Applebee's International Reports First Quarter Diluted Earnings Per Share of 43 Cents

Overland Park, Kan., April 30, 2003 -- Applebee's International, Inc. (Nasdaq:APPB) today reported record net earnings of \$24.6 million, or 43 cents per diluted share, for the first quarter ended March 30, 2003. This represents an increase in diluted earnings per share of 23 percent as compared to 35 cents per share for the first quarter of 2002.

System-wide comparable sales for the first quarter of 2003 increased 3.3 percent, the 19th consecutive quarter of comparable sales growth. Company and franchise restaurant comparable sales increased 4.6 percent and 2.9 percent, respectively, for the quarter.

The company also reported comparable sales for the March fiscal period, comprised of the five weeks ended March 30, 2003. Comparable sales for company restaurants increased 5.5 percent, including the 21 franchise restaurants in Washington, D.C. acquired in November 2002 as well as the 11 franchise restaurants adjacent to the St. Louis market that were acquired on March 24, 2003. Excluding the acquired restaurants, comparable sales for company restaurants increased 5.2 percent, reflecting an increase in guest traffic of approximately 1.0 percent, combined with a higher average check. System-wide comparable sales increased 4.1 percent for the March period, and comparable sales for franchise restaurants increased 3.7 percent. The Easter holiday shifted from the company's March fiscal period in 2002 to the company's April fiscal period in 2003 and had a positive impact on March comparable sales results of approximately 0.7 percent. However, the benefit from the holiday shift was more than offset by the adverse affect of the war in Iraq and more severe winter weather in 2003.

- more -

2

In addition, the company reported comparable sales for the April fiscal period, comprised of the four weeks ended April 27, 2003. Comparable sales for company restaurants increased 2.5 percent, including the 32 franchise restaurants acquired in November and March. Excluding the acquired restaurants, comparable sales for company restaurants increased 2.3 percent, reflecting a decrease in guest traffic of 2.5 to 3.0 percent, combined with a higher average check. System-wide comparable sales increased 2.1 percent for the April period, and comparable sales for franchise restaurants increased 1.9 percent. In addition to the negative impact of the shift in the Easter holiday of approximately 0.8 percent, April comparable sales were adversely affected during the first part of the month by the war as well as lingering winter storms, contributing to significant volatility in daily sales results. Comparable sales for company restaurants for the year-to-date period through April have increased 4.1 percent, with system-wide and franchise comparable sales up 3.0 percent and 2.6 percent, respectively.

Edgar Filing: APPLEBEES INTERNATIONAL INC - Form 8-K

Lloyd L. Hill, chairman and chief executive officer, said, "Earnings per share grew by 23 percent and return on equity exceeded 24 percent for the quarter, both of which significantly surpassed our long-term targets. Our stellar results are even more impressive given the confluence of events that occurred during the first quarter - the worst winter weather seen in many years, heightened terror alerts, the lowest consumer confidence levels in nearly a decade, and the beginning of the war in the last ten days of the quarter. Despite all of these external factors, system-wide comparable sales increased by 3.3 percent for the quarter, substantially exceeding the casual dining industry average as measured by Knapp-Track, and we continued to expand our market share with system-wide sales growing by 11 percent."

Hill concluded, "Our To Go initiative continued to gain momentum during the quarter, and we have finalized our plans for implementing our curbside approach throughout the system. The continued execution of To Go as well as our other sales-building strategies was recognized in the "Choice in Chains" survey published in the March 2003 issue of Restaurants and Institutions magazine, where Applebee's tied for the highest overall score of all bar and grill concepts. We are proud of the substantial improvements being made in our food quality, value, service, atmosphere, cleanliness and convenience, and believe that our strategies are aligned to deliver consistent, sustainable growth."

Other results for the first quarter ended March 30, 2003 included:

- o System-wide sales for the Applebee's concept were a record \$884.7 million for the first quarter ended March 30, 2003, an increase of over 11 percent over the prior year.
- o Applebee's ended the quarter with 1,513 restaurants system-wide (371 company and 1,142 franchise restaurants). During the first quarter of 2003, there were 19 new Applebee's restaurants opened system-wide, including 3 company and 16 franchised restaurants.

- more -

3

- o The company repurchased 545,000 shares of common stock in the first quarter at an average price of \$24.37 for an aggregate cost of \$13.3 million. As of March 30, 2003, \$56.2 million remains available under the company's ongoing stock repurchase authorization.
- o As of March 30, 2003, the company had total debt outstanding of \$59 million, with nearly \$88 million available under its revolving credit facility.

BUSINESS OUTLOOK

The company reaffirmed its previously stated guidance for fiscal year 2003:

- o Approximately 100 new restaurants are expected to open in 2003, including 25 company restaurants and 70 to 80 franchise restaurants. Seven company restaurants are currently expected to open in the first half of the year, with the balance opening in the second half of the year. Approximately 25 franchise restaurants are expected to open in the first half of the year, with the remainder opening in the second half of the year.

Edgar Filing: APPLEBEES INTERNATIONAL INC - Form 8-K

- o System-wide comparable sales are expected to increase by at least 3 percent for the full year, although monthly sales results may be more volatile given the geopolitical environment, current economy, calendar shifts, or other unusual events.
- o Overall restaurant margins before pre-opening expense are expected to increase slightly in 2003 as a result of higher sales volumes and the impact of recent franchise acquisitions.
- o General and administrative expenses, as a percentage of operating revenues, are expected to be in the mid-9 percent range, reflecting leverage from franchise acquisitions.
- o The effective income tax rate is currently expected to continue at 36.2 percent in 2003.
- o Excluding the cost of franchise acquisitions, capital expenditures are expected to be between \$65 and \$75 million in 2003.

Based on the foregoing assumptions and the company's performance during the first quarter, diluted earnings per share for fiscal year 2003 are now expected to be in the range of \$1.67 to \$1.69, excluding the impact of any additional franchise acquisitions or stock repurchase activity.

4

A conference call to review the first quarter 2003 results and the current business outlook will be held on Thursday morning, May 1, 2003, at 10:00 a.m. Central Time (11:00 a.m. Eastern Time). The conference call will be broadcast live over the Internet and a replay will be available shortly after the call on the Investor Relations section of the company's website (www.applebees.com).

Applebee's International, Inc., headquartered in Overland Park, Kan., develops, franchises and operates restaurants under the Applebee's Neighborhood Grill & Bar brand, the largest casual dining concept in the world. As of April 27, 2003, there were 1,517 Applebee's restaurants operating system-wide in 49 states and nine international countries. Additional information on Applebee's International can be found at the company's website (www.applebees.com).

Certain statements contained in this release, including those in the Business Outlook section, are forward looking and based on current expectations. There are several risks and uncertainties that could cause actual results to differ materially from those described, including but not limited to the ability of the company and its franchisees to open and operate additional restaurants profitably, the ability of its franchisees to obtain financing, the continued growth of its franchisees, and its ability to attract and retain qualified franchisees, the impact of intense competition in the casual dining segment of the restaurant industry, and its ability to control restaurant operating costs which are impacted by market changes, minimum wage and other employment laws, food costs and inflation. For additional discussion of the principal factors that could cause actual results to be materially different, the reader is referred to the company's current report on Form 8-K filed with the Securities and Exchange Commission on February 12, 2003. The company disclaims any obligation to update these forward-looking statements.
