SEMI-ANNUAL REPORT

JUNE 30, 2005

THE NEW GERMANY
FUND, INC.

LETTER TO THE SHAREHOLDERS

July 22, 2005

Dear Shareholders,

In the first half of the year (2005), global markets struggled with concerns over the rising price of oil and its impact on demand. Markets succumbed to the pressure in April caused by concerns of slowing economic growth in the United States. Global markets dipped lower again in June when oil rose above \$60 per barrel, but recovered when prices moderated to \$57 per barrel. In Europe, markets were impacted by political uncertainty, with the French and Dutch rejecting the European Union constitution at the end of May. Nonetheless, European markets performed relatively well. The announcement of Chancellor Schroder calling for early polls in Germany was the main driver behind the German market's strong performance in the second quarter. After a weak April,

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

the DAX index rallied during the rest of the period to its highest level since July 2002, decoupling from the negative impact of rising oil prices.(1) Even though stocks have rallied since the start of the year, the German stock market continues to trade at a discount to its European peers.

As in the first quarter, takeover rumors and actual takeover bids supported performance of German small and mid caps. As a result, the Midcap Market Performance Index (the fund's benchmark) reached its highest level since the end of boom year 2000.(2)

For the six months ended June 30, 2005, the total return based on net asset value of The New Germany Fund was 3.68% and the total return based on market price was 4.58%, while the fund's benchmark, the Midcap Market Performance Index, returned 2.08% in US dollar terms. (Past performance is no guarantee of future results. Please see page 2, for more complete performance information.)

The fund benefited from its position in Solarworld, initiated in the first quarter. Solarworld was once more the top performer of the Midcap Market Performance Index during the second quarter despite fears that early elections may trigger regulatory changes for renewable energy sources. The share price of the company increased by more than 40% in US dollar terms (and up 95% in US dollar terms in the first six months of 2005). The share price strength was used to realize profits and the fund has since reduced its position. Stada Arzneimittel also contributed positively to the fund's overall performance as the stock rose due to takeover speculation. Over the course of the second quarter, the fund increased its position in the information technology sector by initiating positions in Software AG and Utimaco Safeware. Software AG develops computer software and offers database management software. The company released strong financial figures, and the fund's investment management team believes that the growth potential of the company has not yet been discounted. Poor performance of the fund's long-term holdings in Funkwerk and Kontron detracted from the fund's performance. The fund was also negatively affected by not owning shares of KarstadtQuelle, whose share price was driven by ongoing speculation about a breakup or going private rather than fundamentals. The fund kept its cautious approach, which was underpinned by the profit warning that the company issued in the middle of July.

The strong recent performance of smaller and medium-sized companies could provide for a more difficult general investment environment. The fund therefore emphasized its focus on stock selection. Earnings growth, merger and acquisition, and increasing venture capital activities should remain supporting factors for this universe. The early elections in September could see rising interest among international investors and also for German small- and mid-cap companies.

The New Germany Fund continued its open-market purchases of its shares, buying 370,400 shares during the first six months of 2005.* The fund's discount to its net asset value averaged 13.87% during this period.

The sources, opinions and forecasts expressed are as of July 22, 2005. There is no guarantee that the views, opinions and forecasts expressed herein will come to pass. This information is subject to change at any time based on market and other conditions and should not be construed as a recommendation for any specific security. Investments in funds involve risk including the loss of principal.

This Fund is not diversified and primarily focuses its investments in Germany, thereby increasing its vulnerability to developments in that country. Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes and market risks. This may result in greater share price volatility.

Shares of closed-end funds frequently trade at a discount to net asset value. The price of the Fund's shares is determined by a number of factors, several of which are beyond the control of the Fund. Therefore, the Fund cannot predict whether its shares will trade at, below or above net asset value. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering, and once issued, shares of closed-end funds are sold in the open market through a stock exchange.

The Fund has elected to not be subject to the statutory calculation, notification and publication requirements of the German Investment Tax Act (Investmentsteuergesetz). As a result German investors in the Fund may be subject to less favorable lump-sum taxation under German law.

INTERVIEW WITH THE CHIEF INVESTMENT OFFICER

QUESTION: THIS PAST SPRING, FRANCE AND THE NETHERLANDS REJECTED A NEW CONSTITUTION FOR THE EUROPEAN UNION. WHAT ARE THE LONG-TERM IMPLICATIONS FOR THE FUTURE OF THE EU? IS THIS A SIGN THAT MONETARY UNION IS NOT WORKING?

ANSWER: While the "no" vote is a setback for the EU, it does not have any immediate implications for the German market. Member countries remain committed to monetary union, and the EU will continue to be governed by the constitution that was in place before the vote this spring. Perhaps the most important consequence of the constitutional defeat is that enlargement of the 25-member union is likely to pause until the current members get their house in order. This may be marginally positive for Germany as a net payer to the EU. In terms of monetary union, the failure of recent EU budgetary negotiations has put pressure on the euro and could result in delays to planned expansion of the Eurozone.

QUESTION: GERMAN ELECTIONS THAT WERE SCHEDULED FOR 2006 HAVE BEEN CALLED EARLY FOR SEPTEMBER THIS YEAR. WHAT ARE THE IMPLICATIONS FOR THE GERMAN MARKET?

ANSWER: At the beginning of July, Chancellor Schroeder requested and received a vote of no confidence from the Bundestag (lower house) to call early elections. In mid-September they are expected to bring increased momentum for reforms. Schroeder has had difficulty implementing some of the Agenda 2010 reforms due to lack of support within his coalition. Depending on the outcome of the elections, a broad CDU/FDP coalition (CDU: Christlich-Demokratische Union; FDP: Freie Demokratische Partei) with majority control in both houses of parliament could be established, giving the government power to forge ahead with labor market, tax, and health care reforms. In terms of the stock market, the DAX has historically performed well in election years, outperforming its European peers by more than 20%(1). Given that many of the reforms would have a favorable impact on German companies, it is expected that the DAX would follow this historical trend. Of course, past performance is no guarantee of future results.

QUESTION: GERMAN SHARES HAVE PERFORMED WELL DESPITE AN UNFAVORABLE DOMESTIC ENVIRONMENT. ASIDE FROM THEIR FOCUS ON EXPORT MARKETS, WHAT HAVE GERMAN COMPANIES BEEN DOING TO ACHIEVE SUCH STRONG PERFORMANCE RELATIVE TO THEIR EUROPEAN PEERS?

ANSWER: Developing a global market for their products has been one of the most effective strategies for German companies to remain profitable in an environment of weak domestic consumption. However, German businesses recognize the importance of remaining competitive on the production side as well. One of the most significant costs for German companies is labor. Because the government

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

was slow to implement labor reforms, several German companies took matters into their own hands and successfully bargained with labor unions, securing agreements for employees to work longer hours at the same pay. Other companies built production facilities overseas to take advantage of lower labor costs and tax rates, a strategy that worked well with the development of global markets for their products. Now that the outgoing government's reform program looks set for better speed, German companies operating primarily in Germany are likely to be the main beneficiaries.

REPORT FROM THE INVESTMENT ADVISER AND MANAGER

ECONOMIC OUTLOOK

The first half of the year (2005) brought a series of ups and downs on the economic front. Business confidence, as measured by the ZEW index, and consumer confidence, as measured by the IFO index, both fell in May (the IFO index reached a 20-month low) before rebounding in June. Meanwhile gross domestic product (GDP) grew by 1% quarter-over-quarter in the first quarter of 2005, the fastest rate since 2001. In the face of weak domestic demand, growth continues to be driven by net exports. This trend should continue, as the euro weakened steadily throughout the second quarter, making German products more competitive overseas. Unemployment peaked at 12% during the first quarter and remained well above 11% throughout the half. As expected, the European Central Bank kept interest rates unchanged at 2%.

For the second half of the year, the early elections in Germany can be expected to affect the economic environment, as uncertainty surrounding the future of government reforms will likely stifle domestic demand. A potential increase in the VAT rate could hinder private consumption, which would limit GDP growth through the end of the year. Once a new government is in place and the reform program is announced, demand could pick up again as consumers regain confidence about the future. Overall, we expect modest GDP growth of 1.0% in 2005. Investment may also be constrained until German companies gain clarity on the direction of future reforms, but inflation should remain low and is forecast to be 1.6% in 2005. From a fiscal perspective, the new government's biggest challenge will be financing the reforms, as the budget deficit is expected to decrease only slightly from last year, from 3.7% of GDP to 3.6%. However, the prospects for German growth should improve significantly in 2006 as the structural reforms that have been set in motion begin to gain traction.

SPECIAL CONSIDERATIONS

The observations in this letter reflect our own opinions as of July 22, 2005 and are based on our own analysis, and others may have different opinions. Events may not transpire as we or they currently expect. Also, while economic events can influence broad market trends, political, monetary and other factors are also relevant to stock performance. In any event, investment results will depend on our success in identifying individual stocks, which are influenced by many factors beyond general economic matters. We cannot predict investment

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

results or whether they will be successful.

THE NEW GERMANY FUND, INC.
NOTES TO FINANCIAL STATEMENTS--JUNE 30, 2005 (UNAUDITED)

NOTE 1. ACCOUNTING POLICIES

The New Germany Fund, Inc. (the "Fund") was incorporated in Maryland on January 16, 1990 as a non-diversified, closed-end management investment company. The Fund commenced investment operations on January 30, 1990.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

SECURITY VALUATION: Investments are stated at value. All securities for which market quotations are readily available are valued at the last sales price on the primary exchange on which they are traded prior to the time of valuation. If no sales price is available at that time, and both bid and ask prices are available, the securities are valued at the mean between the last current bid and ask prices; if no quoted asked prices are available, they are valued at the last quoted bid price. All securities for which market quotations are not readily available will be valued as determined in good faith by the Board of Directors of the Fund. The Fund calculates its net asset value per share at 11:30 A.M., New York time, in order to minimize the possibility that events occurring after the close of the securities exchanges on which the Fund's portfolio securities principally trade would require adjustment to the closing market prices in order to reflect fair value.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded on the trade date. Cost of securities sold is calculated using the identified cost method. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Such dividend income is recorded net of unrecoverable foreign withholding tax.

SECURITIES LENDING: The Fund may lend securities to financial institutions. The Fund retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the securities and to participate in any changes in their market value. The Fund requires the borrowers of the

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

securities to maintain collateral with the Fund consisting of liquid, unencumbered assets having a value at least equal to the value of the securities loaned. The Fund may invest the cash collateral into a joint trading account in an affiliated money market fund pursuant to Exemptive Orders issued by the SEC. The Fund receives compensation for lending its securities either in the form of fees or by earning interest on invested cash collateral net of fees paid to a lending agent. Either the Fund or the borrower may terminate the loan. The Fund is subject to all investment risks associated with the value of any cash collateral received, including, but not limited to, interest rate, credit and liquidity risk associated with such investments.

FOREIGN CURRENCY TRANSLATION: The books and records of the Fund are maintained in United States dollars.

Assets and liabilities denominated in euros and other foreign currency amounts are translated into United States dollars at the 10:00 A.M. mid-point of the buying and selling spot rates quoted by the Federal Reserve Bank of New York. Purchases and sales of investment securities, income and expenses are reported at the rate of exchange prevailing on the respective settlement dates of such transactions. The resultant gains and losses arising from exchange rate fluctuations are identified separately in the Statement of Operations, except for such amounts attributable to investments which are included in net realized and unrealized gains and losses on investments.

Foreign investments may involve certain considerations and risks not typically associated with those of domestic origin as a result of, among others, the possibility of political and economic developments and the level of governmental supervision and regulation of foreign securities markets. In addition, certain foreign markets may be substantially smaller, less developed, less liquid and more volatile than the major markets of the United States.

CONTINGENCIES: In the normal course of business, the Fund may enter into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet been made. However, based on experience, the Fund expects the risk of loss to be remote.

TAXES: No provision has been made for United States Federal income tax because the Fund intends to meet the requirements of the United States Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to shareholders.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS: The Fund records dividends and distributions to its shareholders on the ex-dividend date. Income and capital gain distributions are determined in accordance with United States Federal income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences, which could be temporary or permanent in nature, may result in reclassification of distributions; however, net investment income, net realized gains and net assets are not affected.

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

The Fund had a Management Agreement with Deutsche Bank Securities Inc. (the "Manager"). At its July 12, 2004 Board meeting, the Board approved transferring the Fund's Management Agreement with Deutsche Bank Securities Inc. to an affiliated company, Deutsche Investment Management Americas Inc. The transfer, which became effective September 1, 2004, did not involve any change in control or actual management of the investment manager, which provides the same scope of services, utilizes the same people for work on Fund matters and charges the same fees under the agreement. The Fund has an Investment Advisory Agreement with Deutsche Asset Management International GmbH (the "Investment Adviser"). The Manager and the Investment Adviser are affiliated companies.

The Management Agreement provides the Manager with a fee, computed weekly and payable monthly, at the annual rates of .65% of the Fund's average weekly net assets up to \$100 million, .55% of such assets in excess of \$100 million and up to \$500 million, and .50% of such assets in excess of \$500 million. The Investment Advisory Agreement provides the Investment Adviser with a fee, computed weekly and payable monthly, at the annual rates of .35% of the Fund's average weekly net assets up to \$100 million and .25% of such assets in excess of \$100 million. Accordingly, for the period ended June 30, 2005, the combined fee pursuant to the Management and Investment Advisory Agreements was equivalent to an annualized effective rate of .87% of the Fund's average net assets.

Pursuant to the Management Agreement, the Manager is the corporate manager and administrator of the Fund and, subject to the supervision of the Board of Directors and pursuant to recommendations made by the Fund's Investment Adviser, determines the suitable securities for investment by the Fund. The Manager also provides office facilities and certain administrative, clerical and bookkeeping services for the Fund. Pursuant to the Investment Advisory Agreement, the Investment Adviser, in accordance with the Fund's stated investment objectives, policies and restrictions, makes recommendations to the Manager with respect to the Fund's investments and, upon instructions given by the Manager as to suitable securities for investment by the Fund, transmits purchase and sale orders and selects brokers and dealers to execute portfolio transactions on behalf of the Fund.

NOTE 3. TRANSACTIONS WITH AFFILIATES

For the period ended June 30, 2005, Deutsche Bank AG, the German parent of the Manager and Investment Adviser, and its affiliates received \$64,316 in brokerage commissions as a result of executing agency transactions in portfolio securities on behalf of the Fund, that the board determined were effected in compliance with the Fund's Rule 17e-1 procedures.

Certain officers of the Fund are also officers of either the Manager or Deutsche Bank AG.

The Fund pays each Director not affiliated with the Manager retainer fees plus specified amounts for attended board and committee meetings.

NOTE 4. PORTFOLIO SECURITIES

Purchases and sales of investment securities, other than short-term investments, for the period ended June 30, 2005, were \$58,682,771 and \$69,334,408, respectively.

The cost of investments at June 30, 2005 was \$219,425,703 for United States Federal income tax purposes. Accordingly, as of June 30, 2005, net unrealized appreciation of investments aggregated \$86,232,624, of which \$88,234,220 and \$2,001,596 related to unrealized appreciation and depreciation, respectively.

For United States Federal income tax purposes, the Fund had a capital loss carry forward at December 31, 2004 of approximately \$172,136,000, of which \$83,896,000

Edgar Filing: NEW GERMANY FUND INC - Form N-CSRS

and \$88,240,000 will expire in 2009 and 2010, respectively. No capital gains distribution is expected to be paid to shareholders until future net gains have been realized in excess of such carry forward.

NOTE 5. PORTFOLIO SECURITIES LOANED

On June 30, 2005, the market value of the securities loaned and its collateral were \$44,104,785 and \$46,362,180, respectively. For the period ended June 30, 2005, the Fund earned \$321,960 as securities lending fees, net of borrower rebates and agency fees.

NOTE 6. CAPITAL

During the period ended June 30, 2005 and the year ended December 31, 2004, the Fund purchased 370,400 and 1,245,300 of its shares of common stock on the open market at a total cost of \$3,405,787 and \$9,625,399, respectively. The weighted average discount of these purchased shares comparing the purchased price to the net asset value at the time of purchase was 13.6% and 16.9%, respectively. These shares are held in treasury.

++ Total return based on net asset value reflects changes in the Fund's net asset value during each period. Total return based on market value reflects changes in market value. Each figure includes reinvestments of dividend and capital gain distributions, if any. These figures will differ depending upon the level of any discount from or premium to net asset value at which the Fund's shares trade during the period.

* The custody credits are attributable to interest earned on U.S. cash balances. The ratio of total expenses after custody credits to average net assets are 1.25%, 1.24%, 1.39%, 1.47%, 1.25% and 1.08% for 2005, 2004, 2003, 2002, 2001 and 2000, respectively.

** Annualized.

*** Not Annualized.

**** Not Annualized. The ratio for six months ended June 30, 2005 has not been annualized since the Fund believes it would not be appropriate because the Fund's dividend income is not earned ratably throughout the fiscal year.

VOLUNTARY CASH PURCHASE PROGRAM
AND DIVIDEND REINVESTMENT PLAN

The Fund offers stockholders a Voluntary Cash Purchase Program and Dividend Reinvestment Plan ("Plan") which provides for optional cash purchases and for the automatic reinvestment of dividends and distributions payable by the Fund in additional Fund shares. Plan participants may invest as little as \$100 in any month and may invest up to \$36,000 annually. The Plan has been amended to allow current shareholders, who are not already participants in the Plan, and first time investors to enroll in the Plan by making an initial cash deposit of at least \$250 with the plan agent. Share purchases are combined to receive a beneficial brokerage fee. A brochure is available by writing or telephoning the plan agent:

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

The Nominating Committee will consider nominee candidates properly submitted by stockholders in accordance with applicable law, the Fund's Articles of Incorporation or By-laws, resolutions of the Board and the qualifications and procedures set forth in the Nominating Committee Charter and this proxy statement. A stockholder or group of stockholders seeking to submit a nominee candidate (i) must have beneficially owned at least 5% of the Fund's common stock for at least two years, (ii) may submit only one nominee candidate for any particular meeting of stockholders, and (iii) may submit a nominee candidate for only an annual meeting or other meeting of stockholders at which directors will be elected. The stockholder or group of stockholders must provide notice of the proposed nominee pursuant to the requirements found in the Fund's By-laws. Generally, this notice must be received not less than 90 days nor more than 120 days prior to the first anniversary of the date of mailing of the notice for the preceding year's annual meeting. Such notice shall include the specific information required by the Fund's By-laws. The Nominating Committee will evaluate nominee candidates properly submitted by stockholders on the same basis as it considers and evaluates candidates recommended by other sources.
