February 26, 2007

Mr. Edward A. Stokx

Net income allocable to common shareholders for the three months ended December 31, 2006 was \$3.7 million or \$0.17 per diluted share on revenues of \$62.8 million compared to \$4.9 million or \$0.22 per diluted share on revenues of \$55.9 million for the same period in 2005. Net income allocable to common shareholders for the year ended December 31, 2006 was \$16.6 million or \$0.77 per diluted share on revenues of \$242.8 million compared to \$32.3 million or \$1.47 per diluted share on revenues of \$220.2 million for the same period in 2005.

Revenues increased \$6.8 million for the three months ended December 31, 2006 primarily as a result of \$4.6 million from acquired properties and \$2.2 million from improved occupancy and rental rates within the Company s existing portfolio. Net income allocable to common shareholders for the three months ended December 31, 2006 decreased over the same period of 2005 by \$1.2 million or \$0.05 per diluted share primarily as a result of a decrease of \$1.1 million in income from discontinued operations and an increase of \$1.7 million in non-cash distributions associated with preferred equity redemptions partially offset by an increase in income from continuing operations.

Revenues increased \$22.7 million for the year ended December 31, 2006 primarily as a result of \$14.5 million from acquired properties and \$8.1 million from improved occupancy and rental rates within the Company s existing portfolio. Net income allocable to common shareholders for the

year ended December 31, 2006 decreased from the same period of 2005 by \$15.6 million or \$0.70 per diluted share primarily as a result of a decrease of \$14.0 million in income from discontinued operations and an increase of \$4.4 million in non-cash distributions associated with preferred equity redemptions partially offset by an increase in income from continuing operations.

Supplemental Measures

Funds from operations (FFO) allocable to common shareholders and unit holders for the three months ended December 31, 2006 and 2005 were \$27.5 million, or \$0.95 per diluted share, and \$25.1 million, or \$0.86 per diluted share, respectively. FFO allocable to common shareholders and unit holders for the years ended December 31, 2006 and 2005 were \$106.2 million, or \$3.67 per diluted share, compared to \$102.5 million, or \$3.49 per diluted share, respectively. The increase in FFO for the three months ended December 31, 2006 over the same period of 2005 was primarily due to net operating income from acquired properties partially offset by an increase in non-cash distributions associated with preferred equity redemptions. The increase in FFO for the year ended December 31, 2006 over the same period of 2005 was primarily due to net operating income from acquired properties partially offset by an increase in non-cash distributions associated with preferred equity redemptions. Gains from the disposition of real estate are excluded from the computation of FFO.

The following table summarizes the impact of the implementation of the SEC s clarification of EITF Topic D-42 on the Company s FFO per common shareholders and unit holders for the three months and years ended December 31, 2006 and 2005:

	For the Three December 31	Months Ended	For the Years Ended December 31,			
	2006	2005	2006	2005

Property Operations

In order to evaluate the performance of the Company s overall portfolio over two comparable periods, management analyzes the operating performance of a consistent group of properties owned and operated throughout both periods (herein referred to as Same Park). Operating properties that the Company acquired subsequent to January 1, 2005 are referred to as Other Facilities. For the three months and years ended December 31, 2006 and 2005, the Same Park portfolio constitutes 17.3 million rentable square feet, which includes all assets included in continuing operations the Company owned and operated from January 1, 2005 through December 31, 2006. As of December 31, 2006, the Same Park portfolio represents approximately 92% of the total square footage of the Company s portfolio.

The Company s property operations account for substantially all of the net operating income earned by the Company. The following table presents the operating results of the Company s properties for the three months and years ended December 31, 2006 and 2005 in addition to other income and expense items affecting income from continuing operations (unaudited, in thousands, except per square foot amounts):

The Company s calculation of NOI may not be comparable to those of other companies and should not be used as an alternative to measures of performance in accordance with generally accepted accounting principles (GAAP).

⁽⁴⁾ Same Park gross margin is computed by dividing NOI by rental income.

⁽⁵⁾ Same Park realized rent per square foot represents the annualized revenues earned per occupied square foot.

⁽¹⁾ Funds From Operations (FFO) is computed in accordance with the White Paper on FFO approved by the Board of Governors of the National Association of Real Estate Investment Trusts (NAREIT). The White Paper defines FFO as net income, computed in accordance with GAAP, before depreciation, amortization, minority interest in income, gains or losses on asset dispositions and extraordinary items. FFO should be analyzed in conjunction with net income. However, FFO should not be viewed as a substitute for net income as a measure of operating performance or liquidity as it does not reflect depreciation and amortization costs or the level of capital expenditure and leasing costs necessary to maintain the operating performance of the Company s properties, which are significant economic costs and could materially impact the Company s

results from operations. Other REITs may use different methods for calculating FFO and, accordingly, the Company s FFO may not be comparable to other real estate companies.

(2) Funds available for distribution (FAD) is computed by deducting from consolidated FFO recurring capital expenditures, which the Company defines as those costs incurred to maintain the assets—value, tenant improvements, capitalized leasing commissions and straight-line rent from FFO and adding stock-based compensation expense, amortization of lease incentives, in-place rents adjustment and the impact of EITF Topic D-42. Like FFO, the Company considers FAD to be a useful measure for investors to evaluate the operations and cash flows of a REIT. FAD does not represent net income or cash flow from operations as defined by GAAP.
