NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) Basis of Presentation

The consolidated financial statements included herein include the accounts of A.C. Moore Arts & Crafts, Inc. and its wholly owned subsidiaries. The Company is a specialty retailer of arts, crafts and floral merchandise for a wide range of customers. As of May 8, 2008, the Company operated a chain of 137 stores. The stores are located in the Eastern United States from Maine to Florida. The Company also serves customers nationally via its e-commerce site, www.acmoore.com.

The preparation of these consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reported period and related disclosures. Significant estimates made as of and for the three month period ended March 31, 2008 and 2007 include provisions for shrinkage, capitalized buying, warehousing and distribution costs related to inventory, and markdowns of merchandise inventories. Actual results could differ materially from those estimates.

These financial statements have been prepared by management without audit and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2007. Due to the seasonality of the Company's business, the results for the interim periods are not necessarily indicative of the results for the year. The Company has included its balance sheet as of March 31, 2007 to assist in viewing the Company on a full-year basis. The accompanying consolidated financial statements reflect, in the opinion of management, all adjustments necessary for a fair statement of the interim financial statements. In the opinion of management, all such adjustments are of a normal and recurring nature.

(2) Restatement of Consolidated Financial Statements

As more fully described in our fiscal 2007 Annual Report on Form 10-K, in October 2007 the Company determined that there were errors in the method used to value store inventories. The correction of these errors resulted in a restatement of our financial statements for the periods including and prior to the six months ended June 30, 2007. Financial statement line items affected by this restatement include gross margin and provision for income taxes in the Consolidated Statements of Operations and inventory and current deferred taxes in the Consolidated Balance Sheets. There was no impact to operating cash flows from this restatement.

The effect of these restatements on previously reported consolidated balance sheets, statements of operations and statements of cash flows are included in Footnote 1 of our fiscal 2007 Annual Report on Form 10-K.

(3) Change in Accounting Method

Effective January 1, 2008, the Company changed its method of accounting for store inventories from the retail inventory method to the weighted average cost method. Management believes the weighted average cost method is preferable because it:

Results in greater precision in the determination of cost of sales and inventory valuation because each item is supported by records which are valued using stock-keeping unit (SKU) level purchase order data. Availability of this data significantly reduces management estimates used under the retail inventory method where costs are averaged based on pools of merchandise at the department level.

Table of Contents

Increases the accuracy of matching sales with related expenses, as cost of sales represent the average cost of individual items sold rather than the average of an entire pool. This matching eliminates fluctuations that could result from seasonal changes in initial markups or composition of the mix of product within a pool.

Provides additional insight into the components of shrink as information will be available at the SKU/store level.

Aligns financial reporting with the operational view of the Company, providing consistency in inventory valuation and margin analysis. This in turn improves accountability within the merchandising and stores organizations which will enable management to more precisely manage inventory levels.

Allows for consistent valuation methods across all inventories, as our warehouse inventory is already valued using weighted average cost.

According to the guidance of SFAS 154, *Accounting Changes and Error Corrections*, when it is impracticable to determine the periods to which the effects of a change in accounting principle apply, the effect of the change will be applied to the balances of assets and liabilities as of the beginning of the earliest period that retrospective application is practicable and that a corresponding adjustment be made to retained earnings. Prior to December 31, 2007, the Company did not take its store physical inventories at the SKU level and as such is not able to value its inventory using weighted average cost for prior periods. Accordingly, as of January 1, 2008, the Company reduced the value of its beginning inventory by \$2.0 million and recorded a corresponding adjustment, net of tax of \$804,000, as a reduction to retained earnings.

(4) New Accounting Pronouncements

In March 2008, the FASB issued SFAS 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment to FASB Statement 133*, which requires companies to provide greater transparency through disclosures about how and why the company uses derivative instruments, how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations, the level of derivative activity entered into by the company and how derivative instruments and related hedged items affect the company's financial position, results of operations, and cash flows. SFAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008, and will be adopted by the Company in the first quarter of 2009. The Company is currently evaluating the potential impact of the adoption of SFAS 161 on its consolidated financial statements.

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, which provides companies with an option to report selected financial assets and liabilities at fair value. This statement was effective for the Company starting January 1, 2008. The adoption of the provisions of SFAS 159 is optional. The Company adopted SFAS 159 effective January 1, 2008, and did not elect the fair value option for any of its existing financial assets and liabilities.

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. It does not expand the use of fair value measurement. We adopted SFAS 157 for financial assets and liabilities on January 1, 2008. The adoption of SFAS 157 did not require material modification of our fair value measurements and will be substantially limited to expanded disclosures in the notes to our Consolidated Financial Statements relating to those notes that currently have components measured at fair value. In February 2008, the FASB deferred adoption of SFAS 157 for non-financial assets and

Table of Contents

liabilities, except for those that are recognized at fair value on a recurring basis (at least annually), until the fiscal year beginning after December 15, 2008.

SFAS 157 establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The following table provides the assets and liabilities carried at fair value measured on a recurring basis as of March 31, 2008:

	Fair Value Measurements at March 31, 2008			
	Total Carrying Value at March 31, 2008	Quoted prices in active markets (Level 1)	Using Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(in thousands of dollars)				
Cash Equivalents	\$ 53,601	\$ 53,601	\$	\$
Interest Rate Swaps(1)	(1,575)		(1,575)	

(1) Included in
Deferred taxes
and other
liabilities in our
Consolidated
Balance Sheets

Cash Equivalents are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy. Interest rate swaps are measured at fair value using quoted market prices for the swap interest rate indexes over the term of the swap discounted to present value versus the fixed rate of the contract. They are classified within Level 2 of the valuation hierarchy.

(5) Inventories

Merchandise Inventories. The Company values its inventories at the lower of cost or market. For warehouse inventories, cost is determined using a weighted average cost method. Effective January 1, 2008, the Company changed its method of accounting for store inventories from the retail inventory method to weighted averaged cost. As a result of this change, the Company recorded a \$2.0 million reduction in the value of its beginning inventory. In 2007, the Company took a stock-keeping unit (SKU) level physical inventory in all of its store locations at year end. These physical inventories were valued using a weighed average cost to determine the value of our beginning inventory for 2008. Cost is determined at the time of receipt based on actual vendor invoices and includes the cost of purchasing, warehousing and transportation. Vendor allowances, which primarily represent volume discounts and cooperative advertising funds, are recorded as a reduction in the cost of merchandise inventories. For merchandise where the Company is the direct importer, ocean freight, duty and internal transfer costs are included as inventory costs.

On a quarterly basis, management uses a specific cost method to determine the value of its store inventories. Through its point of sale system, the Company is able to assign a SKU specific cost to every item sold. Using this information, along with estimates for inventory shrinkage and transportation costs, management estimates cost of sales and inventory during the first three quarters of each year.

Table of Contents

The estimates for inventory shrinkage used to value inventory on a quarterly basis are adjusted to actual shrinkage amounts at year-end when a full physical inventory in each of our stores and warehouse facility are taken.

As of December 31, 2007, inventory in the Company's stores were valued under the retail inventory method. Under this method, store inventories are valued at their current retail selling price multiplied by a cost complement to arrive at an inventory value at cost. The cost complement is a ratio of merchandise available-for-sale at cost to merchandise available-for-sale at its original selling price.

Our inventory valuation methodology also requires other management estimates and judgment, such as the net realizable value of merchandise designated for clearance or on overstock or slow-moving merchandise. The accuracy of these estimates can be impacted by many factors, some of which are outside of management's control, including changes in economic conditions and consumer buying trends. The Company believes the process it uses results in an appropriate inventory value.

(6) Shareholders' Equity

During the first three months of 2008, shareholders' equity changed as follows:

(In thousands, except share data)	Shares	Common Stock	Retained Earnings	Accumulated Other Comprehensive (Loss)	Total
Balance, December 31, 2007	20,298,601	\$ 122,921	\$ 77,162	\$ (483)	\$ 199,600
Net income (loss)			(1,767)		(1,767)
Unrealized loss, net of taxes of \$308 (Note 8)				(462)	(462)
Total comprehensive income (loss)					\$ (2,229)
Stock-based compensation expense		537			537
Change in accounting principle (Note 5)			(1,196)		(1,196)
Balance, March 31, 2008	20,298,601	\$ 123,458	\$ 74,199	\$ (945)	\$ 196,712

(7) Financing Agreement

The Company maintains two mortgage agreements with Wachovia Bank on its corporate office and main distribution center which are collateralized by land, buildings and equipment. As of March 31, 2008, there was \$21.0 million outstanding under these mortgages of which \$17.3 million is repayable over 12 years and \$3.7 million is repayable over four years. Fixed monthly payments are \$214,000. In November 2006, the Company effectively converted these mortgages from a variable rate to fixed interest rates of 5.77% on the 15-year mortgage and 5.72% on the seven-year mortgage through the use of an interest rate swap.

In March 2007, the Company amended these two mortgages to modify certain covenants. The mortgages, as amended, contain covenants that, among other things, restrict the Company's ability to incur additional indebtedness or guarantee obligations in excess of \$18.0 million, engage in mergers or consolidations, dispose of assets, make acquisitions requiring a cash outlay in excess of \$20.0 million, make loans or advances in excess of \$1.0 million, permit liens relating to capitalized lease obligations or purchase money financing in excess of \$2.0 million, or change the nature of the Company's business. The Company is restricted in capital expenditures unless certain financial covenants are maintained including those relating to tangible net worth and funded debt. The mortgages also define various events of default, including cross default provisions, defaults for any material judgments or a change in control.

In January 2008, the Company amended these two mortgages and its \$35.0 million line of credit and entered into a promissory note and loan modification agreement. Pursuant to the loan modification, Wachovia agreed to

7

Table of Contents

waive non-compliance with certain provisions of the loan documents relating to the Company's failure to deliver financial statements and the Company's Form 10-Q for the quarter ended September 30, 2007. The loan modification also amended the loan documents to (i) increase the interest rate for the two mortgages and borrowing under the line of credit from a LIBOR-based rate plus 65 basis points to a LIBOR-based rate plus 90 basis points, and (ii) require the Company to maintain a deposit account with the bank with a minimum balance of \$500,000. These two provisions terminated on April 17, 2008.

The Company has a \$35.0 million line of credit with Wachovia Bank, which is scheduled to expire on May 31, 2008. Management is in the process of finalizing an extension of the line of credit. At March 31, 2008, the Company had no outstanding principal balance under the line of credit. In January 2008, a \$6.45 million letter of credit was issued under the line. The letter of credit replaced a workers compensation insurance cash escrow account that has been redeployed in other investments.

(8) Income Taxes

On January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). Effective with the adoption of FIN 48, the Company records interest as a component of interest expense and penalties as a component of income tax expense. As of December 31, 2007, the Company had \$3.3 million of unrecognized tax benefits. In February 2008, the Company finalized an audit with the Internal Revenue Service that covered the 2004, 2005 and 2006 tax years. As a result of this settlement, reserves for uncertain tax positions totaling \$2.0 million were reversed, of which \$298,000 was recorded as a reduction in income tax expense in this quarter.

The Company increased its reserve for uncertain tax positions by \$670,000 this quarter based on a change in a state tax position regarding calculation of income apportionment. Of this amount \$336,000, was recorded as interest expense and \$334,000 was recorded as income tax expense in this quarter.

In March 2008, the Company received permission from the Internal Revenue Service to change its method of accounting for inventory effective with the filing of its 2007 income tax return. As a result of this change, the Company will be able to take a tax deduction of approximately \$20.0 million which will result in a refund of approximately \$7.0 million of previously paid federal income taxes. This amount has been recorded in prepaid and receivable income taxes on our Consolidated Balance Sheet.

The Company is subject to U.S. Federal income tax as well as income tax of multiple state jurisdictions. The Company has substantially concluded all material tax matters in jurisdictions where it files returns for years through 2003.

The Company's effective tax rate for the first three months of 2008 was 27.4% as compared to 36.9% in the first three months of 2007. This decrease was primarily attributable to the effect of adjustments to our uncertain tax positions as described above, on our first quarter pre-tax loss. The Company expects the effective rate for 2008 to be approximately 39%.

Table of Contents**(9) Earnings Per Share**

The following table sets forth the computation of basic and diluted earnings per share:

(In thousands, except per share data)	Three Months Ended March 31,	
	2008	2007 (as restated)
Net income (loss)	\$ (1,767)	\$ 345
Weighted average shares:		
Basic	20,299	20,180
Incremental shares from assumed exercise of stock options and stock appreciation rights		99
Diluted	20,299	20,279
Basic net income (loss) per share	\$ (0.09)	\$ 0.02
Diluted net income (loss) per share	\$ (0.09)	\$ 0.02
Stock options and stock appreciation rights excluded from calculation because exercise price was greater than average market price	1,119	367
Potentially dilutive shares excluded from the calculation as the result would be anti-dilutive	578	865

(10) Commitments and Contingencies

The Company is involved in legal proceedings from time to time in the ordinary course of business. Management believes that none of these legal proceedings will have a materially adverse effect on the Company's financial condition or results of operations. However, there can be no assurance that future costs of such litigation would not be material to the Company's financial condition or results of operations.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Relating to Forward-looking Statements

The following discussion contains statements that are forward-looking within the meaning of applicable federal securities laws and are based on our current expectations and assumptions as of this date. We undertake no obligation to update or revise any forward-looking statement whether as the result of new developments or otherwise. These statements are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated. Factors that could cause actual results to differ from those anticipated include, but are not limited to, our ability to implement our business and operating initiatives to improve profitability, how well we manage our growth, customer demand and trends in the arts and crafts industry, inventory risks, the effect of economic conditions and gasoline prices, the impact of unfavorable weather conditions, the impact of competitors locations or pricing, difficulties with respect to new system technologies, difficulties in implementing measures to reduce costs and expenses and improve margins, supply constraints or difficulties, the effectiveness of and changes to advertising strategies, difficulties in determining the outcome and impact of litigation, the impact of the threat of terrorist attacks and war, our ability to maintain an effective system of internal control over financial reporting, risks related to our recent restatement and other risks detailed in the Company's Securities and Exchange Commission (SEC) filings. For additional information concerning factors that could cause actual results to differ materially from the information contained herein, reference is made to the information under Part II, Item 1A. Risk Factors as set forth below and in our annual report on Form 10-K for the year ended December 31, 2007 as filed with the SEC.

Overview

General

We are a specialty retailer of arts, crafts and floral merchandise for a wide range of customers. Our first store opened in Moorestown, New Jersey in 1985. As of March 31, 2008, we operated 136 stores in the Eastern United States from Maine to Florida. Our stores typically range from 20,000 to 25,000 square feet. We also serve customers nationally through our e-commerce site, www.acmoore.com.

Due to the importance of our peak selling season, which includes the Fall and Winter holiday seasons, the fourth quarter has historically contributed, and is expected to continue to contribute, a significant portion of our profitability for the entire year. As a result, any factors negatively affecting us during the fourth quarter of any year, including adverse weather and unfavorable economic conditions, would have a material adverse effect on our results of operations for the entire year.

Our quarterly results of operations also may fluctuate based upon such factors as the length of holiday seasons, the date on which holidays fall, the number and timing of new store openings, the amount of store pre-opening expenses, the amount of net sales contributed by new and existing stores, the mix of products sold, the amount of sales returns, the timing and level of markdowns and other competitive factors.

For the three months ended March 31, 2008, comparable store sales decreased by 11.6%, while gross margin improved by 1.9%. The decline in comparable store sales was an expected result of the implementation of management's primary business and operating initiatives that are discussed in more detail below. We believe that the Company had reached a point of diminishing returns for many of the costs being incurred to increase sales, which included advertising and store payroll. Changes made to our store staffing and advertising programs both had an adverse effect on comparable store sales. In addition, lower inventory levels and changes in sourcing caused an increase in out-of stock merchandise which also had a negative impact on sales.

Table of Contents

While we may experience cannibalization of sales in our existing stores and an increased selling, general and administrative expense rate as we continue to refine our real estate site location strategy, we expect improvements in the execution of our operating initiatives that we believe will lessen the impact on co
