 million in the first quarter of 2000. This 45% increase was primarily due to continued strong subscriber growth.

The DIRECTV service in Latin America added 101,000 net subscribers in the first quarter of 2001. The total number of DIRECTV subscribers in Latin America as of March 31, 2001 was just over 1.4 million, compared to 909,000 as of March 31, 2000.

DIRECTV Latin America had negative EBITDA of \$44 million in the quarter compared to negative EBITDA of \$38 million in the same period of 2000. The change was primarily due to the impact of higher marketing expenses associated with the subscriber growth, which more than offset the increased EBITDA resulting from the larger subscriber base.

Satellite Services

PanAmSat, which is 81%-owned by HUGHES, reported first quarter 2001 revenues of \$205.2 million compared with \$299.1 million in the prior year's period. The decrease was driven primarily by \$94 million of first quarter 2000 outright sales and sales-type leases, for which there were no comparable sales in the first quarter 2001. While revenues from outright sales and sales-type leases represent substantial long-term commitments for PanAmSat services, virtually all of these revenues are recognized at service commencement. Revenues from operating lease agreements are recognized monthly over the term of the agreement. As a result, revenues from sales and sales-type lease transactions are subject to greater variation from period to period than revenues from operating leases.

- 15 -

EBITDA for the quarter was \$140.0 million, compared with first quarter 2000 EBITDA of \$201.0 million. EBITDA margin in the first quarter of 2001 was 68.2%, compared to 67.2% in the same period of 2000. The decrease in EBITDA was principally due to the sales and sales-type leases executed in the first quarter 2000, and an increase in direct operating, and selling, general and administrative (SG&A) costs resulting from the company's continued fleet expansion, and increased investment in the new NET-36 initiative. Excluding the impact of new sales and sales-type leases and operating costs associated with NET-36 from both quarters, EBITDA was \$147.5 million and EBITDA margin was 72% for the first quarter 2001, compared to EBITDA of \$153.3 million and EBITDA margin of 75% in the first quarter 2000.

As of March 31, 2001, PanAmSat had contracts for satellite services representing future payments (backlog) of approximately \$6.2 billion compared to approximately \$6.0 billion at the end of the fourth quarter of 2000. The increase was due primarily to new contracts with HBO, TBS, The WB Television Network and Warner Brothers Domestic Television Distribution services.

Network Systems

Hughes Network Systems (HNS) generated first quarter 2001 revenues of \$248.2 million versus \$364.5 million in the first quarter of 2000. The decline was principally due to lower sales of DIRECTV receiving equipment due primarily to the completion of the PRIMESTAR by DIRECTV conversion process in the third quarter of 2000. HNS shipped 252,000 DIRECTV receiver systems in the first quarter of 2001, compared to 980,000 units in the same period last year. HNS also introduced two new DIRECTV receivers during the quarter, one for high-definition television and the other featuring TiVo functionality.

Edgar Filing: GENERAL MOTORS CORP - Form 8-K

In the quarter, HNS had negative EBITDA of \$38.3 million compared to EBITDA of \$16.8 million in the first quarter of 2000. The decline in EBITDA is primarily attributable to lower shipments of and decreased manufacturing subsidies on DIRECTV receivers, and increased investment in DirecPC to grow its broadband subscriber base. In the quarter, DirecPC added nearly 11,000 net subscribers, bringing the cumulative total to approximately 62,000 broadband consumers in the United States.

HNS booked over \$200 million of new orders in its Enterprise business in the first quarter of 2001, a 17% increase from the same period a year ago. The increase in backlog was primarily attributable to a new service agreement with a major processor of debit and credit card transactions. HNS ended the first quarter with a backlog of more than \$500 million in its Enterprise business.

BALANCE SHEET

From December 31, 2000 to March 31, 2001, the Company's consolidated cash balance increased \$19.5 million to \$1,527.6 million and total debt increased \$379.5 million to \$1,696.1 million.

Hughes Electronics Corporation is a unit of General Motors Corporation. The earnings of Hughes Electronics are used to calculate the earnings attributable to the General Motors Class H common stock (NYSE:GMH).
