### Explanatory Note

This Form 10-KSB/A is being filed by Empire Petroleum Corporation (the "Company"), as Amendment No. 1 (this "Amendment" or "Form 10-KSB/A"), to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2003 (the "Prior Form 10-KSB"), for the purpose of amending Items 6, 7 and 8A of Part II and Item 13 of Part III of the Prior Form 10-KSB.

As previously reported in the Company's Current Report on Form 8-K filed on November 21, 2005, the Board of Directors of the Company concluded on November 16, 2005 that its previously issued annual and quarterly financial statements for fiscal years 2003 and 2004 and quarterly financial statements for the first two quarters of 2005 should not be relied upon because of errors in those financial statements and that the Company would restate its previously issued annual financial statements for fiscal year 2003, annual and quarterly financial statements for fiscal year 2004 and quarterly financial statements for the first two quarters of 2005 to make the necessary accounting adjustments. The restatement pertains to the Company's accounting for exit activities in connection with its office space in Canada, which was leased by the former management of the Company, abandoned upon the resignation of such management and subleased by a third party for a period of time thereafter.

This Amendment is being filed in connection with the restatement described above. Although this Amendment amends and restates each of Items 6, 7 and 8A of Part II and Item 13 of Part III of the Prior Form 10-KSB in its entirety, the information contained herein has not been updated to reflect events or developments that may have occurred subsequent to December 31, 2003, except to the limited extent as specifically described in Items 6 and 8A of Part II below.

# Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

## PART II

### ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

#### RESTATEMENT

On November 11, 2005 the Company filed a Form 8-K with the SEC disclosing that it would restate its previously issued financial statements for the year ended December 31, 2003, annual and quarterly financial statements for 2004, and quarterly financial statements for the first two quarters of 2005 after determining that it had erroneously accounted for its exit activities in connection with its former office space in Canada.

In the third quarter of 2003, the Company recorded an expense for its obligation under the lease for the period up to the balance sheet date. It continued to record an expense of \$13,200 per quarter through March 31, 2005 related to the lease (see Note 9 to the financial statements). After further review, the Company's management determined that it should have accrued an obligation for the lease equal to total amounts owed from the "cease use date" (the date in January 2003 on which the Company's subtenant moved out of the office space) through the end of the lease term. Additionally, since the lease obligation was in Canadian dollars, the Company should have recorded a currency exchange gain or loss on its obligation in each quarter. Based on this analysis, the Company and its Board of Directors concluded that its previously issued financial statements for the year ended December 31, 2003, annual and quarterly financial statements for 2004 and quarterly financial statements for the first two quarters of 2005 required adjustments of the amounts previously reported for accounts payable and accrued liabilities, and general and administrative expenses. The effect of the restatement was to increase the previously reported net loss by \$118,817 for the year ended December 31, 2003. The restatement had no effect on the net loss per share for the year ended December 31, 2003.

#### Cautionary Note Regarding Forward-Looking Statements

All statements, other than statements of historical fact contained in this report are forward-looking statements. Forward-looking statements generally are accompanied by words such as "anticipate," "believe," "estimate," "expect," "may," "might," "potential," "project" or similar statements. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove correct. Factors that could cause results to differ materially from the results discussed in such forward-looking statements include:

- \* the need for additional capital,
- \* the costs expected to be incurred in exploration and development,
- \* unforeseen engineering, mechanical or technological difficulties in drilling wells,
- \* uncertainty of exploration results,
- \* operating hazards,
- \* competition from other natural resource companies,

-4-

- \* the fluctuations of prices for oil and gas,

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

\* the effects of governmental and environmental regulation, and

\* general economic conditions and other risks described in the Company's filings with the Securities and Exchange Commission.

Information on these and other risk factors are discussed under "Factors That May Affect Future Results" below. Accordingly, the actual results of operations in the future may vary widely from the forward-looking statements included herein, and all forward-looking statements in this Form 10-KSB are expressly qualified in their entirety by the cautionary statements in this paragraph.

Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis, judgment, belief and expectations only as of the date hereof. The Company undertakes no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof.

### Factors That May Affect Future Results

The Company does not have any significant on-going income producing oil and gas properties and has limited financial resources.

As of December 31, 2003, the Company did not have any significant on-going income producing oil and gas producing properties. For the past three fiscal years, the Company has financed its operations primarily from advances made to the Company by Albert E. Whitehead, the Company's Chief Executive Officer. Mr. Whitehead has no obligation to advance the Company any additional money, and there is no assurance that he will do so. The Company will not be able to continue operations unless it is able to obtain funding from outside sources.

The report of the Company's independent auditor regarding the Company's financial statements has been modified because of a going concern uncertainty.

The Company reported losses of \$676,909 and \$5,692,735 for the years ending December 31, 2003 and 2002, respectively. The Company also has an accumulated deficit of \$8,429,066 as of December 31, 2003. The Company can provide no assurance that it will be profitable in the future and, if the Company does not become profitable, it may have to suspend its operations. As a result of the foregoing, the audit report of the Company's independent auditors relating to the Company's financial statements has been modified because of a going concern uncertainty.

If the Company is able to raise the funds necessary to continue its operations, its future performance will be affected by the successful drilling results of its inventory of unproved locations in Wyoming and Nevada. The failure of drilling activities to achieve anticipated quantities of economically attractive reserves and production would have a material adverse effect on the Company's liquidity, operations and financial results.

The Company could be adversely affected by fluctuations in oil and gas prices.

Even if the Company's drilling activities achieve commercial quantities of economically attractive reserves and production revenue, the Company will remain subject to prevailing prices for oil, natural gas and natural gas liquids, which are dependent upon numerous factors such as weather, economic, political and regulatory developments and competition from other sources of

energy. The volatile nature of the energy markets makes it particularly difficult to estimate future prices of oil, natural gas and natural gas

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

liquids. Prices of oil, natural gas and natural gas liquids are subject to wide fluctuations in response to relatively minor changes in circumstances, and there can be no assurance that future prolonged decreases in such prices will not occur. All of these factors are beyond the control of the Company. Any significant decline in oil and gas prices could have a material adverse effect on the Company's liquidity, operations and financial condition.

The Company could be adversely affected by increased costs of service providers utilized by the Company.

In accordance with customary industry practice, the Company relies on independent third party service providers to provide most of the services necessary to drill new wells, including drilling rigs and related equipment and services, horizontal drilling equipment and services, trucking services, tubulars, fracing and completion services and production equipment. The industry has experienced significant price increases for these services during the last year and this trend is expected to continue into the future. These cost increases could in the future significantly increase the Company's development costs and decrease the return possible from drilling and development activities, and possibly render the development of certain proved undeveloped reserves uneconomical.

The Company is subject to numerous drilling and operating risks.

Oil and gas drilling activities are subject to numerous risks, many of which are beyond the Company's control. The Company's operations may be curtailed, delayed or canceled as a result of title problems, weather conditions, compliance with governmental requirements, mechanical difficulties and shortages or delays in the delivery of equipment. In addition, the Company's properties may be susceptible to hydrocarbon drainage from production by other operators on adjacent properties. Industry operating risks include the risk of fire, explosions, blow-outs, pipe failure, abnormally pressured formations and environmental hazards such as oil spills, gas leaks, ruptures or discharges of toxic gases, the occurrence of any of which could result in substantial losses to the Company due to injury or loss of life, severe damage to or destruction of property, natural resources and equipment, pollution or other environmental damage, clean-up responsibilities, regulatory investigation and penalties and suspension of operations. The Company anticipates that it will utilize horizontal drilling techniques. The horizontal drilling activities involve greater risk of mechanical problems than conventional vertical drilling operations.

The Company's insurance policies may not adequately protect the Company against certain unforeseen risks.

In accordance with customary industry practice, the Company maintains insurance against some, but not all, of the risks described herein. There can be no assurance that any insurance will be adequate to cover the Company's losses or liabilities. The Company cannot predict the continued availability of insurance, or its availability at premium levels that justify its purchase.

The Company's activities are subject to extensive governmental regulation.

Oil and gas operations are subject to various federal, state and local governmental regulations that may be changed from time to time in response to economic or political conditions. From time to time, regulatory agencies have

imposed price controls and limitations on production in order to conserve supplies of oil and gas. In addition, the production, handling, storage, transportation and disposal of oil and gas, by-products thereof and other

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

substances and materials produced or used in connection with oil and gas operations are subject to regulation under federal, state and local laws and regulations primarily relating to protection of human health and the environment. To date, expenditures related to complying with these laws and for remediation of existing environmental contamination have not been significant in relation to the results of operations of the Company. There can be no assurance that the trend of more expansive and stricter environmental legislation and regulations will not continue.

The Company is subject to various environmental risks, and governmental regulation relating to environmental matters.

The Company is subject to a variety of federal, state and local governmental laws and regulations related to the storage, use, discharge and disposal of toxic, volatile or otherwise hazardous materials. These regulations subject the Company to increased operating costs and potential liability associated with the use and disposal of hazardous materials. Although these laws and regulations have not had a material adverse effect on the Company's financial condition or results of operations, there can be no assurance that the Company will not be required to make material expenditures in the future. Moreover, the Company anticipates that such laws and regulations will become increasingly stringent in the future, which could lead to material costs for environmental compliance and remediation by the Company. Any failure by the Company to obtain required permits for, control the use of, or adequately restrict the discharge of hazardous substances under present or future regulations could subject the Company to substantial liability or could cause its operations to be suspended. Such liability or suspension of operations could have a material adverse effect on the Company's business, financial condition and results of operations.

The Company is subject to intense competition.

The Company operates in a highly competitive environment and competes with major and independent oil and gas companies for the acquisition of desirable oil and gas properties, as well as for the equipment and labor required to develop and operate such properties. Many of these competitors have financial and other resources substantially greater than those of the Company.

The Company currently depends on the Company's Chief Executive Officer.

The Company is dependent on the experience, abilities and continued services of its current Chief Executive Officer and President, Albert E. Whitehead. Mr. Whitehead has played a significant role in the development and management of the Company. The loss or reduction of services of Mr. Whitehead could have a material adverse effect on the Company.

The Company's stock trades in a limited public market, is subject to price volatility, and there can be no assurance that an active trading market will be sustained.

There has been a limited public trading market for the Company's Common Stock, and there can be no assurance that an active trading market will be sustained. There can be no assurance that the Common Stock will trade at or above any particular price in the public market, if at all. The trading price of the Common Stock could be subject to significant fluctuations in response to variations in quarterly operating results or even mild expressions of interest

-7-

on a given day. Accordingly, the Common Stock should be expected to experience substantial price changes in short periods of time. Even if the Company is performing according to its plan and there is no legitimate company-specific financial basis for this volatility, it must still be expected that substantial

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

percentage price swings will occur in the Company's Common Stock for the foreseeable future.

Certain restricted shares of the Company will be eligible for sale in the future which could affect the prevailing market price of the Company's Common Stock.

Certain of the outstanding shares of the Company's Common Stock are "restricted securities" under Rule 144 of the Securities Act, and (except for shares purchased by "affiliates" of the Company's as such term is defined in Rule 144) would be eligible for sale as the applicable holding periods expire. In the future, these shares may be sold only pursuant to a registration statement under the Securities Act or an applicable exemption, including pursuant to Rule 144. Under Rule 144, a person who has owned common stock for at least one year may, under certain circumstances, sell within any three-month period a number of shares of common stock that does not exceed the greater of 1% of the then outstanding shares of common stock or the average weekly trading volume during the four calendar weeks prior to such sale. A person who is not deemed to have been an affiliate of the Company at any time during the three months preceding a sale, and who has beneficially owned the restricted securities for the last two years is entitled to sell all such shares without regard to the volume limitations, current public information requirements, manner of sale provisions and notice requirements. Sale or the expectation of sales of a substantial number of shares of Common Stock in the public market by selling stockholders could adversely affect the prevailing market price of the Common Stock, possibly having a depressive effect on any trading market for the Common Stock, and may impair the Company's ability to raise capital at that time through additional sale of its equity securities.

The Company does not expect to declare or pay any dividends in the foreseeable future.

The Company has not declared or paid any dividends on its Common Stock. The Company currently intends to retain future earnings to fund the development and growth of its businesses, to repay indebtedness and for general corporate purposes, and therefore, does not anticipate paying any cash dividends on its Common Stock in the foreseeable future.

The Company's Common Stock may be subject to secondary trading restrictions related to penny stocks.

Certain transactions involving the purchase or sale of Common Stock of the Company may be affected by a SEC rule for "penny stocks" that imposes additional sales practice burdens and requirements upon broker-dealers that purchase or sell such securities. For transactions covered by this penny stock rule, broker-dealers must make certain disclosures to purchasers prior to purchase or sale. Consequently, the penny stock rule may impede the ability of broker-dealers to purchase or sell the Company's securities for their customers and the ability of persons now owning or subsequently acquiring the Company's securities to resell such securities.

The Company's principal shareholders own a significant amount of Common Stock.

Albert E. Whitehead and his wife beneficially own approximately 38% of the

-8-

Company's Common Stock. As a result, by coordinating with other shareholders, such as the former management of the Company, Mr. and Mrs. Whitehead may be able to control the outcome of shareholder votes, including votes concerning the election of directors, the adoption or amendment of provisions in the Company's certificate of incorporation or bylaws and the approval of merger

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

and other significant corporate transactions. This concentrated ownership makes it unlikely that any other holder or group of holders of Common Stock will be able to affect the way the Company is managed or the direction of its business. These factors may also precipitate, delay or prevent a change in the management or voting control of the Company.

### Plan of Operation

The Company has no significant on-going income producing oil and gas properties at December 31, 2003. An oil and gas test well (Timber Draw #1-AH) was drilled in January 2001 on the Cheyenne River Project. The Timber Draw #1-AH well encountered flows of oil and natural gas during the drilling period and was subsequently completed as an oil well. The well was shut-in on June 22, 2001 to conserve natural gas, which was flared during the test period. For more information about this test well and the BLM's determination that it does not consider the well economic, see "Oil and Gas Development Prospects: under Item 1, Description of Business.

Beginning in April of 2003, the Company initiated testing of the #1-AH well for up to ten days per month for a three month period by authority of the BLM, which testing was subsequently extended by the BLM. During the test periods indicated below, the #1-AH well produced the following number of barrels during the following months in 2003:

Month	Days in Test Period	Number Of Barrels
April	7	1,335
June	10	1,421
July	10	1,321
August	10	1,029
October	10	954
November	10	693

All of the Company's limited revenues in 2003 were attributable to the above described production from its #1-AH well. The Company plans to continue testing the #1-AH well through March 2004. The test results will then be evaluated to determine what future production practice might be utilized.

As of December 31, 2003, the Company had \$21,622 of cash on hand. The Company expects that its cash on hand and advances the Company anticipates it will receive from its Chairman will be sufficient to fund its operations for the next 3 months; however, there is no assurance that such advances will be made. The Company's material commitments consist of a lease payment on the Cheyenne River Prospect in April 2003, of which the Company's portion will be approximately \$29,077, which will be paid by the third party pursuant to the 2003 Farmout Agreement. The Company's share of the rentals on the Nevada leases will be \$8,921. In addition, the Company leases office space in Tulsa, Oklahoma from an unrelated party. The lease calls for monthly lease payments of \$1,009 through the end of the term of the lease in December 2004. The Company's former management (Messrs. McGrain and Jacobsen) entered into a lease agreement for office space in Canada. This office was closed after Messrs. McGrain and Jacobsen resigned as officers of the Company. This lease agreement calls for

-9-

monthly lease and tax payments of approximately \$6,834 (Canadian) through April, 2006. No lease payment was made subsequent to December of 2002 and in January of 2003, the Company was notified that the lease had been terminated without prejudice to the landlord's right to hold the Company liable for future damages related to lost rent.

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

Management plans to continue to support the Company financially during the next several months. It will also determine the best method to explore its Gabbs Valley Prospect, look for merger opportunities and consider public or private financings.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Because estimates and assumptions require significant judgment, future actual results could differ from those estimates and could have a significant impact on the Company's results of operations, financial position and cash flows. The Company re-evaluates its estimates and assumptions at least on a quarterly basis. The following policies may involve a higher degree of estimation and assumption:

### Off-Balance Sheet Arrangements

None

### Critical Accounting Policies

Successful Efforts Accounting - Under the successful efforts method of accounting, the Company capitalizes all costs related to property acquisitions and successful exploratory wells, all development costs and the costs of support equipment and facilities. Certain costs of exploratory wells are capitalized pending determination that proved reserves have been found. Such determination is dependent upon the results of planned additional wells and the cost of required capital expenditures to produce the reserves found. All costs related to unsuccessful exploratory wells are expensed when such wells are determined to be non-productive; other exploration costs, including geological and geophysical costs, are expensed as incurred. The application of the successful efforts method of accounting requires management's judgment to determine the proper designation of wells as either developmental or exploratory, which will ultimately determine the proper accounting treatment of the costs incurred. The results from a drilling operation can take considerable time to analyze, and the determination that commercial reserves have been discovered requires both judgment and application of industry experience. Wells may be completed that are assumed to be productive and actually deliver oil and gas in quantities insufficient to be economic, which may result in the abandonment of the wells at a later date. The evaluation of oil and gas leasehold acquisition costs requires management's judgment to estimate the fair value of exploratory costs related to drilling activity in a given area.

Impairment of unproved oil and gas properties. Unproved leasehold costs and exploratory drilling in progress are capitalized and are reviewed periodically for impairment. Costs related to impaired prospects or unsuccessful exploratory drilling are charged to expense. Management's assessment of the results of exploration activities, commodity price outlooks, planned future sales or expiration of all or a portion of such leaseholds impact the amount and timing

-10-

of impairment provisions. An impairment expense could result if oil and gas prices decline in the future as it may not be economic to develop some of these unproved properties.

Estimates of future dismantlement, restoration, and abandonment costs. Through December 31, 2002, the Company had accounted for future abandonment costs of wells and related facilities through its depreciation calculation in accordance

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

with the provisions of Statement of Financial Accounting Standards ("SFAS") No. 19, "Financial Accounting and Reporting by Oil and Gas Producing Companies" and industry practice. The accounting for future development and abandonment costs changed on January 1, 2003, with the adoption of SFAS No. 143 "Accounting for Asset Retirement Obligations". See "Recent Accounting Pronouncements" in footnote 2 of the financial statements included elsewhere in this Form 10-KSB for a further discussion of this new standard. Under both methods of accounting, the accrual is based on estimates of these costs for each of the Company's properties based upon the type of production structure, reservoir characteristics, depth of the reservoir, market demand for equipment, currently available procedures and consultations with construction and engineering consultants. Because these costs typically extend many years into the future, estimating these future costs is difficult and requires management to make estimates and judgments that are subject to future revisions based upon numerous factors, including changing technology and the political and regulatory environment and, beginning in 2003, estimates as to the proper discount rate to use and timing of abandonment.

On December 31, 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure" ("SFAS No. 148"). SFAS No. 148 amends SFAS No. 123, "Accounting for Stock-Based Compensation" ("SFAS No. 123"), to provide alternative methods of transition to SFAS No. 123's fair value method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure provisions of SFAS No. 123 and APB Opinion No. 28, "Interim Financial Reporting", to require disclosure in the summary of significant accounting policies of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income and earnings per share in annual and interim financial statements. While SFAS No. 148 does not amend SFAS No. 123 to require companies to account for employee stock options using the fair value method, the disclosure provisions of the standard are applicable to all companies with stock-based employee compensation, regardless of whether they account for that compensation using the fair value method or the intrinsic value method. The Company adopted the disclosure provisions of SFAS No. 148 in its financial statements included elsewhere in this Form 10-KSB.

### ITEM 7. FINANCIAL STATEMENTS

The financial statements of the Company are set forth on pages F-1 through F-13 at the end of this Form 10-KSB.

### ITEM 8A. CONTROLS AND PROCEDURES

As of December 31, 2003, the Company carried out an evaluation under the supervision of the Company's Chief Executive Officer (and principal financial officer) of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Securities Exchange Act Rules 13a-15(e) and 15d-15(e). Based on this evaluation, the Company's Chief Executive Officer (and principal financial officer) concluded that the Company's disclosure controls and procedures were effective at such time. However, prior to the date of

-11-

the filing of this Form 10-KSB/A and as a result of the Company's decision to restate its financial statements as described under the "Explanatory Note" in this Form 10-KSB/A above, the Company completed a second evaluation under the supervision of the Company's Chief Executive Officer (and principal financial officer) of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2003. In connection with this second evaluation and based upon the Company's decision to restate

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

its financial statements for the fiscal year ended December 31, 2003, the Company's Chief Executive Officer (and principal financial officer) concluded that the Company's disclosure controls and procedures were not effective as of December 31, 2003.

During the quarter ended December 31, 2003, the Company engaged a third party financial consultant to oversee the Company's financial reporting to ensure compliance with applicable disclosure requirements. During the quarter ended December 31, 2003, there was no change in the Company's internal controls over financial reporting that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting, other than as described in the preceding sentence.

EMPIRE PETROLEUM CORPORATION

FINANCIAL STATEMENTS

DECEMBER 31, 2003

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Stockholders of Empire Petroleum Corporation

We have audited the accompanying balance sheet of Empire Petroleum Corporation

Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

as of December 31, 2003, and the related statements of operations, cash flows and stockholders' equity for the years ended December 31, 2003 and 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Empire Petroleum Corporation as of December 31, 2003, and the results of its operations and its cash flows for the years ended December 31, 2003 and 2002 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has been incurring significant losses and has a significant working capital deficiency at December 31, 2003. The ultimate recoverability of the Company's investment in its oil and gas interests is dependent upon the existence and discovery of economically recoverable oil and gas reserves and the ability of the Company to obtain necessary financing to develop the interests. This condition raises substantial doubt about its ability to continue as a going concern. Management's plan concerning this matter is also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As described in Note 9 to the financial statements, the 2003 financial statements have been restated for an error in the application of accounting principles.

EMPIRE PETROLEUM CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2003 and 2002

General:

On July 20, 2001, Americomm Resources Corporation merged with its wholly- owned subsidiary, Empire Petroleum Corporation, and simultaneously changed the name of the corporation to Empire Petroleum Corporation (the "Company"). Both the merger and name change were effective as of August 15, 2001. Americomm Resources Corporation was originally incorporated in the State of Utah on the 22nd day of August 1983, as Chambers Energy Corporation. On the 7th day of March 1985, the state of incorporation was changed to Delaware by means of a merger with Americomm Corporation, a Delaware corporation formed for the

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

purpose of effecting the said change. In July 1995, the Company changed its name to Americomm Resources Corporation. The Company is involved in oil and gas exploration.

### 1. Continuing operations:

The continuation of the Company is dependent upon the ability of the Company to attain future profitable operations. These financial statements have been prepared on the basis of United States generally accepted accounting principles applicable to a company with continuing operations, which assume that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its obligations in the normal course of operations. Management believes the going concern assumption to be appropriate for these financial statements. If the going concern assumption were not appropriate for these financial statements, then adjustments might be necessary to the carrying value of assets and liabilities, reported expenses and the balance sheet classifications used.

The Company continues to explore and develop its oil and gas interests. The ultimate recoverability of the Company's investment in its oil and gas interests is dependent upon the existence and discovery of economically recoverable oil and gas reserves, confirmation of the Company's interest in the oil and gas interests, the ability of the Company to obtain necessary financing to further develop the interests, and upon the ability to attain future profitable production. The Company has been incurring significant losses in recent years and has a significant working capital deficiency as of December 31, 2003. The Company recognized an impairment charge of \$266,778 in 2003 and \$6,496,614 in 2002 on its oil and gas property . See Note 9, Property and Equipment.

Management plans to continue to support the Company financially during the next several months. The Company anticipates that a new exploratory well in which the Company will have an interest will be drilled by a third party in the Cheyenne River Prospect during the second quarter of 2004. The Company also intends to determine the best approach to explore its Gabbs Valley Prospect in Nevada, look for merger opportunities and consider public or private financings.

### 2. Significant accounting policies:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

F-6

#### (a) Capital assets:

The Company uses the successful efforts method of accounting for its oil and gas activities. Costs incurred are deferred until exploration and completion results are evaluated. At such time, costs of activities with economically recoverable reserves are capitalized as proven properties, and costs of unsuccessful or uneconomical activities are expensed.

#### (b) Per share amounts:

Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings Per share" requires presentation of basic earnings per share ("Basic EPS") and diluted earnings per share ("Diluted EPS"). The computation of basic earnings per share is computed by dividing earnings available to common stockholders by the weighted average number of outstanding common shares during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

during the period. The computation of diluted EPS does not assume conversion, exercise or contingent exercise of securities that would have an anti-dilutive effect on losses.

(c) Income taxes:

The Company accounts for income taxes in accordance with the asset and liability method of accounting for income taxes set forth in SFAS No. 109, "Accounting for Income Taxes." Under the asset and liability method of SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to the taxable income in the years in which those temporary differences are expected to be recovered or settled. Under SFAS 109, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

(d) Financial instruments:

The carrying value of current assets and current liabilities approximate their fair value due to the relatively short period to maturity of the instruments.

(e) Stock option plan:

The Company has a stock option plan that is described in note 5 and uses the intrinsic value method of accounting for stock-based compensation in accordance with Accounting Principles Board Opinion ("APB") No. 25. When stock options are granted, no compensation expense is recorded. Consideration received on the exercise of the stock options is credited to additional paid in capital.

The Company has adopted the disclosure requirements of SFAS No. 123, "Accounting for Stock-Based Compensation", as amended by SFAS No. 148 "Accounting for Stock Based Compensation - Transition and Disclosure, an Amendment of FASB Statement No. 123."

The Company applies APB Opinion No. 25 and related interpretations in accounting for its Incentive Plan described in footnote 5. Accordingly, no stock based employee compensation is reflected in net earnings as all options granted had an exercise price equal to the market value of the underlying

F-7

common stock on the date of grant. The following table illustrates the effect on net earnings and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock based employee compensation.

	2003 Restated	2002 Restated
Net Earnings - as reported	\$(676,909)	\$(5,692,735)
Deduct: Total stock-based compensation expense determined under fair value based methods for all awards, net of related tax effects	(16,000)	-
Net Earnings - pro forma	\$(692,909)	(5,692,735)

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

Earnings per share - as reported	\$ (0.02)	\$ (0.24)
Earnings per share - pro forma	\$ (0.02)	\$ (0.24)

The fair value of options was \$.08 for options granted in 2003. No options were granted in 2002. The fair value of options granted under the Incentive Plan was estimated on the date of grant using the Black-Scholes option-pricing model. The following assumptions were used for options granted in 2003: no dividend yield, expected volatility of 209.0%, risk free interest rate of 4.25% and expected life of ten years.

### (f) Obligations associated with the retirement of assets

The Company has adopted the provisions of SFAS No. 143, "Accounting for Asset Retirement Obligations" ("SFAS No. 143"). SFAS No. 143 amended SFAS No. 19, "Financial Accounting and Reporting by Oil and Gas Producing Companies," and, among other matters, addresses financial accounting and reporting for legal obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS No. 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred, with the associated asset retirement cost capitalized as part of the related asset and allocated to expense over the asset's useful life.

This is a change from the approach taken under SFAS No. 19, whereby an amount for an asset retirement obligation was recognized using a cost-accumulation measurement approach. Under that approach, the obligation was reported as a contra-asset recognized as part of depletion and depreciation over the life of the asset without discounting. Management has determined that adopting SFAS No. 143 has had no significant effect on the Company's financial statements since abandonment costs for which it is responsible are not material.

### (g) Recent Accounting Pronouncements

In June 2002, the Financial Accounting Standards Board ("FASB") issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities." This statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred.

#### F-8

Under previous guidance, a liability for an exit cost was recognized at the date of the commitment to an exit plan. The provisions of this statement will be applied prospectively, as applicable, and are effective for exit or disposal activities that are initiated after December 31, 2002. The adoption of SFAS No. 146 did not have a material effect on the Company's financial position or results of operations.

In November 2002, the FASB issued FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" ("FIN 45"). This interpretation elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under specified guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The disclosure requirements in this interpretation were effective for financial statements of interim or annual periods ending after December 15, 2002. Additionally, the recognition of a guarantor's obligation should be applied on a prospective basis to guarantees issued after December 31, 2002. The adoption

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

of FIN 45 did not have a material effect on the Company's financial position or results of operations.

In January 2003, the FASB issued FIN 46, "Consolidation of Variable Interest Entities", that provides guidance in determining when variable interest entities should be consolidated in the financial statements of the primary beneficiary. For the Company, the consolidation provisions of FIN 46, as revised, are effective in fiscal years beginning after December 15, 2004. The adoption of FIN 46 is not expected to have a material effect on the Company's financial position or results of operations.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments With Characteristics of Both Liabilities and Equity." SFAS No. 150 changes the classification in the statement of financial position of certain common financial instruments from either equity or mezzanine presentation to liabilities and requires an issuer of those financial statements to recognize changes in fair value or redemption amount, as applicable, in earnings. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and with one exception, is effective at the beginning of the first interim period beginning after June 15, 2003. The effect of adopting SFAS No. 150 is recognized as a cumulative effect of an accounting change as of the beginning of the period of adoption. Restatement of prior periods is not permitted. SFAS No. 150 did not have any impact on the Company's financial position or results of operations.

### 3. Conversion of notes and accounts payable:

In May, 2002, the Company converted two notes payable totaling \$176,666 to 903,231 shares of the Company's common stock at a price of \$.20 per share. The notes had been issued in 2001 and bore interest at 12% annually.

During 2002, the Company issued 61,284 shares of the Company's common stock as payment for accounts payable of \$12,283.

In March, 2003, the Company converted a note payable to the Albert E. Whitehead Living Trust of which the Company's Chief Executive Officer is Trustee, in the amount of \$170,000 plus interest due to 874,071 shares of the Company's stock at a price of \$.21 per share.

F-9

During 2003, the Albert E. Whitehead Living Trust accepted 7,966,244 shares of the Company's common stock as payment for advances the trust had made to the Company at the conversion rate of \$.03 per share under terms of an offer made to all creditors. The Lacy E. Whitehead Living Trust, of which the wife of the Company's Chief Executive Officer is Trustee, and another creditor of the Company also converted \$59,045 and \$16,854 in debt, respectively, to 1,968,172 and 561,797, respectively, shares of common stock as a part of the offer.

### 4. Stock options:

Under a stock option plan adopted in 1995, the Company may grant options for up to 1,600,000 shares of common stock. The Board of Directors has sole discretion for the granting of the options. Stock options granted under the plan expire ten years from the date of grant plus 30 days. The exercise price of the options is the fair market value on the date of grant.

A summary of the Company's Incentive Plan as of December 31, 2003 and changes during the year is presented below:

Weighted Average

Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

	Shares	Exercise Price
	-----	-----
Outstanding at Beginning of Year 2003	981,666	.89
Granted	200,000	.10
	-----	
Outstanding at End of Year 2003	1,181,666	.75
	=====	=====

There were no options granted during the year ended December 31, 2002.

The following table summarizes information about stock options outstanding at December 31, 2003:

Options Outstanding			Options Exercisable		
Range of Exercise Prices	Number Outstanding at 12/31/03	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable at 12/31/03	Weighted Average Exercise Price
\$0.10-\$1.375	1,181,666	5.30 Years	\$0.75	1,181,666	\$0.75

During the year ended December 31, 2003, the Company granted an option to an employee of the Company to purchase 50,000 shares of the Company's common stock and an option to Mr. Kinard, a member of the Board of Directors, to purchase 150,000 shares of the Company's common stock, both of which have an exercise price of \$0.10 per share.

5. Income taxes:

The provision for income taxes differs from the amount obtained by applying the Federal income tax rate of 34% to income before income taxes. The difference relates to the following items:

Statutory tax rate	F-10 34%
Expected recovery	\$(190,000)
Benefit of losses not recognized	190,000
	-----
Tax provision (benefit) as reported	\$ -
	-----

The components of deferred income taxes at December 31, 2003 are as follows:

Deferred tax assets:	
Loss carry-forwards	\$ 937,000
Valuation allowance	(458,000)
	-----
	479,000
Deferred tax liabilities:	
Property and equipment	479,000
	-----

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

Net deferred taxes \$ -

---

At December 31, 2003, the Company had net operating loss carryforwards of Approximately \$2,750,000 which expire beginning in 2010.

Utilization of the Company's loss carryforwards is dependent on realizing Taxable income. Deferred tax assets for these carryforwards have been reduced by a valuation allowance.

### 6. Related party transactions:

On March 15, 2002, the Albert E. Whitehead Living Trust, of which the Company's Chief Executive Officer is Trustee, loaned the Company \$170,000 in the form of a convertible note. The note accrued interest at the rate of 10% per year, had a one year term, and was convertible into shares of the Company's Common Stock at the rate of \$.21 per share. In February 2003, the note was converted into common stock of the Company. During 2002, the Albert E. Whitehead Living Trust also paid \$245,181 of operating expenses on behalf of the Company. The advance was repaid in the form of Common Stock in 2003 at the rate of \$.03 per share in an offer made to all creditors of the Company, including the Lacy E. Whitehead Living Trust as further described in Note 4.

During 2003, the Company's Chief Executive Officer advanced an additional \$128,957 for operating expenses which the Company has recorded in accounts payable in the accompanying balance sheet. See Note 4.

### 7. Operating lease:

The Company leases office space under operating lease agreements with unrelated parties, which will expire in 2004 and 2006.

The future minimum lease payments under the operating leases are as follows:

2004	\$52,800
2005	52,800
2006	17,600
	<hr/>
	\$123,200

F-11

Rent expense for the years ended December 31, 2003 and 2002, respectively, was \$111,492 and \$41,913.

Since December 2002, the Company has not paid the monthly lease and tax payments of approximately \$6,834 (Canadian) on the Canadian office lease. The Company has been notified that the lease has been terminated without prejudice to the landlord's right to hold the Company liable for future damages related to lost rent. For the year ended December 31, 2003, the Company recorded an expense and related liability in the amount of \$178,907 which represents its remaining obligation on the Canadian office lease. Additionally, the Company has recorded a foreign currency exchange loss of \$32,310 for differences in the exchange rate related to its remaining obligation under the lease.

### 8. Property and equipment:

In 2002, the Company's management determined that an impairment allowance of \$6,496,614 was necessary to properly value the Company's oil and gas properties bringing the net book value of the oil and gas properties to \$594,915. The basis for the impairment was the determination by the United States Bureau of Land Management ("BLM") that it does not consider the Timber Draw #1-AH well economic. In other words, under the BLM's criteria for economic determination, the well will not pay out the cost incurred to drill and complete the well.

## Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

However, by authority of the BLM, for the period from April to November 2003, the well was tested for production using production periods of ten days per month. The BLM also advised the Company that since it did not commence another test well prior to August 12, 2002, the Timber Draw Unit had been terminated. Furthermore, a bottom hole pressure survey conducted in April 2002 indicated a limited reservoir for the well. The basis of the impairment described above was calculated using an estimated \$10 per acre market price for the leases multiplied by the Company's working interest. During 2003, the Company recorded impairment charges of \$266,778 based on working interest percentages granted to a third party for performance of certain activities and management's assessment of certain undeveloped lease values.

In 2003, the Company acquired a 10% interest in the Gabbs Valley Prospect of Western Nevada by issuing 2,000,000 shares of Company stock. The Company has recorded its investment at \$200,000. The Company's other property and equipment, totaling \$20,086 at December 31, 2002, consists entirely of office furniture, fixtures and equipment, which are fully depreciated.

### 9. Restatement:

On November 11, 2005, the Company filed a Form 8-K with the SEC disclosing that it would restate its previously issued financial statements for the year ended December 31, 2003, annual and quarterly financial statements for 2004, and quarterly financial statements for the first two quarters of 2005 after determining that it had erroneously accounted for its exit activities in connection with its former office space in Canada.

In the third quarter of 2003, the Company recorded an expense for its obligation under the lease for the period up to the balance sheet date. It continued to record an expense of \$13,200 per quarter through March 31, 2005 related to the lease (see Note 7). After further review, the Company's management determined that it should have accrued an obligation for the lease equal to total amounts owed from the "cease use date" (the date in January 2003 on which the Company's subtenant moved out of the office space) through the end of the lease term. Additionally, since the lease obligation was in Canadian dollars, the Company should have recorded a currency exchange gain or loss on

F-12

its obligation in each quarter. Based on this analysis, the Company and its Board of Directors concluded that its previously issued financial statements for the year ended December 31, 2003, annual and quarterly financial statements for 2004 and quarterly financial statements for the first two quarters of 2005 required adjustments of the amounts previously reported for accounts payable and accrued liabilities, and general and administrative expenses. The following table summarizes the adjustments required to previously reported amounts included in these financial statements.

	Year Ended December 31, 2003	
	Previously Reported	As Restated

CERTIFICATION

I, Albert E. Whitehead, Chief Executive Officer (and principal financial officer) of Empire Petroleum Corporation, certify that:

1. I have reviewed this annual report on Form 10-KSB of Empire Petroleum Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the small business issuer as of, and for, the periods presented in this report;
4. The small business issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the small business issuer and have:

Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the small business issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Evaluated the effectiveness of the small business issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(c) Disclosed in this report any change in the small business issuer's internal control over financial reporting that occurred during the small business issuer's fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, the small business issuer's internal control over financial reporting; and

5. The small business issuer's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the small business issuer's auditors and the audit committee of small business issuer's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the small business issuer's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the small business issuer's internal control over financial reporting.

CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the annual report of Empire Petroleum Corporation (the "Company") on Form 10-KSB for the period ending December 31, 2003, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Albert E. Whitehead, Chief Executive Officer (and principal financial officer) of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

February 8, 2006

/s/ Albert E. Whitehead  
Albert E. Whitehead, Chief Executive Officer  
and principal financial officer

Edgar Filing: EMPIRE PETROLEUM CORP - Form 10KSB/A

A signed original of this written statement required by Section 906 has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

The foregoing certification is being furnished to the Securities and Exchange Commission as an exhibit to the Report and shall not be considered filed as part of the Report.
