

BANK OF NOVA SCOTIA /
Form 424B2
January 29, 2014

Filed Pursuant to Rule 424(b)(2)
Registration No. 333-185049

Pricing Supplement dated January 27, 2014 to the

Prospectus dated August 1, 2013

Prospectus Supplement dated August 8, 2013 and Product Prospectus Supplement (Rate Linked Notes, Series A) dated August 8, 2013

The Bank of Nova Scotia

\$11,030,000

Capped Fixed-to-Floating Rate Notes, Series A

Due January 30, 2026

- 100% repayment of principal at maturity, subject to the credit risk of the Bank
- 12-year stated term
- Quarterly interest payments
- Fixed Interest Rate of 4.00% per annum for the first four quarterly Interest Periods
- Floating Interest Rate of 0.80 times the 30-Year Constant Maturity Swap Rate (30CMS), subject to a cap of 10.00% per annum

The Capped Fixed-to-Floating Rate Notes, Series A Due January 30, 2026 (the “Notes”) offered hereunder are unsecured obligations of The Bank of Nova Scotia and are subject to investment risks including possible loss of the Principal Amount invested due to the credit risk of The Bank of Nova Scotia. As used in this pricing supplement, the “Bank,” “we,” “us” or “our” refers to The Bank of Nova Scotia.

The Notes will not be listed on any securities exchange or automated quotation system.

NEITHER THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION (“SEC”) NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE NOTES OR PASSED UPON THE ACCURACY OR THE ADEQUACY OF THIS DOCUMENT, THE ACCOMPANYING PROSPECTUS, PROSPECTUS SUPPLEMENT OR PRODUCT PROSPECTUS SUPPLEMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE. THE NOTES ARE NOT INSURED BY THE CANADA DEPOSIT INSURANCE CORPORATION PURSUANT TO THE CANADA DEPOSIT INSURANCE CORPORATION ACT, THE UNITED STATES FEDERAL DEPOSIT INSURANCE CORPORATION, OR ANY OTHER GOVERNMENTAL AGENCY OF CANADA, THE UNITED STATES

OR ANY OTHER JURISDICTION.

Scotia Capital (USA) Inc., our affiliate, will purchase the Notes from us for distribution to agents or other registered broker-dealers or will offer the Notes directly to investors. Scotia Capital (USA) Inc. and Barclays Capital Inc. (together, the "Underwriters") or any of their affiliates or agents may use this pricing supplement in market-making transactions in the Notes after their initial sale. Unless we, the Underwriters or one of our affiliates or agents selling such Notes to you informs you otherwise in the confirmation of sale, this pricing supplement is being used in a market-making transaction. See "Supplemental Plan of Distribution (Conflicts of Interest)" in this pricing supplement and "Supplemental Plan of Distribution" on page PS-32 of the accompanying product prospectus supplement.

Investment in the Notes involves certain risks. You should refer to "Additional Risk Factors" in this pricing supplement and "Additional Risk Factors Specific to the Notes" beginning on page PS-5 of the accompanying product prospectus supplement and "Risk Factors" beginning on page S-2 of the accompanying prospectus supplement.

| | Per Note Total | |
|--|----------------|-----------------|
| Price to public | 100.00% | \$11,030,000.00 |
| Underwriting commissions ¹ | 2.50% | \$275,750.00 |
| Proceeds to The Bank of Nova Scotia ² | 97.50% | \$10,754,250.00 |

The difference between the estimated value of your Notes and the original issue price reflects costs that the Bank or its affiliates expect to incur and profits that the Bank or its affiliates expect to realize in connection with hedging activities related to the Notes. These costs and profits will likely reduce the secondary market price, if any, at which the Underwriters are willing to purchase the Notes. The Underwriters may, but are not obligated to, purchase any Notes. As a result, you may experience an immediate and substantial decline in the market value of your Notes on the Trade Date and you may lose a substantial portion of your initial investment. The Bank's profit in relation to the Notes will vary based on the difference between (i) the amounts received by the Bank in connection with the issuance and the reinvestment return received by the Bank in connection with those funds and (ii) the costs incurred by the Bank in connection with the issuance of the Notes and the hedging transactions. The Bank or its affiliates will also realize a profit that will be based on the (i) cost of creating and maintaining the hedging transactions minus (ii) the payments received on the hedging transactions.

We will deliver the Notes in book-entry form through the facilities of The Depository Trust Company ("DTC") on or about January 30, 2014 against payment in immediately available funds.

Scotia Capital (USA) Inc. Barclays Capital Inc.

The estimated value of the Notes as determined by the Bank, referencing calculations provided by a third party hedge provider, is approximately \$963.50 (96.35%) per \$1,000 Principal Amount of the Notes. See "The Bank's Estimated Value of the Notes" in this pricing supplement for additional information. The Underwriters or one of their affiliates will purchase the Notes at the Principal Amount and as part of the distribution will pay discounts and underwriting commissions of \$25.00 (2.50%) per \$1,000 Principal Amount of the Notes in connection with the distribution of the Notes. Scotia Capital (USA) Inc. will also receive a structuring and development fee of up to \$0.50 (0.05%) per \$1,000 Principal Amount of the Notes. See "Supplemental Plan of Distribution (Conflicts of Interest)" in this pricing supplement.

Excludes potential profits from hedging. For additional considerations relating to hedging activities see "Additional Risk Factors - The Inclusion of Dealer Spread and Projected Profit from Hedging in the Original Issue Price is Likely to Adversely Affect Secondary Market Prices" in this pricing supplement.

SUMMARY

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the prospectus, the prospectus supplement and the product prospectus supplement, each filed with the SEC. See “Additional Terms of Your Notes” in this pricing supplement.

Issuer: The Bank of Nova Scotia (the “Issuer” or the “Bank”)

CUSIP/ISIN: CUSIP 064159DK9 / ISIN US064159DK99

Type of Note: Capped Fixed-to-Floating Rate Notes, Series A

Minimum Investment: \$1,000

Denominations: \$1,000 and integral multiples of \$1,000 in excess thereof

Principal Amount: \$1,000 per Note

Currency: U.S. Dollars

Trade Date: January 27, 2014

Pricing Date: January 27, 2014

Original Issue Date: January 30, 2014

Maturity Date: January 30, 2026

Business Day: Any day which is neither a legal holiday nor a day on which banking institutions are authorized or obligated by law, regulation or executive order to close in New York and Toronto.

The quarterly payments made on the 30th calendar day of each January, April, July and October commencing April 30, 2014 and ending on the Maturity Date.

Interest Payment

Dates: The quarterly interest payments will be made on each Interest Payment Date, provided that if these days are not Business Days, interest will be made on the dates determined as described below.

Interest Period: For each Interest Payment Date, the quarterly period from, and including, the previous Interest Payment Date (or the Original Issue Date in the case of the first Interest Payment Date) to, but excluding, the applicable Interest Payment Date.

Fixed and Floating Interest Periods: The Notes will bear interest at the Fixed Interest Rate for the first four quarterly Interest Periods (such period, "Fixed Interest Period") and at the Floating Interest Rate thereafter (such period, "Floating Interest Period"), subject to a Maximum Rate/Cap.
From and including the Original Issue Date to but excluding January 30, 2015 (Fixed Interest Period)

The Fixed Interest Rate

Interest Rate:

From and including January 30, 2015 to but excluding the Maturity Date (Floating Interest Period)

The Floating Interest Rate

| | |
|---|--|
| Fixed Interest Rate: | 4.00% per annum |
| Floating Interest Rate: | For each Interest Period during the Floating Interest Period, a variable rate per annum equal to the product of: Leverage Factor x (CMS Reference Index), subject to the Maximum Rate/Cap. The 30-Year Constant Maturity Swap Rate (which we refer to as “30CMS”), expressed as a percentage and calculated as of the CMS Reference Index Determination Date for such any Interest Period during the Floating Interest Period. |
| CMS Reference Index: | 30CMS is, on any day, the fixed rate of interest payable on an interest rate swap with a 30-year maturity as reported on Reuters page ISDAFIX1 or any successor page thereto at 11:00 a.m. New York City time on that day; provided that for the determination of 30CMS on any calendar day, the “CMS reference determination date” shall be that calendar day unless that calendar day is not a U.S. Government Securities Business Day, in which case the 30CMS level shall be the 30CMS level on the immediately preceding U.S. Government Securities Business Day. |
| Leverage Factor: | 0.80 |
| Maximum Rate/Cap: | 10.00% per annum |
| CMS Reference Index Determination Date: | During the Floating Interest Period, two (2) U.S. Government Securities Business Days prior to the related Interest Reset Date at the start of the applicable Interest Period. |
| U.S. Government Securities Business Day: | Any day except for a Saturday, Sunday or a day on which The Securities Industry and Financial Markets Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities. |
| Reference Page: | Reuters page ISDAFIX1 |
| Interest Reset Dates: | Each Interest Payment Date |
| Day Count Fraction: | 30/360, unadjusted, following business day convention (all as more fully described below). |
| CMS Rate Fallback Provisions: | If 30CMS is not displayed by 11:00 a.m. New York City time on the Reuters Screen ISDAFIX1 page on any day on which the level of the CMS Reference Index must be determined, such affected rate for such day will be determined on the basis of the mid-market semi-annual swap rate quotations to the Calculation Agent provided by five leading swap dealers in the New York City interbank market (the “Reference Banks”) at approximately 11:00 a.m., New York City time, on such day, and, for this purpose, the mid-market semi-annual swap rate means the mean of the bid and offered rates for the semi-annual fixed leg, calculated on a 30/360 day count basis, of a fixed-for-floating U.S. Dollar interest rate swap transaction with a term equal to the applicable 30 year maturity commencing on such day and in a representative amount with an acknowledged dealer of good credit in the swap market, where the floating leg, calculated on an actual/360 day count basis, is equivalent to USD-LIBOR-BBA with a designated maturity of three months. The Calculation Agent will request the principal New York City office of each of the Reference Banks to provide a quotation of its rate. If at least three quotations are provided, the rate for that day will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality, one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If fewer |

than three quotations are provided as requested, the rate will be determined by the Calculation Agent in good faith and in a commercially reasonable manner.

P-3

Form of Notes: Book-entry

Calculation Agent: Scotia Capital Inc., an affiliate of the Bank

Underwriters: Scotia Capital (USA) Inc. and Barclays Capital Inc.
The Notes will constitute direct, unsubordinated and unsecured obligations of the Bank ranking *pari passu* with all other direct, unsecured and unsubordinated indebtedness of the Bank from time to time outstanding (except as otherwise prescribed by law). Holders will not have the benefit of any insurance under the provisions of the Canada Deposit Insurance Corporation Act, the U.S. Federal Deposit Insurance Act or under any other deposit insurance regime

Status: The Bank (or its successor) may redeem the Notes, in whole but not in part, at a redemption price equal to the Principal Amount thereof together with accrued and unpaid interest to the date fixed for redemption, if it is determined that changes in tax laws or their interpretation will result in the Bank (or its successor) becoming obligated to pay, on the next Interest Payment Date, additional amounts with respect to the Notes. See “Tax Redemption” in this pricing supplement.

Tax Redemption:

Listing: The Notes will not be listed on any securities exchange or quotation system

Use of Proceeds: General corporate purposes

Clearance and Settlement: Depository Trust Company

Terms Incorporated: All of the terms appearing under the caption “General Terms of the Notes” beginning on page PS-10 in the accompanying product prospectus supplement, as modified by this pricing supplement

ADDITIONAL TERMS OF YOUR NOTES

You should read this pricing supplement together with the prospectus dated August 1, 2013, as supplemented by the prospectus supplement dated August 8, 2013 and the product prospectus supplement (Rate Linked Notes, Series A) dated August 8, 2013, relating to our Senior Note Program, Series A, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict, this pricing supplement will control. ***The Notes may vary from the terms described in the accompanying product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors Specific to the Notes” in the accompanying product prospectus supplement, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. You may access these documents on the SEC website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website at <http://www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0000009631>):

Prospectus dated August 1, 2013:

http://www.sec.gov/Archives/edgar/data/9631/000089109213006699/e54840_424b3.htm

Prospectus Supplement dated August 8, 2013:

http://www.sec.gov/Archives/edgar/data/9631/000089109213006938/e54968_424b3.htm

Product Prospectus Supplement (Rate Linked Notes, Series A), dated August 8, 2013

http://www.sec.gov/Archives/edgar/data/9631/000089109213006942/e54970_424b5.htm

The Bank of Nova Scotia has filed a registration statement (including a prospectus, a prospectus supplement, and a product prospectus supplement) with the SEC for the offering to which this pricing supplement relates. Before you invest, you should read those documents and the other documents relating to this offering that we have filed with the SEC for more complete information about us and this offering. You may obtain these documents without cost by visiting EDGAR on the SEC Website at www.sec.gov. Alternatively, The Bank of Nova Scotia, any agent or any dealer participating in this offering will arrange to send you the prospectus, the prospectus supplement and the product prospectus supplement if you so request by calling 1-416-866-3672.

PAYMENT AT MATURITY

We will pay you the Principal Amount of your Notes on the Maturity Date, plus the final interest payment.

In the event that the stated Maturity Date is not a Business Day, then relevant repayment of principal will be made on the next Business Day, regardless of whether such Business Day falls in the month following that in which the stated Maturity Date would otherwise have fallen (“following business day convention”).

Interest

The Notes are Capped Fixed-to-Floating Rate Notes. The Fixed Interest Rate will apply for the first four quarterly Interest Periods and will be 4.00% per annum. The Floating Interest Rate will apply thereafter and will equal a variable rate per annum equal to the product of 0.80 times 30CMS, subject to a Maximum Rate/Cap of 10.00% per annum.

We describe payments as being based on a “day count fraction” of “30/360, unadjusted, following business day convention.”

This means that the number of days in the Interest Payment period will be based on a 360-day year of twelve 30-day months (“30/360”) and that the number of days in the Interest Payment period will be based on the days on which interest would have been paid if each such day was a Business Day, not on the actual days on which payment is made (“unadjusted”).

If any Interest Payment Date falls on a day that is not a Business Day (including any Interest Payment Date that is also the Maturity Date), the relevant Interest Payment will be made on the next Business Day (“following business day convention”).

EVENTS OF DEFAULT AND ACCELERATION

If the Notes have become immediately due and payable following an Event of Default (as defined in the accompanying prospectus) with respect to the Notes, the Calculation Agent will determine (i) your Principal Amount and (ii) any accrued but unpaid interest payable based upon the then-applicable interest rate calculated on the basis of a 360-day year consisting of twelve 30-day months.

If the Notes have become immediately due and payable following an Event of Default, you will not be entitled to any additional payments with respect to the Notes. For more information, see “Description of the Debt Securities We May Offer — Events of Default” beginning on page 21 of the accompanying prospectus.

P-5

TAX REDEMPTION

The Bank (or its successor) may redeem the Notes, in whole but not in part, at a redemption price equal to the Principal Amount thereof together with accrued and unpaid interest to the date fixed for redemption, upon the giving of a notice as described below, if:

as a result of any change (including any announced prospective change) in or amendment to the laws (or any regulations or rulings promulgated thereunder) of Canada (or the jurisdiction of organization of the successor to the Bank) or of any political subdivision or taxing authority thereof or therein affecting taxation, or any change in official position regarding the application or interpretation of such laws, regulations or rulings (including a holding by a court of competent jurisdiction), which change or amendment is announced or becomes effective on or after the Pricing Date (or, in the case of a successor to the Bank, after the date of succession), and which in the written opinion to the Bank (or its successor) of legal counsel of recognized standing has resulted or will result (assuming, in the case of any announced prospective change, that such announced change will become effective as of the date specified in such announcement and in the form announced) in the Bank (or its successor) becoming obligated to pay, on the next succeeding date on which interest is due, additional amounts with respect to the Notes; or

on or after the Pricing Date (or, in the case of a successor to the Bank, after the date of succession), any action has been taken by any taxing authority of, or any decision has been rendered by a court of competent jurisdiction in, Canada (or the jurisdiction of organization of the successor to the Bank) or any political subdivision or taxing authority thereof or therein, including any of those actions specified in the paragraph immediately above, whether or not such action was taken or decision was rendered with respect to the Bank (or its successor), or any change, amendment, application or interpretation shall be officially proposed, which, in any such case, in the written opinion to the Bank (or its successor) of legal counsel of recognized standing, will result (assuming, in the case of any announced prospective change, that such change, amendment, application, interpretation or action is applied to the Notes by the taxing authority and that such announced change will become effective as of the date specified in such announcement and in the form announced) in the Bank (or its successor) becoming obligated to pay, on the next succeeding date on which interest is due, additional amounts with respect to the Notes;

and, in any such case, the Bank (or its successor), in its business judgment, determines that such obligation cannot be avoided by the use of reasonable measures available to it (or its successor).

In the event the Bank elects to redeem the Notes pursuant to the provisions set forth in the preceding paragraph, it shall deliver to the Trustees a certificate, signed by an authorized officer, stating (i) that the Bank is entitled to redeem such Notes pursuant to their terms and (ii) the Principal Amount of the Notes to be redeemed.

Notice of intention to redeem such Notes will be given to holders of the Notes not more than 45 nor less than 30 days prior to the date fixed for redemption and such notice will specify, among other things, the date fixed for redemption and the redemption price.

ADDITIONAL RISK FACTORS

An investment in the Notes involves significant risks. In addition to the following risks included in this pricing supplement, we urge you to read “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the accompanying product prospectus supplement and “Risk Factors” beginning on page S-2 of the accompanying prospectus supplement and on page 6 of the accompanying prospectus.

You should understand the risks of investing in the Notes and should reach an investment decision only after careful consideration, with your advisers, of the suitability of the Notes in light of your particular financial circumstances and the information set forth in this pricing supplement and the accompanying prospectus, prospectus supplement and product prospectus supplement.

After the First Four Quarterly Interest Periods, the Amount of Each Interest Payment on an Interest Payment Date is Variable and may be 0.00% Per Annum.

Following the first four quarterly Interest Periods, you will receive interest on the applicable Interest Payment Date based on a rate per annum equal to the Leverage Factor multiplied by the floating rate of the 30CMS, subject to the Maximum Rate/Cap. While the interest rate applicable to each Interest Payment Date after the first four quarterly Interest Periods will fluctuate because it is based on the floating rate of the 30CMS, the interest rate for any Interest Payment Date will not be greater than the Maximum Rate/Cap.

Interest Rate Risk

The return on the Notes is linked to a Fixed Interest Rate for the first year and to a Floating Interest Rate thereafter.

Fixed interest rate instruments are generally more sensitive to market interest rate changes. The prices of long-term debt obligations generally fluctuate more than prices of short-term debt obligations as interest rates change. Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. This risk may be particularly acute because market interest rates are currently at historically low levels. Therefore, an increase in market interest rates will adversely affect the value of your Notes.

Furthermore, there can be no assurance that the Floating Interest Rate shall exceed the Fixed Interest Rate.

The Historical Performance Of 30CMS Is Not An Indication Of Its Future Performance.

The historical performance of 30CMS should not be taken as an indication of its future performance during the term of the Notes. Changes in the level of 30CMS will affect the trading price of the Notes, but it is impossible to predict whether such levels will rise or fall. Furthermore, the historical performance of the CMS Reference Index does not reflect the return the Notes would have had because they do not take into account the Leverage Factor, the Maximum Rate/Cap or the Payment at Maturity.

Recent Regulatory Attention To The ISDAfix Process

It has been reported that certain U.S. and U.K. regulators are reviewing the process by which ISDAfix has been set. Any changes or reforms affecting the determination or supervision of ISDAfix in light of this regulatory attention may result in a sudden or prolonged increase or decrease in reported ISDAfix, which could have an adverse impact on the trading market for ISDAfix-benchmarked securities such as your Notes, the value of your Notes and any payments on your Notes.

30CMS as of any CMS Reference Index Determination Date may be less than 30CMS as of any Other Day during the Term of the Notes.

Because 30CMS for any relevant Interest Period will be determined solely as of two (2) U.S. Government Securities Business Days prior to the previous Interest Reset Date, 30CMS will not be considered on any other dates during the term of the Notes. Therefore, even if 30CMS as of any day that is not the CMS Reference Index Determination Date for the applicable Interest Period is higher or lower, as applicable, than 30CMS as of such CMS Reference Index Determination Date, the amount of interest on the corresponding Interest Payment Date will not take into account that higher or lower level.

If The 30CMS Changes, The Value Of The Notes May Not Change In The Same Manner.

Your Notes may trade quite differently from the 30CMS. Changes in the 30CMS may not result in a comparable change in the value of your Notes.

P-7

The Interest Rate for Each Interest Payment Date is limited by the Maximum Rate/Cap.

For each Interest Payment Date during the period when the Note bears a Floating Interest Rate, the Floating Interest Rate will be capped at the Maximum Rate/Cap. THE INTEREST RATE FOR EACH SUCH INTEREST PAYMENT DATE WILL NOT BE GREATER THAN THE MAXIMUM RATE/CAP.

The interest rate on the Notes for the Interest Periods after the first year is limited to the Maximum Rate/Cap of 10.00% per annum. Even if the Floating Interest Rate is greater than the Maximum Rate/Cap, the Notes will bear interest for such Floating Interest Period only at 10.00% per annum. The Maximum Rate/Cap may be lower than the interest rates for similar debt securities then prevailing in the market.

Repayment of Principal Only at Maturity

The Notes offer repayment of principal only if you hold your Notes until the Maturity Date.

Because The Notes Accrue Interest At A Floating Rate After The First Year Of Their Term, You May Receive A Lesser Amount Of Interest In The Future.

Following the first year, the interest payable on the Notes during each quarterly Floating Interest Period will accrue at a per annum rate equal to the Floating Interest Rate, as determined on the CMS Reference Index Determination Date, subject to the Maximum Rate/Cap. The CMS Reference Index may vary from time to time and there will be significant risks not associated with a conventional fixed-rate debt security. These risks include fluctuation of the 30CMS and the possibility that, in the future, the interest rate on the Notes will decrease for any Floating Interest Period. We have no control over a number of factors that may affect the 30CMS, including economic, financial and political events that are important in determining the existence, magnitude and longevity of these risks and their results.

Because The Notes Accrue Interest At A Fixed Rate During The First Year Of Their Term, The Amount Of Interest Payable On Your Notes On Each Interest Payment Date For Any Fixed Interest Period May Be Below Market Interest Rates.

Because interest payable on your Notes during the Fixed Interest Period accrues at a fixed rate, there can be no guarantee that the interest you will receive on one or more of the Interest Payment Dates for the Fixed Interest Period will be equal to or greater than the market interest rate on such dates. We have no control over a number of factors that may affect market interest rates, including economic, financial and political events that are important in determining the existence, magnitude and longevity of these risks and their results. You should have a view as to the Fixed Interest Rate on the Notes (as specified on the cover of this pricing supplement) and its level relative to market interest rates before investing, and you must be willing to forgo guaranteed market interest rates for the first year of the term of the Notes.

The Notes are Not Ordinary Debt Securities.

The Notes have certain investment characteristics that differ from traditional fixed income securities. Specifically, the performance of the Notes will not track the same price movements as traditional interest rate products. A person should reach a decision to invest in the Notes after carefully considering, with his or her advisors, the suitability of the Notes in light of his or her investment objectives and the information set out in the above terms of the offering. The Issuer does not make any recommendation as to whether the Notes are a suitable investment for any person.

Your Yield may be lower than the Yield on Other Debt Securities of Comparable Maturity.

The yield that you will receive on your Notes may be less than the return you could earn on other investments. The interest payable for (i) any of the first 4 (four) quarterly Interest Periods is based on the Fixed Interest Rate, and (ii) any of the remaining Interest Periods is based on the Floating Interest Rate (subject to the Maximum Rate/Cap). If there is a decline in the CMS Reference Index over the term of your Notes, the effective yield on your Notes for such Interest Period may be less than that which would be payable on a conventional fixed-rate debt security with the same Stated Maturity Date, including those of the Issuer. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

P-8

Your Investment is Subject to the Credit Risk of The Bank of Nova Scotia.

The Notes are senior unsecured debt obligations of The Bank of Nova Scotia and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus, prospectus supplement and product prospectus supplement, the Notes will rank on par with all of the other unsecured and unsubordinated debt obligations of The Bank of Nova Scotia, except such obligations as may be preferred by operation of law. Any payment to be made on the Notes, including the return of the Principal Amount at maturity depends on the ability of The Bank of Nova Scotia to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of The Bank of Nova Scotia may affect the market value of the Notes and, in the event The Bank of Nova Scotia were to default on its obligations, you may not receive the amounts owed to you under the terms of the Notes.

The Price at Which the Notes May Be Sold Prior to Maturity will Depend on a Number of Factors and May Be Substantially Less Than the Amount for Which They Were Originally Purchased.

The price at which the Notes may be sold prior to maturity will depend on a number of factors. Some of these factors include, but are not limited to: (i) volatility of the level of interest rates and the market's perception of future volatility of the level of interest rates, (ii) changes in interest rates generally, (iii) any actual or anticipated changes in our credit ratings or credit spreads, and (iv) time remaining to maturity.

Depending on the actual or anticipated level of interest rates, the market value of the Notes may decrease and you may receive substantially less than 100% of the issue price if you sell your Notes prior to maturity.

The Inclusion of Dealer Spread and Projected Profit from Hedging in the Original Issue Price is Likely to Adversely Affect Secondary Market Prices.

Assuming no change in market conditions or any other relevant factors, the price, if any, at which the Underwriters or any other party is willing to purchase the Notes at any time in secondary market transactions will likely be significantly lower than the original issue price, since secondary market prices are likely to exclude underwriting commissions paid with respect to the Notes and the cost of hedging our obligations under the Notes that are included in the original issue price. The cost of hedging includes the projected profit that we and/or our subsidiaries may realize in consideration for assuming the risks inherent in managing the hedging transactions. These secondary market prices are also likely to be reduced by the costs of unwinding the related hedging transactions. In addition, any secondary market prices may differ from values determined by pricing models used by the Underwriters as a result of dealer discounts, mark-ups or other transaction costs.

The Notes Lack Liquidity.

The Notes will not be listed on any securities exchange or automated quotation system. Therefore, there may be little or no secondary market for the Notes. The Underwriters or any other dealer may, but is not obligated to, make a market in the Notes. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily. Because we do not expect that other broker-dealers will participate significantly in the secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which the Underwriters or any other dealer is willing to purchase the Notes from you. If at any time the Underwriters or any other dealer were not to make a market in the Notes, it is likely that there would be no secondary market for the Notes. Accordingly, you should be willing to hold your Notes to maturity.

We, our Subsidiaries, or Affiliates may Publish Research that Could Affect the Market Value of the Notes. We also expect to Hedge Our Obligations under the Notes.

We or one or more of our affiliates may, at present or in the future, publish research reports with respect to movements in interest rates generally. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities may affect the market value of the Notes. In addition, our subsidiaries expect to hedge our obligations under the Notes and they may realize a profit

P-9

from that expected hedging activity even if investors do not receive a favorable investment return under the terms of the Notes or in any secondary market transaction.

The Bank's Estimated Value of the Notes Will be Lower than the Original Issue Price (Price to Public) of the Notes

The Bank's estimated value is only an estimate using several factors. The original issue price of the Notes will exceed the Bank's estimated value because costs associated with selling and structuring the Notes, as well as hedging the Notes through a third party hedge provider, are included in the original issue price of the Notes. These costs include the selling commissions and the estimated cost of using a third party hedge provider to hedge our obligations under the Notes. See "The Bank's Estimated Value of the Notes" in this pricing supplement.

The Bank's Estimated Value Does Not Represent Future Values of the Notes and may Differ from Others' Estimates

The Bank's estimated value of the Notes is determined by reference to the Bank's and third party hedge provider's internal pricing models when the terms of the Notes are set. This estimated value is based on market conditions and other relevant factors existing at that time and the Bank's and third party hedge providers' assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for notes that are greater than or less than the Bank's estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the Notes could change significantly based on, among other things, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which the Bank would be willing to buy Notes from you in secondary market transactions. See "The Bank's Estimated Value of the Notes" in this pricing supplement.

The Bank's Estimated Value is not Determined by Reference to Credit Spreads for our Conventional Fixed-Rate Debt

The internal funding rate used in the determination of the Bank's estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. If the Bank were to use the interest rate implied by our conventional fixed-rate credit spreads, we would expect the economic terms of the Notes to be more favorable to you. Consequently, our use of an internal funding rate would have an adverse effect on the terms of the Notes and any secondary market prices of the Notes. See "The Bank's Estimated Value of the Notes" in this pricing supplement.

HISTORICAL PERFORMANCE OF 30CMS

The following graph sets forth the historical performance of the 30-Year Constant Maturity Swap Rate from January 1, 2004 to January 27, 2014. Past performance of the 30-Year Constant Maturity Swap Rate is not indicative of future performance of the 30-Year Constant Maturity Swap Rate. The graph below does not reflect the return the Notes would have had during the periods presented because it does not take into account the Leverage Factor. We cannot give you any assurance that the level of the CMS Reference Index will be positive on any day on which the CMS Reference Index needs to be determined. We obtained the information in the graph below, without independent verification, from Bloomberg Financial Markets (“USSW30”), which closely parallels but is not necessarily exactly the same as the Reuters page price sources used to determine the level of the CMS Reference Index.

We have not undertaken an independent review or due diligence of the information obtained from Bloomberg Financial Markets. The historical performance of the CMS Reference Index should not be taken as an indication of its future performance. We cannot give you assurance that the performance of the CMS Reference Rate will result in any positive return on your initial investment.

P-11

SUPPLEMENTAL PLAN OF DISTRIBUTION (CONFLICTS OF INTEREST)

Scotia Capital (USA) Inc. or one of our affiliates will purchase the Notes at the Principal Amount and, as part of the distribution of the Notes, will sell the Notes to Barclays Capital Inc. at a discount and underwriting commissions of \$25.00 (2.50%) per \$1,000 Principal Amount of Notes in connection with the distribution of the Notes. In accordance with the terms of a distributor accession letter, Barclays Capital Inc. has been appointed as a distribution agent under the distribution agreement and may purchase Notes from The Bank of Nova Scotia or its affiliates. Scotia Capital (USA) Inc. will also receive a structuring and development fee of up to \$0.50 (0.05%) per \$1,000 Principal Amount of Notes.

In addition, the Underwriters or another of their affiliates or agents may use the product prospectus supplement to which this pricing supplement relates in market-making transactions after the initial sale of the Notes. While the Underwriters may make markets in the Notes, they are under no obligation to do so and may discontinue any market-making activities at any time without notice. See the sections titled “Supplemental Plan of Distribution” in the accompanying prospectus supplement and product prospectus supplement.

The price at which you purchase the Notes includes costs that the Bank or its affiliates expect to incur and profits that the Bank or its affiliates expect to realize in connection with hedging activities related to the Notes, as set forth above. These costs and profits will likely reduce the secondary market price, if any secondary market develops, for the Notes. As a result, you may experience an immediate and substantial decline in the market value of your Notes on the Issue Date.

Conflicts of Interest

Each of Scotia Capital (USA) Inc., and Scotia Capital Inc. is an affiliate of the Bank and, as such, has a “conflict of interest” in this offering within the meaning of FINRA Rule 5121. In addition, the Bank will receive the gross proceeds from the initial public offering of the Notes, thus creating an additional conflict of interest within the meaning of Rule 5121. Consequently, the offering is being conducted in compliance with the provisions of Rule 5121. Neither Scotia Capital (USA) Inc. nor Scotia Capital Inc. is permitted to sell Notes in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

Scotia Capital (USA) Inc., Barclays Capital Inc., and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. Scotia Capital (USA) Inc., Barclays Capital Inc., and their respective affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for the Bank, for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, Scotia Capital (USA) Inc., Barclays Capital Inc., and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments of the Bank. Scotia Capital (USA) Inc., Barclays Capital Inc., and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

The Bank's Estimated Value of the Notes

The Bank's estimated value of the Notes set forth on the cover of this pricing supplement is equal to the sum of the values of the following hypothetical components: (1) a fixed-income debt component with the same maturity as the Notes, valued using our internal funding rate for structured debt described below, and (2) the derivative or derivatives underlying the economic terms of the Notes. The Bank's estimated value does not represent a minimum price at which the Bank would be willing to buy your Notes in any secondary market (if any exists) at any time. The internal funding rate used in the determination of the Bank's estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. The discount is based on, among other things, our view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for our conventional fixed-rate debt. For additional information, see "Additional Risk Factors—The Bank's Estimated Value Is Not Determined by Reference to Credit Spreads for Our Conventional Fixed-Rate Debt." The value of the derivative or derivatives underlying the economic terms of the Notes is derived from the Bank's or a third party hedge provider's internal pricing models. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, the Bank's estimated value of the Notes is determined when the terms of the Notes are set based on market conditions and other relevant factors and assumptions existing at that time. See "Additional Risk Factors—The Bank's Estimated Value Does Not Represent Future Values of the Notes and may Differ from Others' Estimates."

The Bank's estimated value of the Notes will be lower than the original issue price of the Notes because costs associated with selling, structuring and hedging the Notes are included in the original issue price of the Notes. These costs include the selling commissions paid to the Bank and other affiliated or unaffiliated dealers, the projected profits that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the Notes and the estimated cost of hedging our obligations under the Notes. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or it may result in a loss. We or one or more of our affiliates will retain any profits realized in hedging our obligations under the Notes. See "Additional Risk Factors—The Bank's Estimated Value of the Notes Will be Lower than the Original Issue Price (Price to Public) of the Notes" in this pricing supplement.

CERTAIN CANADIAN INCOME TAX CONSEQUENCES

See “Certain Income Tax Consequences—Certain Canadian Income Tax Considerations” at page S-24 of the Prospectus Supplement dated August 8, 2013.

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

Based on forward rates for the Floating Interest Rate as of the date of this Pricing Supplement, we intend to treat the Notes as “variable rate debt instruments” that provide for a single fixed rate followed by a qualified floating rate (“QFR”) for U.S. federal income tax purposes. Under applicable Treasury Regulations, solely for the purpose of determining any original issue discount (“OID”) on the Notes, the initial fixed rate is converted to a QFR (the “substitute QFR”). The substitute QFR must be such that the fair market value of the Notes on the issue date is approximately the same as the fair market value of otherwise identical notes that provide for the substitute QFR (rather than the fixed rate) for the initial period. In determining any OID on the Notes, the Notes must then be converted into “equivalent” fixed rate debt instruments by replacing each QFR provided under the terms of the Notes (including the substituted QFR) with a fixed rate equal to the value of the QFR on the issue date of the Notes. Accordingly, depending on the result of this calculation as of the issue date of the Notes, the Notes may be issued with OID.

Qualified stated interest on the Notes will be taxable to a U.S. holder as ordinary interest income at the time it accrues or is received (in accordance with the holder’s method of tax accounting). If the Notes are issued with OID, a U.S. holder will be required to include the OID in income for federal income tax purposes as it accrues, in accordance with a constant-yield method based on a compounding of interest. Upon the sale or other taxable disposition of a Note, a U.S. holder generally will recognize capital gain or loss equal to the difference between the amount realized on such disposition and such holder’s adjusted tax basis in such Note. A U.S. holder’s adjusted tax basis in the Notes will equal the cost of the Notes to the holder, increased by the amounts of any original issue discount previously included in income by the holder with respect to the Notes and reduced by any payments other than qualified stated interest received by the holder. Such gain or loss generally will be long-term capital gain or loss if the U.S. holder has held the Notes for more than one year at the time of disposition.

You should carefully consider the discussion set forth in “Supplemental Discussion of U.S. Federal Income Tax Consequences” in the accompanying product prospectus supplement. In particular, U.S. holders should review the discussion under “—Fixed-to-Floating Rate Notes and Floating-to-Fixed Rate Notes” and “—Sale, Redemption or Maturity of Notes that Are Not Treated as Contingent Payment Debt Instruments” under “Supplemental Discussion of U.S. Federal Income Tax Consequences—Supplemental U.S. Tax Considerations—U.S. Holders—Where the term of your notes exceeds one year” in the product prospectus supplement and “—Variable Rate Debt Securities” in the prospectus, and non-U.S. holders should review the discussion set forth in “Supplemental Discussion of U.S. Federal Income Tax Consequences—Supplemental U.S. Tax Considerations—Non-U.S. Holders” in the product prospectus supplement. U.S. holders should also review the discussion under “—Treasury Regulations Requiring Disclosure of Reportable Transactions”, “—Information With Respect to Foreign Financial Assets” and “Backup Withholding and Information Reporting” under “United States Taxation” in the prospectus.

Foreign Account Tax Compliance Act. Sections 1471 through 1474 of the Internal Revenue Code (which are commonly referred to as “FATCA”) generally impose a 30% withholding tax on certain payments, including “pass-thru” payments to certain persons if the payments are attributable to assets that give rise to U.S.-source income or gain. Pursuant to recently issued final Treasury regulations and administrative guidance, this withholding tax would not be imposed on payments pursuant to obligations that are outstanding on July 1, 2014 (and are not materially modified after June 30, 2014). Accordingly, FATCA withholding generally is not expected to be required on the Notes. If, however, withholding is required as a result of future guidance, we (and any paying agent) will not be required to pay

additional amounts with respect to the amounts so withheld.

Significant aspects of the application of FATCA are not currently clear and Investors should consult their own advisors about the application of FATCA, in particular if they may be classified as financial institutions under the FATCA rules.

P-14

PROSPECTIVE PURCHASERS OF THE NOTES SHOULD CONSULT THEIR TAX ADVISORS AS TO THE FEDERAL, STATE, LOCAL AND OTHER TAX CONSEQUENCES TO THEM OF ACQUIRING, HOLDING AND DISPOSING OF THE NOTES AND RECEIVING PAYMENTS UNDER THE NOTES.

VALIDITY OF THE NOTES

In the opinion of Allen & Overy LLP, when the Notes have been duly completed in accordance with the Indenture and issued and sold as contemplated by the prospectus supplement and the prospectus, the Notes will be valid, binding and enforceable obligations of the Bank, entitled to the benefits of the Indenture, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith). This opinion is given as of the date hereof and is limited to the laws of the State of New York. This opinion is subject to customary assumptions about the Trustee's authorization, execution and delivery of the Indenture and the genuineness of signatures and to such counsel's reliance on the Bank and other sources as to certain factual matters, all as stated in the legal opinion dated December 11, 2012, which has been filed as Exhibit 5.1 to the Bank's Form F-3/A dated December 11, 2012.

In the opinion of Osler, Hoskin & Harcourt LLP, the issue and sale of the Notes has been duly authorized by all necessary corporate action of the Bank in conformity with the Indenture, and when the Notes have been duly executed, authenticated and issued in accordance with the Indenture, the Notes will be validly issued and, to the extent validity of the Notes is a matter governed by the laws of the Province of Ontario or Québec, or the laws of Canada applicable therein, and will be valid obligations of the Bank, subject to applicable bankruptcy, insolvency and other laws of general application affecting creditors' rights, equitable principles, and subject to limitations as to the currency in which judgments in Canada may be rendered, as prescribed by the Currency Act (Canada). This opinion is given as of the date hereof and is limited to the laws of the Province of Ontario and the federal laws of Canada applicable thereto. In addition, this opinion is subject to customary assumptions about the Trustee's authorization, execution and delivery of the Indenture and the genuineness of signatures and certain factual matters, all as stated in the letter of such counsel dated December 11, 2012, which has been filed as Exhibit 5.2 to the Bank's Form F-3/A filed with the SEC on December 11, 2012.
