(1) The number of shares of common stock offered hereby includes shares of common stock into which the notes are convertible. The number of shares of common stock offered hereby is based on a conversion rate of 11.410 shares of common stock per \$1,000 principal amount of maturity of the notes. Information concerning other Selling Securityholders will be set forth in prospectus supplements from time to time, if required. (2) These shares may be deemed to be beneficially held by the selling securityholder and include 1,200 shares of common stock held by Mason Street Funds and 37,900 shares of common stock held by Northwestern Mutual Series Fund, Inc., which are funds managed by the same investment advisors as the selling securityholder.
