SOUTHSIDE BANCSHARES, INC. AND SUBSIDIARIES NOTES TO FINANCIAL STATEMENTS

1. Basis of Presentation

The term "Company" is used throughout this report to refer to Southside Bancshares, Inc. and its subsidiaries. The term "Bank" is used to refer to Southside Bank wherever a distinction between Southside Bancshares, Inc. and Southside Bank aids in the understanding of this report.

The consolidated balance sheet as of June 30, 2007, and the related consolidated statements of income, shareholders' equity and cash flows and notes to the financial statements for the three and six month periods ended June 30, 2007 and 2006 are unaudited; in the opinion of management, all adjustments necessary for a fair presentation of such financial statements have been included. Such adjustments consisted only of normal recurring items. All significant intercompany accounts and transactions are eliminated in consolidation. The preparation of these consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires the use of management's estimates. These estimates are subjective in nature and involve matters of judgment. Actual amounts could differ from these estimates.

Interim results are not necessarily indicative of results for a full year. These financial statements should be read in conjunction with the financial statements and notes thereto in our Annual Report on Form 10-K for the year ended December 31, 2006. All share data has been adjusted to give retroactive recognition to stock splits and stock dividends. For a description of our significant accounting and reporting policies, refer to Note 1 of the Notes to Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2006.

2. Earnings Per Share

Earnings per share on a basic and diluted basis has been adjusted to give retroactive recognition to stock splits and stock dividends and is calculated as follows (in thousands, except per share amounts):

		Months June 30,			Six Months Ended June 30,			
	2007		2006		2007		2006	
Basic Earnings and Shares:								
Net Income	\$ 4,587	\$	3,543	\$	8,350	\$	6,771	
Weighted-average basic shares outstanding	13,035		12,853		13,008		12,830	
Basic Earnings Per Share:								
Net Income	\$ 0.35	\$	0.28	\$	0.64	\$	0.53	
Diluted Earnings and Shares:								
Net Income	\$ 4,587	\$	3,543	\$	8,350	\$	6,771	
Weighted-average basic shares outstanding	13,035		12,853		13,008		12,830	
Add: Stock options	401		484		421		496	

Weighted-average diluted shares outstanding	13,436	13,337	13,429	13,326
Diluted Earnings Per Share:				
Net Income	\$ 0.34	\$ 0.27	\$ 0.62 \$	0.51

For the three and six month periods ended June 30, 2007 and 2006, there were no antidilutive options.

3. Comprehensive Income (Loss)

The components of other comprehensive income (loss) are as follows (in thousands):

The Bank concluded that, based on the creditworthiness of the issuer, the unrealized loss on each security in the above table represents a temporary impairment and does not require adjustment to the carrying amount of any of the individual securities. Additionally, the Bank has the ability and the intent to hold such securities through recovery of the unrealized losses.

Investment and mortgage-backed securities with book values of \$322.9 million at June 30, 2007 and \$454.6 million at December 31, 2006 were pledged to collateralize FHLB advances, public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law.

5. Loans and Allowance for Probable Loan Losses

The following table sets forth loan totals by category for the periods presented (in thousands):

		At		At
			D	ecember
	J	June 30,		31,
		2007		2006
Real Estate Loans:				
Construction	\$	46,876	\$	39,588
1-4 Family Residential		223,996		227,354
Other		177,918		181,047
Commercial Loans		125,609		118,962
Municipal Loans		110,416		106,155
Loans to Individuals		83,924		86,041
Total Loans	\$	768,739	\$	759,147

The summaries of the Allowance for Loan Losses are as follows (in thousands):

	Three Months Ended June 30,			Six Months Ended June 30,		
	2007		2006	2007		2006
Balance at beginning of period Provision for loan losses	\$ 7,261 217	\$	7,193 448	\$ 7,193 334	\$	7,090 729
Loans charged off	(616)		(744)	(1,209)		(1,447)
Recoveries of loans charged off Balance at end of period	\$ 505 7,367	\$	7,346	\$ 1,049 7,367	\$	974 7,346

6. Employee Benefit Plans

The components of net periodic benefit cost are as follows (in thousands):

	Six Months Ended June 30,							
	Defined Benefit							
		Pension Plan				Restoration	Plan	
		2007		2006		2007	2006	
Service cost	\$	665	\$	669	\$	31 \$	34	
Interest cost		1,156		1,095		84	92	
Expected return on assets		(1,264)		(1,162)		_	_	
Transition obligation recognition		_		_		1	1	
Net loss recognition		241		392		42	90	
Prior service credit amortization		(21)		(21)		(1)	(1)	
Net periodic benefit cost	\$	777	\$	973	\$	157 \$	216	

	Three Months Ended June 30,							
	Defined Benefit							
	Pension Plan				Restorati	Plan		
	2007		2006		2007		2006	
Service cost	\$ 356	\$	347	\$	16	\$	16	
Interest cost	566		548		39		43	
Expected return on assets	(631)		(581)		_		_	
Transition obligation recognition	_	-	_		_		_	
Net loss recognition	105		203		10		40	
Prior service credit amortization	(11)		(21)		_		(1)	
Net periodic benefit cost	\$ 385	\$	496	\$	65	\$	98	

Employer Contributions

We previously disclosed in our financial statements for the year ended December 31, 2006, that we expected to contribute \$3.0 million to our defined benefit pension plan and \$88,000 to our post retirement benefit plan in 2007. As of June 30, 2007, we had contributed \$3.0 million to the defined benefit pension plan, and \$40,000 of contributions had been made to the post retirement benefit plan.

7. Incentive Stock Options

In April 1993, we adopted the Southside Bancshares, Inc. 1993 Incentive Stock Option Plan ("the ISO Plan"), a stock-based incentive compensation plan. The ISO Plan expired March 31, 2003. Prior to January 1, 2006, we applied APB Opinion 25 and related Interpretations in accounting for the ISO Plan and disclosed the pro forma information required by SFAS 123 and SFAS 148. There was no compensation expense recognized for the stock options prior to January 1, 2006.

A summary of the status of our nonvested shares as of June 30, 2007 is as follows:

		ths Ended 30, 2007
		Weighted Average
	Number of	Grant-Date
	Options	Fair Value
Nonvested at beginning of the period	12,257	\$ 4.91
Nonvested at beginning of the period Vested	12,257 (6,127)	
		\$ 4.91

For the three and six months ended June 30, 2007 and 2006, we recorded approximately \$7,000 and \$14,000, respectively, of stock-based compensation expense. As of June 30, 2007 and 2006, there was \$20,000 and \$47,000, respectively, of total unrecognized compensation cost related to the ISO Plan for nonvested options granted in March 2003. The cost is expected to be recognized over a weighted-average period of 9 months.

The fair value of each stock option granted is estimated on the date of grant using the Black-Scholes method of option pricing with the following weighted-average assumptions for grants in 2003: dividend yield of 1.93%; risk-free interest rate of 4.93%; expected life of 6 years; and expected volatility of 28.90%.

Under the ISO Plan, we were authorized to issue shares of common stock pursuant to "Awards" granted in the form of incentive stock options (intended to qualify under Section 422 of the Internal Revenue Code of 1986, as amended). Before the ISO Plan expired, awards were granted to selected employees and directors. No stock options have been available for grant under the ISO Plan since its expiration in March 2003. Currently, we do not offer share-based payment programs to our employees.

The ISO Plan provided that the exercise price of any stock option not be less than the fair market value of the common stock on the date of grant. The outstanding stock options have contractual terms of 10 years. All options vest on a graded schedule, 20% per year for 5 years, beginning on the first anniversary date of the grant date.

A summary of the status of our stock options as of June 30, 2007 and the changes during the six months ended on those dates is presented below:

			Weighted	
			Average	Aggregate
		Weighted	Remaining	Intrinsic
		Average	Contract	Value
Nu	mber of	Exercise	Life	(in
O	ptions	Prices	(Years)	thousands)

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

Outstanding at December 31, 2006	604,281	\$ 5.76		
Exercised	(90,601)	\$ 5.43		
Cancelled	(383)	\$ 12.61		
Outstanding at June 30, 2007	513,297	\$ 5.82	2.60 \$	8,278
Exercisable at June 30, 2007	507,550	\$ 5.74	2.56 \$	8,226

The total intrinsic value (i.e., the amount by which the fair value of the underlying common stock exceeds the exercise price of a stock option on exercise date) of stock options exercised during the six months ended June 30, 2007 and 2006 were \$1.5 million and \$1.1 million, respectively.

Cash received from stock option exercises for the six months ended June 30, 2007 and 2006 was \$360,000 and \$396,000, respectively. The tax benefit realized for the deductions related to the stock option exercises were \$21,000 and \$41,000 for the six months ended June 30, 2007 and 2006, respectively.

8. Accounting Pronouncements

Statements of Financial Accounting Standards

SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115." SFAS 159, issued by the Financial Accounting Standards Board ("FASB") in February 2007, allows entities to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities that are not otherwise required to be measured at fair value, with changes in fair value recognized in earnings as they occur. SFAS 159 also requires entities to report those financial assets and financial liabilities measured at fair value in a manner that separates those reported fair values from the carrying amounts of similar assets and liabilities measured using another measurement attribute on the face of the statement of financial position. Lastly, SFAS 159 establishes presentation and disclosure requirements designed to improve comparability between entities that elect different measurement attributes for similar assets and liabilities. SFAS 159 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted if an entity also early adopts the provisions of SFAS 157. We intend to adopt SFAS 159 on January 1, 2008. We have not yet determined if, or to what extent, we will elect to use the fair value option to value our financial assets and liabilities or the impact that the implementation of SFAS 159 will have on our consolidated financial statements.

SFAS No. 157, "Fair Value Measurements." SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. SFAS 157 is effective for us on January 1, 2008 and is not expected to have a material impact on our consolidated financial statements.

SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments — an amendment of FASB Statements No. 133 and 140." SFAS 155 amends SFAS 133, "Accounting for Derivative Instruments and Hedging Activities" and SFAS 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." SFAS 155 permits, but does not require, fair value accounting for hybrid financial instruments that contain an embedded derivative that would otherwise require bifurcation in accordance with SFAS 133. SFAS 155 also eliminated the temporary exemption for interests in securitized financial assets provided for by SFAS 133, Derivatives Implementation Group ("DIG") Issue D1, "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets." However, in January 2007, the FASB issued interpretive guidance in SFAS 133, DIG Issue B40, "Application of Paragraph 13(b) to Securitized Interests in Prepayable Financial Assets." In DIG Issue B40, the FASB concluded that a securitized interest in prepayable financial assets was not subject to the bifurcation requirements of SFAS 155 provided that the interest met both the following criteria: (1) the right to accelerate the settlement of the securitized interest cannot be controlled by the investor; and (2) the securitized interest itself does not contain an embedded derivative for which bifurcation would be required other than an embedded derivative that results solely from the embedded call options in the underlying financial assets. The guidance in DIG Issue B40 is effective upon the adoption of SFAS 155. SFAS 155 was effective for all financial instruments acquired or issued after December 31, 2006 as well as to those hybrid financial instruments that had been previously bifurcated under SFAS 133. The adoption of SFAS 155 did not have a material impact on our consolidated financial statements.

Emerging Issues Task Force Consensuses

In September 2006, the Emerging Issues Task Force ("EITF") reached a final consensus on Issue 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements." EITF 06-4 requires that for a split-dollar life insurance arrangement, an employer should recognize a liability for future benefits in accordance with SFAS 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions." Under the guidance, the purchase of an endorsement type policy does not constitute a settlement since the policy does not qualify as nonparticipating because the policyholders are subject to the favorable and unfavorable experience of the insurance company. EITF 06-4 is effective for fiscal years beginning after December 15, 2007. We are currently assessing the impact of the adoption of EITF 06-4 on our consolidated financial statements.

In September 2006, the EITF reached a final consensus on Issue 06-5, "Accounting for Purchases of Life Insurance." EITF 06-5 provides guidance on FASB Technical Bulletin No. 85-4, "Accounting for Purchases of Life Insurance." Under the guidance, the policyholder should consider any additional amounts included in the contractual terms of the policy in determining the amount that could be realized under the insurance contract. In addition, the policyholder should also determine the amount that could be realized under the life insurance contract assuming the surrender of an individual-life by individual-life policy. EITF 06-5 was effective for fiscal years beginning after December 15, 2006. The adoption of EITF 06-5 did not have a material impact on our consolidated financial statements.

Financial Accounting Standards Board Staff Positions and Interpretations

FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement 109." FASB Interpretation No. 48 ("FIN 48") prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Interpretation 48 also provides guidance on the accounting for and disclosure of unrecognized tax benefits, interest and penalties.

We adopted the provisions of FIN 48 on January 1, 2007. As of the date of adoption, we had no unrecognized tax benefits and thus had accrued no interest or penalties on such benefits. At adoption, we did not anticipate a significant increase in unrecognized tax benefits during the subsequent 12 months. As of January 1, 2007, our 2003 through 2006 tax years were open to examination by the Internal Revenue Service and state taxing jurisdictions. There were no material changes in these items during the current quarter. While we typically do not incur significant interest or penalties on income tax liabilities, it is our policy to classify such amounts as interest expense and miscellaneous expense, respectively. We did not change our policy on classification of interest and penalties upon adoption of FIN 48.

9. Off-Balance-Sheet Arrangements, Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet-Risk. In the normal course of business, we are a party to certain financial instruments, with off-balance-sheet risk, to meet the financing needs of our customers. These off-balance-sheet instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the financial statements. The contract or notional amounts of these instruments reflect the extent of involvement and exposure to credit loss we have in these particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

We had outstanding unused commitments to extend credit of \$118.0 million and \$99.5 million at June 30, 2007 and 2006, respectively. Each commitment has a maturity date and the commitment expires on that date with the exception of credit card and ready reserve commitments, which have no stated maturity date. Unused commitments for credit card and ready reserve at June 30, 2007 and 2006 were \$9.3 million and \$7.9 million, respectively, and are reflected in the due after one year category. We had outstanding standby letters of credit of \$3.9 million and \$3.6 million at June 30, 2007 and 2006, respectively.

The scheduled maturities of unused commitments as of June 30, 2007 and 2006 were as follows (in thousands):

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

	June		
	2007		2006
Unused commitments:			
Due in one year or less	\$ 87,271	\$	57,812
Due after one year	30,691		41,697
Total	\$ 117,962	\$	99,509

We apply the same credit policies in making commitments and standby letters of credit as we do for on-balance-sheet instruments. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include cash or cash equivalents, negotiable instruments, real estate, accounts receivable, inventory and property, plant, and equipment.

Lease Commitments. We lease certain branch facilities and office equipment under operating leases. It is expected that certain leases will be renewed or equipment replaced with new leased equipment as these leases expire.

Securities. In the normal course of business we buy and sell securities. There were \$941,000 of unsettled trades to purchase and no unsettled trades to sell securities at June 30, 2007. At December 31, 2006, there were no unsettled trades to purchase or sell securities.

Litigation. We are subject to litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position and results of operations or our liquidity.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of the consolidated financial condition, changes in financial condition, and results of our operations, and should be read and reviewed in conjunction with the financial statements, and the notes thereto, in this presentation and in our Annual Report on Form 10-K for the year ended December 31, 2006.

We reported an increase in net income for the three months and six months ended June 30, 2007 compared to the same periods in 2006. Net income for the three and six months ended June 30, 2007 was \$4.6 million and \$8.4 million, respectively, compared to \$3.5 million and \$6.8 million, respectively, for the same periods in 2006.

All share data has been adjusted to give retroactive recognition to stock splits and stock dividends.

Forward Looking Statements

Certain statements of other than historical fact that are contained in this document and in written material, press releases and oral statements issued by or on behalf of Southside Bancshares, Inc., a bank holding company, may be considered to be "forward-looking statements" within the meaning of and subject to the protections of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. These statements may include words such as "expect," "estimate," "project," "anticipate," "appear," "believe," "could," "should," "may," "intend," "probability," "risk," "target," "objective," "plans," "potential," and similar expressions. Forward-looking statements are statements with respect to our beliefs, plans, expectations, objectives, goals, anticipations, assumptions, estimates, intentions and future performance, and are subject to significant known and unknown risks and uncertainties, which could cause our actual results to differ materially from the results discussed in the forward-looking statements. For example, discussions of the effect of our expansion, trends in asset quality and earnings from growth, and certain market risk disclosures are based upon information presently available to management and are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual income gains and losses could materially differ from those that have been estimated. Other factors that could cause actual results to differ materially from forward-looking statements include, but are not limited to, the following:

general economic conditions, either globally, nationally, in the State of Texas, or in the specific markets in which we operate;

- ·legislation, regulatory changes or changes in monetary or fiscal policy that adversely affect the businesses in which we are engaged;
- ·adverse changes in the status or financial condition of the Government Sponsored Enterprises (the "GSEs") impacting the GSEs' guarantees or ability to pay or issue debt;
- economic or other disruptions caused by acts of terrorism in the United States, Europe or other areas; changes in the interest rate yield curve such as flat, inverted or steep yield curves, or changes in the interest rate environment that impact interest margins and may impact prepayments on the mortgage-backed securities portfolio; unexpected outcomes of existing or new litigation involving us;

changes impacting the leverage strategy;

significant increases in competition in the banking and financial services industry;

changes in consumer spending, borrowing and saving habits;

technological changes;

our ability to increase market share and control expenses; the effect of changes in federal or state tax laws;

the effect of compliance with legislation or regulatory changes;
 the effect of changes in accounting policies and practices;
 the costs and effects of unanticipated litigation;

 \cdot risks of mergers and acquisitions including the related time and cost of implementing transactions and the potential failure to achieve expected gains, revenue growth or expense savings; and

failure of assumptions underlying allowance for loan losses and other estimates.

Additional information concerning us and our business, including additional factors that could materially affect our financial results, is included in our filings with the Securities and Exchange Commission. All written or oral forward-looking statements made by us or attributable to us are expressly qualified by this cautionary notice. We disclaim any obligation to update any factors or to announce publicly the result of revisions to any of the forward-looking statements included herein to reflect future events or developments.

Critical Accounting Estimates

Our accounting and reporting estimates conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. We consider our critical accounting policies to include the following:

Allowance for Losses on Loans. The allowance for losses on loans represents management's best estimate of probable losses inherent in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged-off, net of recoveries. The provision for losses on loans is determined based on our assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, and current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

The loan loss allowance is based on the most current review of the loan portfolio. The servicing officer has the primary responsibility for updating significant changes in a customer's financial position. Each officer prepares status updates on any credit deemed to be experiencing repayment difficulties which, in the officer's opinion, would place the collection of principal or interest in doubt. Our internal loan review department is responsible for an ongoing review of our loan portfolio with specific goals set for the loans to be reviewed on an annual basis.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates or appraisals of the collateral securing the debt are used to allocate the necessary allowances. The internal loan review department maintains a list of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. This list for loans or loan relationships of \$50,000 or more is updated on a periodic basis in order to properly allocate necessary allowance and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

Loans are considered impaired if, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is generally based on the present value of expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement, except that all collateral-dependent loans are measured for impairment based on fair value of the collateral. In measuring the fair value of the collateral, we use assumptions, such as discount rates, and methodologies, such as comparison to the recent selling price of similar assets, consistent with those that would be utilized by unrelated third parties performing a valuation.

Changes in the financial condition of individual borrowers, economic conditions, historical loss experience and the conditions of the various markets in which collateral may be sold may all affect the required level of the allowance for losses on loans and the associated provision for loan losses.

As of June 30, 2007, our review of the loan portfolio indicated that a loan loss allowance of \$7.4 million was adequate to cover probable losses in the portfolio.

Refer to Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Loan Loss Experience and Allowance for Loan Losses" and "Note 1 – Summary of Significant Accounting and Reporting Policies" of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2006 for a detailed description of our estimation process and methodology related to the allowance for loan losses.

Estimation of Fair Value. The estimation of fair value is significant to a number of our assets and liabilities. GAAP requires disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates and the shape of yield curves.

Fair values for most investment and mortgage-backed securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on the quoted prices of similar instruments. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining 16

maturities. Nonperforming loans are estimated using discounted cash flow analyses or underlying value of the collateral where applicable. Fair values for fixed rate certificates of deposits are estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities. The fair value of Federal Home Loan Bank ("FHLB") advances is estimated by discounting the future cash flows using rates at which advances would be made to borrowers with similar credit ratings and for the same remaining maturities. The fair values of other real estate owned ("OREO") are typically determined based on appraisals by third parties, less estimated costs to sell, and recorded at the lower of cost or fair value.

Impairment of Investment Securities and Mortgage-backed Securities. Investment and mortgage-backed securities classified as available for sale ("AFS") are carried at fair value and the impact of changes in fair value are recorded on our consolidated balance sheet as an unrealized gain or loss in "Accumulated other comprehensive income (loss)," a separate component of shareholders' equity. Securities classified as AFS or held to maturity ("HTM") are subject to our review to identify when a decline in value is other than temporary. Factors considered in determining whether a decline in value is other than temporary include: whether the decline is substantial; the duration of the decline; the reasons for the decline in value; whether the decline is related to a credit event or to a change in interest rate; our ability and intent to hold the investment for a period of time that will allow for a recovery of value; and the financial condition and near-term prospects of the issuer. When it is determined that a decline in value is other than temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings.

Defined Benefit Pension Plan. The plan obligations and related assets of the defined benefit pension plan (the "Plan") are presented in "Note 12 – Employee Benefits" of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2006. Plan assets, which consist primarily of marketable equity and debt instruments, are valued using market quotations. Plan obligations and the annual pension expense are determined by independent actuaries and through the use of a number of assumptions. Key assumptions in measuring the plan obligations include the discount rate, the rate of salary increases and the estimated future return on plan assets. In determining the discount rate, we utilized a cash flow matching analysis to determine a range of appropriate discount rates for our defined benefit pension and restoration plans. In developing the cash flow matching analysis, we constructed a portfolio of high quality non-callable bonds (rated AA- or better) to match as close as possible the timing of future benefit payments of the plans at December 31, 2006. Based on this cash flow matching analysis, we were able to determine an appropriate discount rate.

Salary increase assumptions are based upon historical experience and our anticipated future actions. The expected long-term rate of return assumption reflects the average return expected based on the investment strategies and asset allocation on the assets invested to provide for the Plan's liabilities. We considered broad equity and bond indices, long-term return projections, and actual long-term historical Plan performance when evaluating the expected long-term rate of return assumption. At June 30, 2007, the weighted-average actuarial assumptions of the Plan were: a discount rate of 6.05%; a long-term rate of return on plan assets of 7.50%; and assumed salary increases of 4.50%. Material changes in pension benefit costs may occur in the future due to changes in these assumptions. Future annual amounts could be impacted by changes in the number of plan participants, changes in the level of benefits provided, changes in the discount rates, changes in the expected long-term rate of return, changes in the level of contributions to the Plan and other factors.

Off-Balance-Sheet Arrangements, Commitments and Contingencies

Details of our off-balance-sheet arrangements, commitments and contingencies as of June 30, 2007 and 2006, are included in "Note 9 – Off-Balance-Sheet Arrangements, Commitments and Contingencies" in the accompanying Notes to Financial Statements included in this report.

Leverage Strategy

We utilize wholesale funding and securities to enhance our profitability and balance sheet composition by determining acceptable levels of credit, interest rate and liquidity risk consistent with prudent capital management. The leverage strategy consists of borrowing a combination of long and short-term funds from the FHLB and issuing brokered CDs. These funds are invested primarily in mortgage-backed securities, and to a lesser extent, long-term municipal securities. Although mortgage-backed securities often carry lower yields than traditional mortgage loans and other types of loans we make, these securities generally increase the overall quality of our assets because of underlying insurance or guarantees, are more liquid than individual loans and may be used to collateralize our borrowings or other obligations. While the strategy of investing a substantial portion of our assets in mortgage-backed and municipal securities has resulted in lower interest rate spreads and margins, we believe that the lower operating expenses and reduced credit risk combined with the managed interest rate risk of this strategy have enhanced our overall profitability over the last several years. At this time, we utilize the leverage strategy with the goal of enhancing overall profitability by maximizing the use of our capital.

Risks associated with the asset structure we maintain include a lower net interest rate spread and margin when compared to our peers, changes in the slope of the yield curve, which can reduce our net interest rate spread and margin, increased interest rate risk, the length of interest rate cycles, and the unpredictable nature of mortgage-backed securities prepayments. See "Item 1A. Risk Factors – Risks Related to our Business" in our Annual Report on Form 10-K for the year ended December 31, 2006. During 2006, the interest rate yield curve inverted. An inverted yield curve is defined as shorter term interest rates at a higher level than longer term interest rates. During the quarter ended June 30, 2007, longer term interest rates increased faster than shorter term interest rates and at June 30, 2007, the U.S. Treasury yield curve was no longer inverted. Should the yield curve invert again, our net interest margin and spread could decrease. Our asset structure, net interest spread and net interest margin require an increase in the need to monitor our interest rate risk. An additional risk is the change in market value of the AFS securities portfolio as a result of changes in interest rates. Significant increases in interest rates, especially long-term interest rates, could adversely impact the market value of the AFS securities portfolio which could also significantly impact our equity capital. Due to the unpredictable nature of mortgage-backed securities prepayments, the length of interest rate cycles, and the slope of the interest rate yield curve, net interest income could fluctuate more than simulated under the scenarios modeled by our Asset/Liability Committee ("ALCO") and described under "Item 3. Quantitative and Qualitative Disclosures about Market Risk" in this report.

The management of the securities portfolio as a percent of earning assets is guided by changes in our overall loan and deposit levels combined with changes in our wholesale funding levels. If adequate quality loan growth is not available to achieve our goal of enhancing profitability by maximizing the use of capital, as described above, then we could purchase additional securities, if appropriate, which could cause securities as a percentage of earning assets to increase. Should we determine that increasing the securities portfolio or replacing the current securities maturities and principal payments is not an efficient use of capital, we could adjust the level of securities through proceeds from maturities, principal payments on mortgage-backed securities or sales. During the quarter ended June 30, 2007, our loan growth was less than desired but due to the yield curve, we determined a slight decrease in the securities portfolio as a percentage of total assets was appropriate. At June 30, 2007, the securities portfolio as a percentage of total assets decreased to 50.1% from 50.7% at March 31, 2007 and 52.7% at December 31, 2006. The current interest rate environment is more investment friendly and changes to the securities portfolio as a percent of earning assets will be guided by changes in our loan and deposit levels during the third quarter of 2007. During the first six months of 2007, we reduced our investment and mortgage-backed securities approximately \$70.5 million as investment and mortgage-backed securities excluding the net unrealized loss on available for sale securities decreased from \$976.3 million at December 31, 2006 to \$905.8 million at June 30, 2007. Our strategy will be reevaluated as market conditions warrant. The leverage strategy is dynamic and requires ongoing management. As interest rates, yield curves, mortgage-backed securities prepayments, funding costs and security spreads change, our determination of the proper types and maturities of securities to own, proper amount of securities to own and funding needs and funding sources will continue to be reevaluated.

With respect to liabilities, we will continue to utilize a combination of FHLB advances and deposits to achieve our strategy of minimizing cost while achieving overall interest rate risk objectives as well as the liability management objectives of the ALCO. The FHLB funding and the brokered CDs represent wholesale funding sources. Our FHLB borrowings at June 30, 2007 decreased 27.1%, or \$122.4 million, to \$329.2 million from \$451.6 million at December 31, 2006 as a result of the decrease in the securities portfolio and an increase in deposits in excess of loan growth. During the second quarter ended June 30, 2007, FHLB borrowings decreased \$24.5 million due to an increase in deposits in excess of loan growth. During the quarter and six months ended June 30, 2007, we did not issue any additional callable brokered CDs. At June 30, 2007, our callable brokered CDs totaled \$123.4 million. These brokered CDs have maturities from approximately 1 to 4.5 years and have calls that we control, all of which are currently six months or less. During the last twelve months we utilized long-term brokered CDs to a greater extent than long-term FHLB funding because the brokered CDs better matched overall ALCO objectives by protecting Southside Bank with fixed rates should interest rates increase, while providing Southside Bank options to call the funding should interest rates decrease. Our wholesale funding policy currently allows maximum brokered CDs of \$150 million; however, this amount could be increased to match changes in ALCO objectives. The potential

higher interest expense and lack of customer loyalty are risks associated with the use of brokered CDs. Due to the non-brokered deposit growth and the decrease in FHLB borrowings during the quarter and six months ended June 30, 2007, our total wholesale funding as a percentage of deposits, not including brokered CDs, decreased to 37.3% at June 30, 2007, from 40.2% at March 31, 2007, and 49.6% at December 31, 2006, reflective of our strategy to deleverage during these periods.

Net Interest Income

Net interest income is the difference between interest income earned on assets (loans and investments) and interest expense due on our funding sources (deposits and borrowings) during a particular period.

Net interest income for the six months ended June 30, 2007 was \$20.1 million, a decrease of \$1.0 million, or 4.8%, when compared to the same period in 2006. Average interest earning assets increased \$9.9 million, or 0.6%, to \$1.73 billion, while the net interest spread decreased from 1.99% for the six months ended June 30, 2006 to 1.68% for the same period in 2007 and the net interest margin decreased from 2.67% for the six months ended June 30, 2006 to 2.52% for the same period in 2007. Net interest income decreased as a result of decreases in our net interest spread and net interest margin during the six months of 2007 when compared to the same period in 2006, which more than offset the increase in our average interest earning assets.

For the three months ended June 30, 2007, when compared to the same period in 2006, net interest income decreased \$476,000, or 4.5%, to \$10.1 million, primarily as a result of a decrease in our net interest margin and spread and a decrease in our average earning assets. For the three months ended June 30, 2007, when compared to the same period in 2006, average interest earning assets decreased \$51.3 million, or 2.9%, to \$1.69 billion, and the net interest margin and net interest spread decreased to 2.57% and 1.71%, respectively, from 2.61% and 1.90%, respectively. The decrease in our net interest margin and net interest spread was due primarily to the increase in short-term funding costs during the three months ended June 30, 2007 when compared to the same period in 2006. Future changes in interest rates or the yield curve could influence our net interest margin and net interest spread during future quarters. Future changes in interest rates could also impact prepayment speeds on our mortgage-backed securities, which could influence our net interest margin and net interest spread during future quarters.

During the six months ended June 30, 2007, average loans, funded by the growth in average deposits, increased \$62.3 million, or 8.8%, to \$767.2 million, compared to \$704.8 million for the same period in 2006. The average yield on loans increased from 6.57% for the six months ended June 30, 2006 to 6.90% for the six months ended June 30, 2007. For the three months ended June 30, 2007, average loans increased \$53.3 million, or 7.5%, to \$768.7 million, compared to \$715.4 million for the same period in 2006. The average yield on loans increased from 6.62% for the three months ended June 30, 2006 to 6.91% for the three months ended June 30, 2007. The increase in interest income on loans of \$3.3 million, or 15.0%, to \$25.2 million for the six months ended June 30, 2007, when compared to \$22.0 million for the same period in 2006, and the increase in interest income on loans of \$1.4 million, or 12.4%, to \$12.7 million for the three months ended June 30, 2007, when compared to \$11.3 million for the same period in 2006 was the result of an increase in average loans and the average yield. The rate at which loan yields are increasing has been partially impacted by repricing characteristics of the loans, interest rates at the time the loans repriced, and the competitive loan pricing environment. Due to the competitive loan pricing environment, we anticipate that we may be required to continue to offer lower interest rate loans that compete with those offered by other financial institutions in order to retain quality loan relationships. Offering lower interest rate loans could impact the overall loan yield and, therefore profitability.

Average investment and mortgage-backed securities decreased \$45.5 million, or 4.6%, to \$933.4 million, for the six months ended June 30, 2007, when compared to \$978.9 million for the same period in 2006. This decrease was the result of implementing a strategy designed to reduce our overall leverage. The overall yield on average investment and mortgage-backed securities increased to 5.18% during the six months ended June 30, 2007, from 5.01% during the same period in 2006. Interest income on investment and mortgage-backed securities for the six months ended June 30, 2007 decreased \$251,000, or 1.1%, to \$23.6 million compared to \$23.8 million for the same period in 2006. For the three months ended June 30, 2007, average investment and mortgage-backed securities decreased \$94.7 million, or 9.6%, to \$895.4 million, when compared to \$990.0 million for the same period in 2006, which is also reflective of the strategy to reduce our balance sheet leverage during that time. The overall yield on average

investment and mortgage-backed securities increased to 5.15% during the three months ended June 30, 2007, from 5.05% during the same period in 2006. Interest income from investment and mortgage-backed securities decreased \$949,000, or 7.8%, to \$11.3 million for the three months ended June 30, 2007, compared to \$12.2 million for the same period in 2006. The decrease in interest income for the three and six month periods ending June 30, 2007 was due to the decrease in the average balance which more than offset the increase in the average yield. The increase in the average yield primarily reflects decreased prepayment rates on mortgage-backed securities, which led to decreased amortization expense, combined with reinvestment of proceeds from lower-yielding matured securities into higher yielding securities due to the overall higher interest rate environment. The overall higher interest rate environment during 2007 when compared to 2006 contributed to a decrease in residential mortgage refinancing nationwide and in our market area. The decrease in prepayments on mortgage loans combined with a previous restructuring of the securities portfolio reduced overall amortization expense which contributed to the increase in interest income. A return to lower long-term interest rate levels similar to that experienced in May and June of 2003 could impact our net interest margin in the future due to increased prepayments and repricing.

Average FHLB stock and other investments decreased \$7.5 million, or 25.9%, to \$21.5 million, for the six months ended June 30, 2007 when compared to \$29.1 million for the same period in 2006 due to the decrease in FHLB Dallas advances. The average yield of FHLB stock and other investments increased to 6.56% for the six months ended June 30, 2007, when compared to 4.82% for the same period in 2006 due to the higher average short-term interest rates. Interest income from our FHLB stock and other investments increased \$6,000, or 0.9%, to \$700,000 for the six months ended June 30, 2007, when compared to \$694,000 for the same period in 2006 due to increases in the average yield which more than offset the decrease in average balance. For the three months ended June 30, 2007, average FHLB stock and other investments decreased \$10.7 million, or 37.6%, to \$17.8 million, when compared to \$28.5 million for the same period in 2006. For the three months ended June 30, 2007, interest income from FHLB stock and other investments decreased \$20,000, or 5.7%, to \$330,000, when compared to \$350,000 for the same period in 2006 as a result of the decrease in the average balance which more than offset the increase in the average yield from 4.92% in 2006 to 7.45% in 2007.

Average federal funds sold and other interest earning assets increased \$1.3 million, or 94.4%, to \$2.7 million, for the six months ended June 30, 2007, when compared to \$1.4 million for the same period in 2006. Interest income from federal funds sold and other interest earning assets increased \$37,000, or 115.6%, for the six months ended June 30, 2007, when compared to the same period in 2006, as a result of the increase in the average balance and yield from 4.66% in 2006 to 5.17% in 2007, which was due to the higher average short-term interest rates. Average federal funds sold and other interest earning assets increased \$1.1 million, or 82.4%, to \$2.5 million, for the three months ended June 30, 2007, when compared to \$1.4 million for the same period in 2006. Interest income from federal funds sold and other interest earning assets increased \$19,000, or 135.7%, for the three months ended June 30, 2007, when compared to the same period in 2006, as a result of the increase in the average balance and the average yield from 4.10% in 2006 to 5.31% in 2007.

Total interest expense increased \$4.1 million, or 16.2%, to \$29.5 million during the six months ended June 30, 2007 as compared to \$25.4 million during the same period in 2006. The increase was primarily attributable to an increase in the average yield on interest bearing liabilities from 3.65% for the six months ended June 30, 2006 to 4.28% for the six months ended June 30, 2007. Average interest bearing liabilities decreased \$11.3 million, or 0.8%, for the six months ended June 30, 2007 as compared to the same period in 2006. For the three months ended June 30, 2007, total interest expense increased \$931,000, or 7.0%, to \$14.3 million, compared to \$13.4 million for the same period in 2006 primarily as a result of an increase in the average yield on interest bearing liabilities. Average interest bearing liabilities decreased \$73.4 million, or 5.2%, while the average yield on interest bearing liabilities increased from 3.79% for the three month period ended June 30, 2006 to 4.27% for the three month period ended June 30, 2007.

Average interest bearing deposits increased \$143.3 million, or 17.0%, to \$985.1 million during the six months ended June 30, 2007, when compared to \$841.9 million for the same period in 2006, and the average rate paid increased from 3.27% for the six month period ended June 30, 2006 to 4.01% for the same period in 2007. For the three months ended June 30, 2007, average interest bearing deposits increased \$131.0 million, or 15.1%, when compared to the same period in 2006 and the average rate paid increased from 3.43% for the three month period ended June 30, 2006 to 4.03% for the three month period ended June 30, 2007. The largest increase in average interest bearing deposits resulted from the issuance of callable brokered CDs. The remaining increase in our average total deposits is the result of overall bank growth and branch expansion. Interest expense for interest bearing deposits for the three and six months ended June 30, 2007 increased \$2.6 million, or 35.4%, and \$5.9 million, or 43.4%, when compared to the same periods in 2006 due to the increase in the average balance and yield.

Average short-term interest bearing liabilities, consisting primarily of FHLB advances and federal funds purchased, decreased \$88.3 million, or 23.9%, to \$280.7 million for the six months ended June 30, 2007, when compared to \$369.0 million for the same period in 2006. Interest expense associated with short-term interest bearing liabilities decreased \$865,000, or 11.4%, and the average rate paid increased 68 basis points to 4.83% for the six month period

ended June 30, 2007 when compared to 4.15% for the same period in 2006. For the three months ended June 30, 2007, average short-term interest bearing liabilities decreased \$146.7 million, or 38.8%, when compared to the same period in 2006. Interest expense associated with short-term interest bearing liabilities decreased \$1.3 million, or 31.2%, while the average rate paid increased 52 basis points to 4.80% for the three month period ended June 30, 2007 when compared to 4.28% for the same period in 2006. The decrease in the interest expense for the three and six month periods ended June 30, 2007 when compared to 2006 was due to the decrease in the average balance for short-term interest bearing liabilities which more than offset the increase in the average yield.

Average long-term interest bearing liabilities consisting of FHLB advances decreased \$66.2 million, or 39.0%, during the six months ended June 30, 2007 to \$103.5 million as compared to \$169.7 million for the six month period ending June 30, 2006. The decrease in the average long-term FHLB advances occurred primarily as a result of long-term FHLB advances moving into the short-term FHLB advances category combined with the increase in the use of brokered CDs to better match ALCO objectives. Interest expense associated with long-term FHLB advances decreased \$1.0 million, or 30.7%, while the average rate paid increased 55 basis points to 4.52% for the six months ended June 30, 2007 when compared to 3.97% for the same period in 2006. For the three months ended June 30, 2007, long-term interest bearing liabilities decreased \$57.7 million, or 38.0%, when compared to the same period in 2006. Interest expense associated with long-term FHLB advances decreased \$448,000, or 29.2%, and the average rate paid increased 58 basis points to 4.63% for the three month period ended June 30, 2007 when compared to 4.05% for the same period in 2006. The decrease in interest expense was due to the decrease in the average balance of long-term interest bearing liabilities more than offsetting the increase in the average rate paid. FHLB advances are collateralized by FHLB stock, securities and nonspecific real estate loans.

Average long-term debt, consisting entirely of our junior subordinated debentures issued in 2003 in connection with the issuance of trust preferred securities by our subsidiary Southside Statutory Trust III, was \$20.6 million for the three and six months ended June 30, 2007 and 2006. Interest expense increased \$62,000, or 7.8%, to \$860,000 for the six months ended June 30, 2007 when compared to \$798,000 for the same period in 2006 as a result of the increase in three-month LIBOR due to higher short-term interest rates during 2007 when compared to 2006. Interest expense increased \$19,000, or 4.6%, to \$432,000 for the three months ended June 30, 2007 when compared to \$413,000 for the same period in 2006. The long-term debt adjusts quarterly at a rate equal to three-month LIBOR plus 294 basis points.

RESULTS OF OPERATIONS

The analysis below shows average interest earning assets and interest bearing liabilities together with the average yield on the interest earning assets and the average cost of the interest bearing liabilities.
