FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
 OF 1934

For the quarterly period ended September 30, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
 1934

Commission File No. 1-11083

BOSTON SCIENTIFIC CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE

04-2695240

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

ONE BOSTON SCIENTIFIC PLACE, NATICK, MASSACHUSETTS 01760-1537

(Address of principal executive offices) (zip code)

(508) 650-8000

(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-Accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Shares outstanding as of October 31, 2011
Common Stock, \$.01 par value	1,481,505,741

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE A – BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of Boston Scientific Corporation have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for fair presentation have been included. Operating results for the three and nine months ended September 30, 2011 are not necessarily indicative of the results that may be expected for the year ending December 31, 2011. For further information, refer to the consolidated financial statements and footnotes thereto included in Item 8 of our 2010 Annual Report filed on Form 10-K.

We have reclassified certain prior year amounts to conform to the current year's presentation. See Note M – Segment Reporting for further details.

Subsequent Events

We evaluate events occurring after the date of our most recent accompanying unaudited condensed consolidated balance sheets for potential recognition or disclosure in our financial statements. We did not identify any material subsequent events requiring adjustment to our accompanying unaudited condensed consolidated financial statements (recognized subsequent events) for the three and nine month periods ended September 30, 2011. Those items requiring disclosure (unrecognized subsequent events) in the financial statements have been disclosed accordingly. Refer to Note K - Commitments and Contingencies for more information.

NOTE B – ACQUISITIONS

During the first quarter of 2011, we completed several acquisitions as part of our priority growth initiatives, targeting the areas of structural heart therapy, deep-brain stimulation, peripheral vascular disease, and atrial fibrillation. Our consolidated financial statements include the operating results for each acquired entity from its respective date of acquisition. We do not present pro forma financial information for these acquisitions given their results are not material to our consolidated financial statements.

Sadra Medical, Inc.

On January 4, 2011, we completed the acquisition of the remaining fully diluted equity of Sadra Medical, Inc. Prior to the acquisition, we held a 14 percent equity ownership in Sadra. Sadra is developing a fully repositionable and retrievable device for percutaneous aortic valve replacement to treat patients with severe aortic stenosis. The acquisition was intended to broaden and diversify our product portfolio by expanding into the structural heart market. We are integrating the operations of the Sadra business into our Interventional Cardiology division. We paid \$193 million, net of cash acquired, at the closing of the transaction using cash on hand to acquire the remaining 86 percent of Sadra, and may be required to pay future consideration up to \$193 million through 2016 that is contingent upon the achievement of certain regulatory- and revenue-based milestones.

Intelect Medical, Inc.

On January 5, 2011, we completed the acquisition of the remaining fully diluted equity of Intelect Medical, Inc. Prior to the acquisition, we held a 15 percent equity ownership in Intelect. Intelect is developing advanced visualization and programming technology for deep-brain stimulation. We have integrated the operations of the Intelect business into our Neuromodulation division. The acquisition was intended to leverage the core architecture of our Vercise™ platform and advance our technology in the field of deep-brain stimulation. We paid \$60 million at the closing of the transaction using cash on hand to acquire the remaining 85 percent of Intelect. There is no contingent consideration related to the Intelect acquisition.

ReVascular Therapeutics, Inc.

On February 15, 2011, we completed the acquisition of 100 percent of the fully diluted equity of ReVascular Therapeutics, Inc. (RVT). RVT has developed an intraluminal chronic total occlusion crossing device enabling endovascular treatment in cases that typically cannot be treated with standard endovascular devices. This acquisition

complements our portfolio of devices for lower extremity peripheral artery disease and we have integrated the operations of RVT into our Peripheral Interventions business. We paid \$19 million at the closing of the transaction and may be required to pay future consideration up to \$16 million through 2014 that is contingent upon the achievement of certain regulatory- and commercialization-based milestones and revenue.

Atritech, Inc.

On March 3, 2011, we completed the acquisition of 100 percent of the fully diluted equity of Atritech, Inc. Atritech has developed

Table of Contents

a device designed to close the left atrial appendage of the heart. The WATCHMAN® Left Atrial Appendage Closure Technology, developed by Atritech, is the first device proven to offer an alternative to anticoagulant drugs for patients with atrial fibrillation and at high risk for stroke. The acquisition was intended to broaden our portfolio of less-invasive devices for cardiovascular care by expanding into the areas of atrial fibrillation and structural heart therapy. We are integrating the operations of the Atritech business into our existing business, leveraging expertise from both our Electrophysiology and Interventional Cardiology divisions in the commercialization of the WATCHMAN® device. We paid \$98 million, net of cash acquired, at the closing of the transaction and may be required to pay future consideration up to \$275 million through 2015 that is contingent upon achievement of certain regulatory-based milestones and revenue.

Purchase Price Allocation

The components of the aggregate preliminary purchase price as of the acquisition date for acquisitions consummated in the first quarter and first nine months of 2011 are as follows (in millions):

Cash, net of cash acquired	\$370
Fair value of contingent consideration	287
Prior investments	55
	\$712

As of the respective acquisition dates, we recorded total contingent consideration liabilities of \$287 million, representing the estimated fair value of the contingent consideration we expected to pay to the former shareholders of the acquired companies based upon the achievement of certain regulatory- and commercialization-related milestones and revenue. The fair value of the contingent consideration liabilities was estimated by discounting, to present value, contingent payments expected to be made. In certain circumstances, we utilized a probability-weighted approach to determine the fair value of contingent consideration related to the expected achievement of milestones. We used risk-adjusted discount rates ranging from two to 20 percent to derive the fair value of the expected obligations, which we believe are appropriate and representative of market participant assumptions.

Prior to our acquisition of the remaining equity ownership in Sadra and Intelect, we held equity interests in these companies of 14 and 15 percent, respectively, carried at an aggregate value of \$11 million, and a note receivable carried at a value of \$6 million. As a result of re-measuring these investments to fair value, estimated at \$55 million as of the respective acquisition dates, we recorded a gain of \$38 million in other, net in the accompanying unaudited condensed consolidated statements of operations during the first quarter of 2011.

We accounted for these acquisitions as business combinations and, in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification™ (ASC) Topic 805, Business Combinations, we have recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition date. The following summarizes the aggregate preliminary purchase price allocation as of September 30, 2011 (in millions):

Goodwill	\$271
Amortizable intangible assets	97
Indefinite-lived intangible assets	468
Deferred income taxes	(124)
	\$712

Transaction costs associated with these acquisitions were expensed as incurred through selling, general and administrative costs in the accompanying unaudited condensed consolidated statements of operations and were not material for the three and nine months ended September 30, 2011.

We allocated the aggregate preliminary purchase price to specific intangible asset categories as of September 30, 2011 as follows:

Table of Contents

	Amount Assigned (in millions)	Weighted Average Amortization Period (in years)	Range of Risk- Adjusted Discount Rates used in Purchase Price Allocation	
Amortizable intangible assets				
Technology - core	\$77	7.0	22.6	%
Technology - developed	20	9.0	25.0	%
	97	7.4		
Indefinite-lived intangible assets				
Purchased research and development	468		23.6% - 30.0%	
	\$565			

Core technology consists of technical processes, intellectual property, and institutional understanding with respect to products and processes that we will leverage in future products or processes and will carry forward from one product generation to the next. Developed technology represents the value associated with marketed products that have received regulatory approval. The amortizable intangible assets are being amortized on a straight-line basis over their assigned estimated useful lives.

Purchased research and development represents the estimated fair value of acquired in-process research and development projects which have not yet reached technological feasibility. These indefinite-lived intangible assets will be tested for impairment on an annual basis, or more frequently if impairment indicators are present, in accordance with U.S. GAAP and our accounting policies described in our 2010 Annual Report filed on Form 10-K, and amortization of the purchased research and development will begin upon completion of the related projects. During the second quarter of 2011, as a result of changes in the timing and amount of the expected cash flows related to certain acquired in-process research and development projects, we tested the related intangible assets for impairment and recorded a \$12 million intangible asset impairment charge in the accompanying unaudited condensed consolidated statements of operations. We performed our annual impairment testing during the third quarter of 2011 and did not identify any in-process research and development assets whose carrying values exceeded their fair values. We estimate that the total cost to complete the in-process research and development programs acquired in the first quarter of 2011 is between \$150 million and \$200 million and expect material net cash inflows from the products in development to commence in 2014-2016, following the respective launches of these technologies in the U.S. and our Europe/Middle East/Africa (EMEA) region.

We believe that the estimated intangible asset values represent the fair value at the date of each acquisition and do not exceed the amount a third party would pay for the assets. We used the income approach, specifically the discounted cash flow method and excess earnings method, to derive the fair value of the amortizable intangible assets and purchased research and development. These fair value measurements are based on significant unobservable inputs, including management estimates and assumptions and, accordingly, are classified as Level 3 within the fair value hierarchy prescribed by ASC Topic 820, Fair Value Measurements and Disclosures.

We recorded the excess of the aggregate preliminary purchase price over the estimated fair values of the identifiable assets acquired as goodwill, which is non-deductible for tax purposes. Goodwill was established due primarily to revenue and cash flow projections associated with future technologies, as well as synergies expected to be gained from the integration of these businesses into our existing operations, and has been allocated to our reportable segments based on the relative expected benefit from the business combinations, as follows (in millions):

U.S.	\$ 158
EMEA	105
Inter-Continental	7
Japan	1
	\$271

Contingent Payments Related to Prior-Period Acquisitions

Certain of our acquisitions involve contingent consideration arrangements. Payment of additional consideration is generally contingent on the acquired company reaching certain performance milestones, including attaining specified revenue levels, achieving product development targets or obtaining regulatory approvals. We did not make any payments related to prior-period

8

Table of Contents

acquisitions during the first nine months of 2011, and made payments of \$4 million during the first nine months of 2010. As of September 30, 2011, the estimated maximum potential amount of future contingent consideration (undiscounted) that we could be required to make associated with acquisitions consummated prior to 2009 is approximately \$260 million. In accordance with accounting guidance applicable at the time we completed those acquisitions, we do not recognize a liability until the contingency is resolved and consideration is issued or becomes issuable. Topic 805 requires the recognition of a liability equal to the expected fair value of future contingent payments at the acquisition date for all acquisitions consummated after January 1, 2009. For those acquisitions completed after 2008, we recorded contingent liabilities representing the estimated fair value of the contingent consideration we expected to pay to the former shareholders of the acquired companies as of the respective acquisition dates. We re-measure these liabilities each reporting period, and report changes in the fair value through a separate line item within our consolidated statements of operations. Increases or decreases in the fair value of the contingent consideration liability can result from accretion of the liability due to the passage of time; changes in the timing and amount of revenue estimates; changes in the expected probability and timing of achieving regulatory or commercialization milestones; changes in discount rates; or payments.

In connection with our first quarter 2011 business combinations, we recorded liabilities of \$287 million during the first quarter of 2011, representing the estimated fair value of contingent payments expected to be made at the respective acquisition dates, and recorded expense of \$3 million in the third quarter of 2011 and \$12 million during the first nine months of 2011 representing the increase in the fair value of these obligations between the respective acquisition dates and September 30, 2011. In addition, related to our 2010 business combinations, we recorded net contingent consideration expense of \$3 million in the third quarter of 2011 and \$6 million for the nine months ended September 30, 2011, representing the increase in fair value of contingent obligations. The maximum amount of future contingent consideration (undiscounted) that we could be required to make associated with acquisitions completed after 2008 is approximately \$760 million. Included in the accompanying unaudited condensed consolidated balance sheets is accrued contingent consideration of \$376 million as of September 30, 2011 and \$71 million as of December 31, 2010.

Acquisition-related Milestone

In connection with Abbott Laboratories' 2006 acquisition of Guidant Corporation's vascular intervention and endovascular solutions businesses, Abbott agreed to pay us a milestone payment of \$250 million upon receipt of an approval from the Japanese Ministry of Health, Labor and Welfare (MHLW) to market the XIENCE V® stent system in Japan. The MHLW approved the XIENCE V® stent system and we received the milestone payment from Abbott in the first quarter of 2010, which was recorded as a gain in the accompanying unaudited condensed consolidated statements of operations.

NOTE C – DIVESTITURES AND ASSETS HELD FOR SALE

In January 2011, we closed the sale of our Neurovascular business to Stryker Corporation for a purchase price of \$1.5 billion in cash. We received \$1.450 billion at closing, including upfront payments of \$1.426 billion, and \$24 million which was placed into escrow to be released upon the completion of local closings in certain foreign jurisdictions, of which we had received approximately \$10 million as of September 30, 2011. We will also receive an additional \$50 million contingent upon the transfer or separation of certain manufacturing facilities, which we expect will be completed over the next 24 months. We are providing transitional services to Stryker through transition services agreements, and will also supply products to Stryker through supply agreements. These transition services and supply agreements are expected to be effective for a period of approximately 24 months from the date of divestiture, subject to extension. Due to our continuing involvement in the operations of the Neurovascular business, the divestiture does not meet the criteria for presentation as a discontinued operation. We acquired the Neurovascular business in 1997 with our acquisition of Target Therapeutics. The 2010 revenues generated by the Neurovascular business were \$340 million, or approximately four percent of our 2010 consolidated net sales. We continue to generate net sales pursuant to our supply and distribution agreements with Stryker; however, these net sales are at significantly lower levels and at reduced gross profit margins as compared to periods prior to the divestiture.

In accordance with ASC Topic 360-10-45, Impairment or Disposal of Long Lived Assets, we have presented separately the assets of the Neurovascular business transferred to Stryker at the closing of the transaction as 'assets held for sale' in the accompanying unaudited condensed consolidated balance sheets for both periods presented. Pursuant to the divestiture agreement, Stryker did not assume any liabilities recorded as of the closing date associated with the Neurovascular business. The assets held for sale included in the accompanying unaudited condensed consolidated balance sheets attributable to the divestiture consist of the following:

9

Table of Contents

(in millions)	As of September 30, 2011	December 31, 2010
Inventories	\$2	\$30
Property, plant and equipment, net		4
Goodwill		478
Other intangible assets, net		59
	\$2	\$571

We also classified as ‘assets held for sale’ certain property, plant and equipment unrelated to the Neurovascular business that we intend to sell within the next twelve months having a net book value of \$3 million as of September 30, 2011 and \$5 million as of December 31, 2010.

As of September 30, 2011, the assets classified as ‘assets held for sale’ related to the Neurovascular divestiture represent inventories that will transfer to Stryker upon the completion of local closings in certain foreign jurisdictions. We recorded a pre-tax gain of \$760 million (\$530 million after-tax) during the first quarter of 2011 associated with the closing of the transaction. We also deferred a gain of \$27 million in the accompanying unaudited condensed consolidated balance sheets to be recognized upon the release of escrowed funds and the performance of certain activities under the transition services agreements. During the third quarter of 2011, we recognized \$8 million of this deferred gain and expect to recognize the remaining \$19 million throughout 2011 and 2012.

NOTE D – GOODWILL AND OTHER INTANGIBLE ASSETS**Goodwill Impairment Charges****2011 Charge**

We test our April 1 goodwill balances during the second quarter of each year for impairment, or more frequently if indicators are present or changes in circumstances suggest that impairment may exist. Based on market information that became available to us toward the end of the first quarter of 2011, we concluded that there was a reduction in the estimated size of the U.S. implantable cardioverter defibrillator (ICD) market, which led to lower projected U.S. Cardiac Rhythm Management (CRM) results compared to prior forecasts and created an indication of potential impairment of the goodwill balance attributable to our U.S. CRM business unit. Therefore, we performed an interim impairment test in accordance with U.S. GAAP and our accounting policies and recorded a non-deductible goodwill impairment charge of \$697 million, on both a pre-tax and after-tax basis, associated with this business unit during the first quarter of 2011.

We used the income approach, specifically the discounted cash flow (DCF) method, to derive the fair value of the U.S. CRM reporting unit, as described in our accounting policies in our 2010 Annual Report filed on Form 10-K. We updated all aspects of the DCF model associated with the U.S. CRM business, including the amount and timing of future expected cash flows, terminal value growth rate and the appropriate market-participant risk-adjusted weighted average cost of capital (WACC) to apply.

As a result of physician reaction to study results published by the Journal of the American Medical Association regarding evidence-based guidelines for ICD implants and U.S. Department of Justice (DOJ) investigations into hospitals’ ICD implant practices and the expansion of Medicare recovery audits, among other factors, we estimated the U.S. CRM market would experience negative growth rates in the mid-single digits in 2011, as compared to 2010. Due to these estimated near-term market reductions, as well as the economic impact of physician alignment to hospitals, recent demographic information released by the American Heart Association indicating a lower prevalence of heart failure, and increased competitive and other pricing pressures, we lowered our estimated average U.S. CRM net sales growth rates within our 15-year DCF model from the mid-single digits to the low-single digits. Partially offsetting these factors are increased levels of profitability as a result of cost-reduction initiatives and process efficiencies within the U.S. CRM business, including those associated with our 2011 Restructuring plan, described in Note G - Restructuring-related Activities. The impact of the reduction in the size of the U.S. ICD market, and the related reduction in our forecasted 2011 U.S. CRM net sales, as well as the change in our expected sales growth rates

thereafter as a result of the trends noted above were the key factors contributing to the first quarter 2011 goodwill impairment charge.

In the second quarter of 2011, we performed our annual goodwill impairment test for all of our reporting units. In conjunction with our annual test, the fair value of each reporting unit exceeded its carrying value, with the exception of our U.S. CRM reporting unit. Based on the remaining book value of our U.S. CRM reporting unit following the goodwill impairment charge recorded during the first quarter of 2011, the carrying value of our U.S. CRM reporting unit exceeded its fair value, due primarily to the value of amortizable intangible assets allocated to this reporting unit. The remaining book value of our U.S. CRM amortizable

Table of Contents

intangible assets was approximately \$3.3 billion as of September 30, 2011. In accordance with ASC Topic 350, Intangibles – Goodwill and Other and our accounting policies, we tested our U.S. CRM amortizable intangible assets for impairment on an undiscounted cash flow basis as of March 31, 2011, in conjunction with the goodwill impairment charge, and determined that these assets were not impaired. The assumptions used in our annual goodwill impairment test performed during the second quarter of 2011 related to our U.S. CRM reporting unit were substantially consistent with those used in our first quarter interim impairment test; therefore, it was not deemed necessary to proceed to the second step of the impairment test.

We continue to identify four reporting units with a material amount of goodwill that are at higher risk of potential failure of the first step of the impairment test in future reporting periods. These reporting units include our U.S. CRM reporting unit, which holds \$782 million of allocated goodwill; our U.S. Cardiovascular reporting unit, which holds \$2.3 billion of allocated goodwill; our U.S. Neuromodulation reporting unit, which holds \$1.3 billion of allocated goodwill; and our EMEA region, which holds \$4.0 billion of allocated goodwill, each as of September 30, 2011. As of the most recent assessment, the level of excess fair value over carrying value for these reporting units identified as being at higher risk (with the exception of the U.S. CRM reporting unit, whose carrying value continues to exceed its fair value) ranged from approximately eight percent to 15 percent. On a quarterly basis, we monitor the key drivers of fair value for these reporting units to detect events or other changes that would warrant an interim impairment test.

The key variables that drive the cash flows of our reporting units are estimated revenue growth rates, levels of profitability and terminal value growth rate assumptions, as well as the WACC rate applied. These assumptions are subject to uncertainty, including our ability to grow revenue and improve profitability levels. For each of these reporting units, relatively small declines in the future performance and cash flows of the reporting unit or small changes in other key assumptions may result in the recognition of significant goodwill impairment charges. For example, keeping all other variables constant, a 50 basis point increase in the WACC applied to the reporting units, excluding acquisitions, would require that we perform the second step of the goodwill impairment test for our U.S. CRM reporting unit, and a 100 basis point increase would require that we perform the second step of the goodwill impairment test for our U.S. Neuromodulation, U.S. Cardiovascular and EMEA reporting units. In addition, keeping all other variables constant, a 100 basis point decrease in perpetual growth rates would require that we perform the second step of the goodwill impairment test for our U.S. CRM reporting unit, and a 200 basis point decrease in perpetual growth rates would require that we perform the second step of the goodwill impairment test for our U.S. Neuromodulation and EMEA reporting units. The estimates used for our future cash flows and discount rates represent management's best estimates, which we believe to be reasonable, but future declines in the business performance of our reporting units may impair the recoverability of our goodwill balance. Future events that could have a negative impact on the fair value of the reporting units include, but are not limited to:

- decreases in estimated market sizes or market growth rates due to greater-than-expected declines in procedural volumes, pricing pressures, product actions, product sales mix, disruptive technology developments, government cost containment initiatives and healthcare reforms, and/or other economic or regulatory conditions;
 - declines in our market share and penetration assumptions due to increased competition, an inability to develop or launch new products, and market and/or regulatory conditions that may cause significant launch delays or product recalls;
 - decreases in our profitability due to an inability to successfully implement and achieve timely and sustainable cost improvement measures consistent with our expectations, increases in our market-participant tax rate, and/or changes in tax laws;
 - declines in revenue as a result of loss of key members of our sales force and other key personnel;
 - negative developments in intellectual property litigation that may impact our ability to market certain products or increase our costs to sell certain products;
 - the level of success of on-going and future research and development efforts and increases in the research and development costs necessary to obtain regulatory approvals and launch new products;
 - increases in our market-participant risk-adjusted WACC; and
 - changes in the structure of our business as a result of future reorganizations or divestitures of assets or businesses.
- Negative changes in one or more of these factors could result in additional impairment charges.

2010 Charge

The ship hold and product removal actions associated with our U.S. ICD and cardiac resynchronization therapy defibrillator (CRT-D) products, which we announced on March 15, 2010, and the forecasted corresponding financial impact on our operations created an indication of potential impairment of the goodwill balance attributable to our U.S. CRM reporting unit during the first quarter

11

Table of Contents

of 2010. Therefore, we performed an interim impairment test in accordance with U.S. GAAP and our accounting policies and recorded an estimated non-deductible goodwill impairment charge of \$1.817 billion, on both a pre-tax and after-tax basis, associated with our U.S. CRM reporting unit.

Intangible Asset Impairment Charges

2011 Charges

During the third quarter of 2011, we recorded a \$9 million intangible asset impairment charge attributable to lower projected cash flows associated with certain technologies. During the second quarter of 2011, we recorded a \$12 million intangible asset impairment charge associated with changes in the timing and amount of the expected cash flows related to certain acquired in-process research and development projects. We have recorded these amounts in the intangible asset impairment charges caption in our accompanying unaudited condensed consolidated statements of operations. We do not believe that these impairments, or the factors causing these impairments, will have a material impact on our future operations or cash flows.

2010 Charges

During the first quarter of 2010, due to lower than anticipated net sales of one of our Peripheral Interventions technology offerings, as well as changes in our expectations of future market acceptance of this technology, we lowered our sales forecasts associated with the product. In addition, during the third quarter of 2010, as part of our initiatives to reprioritize and diversify our product portfolio, we discontinued one of our internal research and development programs to focus on those with a higher likelihood of success. As a result of these factors, and in accordance with U.S. GAAP and our accounting policies, we tested the related intangible assets for impairment and recorded a \$60 million charge in the first quarter of 2010 and a \$5 million charge in the third quarter of 2010 to write down the balance of these intangible assets to their fair value. We recorded these amounts in the intangible asset impairment charges caption in our accompanying unaudited condensed consolidated statements of operations. We do not believe that these impairments, or the factors causing these impairments, will have a material impact on our future operations or cash flows.

NOTE E – FAIR VALUE MEASUREMENTS

Derivative Instruments and Hedging Activities

We develop, manufacture and sell medical devices globally and our earnings and cash flows are exposed to market risk from changes in foreign currency exchange rates and interest rates. We address these risks through a risk management program that includes the use of derivative financial instruments, and operate the program pursuant to documented corporate risk management policies. We recognize all derivative financial instruments in our consolidated financial statements at fair value in accordance with ASC Topic 815, Derivatives and Hedging. In accordance with Topic 815, for those derivative instruments that are designated and qualify as hedging instruments, the hedging instrument must be designated, based upon the exposure being hedged, as a fair value hedge, cash flow hedge, or a hedge of a net investment in a foreign operation. The accounting for changes in the fair value (i.e. gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, further, on the type of hedging relationship. Our derivative instruments do not subject our earnings or cash flows to material risk, as gains and losses on these derivatives generally offset losses and gains on the item being hedged. We do not enter into derivative transactions for speculative purposes and we do not have any non-derivative instruments that are designated as hedging instruments pursuant to Topic 815.

Currency Hedging

We are exposed to currency risk consisting primarily of foreign currency denominated monetary assets and liabilities, forecasted foreign currency denominated intercompany and third-party transactions and net investments in certain subsidiaries. We manage our exposure to changes in foreign currency exchange rates on a consolidated basis to take advantage of offsetting transactions. We use both derivative instruments (currency forward and option contracts), and non-derivative transactions (primarily European manufacturing and distribution operations) to reduce the risk that our earnings and cash flows associated with these foreign currency denominated balances and transactions will be adversely affected by foreign currency exchange rate changes.

Designated Foreign Currency Hedges

All of our designated currency hedge contracts outstanding as of September 30, 2011 and December 31, 2010 were cash flow hedges under Topic 815 intended to protect the U.S. dollar value of our forecasted foreign currency denominated transactions. We record the effective portion of any change in the fair value of foreign currency cash flow hedges in other comprehensive income (OCI) until the related third-party transaction occurs. Once the related third-party transaction occurs, we reclassify the effective portion of any related gain or loss on the foreign currency cash flow hedge to earnings. In the event the hedged forecasted transaction

12

Table of Contents

does not occur, or it becomes no longer probable that it will occur, we reclassify the amount of any gain or loss on the related cash flow hedge to earnings at that time. We had currency derivative instruments designated as cash flow hedges outstanding in the contract amount of \$2.302 billion as of September 30, 2011 and \$2.679 billion as of December 31, 2010.

We recognized net losses of \$28 million in earnings on our cash flow hedges during the third quarter of 2011 and \$74 million for the first nine months of 2011, as compared to net gains of \$5 million during the third quarter of 2010 and net losses of \$22 million for the first nine months of 2010. All currency cash flow hedges outstanding as of September 30, 2011 mature within 36 months. As of September 30, 2011, \$74 million of net losses, net of tax, were recorded in accumulated other comprehensive income (AOCI) to recognize the effective portion of the fair value of any currency derivative instruments that are, or previously were, designated as foreign currency cash flow hedges, as compared to net losses of \$71 million as of December 31, 2010. As of September 30, 2011, \$48 million of net losses, net of tax, may be reclassified to earnings within the next twelve months.

The success of our hedging program depends, in part, on forecasts of transaction activity in various currencies (primarily Japanese yen, Euro, British pound sterling, Australian dollar and Canadian dollar). We may experience unanticipated currency exchange gains or losses to the extent that there are differences between forecasted and actual activity during periods of currency volatility. In addition, changes in foreign currency exchange rates related to any unhedged transactions may impact our earnings and cash flows.

Non-designated Foreign Currency Contracts

We use currency forward contracts as a part of our strategy to manage exposure related to foreign currency denominated monetary assets and liabilities. These currency forward contracts are not designated as cash flow, fair value or net investment hedges under Topic 815; are marked-to-market with changes in fair value recorded to earnings; and are entered into for periods consistent with currency transaction exposures, generally one to six months. We had currency derivative instruments not designated as hedges under Topic 815 outstanding in the contract amount of \$1.872 billion as of September 30, 2011 and \$2.398 billion as of December 31, 2010.

Interest Rate Hedging

Our interest rate risk relates primarily to U.S. dollar borrowings, partially offset by U.S. dollar cash investments. We have historically used interest rate derivative instruments to manage our earnings and cash flow exposure to changes in interest rates by converting floating-rate debt into fixed-rate debt or fixed-rate debt into floating-rate debt.

We designate these derivative instruments either as fair value or cash flow hedges under Topic 815. We record changes in the value of fair value hedges in interest expense, which is generally offset by changes in the fair value of the hedged debt obligation. Interest payments made or received related to our interest rate derivative instruments are included in interest expense. We record the effective portion of any change in the fair value of derivative instruments designated as cash flow hedges as unrealized gains or losses in OCI, net of tax, until the hedged cash flow occurs, at which point the effective portion of any gain or loss is reclassified to earnings. We record the ineffective portion of our cash flow hedges in interest expense. In the event the hedged cash flow does not occur, or it becomes no longer probable that it will occur, we reclassify the amount of any gain or loss on the related cash flow hedge to interest expense at that time. In the first quarter of 2011, we entered interest rate derivative contracts having a notional amount of \$850 million to convert fixed-rate debt into floating-rate debt, which we designated as fair value hedges. We terminated these hedges during the third quarter of 2011 and received total proceeds of approximately \$80 million, which included approximately \$5 million of accrued interest receivable. The carrying amount of our \$850 million senior notes maturing in January 2020 include unamortized gains of \$74 million as of September 30, 2011, related to the terminated interest rate derivative contracts, which represents the effective portion of these contracts as of the termination date, less amounts amortized. We will amortize this gain into earnings as a reduction of interest expense over the remaining term of the hedged debt, in accordance with Topic 815. We had no interest rate derivative contracts outstanding as of September 30, 2011 or December 31, 2010.

In prior years, we terminated certain interest rate derivative contracts, including fixed-to-floating interest rate contracts, designated as fair value hedges, and floating-to-fixed treasury locks, designated as cash flow hedges. We are amortizing the gains and losses of these derivative instruments upon termination into earnings over the term of the hedged debt. The carrying amount of certain of our senior notes included unamortized gains of \$2 million as of

September 30, 2011 and December 31, 2010, and unamortized losses of \$4 million as of September 30, 2011 and \$5 million as of December 31, 2010, related to the fixed-to-floating interest rate contracts. In addition, we had pre-tax net gains within AOCI related to terminated floating-to-fixed treasury locks of \$7 million as of September 30, 2011 and \$8 million as of December 31, 2010.

During the third quarter and first nine months of 2011, we recognized in earnings less than \$1 million of net gains related to our previously terminated interest rate derivative contracts. As of September 30, 2011, we had \$4 million of net gains, net of tax, recorded in AOCI to recognize the effective portion of these instruments, as compared to \$5 million of net gains as of December

Table of Contents

31, 2010. As of September 30, 2011, less than \$1 million of net gains, net of tax, may be reclassified to earnings within the next twelve months from amortization of our previously terminated interest rate derivative contracts.

Counterparty Credit Risk

We do not have significant concentrations of credit risk arising from our derivative financial instruments, whether from an individual counterparty or a related group of counterparties. We manage our concentration of counterparty credit risk on our derivative instruments by limiting acceptable counterparties to a diversified group of major financial institutions with investment grade credit ratings, limiting the amount of credit exposure to each counterparty, and by actively monitoring their credit ratings and outstanding fair values on an on-going basis. Furthermore, none of our derivative transactions are subject to collateral or other security arrangements and none contain provisions that are dependent on our credit ratings from any credit rating agency.

We also employ master netting arrangements that reduce our counterparty payment settlement risk on any given maturity date to the net amount of any receipts or payments due between us and the counterparty financial institution. Thus, the maximum loss due to credit risk by counterparty is limited to the unrealized gains in such contracts net of any unrealized losses should any of these counterparties fail to perform as contracted. Although these protections do not eliminate concentrations of credit risk, as a result of the above considerations, we do not consider the risk of counterparty default to be significant.

Fair Value of Derivative Instruments

The following presents the effect of our derivative instruments designated as cash flow hedges under Topic 815 on our accompanying unaudited condensed consolidated statements of operations during the third quarter and first nine months of 2011 and 2010 (in millions):

	Amount of Pre-tax Gain (Loss) Recognized in OCI (Effective Portion)	Amount of Pre-tax Gain (Loss) Reclassified from AOCI into Earnings (Effective Portion)	Location in Statement of Operations
Three Months Ended September 30, 2011			
Currency hedge contracts	\$29	\$(28)) Cost of products sold
	\$29	\$(28))
Three Months Ended September 30, 2010			
Interest rate hedge contracts		\$1) Interest expense
Currency hedge contracts	\$(173)) 5) Cost of products sold
	\$(173)) \$6)
Nine Months Ended September 30, 2011			
Currency hedge contracts	\$(77)) \$(74)) Cost of products sold
	\$(77)) \$(74))
Nine Months Ended September 30, 2010			
Interest rate hedge contracts		\$2) Interest expense
Currency hedge contracts	\$(56)) (22)) Cost of products sold
	\$(56)) \$(20))

We recognized in earnings a \$5 million gain related to the ineffective portion of hedging relationships for the third quarter and first nine months of 2011, related to our interest rate derivative contracts. The amount of gain (loss) recognized in earnings was de minimis for the third quarter and first nine months of 2010.

Table of Contents

Derivatives Not Designated as Hedging Instruments	Location in Statement of Operations	Amount of Gain (Loss) Recognized in Earnings (in millions)		Amount of Gain (Loss) Recognized in Earnings (in millions)	
		Three Months Ended September 30, 2011	2010	Nine Months Ended September 30, 2011	2010
Currency hedge contracts	Other, net	\$8	\$(40)) \$2	\$(67)
		\$8	\$(40)) \$2	\$(67)

Losses and gains on currency hedge contracts not designated as hedged instruments were substantially offset by net losses from foreign currency transaction exposures of \$12 million during the third quarter of 2011, net gains of \$43 million during the third quarter of 2010, net losses of \$11 million for the first nine months of 2011 and net gains of \$59 million for the first nine months of 2010. As a result, we recorded a net foreign currency loss of \$4 million during the third quarter of 2011, a \$3 million gain during the third quarter of 2010, a \$9 million loss for the first nine months of 2011, and an \$8 million loss for the first nine months of 2010, within other, net in our accompanying unaudited condensed consolidated statements of operations.

Topic 815 requires all derivative instruments to be recognized at their fair values as either assets or liabilities on the balance sheet. We determine the fair value of our derivative instruments using the framework prescribed by ASC Topic 820, Fair Value Measurements and Disclosures, by considering the estimated amount we would receive or pay to transfer these instruments at the reporting date and by taking into account current interest rates, foreign currency exchange rates, the creditworthiness of the counterparty for assets, and our creditworthiness for liabilities. In certain instances, we may utilize financial models to measure fair value. Generally, we use inputs that include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; other observable inputs for the asset or liability; and inputs derived principally from, or corroborated by, observable market data by correlation or other means. As of September 30, 2011, we have classified all of our derivative assets and liabilities within Level 2 of the fair value hierarchy prescribed by Topic 820, as discussed below, because these observable inputs are available for substantially the full term of our derivative instruments.

The following are the balances of our derivative assets and liabilities as of September 30, 2011 and December 31, 2010:

(in millions)	Location in Balance Sheet (1)	As of September 30, 2011	December 31, 2010
Derivative Assets:			
Designated Hedging Instruments			
Currency hedge contracts	Prepaid and other current assets	\$25	\$32
Currency hedge contracts	Other long-term assets	17	27
		42	59
Non-Designated Hedging Instruments			
Currency hedge contracts	Prepaid and other current assets	41	23
Total Derivative Assets		\$83	\$82
Derivative Liabilities:			
Designated Hedging Instruments			
Currency hedge contracts	Other current liabilities	\$80	\$87
Currency hedge contracts	Other long-term liabilities	63	71
		143	158
Non-Designated Hedging Instruments			
Currency hedge contracts	Other current liabilities	18	31

Total Derivative Liabilities	\$161	\$189
------------------------------	-------	-------

(1) We classify derivative assets and liabilities as current when the remaining term of the derivative contract is one year or less.

Other Fair Value Measurements

15

Table of Contents

Recurring Fair Value Measurements

On a recurring basis, we measure certain financial assets and financial liabilities at fair value based upon quoted market prices, where available. Where quoted market prices or other observable inputs are not available, we apply valuation techniques to estimate fair value. Topic 820 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The categorization of financial assets and financial liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the measurement of fair value. The three levels of the hierarchy are defined as follows:

Level 1 – Inputs to the valuation methodology are quoted market prices for identical assets or liabilities.

Level 2 – Inputs to the valuation methodology are other observable inputs, including quoted market prices for similar assets or liabilities and market-corroborated inputs.

Level 3 – Inputs to the valuation methodology are unobservable inputs based on management's best estimate of inputs market participants would use in pricing the asset or liability at the measurement date, including assumptions about risk.

Assets and liabilities measured at fair value on a recurring basis consist of the following as of September 30, 2011 and December 31, 2010:

(in millions)	As of September 30, 2011				As of December 31, 2010			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets								
Money market and government funds	\$ 145			\$ 145	\$ 105			\$ 105
Currency hedge contracts		\$ 83		83		\$ 82		82
	\$ 145	\$ 83		\$ 228	\$ 105	\$ 82		\$ 187
Liabilities								
Currency hedge contracts		\$ 161		\$ 161		\$ 189		\$ 189
Accrued contingent consideration			\$ 376	376			\$ 71	71
		\$ 161	\$ 376	\$ 537		\$ 189	\$ 71	\$ 260

Our investments in money market and government funds are generally classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. These investments are classified as cash and cash equivalents within our accompanying unaudited condensed consolidated balance sheets, in accordance with U.S. GAAP and our accounting policies.

In addition to \$145 million invested in money market and government funds as of September 30, 2011, we had \$12 million in short-term time deposits and \$119 million in interest bearing and non-interest bearing bank accounts. In addition to \$105 million invested in money market and government funds as of December 31, 2010, we had \$16 million of cash invested in short-term time deposits, and \$92 million in interest bearing and non-interest bearing bank accounts.

Changes in the fair value of recurring fair value measurements using significant unobservable inputs (Level 3) during the first nine months of 2011, which relate solely to our contingent consideration liability, were as follows (in millions):

Balance as of December 31, 2010	\$(71))
Contingent consideration liability recorded	(287))
Fair value adjustments	(18))
Balance as of September 30, 2011	\$(376))

Refer to Note B - Acquisitions for a discussion of the changes in the fair value of our contingent consideration liability.

Non-Recurring Fair Value Measurements

We hold certain assets and liabilities that are measured at fair value on a non-recurring basis in periods subsequent to initial recognition. The fair value of a cost method investment is not estimated if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investment. The aggregate carrying amount of our cost method investments was \$16 million as of September 30, 2011 and \$43 million as of December 31, 2010. The decrease was due primarily

Table of Contents

to our first quarter 2011 acquisitions of the remaining fully diluted equity of companies in which we held a prior equity interest, described further in Note B - Acquisitions.

During the first nine months of 2011, we recorded \$718 million of losses to adjust our goodwill and certain other intangible asset balances to their fair value. We wrote down goodwill attributable to our U.S. CRM reporting unit, discussed in Note D – Goodwill and Other Intangible Assets, with a carrying amount of \$1.479 billion to its implied fair value of \$782 million, resulting in a non-deductible goodwill impairment charge of \$697 million in the first quarter of 2011. In addition, during the second quarter of 2011, as a result of changes in the timing and amount of the expected cash flows related to certain acquired in-process research and development projects, we recorded a \$12 million intangible asset impairment charge representing a decrease in the estimated fair value of the related intangible assets. Further, during the third quarter of 2011, we recorded a \$9 million intangible asset impairment charge attributable to lower projected cash flows associated with certain technologies. In addition, during the first quarter of 2011, we recorded \$15 million of losses to write down certain cost method investments. These fair value measurements were calculated using unobservable inputs, primarily using the income approach, specifically the DCF method, which are classified as Level 3 within the fair value hierarchy. The amount and timing of future cash flows within these analyses was based on our most recent operational budgets, long-range strategic plans and other estimates.

During the first nine months of 2010, we recorded \$1.882 billion of losses to adjust our goodwill and certain other intangible asset balances to their fair values, and \$5 million of losses to write down certain cost method investments. We wrote down goodwill attributable to our U.S. CRM reporting unit with a carrying amount of \$3.296 billion to its implied fair value of \$1.479 billion, resulting in a net write-down of \$1.817 billion. In addition, we recorded a loss of \$60 million in the first quarter of 2010 to write down certain of our Peripheral Interventions intangible assets to their estimated fair values, and a loss of \$5 million in the third quarter of 2010 to write off the remaining value associated with certain other intangible assets. These fair value measurements were calculated using unobservable inputs, primarily using the income approach, specifically the DCF method, which are classified as Level 3 within the fair value hierarchy. The amount and timing of future cash flows within these analyses was based on our most recent operational budgets, long range strategic plans and other estimates.

The fair value of our outstanding debt obligations was \$4.667 billion as of September 30, 2011 and \$5.654 billion as of December 31, 2010, which was determined by using primarily quoted market prices for our publicly-registered senior notes, classified as Level 1 within the fair value hierarchy. This decrease was due primarily to debt repayments of \$1.250 billion during the first nine months of 2011, as well as an increase in the market price for our publicly-traded senior notes. Refer to Note F – Borrowings and Credit Arrangements for a discussion of our debt obligations.

NOTE F – BORROWINGS AND CREDIT ARRANGEMENTS

We had total debt of \$4.263 billion as of September 30, 2011 and \$5.438 billion as of December 31, 2010. During the first nine months of 2011, we prepaid the remaining \$1.0 billion of our term loan and paid \$250 million of our senior notes at maturity. The debt maturity schedule for the significant components of our debt obligations as of September 30, 2011 is as follows:

(in millions)	Payments due by Period						Total
	2011	2012	2013	2014	2015	Thereafter	
Senior notes				\$600	\$1,250	\$2,350	\$4,200
				\$600	\$1,250	\$2,350	\$4,200

Note: The table above does not include unamortized discounts associated with our senior notes, or amounts related to interest rate contracts used to hedge the fair value of certain of our senior notes.

Term Loan and Revolving Credit Facility

During the first nine months of 2011, we prepaid the remaining \$1.0 billion of our term loan maturities without premium or penalty.

We maintain a \$2.0 billion revolving credit facility, maturing in June 2013, with up to two one-year extension options subject to certain conditions. Any revolving credit facility borrowings bear interest at LIBOR plus an interest margin of between 1.55 percent and 2.625 percent, based on our corporate credit ratings (currently 2.05 percent). In addition, we are required to pay a facility fee based on our credit ratings and the total amount of revolving credit commitments, regardless of usage, under the agreement (currently 0.45 percent). In July 2011, Fitch Ratings upgraded our corporate credit rating to BBB-, an investment-grade rating and Moody's Investors Service raised our Ba1 rating outlook to positive from stable. The Fitch upgrade has resulted in a slightly favorable reduction in the facility fee and the interest rate on the facility. Any borrowings under the revolving credit facility are unrestricted and unsecured. In the third quarter of 2011, we borrowed \$175 million under the facility and subsequently repaid the

Table of Contents

borrowed amounts during the third quarter of 2011. There were no amounts borrowed under our revolving credit facility as of September 30, 2011 or December 31, 2010.

Our revolving credit facility agreement requires that we maintain certain financial covenants, as follows:

	Covenant Requirement	Actual as of September 30, 2011
Maximum leverage ratio (1)	3.5 times	1.5 times
Minimum interest coverage ratio (2)	3.0 times	9.0 times

(1) Ratio of total debt to consolidated EBITDA, as defined by the agreement, as amended, for the preceding four consecutive fiscal quarters.

(2) Ratio of consolidated EBITDA, as defined by the agreement, as amended, to interest expense for the preceding four consecutive fiscal quarters.

The credit agreement provides for an exclusion from the calculation of consolidated EBITDA, as defined by the agreement, through the credit agreement maturity, of up to \$258 million in restructuring charges and restructuring-related expenses related to our previously announced restructuring plans, plus an additional \$300 million for any future restructuring initiatives, including our recently announced 2011 Restructuring program. As of September 30, 2011, we had \$361 million of the combined restructuring charge exclusion remaining. In addition, any litigation-related charges and credits are excluded from the calculation of consolidated EBITDA until such items are paid or received; and up to \$1.5 billion of any future cash payments for future litigation settlements or damage awards (net of any litigation payments received); as well as litigation-related cash payments (net of cash receipts) of up to \$1.310 billion related to amounts that were recorded in the financial statements as of March 31, 2010 are excluded from the calculation of consolidated EBITDA. As of September 30, 2011, we had \$1.832 billion of the combined legal payment exclusion remaining.

As of and through September 30, 2011, we were in compliance with the required covenants. Our inability to maintain compliance with these covenants could require us to seek to renegotiate the terms of our credit facilities or seek waivers from compliance with these covenants, both of which could result in additional borrowing costs. Further, there can be no assurance that our lenders would grant such waivers.

Senior Notes

We had senior notes outstanding in the amount of \$4.2 billion as of September 30, 2011 and \$4.450 billion as of December 31, 2010. In January 2011, we paid \$250 million of our senior notes at maturity.

Other Arrangements

We also maintain a \$350 million credit and security facility secured by our U.S. trade receivables. In August 2011, we extended the maturity of this facility to August 2012. There were no amounts borrowed under this facility as of September 30, 2011 or December 31, 2010. In January 2011, we borrowed \$250 million under this facility and used the proceeds to prepay \$250 million of our term loan, and subsequently repaid the borrowed amounts during the first quarter of 2011.

In addition, we have accounts receivable factoring programs in certain European countries that we account for as sales under ASC Topic 860, Transfers and Servicing. These agreements provide for the sale of accounts receivable to third parties, without recourse, of up to approximately 330 million Euro (translated to approximately \$445 million as of September 30, 2011). We have no retained interests in the transferred receivables, other than collection and administrative responsibilities and, once sold, the accounts receivable are no longer available to satisfy creditors in the event of bankruptcy. We de-recognized \$387 million of receivables as of September 30, 2011 at an average interest rate of 2.5 percent, and \$363 million as of December 31, 2010 at an average interest rate of 2.0 percent. Further, we have uncommitted credit facilities with two commercial Japanese banks that provide for borrowings and promissory notes discounting of up to 18.5 billion Japanese yen (translated to approximately \$240 million as of September 30, 2011). We de-recognized \$188 million of notes receivable as of September 30, 2011 at an average interest rate of 1.8 percent and \$197 million of notes receivable as of December 31, 2010 at an average interest rate of 1.7 percent.

De-recognized accounts and notes receivable are excluded from trade accounts receivable, net in the accompanying

unaudited condensed consolidated balance sheets.

NOTE G – RESTRUCTURING-RELATED ACTIVITIES

On an on-going basis, we monitor the dynamics of the economy, the healthcare industry, and the markets in which we compete;

18

Table of Contents

and we continue to assess opportunities for improved operational effectiveness and efficiency, and better alignment of expenses with revenues, while preserving our ability to make the investments in research and development projects, capital and our people that are essential to our long-term success. As a result of these assessments, we have undertaken various restructuring initiatives in order to enhance our growth potential and position us for long-term success. These initiatives are described below.

2011 Restructuring plan

On July 26, 2011, our Board of Directors approved, and we committed to, a restructuring initiative (the 2011 Restructuring plan) designed to strengthen operational effectiveness and efficiencies, increase competitiveness and support new investments, thereby increasing shareholder value. Key activities under the plan include standardizing and automating certain processes and activities; relocating select administrative and functional activities; rationalizing organizational reporting structures; and leveraging preferred vendors. Among these efforts, we are expanding our ability to deliver best-in-class global shared services for certain functions and divisions at several locations in emerging markets. This action is intended to enable us to grow our global commercial presence in key geographies and take advantage of many cost-reducing and productivity-enhancing opportunities. In addition, we are undertaking efforts to streamline various corporate functions, eliminate bureaucracy, increase productivity and better align corporate resources to our key business strategies. Activities under the 2011 Restructuring plan were initiated in the third quarter of 2011 and are expected to be substantially complete within the next 24 months.

We estimate that the 2011 Restructuring plan will result in total pre-tax charges of approximately \$155 million to \$210 million, and that approximately \$150 million to \$200 million of these charges will result in future cash outlays. We have recorded related costs of \$15 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through other lines within our consolidated statements of operations.

The following provides a summary of our expected total costs associated with the plan by major type of cost:

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$125 million to \$150 million
Other (1)	\$20 million to \$40 million
Restructuring-related expenses:	
Other (2)	\$10 million to \$20 million
	\$155 million to \$210 million

(1) Includes primarily consulting fees and costs associated with contractual cancellations.

(2) Comprised of other costs directly related to the 2011 Restructuring plan, including program management, accelerated depreciation, retention and infrastructure-related costs.

2010 Restructuring plan

On February 6, 2010, our Board of Directors approved, and we committed to, a series of management changes and restructuring initiatives (the 2010 Restructuring plan) designed to focus our business, drive innovation, accelerate profitable revenue growth and increase both accountability and shareholder value. Key activities under the plan include the integration of our Cardiovascular and CRM businesses, as well as the restructuring of certain other businesses and corporate functions; the centralization of our research and development organization; the re-alignment of our international structure to reduce our administrative costs and invest in expansion opportunities including significant investments in emerging markets; and the re-prioritization and diversification of our product portfolio. Activities under the 2010 Restructuring plan were initiated in the first quarter of 2010 and are expected to be substantially complete by the end of 2012.

We estimate that the 2010 Restructuring plan will result in total pre-tax charges of approximately \$165 million to \$185 million, and that approximately \$150 million to \$160 million of these charges will result in cash outlays, of

which we have made payments of \$135 million to date. We have recorded related costs of \$166 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through other lines within our consolidated statements of operations.

The following provides a summary of our expected total costs associated with the plan by major type of cost:

Table of Contents

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$95 million to \$100 million
Fixed asset write-offs	\$10 million to \$15 million
Other (1)	\$50 million to \$55 million
Restructuring-related expenses:	
Other (2)	\$10 million to \$15 million \$165 million to \$185 million

(1) Includes primarily consulting fees and costs associated with contractual cancellations.

(2) Comprised of other costs directly related to the 2010 Restructuring plan, including accelerated depreciation and infrastructure-related costs.

Plant Network Optimization program

In January 2009, our Board of Directors approved, and we committed to, a Plant Network Optimization program, which is intended to simplify our manufacturing plant structure by transferring certain production lines among facilities and by closing certain other facilities. The program is a complement to our 2007 Restructuring plan, discussed below, and is intended to improve overall gross profit margins. Activities under the Plant Network Optimization program were initiated in the first quarter of 2009 and are expected to be substantially complete by the end of 2012.

We expect that the execution of the Plant Network Optimization program will result in total pre-tax charges of approximately \$130 million to \$145 million, and that approximately \$110 million to \$120 million of these charges will result in cash outlays, of which we have made payments of \$62 million to date. We have recorded related costs of \$115 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through cost of products sold within our consolidated statements of operations. The following provides a summary of our estimates of costs associated with the Plant Network Optimization program by major type of cost:

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$35 million to \$40 million
Restructuring-related expenses:	
Accelerated depreciation	\$20 million to \$25 million
Transfer costs (1)	\$75 million to \$80 million \$130 million to \$145 million

(1) Consists primarily of costs to transfer product lines among facilities, including costs of transfer teams, freight, idle facility and product line validations.

2007 Restructuring plan

In October 2007, our Board of Directors approved, and we committed to, an expense and head count reduction plan (the 2007 Restructuring plan). The plan was intended to bring expenses in line with revenues as part of our initiatives to enhance short- and long-term shareholder value. The transfer of production lines contemplated under the 2007 Restructuring plan was completed as of December 31, 2010; all other major activities under the plan were completed as of December 31, 2009. The execution of this plan resulted in total pre-tax expenses of \$427 million and required cash outlays of \$380 million, of which we have paid \$373 million to date.

We recorded restructuring charges pursuant to our restructuring plans of \$22 million in the third quarter of 2011, \$5 million in the third quarter of 2010, \$77 million in the first nine months of 2011, and \$98 million in the first nine months of 2010. In addition, we recorded expenses within other lines of our accompanying unaudited condensed consolidated statements of operations related to our restructuring initiatives of \$7 million in the third quarter of 2011, \$13 million in the third quarter of 2010, \$32 million in

20

Table of Contents

the first nine months of 2011, and \$41 million in the first nine months of 2010.

The following presents these costs by major type and line item within our accompanying unaudited condensed consolidated statements of operations, as well as by program:

Three Months Ended September 30, 2011

(in millions)	Termination Benefits	Accelerated Depreciation	Transfer Costs	Fixed Asset Write-offs	Other	Total

2007 Restructuring plan	1		12		4	17
	\$66	\$6	\$32	\$8	\$27	\$139

Termination benefits represent amounts incurred pursuant to our on-going benefit arrangements and amounts for “one-time” involuntary termination benefits, and have been recorded in accordance with ASC Topic 712, Compensation – Non-retirement Postemployment Benefits and ASC Topic 420, Exit or Disposal Cost Obligations. We expect to record additional termination benefits related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program in 2011 and 2012 when we identify with more specificity the job classifications, functions and locations of the remaining head count to be eliminated. Other restructuring costs, which represent primarily consulting fees, are being recorded as incurred in accordance with Topic 420. Accelerated depreciation is being recorded over the adjusted remaining useful life of the related assets, and production line transfer costs are being recorded as incurred. We have incurred cumulative restructuring charges related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program of \$207 million and restructuring-related costs of \$89 million since we committed to each plan. The following presents these costs by major type and by plan:

Table of Contents

(in millions)	2011 Restructuring plan	2010 Restructuring plan	Plant Network Optimization	Total
Termination benefits	\$9	\$96	\$35	\$140
Fixed asset write-offs		11		11
Other	5	51		56
Total restructuring charges	14	158	35	207
Accelerated depreciation			20	20
Transfer costs			60	60
Other	1	8		9
Restructuring-related expenses	1	8	80	89
	\$15	\$166	\$115	\$296

We made cash payments of \$24 million in the third quarter of 2011 and \$92 million in the first nine months of 2011 associated with restructuring initiatives pursuant to these plans, and have made total cash payments of \$201 million related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program since committing to each plan. Each of these payments was made using cash generated from operations, and are comprised of the following:

(in millions)	2011 Restructuring plan	2010 Restructuring plan	Plant Network Optimization	Total
Three Months Ended September 30, 2011				
Termination benefits		\$9	\$1	\$10
Transfer costs			5	5
Other	\$4	5		9
	\$4	\$14	\$6	\$24
Nine Months Ended September 30, 2011

	\$4	\$66	\$22	\$92
Program to Date				
Termination benefits		\$80	\$2	\$82
Transfer costs			60	60
Other	\$4	55		59
	\$4	\$135	\$62	\$201

We also made cash payments of \$1 million during the third quarter of 2011 and \$3 million during the first nine months of 2011 associated with our 2007 Restructuring plan and have made total cash payments of \$373 million related to the 2007 Restructuring plan since committing to the plan in the fourth quarter of 2007.

The following is a rollforward of the restructuring liability associated with our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program, since the inception of the respective plan, which is reported as a component of accrued expenses included in our accompanying unaudited condensed consolidated balance sheets:

Table of Contents

(in millions)	2011 Restructuring plan			2010 Restructuring plan			Plant Network Optimization		
	Termination Benefits	Other	Subtotal	Termination Benefits	Other	Subtotal	Termination Benefits	Total	
Accrued as of December 31, 2008									
Charges							\$22	\$22	
Cash payments									
Accrued as of December 31, 2009							22	22	
Charges				\$66	\$28	\$94	4	98	
Cash payments				(45) (20) (65)	(65)
Accrued as of December 31, 2010				21	8	29	26	55	
Charges	\$9	\$4	\$13	32	24	56	8	77

Accrued as of September 30, 2011	\$9	\$—	\$9	\$19	\$—	\$19	\$32	\$60	

The remaining restructuring liability associated with our 2007 Restructuring plan was \$7 million as of September 30, 2011 and \$10 million as of December 31, 2010.

NOTE H – SUPPLEMENTAL BALANCE SHEET INFORMATION

Components of selected captions in our accompanying unaudited condensed consolidated balance sheets are as follows:

Trade accounts receivable, net

(in millions)	As of	
	September 30, 2011	December 31, 2010
Accounts receivable	\$1,341	\$1,445
Less: allowance for doubtful accounts	(75) (83
Less: allowance for sales returns	(29) (42
	\$1,237	\$1,320

The following is a rollforward of our allowance for doubtful accounts for the third quarter and first nine months of 2011 and 2010:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Beginning balance	\$67	\$72	\$83	\$71
Net charges to expenses	12	6	1	17
Utilization of allowances	(4)	(9) (10
Ending balance	\$75	\$78	\$75	\$78

During the first quarter of 2011, we reversed \$20 million of previously established allowances for doubtful accounts against long-outstanding receivables in Greece. These receivables had previously been fully reserved as we had

determined that they had a high risk of being uncollectible due to the economic situation in Greece. During the first quarter of 2011, the Greek government converted these receivables into bonds, which we were able to monetize, reducing our allowance for doubtful accounts as a credit to selling, general and administrative expenses. We continue to monitor the European economic environment for any collectibility issues related to our outstanding receivables in this region.

Other long-term liabilities	398	374
	\$1,981	\$1,645

Accrued warranties

We offer warranties on certain of our product offerings. Approximately 85 percent of our warranty liability as of September 30, 2011 related to implantable devices offered by our CRM business, which include defibrillator and pacemaker systems. Our CRM products come with a standard limited warranty covering the replacement of these devices. We offer a full warranty for a portion of the period post-implant, and a partial warranty over the substantial remainder of the useful life of the product. We estimate the costs that we may incur under our warranty programs based on the number of units sold, historical and anticipated rates of warranty claims and cost per claim, and record a liability equal to these estimated costs as cost of products sold at the time the product sale occurs. We reassess the adequacy of our recorded warranty liabilities on a quarterly basis and adjust these amounts as necessary. The current portion of our warranty accrual is included in other accrued expenses in the table above and the non-current portion of our warranty accrual is included in other long-term liabilities in the table above. Changes in our product warranty accrual during

Refer to Note E – Fair Value Measurements for more information on our derivative financial instruments.

NOTE J – INCOME TAXES

Tax Rate

The following table provides a summary of our reported tax rate:

	Three Months Ended September 30,		Percentage Point Increase (Decrease)	
	2011	2010		
Reported tax rate	(27.9)% (16.6)% (11.3)%
Impact of certain receipts/charges*	48.0	% 33.4	% 14.6	%
	20.1	% 16.8	% 3.3	%

	Nine Months Ended September 30,		Percentage Point Increase (Decrease)	
	2011	2010		
Reported tax rate	38.4	% (0.7)% 39.1	%
Impact of certain receipts/charges*	(21.8)% 20.9	% (42.7)%
	16.6	% 20.2	% (3.6)%

*These receipts/charges are taxed at different rates than our effective tax rate.

The change in our reported tax rate for the third quarter and first nine months of 2011, as compared to the same periods in 2010, relates primarily to the impact of certain receipts and charges that are taxed at different rates than our effective tax rate. In 2011, these receipts and charges included a gain on our divestiture of the Neurovascular business, a non-deductible goodwill impairment charge, other intangible asset impairment charges and restructuring- and acquisition-related charges and credits. Our reported tax rate was also affected by discrete tax items, related primarily to a release of valuation allowances resulting from a change in our expected ability to realize certain deferred tax assets, changes in various state tax laws, the resolution of various uncertain tax positions resulting from closing agreements with the Internal Revenue Service (IRS), the resolution of various uncertain tax

Table of Contents

positions resulting from the expiration of the statute of limitations for assessing tax in certain jurisdictions, and the finalization of our 2010 U.S. Federal tax return. In 2010, these receipts and charges included goodwill and intangible asset impairment charges, a gain associated with the receipt of an acquisition-related milestone payment, and restructuring-related charges. In 2010, our reported tax rate was also affected by discrete tax items, related primarily to the re-measurement of an uncertain tax position resulting from a favorable court ruling issued in a similar third-party case and the resolution of an uncertain tax position resulting from a favorable taxpayer motion issued in a similar third-party case.

As of September 30, 2011, we had \$935 million of gross unrecognized tax benefits, of which a net \$830 million, if recognized, would affect our effective tax rate. As of December 31, 2010, we had \$965 million of gross unrecognized tax benefits, of which a net \$859 million, if recognized, would affect our effective tax rate.

We are subject to U.S. Federal income tax as well as income tax of multiple state and foreign jurisdictions. We have concluded all U.S. federal income tax matters through 2000 and substantially all material state, local, and foreign income tax matters through 2001.

On December 17, 2010, we received Notices of Deficiency from the IRS reflecting proposed audit adjustments for Guidant Corporation for the 2001-2003 tax years. The incremental tax liability asserted by the IRS for these periods is \$525 million plus interest. The primary issue in dispute is the transfer pricing in connection with the technology license agreements between domestic and foreign subsidiaries of Guidant. We believe we have meritorious defenses for our tax filings and, on March 11, 2011, we filed petitions with the U.S. Tax Court contesting these Notices of Deficiency. On May 20, 2011, the IRS filed its answer to our petition.

In February 2011, we received Revenue Agent's Reports from the IRS reflecting proposed adjustments for the Guidant 2004-2006 tax years. The reports propose transfer pricing adjustments based on positions substantially similar to those subject to our U.S. Tax Court proceedings for Guidant Corporation's 2001-2003 tax years. The statute of limitations for Guidant Corporation's 2004-2006 tax years expires in December 2011 and we anticipate receiving a Notice of Deficiency for these tax years prior to the expiration of the relevant statute of limitations. We believe we have meritorious defenses for our tax filings and will petition the Tax Court to contest the proposed IRS adjustments.

In September 2011, we received a Notice of Deficiency from the IRS reflecting proposed audit adjustments for Boston Scientific Corporation for the 2006-2007 tax years. The incremental tax liability asserted by the IRS for these periods is \$154 million plus interest. The adjustments proposed by the IRS are based on positions substantially similar to those subject to our U.S. Tax Court proceedings for Guidant Corporation's 2001-2003 tax years and we intend to file a timely petition to the U.S. Tax Court contesting this assessment.

We believe that our income tax reserves associated with these matters are adequate and the final resolution will not have a material impact on our financial condition or results of operations. However, final resolution is uncertain and could have a material impact on our financial condition or results of operations.

We recognize interest and penalties related to income taxes as a component of income tax expense. We recognized tax benefits related to interest of \$4 million in the third quarter of 2011 and \$3 million in the third quarter of 2010. We recognized tax expense related to interest of \$12 million in the first nine months of 2011 and \$10 million in the first nine months of 2010. We had \$303 million accrued for gross interest and penalties as of September 30, 2011 and \$285 million as of December 31, 2010.

It is reasonably possible that within the next 12 months we will resolve multiple issues including transfer pricing, research and development credit and transactional related issues with foreign, federal and state taxing authorities, in which case we could record a reduction in our balance of unrecognized tax benefits of up to approximately \$30 million.

NOTE K – COMMITMENTS AND CONTINGENCIES

The medical device market in which we primarily participate is largely technology driven. Physician customers, particularly in interventional cardiology, have historically moved quickly to adopt new products and new technologies. As a result, intellectual property rights, particularly patents and trade secrets, play a significant role in product development and differentiation. However, intellectual property litigation is inherently complex and

unpredictable. Furthermore, appellate courts can overturn lower court patent decisions.

In addition, competing parties frequently file multiple suits to leverage patent portfolios across product lines, technologies and geographies and to balance risk and exposure between the parties. In some cases, several competitors are parties in the same proceeding, or in a series of related proceedings, or litigate multiple features of a single class of devices. These forces frequently drive settlement not only for individual cases, but also for a series of pending and potentially related and unrelated cases. In addition, although monetary and injunctive relief is typically sought, remedies and restitution are generally not determined until

Table of Contents

the conclusion of the trial court proceedings and can be modified on appeal. Accordingly, the outcomes of individual cases are difficult to time, predict or quantify and are often dependent upon the outcomes of other cases in other geographies. Several third parties have asserted that certain of our current and former product offerings infringe patents owned or licensed by them. We have similarly asserted that other products sold by our competitors infringe patents owned or licensed by us. Adverse outcomes in one or more of the proceedings against us could limit our ability to sell certain products in certain jurisdictions, or reduce our operating margin on the sale of these products and could have a material adverse effect on our financial position, results of operations and/or liquidity.

In particular, although we have resolved multiple litigation matters with Johnson & Johnson, we continue to be involved in patent litigation with them, particularly relating to drug-eluting stent systems. Adverse outcomes in one or more of these matters could have a material adverse effect on our ability to sell certain products and on our operating margins, financial position, results of operations and/or liquidity.

In the normal course of business, product liability, securities and commercial claims are asserted against us. Similar claims may be asserted against us in the future related to events not known to management at the present time. We are substantially self-insured with respect to product liability claims and intellectual property infringement, and maintain an insurance policy providing limited coverage against securities claims. The absence of significant third-party insurance coverage increases our potential exposure to unanticipated claims or adverse decisions. Product liability claims, securities and commercial litigation, and other legal proceedings in the future, regardless of their outcome, could have a material adverse effect on our financial position, results of operations and/or liquidity. In addition, the medical device industry is the subject of numerous governmental investigations often involving regulatory, marketing and other business practices. These investigations could result in the commencement of civil and criminal proceedings, substantial fines, penalties and administrative remedies, divert the attention of our management and have an adverse effect on our financial position, results of operations and/or liquidity.

We generally record losses for claims in excess of the limits of purchased insurance in earnings at the time and to the extent they are probable and estimable. In accordance with ASC Topic 450, Contingencies, we accrue anticipated costs of settlement, damages, losses for general product liability claims and, under certain conditions, costs of defense, based on historical experience or to the extent specific losses are probable and estimable. Otherwise, we expense these costs as incurred. If the estimate of a probable loss is a range and no amount within the range is more likely, we accrue the minimum amount of the range. Our accrual for legal matters that are probable and estimable was \$269 million as of September 30, 2011 and \$588 million as of December 31, 2010, and includes estimated costs of settlement, damages and defense. The decrease in our accrual is due primarily to the payment of \$296 million to the U.S. Department of Justice (DOJ) in order resolve the criminal investigation of Guidant Corporation related to an alleged violation of the Food, Drug and Cosmetic Act occurring prior to our acquisition of Guidant, discussed in our 2010 Annual Report filed on Form 10-K and in the concluded matters below. We continue to assess certain litigation and claims to determine the amounts, if any, that management believes will be paid as a result of such claims and litigation and, therefore, additional losses may be accrued and paid in the future, which could materially adversely impact our operating results, cash flows and/or our ability to comply with our debt covenants.

In management's opinion, we are not currently involved in any legal proceedings other than those disclosed in our 2010 Annual Report filed on Form 10-K, our Quarterly Reports filed on Form 10-Q for the quarters ended March 31, 2011 and June 30, 2011, or specifically identified below, which, individually or in the aggregate, could have a material effect on our financial condition, operations and/or cash flows. Unless included in our legal accrual or otherwise indicated below, a range of loss associated with any individual material legal proceeding cannot be estimated.

Patent Litigation

Litigation with Johnson & Johnson (including its subsidiary, Cordis Corporation)

On April 13, 1998, Cordis Corporation filed suit against Boston Scientific Scimed, Inc. and us in the U.S. District Court for the District of Delaware, alleging that our former NIR[®] stent infringed three claims of two patents (the Fischell patents) owned by Cordis and seeking damages and injunctive relief. On May 2, 2005, the District Court entered judgment that none of the three asserted claims was infringed, although two of the claims were not invalid. The District Court also found the two patents unenforceable for inequitable conduct. Cordis appealed the non-infringement finding of one claim in one patent and the unenforceability of that patent. We cross appealed the finding that one of the two claims was not invalid. Cordis did not appeal as to the second patent. On June 29, 2006, the Court of Appeals upheld the finding that the claim was not invalid, remanded the case to the District Court for additional factual findings related to inequitable conduct, and did not address the finding that the claim was not infringed. On August 10, 2009, the District Court reversed its finding that the two patents were unenforceable for inequitable conduct. On August 24, 2009, we asked the District Court to reconsider and on March 31, 2010, the District Court denied our request for reconsideration. On April 2, 2010, Cordis filed an appeal and on April 9, 2010, we filed a cross appeal. On June 6,

Table of Contents

2011, oral arguments were heard before the U.S. Court of Appeals for the Federal Circuit. On September 28, 2011, the Federal Circuit Court affirmed the District Court's findings of non-infringement and enforceability.

On each of May 25, June 1, June 22 and November 27, 2007, Boston Scientific Scimed, Inc. and we filed a declaratory judgment action against Johnson & Johnson and Cordis Corporation in the U.S. District Court for the District of Delaware seeking a declaratory judgment of invalidity of four U.S. patents (the Wright and Falotico patents) owned by them and of non-infringement of the patents by the PROMUS® coronary stent system, supplied to us by Abbott Laboratories. On February 21, 2008, Johnson & Johnson and Cordis filed counterclaims for infringement seeking an injunction and a declaratory judgment of validity. On June 25, 2009, we amended our complaints to allege that the four patents owned by Johnson & Johnson and Cordis are unenforceable. On January 20, 2010, the District Court found the four patents owned by Johnson & Johnson and Cordis invalid. On February 17, 2010, Johnson & Johnson and Cordis appealed the District Court's decision. The oral argument on appeal occurred on January 11, 2011 and on June 7, 2011 the U.S. Court of Appeals for the Federal Circuit affirmed the decision of the U.S. District Court for the District of Delaware, finding all four Johnson & Johnson patents to be invalid. On July 21, 2011, Johnson & Johnson and Cordis filed a petition for rehearing or rehearing en banc. On September 15, 2011, the Federal Circuit Court denied Cordis' petition for rehearing or rehearing en banc.

On January 15, 2010, Cordis Corporation filed a complaint against us and Boston Scientific Scimed, Inc. alleging that the PROMUS® coronary stent system, supplied to us by Abbott, infringes three patents (the Fischell patents) owned by Cordis. On March 11, 2010, we filed an answer to the complaint along with counterclaims of invalidity and non-infringement. The suit was filed in the U.S. District Court for the District of Delaware and seeks monetary and injunctive relief. A liability trial is scheduled to begin on July 30, 2012.

On September 22, 2009, Cordis Corporation, Cordis LLC and Wyeth Corporation filed a complaint for patent infringement against Abbott Laboratories, Abbott Cardiovascular Systems, Inc., Boston Scientific Scimed, Inc. and us alleging that the PROMUS® coronary stent system, supplied to us by Abbott, infringes a patent (the Llanos patent) owned by Cordis and Wyeth that issued on September 22, 2009. The suit was filed in the U.S. District Court for the District of New Jersey seeking monetary and injunctive relief. On September 22, 2009, we filed a declaratory judgment action in the U.S. District Court for the District of Minnesota against Cordis and Wyeth seeking a declaration that the patent is invalid and not infringed by the PROMUS® coronary stent system, supplied to us by Abbott. On January 19, 2010, the Minnesota District Court transferred our suit to the U.S. District Court for the District of New Jersey and on February 17, 2010, the Minnesota case was dismissed. On July 13, 2010, Cordis filed a motion to amend the complaint to add an additional patent, which the New Jersey District Court granted on August 2, 2010. Cordis filed an amended complaint on August 9, 2010. On September 3, 2010, we filed an answer to the amended complaint along with counterclaims of invalidity and non-infringement. On May 27, 2011, the District Court granted our motion to bifurcate damages from liability in the case. On October 26, 2011, the District Court granted Cordis' motion to add the Promus Element stent system to the case.

Other Stent System Patent Litigation

On May 19, 2005, G. David Jang, M.D. filed suit against us alleging breach of contract relating to certain patent rights covering stent technology. The suit was filed in the U.S. District Court for the Central District of California seeking monetary damages and rescission of the contract. After a Markman ruling relating to the Jang patent rights, Dr. Jang stipulated to the dismissal of certain claims alleged in the complaint with a right to appeal. In February 2007, the parties agreed to settle the other claims of the case. On May 23, 2007, Jang filed an appeal with respect to the remaining patent claims. On July 11, 2008, the Court of Appeals vacated the District Court's consent judgment and remanded the case back to the District Court for further clarification. On June 11, 2009, the District Court ordered a stay of the action pursuant to the parties' joint stipulation. On August 30, 2011, the District Court entered a stipulated judgment that we did not infringe the Jang patent. Jang filed an appeal on September 21, 2011.

On October 5, 2009, Dr. Jang served a lien notice on us seeking a portion of any recovery from Johnson & Johnson for infringement of the Jang patent, and on May 25, 2010, Dr. Jang filed a formal suit in the U.S. District Court for the Central District of California. On June 5, 2010, we answered denying the allegations and on July 2, 2010, we filed a motion to transfer the action to the U.S. District Court for the District of Delaware. On August 9, 2010, the Central California District Court ordered the case transferred to Delaware. On September 30, 2011, the Delaware District Court granted our motion for judgment on the pleadings and entered judgment in favor of us on October 3, 2011.

On March 16, 2009, OrbusNeich Medical, Inc. filed suit against us in the U.S. District Court for the Eastern District of Virginia alleging that our VeriFLEX™ (Liberté®) bare-metal coronary stent system infringes two U.S. patents (the Addonizio and Pazienza patents) owned by it. The complaint also alleged breach of contract and misappropriation of trade secrets and seeks monetary and injunctive relief. On April 13, 2009, we answered denying the allegations and filed a motion to transfer the case to the U.S. District

Table of Contents

Court for the District of Minnesota as well as a motion to dismiss the state law claims. On June 8, 2009, the case was transferred to the U.S. District Court for the District of Massachusetts. On September 11, 2009, OrbusNeich filed an amended complaint against us. On October 2, 2009, we filed a motion to dismiss the non-patent claims and, on October 20, 2009, we filed an answer to the amended complaint. On March 18, 2010, the Massachusetts District Court dismissed OrbusNeich's unjust enrichment and fraud claims, but denied our motion to dismiss the remaining state law claims. On April 14, 2010, OrbusNeich filed a motion to amend its complaint to add another patent (another Addonizio patent). On January 21, 2011, OrbusNeich moved for leave to amend its complaint to drop its misappropriation of trade secret, violation of Massachusetts Business Practices Act and unfair competition claims from the case. On July 8, 2011, OrbusNeich filed a motion to amend its complaint to include allegations that our ION™ coronary stent system infringes two additional patents. On August 31, 2011, the Massachusetts District Court granted OrbusNeich's motion to amend.

On November 17, 2009, Boston Scientific Scimed, Inc. filed suit against OrbusNeich Medical, Inc. and certain of its subsidiaries in the Hague District Court in the Netherlands alleging that OrbusNeich's sale of the Genous stent infringes a patent owned by us (the Keith patent) and seeking monetary damages and injunctive relief. A hearing was held on June 18, 2010. In December 2010, the case was stayed pending the outcome of an earlier case on the same patent. On February 4, 2011, we filed an appeal. On July 5, 2011, the Hague Court of Appeals dismissed OrbusNeich's motion to deny jurisdiction regarding cross-border provisional relief.

On September 27, 2010, Boston Scientific Scimed, Inc., Boston Scientific Ltd., Endovascular Technologies, Inc. and we filed suit against Taewoong Medical, Co., Ltd., Standard Sci-Tech, Inc., EndoChoice, Inc. and Sewoon Medical Co., Ltd for infringement of three patents on stents for use in the GI system (the Pulnev and Hankh patents) and against Cook Medical Inc. (and related entities) for infringement of the same three patents and an additional patent (the Thompson patent). The suit was filed in the U.S. District Court for the District of Massachusetts seeking monetary damages and injunctive relief. On December 2, 2010, we amended our complaint to add infringement of six additional Pulnev patents, bringing the total number of asserted patents to ten. In January 2011, the defendants answered the complaint, denying infringement and counterclaiming for invalidity and unenforceability of the asserted patents. On September 22, 2011, we amended the complaint to add Chek-Med Systems d/b/a GI Supply as a defendant.

Other Patent Litigation

On May 27, 2011, Body Science LLC filed suit against us in the United States District Court for the Northern District of Illinois, alleging that our Latitude® Patient Management System and Latitude® Blood Pressure Monitor infringes two U.S. patents (the Besson patents) owned by them. On July 27, 2011, Body Science amended its complaint to add several cardiac resynchronization therapy defibrillator (CRT-D) and implantable cardioverter defibrillator (ICD) devices that are compatible with the Latitude® Patient Management System.

Product Liability Related Litigation

Cardiac Rhythm Management

Fewer than 10 individual lawsuits remain pending in various state and federal jurisdictions against Guidant alleging personal injuries associated with defibrillators or pacemakers involved in certain 2005 and 2006 product communications. The majority of the cases in the United States are pending in federal court. On November 7, 2005, the Judicial Panel on Multi-District Litigation established MDL-1708 (MDL) in the U.S. District Court for the District of Minnesota and appointed a single judge to preside over all the cases in the MDL. In April 2006, the personal injury plaintiffs and certain third-party payors served a Master Complaint in the MDL asserting claims for class action certification, alleging claims of strict liability, negligence, fraud, breach of warranty and other common law and/or

statutory claims and seeking punitive damages. On July 12, 2007, we reached an agreement to settle certain claims, including those associated with the 2005 and 2006 product communications, which was amended on November 19, 2007. Under the terms of the amended agreement, subject to certain conditions, we would pay a total of up to \$240 million covering up to 8,550 patient claims, including almost all of the claims that have been consolidated in the MDL as well as other filed and unfiled claims throughout the United States. On June 13, 2006, the Minnesota Supreme Court appointed a single judge to preside over all Minnesota state court lawsuits involving cases arising from the product communications. At the conclusion of the MDL settlement in 2010, 8,180 claims had been approved for participation. As a result, we made all required settlement payments of approximately \$234 million, and no other payments are due under the MDL settlement agreement. On April 6, 2009, September 24, 2009, April 16, 2010 and August 30, 2010, the MDL Court issued orders dismissing with prejudice the claims of most plaintiffs participating in the settlement; the claims of settling plaintiffs whose cases were pending in state courts have been or will be dismissed by those courts. On April 22, 2010, the MDL Court certified an order from the Judicial Panel on Multidistrict Litigation remanding the remaining cases to their trial courts of origin. In the third quarter of 2011, we entered into a confidential settlement agreement in the two product liability class action lawsuits with respect to the same subject matter.

Securities-Related Litigation

30

Table of Contents

On October 22, 2010, Sanjay Israni filed a shareholder derivative complaint against us and against certain directors and officers in Massachusetts Superior Court for Middlesex County purportedly seeking to remedy alleged breaches of fiduciary duties that allegedly caused losses to us. The relevant period defined in the complaint is from April 20, 2009 to March 30, 2010. The allegations in the complaint are largely the same as those contained in the shareholder derivative action filed by Rick Barrington. On June 22, 2011, the Court held a hearing on our motion to dismiss. Then, on June 27, 2011, the Court issued an order staying further proceedings in this case pending resolution in one or more of the three related matters discussed in our 2010 Annual Report filed on Form 10-K. On October 14, 2011, in response to our motions the Court lifted the stay and set a hearing on our motion to dismiss. On October 25, 2011, pursuant to a joint stipulation of the parties, the Court dismissed this matter with prejudice.

On September 23, 2005, Srinivasan Shankar, individually and on behalf of all others similarly situated, filed a purported securities class action suit in the U.S. District Court for the District of Massachusetts on behalf of those who purchased or otherwise acquired our securities during the period March 31, 2003 through August 23, 2005, alleging that we and certain of our officers violated certain sections of the Securities Exchange Act of 1934. Four other plaintiffs, individually and on behalf of all others similarly situated, each filed additional purported securities class action suits in the same court on behalf of the same purported class. On February 15, 2006, the District Court ordered that the five class actions be consolidated and appointed the Mississippi Public Employee Retirement System Group as lead plaintiff. A consolidated amended complaint was filed on April 17, 2006. The consolidated amended complaint alleges that we made material misstatements and omissions by failing to disclose the supposed merit of the Medinol litigation and DOJ investigation relating to the 1998 NIR ON® Ranger with Sox stent recall, problems with the TAXUS® drug-eluting coronary stent systems that led to product recalls, and our ability to satisfy U.S. Food and Drug Administration (FDA) regulations concerning medical device quality. The consolidated amended complaint seeks unspecified damages, interest, and attorneys' fees. The defendants filed a motion to dismiss the consolidated amended complaint on June 8, 2006, which was granted by the District Court on March 30, 2007. On April 16, 2008, the U.S. Court of Appeals for the First Circuit reversed the dismissal of only plaintiff's TAXUS® stent recall-related claims and remanded the matter for further proceedings. On February 25, 2009, the District Court certified a class of investors who acquired our securities during the period November 30, 2003 through July 15, 2004. The defendants filed a motion for summary judgment and a hearing on the motion was held on April 21, 2010. On April 27, 2010, the District Court granted defendants' motion and on April 28, 2010, the District Court entered judgment in defendants' favor and dismissed the case. The plaintiffs filed a notice of appeal on May 27, 2010. The oral argument in the First Circuit Court of Appeals was held February 10, 2011. On August 4, 2011, the First Circuit Court of Appeals affirmed the District Court's entry of judgment in favor of the defendants.

On April 9, 2010, the City of Roseville Employees' Retirement System individually and on behalf of purchasers of our securities during the period from April 20, 2009 to March 12, 2010, filed a purported securities class action suit in the U.S. District Court for the District of Massachusetts. The suit alleges that we and certain of our current and former officers violated certain sections of the Securities Exchange Act of 1934 and seeks unspecified monetary damages. The suit claims that our stock price was artificially inflated because we failed to disclose certain matters with respect to our CRM business. An order was issued on July 12, 2010 appointing KBC Asset Management NV and Steelworkers Pension Trust as co-lead plaintiffs and the selection of lead class counsel. The plaintiffs filed an amended class action complaint on September 14, 2010. In the amended complaint, the plaintiffs narrowed the alleged class period from October 20, 2009 to February 10, 2010. On September 20, 2011, the District Court granted our motion to dismiss this action. The plaintiffs filed a notice of appeal on October 17, 2011.

On June 21, 2010, we received a shareholder derivative complaint filed by Rick Barrington individually and on behalf of all others similarly situated against all of our current directors, certain former directors and certain current and former officers seeking to remedy their alleged breaches of fiduciary duties that allegedly caused losses to us during the purported relevant period of April 20, 2009 to March 12, 2010. The allegations in this matter are largely the same

as those asserted in the City of Roseville case. The case was filed in the U.S. District Court for the District of Massachusetts on behalf of purchasers of our securities during the period from April 20, 2009 through March 12, 2010. On October 7, 2010, Mr. Barrington filed an amended complaint. On September 26, 2011, the District Court granted our motion to dismiss this action. Mr. Barrington did not appeal and the time for appeal has expired.

On August 19, 2010, the Iron Workers District Council Southern Ohio and Vicinity Pension Trust filed a putative shareholder derivative class action lawsuit against us and our Board of Directors in the U.S. District Court for the District of Delaware. The allegations and remedies sought in the complaint are largely the same as those in the original complaint filed by the City of Roseville Employees' Retirement System on April 9, 2010. On October 4, 2011, the District Court granted our motion to dismiss this action without prejudice to refile an amended complaint. On October 24, 2011, the plaintiffs filed a motion to stay the proceedings to allow them to make discovery demands before filing an amended complaint.

Governmental Proceedings

Table of Contents

Guidant / Cardiac Rhythm Management

In January 2006, Guidant was served with a civil False Claims Act qui tam lawsuit filed in the U.S. District Court for the Middle District of Tennessee in September 2003 by Robert Fry, a former employee alleged to have worked for Guidant from 1981 to 1997. The lawsuit claims that Guidant violated federal law and the laws of the States of Tennessee, Florida and California by allegedly concealing limited warranty and other credits for upgraded or replacement medical devices, thereby allegedly causing hospitals to file reimbursement claims with federal and state healthcare programs for amounts that did not reflect the providers' true costs for the devices. On December 20, 2010, the District Court granted the parties' motion to suspend further proceedings following the parties advising the Court that they had reached a settlement in principle. We finalized the settlement papers with the parties in September 2011, and we completed our obligations under the settlement agreement on October 4, 2011.

On September 25, 2009, we received a subpoena from the U.S. Department of Health and Human Services, Office of Inspector General (OIG), requesting certain information relating to contributions made by us to charities with ties to physicians or their families. On September 27, 2011, the OIG informed us that it was closing its investigation with no further action. Subsequently, on October 10, 2011, the U.S. District Court for the District of Maryland unsealed a qui tam complaint that relates to the subject matter of the OIG's investigation. The federal government has declined to intervene in that complaint and we have not yet been served with process in the matter.

On March 22, 2010, we received a subpoena from the U.S. Attorney's Office for the District of Massachusetts seeking documents relating to the former Market Development Sales Organization that operated within our CRM business. We are cooperating with this request. Subsequently on October 21, 2011, the U.S. District Court unsealed a qui tam complaint that relates to the subject matter of the U.S. Attorney's investigation. The federal government has not intervened in that complaint and we have not yet been served with process in the matter.

Other Proceedings

On September 28, 2011, we filed a complaint against Mirowski Family Ventures LLC for a declaratory judgment that we have paid all royalties owed and did not breach any contractual or fiduciary obligations arising out of a license agreement. Mirowski answered and filed counterclaims requesting damages.

In December 2010 and September 2011, we received Notices of Deficiency from the IRS assessing additional taxes for Guidant Corporation 2001 - 2003 tax years and for Boston Scientific 2006-2007 tax years, respectively, primarily for transfer pricing adjustments. We have filed and intend to timely file petitions with the U.S. Tax Court contesting Guidant Corporation and Boston Scientific assessments, respectively. Refer to Note J - Income Taxes for more information.

Matters Concluded Since December 31, 2010

On November 2, 2005, the Attorney General of the State of New York filed a civil complaint against Guidant pursuant to the consumer protection provisions of New York's Executive Law, alleging that Guidant concealed from physicians and patients a design flaw in its VENTAK PRIZM® 2 1861 defibrillator from approximately February 2002 until May 23 2005 and by Guidant's concealment of this information, it engaged in repeated and persistent fraudulent conduct in violation of the law. The New York Attorney General sought permanent injunctive relief, restitution for patients in whom a VENTAK PRIZM® 2 1861 defibrillator manufactured before April 2002 was implanted, disgorgement of profits, and all other proper relief. The case was removed from New York State Court in 2005 and transferred to the MDL Court in the U.S. District Court for the District of Minnesota in 2006. On April 26, 2010, the MDL Court certified an order remanding the remaining cases to the trial courts. On or about May 7, 2010, the New York Attorney General's lawsuit was remanded to the U.S. District Court for the Southern District of New York. In

December 2010, Guidant and the New York Attorney General reached an agreement in principle to resolve this matter. Under the terms of the settlement Guidant agreed to pay less than \$1 million and to continue in effect certain patient safety, product communication and other administrative procedure terms of the multistate settlement reached with other state Attorneys General in 2007. On January 6, 2011, the District Court entered a consent order and judgment concluding the matter.

In October 2005, Guidant received an administrative subpoena from the DOJ, acting through the U.S. Attorney's office in Minneapolis, issued under the Health Insurance Portability & Accountability Act of 1996 (HIPAA). The subpoena requested documents relating to alleged violations of the Food, Drug, and Cosmetic Act occurring prior to our acquisition of Guidant involving Guidant's VENTAK PRIZM® 2, CONTAK RENEWAL® and CONTAK RENEWAL 2 devices. Guidant cooperated with the request. On November 3, 2009, Guidant and the DOJ reached an agreement in principle to resolve the matters raised in the Minneapolis subpoena. Under the terms of the agreement, Guidant would plead to two misdemeanor charges related to failure to include information in reports to the FDA and we will pay approximately \$296 million in fines and forfeitures on behalf of Guidant. We recorded a charge of \$294 million in the third quarter of 2009 as a result of the agreement in principle, which represents the

Table of Contents

\$296 million charge associated with the agreement, net of a \$2 million reversal of a related accrual. On February 24, 2010, Guidant entered into a plea agreement and sentencing stipulations with the Minnesota U.S. Attorney and the Office of Consumer Litigation of the DOJ documenting the agreement in principle. On April 5, 2010, Guidant formally pled guilty to the two misdemeanor charges. On April 27, 2010, the District Court declined to accept the plea agreement between Guidant and the DOJ. On January 12, 2011, following a review of the case by the U.S. Probation office for the District of Minnesota, the District Court accepted Guidant's plea agreement with the DOJ resolving this matter. The Court placed Guidant on probation for three years, with annual reviews to determine if early discharge from probation will be ordered. During the probationary period, Guidant will provide the probation office with certain reports on its operations. In addition, we voluntarily committed to contribute a total of \$15 million to our Close the Gap and Science, Technology, Engineering and Math (STEM) education programs over the next three years.

On July 14, 2008, we received a subpoena from the Attorney General for the State of New Hampshire requesting information in connection with our refusal to sell medical devices or equipment intended to be used in the administration of spinal cord stimulation trials to practitioners other than practicing medical doctors. We have responded to the New Hampshire Attorney General's request. In February 2011, we were informed that the investigation has been closed.

In August 2009, we received shareholder letters demanding that our Board of Directors take action against certain directors and executive officers as a result of the alleged off-label promotion of surgical cardiac ablation system devices to treat atrial fibrillation. On March 19, 2010, the same shareholders filed purported derivative lawsuits in the Massachusetts Superior Court of Middlesex County against the same directors and executive officers named in the demand letters, alleging breach of fiduciary duty in connection with the alleged off-label promotion of surgical cardiac ablation system devices and seeking unspecified damages, costs, and equitable relief. The parties agreed to defer action on these suits until after the Board of Director's determination whether to pursue the matter. On July 26, 2010, the Board determined to reject the shareholders' demand. In October 2010, we and those of our present officers and directors who were named as defendants in these actions moved to dismiss the lawsuits. On December 16, 2010, the Massachusetts Superior Court granted the motion to dismiss and issued a final judgment dismissing all three cases with prejudice. The plaintiffs did not appeal and the time for appeal expired.

From time to time, Guidant has responded to and settled various product liability suits relating to the ANCURE Endograft System for the treatment of abdominal aortic aneurysms. The plaintiffs in these suits generally allege that they or their relatives suffered injuries, and in certain cases died, as a result of purported defects in the ANCURE System or the accompanying warning and labeling. Guidant has settled these individual suits for amounts that were not material to us. In 2009, the California state court dismissed four suits on summary judgment. All four dismissals have been upheld by the California Court of Appeals. On December 12, 2010, the U.S. Supreme Court declined to review the dismissals in two cases, and further review in the other two cases was not sought by the plaintiffs. There are currently no pending suits although Guidant has been notified of over 130 potential unfiled claims alleging product liability relating to the ANCURE System. The claimants generally make similar allegations to those asserted in the filed cases discussed above. It is uncertain how many of these claims will ultimately be pursued against Guidant.

On December 17, 2007, Medtronic, Inc. filed a declaratory judgment action in the U.S. District Court for the District of Delaware against us, Guidant Corporation, and Mirowski Family Ventures L.L.C., challenging its obligation to pay royalties to Mirowski on certain cardiac resynchronization therapy devices by alleging non-infringement and invalidity of certain claims of two patents owned by Mirowski and exclusively licensed to Guidant and sublicensed to Medtronic. On November 21, 2008, Medtronic filed an amended complaint adding unenforceability of the patents. A trial was held in January 2010 and on March 30, 2011, judgment was rendered in favor of Medtronic as to non-infringement. We do not intend to appeal.

On March 22, 2010, we received a subpoena from the U.S. Attorney's Office for the District of Massachusetts seeking documents relating to our March 15, 2010 announcement regarding the ship hold and product removal actions associated with our ICD and CRT-D systems, and relating to earlier recalls of our ICD and CRT-D devices. On April 12, 2011, the U.S. Attorney's Office advised the Company that it was discontinuing its criminal investigation of this matter.

On April 14, 2010, we received a letter from the United Union of Roofers, Waterproofers and Allied Workers Local Union No. 8 (Local 8) demanding that our Board of Directors seek to remedy any legal violations committed by current and former officers and directors during the period beginning April 20, 2009 and continuing through March 12, 2010. The letter alleges that our officers and directors caused us to issue false and misleading statements and failed to disclose material adverse information regarding serious issues with our CRM business. The matter was referred to a special committee of the Board to investigate and then make a recommendation to the full Board. On May 9, 2011, our Board resolved to reject the shareholders' demand.

On December 16, 2010, Kilts Resources LLC filed a qui tam suit against us in the U.S. District Court for the Eastern District of Texas alleging that we marked and distributed our Glidewire product with an expired patent in violation of the false marking statute and seeking monetary damages. On June 17, 2011, the parties entered into a confidential Settlement Agreement.

Table of Contents

On July 1, 2008, Guidant Sales Corporation received a subpoena from the Maryland office of the U.S. Department of Health and Human Services, Office of Inspector General seeking information concerning payments to physicians, primarily related to the training of sales representatives. The U.S. Attorney's Office for the District of Maryland conducted the investigation. On June 28, 2011, the U.S. Attorney's Office advised us that it was no longer investigating our sales training practices.

On August 24, 2010, EVM Systems, LLC filed suit against us, Cordis Corporation, Abbott Laboratories Inc. and Abbott Vascular, Inc. in the U.S. District Court for the Eastern District of Texas alleging that our vena cava filters, including the Escape Nitinol Stone Retrieval Device, infringe two patents (the Sachdeva patents) and seeking monetary damages. On November 15, 2010, we answered the complaint denying the allegations and asserting counterclaims of non-infringement and invalidity. On April 20, 2011, EVM amended the complaint to add an additional Sachdeva patent and the WATCHMAN[®] device, which we acquired with Atritech in March 2011. On July 11, 2011, the parties entered into a confidential Settlement Agreement.

NOTE L – EARNINGS PER SHARE

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Weighted average shares outstanding - basic	1,514.4	1,519.8	1,523.1	1,517.0
Net effect of common stock equivalents	9.6	9.5	8.9	
Weighted average shares outstanding - assuming dilution	1,524.0	1,529.3	1,532.0	1,517.0

Our weighted-average shares outstanding for earnings per share calculations excluded common stock equivalents of 9.2 million for the first nine months of 2010 due to our net loss position in that period.

Weighted-average shares outstanding, assuming dilution, also excludes the impact of 65 million stock options for the third quarter of 2011, 62 million for the third quarter of 2010, 63 million for the first nine months of 2011, and 62 million for the first nine months of 2010, due to the exercise prices of these stock options being greater than the average fair market value of our common stock during the period.

We issued approximately two million shares of our common stock in the third quarter of 2011, three million shares in the third quarter of 2010, ten million shares in the first nine months of 2011, and nine million shares in the first nine months of 2010, following the exercise or vesting of underlying stock options or deferred stock units, or purchase under our employee stock purchase plans. During the third quarter of 2011, we repurchased 30 million shares of our common stock for approximately \$192 million, pursuant to the recently authorized share repurchase programs, discussed below.

In May 2011, our Board of Directors and shareholders approved our 2011 Long-Term Incentive Plan (the 2011 LTIP), authorizing up to approximately 145 million shares of our common stock. The 2011 LTIP provides for the grant of restricted or unrestricted common stock, deferred stock units, options to acquire our common stock, stock appreciation rights, performance awards and other stock and non-stock awards. No further grants will be made under our 2003 Long-Term Incentive Plan. In addition, in July 2011, our Board of Directors approved a new share repurchase program authorizing the repurchase of up to \$1.0 billion in shares of our common stock and re-approved approximately 37 million shares remaining under a previous share repurchase program. Any repurchased shares may be used for general corporate purposes.

NOTE M – SEGMENT REPORTING

Each of our reportable segments generates revenues from the sale of medical devices. As of September 30, 2011 and December 31, 2010, we had four reportable segments based on geographic regions: the United States; EMEA, consisting of Europe, the Middle East and Africa; Japan; and Inter-Continental, consisting of our Asia Pacific and the Americas operating segments, which include the emerging markets of Brazil, China and India. The reportable segments represent an aggregate of all operating divisions within each segment. We measure and evaluate our reportable segments based on segment net sales and operating income. We exclude from segment operating income

certain corporate and manufacturing-related expenses, as our corporate and manufacturing functions do not meet the definition of a segment, as defined by ASC Topic 280, Segment Reporting. In addition, certain transactions or adjustments that our Chief Operating Decision Maker considers to be non-recurring and/or non-operational, such as amounts related to goodwill and other intangible asset impairment charges; acquisition-, divestiture-, and restructuring-related charges and credits; as well as amortization expense, are excluded from segment operating income. Although we exclude these amounts from segment operating income, they are included in reported consolidated operating income (loss) and are included in the reconciliation below.

Table of Contents

We manage our international operating segments on a constant currency basis. Sales generated from reportable segments and divested businesses, as well as operating results of reportable segments and expenses from manufacturing operations, are based on internally-derived standard currency exchange rates, which may differ from year to year, and do not include intersegment profits. We have restated the segment information for 2010 net sales and operating results based on standard currency exchange rates used for 2011 in order to remove the impact of currency fluctuations. Because of the interdependence of the reportable segments, the operating profit as presented may not be representative of the geographic distribution that would occur if the segments were not interdependent. A reconciliation of the totals reported for the reportable segments to the applicable line items in our accompanying unaudited condensed consolidated statements of operations is as follows:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30, 2011	2010	September 30, 2011	2010
Net sales				
United States	\$990	\$1,077	\$3,054	\$3,159

NOTE N – NEW ACCOUNTING PRONOUNCEMENTS

Standards Implemented

ASC Update No. 2009-13

In October 2009, the FASB issued ASC Update No. 2009-13, Revenue Recognition (Topic 605) - Multiple-Deliverable Revenue Arrangements. Update No. 2009-13 provides principles and application guidance to determine whether multiple deliverables exist, how the individual deliverables should be separated and how to allocate the revenue in the arrangement among those separate deliverables. We adopted prospectively Update No. 2009-13 as of January 1, 2011. The adoption did not have a material impact on our results of operations or financial position for the three or nine months ended September 30, 2011 and is not expected to have a material impact in subsequent periods.

ASC Update No. 2010-20

In July 2010, the FASB issued ASC Update No. 2010-20, Receivables (Topic 310) - Disclosures about the Credit Quality of

35

Table of Contents

Financing Receivables and the Allowance for Credit Losses. Update No. 2010-20 requires expanded qualitative and quantitative disclosures about financing receivables, including trade accounts receivable, with respect to credit quality and credit losses, including a rollforward of the allowance for credit losses. We adopted Update No. 2010-20 for our year ended December 31, 2010, except for the rollforward of the allowance for credit losses, for which we included disclosure beginning in our first quarter ended March 31, 2011. Refer to Note A – Significant Accounting Policies to the consolidated financial statements included in our 2010 Annual Report filed on Form 10-K for disclosures surrounding concentrations of credit risk and our policies with respect to the monitoring of the credit quality of customer accounts. In addition, refer to Note H – Supplemental Balance Sheet Information for a rollforward of our allowance for doubtful accounts during the three and nine months ended September 30, 2011 and 2010.

ASC Update No. 2010-29

In December 2010, the FASB issued ASC Update No. 2010-29, Business Combinations (Topic 805) - Disclosure of Supplementary Pro Forma Information for Business Combinations. Update No. 2010-29 clarifies paragraph 805-10-50-2(h) to require public entities that enter into business combinations that are material on an individual or aggregate basis to disclose pro forma information for such business combinations that occurred in the current reporting period, including pro forma revenue and earnings of the combined entity as though the acquisition date had been as of the beginning of the comparable prior annual reporting period only. We were required to adopt Update No. 2010-29 for material business combinations for which the acquisition date is on or after January 1, 2011. The acquisitions we completed in the first nine months of 2011 are not considered material on an individual or aggregate basis and, therefore, are not subject to the disclosure requirements of Update No. 2010-29.

Standards to be Implemented

ASC Update No. 2011-04

In May 2011, the FASB issued ASC Update No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. Update No. 2011-04 clarifies the FASB's intent about the application of certain existing fair value measurement and disclosure requirements and changes certain principles or requirements for measuring or disclosing information about fair value. We are required to adopt Update No. 2011-04 for our first quarter ending March 31, 2012 and do not believe its adoption will have a significant impact on our future results of operations or financial position.

ASC Update No. 2011-05

In May 2011, the FASB issued ASC Update No. 2011-05, Comprehensive Income (Topic 820): Presentation of Comprehensive Income. Update No. 2011-05 requires that net income, items of other comprehensive income and total comprehensive income be presented in one continuous statement or two separate consecutive statements. The amendments in this Update also require that reclassifications from other comprehensive income to net income be presented on the face of the financial statements. We are required to adopt Update No. 2011-05 for our first quarter ending March 31, 2012, with the exception of the presentation of reclassifications on the face of the financial statements, which has been deferred by the FASB until further notice. Our adoption of Update No. 2011-05 will not impact our future results of operations or financial position.

ASC Update No. 2011-08

In September 2011, the FASB issued ASC Update No. 2011-08, Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment. Update No. 2011-08 permits an entity to first assess qualitative factors to determine whether it is "more likely than not" that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The "more likely than not" threshold is defined as having a likelihood of more than 50 percent. We are required to adopt Update No. 2011-08 for annual and interim goodwill impairment tests after December 15, 2011 and do not believe its adoption will have a significant impact on our future results of operations or financial position.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Boston Scientific Corporation is a worldwide developer, manufacturer and marketer of medical devices that are used in a broad range of interventional medical specialties. Our mission is to improve the quality of patient care and the productivity of health care delivery through the development and advocacy of less-invasive medical devices and procedures. This is accomplished through the continuing refinement of existing products and procedures and the investigation and development of new technologies that are least- or less-invasive, reducing risk, trauma, procedure time and the need for aftercare; cost- and comparatively-effective and, where possible, reduce or eliminate refractory drug use. Our strategy is to lead global markets for less-invasive medical devices by developing and marketing innovative products, services and therapies that address unmet patient needs, provide superior clinical outcomes and demonstrate proven economic value. We intend to do so by building and buying products we understand, and selling them through sales forces we already have.

Financial Summary

Three Months Ended September 30, 2011

Our net sales for the third quarter of 2011 were \$1.874 billion, as compared to net sales of \$1.916 billion for the third quarter of 2010, a decrease of \$42 million, or two percent. Excluding the impact of changes in foreign currency exchange rates, which contributed \$66 million to our third quarter 2011 net sales as compared to the same period in the prior year, and net sales from divested businesses, our net sales decreased \$63 million, or three percent. Declines in constant currency net sales from our Cardiac Rhythm Management (CRM) division of \$65 million and our Interventional Cardiology division of \$25 million were partially offset by increases in constant currency Endoscopy net sales of \$16 million, Neuromodulation net sales of \$5 million and Peripheral Interventions net sales of \$7 million, as compared to the same period in the prior year.¹ Refer to Business and Market Overview for a discussion of our net sales by business.

Our reported net income for the third quarter of 2011 was \$142 million, or \$0.09 per share. Our reported results for the third quarter of 2011 included intangible asset impairment charges, acquisition-related charges, divestiture-related net credits, restructuring-related costs, discrete tax items and amortization expense (after-tax) totaling \$81 million, or \$0.06 per share. Excluding these items, net income for the third quarter of 2011 was \$223 million, or \$0.15 per share. Our reported net income for the third quarter of 2010 was \$190 million, or \$0.12 per diluted share. Our reported results for the third quarter of 2010 included intangible asset impairment charges, restructuring-related costs, discrete tax items and amortization expense (after-tax) totaling \$106 million, or \$0.07 per share. Excluding these items, net income for the third quarter of 2010 was \$296 million, or \$0.19 per share.¹ The following is a reconciliation of results of operations prepared in accordance with U.S. GAAP to those adjusted results considered by management. Refer to Quarterly Results for a discussion of each reconciling item:

¹ Sales growth rates that exclude the impact of changes in foreign currency exchange rates and net income and net income per share excluding certain items required by GAAP are not prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP). Refer to Additional Information for a discussion of management's use of these non-GAAP financial measures.

charges, acquisition- and divestiture-related net credits, restructuring-related costs, discrete tax items and amortization expense for total net charges (after-tax) totaling \$488 million, or \$0.32 per share. Excluding these items, our net income for the first nine months of 2011 was \$822 million, or \$0.54 per share. Our reported net loss for the first nine months of 2010 was \$1.301 billion, or \$0.86 per share. Our reported results for the first nine months of 2010 included non-deductible goodwill impairment net charges, other intangible asset impairment charges, acquisition-related credits, restructuring and restructuring-related costs and amortization expense for total net charges (after-tax) totaling \$2.038 billion, or \$1.34 per share. Excluding these items, net income for the first nine months

Table of Contents

of 2010 was \$737 million, or \$0.48 per share. The following is a reconciliation of results of operations prepared in accordance with U.S. GAAP to those adjusted results considered by management. Refer to Quarterly Results for a discussion of each reconciling item:

in millions, except per share data	Nine Months Ended September 30, 2011			
	Pre-Tax	Tax Impact	After-Tax	Impact per share
GAAP net income	\$542	\$(208)) \$334	\$0.22
Non-GAAP adjustments:				
Goodwill impairment charge	697		697	0.45
Intangible asset impairment charge	21	(5)) 16	0.01
Acquisition-related net credits	(15)) (2)) (17)	(0.01)
Divestiture-related net credits	(764)) 231	(533)	(0.35)
Restructuring-related charges	109	(34)) 75	0.05
Discrete tax items		(21)) (21)	(0.01)
Amortization expense	325	(54)) 271	0.18
Adjusted net income	\$915	\$(93)) \$822	\$0.54

in millions, except per share data	Nine Months Ended September 30, 2010			
	Pre-Tax	Tax Impact	After-Tax	Impact per share
GAAP net loss	\$(1,292)) \$(9)) \$(1,301)	\$(0.86)
Non-GAAP adjustments:				
Goodwill impairment charge	1,817		1,817	1.20
Intangible asset impairment charges	65	(10)) 55	0.03
Acquisition-related credit	(250)) 34	(216)	(0.14)
Restructuring-related charges	139	(40)) 99	0.06
Discrete tax items		(21)) (21)	(0.01)
Amortization expense	381	(77)) 304	0.20
Adjusted net income	\$860	\$(123)) \$737	\$0.48

* Assumes dilution of 9.2 million shares for the nine months ended September 30, 2010 for all or a portion of these non-GAAP adjustments, due to our net loss position for that period.

Business and Market Overview

Coronary Stent Systems

We are the only company in the industry to offer a two-drug platform strategy, which we believe has enabled us to increase our leadership position in the drug-eluting stent market. We market our TAXUS® paclitaxel-eluting stent line, including our third-generation TAXUS® Element™ stent system, launched in our Europe/Middle East/Africa (EMEA) region and certain Inter-Continental countries during the second quarter of 2010, in the U.S. (commercialized as ION™) during the second quarter of 2011 and in Japan in October 2011. We also offer our everolimus-eluting stent line, consisting of the PROMUS® stent system, currently supplied to us by Abbott Laboratories in the U.S. and Japan, and our next-generation internally-developed and self-manufactured PROMUS® Element™ stent system, currently marketed in our EMEA region and certain Inter-Continental countries, including China beginning in the fourth quarter of 2011. Our Element™ stent platform incorporates a unique platinum chromium alloy designed to offer greater radial strength and flexibility than older alloys, enhanced visibility and reduced recoil. The innovative stent design improves deliverability and allows for more consistent lesion coverage and drug distribution. These product offerings demonstrate our commitment to drug-eluting stent market leadership and continued innovation. We expect to launch our PROMUS® Element™ stent system in the U.S. and Japan by mid-2012.

Our coronary stent system offerings also include the VeriFLEX™ (Liberté®) bare-metal coronary stent system and our third-generation OMEGA™ platinum chromium bare-metal coronary stent system. In the first quarter of 2011, we launched in our

Table of Contents

EMEA region and certain Inter-Continental countries our OMEGA™ stent system, which is based on our Element™ platform and designed to enhance deliverability, visibility and conformability, while offering greater radial strength and reducing stent recoil.

Net sales of our coronary stent systems, including bare-metal stent systems, of \$402 million represented approximately 21 percent of our consolidated net sales in the third quarter of 2011. Worldwide net sales of these products increased \$6 million, or two percent, in the third quarter of 2011, as compared to the third quarter of 2010. Excluding the impact of changes in foreign currency exchange rates, which contributed \$14 million to our coronary stent system net sales in the third quarter of 2011, as compared to the same period in the prior year, net sales of these products decreased \$8 million, or two percent. Despite continued competition and pricing pressures, we maintained our leadership position during the third quarter of 2011 with an estimated 36 percent share of the worldwide drug-eluting stent market. During the second quarter of 2011, one of our competitors announced plans to exit the drug-eluting stent market by the end of 2011. Although the full impact on the market remains uncertain, we believe this presents an opportunity for us to expand our presence in the worldwide drug-eluting stent market and the broader cardiovascular market.

The following are the components of our worldwide coronary stent system sales:

(in millions)	Three Months Ended			Three Months Ended		
	September 30, 2011			September 30, 2010		
	U.S.	International	Total	U.S.	International	Total
TAXUS®	\$84	\$29	\$113	\$68	\$43	\$111
PROMUS®	107	45	152	131	64	195
PROMUS® Element™		110	110		59	59
Drug-eluting	191	184	375	199	166	365
Bare-metal	7	20	27	11	20	31
	\$198	\$204	\$402	\$210	\$186	\$396

Our U.S. net sales of drug-eluting stent systems decreased \$8 million, or four percent, in the third quarter of 2011, as compared to the third quarter of 2010. The impact of an overall decrease in the size of this market, resulting principally from lower average selling prices driven by competitive and other pricing pressures, lower procedural volumes and lower penetration rates, was partially offset by an increase in our share of the U.S. drug-eluting stent market due largely to the launch of our third-generation TAXUS® Element™ stent system in the U.S. (commercialized as ION™) in the second quarter of 2011. We estimate that the average selling price of drug-eluting stent systems in the U.S. decreased approximately seven percent in the third quarter of 2011, as compared to the third quarter of 2010 and estimate that the number of percutaneous coronary intervention procedures performed decreased three percent in the third quarter of 2011, as compared to the third quarter of 2010. We believe that average drug-eluting stent penetration rates (a measure of the mix between bare-metal and drug-eluting stents used across procedures) in the U.S. were 77 percent during the third quarter of 2011, slightly lower than the average of 78 percent during the third quarter of 2010. In addition, we believe our share of the U.S. drug-eluting stent market approximated 49 percent in the third quarter of 2011, as compared to 45 percent in the third quarter of 2010. We believe that our TAXUS® Element™ stent system, based on Element™ platinum chromium stent platform, combined with our two-drug platform strategy and broad range of stent sizes, provides a competitive advantage that has allowed us to expand our leadership position in the U.S. drug-eluting stent market.

Our international drug-eluting stent system net sales increased \$18 million, or 11 percent, in the third quarter of 2011, as compared to the third quarter of 2010. Excluding the impact of changes in foreign currency exchange rates, which contributed \$12 million to our international drug-eluting stent system net sales for the three months ended September 30, 2011, as compared to the same period in the prior year, net sales of our drug-eluting stent systems increased \$6 million, or four percent. Our net sales of drug-eluting stent systems in our Inter-Continental region increased \$6 million, or 12 percent, on a constant currency basis, in the third quarter of 2011, as compared to the third quarter of 2010, driven by the launch and acceptance of our PROMUS® Element™ drug-eluting stent system in key emerging markets, such as Brazil and India. Our net sales of drug-eluting stent systems in our EMEA region increased \$5 million, or seven percent in the third quarter of 2011, as compared to the third quarter of 2010, due primarily to an

increase in procedural volumes, which was partially offset by declines in average selling prices. Net sales of our drug-eluting stent systems in Japan decreased \$5 million, or 10 percent, on a constant currency basis, in the third quarter of 2011, as compared to the third quarter of 2010, driven primarily by a loss of market share due to competitive launches.

We market the PROMUS® everolimus-eluting coronary stent system, a private-labeled XIENCE V® stent system supplied to us by Abbott Laboratories, in the U.S. and Japan. As of the closing of Abbott's 2006 acquisition of Guidant Corporation's vascular intervention and endovascular solutions businesses, we obtained a perpetual license to the intellectual property used in Guidant's drug-eluting stent system program purchased by Abbott. Under the terms of our supply arrangement with Abbott, the gross profit and operating profit margin of everolimus-eluting stent systems supplied to us by Abbott, including any improvements or iterations

Table of Contents

approved for sale during the term of the applicable supply arrangements and of the type that could be approved by a supplement to an approved FDA pre-market approval, is significantly lower than that of our TAXUS®, TAXUS® Element™ (ION™) and PROMUS® Element™ stent systems. Therefore, if sales of everolimus-eluting stent systems supplied to us by Abbott increase in relation to our total drug-eluting stent system sales, our profit margins will decrease. Our internally-developed and self-manufactured PROMUS® Element™ everolimus-eluting stent system, marketed in our EMEA region and certain Inter-Continental countries, generates gross profit margins that are significantly more favorable than the PROMUS® stent system and has begun to positively impact our gross profit margins. Refer to our Gross Profit discussion for more information on the impact this sales mix has had on our gross profit margins.

Further, the price we pay for our supply of everolimus-eluting stent systems from Abbott is determined by contracts with Abbott and is based, in part, on previously fixed estimates of Abbott's manufacturing costs for everolimus-eluting stent systems and third-party reports of our average selling price of these stent systems. Amounts paid pursuant to this pricing arrangement are subject to a retroactive adjustment approximately every two years based on Abbott's actual costs to manufacture these stent systems for us and our average selling price of everolimus-eluting stent systems supplied to us by Abbott. During the first quarter of 2011, we recorded a \$50 million credit to cost of products sold related to this retroactive adjustment process. As a result, our gross profit margin for the nine months ended September 30, 2011 was positively impacted. Refer to Gross Profit for more information.

We are currently reliant on Abbott for our supply of everolimus-eluting stent systems in the U.S. and Japan. Our supply agreement with Abbott for everolimus-eluting stent systems in the U.S. and Japan extends through June 30, 2012. At present, we believe that our supply of everolimus-eluting stent systems from Abbott will be sufficient to meet our customer demand. However, any production or capacity issues that affect Abbott's manufacturing capabilities or our process for forecasting, ordering and receiving shipments may impact the ability to increase or decrease our level of supply in a timely manner; therefore, our supply of everolimus-eluting stent systems supplied to us by Abbott may not align with customer demand, which could have an adverse effect on our operating results.

In addition, any changes in anticipated timing of regulatory approval or launch of our internally-developed and self-manufactured PROMUS® Element™ everolimus-eluting stent system, currently expected in the U.S. and Japan by mid-2012, could result in an inability to meet our customer demand for everolimus-eluting stent systems or future inventory charges.

Historically, the worldwide coronary stent market has been dynamic and highly competitive with significant market share volatility. In addition, in the ordinary course of our business, we conduct and participate in numerous clinical trials with a variety of study designs, patient populations and trial end points. Unfavorable or inconsistent clinical data from existing or future clinical trials conducted by us, our competitors or third parties, or the market's perception of these clinical data, may adversely impact our position in, and share of, the drug-eluting stent market and may contribute to increased volatility in the market.

We believe that we can sustain our leadership position within the worldwide drug-eluting stent market in the foreseeable future for a variety of reasons, including:

- our two-drug platform strategy, including specialty stent sizes;
- the broad and consistent long-term results of our TAXUS® clinical trials, and the favorable results of XIENCE V®/PROMUS®, PROMUS® Element™ and TAXUS® Element™ (ION™) stent system clinical trials to date;
- the performance benefits of our current and future technology;
- the strength of our pipeline of drug-eluting stent products, including our PROMUS® Element™ stent systems expected to be launched in the U.S. and Japan by mid-2012;
- our overall position in the worldwide interventional medicine market and our experienced interventional cardiology sales force; and
- the strength of our clinical, selling, marketing and manufacturing capabilities.

However, a decline in net sales from our drug-eluting stent systems could have a significant adverse impact on our operating results and operating cash flows. The most significant variables that may impact the size of the drug-eluting stent market and our position within this market include, but are not limited to:

-

the impact of competitive pricing pressure on average selling prices of drug-eluting stent systems available in the market;

- the impact and outcomes of on-going and future clinical results involving our or our competitors' products, including those trials sponsored by our competitors, or perceived product performance of our or our competitors' products;
- physician and patient confidence in our current and next-generation technology;

Table of Contents

our ability to timely and successfully launch next-generation products and technology features, including the PROMUS® Element™ stent system in the U.S. and Japan;

- changes in drug-eluting stent penetration rates, the overall number of percutaneous coronary intervention procedures performed and the average number of stents used per procedure;
- delayed or limited regulatory approvals and unfavorable reimbursement policies;
- new product launches by our competitors; and
- the outcome of intellectual property litigation.

During 2009, 2010 and the first nine months of 2011, we successfully negotiated closure of several long-standing legal matters; however, there continues to be significant intellectual property litigation particularly in the coronary stent market. In particular, although we have resolved multiple litigation matters with Johnson & Johnson, we continue to be involved in patent litigation with them, primarily relating to drug-eluting stent systems. Adverse outcomes in one or more of these matters could have a material adverse effect on our ability to sell certain products and on our operating margins, financial position, results of operations and/or liquidity.

Interventional Cardiology (excluding coronary stent systems)

In addition to coronary stent systems, our Interventional Cardiology business markets balloon catheters, rotational atherectomy systems, guide wires, guide catheters, embolic protection devices, and diagnostic catheters used in percutaneous transluminal coronary angioplasty (PTCA) procedures, as well as intravascular ultrasound (IVUS) imaging systems. Our worldwide net sales of these products were \$211 million in the third quarter of 2011, as compared to \$218 million in the third quarter of 2010, a decrease of \$7 million, or three percent. Our U.S. net sales were \$82 million in the third quarter of 2011, as compared to \$96 million in the third quarter of 2010. Our international net sales of these products were \$129 million in the third quarter of 2011, as compared to \$122 million in the third quarter of 2010, and included a \$10 million favorable impact from changes in foreign currency exchange rates for the three months ended September 30, 2011, as compared to the same period in the prior year. Excluding the impact of changes in foreign currency exchange rates, Interventional Cardiology (excluding coronary stent systems) net sales decreased \$17 million, or seven percent, as compared to the same period in the prior year. This decrease was primarily the result of competitive pricing pressures, market-wide reductions in procedural volumes and market share declines in our IVUS business. We continue to hold a strong leadership position in the PTCA balloon catheter market, with an estimated 52 percent average share of the U.S. market and 29 percent of the worldwide market for the third quarter of 2011. In June 2010, we launched the NC Quantum Apex™ post-dilatation balloon catheter, developed specifically to address physicians' needs in optimizing coronary stent deployment, which has been received positively in the market and, in the second half of 2010, also launched our Apex™ pre-dilatation balloon catheter with platinum marker bands for improved radiopacity.

As part of our strategic plan, we are investigating opportunities to further expand our presence in, and diversify into, other areas and disease states, including structural heart therapy. In January 2011, we completed the acquisition of Sadra Medical, Inc. Sadra is developing a repositionable and retrievable device for percutaneous aortic valve replacement (PAVR) to treat patients with severe aortic stenosis and completed a series of European feasibility studies for its Lotus™ Valve System, which consists of a stent-mounted tissue valve prosthesis and catheter delivery system for guidance and placement of the valve. The low-profile delivery system and introducer sheath are designed to enable accurate positioning, repositioning and retrieval at any time prior to release of the aortic valve implant. PAVR is one of the fastest growing medical device markets.

Cardiac Rhythm Management

Our Cardiac Rhythm Management (CRM) division develops, manufactures and markets a variety of implantable devices including implantable cardioverter defibrillator (ICD) systems and pacemaker systems that monitor the heart and deliver electricity to treat cardiac abnormalities. Our product offerings include our COGNIS® cardiac resynchronization therapy defibrillator (CRT-D) and TELIGEN® ICD systems and our next-generation INCEPTA™, ENERGEN™, and PUNCTUA™ defibrillator systems, which are among the world's smallest and thinnest high-energy devices and deliver excellent longevity. Worldwide net sales of our CRM products of \$503 million represented approximately 27 percent of our consolidated net sales for the third quarter of 2011. Our worldwide CRM net sales decreased \$47 million, or nine percent, in the third quarter of 2011, as compared to the third quarter of 2010.

Excluding the impact of changes in foreign currency exchange rates, which contributed \$18 million to our third quarter 2011 CRM net sales as compared to the same period in the prior year, our CRM net sales decreased \$65 million, or 12 percent.

The following are the components of our worldwide CRM net sales:

Table of Contents

(in millions)	Three Months Ended			Three Months Ended		
	September 30, 2011			September 30, 2010		
	U.S.	International	Total	U.S.	International	Total
ICD systems	\$225	\$135	\$360	\$280	\$126	\$406
Pacemaker systems	71	72	143	82	62	144
CRM products	\$296	\$207	\$503	\$362	\$188	\$550

Our U.S. CRM net sales decreased \$66 million, or 18 percent, in the third quarter of 2011 as compared to the third quarter of 2010. The reduction in our CRM net sales during the third quarter of 2011 reflects the impact of a contraction in the U.S. ICD market during 2011 and a decrease in our share of the U.S. CRM market. We believe the U.S. ICD market contraction is due to a variety of factors, including physician reaction to study results published by the Journal of the American Medical Association regarding evidence-based guidelines for ICD implants, U.S. Department of Justice (DOJ) investigations into hospitals' ICD implant practices and the expansion of Medicare recovery audits, as well as on-going physician alignment to hospitals and competitive pricing pressures. We estimate that our share of the U.S. CRM market approximated 21 percent in the third quarter of 2011, as compared to 23 percent in the third quarter of 2010.

We are committed to advancing our technologies to strengthen our CRM business. We continue to execute on our product pipeline and expect to receive U.S. Food and Drug Administration (FDA) approval for our next-generation line of defibrillators, INCEPTA™, ENERGEN™ and PUNCTUA™, in the U.S. in late 2011 or early 2012, which include new features designed to improve functionality, diagnostic capability and ease of use. In addition, we expect to launch our next-generation INGENIO™ family of pacemaker systems in the first half of 2012 in the U.S. Our INGENIO™ family of pacemaker systems is built on the same platform as our existing high-voltage devices. This launch would represent our first new major pacemaker system technology introduction in many years and is expected to be the foundation for a series of low-voltage pacemaker launches.

Our international CRM net sales increased \$19 million, or 10 percent, in the third quarter of 2011, as compared to the third quarter of 2010. Excluding the impact of changes in foreign currency exchange rates, which contributed \$18 million to net sales for the three months ended September 30, 2011, as compared to the same period in the prior year, our international CRM net sales increased \$1 million, or less than one percent, as compared to the same period in the prior year. Our net sales of our CRM products increased \$5 million in Japan and \$2 million in our Inter-Continental region in the third quarter of 2011, on a constant currency basis, as compared to the third quarter of 2010. The increases in these regions were driven by growth in sales of our pacemaker systems; the contribution from a new distributor arrangement related to our CRM products in Japan; and the continued market acceptance of our COGNIS® CRT-D and TELIGEN® ICD systems, and our 4-SITE lead delivery system, which was launched in the fourth quarter of 2010. These increases were partially offset by constant currency decreases in net sales of \$6 million in our EMEA region, as compared to the same period in the prior year, due primarily to lower average selling prices, driven by competitive and other pricing pressures. We received CE Mark approval for our INCEPTA™, ENERGEN™ and PUNCTUA™ next-generation line of defibrillators in the second quarter of 2011 and we plan to launch our next-generation INGENIO™ family of pacemaker systems in our EMEA and certain Inter-Continental regions in the first half of 2012. We believe that these launches will help enhance our position within the worldwide CRM market. Net sales from our CRM products represent a significant source of our overall net sales. Therefore, increases or decreases in our CRM net sales could have a significant impact on our results of operations. The variables that may impact the size of the CRM market and/or our share of that market include, but are not limited to:

- the on-going impact of physician alignment to hospitals, government investigations and audits of hospitals, and other market and economic conditions on the overall number of procedures performed and average selling prices;
- our ability to retain and attract key members of our CRM sales force and other key CRM personnel;
- the ability of CRM manufacturers to maintain the trust and confidence of the implanting physician community, the referring physician community and prospective patients in CRM technologies;
- future product field actions or new physician advisories issued by us or our competitors;
- our ability to timely and successfully develop and launch next-generation products and technology worldwide, particularly in light of anticipated changes to current regulatory requirements within the industry;

- variations in clinical results, reliability or product performance of our and our competitors' products;
- delayed or limited regulatory approvals and unfavorable reimbursement policies; and
- new product launches by our competitors.

Endoscopy

43

Table of Contents

Our Endoscopy division develops and manufactures devices to treat a variety of medical conditions including diseases of the digestive and pulmonary systems. Our worldwide net sales of these products were \$298 million in the third quarter of 2011, as compared to \$269 million in the third quarter of 2010, an increase of \$29 million, or 11 percent, driven by products recently introduced. Our U.S. net sales of our Endoscopy products were \$141 million for the third quarter of 2011, as compared to \$136 million for the same period in the prior year. Our international net sales were \$157 million for the third quarter of 2011, as compared to \$133 million for the third quarter of 2010, and included a \$13 million favorable impact from changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, our worldwide Endoscopy net sales increased \$16 million, or six percent, in the third quarter of 2011, as compared to the third quarter of 2010. This increase was due primarily to higher net sales within our stent franchise, driven by our WallFlex® family of stents, in particular, the WallFlex® Biliary line, including the WallFlex® Biliary RX Fully Covered Stent, which received CE Mark for treatment of benign biliary strictures in the fourth quarter of 2010. Increases in our biliary device sales were also supported by growth in our Advanix™ Biliary Plastic Stent System and the Expect™ Endoscopic Ultrasound Aspiration Needle, which we launched in the U.S. and certain international markets in the second quarter of 2011. In addition, our hemostasis franchise net sales increased 16 percent due to increased adoption of our Resolution® Clip Device, an endoscopic mechanical clip designed to treat gastrointestinal bleeding.

As part of our strategic plan, we are investigating opportunities to further expand our presence in, and diversify into, other areas and disease states, including endoscopic pulmonary intervention. In October 2010, we completed our acquisition of Asthmatx, Inc. Asthmatx designs, manufactures and markets a less-invasive, catheter-based bronchial thermoplasty procedure for the treatment of severe persistent asthma. The Alair® Bronchial Thermoplasty System, developed by Asthmatx, has both CE Mark and FDA approval and is the first device-based asthma treatment approved by the FDA. We expect this technology to strengthen our existing offering of pulmonary devices and contribute to the mid- to long-term sales growth and diversification of the Endoscopy business.

Peripheral Interventions (PI)

Our PI product offerings include stents, balloon catheters, sheaths, wires and vena cava filters, which are used to diagnose and treat peripheral vascular disease, and we hold the number one position in the worldwide Peripheral Interventions market. Our worldwide net sales of these products were \$182 million in the third quarter of 2011, as compared to \$167 million in the third quarter of 2010, an increase of \$15 million, or nine percent. Our U.S. net sales of these products were \$77 million in the third quarter of 2011, as compared to \$79 million for the third quarter of 2010. Our international net sales were \$105 million in the third quarter of 2011, as compared to \$88 million for the third quarter of 2010, and included an \$8 million favorable impact of changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, our worldwide PI net sales increased \$7 million, or four percent in the third quarter of 2011, as compared to the third quarter of 2010, driven by growth in all three of our peripheral interventions product franchises. Growth in our PI stent systems was driven by the EPIC™ self-expanding nitinol stent system in certain international markets and the Carotid WALLSTENT® stent system in Japan. We currently expect to launch the EPIC™ stent system in the U.S. in late 2012 or early 2013. Our Core PI franchise experienced market share growth in the quarter driven primarily by the recent launch of our next-generation Mustang™ percutaneous transluminal angioplasty balloon and the third quarter 2011 worldwide launch of our Coyote™ balloon catheter, a highly deliverable and ultra-low profile balloon dilatation catheter designed for a wide range of peripheral angioplasty procedures. In addition, our interventional oncology franchise continued strong worldwide sales growth in the third quarter. Recently launched products including the Renegade® HI-FLO™ Fathom® microcatheter and guidewire system and Interlock™ - 35 Fibered IDC™ Occlusion System for peripheral embolization, continue to be well received by our customers. We expect to have a number of new PI products launching in the fourth quarter of 2011 and throughout 2012 that we believe will drive future growth in this business.

As part of our strategic plan, we are investigating opportunities to further expand our presence in, and diversify into, other areas and disease states. In February 2011, we announced the acquisitions of S.I. Therapies and ReVascular Therapeutics, Inc., which add to our PI portfolio a re-entry catheter and intraluminal chronic total occlusion (CTO) crossing device, enabling endovascular treatment in cases that typically cannot be treated with standard endovascular devices. We expect to launch our OFFROAD™ re-entry catheter system in certain international markets where we have

CE Mark approval in late 2011 or early 2012 and expect to begin a limited release of the TRUEPATH™ intraluminal CTO device in the U.S. and certain other international markets in late 2011 or early 2012, pending regulatory approval. We believe that offering these devices will enhance our position in assisting physicians in addressing the challenges of treating complex peripheral lesions.

Urology/Women's Health

Our Urology/Women's Health division develops and manufactures devices to treat various urological and gynecological disorders. Our worldwide net sales of these products were \$124 million in the third quarter of 2011, as compared to \$122 million in the third quarter of 2010, an increase of \$2 million, or two percent. Our U.S. net sales were \$91 million for the third quarter of 2011, as compared to \$92 million in the third quarter of 2010. Our international net sales were \$33 million in the third quarter of 2011, as compared to \$30 million for the same period in the prior year, and included a \$2 million favorable impact of changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, worldwide net sales of our Urology/

Table of Contents

Women's Health products remained flat in the third quarter of 2011, as compared to the third quarter of 2010. Our Urology business continued to experience positive growth due to the strength of our U.S. Core Stone Management business. The 2010 launch of our Accumax® and Flexiva™ Laser Fibers drove the net sales growth in our U.S. Core Stone business. Additionally, our Stone business experienced double-digit net sales growth in our Inter-Continental region in the third quarter of 2011, as compared to the third quarter of 2010.

Our Women's Health business was negatively impacted in the third quarter of 2011 by elective procedural softness and competitive product offerings. In addition, in July 2011, the FDA released a Public Health Notice update regarding complications related to the use of urogynecologic surgical mesh for pelvic organ prolapse and stress urinary incontinence. Partially offsetting these negative impacts were increased market share and sales of our Genesys Hydro ThermAblator® (HTA) system, a next-generation endometrial ablation system designed to ablate the endometrial lining of the uterus in premenopausal women with menorrhagia. The Genesys HTA System features a smaller and lighter console, simplified set-up requirements, and an enhanced graphic user interface and is designed to improve operating performance. We believe this product launch will help to build momentum for our Women's Health franchise.

Neuromodulation

Within our Neuromodulation business, we market the Precision® Plus™ Spinal Cord Stimulation (SCS) system, used for the management of chronic pain. Our worldwide net sales of Neuromodulation products increased to \$84 million for the third quarter of 2011, as compared to \$79 million for the third quarter of 2010, an increase of \$5 million, or six percent. Our U.S. net sales of Neuromodulation products were \$79 million for the third quarter of 2011, as compared to \$75 million in the same period in the prior year, and our international net sales of these products were \$5 million in the third quarter of 2011 and \$4 million in the third quarter of 2010. Foreign currency fluctuations did not materially impact our Neuromodulation net sales in the third quarter of 2011, as compared to the same period in the prior year. The increase in U.S. net sales was due primarily to higher procedural volumes and positive momentum from recent product launches, partially offset by the impact of competitive launches. In 2010, we received FDA approval and launched two lead splitters, as well as the Linear™ 3-4 and Linear™ 3-6 Percutaneous Leads for use with our SCS systems, offering a broader range of lead configurations and designed to provide physicians more treatment options for their chronic pain patients. In addition, in the second quarter of 2011, we received CE Mark approval and launched our Clik™ Anchor for our Precision® Plus™ SCS System, the world's first rechargeable SCS device for chronic pain management. We believe that we continue to have a technology advantage over our competitors with proprietary features such as Multiple Independent Current Control, which is intended to allow the physician to target specific areas of pain more precisely, and the broadest range of percutaneous lead configurations in the industry.

We are also involved in various studies designed to evaluate the use of spinal cord stimulation in the treatment of additional sources of pain. As a demonstration of our commitment to strengthening clinical evidence with spinal cord stimulation, we are conducting a trial to assess the therapeutic effectiveness and cost-effectiveness of spinal cord stimulation compared to reoperation in patients with failed back surgery syndrome. We believe that this trial could result in consideration of spinal cord stimulation much earlier in the continuum of care. Further, in late 2010, we initiated a European clinical trial for the treatment of Parkinson's disease using our Vercise™ deep-brain stimulation system.

As part of our strategic plan, we are investigating opportunities to further expand our presence in, and diversify into, other areas and disease states, including deep-brain stimulation. In January 2011, we completed the acquisition of Intellect Medical, Inc., a development-stage company developing advanced visualization and programming technologies that will be integrated with the Vercise™ system. We believe this acquisition leverages the core architecture of our Vercise™ platform and will advance our technology in the field of deep-brain stimulation.

Electrophysiology

We develop less-invasive medical technologies used in the diagnosis and treatment of rate and rhythm disorders of the heart. Our leading products include the Blazer™ line of ablation catheters, including our next-generation Blazer™ Prime ablation catheter, designed to deliver enhanced performance, responsiveness and durability. Worldwide net sales of our Electrophysiology products were \$36 million for the third quarters of 2011 and 2010. Our U.S. net sales of these products were \$26 million in the third quarter of 2011, as compared to \$27 million for the third quarter of 2010. Our

international net sales of these products were \$10 million in the third quarter of 2011, as compared to \$9 million for the third quarter of 2010. Excluding the impact of changes in foreign currency exchange rates, which contributed \$1 million to our worldwide Electrophysiology net sales, as compared to the same period in the prior year, worldwide Electrophysiology net sales decreased \$1 million, or two percent, in the third quarter of 2011, as compared to the third quarter of 2010. During the second quarter of 2011, we received CE Mark approval for and launched in select European countries our Blazer™ Open-Irrigated Catheter, our latest radiofrequency ablation catheter designed to treat a variety of arrhythmias. We believe that with this product launch, the increasing adoption of our Blazer™ Prime ablation catheter

Table of Contents

technology worldwide, and other upcoming product launches, we are well-positioned within the Electrophysiology market.

As part of our strategic plan, we are investigating opportunities to further expand our presence in, and diversify into, other areas and disease states, including atrial fibrillation. In March 2011, we completed the acquisition of Atritech, Inc. Atritech has developed a novel device designed to close the left atrial appendage of the heart in patients with atrial fibrillation who are at risk for ischemic stroke. The WATCHMAN® Left Atrial Appendage Closure Technology, developed by Atritech, is the first device proven in a randomized clinical trial to offer an alternative to anticoagulant drugs, and is approved for use in CE Mark countries. We are integrating the operations of the Atritech business into our existing business and are leveraging expertise from both our Electrophysiology and Interventional Cardiology divisions in the commercialization of the WATCHMAN® device.

Emerging Markets

As part of our POWER strategy, described in our 2010 Annual Report filed on Form 10-K, we are seeking to increase net sales and market share by expanding our global presence. In particular, we are renewing our focus on selling in order to maximize opportunities in countries whose economies and healthcare sectors are growing rapidly. We are investing \$30 million to \$40 million in 2011 alone to introduce new products and strengthen our sales organization in emerging markets such as Brazil, China and India and continue to identify opportunities to win global market share. As a result of these efforts, during the third quarter of 2011, we experienced double-digit sales growth in these markets, as compared to the third quarter of 2010.

We are investing an additional \$150 million over a five-year period in order to expand our commercial presence in China, one of the world's largest and fastest-growing medical device markets. We expect to build a local manufacturing operation focused on serving Chinese market needs, as well as develop a world class training center for Chinese healthcare providers. In addition, we expect to further invest in local research and development and clinical studies. Together, we expect these activities to increase total headcount in China from approximately 200 to more than 1,200 employees by 2016.

Quarterly Results

Net Sales

As of September 30, 2011 and December 31, 2010, we had four reportable segments based on geographic regions: the United States; EMEA, consisting of Europe, the Middle East and Africa; Japan; and Inter-Continental, consisting of our Asia Pacific and the Americas operating segments, which include the emerging markets of Brazil, China and India. The reportable segments represent an aggregate of all operating divisions within each segment. We manage our international operating segments on a constant currency basis, and we manage market risk from currency exchange rate changes at the corporate level. Management excludes the impact of changes in foreign currency exchange rates for purposes of reviewing regional and divisional revenue growth rates to facilitate an evaluation of current operating performance and comparison to past operating performance. To calculate revenue growth rates that exclude the impact of changes in foreign currency exchange rates, we convert current period and prior period net sales from local currency to U.S. dollars using standard currency exchange rates. The regional constant currency growth rates in the tables below can be recalculated from our net sales by reportable segment as presented in Note M – Segment Reporting to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report.

The following tables provide our worldwide net sales by region and the relative change on an as reported and constant currency basis. We have restated regional net sales for the three and nine months ended September 30, 2010 to exclude sales from our former Neurovascular business, which we sold to Stryker Corporation in January 2011, and present net sales from this business within divested businesses in the tables below. Net sales that exclude the impact of changes in foreign currency exchange rates are not financial measures prepared in accordance with U.S. GAAP and should not be considered in isolation from, or as a replacement for, the most directly comparable GAAP financial measure. Refer to Additional Information for a further discussion of management's use of this non-GAAP financial

measure.

Table of Contents

U.S. Net Sales

During the third quarter of 2011, our U.S. net sales decreased \$87 million, or eight percent, as compared to the third quarter of 2010. The decrease was driven primarily by lower U.S. CRM net sales of \$66 million resulting from the contraction in the U.S. ICD market in 2011 and a reduction in our share of the U.S. CRM market in the third quarter of 2011 as compared to the third quarter of 2010, as well as lower U.S. Interventional Cardiology net sales of \$26 million driven by competitive and other pricing pressures and reductions in procedural volumes across our key markets. Partially offsetting these decreases, our Endoscopy business increased U.S. net sales \$5 million, and our Neuromodulation division increased U.S. net sales \$4 million, as compared to the same period in the prior year. Refer to Business and Market Overview for further discussion of our net sales.

During the first nine months of 2011, our U.S. net sales decreased \$105 million, or three percent, as compared to the first nine months of 2010. The decrease was driven primarily by lower U.S. Interventional Cardiology net sales of \$81 million, as well as lower U.S. CRM net sales of \$60 million. Partially offsetting these decreases, our Neuromodulation business increased U.S. net sales \$25 million due primarily to higher procedural volumes and positive momentum from new product launches, and our Endoscopy division increased U.S. net sales \$16 million, as compared to the same period in the prior year, due primarily to continued commercialization and adoption of products within our stent franchise.

International Net Sales

During the third quarter of 2011, our international net sales increased \$90 million, or 12 percent, as compared to the third quarter of 2010. Changes in foreign currency exchange rates contributed \$66 million to our international net sales in the third quarter of 2011 as compared to the same period in the prior year. Excluding the impact of changes in foreign currency exchange rates, net sales in our EMEA region increased \$9 million, or two percent, in the third quarter of 2011, as compared to the same period in the prior year, driven primarily by increased sales of our drug-eluting stent systems and increased sales from our Endoscopy business, partially offset by a decline in CRM net sales. Our net sales in Japan remained flat, excluding the impact of changes in foreign currency exchange rates, in the third quarter of 2011, as compared to the third quarter of 2010. Net sales in our Inter-Continental region, excluding the impact of changes in foreign currency exchange rates, increased \$15 million, or nine percent, in the third quarter of 2011, as compared to the same period in the prior year, primarily as a result of strong growth in Brazil, China and India. Refer to Business and Market Overview for further discussion of our net sales.

During the first nine months of 2011, our international net sales increased \$216 million, or nine percent, as compared to the first nine months of 2010. Changes in foreign currency exchange rates contributed \$191 million to our international net sales in the first nine months of 2011 as compared to the same period in the prior year. Excluding the impact of changes in foreign currency exchange rates, net sales in our EMEA region remained flat in the first nine months of 2011, as compared to the same period in the prior year. Our net sales in Japan decreased \$14 million, or two percent, excluding the impact of changes in foreign currency exchange rates, in the first nine months of 2011, as compared to the first nine months of 2010, due primarily to competitive drug-eluting stent system technology introductions and pricing pressures. The first quarter 2011 natural disasters in Japan did not have a significant impact on our results for the first nine months of 2011. Net sales in our Inter-Continental region, excluding the impact of changes in foreign currency exchange rates, increased \$39 million, or eight percent, in the first nine months of 2011, as compared to the same period in the prior year, with the majority of our divisions and franchises contributing to the year-over-year growth, including strong growth in Brazil, China and India.

Gross Profit

Our gross profit was \$1.194 billion for the third quarter of 2011, \$1.293 billion for the third quarter of 2010, \$3.775 billion for the first nine months of 2011, and \$3.865 billion for the first nine months of 2010. As a percentage of net sales, our gross profit decreased to 63.7 percent in the third quarter of 2011, as compared to 67.5 percent in the third quarter of 2010, and decreased to 65.4 percent for the first nine months of 2011, as compared to 66.6 percent in the first nine months of 2010. The following is a reconciliation of our gross profit margins and a description of the drivers of the change from period to period:

Table of Contents

	Three Months		Nine Months	
Gross profit - period ended September 30, 2010	67.5	%	66.6	%
PROMUS® supply true-up			0.9	%
Drug-eluting stent system sales mix and pricing	0.5	%	0.3	%
CRM sales mix and pricing	(0.6))%	(0.2))%
Neurovascular divestiture	(1.4))%	(1.3))%
Transition-related inventory charges	(1.1))%	(0.4))%
All other, including period expenses, other inventory charges and net impact of foreign currency	(1.2))%	(0.5))%
Gross profit - period ended September 30, 2011	63.7	%	65.4	%

The primary factor contributing to the decrease in our gross profit margin during the third quarter of 2011, as compared to the same period in 2010, was the negative impact of lower net sales of Neurovascular products and at significantly lower gross profit margins, as result of the divestiture of our Neurovascular business in January 2011 and the terms of transitional supply agreements with Stryker. Also contributing to the decrease was the unfavorable impact of changes in foreign currency exchange rates, the impact of pricing related to sales of our CRM products, and higher inventory charges during the third quarter of 2011, as compared to the third quarter of 2010. The transition-related inventory charges represent a \$21 million charge recognized in the third quarter of 2011, related to PROMUS® purchase commitments and excess inventory as a result of our expected launch of our internally-developed and self-manufactured next-generation PROMUS® Element™ stent system in the U.S. and Japan by mid-2012. Declines in average selling prices of drug-eluting stent systems were offset by the positive impact of sales mix related to sales of our drug-eluting stent systems, as we continue to shift sales to products with more favorable gross profit margins. Our gross profit margin for the first nine months of 2011, as compared to the first nine months of 2010, was positively impacted by a \$50 million credit to cost of products sold recognized in the first quarter of 2011, related to a two-year retroactive pricing adjustment pursuant to our PROMUS® supply arrangement with Abbott for historical purchases of PROMUS® stent systems. Offsetting this increase was the negative impact of lower sales of Neurovascular products and at significantly lower gross profit margins.

Operating Expenses

The following table provides a summary of certain of our operating expenses:

	Three Months Ended September 30, 2011		2010		Nine Months Ended September 30, 2011		2010	
	\$	% of Net Sales	\$	% of Net Sales	\$	% of Net Sales	\$	% of Net Sales
(in millions)								
Selling, general and administrative expenses	629	33.6	634	33.1	1,866	32.3	1,897	32.7
Research and development expenses	229	12.2	230	12.0	665	11.5	714	12.3
Royalty expense	36	1.9	39	2.0	140	2.4	147	2.5

Selling, General and Administrative (SG&A) Expenses

In the third quarter of 2011, our SG&A expenses decreased \$5 million, or less than one percent, as compared to the third quarter of 2010, but were 50 basis points higher as a percentage of net sales. This decrease was driven primarily by lower SG&A expenses, as compared to the same period in the prior year, as a result of the sale of our Neurovascular business to Stryker in January and lower expenses due to our restructuring initiatives and cost containment discipline. The decrease was partially offset by the unfavorable impact of changes in foreign currency exchange rates of \$18 million, as well as SG&A expenses related to our recent acquisitions and global expansion initiatives. We have increased our SG&A investments throughout 2011 in targeted areas to support new products; strengthen our sales organization in emerging markets such as Brazil, China and India; and to support our acquired

businesses.

In the first nine months of 2011, our SG&A expenses decreased \$31 million, or two percent, as compared to the first nine months of 2010 and were 40 basis points lower as a percentage of net sales. This decrease was driven primarily by the reversal of \$20 million of previously established allowances for doubtful accounts against long-outstanding receivables in Greece in the first nine months of 2011. These receivables had previously been fully reserved as we had determined that they had a high risk of being uncollectible

50

Table of Contents

due to the economic situation in Greece. During the first quarter of 2011, the Greek government converted these receivables into bonds, which we were able to monetize, reducing our allowance for doubtful accounts as a credit to SG&A expense. We continue to monitor the European economic environment for any collectibility issues related to our outstanding receivables in this region. Our SG&A expenses were also lower in the first nine months of 2011, as compared to the same period in the prior year, as a result of the sale of our Neurovascular business to Stryker in January and lower expenses due to our restructuring initiatives and cost containment discipline. These decreases were partially offset by the unfavorable impact of changes in foreign currency exchange rates, as well as additional SG&A expenses related to our recent acquisitions and global expansion initiatives.

Research and Development (R&D) Expenses

In the third quarter of 2011, our R&D expenses decreased \$1 million, or less than one percent, as compared to the third quarter of 2010, but were 20 basis points higher as a percentage of net sales. In the first nine months of 2011, our R&D expenses decreased \$49 million, or seven percent, as compared to the first nine months of 2010, and declined 80 basis points as a percentage of net sales. The decrease for the three and nine months ended September 30, 2011 was due to the on-going re-prioritization of R&D projects and the re-allocation of spending as part of our efforts to focus on areas identified as priority growth initiatives and the elimination of spending related to our Neurovascular business, partially offset by increased R&D funding for our acquisitions and certain other priority growth initiatives. We remain committed to advancing medical technologies and investing in meaningful research and development projects across our businesses in order to maintain a healthy pipeline of new products that we believe will contribute to profitable sales growth and expect our R&D expenses to increase during the fourth quarter.

Royalty Expense

In the third quarter of 2011, our royalty expense decreased \$3 million, or eight percent, as compared to the third quarter of 2010, and was slightly lower as a percentage of net sales. The decrease relates primarily to royalty expense attributable to Neurovascular products which was eliminated with the sale of our Neurovascular business in January 2011. These royalties represented \$3 million of expense in the third quarter of 2010.

In the first nine months of 2011, our royalty expense decreased \$7 million, or five percent, as compared to the first nine months of 2010, and were slightly lower as a percentage of net sales. The decrease for the nine months ended September 30, 2011 relates primarily to royalty expense attributable to Neurovascular products which was eliminated with the sale of our Neurovascular business in January 2011. These royalties represented \$9 million of expense in the first nine months of 2010. Royalty expense attributable to our sales of PROMUS® and PROMUS® Element™ stent systems increased \$7 million for the first nine months of 2011, as compared to the same period in the prior year, but was partially offset by a decrease of \$4 million in royalty expense attributable to our TAXUS® stent systems, which have more favorable royalty rates.

Amortization Expense

Our amortization expense was \$97 million in the third quarter of 2011, as compared to \$129 million in the third quarter of 2010 and \$325 million in the first nine months of 2011, as compared to \$381 million in the first nine months of 2010. The decrease for the three and nine months ended September 30, 2011 was due primarily to certain intangible assets associated with our acquisition of Guidant Corporation in 2006 reaching the end of their useful lives during the second quarter of 2011. This non-cash charge is excluded by management for purposes of evaluating operating performance and assessing liquidity.

Goodwill Impairment Charges**2011 Charge**

We test our April 1 goodwill balances during the second quarter of each year for impairment, or more frequently if indicators are present or changes in circumstances suggest that impairment may exist. Based on market information that became available to us toward the end of the first quarter of 2011, we concluded that there was a reduction in the estimated size of the U.S. ICD market, which led to lower projected U.S. CRM results compared to prior forecasts and created an indication of potential impairment of the goodwill balance attributable to our U.S. CRM business unit. Therefore, we performed an interim impairment test in accordance with U.S. GAAP and our accounting policies and recorded a non-deductible goodwill impairment charge of \$697 million, on both a pre-tax and after-tax basis, associated with this business unit during the first quarter of 2011. This non-cash charge does not impact our

compliance with our debt covenants or our cash flows, and is excluded by management for purposes of evaluating operating performance and assessing liquidity.

We used the income approach, specifically the discounted cash flow (DCF) method, to derive the fair value of the U.S. CRM reporting unit, as described in our accounting policies in our 2010 Annual Report filed on Form 10-K. We updated all aspects of the DCF model associated with the U.S. CRM business, including the amount and timing of future expected cash flows, terminal

Table of Contents

value growth rate and the appropriate market-participant risk-adjusted weighted average cost of capital (WACC) to apply.

As a result of physician reaction to study results published by the Journal of the American Medical Association regarding evidence-based guidelines for ICD implants and DOJ investigations into hospitals' ICD implant practices and the expansion of Medicare recovery audits, among other factors, we estimated the U.S. CRM market would experience negative growth rates in the mid-single digits in 2011, as compared to 2010. Due to these estimated near-term market reductions, as well as the economic impact of physician alignment to hospitals, recent demographic information released by the American Heart Association indicating a lower prevalence of heart failure, and increased competitive and other pricing pressures, we lowered our estimated average U.S. CRM net sales growth rates within our 15-year DCF model from the mid-single digits to the low-single digits. Partially offsetting these factors are increased levels of profitability as a result of cost-reduction initiatives and process efficiencies within the U.S. CRM business, including those associated with our 2011 Restructuring plan described in Note G - Restructuring-related Activities to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report. The impact of the reduction in the size of the U.S. ICD market, and the related reduction in our forecasted 2011 U.S. CRM net sales, as well as the change in our expected sales growth rates thereafter as a result of the trends noted above were the key factors contributing to the first quarter 2011 goodwill impairment charge.

In the second quarter of 2011, we performed our annual goodwill impairment test for all of our reporting units. In conjunction with our annual test, the fair value of each reporting unit exceeded its carrying value, with the exception of our U.S. CRM reporting unit. Based on the remaining book value of our U.S. CRM reporting unit following the goodwill impairment charge recorded during the first quarter of 2011, the carrying value of our U.S. CRM reporting unit exceeded its fair value, due primarily to the value of amortizable intangible assets allocated to this reporting unit. The remaining book value of our U.S. CRM amortizable intangible assets was approximately \$3.3 billion as of September 30, 2011. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification™ (ASC) Topic 350, Intangibles – Goodwill and Other and our accounting policies, we tested our U.S. CRM amortizable intangible assets for impairment on an undiscounted cash flow basis as of March 31, 2011, in conjunction with the goodwill impairment charge, and determined that these assets were not impaired. The assumptions used in our annual goodwill impairment test performed during the second quarter of 2011 related to our U.S. CRM reporting unit were substantially consistent with those used in our first quarter interim impairment test; therefore, it was not deemed necessary to proceed to the second step of the impairment test.

We continue to identify four reporting units with a material amount of goodwill that are at higher risk of potential failure of the first step of the impairment test in future reporting periods. These reporting units include our U.S. CRM reporting unit, which holds \$782 million of allocated goodwill; our U.S. Cardiovascular reporting unit, which holds \$2.3 billion of allocated goodwill; our U.S. Neuromodulation reporting unit, which holds \$1.3 billion of allocated goodwill; and our EMEA region, which holds \$4.0 billion of allocated goodwill, each as of September 30, 2011. As of the most recent assessment, the level of excess fair value over carrying value for these reporting units identified as being at higher risk (with the exception of the U.S. CRM reporting unit, whose carrying value continues to exceed its fair value) ranged from approximately eight percent to 15 percent. On a quarterly basis, we monitor the key drivers of fair value for these reporting units to detect events or other changes that would warrant an interim impairment test. The key variables that drive the cash flows of our reporting units are estimated revenue growth rates, levels of profitability and terminal value growth rate assumptions, as well as the WACC rate applied. These assumptions are subject to uncertainty, including our ability to grow revenue and improve profitability levels. For each of these reporting units, relatively small declines in the future performance and cash flows of the reporting unit or small changes in other key assumptions may result in the recognition of significant goodwill impairment charges. For example, keeping all other variables constant, a 50 basis point increase in the WACC applied to the reporting units, excluding acquisitions, would require that we perform the second step of the goodwill impairment test for our U.S. CRM reporting unit, and a 100 basis point increase would require that we perform the second step of the goodwill impairment test for our U.S. Neuromodulation, U.S. Cardiovascular and EMEA reporting units. In addition, keeping all other variables constant, a 100 basis point decrease in perpetual growth rates would require that we perform the second step of the goodwill impairment test for our U.S. CRM reporting unit, and a 200 basis point decrease in

perpetual growth rates would require that we perform the second step of the goodwill impairment test for our U.S. Neuromodulation and EMEA reporting units. The estimates used for our future cash flows and discount rates represent management's best estimates, which we believe to be reasonable, but future declines in the business performance of our reporting units may impair the recoverability of our goodwill balance. Future events that could have a negative impact on the fair value of the reporting units include, but are not limited to:

- decreases in estimated market sizes or market growth rates due to greater-than-expected declines in procedural volumes, pricing pressures, product actions, product sales mix, disruptive technology developments, government cost containment initiatives and healthcare reforms, and/or other economic or regulatory conditions;
- declines in our market share and penetration assumptions due to increased competition, an inability to develop or launch new products, and market and/or regulatory conditions that may cause significant launch delays or product recalls;
- decreases in our profitability due to an inability to successfully implement and achieve timely and sustainable cost

Table of Contents

improvement measures consistent with our expectations, increases in our market-participant tax rate, and/or changes in tax laws;

• declines in revenue as a result of loss of key members of our sales force and other key personnel;

• negative developments in intellectual property litigation that may impact our ability to market certain products or

increase our costs to sell certain products;

• the level of success of on-going and future research and development efforts and increases in the research and development costs necessary to obtain regulatory approvals and launch new products;

• increases in our market-participant risk-adjusted WACC; and

• changes in the structure of our business as a result of future reorganizations or divestitures of assets or businesses.

Negative changes in one or more of these factors could result in additional impairment charges.

2010 Charge

The ship hold and product removal actions associated with our U.S. ICD and CRT-D products, which we announced on March 15, 2010, and the forecasted corresponding financial impact on our operations created an indication of potential impairment of the goodwill balance attributable to our U.S. CRM reporting unit during the first quarter of 2010. Therefore, we performed an interim impairment test in accordance with U.S. GAAP and our accounting policies and recorded an estimated non-deductible goodwill impairment charge of \$1.817 billion, on both a pre-tax and after-tax basis, associated with our U.S. CRM reporting unit.

Goodwill impairment charges are excluded by management for purposes of evaluating operating performance and assessing liquidity.

Intangible Asset Impairment Charges

2011 Charges

During the third quarter of 2011, we recorded a \$9 million intangible asset impairment charge associated with lower projected cash flows associated with certain technologies. During the second quarter of 2011, we recorded a \$12 million intangible asset impairment charge associated with changes in the timing and amount of the expected cash flows related to certain acquired in-process research and development projects. We have recorded these amounts in the intangible asset impairment charges caption in our accompanying unaudited condensed consolidated statements of operations. We do not believe that these impairments, or the factors causing these impairments, will have a material impact on our future operations or cash flows.

2010 Charges

During the first quarter of 2010, due to lower than anticipated net sales of one of our Peripheral Interventions technology offerings, as well as changes in our expectations of future market acceptance of this technology, we lowered our sales forecasts associated with the product. In addition, during the third quarter of 2010, as part of our initiatives to reprioritize and diversify our product portfolio, we discontinued one of our internal research and development programs to focus on those with a higher likelihood of success. As a result of these factors, and in accordance with U.S. GAAP and our accounting policies, we tested the related intangible assets for impairment and recorded a \$60 million charge in the first quarter of 2010, and a \$5 million charge in the third quarter of 2010 to write down the balance of these intangible assets to their fair value. We recorded these amounts in the intangible asset impairment charges caption in our accompanying unaudited condensed consolidated statements of operations. We do not believe that these impairments, or the factors causing these impairments, will have a material impact on our future operations or cash flows.

These non-cash charges are excluded by management for purposes of evaluating operating performance and assessing liquidity.

Contingent Consideration Expense

In connection with certain of our acquisitions completed after 2008, we may be required to pay future consideration that is contingent upon the achievement of certain revenue-, regulatory- and commercialization-based milestones. As of the respective acquisition dates, we recorded contingent consideration liabilities representing the estimated fair value of the contingent consideration we expected to pay to the former shareholders of the acquired businesses. In accordance with ASC Topic 805, Business Combinations, we re-measure these liabilities each reporting period and record changes in the fair value through a separate line item within our consolidated statements of operations.

Increases or decreases in the fair value of the contingent consideration liability can result

53

Table of Contents

from accretion of the liability due to the passage of time, changes in the timing and amount of revenue estimates or changes in the expected probability and timing of achieving regulatory or commercialization milestones, changes in discount rates, and payments. We recorded net expense of \$6 million during the third quarter of 2011 and \$18 million during the first nine months of 2011, representing the increase in the estimated fair value of these obligations. These acquisition-related charges are excluded by management for purposes of evaluating operating performance and assessing liquidity.

Acquisition-related Milestone

In connection with Abbott Laboratories' 2006 acquisition of Guidant's vascular intervention and endovascular solutions businesses, Abbott agreed to pay us a milestone payment of \$250 million upon receipt of an approval from the Japanese Ministry of Health, Labor and Welfare (MHLW) to market the XIENCE V® stent system in Japan. The MHLW approved the XIENCE V® stent system in the first quarter in 2010 and we received the milestone payment from Abbott, which we recorded as a gain in our accompanying unaudited condensed consolidated financial statements. This non-recurring acquisition-related gain is excluded by management for purposes of evaluating operating performance and assessing liquidity.

Restructuring Charges and Restructuring-related Activities**2011 Restructuring plan**

On July 26, 2011, our Board of Directors approved, and we committed to, a restructuring initiative (the 2011 Restructuring plan) designed to strengthen operational effectiveness and efficiencies, increase competitiveness and support new investments, thereby increasing shareholder value. We estimate that the execution of the plan will reduce annual pre-tax operating expenses by approximately \$225 million to \$275 million exiting 2013, a portion of which will be reinvested in targeted areas necessary for future growth, including priority growth and emerging markets initiatives. Key activities under the plan include standardizing and automating certain processes and activities; relocating select administrative and functional activities; rationalizing organizational reporting structures; and leveraging preferred vendors. Among these efforts, we are expanding our ability to deliver best-in-class global shared services for certain functions and divisions at several locations in emerging markets. This action is intended to enable us to grow our global commercial presence in key geographies and take advantage of many cost-reducing and productivity-enhancing opportunities. In addition, we are undertaking efforts to streamline various corporate functions, eliminate bureaucracy, increase productivity and better align corporate resources to our key business strategies. Activities under the 2011 Restructuring plan were initiated in the third quarter of 2011 and are expected to be substantially completed within the next 24 months.

We estimate that the 2011 Restructuring plan will result in total pre-tax charges of approximately \$155 million to \$210 million, and that approximately \$150 million to \$200 million of these charges will result in future cash outlays. We have recorded related costs of \$15 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through other lines within our consolidated statements of operations.

The following provides a summary of our expected total costs associated with the plan by major type of cost:

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$125 million to \$150 million
Other (1)	\$20 million to \$40 million
Restructuring-related expenses:	
Other (2)	\$10 million to \$20 million \$155 million to \$210 million

(1) Includes primarily consulting fees and costs associated with contractual cancellations.

(2)

Comprised of other costs directly related to the 2011 Restructuring plan, including program management, accelerated depreciation, retention and infrastructure-related costs.

2010 Restructuring plan

On February 6, 2010, our Board of Directors approved, and we committed to, a series of management changes and restructuring initiatives (the 2010 Restructuring plan) designed to focus our business, drive innovation, accelerate profitable revenue growth and increase both accountability and shareholder value. Key activities under the plan include the integration of our Cardiovascular and CRM businesses, as well as the restructuring of certain other businesses and corporate functions; the centralization of our

Table of Contents

research and development organization; the re-alignment of our international structure to reduce our administrative costs and invest in expansion opportunities including significant investments in emerging markets; and the re-prioritization and diversification of our product portfolio. We estimate that the execution of this plan will result in gross reductions in pre-tax operating expenses of approximately \$200 million to \$250 million, once completed. We expect to reinvest a portion of the savings into customer-facing and other activities to help drive future sales growth and support our businesses. Activities under the 2010 Restructuring plan were initiated in the first quarter of 2010 and are expected to be substantially complete by the end of 2012.

We estimate that the 2010 Restructuring plan will result in total pre-tax charges of approximately \$165 million to \$185 million, and that approximately \$150 million to \$160 million of these charges will result in cash outlays, of which we have made payments of \$135 million to date. We have recorded related costs of \$166 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through other lines within our consolidated statements of operations.

The following provides a summary of our expected total costs associated with the plan by major type of cost:

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$95 million to \$100 million
Fixed asset write-offs	\$10 million to \$15 million
Other (1)	\$50 million to \$55 million
Restructuring-related expenses:	
Other (2)	\$10 million to \$15 million \$165 million to \$185 million

(1) Includes primarily consulting fees and costs associated with contractual cancellations.

(2) Comprised of other costs directly related to the 2010 Restructuring plan, including accelerated depreciation and infrastructure-related costs.

Plant Network Optimization program

In January 2009, our Board of Directors approved, and we committed to, a Plant Network Optimization program, which is intended to simplify our manufacturing plant structure by transferring certain production lines among facilities and by closing certain other facilities. The program is a complement to our 2007 Restructuring plan, discussed below, and is intended to improve overall gross profit margins. We estimate that the program will result in annualized run-rate reductions of manufacturing costs of approximately \$65 million exiting 2012. These savings are in addition to the \$30 million of annual reductions of manufacturing costs from activities under our 2007 Restructuring plan, discussed below. Activities under the Plant Network Optimization program were initiated in the first quarter of 2009 and are expected to be substantially complete by the end of 2012.

We expect that the execution of the Plant Network Optimization program will result in total pre-tax charges of approximately \$130 million to \$145 million, and that approximately \$110 million to \$120 million of these charges will result in cash outlays, of which we have made payments of \$62 million to date. We have recorded related costs of \$115 million since the inception of the plan, and are recording a portion of these expenses as restructuring charges and the remaining portion through cost of products sold within our consolidated statements of operations. The following provides a summary of our estimates of costs associated with the Plant Network Optimization program by major type of cost:

Type of cost	Total estimated amount expected to be incurred
Restructuring charges:	
Termination benefits	\$35 million to \$40 million

Restructuring-related expenses:

Accelerated depreciation

\$20 million to \$25 million

Transfer costs (1)

\$75 million to \$80 million

\$130 million to \$145 million

55

Table of Contents

(1) Consists primarily of costs to transfer product lines among facilities, including costs of transfer teams, freight, idle facility and product line validations.

2007 Restructuring plan

In October 2007, our Board of Directors approved, and we committed to, an expense and head count reduction plan (the 2007 Restructuring plan). The plan was intended to bring expenses in line with revenues as part of our initiatives to enhance short- and long-term shareholder value. The execution of this plan enabled us to reduce research and development and SG&A expenses by an annualized run rate of approximately \$500 million exiting 2008. We have partially reinvested our savings from these initiatives into targeted head count increases, primarily in customer-facing positions. In addition, the plan has reduced manufacturing costs by an annualized run-rate of approximately \$30 million exiting 2010 as a result of transfers of certain production lines. The transfer of production lines contemplated under the 2007 Restructuring plan was completed as of December 31, 2010; all other major activities under the plan were completed as of December 31, 2009. The execution of this plan resulted in total pre-tax expenses of \$427 million and required cash outlays of \$380 million, of which we have paid \$373 million to date.

We recorded restructuring charges pursuant to our restructuring plans of \$22 million in the third quarter of 2011, \$5 million in the third quarter of 2010, \$77 million in the first nine months of 2011, and \$98 million in the first nine months of 2010. In addition, we recorded expenses within other lines of our accompanying unaudited condensed consolidated statements of operations related to our restructuring initiatives of \$7 million in the third quarter of 2011, \$13 million in the third quarter of 2010, \$32 million in the first nine months of 2011, and \$41 million in the first nine months of 2010.

The following presents these costs by major type and line item within our accompanying unaudited condensed consolidated statements of operations, as well as by program:

Table of Contents

	\$66	\$6	\$32	\$8	\$27	\$139

Termination benefits represent amounts incurred pursuant to our on-going benefit arrangements and amounts for “one-time” involuntary termination benefits, and have been recorded in accordance with ASC Topic 712, Compensation – Non-retirement Postemployment Benefits and ASC Topic 420, Exit or Disposal Cost Obligations. We expect to record additional termination benefits related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program in 2011 and 2012 when we identify with more specificity the job classifications, functions and locations of the remaining head count to be eliminated. Other restructuring costs, which represent primarily consulting fees, are being recorded as incurred in accordance with Topic 420. Accelerated depreciation is being recorded over the adjusted remaining useful life of the related assets, and production line transfer costs are being recorded as incurred. We have incurred cumulative restructuring charges related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program of \$207 million and restructuring-related costs of \$89 million since we committed to each plan. The following presents these costs by major type and by plan:

Table of Contents

(in millions)	2011 Restructuring plan	2010 Restructuring plan	Plant Network Optimization	Total
Termination benefits	\$9	\$96	\$35	\$140
Fixed asset write-offs		11		11
Other	5	51		56
Total restructuring charges	14	158	35	207

Transfer costs			60	60
Other	1	8		9
Restructuring-related expenses	1	8	80	89
	\$15	\$166	\$115	\$296

Restructuring and restructuring-related costs are excluded by management for purposes of evaluating operating performance.

We made cash payments of \$24 million in the third quarter of 2011 and \$92 million in the first nine months of 2011 associated with restructuring initiatives pursuant to these plans, and have made total cash payments of \$201 million related to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program since committing to each plan. Each of these payments was made using cash generated from operations, and are comprised of the following:

(in millions)	2011 Restructuring plan	2010 Restructuring plan	Plant Network Optimization	Total
Three Months Ended September 30, 2011				
Termination benefits		\$9	\$1	\$10
Transfer costs			5	5

Termination benefits		\$80	\$2	\$82
Transfer costs			60	60
Other	\$4	55		59
	\$4	\$135	\$62	\$201

We also made cash payments of \$1 million during the third quarter of 2011 and \$3 million during the first nine months of 2011 associated with our 2007 Restructuring plan and have made total cash payments of \$373 million related to the 2007 Restructuring plan since committing to the plan in the fourth quarter of 2007.

Gain on Divestiture

In January 2011, we closed the sale of our Neurovascular business to Stryker Corporation for a purchase price of \$1.5 billion in cash. We received \$1.450 billion at closing, including an upfront payment of \$1.426 billion, and \$24 million which was placed into escrow to be released upon the completion of local closings in certain foreign jurisdictions, of which we had received approximately \$10 million as of September 30, 2011. We will also receive an additional \$50 million contingent upon the transfer or separation of certain manufacturing facilities, which we expect will be

completed over the next 24 months. We recorded a pre-tax gain of \$760 million (\$530 million after-tax) during the first quarter of 2011 associated with the closing of the transaction. We

59

Table of Contents

also deferred a gain of \$27 million, included in the accompanying unaudited condensed consolidated balance sheets, which is being recognized upon the release of the escrowed funds and the performance of certain activities under the transition services agreements. During the third quarter of 2011, we recognized \$8 million of this deferred gain and expect to recognize the remaining \$19 million throughout 2011 and 2012. This non-recurring divestiture-related gain is excluded by management for purposes of evaluating operating performance and assessing liquidity.

Interest Expense

Our interest expense decreased to \$62 million in the third quarter of 2011, as compared to \$91 million in the third quarter of 2010. The decrease in our interest expense was a result of lower average debt levels, due to repayment of \$1.850 billion of debt during the past year, including the prepayment of the remaining \$1.0 billion of our term loan in the first nine months of 2011, as well as a decrease in our average borrowing rate. Our average borrowing rate was 5.3 percent in the third quarter of 2011 and 5.5 percent in the third quarter of 2010. In addition, interest expense for the third quarter of 2011 included a \$3 million benefit associated with hedge ineffectiveness on our interest rate derivative contracts, which we terminated during the third quarter of 2011. Refer to Liquidity and Capital Resources and Note F – Borrowings and Credit Arrangements to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report for information regarding our debt obligations.

Our interest expense decreased to \$210 million in the first nine months of 2011, as compared to \$286 million in the first nine months of 2010. The decrease in our interest expense was a result of lower average debt levels, due to repayment of \$1.850 billion of debt during the past year, as well as a decrease in our average borrowing rate. Our average borrowing rate was 5.2 percent in the first nine months of 2011 and 5.8 percent in the first nine months of 2010. In addition, interest expense for the first nine months of 2011 included expense of \$6 million associated with the write-off of unamortized debt issuance costs in conjunction with term loan prepayments, and a \$3 million benefit associated with hedge ineffectiveness on our interest rate derivative contracts, which we terminated during the third quarter of 2011. Interest expense for the first nine months of 2010 included expense of \$10 million associated with the write-off of the remaining discount attributable to our loan from Abbott Laboratories, prepaid in full in June 2010. In July 2011, Fitch Ratings upgraded our corporate credit rating to BBB-, an investment-grade rating and Moody's Investors Service raised our Ba1 rating outlook to positive from stable. The Fitch upgrade has resulted in a slightly favorable reduction in the facility fee and the interest rate on our revolving credit facility. In addition, Standard & Poor's Ratings Services has maintained an investment-grade corporate credit rating for us since 2009.

Other, net

Our other, net reflected expense of \$1 million in the third quarter of 2011, income of \$3 million in the third quarter of 2010, income of \$18 million in the first nine months of 2011, and expense of \$2 million in the first nine months of 2010. The following are the components of other, net:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Interest income	\$1	\$3	\$5	\$12
Foreign currency (losses) gains	(4) 3	(9) (8
Net gains on investments	1		24	
Other income (expense), net	1	(3) (2) (6
	\$ (1) \$3	\$18	\$ (2

During the first nine months of 2011, we recognized gains of \$38 million associated with 2011 acquisitions in which we held prior equity interests. This acquisition-related credit is excluded by management for purposes of evaluating operating performance. Partially offsetting these gains were net losses of \$14 million, relating to the write-down of other investments in our portfolio.

Tax Rate

The following table provides a summary of our reported tax rate:

Table of Contents

	Three Months Ended		Percentage	
	September 30,		Point	
	2011	2010	Increase (Decrease)	
Reported tax rate	(27.9)% (16.6)% (11.3)%
Impact of certain receipts/charges*	48.0	% 33.4	% 14.6	%
	20.1	% 16.8	% 3.3	%
	Nine Months Ended		Percentage	
	September 30,		Point	
	2011	2010	Increase (Decrease)	
Reported tax rate	38.4	% (0.7)% 39.1	%
Impact of certain receipts/charges*	(21.8)% 20.9	% (42.7)%
	16.6	% 20.2	% (3.6)%

*These receipts/charges are taxed at different rates than our effective tax rate.

The change in our reported tax rate for the third quarter and first nine months of 2011, as compared to the same periods in 2010, relates primarily to the impact of certain receipts and charges that are taxed at different rates than our effective tax rate. In 2011, these receipts and charges included a gain on our divestiture of the Neurovascular business, a non-deductible goodwill impairment charge, other intangible asset impairment charges and restructuring- and acquisition-related charges and credits. Our reported tax rate was also affected by discrete tax items, related primarily to a release of valuation allowances resulting from a change in our expected ability to realize certain deferred tax assets, changes in various state tax laws, the resolution of various uncertain tax positions resulting from closing agreements with the Internal Revenue Service (IRS), the resolution of various uncertain tax positions resulting from the expiration of the statute of limitations for assessing tax in certain jurisdictions, and the finalization of our 2010 U.S. Federal tax return. In 2010, these receipts and charges included goodwill and intangible asset impairment charges, a gain associated with the receipt of an acquisition-related milestone payment, and restructuring-related charges. In 2010, our reported tax rate was also affected by discrete tax items, related primarily to the re-measurement of an uncertain tax position resulting from a favorable court ruling issued in a similar third-party case and the resolution of an uncertain tax position resulting from a favorable taxpayer motion issued in a similar third-party case. On December 17, 2010, we received Notices of Deficiency from the IRS reflecting proposed audit adjustments for Guidant Corporation for the 2001-2003 tax years. The incremental tax liability asserted by the IRS for these periods is \$525 million plus interest. The primary issue in dispute is the transfer pricing in connection with the technology license agreements between domestic and foreign subsidiaries of Guidant. We believe we have meritorious defenses for our tax filings and, on March 11, 2011, we filed petitions with the U.S. Tax Court contesting these Notices of Deficiency. On May 20, 2011, the IRS filed its answer to our petition.

In February 2011, we received Revenue Agent's Reports from the IRS reflecting proposed adjustments for the Guidant 2004-2006 tax years. The reports propose transfer pricing adjustments based on positions substantially similar to those subject to our U.S. Tax Court proceedings for Guidant Corporation's 2001-2003 tax years. The statute of limitations for Guidant Corporation's 2004-2006 tax years expires in December 2011 and we anticipate receiving a Notice of Deficiency for these tax years prior to the expiration of the relevant statute of limitations. We believe we have meritorious defenses for our tax filings and will petition the Tax Court to contest the proposed IRS adjustments.

In September 2011, we received a Notice of Deficiency from the IRS reflecting proposed audit adjustments for Boston Scientific Corporation for the 2006-2007 tax years. The incremental tax liability asserted by the IRS for these periods is \$154 million plus interest. The adjustments proposed by the IRS are based on positions substantially similar to those subject to our U.S. Tax Court proceedings for Guidant Corporation's 2001-2003 tax years and we intend to file a timely petition to the U.S. Tax Court contesting this assessment.

We believe that our income tax reserves associated with these matters are adequate and the final resolution will not have a material impact on our financial condition or results of operations. However, final resolution is uncertain and could have a material impact on our financial condition or results of operations.

Critical Accounting Policies and Estimates

Our financial results are affected by the selection and application of accounting policies and methods. For our first quarter ended March 31, 2011, we adopted prospectively FASB ASC Update No. 2009-13, Revenue Recognition (Topic 605) – Multiple-

61

Table of Contents

Deliverable Revenue Arrangements. Update No. 2009-13 provides principles and application guidance to determine whether multiple deliverables exist, how the individual deliverables should be separated and how to allocate the revenue in the arrangement among those separate deliverables. Through December 31, 2010, we deferred revenue on the undelivered service element associated with certain of our CRM product offerings based on verifiable objective evidence of fair value, using the residual method of allocation, and recognized the associated revenue over the related service period. Under the guidance of Update No. 2009-13, we continue to separate these product offerings into two separate accounting units and defer revenue on the undelivered service element on the basis of the relative selling price. We determine relative selling price based on third-party evidence of the selling price of the undelivered service element, as vendor-specific objective evidence does not exist. We will re-evaluate our estimate of the relative selling price on an annual basis or more frequently if there are any significant changes in our service offering or third-party service offering or pricing. The adoption of Update No. 2009-13 did not change the units of accounting or the pattern and timing of revenue recognition for those units.

There were no other material changes in the nine months ended September 30, 2011 to the application of critical accounting policies and estimates as described in our Annual Report filed on Form 10-K for the year ended December 31, 2010.

Liquidity and Capital Resources

As of September 30, 2011, we had \$276 million of cash and cash equivalents on hand, comprised of \$145 million invested in money market and government funds, \$12 million invested in short-term time deposits, and \$119 million in interest bearing and non-interest bearing bank accounts. Our policy is to invest excess cash in short-term marketable securities earning a market rate of interest without assuming undue risk to principal, and we limit our direct exposure to securities in any one industry or issuer. We also have full access to our \$2.0 billion revolving credit facility and \$350 million of available borrowings under our credit and security facility secured by our U.S. trade receivables, both described below.

The following provides a summary and description of our net cash inflows (outflows) for the nine months ended September 30, 2011 and 2010:

(in millions)	Nine Months Ended	
	September 30,	
	2011	2010
Cash provided by (used for) operating activities	\$659	\$(124)
Cash provided by (used for) investing activities	827	(217)
Cash (used for) provided by financing activities	(1,420)	101
Operating Activities		

During the first nine months of 2011, we generated \$659 million from operating activities, as compared to \$124 million used for operations during the first nine months of 2010, an increase of \$783 million. This increase was driven primarily by lower litigation-related payments of approximately \$1.4 billion. During 2010, we made payments of \$1.725 billion to Johnson & Johnson related to a patent litigation settlement; our 2011 litigation-related payments primarily consisted of a payment of \$296 million to the DOJ during the first quarter. Our cash provided by operating activities also included proceeds of approximately \$80 million related to the termination of our outstanding interest rate derivative contracts during the third quarter of 2011. Partially offsetting these items was the receipt of a \$250 million milestone payment from Abbott Laboratories during the first quarter of 2010, described in Quarterly Results, as well as higher tax-related net cash outflows of approximately \$250 million, primarily due to the receipt in the first quarter of 2010 of a \$163 million federal tax refund, and tax payments in 2011 related to our acquisitions and divestiture of our Neurovascular business.

Investing Activities

During the first nine months of 2011, cash provided by investing activities was comprised primarily of proceeds from the sale of our Neurovascular business to Stryker. We received \$1.450 billion at closing, including an upfront payment of \$1.426 billion, and \$24 million which was placed into escrow and is being released upon the completion of local

closings in certain foreign jurisdictions, of which we had received approximately \$10 million as of September 30, 2011. We will also receive an additional \$50 million contingent upon the transfer or separation of certain manufacturing facilities, which we expect will be completed over a period of approximately 24 months. This cash inflow was partially offset by payments of \$370 million for acquisitions consummated during 2011; and capital expenditures, net of proceeds on sales of fixed assets, of \$221 million. We expect to incur total capital expenditures of approximately \$300 million during 2011, which includes investments to further upgrade our information systems infrastructure and to enhance our manufacturing capabilities to support continued growth in our business units.

Table of Contents

During the first nine months of 2010, our investing activities were comprised primarily of capital expenditures of \$209 million.

Financing Activities

Our cash flows from financing activities reflect issuances and repayments of debt, proceeds from stock issuances related to our equity incentive programs and repurchases of common stock pursuant to our authorized repurchase programs.

Debt

We had total debt of \$4.263 billion as of September 30, 2011 and \$5.438 billion as of December 31, 2010. During 2011, we prepaid the remaining \$1.0 billion of our term loan and paid \$250 million of our senior notes at maturity. The debt maturity schedule for the significant components of our debt obligations as of September 30, 2011 is as follows:

(in millions)	Payments due by Period						Total
	2011	2012	2013	2014	2015	Thereafter	
Senior notes				\$600	\$1,250	\$2,350	4,200
				\$600	\$1,250	\$2,350	\$4,200

Note: The table above does not include unamortized discounts associated with our senior notes, or amounts related to interest rate contracts used to hedge the fair value of certain of our senior notes.

In July 2011, Fitch Ratings upgraded our corporate credit rating from to BBB-, an investment-grade rating, and Moody's Investors Service raised our Ba1 rating outlook to positive from stable. We believe these rating improvements reflect the strength of our product portfolio and cash flows, the reduction of our debt, and our improved financial fundamentals.

Term Loan and Revolving Credit Facility

During the first nine months of 2011, we prepaid the remaining \$1.0 billion of our term loan maturities without premium or penalty.

We maintain a \$2.0 billion revolving credit facility, maturing in June 2013, with up to two one-year extension options subject to certain conditions. Any revolving credit facility borrowings bear interest at LIBOR plus an interest margin of between 1.55 percent and 2.625 percent, based on our corporate credit ratings (currently 2.05 percent). In addition, we are required to pay a facility fee based on our credit ratings and the total amount of revolving credit commitments, regardless of usage, under the agreement (currently 0.45 percent). The Fitch upgrade has resulted in a slightly favorable reduction in the facility fee and the interest rate on the facility. Any borrowings under the revolving credit facility are unrestricted and unsecured. In August 2011, we borrowed \$175 million under the facility and subsequently repaid the borrowed amounts during the third quarter of 2011. There were no amounts borrowed under our revolving credit facility as of September 30, 2011 or December 31, 2010.

Our revolving credit facility agreement requires that we maintain certain financial covenants, as follows:

	Covenant Requirement	Actual as of September 30, 2011
Maximum leverage ratio (1)	3.5 times	1.5 times
Minimum interest coverage ratio (2)	3.0 times	9.0 times

(1) Ratio of total debt to consolidated EBITDA, as defined by the agreement, as amended, for the preceding four consecutive fiscal quarters.

(2) Ratio of consolidated EBITDA, as defined by the agreement, as amended, to interest expense for the preceding four consecutive fiscal quarters.

The credit agreement provides for an exclusion from the calculation of consolidated EBITDA, as defined by the agreement, through the credit agreement maturity, of up to \$258 million in restructuring charges and restructuring-related expenses related to our previously announced restructuring plans, plus an additional \$300 million for any future restructuring initiatives, including our recently announced 2011 Restructuring program. As of

September 30, 2011, we had \$361 million of the combined restructuring charge exclusion remaining. In addition, any litigation-related charges and credits are excluded from the calculation of consolidated EBITDA until such items are paid or received; and up to \$1.5 billion of any future cash payments for future litigation settlements or damage awards (net of any litigation payments received); as well as litigation-related cash payments (net of cash receipts) of up to \$1.310 billion related to amounts that were recorded in the financial statements as of March 31, 2010 are excluded from the

Table of Contents

calculation of consolidated EBITDA. As of September 30, 2011, we had \$1.832 billion of the combined legal payment exclusion remaining.

As of and through September 30, 2011, we were in compliance with the required covenants. Our inability to maintain compliance with these covenants could require us to seek to renegotiate the terms of our credit facilities or seek waivers from compliance with these covenants, both of which could result in additional borrowing costs. Further, there can be no assurance that our lenders would grant such waivers.

Senior Notes

We had senior notes outstanding in the amount of \$4.2 billion as of September 30, 2011 and \$4.450 billion as of December 31, 2010. In January 2011, we paid \$250 million of our senior notes at maturity.

Other Arrangements

We also maintain a \$350 million credit and security facility secured by our U.S. trade receivables. In August 2011, we extended the maturity of this facility to August 2012. There were no amounts borrowed under this facility as of September 30, 2011 or December 31, 2010. In January 2011, we borrowed \$250 million under this facility and used the proceeds to prepay \$250 million of our term loan, and subsequently repaid the borrowed amounts during the first quarter of 2011.

In addition, we have accounts receivable factoring programs in certain European countries that we account for as sales under ASC Topic 860, Transfers and Servicing. These agreements provide for the sale of accounts receivable to third parties, without recourse, of up to approximately 330 million Euro (translated to approximately \$445 million as of September 30, 2011). We have no retained interests in the transferred receivables, other than collection and administrative responsibilities and, once sold, the accounts receivable are no longer available to satisfy creditors in the event of bankruptcy. We de-recognized \$387 million of receivables as of September 30, 2011 at an average interest rate of 2.5 percent, and \$363 million as of December 31, 2010 at an average interest rate of 2.0 percent. Further, we have uncommitted credit facilities with two commercial Japanese banks that provide for borrowings and promissory notes discounting of up to 18.5 billion Japanese yen (translated to approximately \$240 million as of September 30, 2011). We de-recognized \$188 million of notes receivable as of September 30, 2011 at an average interest rate of 1.8 percent and \$197 million of notes receivable as of December 31, 2010 at an average interest rate of 1.7 percent.

De-recognized accounts and notes receivable are excluded from trade accounts receivable, net in the accompanying unaudited condensed consolidated balance sheets. The European sovereign debt crisis may impact our future ability to transfer receivables to third parties. We continue to monitor the European economic environment for any collectibility issues related to our outstanding receivables in this region.

Equity

During the first nine months of 2011, we received \$22 million in proceeds from stock issuances related to our stock option and employee stock purchase plans, as compared to \$28 million in the first nine months of 2010. Proceeds from the exercise of employee stock options and employee stock purchases vary from period to period based upon, among other factors, fluctuations in the trading price of our common stock and in the exercise and stock purchase patterns of employees.

In May 2011, our Board of Directors and shareholders approved our 2011 Long-Term Incentive Plan (the 2011 LTIP), authorizing up to approximately 145 million shares of our common stock. The 2011 LTIP provides for the grant of restricted or unrestricted common stock, deferred stock units, options to acquire our common stock, stock appreciation rights, performance awards and other stock and non-stock awards. No further grants will be made under our 2003 Long-Term Incentive Plan. In addition, in July 2011, our Board of Directors approved a new share repurchase program authorizing the repurchase of up to \$1.0 billion in shares of our common stock and re-approved approximately 37 million shares remaining under a previous share repurchase program. Any repurchased shares may be used for general corporate purposes. During the third quarter of 2011, we repurchased 30 million shares of our common stock for approximately \$192 million, pursuant to our share repurchase authorizations.

Stock-based compensation expense related to our stock ownership plans was \$96 million for the first nine months of 2011, and \$122 million for the first nine months of 2010. Stock-based compensation expense varies from period to period based upon, among other factors: the timing, number and fair value of awards granted during the period; forfeiture levels related to unvested awards; and employee contributions to our employee stock purchase plan.

We generally make equity awards on an annual basis during the month of February. Prior to mid-2010, we expensed stock-based awards over the period between grant date and retirement eligibility, or immediately if the employee was retirement-eligible at the date of grant. Therefore, during the first quarter of each year, stock-based compensation expense has historically been significantly higher than other quarters. However, for awards granted after mid-2010, retirement-eligible employees must now provide one year of service after the date of grant in order to retain the award, should they retire. Therefore, for awards granted

Table of Contents

after mid-2010 to employees who will become retirement-eligible prior to vesting, we expense stock-based awards over the greater of the period between grant date and retirement-eligibility date or one year.

Contractual Obligations and Commitments

Certain of our acquisitions involve the payment of contingent consideration. We recorded additional liabilities related to contingent consideration arrangements of \$6 million in the third quarter of 2011 and \$305 million in the first nine months of 2011. See Note B - Acquisitions to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report for the estimated potential amount of future contingent consideration we could be required to pay associated with our acquisitions. Other than our debt repayments in the first nine months of 2011 and the related impact on interest payments, there have been no other material changes to our contractual obligations and commitments as reported in our 2010 Annual Report filed on Form 10-K.

Legal Matters

The medical device market in which we primarily participate is largely technology driven. Physician customers, particularly in interventional cardiology, have historically moved quickly to adopt new products and new technologies. As a result, intellectual property rights, particularly patents and trade secrets, play a significant role in product development and differentiation. However, intellectual property litigation is inherently complex and unpredictable. Furthermore, appellate courts can overturn lower court patent decisions.

In addition, competing parties frequently file multiple suits to leverage patent portfolios across product lines, technologies and geographies and to balance risk and exposure between the parties. In some cases, several competitors are parties in the same proceeding, or in a series of related proceedings, or litigate multiple features of a single class of devices. These forces frequently drive settlement not only for individual cases, but also for a series of pending and potentially related and unrelated cases. In addition, although monetary and injunctive relief is typically sought, remedies and restitution are generally not determined until the conclusion of the trial court proceedings and can be modified on appeal. Accordingly, the outcomes of individual cases are difficult to time, predict or quantify and are often dependent upon the outcomes of other cases in other geographies. Several third parties have asserted that certain of our current and former product offerings infringe patents owned or licensed by them. We have similarly asserted that other products sold by our competitors infringe patents owned or licensed by us. Adverse outcomes in one or more of the proceedings against us could limit our ability to sell certain products in certain jurisdictions, or reduce our operating margin on the sale of these products and could have a material adverse effect on our financial position, results of operations and/or liquidity.

In particular, although we have resolved multiple litigation matters with Johnson & Johnson, we continue to be involved in patent litigation with them, particularly relating to drug-eluting stent systems. Adverse outcomes in one or more of these matters could have a material adverse effect on our ability to sell certain products and on our operating margins, financial position, results of operations and/or liquidity.

In the normal course of business, product liability, securities and commercial claims are asserted against us. Similar claims may be asserted against us in the future related to events not known to management at the present time. We are substantially self-insured with respect to product liability claims and intellectual property infringement, and maintain an insurance policy providing limited coverage against securities claims. The absence of significant third-party insurance coverage increases our potential exposure to unanticipated claims or adverse decisions. Product liability claims, securities and commercial litigation, and other legal proceedings in the future, regardless of their outcome, could have a material adverse effect on our financial position, results of operations and/or liquidity. In addition, the medical device industry is the subject of numerous governmental investigations often involving regulatory, marketing and other business practices. These investigations could result in the commencement of civil and criminal proceedings, substantial fines, penalties and administrative remedies, divert the attention of our management and have a material adverse effect on our financial position, results of operations and/or liquidity.

Our accrual for legal matters that are probable and estimable was \$269 million as of September 30, 2011 and \$588 million as of December 31, 2010, and includes estimated costs of settlement, damages and defense. The decrease in our accrual is due primarily to the payment of \$296 million to the DOJ in order resolve the U.S. government investigation of Guidant Corporation related to product advisories issued in 2005, discussed in our 2010 Annual Report filed on Form 10-K. We continue to assess certain litigation and claims to determine the amounts, if any, that

management believes will be paid as a result of such claims and litigation and, therefore, additional losses may be accrued and paid in the future, which could materially adversely impact our operating results, cash flows and/or our ability to comply with our debt covenants. See further discussion of our material legal proceedings in Note K – Commitments and Contingencies to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report on Form 10-Q and in Note L – Commitments and Contingencies to our audited financial statements contained in Item 8 of our 2010 Annual Report filed on Form 10-K.

Recent Accounting Pronouncements

Table of Contents

Standards Implemented

ASC Update No. 2009-13

In October 2009, the FASB issued ASC Update No. 2009-13, Revenue Recognition (Topic 605) - Multiple-Deliverable Revenue Arrangements. Update No. 2009-13 provides principles and application guidance to determine whether multiple deliverables exist, how the individual deliverables should be separated and how to allocate the revenue in the arrangement among those separate deliverables. We adopted prospectively Update No. 2009-13 as of January 1, 2011. The adoption did not have a material impact on our results of operations or financial position for the three or nine months ended September 30, 2011 and is not expected to have a material impact in subsequent periods.

ASC Update No. 2010-20

In July 2010, the FASB issued ASC Update No. 2010-20, Receivables (Topic 310) - Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. Update No. 2010-20 requires expanded qualitative and quantitative disclosures about financing receivables, including trade accounts receivable, with respect to credit quality and credit losses, including a rollforward of the allowance for credit losses. We adopted Update No. 2010-20 for our year ended December 31, 2010, except for the rollforward of the allowance for credit losses, for which we included disclosure beginning in our first quarter ended March 31, 2011. Refer to Note A – Significant Accounting Policies to the consolidated financial statements included in our 2010 Annual Report filed on Form 10-K for disclosures surrounding concentrations of credit risk and our policies with respect to the monitoring of the credit quality of customer accounts. In addition, refer to Note H – Supplemental Balance Sheet Information to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report for a rollforward of our allowance for doubtful accounts during the three and nine months ended September 30, 2011 and 2010.

ASC Update No. 2010-29

In December 2010, the FASB issued ASC Update No. 2010-29, Business Combinations (Topic 805) - Disclosure of Supplementary Pro Forma Information for Business Combinations. Update No. 2010-29 clarifies paragraph 805-10-50-2(h) to require public entities that enter into business combinations that are material on an individual or aggregate basis to disclose pro forma information for such business combinations that occurred in the current reporting period, including pro forma revenue and earnings of the combined entity as though the acquisition date had been as of the beginning of the comparable prior annual reporting period only. We were required to adopt Update No. 2010-29 for material business combinations for which the acquisition date is on or after January 1, 2011. The acquisitions we completed in the first nine months of 2011 are not considered material on an individual or aggregate basis and, therefore, are not subject to the disclosure requirements of Update No. 2010-29.

Standards to be Implemented

ASC Update No. 2011-04

In May 2011, the FASB issued ASC Update No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. Update No. 2011-04 clarifies the FASB's intent about the application of certain existing fair value measurement and disclosure requirements and changes certain principles or requirements for measuring or disclosing information about fair value. We are required to adopt Update No. 2011-04 for our first quarter ending March 31, 2012 and do not believe its adoption will have a significant impact on our future results of operations or financial position.

ASC Update No. 2011-05

In May 2011, the FASB issued ASC Update No. 2011-05, Comprehensive Income (Topic 820): Presentation of Comprehensive Income. Update No. 2011-05 requires that net income, items of other comprehensive income and total comprehensive income be presented in one continuous statement or two separate consecutive statements. The amendments in this Update also require that reclassifications from other comprehensive income to net income be presented on the face of the financial statements. We are required to adopt Update No. 2011-05 for our first quarter ending March 31, 2012, with the exception of the presentation of reclassifications on the face of the financial statements, which has been deferred by the FASB until further notice. Our adoption of Update No. 2011-05 will not impact our future results of operations or financial position.

ASC Update No. 2011-08

In September 2011, the FASB issued ASC Update No. 2011-08, Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment. Update No. 2011-08 permits an entity to first assess qualitative factors to determine whether it is "more likely than not" that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary

Table of Contents

to perform the two-step goodwill impairment test. The "more likely than not" threshold is defined as having a likelihood of more than 50 percent. We are required to adopt Update No. 2011-08 for annual and interim goodwill impairment tests after December 15, 2011 and do not believe its adoption will have a significant impact on our future results of operations or financial position.

Additional Information

Use of Non-GAAP Financial Measures

To supplement our unaudited condensed consolidated financial statements presented on a GAAP basis, we disclose certain non-GAAP financial measures, including adjusted net income and adjusted net income per share that exclude certain amounts, and regional and divisional revenue growth rates that exclude the impact of changes in foreign currency exchange rates. These non-GAAP financial measures are not in accordance with generally accepted accounting principles in the United States.

The GAAP financial measure most directly comparable to adjusted net income is GAAP net income and the GAAP financial measure most directly comparable to adjusted net income per share is GAAP net income per share. To calculate regional and divisional revenue growth rates that exclude the impact of changes in foreign currency exchange rates, we convert actual net sales from local currency to U.S. dollars using constant foreign currency exchange rates in the current and prior period. The GAAP financial measure most directly comparable to this non-GAAP financial measure is growth rate percentages using net sales on a GAAP basis. Reconciliations of each of these non-GAAP financial measures to the corresponding GAAP financial measure are included elsewhere in this Quarterly Report.

Management uses these supplemental non-GAAP financial measures to evaluate performance period over period, to analyze the underlying trends in our business, to assess our performance relative to our competitors, and to establish operational goals and forecasts that are used in allocating resources. In addition, management uses these non-GAAP financial measures to further its understanding of the performance of our operating segments. The adjustments excluded from our non-GAAP financial measures are consistent with those excluded from our reportable segments' measure of profit or loss. These adjustments are excluded from the segment measures that are reported to our chief operating decision maker and are used to make operating decisions and assess performance.

We believe that presenting adjusted net income, adjusted net income per share, and regional and divisional revenue growth rates that exclude the impact of changes in foreign currency exchange rates in addition to the corresponding GAAP financial measures provides investors greater transparency to the information used by Boston Scientific management for its financial and operational decision-making and allows investors to see Boston Scientific's results "through the eyes" of management. We further believe that providing this information assists Boston Scientific's investors in understanding our operating performance and the methodology used by management to evaluate and measure such performance.

The following is an explanation of each of the adjustments that management excluded as part of these non-GAAP financial measures for the three and nine months ended September 30, 2011 and 2010, as well as reasons for excluding each of these individual items:

Adjusted Net Income and Adjusted Net Income per Share

Goodwill and other intangible asset impairment charges - These amounts represent non-cash net write-downs of the goodwill balance attributable to our U.S. CRM business, as well as certain intangible asset balances. Management removes the impact of these charges from our operating performance to assist in assessing cash generated from operations. Management believes this is a critical metric in measuring our ability to generate cash and invest in our growth. Therefore, these charges are excluded from management's assessment of operating performance and are also

excluded from the measures management uses to set employee compensation. Accordingly, management has excluded these charges for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance, particularly in terms of liquidity.

Acquisition-related charges (credits) - These adjustments consist of (a) acquisition-related gains on previously held equity interests, (b) contingent consideration expense, (c) a gain on an acquisition-related milestone receipt, (d) due diligence, other fees and exit costs, and (e) an inventory step-up adjustment. The acquisition-related gains on previously held equity interests is a non-recurring benefit associated with acquisitions completed in the first quarter of 2011. Contingent consideration expense is a non-cash charge representing accounting adjustments to state contingent consideration liabilities at their estimated fair value. These adjustments can be highly variable depending on the assessed likelihood and amount of future contingent consideration payments. The gain on an acquisition-related milestone resulted from a 2010 receipt related to Guidant Corporation's sale of its vascular intervention and endovascular solutions businesses to Abbott Laboratories, and is not indicative of future operating results. Due diligence, other fees and exit costs include legal, tax, severance and other expenses associated with prior acquisitions that are not representative of

Table of Contents

on-going operations. The inventory step-up adjustment is a non-cash charge related to acquired inventory directly attributable to prior acquisitions and is not indicative of our on-going operations, or on-going cost of products sold. Accordingly, management excluded these amounts for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

Divestiture-related (credits) charges - These amounts represent (a) gains resulting from business divestitures and (b) fees and separation costs associated with business divestitures. We completed the sale of our Neurovascular business in January 2011 and the resulting gain is not indicative of future operating performance and is not used by management to assess operating performance. Fees and separation costs represent those associated with our divestiture of the Neurovascular business and are not representative of on-going operations. Accordingly, management excluded these amounts for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

Restructuring and restructuring-related costs - These adjustments represent primarily severance, costs to transfer production lines from one facility to another, and other direct costs associated with our 2011 Restructuring plan, 2010 Restructuring plan, Plant Network Optimization program and 2007 Restructuring plan. These expenses are excluded by management in assessing operating performance, as well as from our operating segments' measures of profit and loss used for making operating decisions and assessing performance. Accordingly, management excluded these charges for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

Discrete tax items - These items represent adjustments of certain tax positions, which were initially established in prior periods as a result of intangible asset impairment charges; acquisition-, divestiture-, restructuring- or litigation-related charges (credits). These adjustments do not reflect expected on-going operating results. Accordingly, management excluded these amounts for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

Amortization expense - Amortization expense is a non-cash charge and does not impact our liquidity or compliance with the covenants included in our credit facility agreement. Management removes the impact of amortization from our operating performance to assist in assessing cash generated from operations. Management believes this is a critical metric in measuring our ability to generate cash and invest in our growth. Therefore, amortization expense is excluded from management's assessment of operating performance and is also excluded from the measures management uses to set employee compensation. Accordingly, management has excluded amortization expense for purposes of calculating these non-GAAP financial measures to facilitate an evaluation of our current operating performance, particularly in terms of liquidity.

Regional and Divisional Revenue Growth Rates Excluding the Impact of Changes in Foreign Currency Exchange Rates

Changes in foreign currency exchange rates - The impact of changes in foreign currency exchange rates is highly variable and difficult to predict. Accordingly, management excludes the impact of changes in foreign currency exchange rates for purposes of reviewing regional and divisional revenue growth rates to facilitate an evaluation of our current operating performance and a comparison to our past operating performance.

Adjusted net income, adjusted net income per share and regional and divisional revenue growth rates that exclude the impact of changes in foreign currency exchange rates are not in accordance with generally accepted accounting principles in the United States and should not be considered in isolation from or as a replacement for the most directly comparable GAAP financial measures. Further, other companies may calculate these non-GAAP financial measures differently than Boston Scientific does, which may limit the usefulness of those measures for comparative purposes.

Safe Harbor for Forward-Looking Statements

Certain statements that we may make from time to time, including statements contained in this report and information incorporated by reference into this report, constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may

be identified by words like “anticipate,” “expect,” “project,” “believe,” “plan,” “may,” “estimate,” “intend” and similar words. forward-looking statements are based on our beliefs, assumptions and estimates using information available to us at the time and are not intended to be guarantees of future events or performance. These forward-looking statements include, among other things, statements regarding our financial performance; our results of operations; our growth strategy, including our priority growth initiatives and investments; our business strategy; the integration of acquired businesses and technologies; our ability to successfully separate the Neurovascular business; the timing and impact of our restructuring and plant optimization initiatives, including expected costs and cost savings; the use of our cash flow, including to repay debt and invest in our business; goodwill impairment analysis and

Table of Contents

charges; the market for our products and our market share; clinical trials, including timing and results; product development and iterations; product performance; timing of regulatory approvals; our regulatory and quality compliance; our investments in and reallocation of expenditures for research and development efforts; the strength of our technologies and product pipeline; new and existing product launches, including their timing, acceptance and impact; our sales and marketing strategy and our investments in our sales organization; our emerging markets strategy and investments; the ability of our suppliers to meet our requirements; our ability to meet customer demand for our products; reimbursement practices; the effect of new accounting pronouncements on our financial results; competitive pressures; the outcome of matters before taxing authorities; our tax position; intellectual property, governmental proceedings and litigation matters; adequacy of our reserves; anticipated expenses and capital expenditures and our ability to finance them; and our ability to meet the financial covenants required by our term loan and revolving credit facility. If our underlying assumptions turn out to be incorrect, or if certain risks or uncertainties materialize, actual results could vary materially from the expectations and projections expressed or implied by our forward-looking statements. As a result, readers are cautioned not to place undue reliance on any of our forward-looking statements. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future. We have identified forward-looking statements here and elsewhere in this Quarterly Report on Form 10-Q, which are based on certain risks and uncertainties in accordance with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Factors that could cause actual results to differ materially from those expressed in forward-looking statements are contained here and elsewhere in this Quarterly Report on Form 10-Q.

CRM Business

- Our ability to retain and attract key members of our CRM sales force and other key CRM personnel;
- Our estimates for the U.S. and worldwide CRM markets, as well as our ability to increase CRM net sales and recapture market share, and the impact of physician reaction to recent study results published by the Journal of the American Medical Association, government investigations and audits of hospitals, physician alignment to hospitals and other market and economic conditions on the overall number of procedures performed and average selling prices in the U.S. CRM market;
- The overall performance of, and referring physician, implanting physician and patient confidence in, our and our competitors' CRM products and technologies, including our COGNIS® CRT-D and TELIGEN® ICD systems and our LATITUDE® Patient Management System;
- The results of CRM clinical trials and market studies undertaken by us, our competitors or other third parties;
- Our ability to timely and successfully launch next-generation products and technology features worldwide, including our INGENIO™ pacemaker system and our next-generation INCEPTA™, ENERGEN™ and PUNCTUA™ defibrillators in additional geographies; and
- Competitive offerings in the CRM market and related declines in average selling prices, as well as the timing of receipt of regulatory approvals to market existing and anticipated CRM products and technologies.

Coronary Stent Business

- Volatility in the coronary stent market, our estimates for the worldwide coronary stent market, our ability to increase coronary stent system net sales, competitive offerings and the timing of receipt of regulatory approvals, both in the U.S. and internationally, to market existing and anticipated drug-eluting stent technology and other stent platforms;
- Our ability to timely and successfully launch next-generation products and technology features, including our PROMUS® Element™ stent system in the U.S. and Japan;
- The results of coronary stent clinical trials undertaken by us, our competitors or other third parties;
- Our ability to maintain or expand our worldwide market positions through reinvestment in our two drug-eluting stent programs;
- Our ability to manage the mix of net sales of everolimus-eluting stent systems supplied to us by Abbott relative to our total drug-eluting stent system net sales and to launch on-schedule in the U.S. and Japan our PROMUS® Element™ next-generation internally-developed and self-manufactured everolimus-eluting stent system with gross profit margins

more comparable to our TAXUS® stent systems;

• Our share of the U.S. and worldwide drug-eluting stent markets, procedural volumes, the average number of stents used per procedure, average selling prices, and the penetration rate (a measure of the mix between bare-metal and

Table of Contents

drug-eluting stents used across procedures) of drug-eluting stent technology in the U.S. and international markets;

- The overall performance of, and continued physician confidence in, our and other drug-eluting stent systems;
- Our reliance on Abbott's manufacturing capabilities and supply chain in the U.S. and Japan, and our ability to align our everolimus-eluting stent system supply from Abbott with customer demand in these regions;
- Enhanced requirements to obtain regulatory approval in the U.S. and around the world and the associated impact on new product launch schedules and the cost of product approval and compliance; and
- Our ability to retain and attract key members of our cardiology sales force and other key personnel.

Other Businesses

- The overall performance of, and continued physician confidence in, our products and technologies;
- Our ability to timely and successfully launch next-generation products and technology features in a timely manner;
 - The results of clinical trials undertaken by us, our competitors or other third parties;
- Our ability to maintain or expand our worldwide market positions through investments in next-generation technologies; and
- Our ability to attract and retain key members of our sales force and other key personnel.

Litigation and Regulatory Compliance

- Risks generally associated with our regulatory compliance and quality systems in the U.S. and around the world;
- Our ability to minimize or avoid future field actions or FDA warning letters relating to our products and the on-going inherent risk of potential physician advisories or field actions related to medical devices;
- Heightened global regulatory enforcement arising from political and regulatory changes as well as economic pressures;
- The effect of our litigation and risk management practices, including self-insurance, and compliance activities on our loss contingencies, legal provision and cash flows;
- The impact of, diversion of management attention, and costs to resolve, our stockholder derivative and class action, patent, product liability, contract and other litigation, governmental investigations and legal proceedings;
- The impact of increased pressure on the availability and rate of third-party reimbursement for our products and procedures worldwide; and
- Legislative or regulatory efforts to modify the product approval or reimbursement process, including a trend toward demonstrating clinical outcomes, comparative effectiveness and cost efficiency.

Innovation and Manufacturing

- Our ability to complete planned clinical trials successfully, to obtain regulatory approvals and to develop and launch products on a timely basis within cost estimates, including the successful completion of in-process projects from purchased research and development;
- Our ability to manage research and development and other operating expenses consistent with our expected net sales growth;
- Our ability to develop and launch next-generation products and technologies successfully across all of our businesses;
- Our ability to avoid disruption in the supply of certain components, materials or products; or to quickly secure additional or replacement components, materials or products on a timely basis;
- Our ability to fund with cash or common stock any acquisitions or alliances, or to fund contingent payments associated with these acquisitions or alliances;
- Our ability to achieve benefits from our focus on internal research and development and external alliances and acquisitions as well as our ability to capitalize on opportunities across our businesses;
- Our failure to succeed at, or our decision to discontinue, any of our growth initiatives, as well as competitive interest in the same or similar technologies;
- Our ability to integrate the strategic acquisitions we have consummated or may consummate in the future;
- Our ability to prioritize our internal research and development project portfolio and our external investment portfolio

Table of Contents

to identify profitable revenue growth opportunities and keep expenses in line with expected revenue levels, or our decision to sell, discontinue, write down or reduce the funding of any of these projects;

• The timing, size and nature of strategic initiatives, market opportunities and research and development platforms available to us and the ultimate cost and success of these initiatives; and

• Our ability to successfully identify, develop and market new products or the ability of others to develop products or technologies that render our products or technologies noncompetitive or obsolete.

International Markets

• Our dependency on international net sales to achieve growth, in particular, with respect to emerging markets, such as Brazil, China and India;

• Changes in our international structure and leadership;

Risks associated with international operations and investments, including compliance with local legal and regulatory requirements, changes in reimbursement practices and policies, and enforcement and protection of intellectual property rights;

• Our ability to maintain or expand our worldwide market positions through investments in emerging markets;

• The potential effect of foreign currency fluctuations and interest rate fluctuations on our net sales, expenses and resulting margins; and

• Uncertainties related to economic, political and legal conditions.

Liquidity

Our ability to generate sufficient cash flow to fund operations, capital expenditures, global expansion initiatives, litigation settlements and strategic investments and acquisitions, as well as to effectively manage our debt levels and covenant compliance;

• Our ability to access the public and private capital markets when desired and to issue debt or equity securities on terms reasonably acceptable to us;

• Our ability to resolve open tax matters favorably and realize substantially all of our deferred tax assets and the impact of changes in tax laws; and

• The impact of examinations and assessments by domestic and international taxing authorities on our tax provision, financial condition or results of operations.

Strategic Initiatives

Our ability to implement, fund, and achieve timely and sustainable cost improvement measures consistent with our expectations, including our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program;

• Our ability to maintain or expand our worldwide market positions in the various markets in which we compete or seek to compete, as we diversify our product portfolio and focus on emerging markets;

Risks associated with significant changes made or to be made to our organizational structure pursuant to our 2011 Restructuring plan, 2010 Restructuring plan and Plant Network Optimization program, or to the membership and responsibilities of our executive committee or Board of Directors;

• Our ability to direct our research and development efforts to conduct more cost-effective clinical studies, accelerate the time to bring new products to market, and develop products with higher returns;

• The successful separation of divested businesses, including the performance of related transition services;

• Our ability to retain and attract key employees and avoid business disruption and employee distraction as we execute our POWER strategy, global compliance program, restructuring plans and divestitures of assets or businesses; and

• Our ability to maintain management focus on core business activities while also concentrating on implementing strategic and restructuring initiatives.

Several important factors, in addition to the specific risk factors discussed in connection with forward-looking statements individually in this Quarterly Report on Form 10-Q could affect our future results and growth rates and could cause those results and rates to differ materially from those expressed in the forward-looking statements and the risk factors contained in this report. These additional factors include, among other things, future economic, competitive, reimbursement and regulatory conditions;

Table of Contents

new product introductions; demographic trends; intellectual property, litigation and government investigations; financial market conditions; and future business decisions made by us and our competitors, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Therefore, we wish to caution each reader of this report to consider carefully these factors as well as the specific factors discussed with each forward-looking statement and risk factor in this report and as disclosed in our filings with the SEC. These factors, in some cases, have affected and in the future (together with other factors) could affect our ability to implement our business strategy and may cause actual results to differ materially from those contemplated by the statements expressed in this Quarterly Report on Form 10-Q.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We develop, manufacture and sell medical devices globally and our earnings and cash flows are exposed to market risk from changes in currency exchange rates and interest rates. We address these risks through a risk management program that includes the use of derivative financial instruments. We operate the program pursuant to documented corporate risk management policies. We do not enter derivative transactions for speculative purposes. Gains and losses on derivative financial instruments substantially offset losses and gains on underlying hedged exposures. Furthermore, we manage our exposure to counterparty risk on derivative instruments by entering into contracts with a diversified group of major financial institutions and by actively monitoring outstanding positions.

Our currency risk consists primarily of foreign currency denominated firm commitments, forecasted foreign currency denominated intercompany and third-party transactions and net investments in certain subsidiaries. We use both nonderivative (primarily European manufacturing operations) and derivative instruments to manage our earnings and cash flow exposure to changes in currency exchange rates. We had currency derivative instruments outstanding in the contract amount of \$4.174 billion as of September 30, 2011 and \$5.077 billion as of December 31, 2010. We recorded \$83 million of other assets and \$161 million of other liabilities to recognize the fair value of these derivative instruments as of September 30, 2011, as compared to \$82 million of other assets and \$189 million of other liabilities as of December 31, 2010. A ten percent appreciation in the U.S. dollar's value relative to the hedged currencies would increase the derivative instruments' fair value by \$249 million as of September 30, 2011 and \$297 million as of December 31, 2010. A ten percent depreciation in the U.S. dollar's value relative to the hedged currencies would decrease the derivative instruments' fair value by \$305 million as of September 30, 2011 and by \$363 million as of December 31, 2010. Any increase or decrease in the fair value of our currency exchange rate sensitive derivative instruments would be substantially offset by a corresponding decrease or increase in the fair value of the hedged underlying asset, liability or forecasted transaction, resulting in minimal impact on our consolidated statements of operations.

Our interest rate risk relates primarily to U.S. dollar borrowings partially offset by U.S. dollar cash investments. We have historically used interest rate derivative instruments to manage our earnings and cash flow exposure to changes in interest rates. We entered into interest rate derivative contracts having a notional amount of \$850 million in the first quarter of 2011 to convert fixed-rate debt associated with certain of our senior notes into floating-rate debt, and subsequently terminated these hedges during the third quarter of 2011. We had no interest rate derivative instruments outstanding as of September 30, 2011 and December 31, 2010. As of September 30, 2011, \$4.258 billion of our outstanding debt obligations was at fixed interest rates, representing nearly 100 percent of our total debt.

See Note E – Fair Value Measurements to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report for further information regarding our derivative financial instruments.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our Chief Executive Officer (CEO), and our Executive Vice President and Chief Financial Officer (CFO), evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2011 pursuant to Rule 13a-15(b) of the Securities Exchange Act. Disclosure controls and procedures are designed to ensure that material information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such material information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. Based on their evaluation, our CEO and CFO concluded that, as of September 30, 2011, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

During the quarter ended September 30, 2011, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 1. LEGAL PROCEEDINGS

See Note K – Commitments and Contingencies to our unaudited condensed consolidated financial statements contained in Item 1 of this Quarterly Report, which is incorporated herein by reference.

ITEM 1A. RISK FACTORS

In addition to the information set forth below and other information contained elsewhere in this report, you should carefully consider the factors discussed in “Part I, Item 1A. Risk Factors” in our 2010 Annual Report filed on Form 10-K, and in “Part II, Item 1A. Risk Factors” in our Quarterly Reports filed on Form 10-Q for the quarterly periods ended March 31, 2011 and June 30, 2011, which could materially affect our business, financial condition or future results.

If we are unable to attract, retain and focus key personnel, it could have an adverse effect on our business, financial condition and results from operations.

We constantly monitor the dynamics of the economy, the healthcare industry and the markets in which we compete; and we continue to assess opportunities to improve operational effectiveness and better alignment of expenses with revenues, while preserving our ability to make needed investments in our priority growth initiatives, research and development projects, capital and our people that we believe are essential to our long-term success. In our industry, there is substantial competition for key personnel in the regions in which we operate and we may face increased competition for such employees, particularly in emerging markets as the trend toward globalization continues. If we are unable to attract key personnel in a timely manner, including key sales and other personnel who have critical industry experience and relationships in the regions in which we operate, including in emerging markets such as Brazil, China and India, it may have an adverse effect on our business and our ability to drive growth, including through execution of our strategic initiatives. Furthermore, some of the key personnel for whom we compete have post-employment arrangements with their current or former employer that may impact our ability to hire them or expose us and them to claims. In addition, if we are unable to retain and focus our existing key personnel it may have an adverse effect on our business, financial condition and results from operations. Moreover, we recently completed a number of changes in our senior management structure, which may lead to inefficiencies and have an adverse effect on our business and results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information with respect to purchases by Boston Scientific Corporation of equity securities that are registered by us pursuant to Section 12 of the Securities Exchange Act of 1934 during the three months ended September 30, 2011:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs *	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs *
07/01/11 - 07/31/11				
08/01/11 - 08/31/11	30,000,000	\$6.37	30,000,000	\$1,011,694,800
09/01/11 - 09/30/11				
Total	30,000,000	\$6.37	30,000,000	\$1,011,694,800

* On July 28, 2011, we announced that our Board of Directors had approved a new program authorizing the repurchase of up to \$1.0 billion of our common stock and re-approved approximately 37 million shares remaining under an existing share repurchase program. The approximate aggregate dollar value of the shares that may yet be purchased under the plans and programs, in the table above, was calculated using a stock price of \$5.91 for the 37 million shares authorized under the existing repurchase program, which was the closing price of our common stock on September 30, 2011, as reported on the New York Stock Exchange.
