Note 1. Summary of Significant Accounting Policies

Business Overview

Healthcare Realty Trust Incorporated (the “Company”) is a real estate investment trust (“REIT”) that integrates owning, managing, financing and developing income-producing real estate properties associated primarily with the delivery of outpatient healthcare services throughout the United States. The Company had investments of approximately \$3.0 billion in 204 real estate properties and mortgages as of June 30, 2013. The Company’s 198 owned real estate properties are located in 28 states and total approximately 13.5 million square feet. The Company provided property management services to approximately 10.1 million square feet nationwide.

Principles of Consolidation

The Condensed Consolidated Financial Statements include the accounts of the Company, its wholly-owned subsidiaries, joint ventures, partnerships, and other affiliates, as well as certain variable interest entities (“VIEs”) in prior periods where the Company controlled the operating activities of the VIE. The Company reports noncontrolling interests in less-than-wholly-owned consolidated subsidiaries of the parent as a component of total equity on the Condensed Consolidated Balance Sheets to distinguish between the interests of the parent company and the interests of the noncontrolling interest holders.

The Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements that are included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. Management believes, however, that all adjustments of a normal, recurring nature considered necessary for a fair presentation have been included. All material intercompany transactions and balances have been eliminated in consolidation.

This interim financial information should be read in conjunction with the financial statements and Management’s Discussion and Analysis of Financial Condition and Results of Operations included in this report and in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. This interim financial information does not necessarily represent or indicate what the operating results will be for the year ending December 31, 2013 for many reasons including, but not limited to, acquisitions, dispositions, capital financing transactions, changes in interest rates and the effects of other trends, risks and uncertainties.

Use of Estimates in the Condensed Consolidated Financial Statements

Preparation of the Condensed Consolidated Financial Statements in accordance with GAAP requires management to make estimates and assumptions that affect amounts reported in the Condensed Consolidated Financial Statements and accompanying notes. Actual results may differ from those estimates.

Reclassifications

Certain amounts in the Company’s Condensed Consolidated Financial Statements for prior periods have been reclassified to conform to the current period presentation. Assets sold or held for sale, and related liabilities, have been reclassified in the Company’s Condensed Consolidated Balance Sheets, and the operating results of those assets have been reclassified from continuing to discontinued operations for all periods presented.

Reclassifications were made on the Company's Condensed Consolidated Balance Sheets for the periods ended June 30, 2013 and December 31, 2012 to move non-real estate related personal property from Personal property in Total real estate properties to Other assets. For the period ended June 30, 2013, the Company reclassified \$23.3 million from Personal property and \$6.8 million from Accumulated depreciation to Other assets, resulting in a net increase to Other assets of approximately \$16.5 million. For the year ended December 31, 2012, the Company reclassified \$10.4 million from Personal property and \$6.1 million from Accumulated depreciation, resulting in a net increase to Other assets of approximately \$4.3 million.

New Pronouncements

In February 2013, the Financial Accounting Standards Board issued Accounting Standards Update No. 2013-02, Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income ("ASU 2013-02"). ASU 2013-02 requires an entity to present, either on the face of the statement where net income is presented or in the notes to the financial statements, significant amounts reclassified out of accumulated other comprehensive income (loss) by the respective line items of net income but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. Amounts that are not required to be reclassified in their entirety to net income must be cross-referenced to other disclosures that provide additional detail. This guidance was effective on a prospective basis for the annual and interim reporting periods for the Company beginning January 1, 2013. The Company's adoption of this standard did not have a significant impact on its Condensed Consolidated Financial Statements. The Company's accumulated other comprehensive loss is comprised of one item pertaining to the Company's defined benefit pension plan. Reclassification of the amortization of this item occurs on an annual basis in the fourth quarter of each fiscal year.

The base rent was approximately \$0.4 million per quarter as of June 30, 2013. The sales price was \$11.9 million. This property was sold pursuant to a purchase option contained in the lease which expired on July 15, 2013. The Company expects to record a \$4.3 million gain on the disposal.

On July 31, 2013, the Company expects to close on the disposition of an inpatient rehabilitation facility located in Alabama that was classified as held for sale and in which the Company had a \$11.2 million net investment at June 30, 2013. The base rent was approximately \$0.6 million per quarter as of June 30, 2013. The sales price is \$17.5 million. This property will be sold pursuant to a purchase option contained in the lease which expires on July 31, 2013. The Company expects to record a \$6.2 million gain on the disposal.

Potential Dispositions

The Company received notice in April 2013 that a tenant is exercising purchase options on two inpatient rehabilitation facilities located in Pennsylvania upon the expiration of the current leases on September 30, 2013. The purchase prices will be the greater of fair market value or \$17.6 million for each facility. The Company's aggregate net investment in the two facilities was approximately \$24.9 million, and base rent was approximately \$1.3 million per quarter as of

June 30, 2013. Subsequent to providing notice of its exercise of the purchase options, the operator contacted the Company to continue long-term lease renewal discussions for these two properties. These discussions are on-going as of the date of this report. If the Company does not reach an agreement with the tenant to renew these two leases, the properties are expected to be sold on September 30, 2013 pursuant to the option terms.

Mortgage Note Fundings

During the six months ended June 30, 2013, the Company funded \$45.9 million on two outstanding construction mortgage notes for build-to-suit facilities leased to Mercy Health. The total amount outstanding on these facilities in Oklahoma and Missouri is approximately \$164.3 million at June 30, 2013. Details on the two projects are as follows:

Table of Contents

Notes to Condensed Consolidated Financial Statements - Continued

The Company provided \$18.1 million in fundings during the six months ended June 30, 2013 on the medical office building under construction in Oklahoma, bringing cumulative fundings to date to \$74.9 million. This project, which was originally scheduled to be completed in July 2013, sustained tornado damage in late May 2013. The tornado damage has caused a delay in the completion date and an assessment is ongoing as to the total scope of the damage and the expected final completion date. While subject to change, the current estimated completion date is the middle of 2014. Builder's risk insurance is expected to fund the necessary repairs. Approximately \$16.3 million remains available under the loan.

The Company provided \$27.8 million in fundings during the six months ended June 30, 2013 on the orthopedic facility under construction in Missouri, bringing cumulative fundings to date to \$89.4 million. This project was scheduled to be completed in November 2013, but is ahead of schedule and is now expected to be completed in September 2013. The Company anticipates funding the remaining \$22.0 million under the loan and expects to acquire the facility for the outstanding loan balance during the third quarter of 2013.

Company-Financed Mortgage Notes

During 2013, the Company:

• originated a \$3.7 million seller-financed mortgage note receivable with the purchaser of the land parcel located in Texas that was sold by the Company as discussed in "Asset Dispositions" above.

• originated a \$0.6 million seller-financed mortgage note receivable with the purchaser of a medical office building located in Tennessee that was sold by the Company as discussed in "Asset Dispositions" above.

Noncontrolling Interest

In January 2013, the Company received a \$1.4 million capital contribution from a 40% noncontrolling interest holder in a partnership that owns a medical office building and parking garage in Texas included as a property in stabilization. The partnership owner (HRP MAC III, LLC), in which the Company holds a 60% majority controlling interest, is the borrower under a term loan from the Company of approximately \$10.3 million. These buildings were constructed by the Company and were previously subject to a construction mortgage note totaling \$13.7 million. The Company's equity in and loan to the partnership are eliminated in consolidation.

First Quarter

On February 15, 2013, the Company entered into an amendment that extended the original maturity date of the unsecured credit facility (the "Unsecured Credit Facility") from October 14, 2015 to April 14, 2017. The amendment also provides the Company with two six-month extension options that could extend the maturity date to April 14, 2018. Each option is subject to an extension fee of 0.075% of the aggregate commitments. Amounts outstanding under the Unsecured Credit Facility bear interest at LIBOR plus an applicable margin rate. The margin rate, which depends on the Company's credit ratings, ranges from 0.95% to 1.75% (currently at 1.4%). In addition, the Company pays a facility fee per annum on the aggregate amount of commitments ranging from 0.15% to 0.35% (currently at 0.30%). In connection with the amendment, the Company paid up-front fees to the lenders of approximately \$2.7 million, included in Other assets, which will be amortized over the term of the facility. The Company wrote-off certain unamortized deferred financing costs of the original facility of approximately \$0.3 million upon execution of the amendment. As of June 30, 2013, the Company had \$230.0 million outstanding under the Unsecured Credit Facility and had a remaining borrowing capacity of approximately \$470.0 million.

In February 2013, the Company repaid in full a mortgage note payable in the amount of \$14.9 million bearing interest at a rate of 6.55% per year.

The Senior Notes due 2023 were issued at a discount of approximately \$2.1 million, which yielded a 3.85% interest rate per annum upon issuance. The Company incurred \$2.1 million in debt issuance costs that are included in Other assets which will be amortized to maturity. The Senior Notes due 2023 have various financial covenant provisions that are required to be met on a quarterly and annual basis. The Company was in compliance with the covenant provisions at June 30, 2013.

The Company's board of directors has authorized the repurchase of up to \$50 million of the Company's outstanding unsecured senior notes due 2017 in open market transactions from time to time. The Company currently has no specific timeframe within which to purchase these notes and has no obligation to repurchase any notes prior to maturity.

Note 7. Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, receivables and payables are reasonable estimates of their fair value as of June 30, 2013 and December 31, 2012 due to their short-term nature. The fair value of notes and bonds payable is estimated using cash flow analyses, based on the Company's current interest rates for similar types of borrowing arrangements. The fair value of mortgage notes and notes receivable is estimated based either on cash flow analyses at an assumed market rate of interest or at a rate consistent with the rates on mortgage notes acquired by the Company recently or notes receivable entered into by the Company recently. The table below details the fair value and carrying values for notes and bonds payable, mortgage notes receivable and notes receivable at June 30, 2013 and December 31, 2012.

These forward-looking statements are based on the current plans and expectations of management and are subject to a number of risks and uncertainties, including the risks, as described in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 that could significantly affect the Company's current plans and expectations and future financial condition and results.

The purpose of this Management Discussion and Analysis (MD&A) is to provide an understanding of the Company's consolidated financial condition, results of operations and cash flows by focusing on the changes in certain key measures from year to year. MD&A is provided as a supplement to, and should be read in conjunction with, the Company's Consolidated Financial Statements and accompanying notes. MD&A is organized in the following sections:

Overview

Liquidity and Capital Resources

- Trends and Matters Impacting Operating Results

Results of Operations

Overview

The Company's business is to own and operate medical office and other medical-related facilities that produce stable and growing rental income. Additionally, the Company provides a broad spectrum of services needed to own, develop, lease, finance and manage its portfolio of healthcare properties. The Company focuses its portfolio on outpatient-related facilities located on or near the campuses of large acute care hospitals and associated with leading health systems because management views these facilities as stable, lower-risk real estate investments. In addition to consistent growth in demand for outpatient services, management believes that the Company's diversity of tenants, which includes over 30 physician specialties, as well as surgery, imaging and diagnostic centers, lowers the Company's overall financial and operational risk. Substantially all of the Company's revenues are derived from operating leases on its real estate properties and interest earned on outstanding notes receivable.

Liquidity and Capital Resources

Sources and Uses of Cash

The Company's primary sources of cash include rent and interest receipts from its real estate and mortgage portfolio based on contractual arrangements with its tenants, sponsors, and borrowers, borrowings under its unsecured credit facility due 2017(the "Unsecured Credit Facility"), proceeds from the sales of real estate properties or the repayments

of mortgage notes receivable or proceeds from public or private debt or equity offerings.

The Company expects to continue to meet its liquidity needs, including funding additional investments, paying dividends, and funding debt service through cash on hand, cash flows from operations, and the cash flow sources addressed above. The Company also had unencumbered real estate assets with a book value of approximately \$2.6 billion at June 30, 2013, of which a portion could serve as collateral for secured mortgage financing. The Company believes that its liquidity and sources of capital are adequate to satisfy its cash requirements. The Company cannot, however, be certain that these sources of funds will be available at a time and upon terms acceptable to the Company in sufficient amounts to meet its liquidity needs. Dividends paid by the Company for the six months ended June 30, 2013 were funded from cash flows from operations and the Unsecured Credit Facility, as cash flows from operations were not adequate to fully fund dividends paid at the rate per quarter of \$0.30 per share. For the full year 2013, the Company may continue to use the Unsecured Credit Facility to supplement its cash flows from operations to fund dividends at the current rate. The Company expects that acquisitions occurring in the second half of

Table of Contents

2013 and the continued lease-up of its properties in the process of stabilization will generate additional cash flows from operations such that dividends can be fully funded with cash flows from operations.

Investing Activities

Cash flows used in investing activities for the six months ended June 30, 2013 were approximately \$102.5 million. Below is a summary of the significant investing activity. See Note 2 to the Condensed Consolidated Financial Statements for more detailed information on these activities.

The Company acquired a 100% leased inpatient rehabilitation facility in Texas for a purchase price of \$16.3 million and acquired a 100% leased medical office building in Tennessee for a purchase price of \$16.2 million.

The Company disposed of 15.1 acres of land in Texas in which the Company had an aggregate net investment of approximately \$8.1 million for approximately \$5.0 million, which included \$1.1 million in net cash proceeds and the origination of a \$3.7 million Company-financed mortgage note receivable.

The Company disposed of five medical office buildings with an aggregate sales price of approximately \$12.0 million, generating net cash proceeds of \$11.1 million and the origination of a \$0.6 million seller-financed mortgage receivable. In connection with the sales, the Company repaid a mortgage note payable of \$1.1 million and incurred debt extinguishment costs of \$0.3 million. The Company recognized gains of approximately \$1.8 million related to these transactions.

At June 30, 2013, the Company had two ongoing development projects affiliated with Mercy Health under construction mortgage notes:

The Company provided \$18.1 million in fundings during the six months ended June 30, 2013 on the medical office building under construction in Oklahoma, bringing cumulative fundings to date to \$74.9 million. This project, which was originally scheduled to be completed in July 2013, sustained tornado damage in late May 2013. The tornado damage has caused a delay in the completion date and an assessment is ongoing as to the total scope of the damage and the expected final completion date. While subject to change, the current estimated completion date is the middle part of 2014. Builder's risk insurance is expected to fund the necessary repairs. Approximately \$16.3 million remains available under the loan.

The Company provided \$27.8 million in fundings during the six months ended June 30, 2013 on the orthopedic facility under construction in Missouri, bringing cumulative fundings to date to \$89.4 million. This project was scheduled to be completed in November 2013, but is ahead of schedule and is now expected to be completed in September 2013. The Company anticipates funding the remaining \$22.0 million under the loan and expects to acquire the facility for the outstanding loan balance during the third quarter of 2013.

For the six months ended June 30, 2013, the Company funded approximately \$13.5 million on 12 properties in the process of stabilization subsequent to construction in which the Company anticipates funding approximately \$11.3 million throughout the remainder of 2013.

Beyond the current commitments, the Company has no new developments planned. However, the Company is regularly in discussions with health systems, developers and others that could lead to attractive development opportunities. The Company will consider these projects in light of existing obligations, the acquisition environment, capital availability and cost, among other factors.

Subsequent Dispositions

On July 15, 2013, the Company disposed of an inpatient rehabilitation facility located in Florida that was classified as held for sale and in which the Company had a \$7.4 million net investment at June 30, 2013. The base rent was approximately \$0.4 million per quarter as of June 30, 2013. The purchase price was \$11.9 million. This property was sold pursuant to a purchase option contained in the lease which expired on July 15, 2013. The Company expects to record a \$4.3 million gain on the disposal.

On July 31, 2013, the Company expects to close on the disposition of an inpatient rehabilitation facility located in Alabama that was classified as held for sale and in which the Company had a \$11.2 million net investment at June 30, 2013. The base rent was approximately \$0.6 million per quarter as of June 30, 2013. The purchase price is \$17.5 million. This property will be sold pursuant to a purchase option contained in the lease which expires on July 31, 2013. The Company expects to record a \$6.2 million gain on the disposal.

Table of Contents

Potential Dispositions

The Company received notice in April 2013 that a tenant is exercising purchase options on two inpatient rehabilitation facilities located in Pennsylvania upon the expiration of the current leases on September 30, 2013. The purchase prices will be the greater of fair market value or \$17.6 million for each facility. The Company's aggregate net investment in the two facilities was approximately \$24.9 million, and base rent was approximately \$1.3 million per quarter as of June 30, 2013. Subsequent to providing notice of its exercise of the purchase options, the operator contacted the Company to continue long-term lease renewal discussions for these two properties. These discussions are on-going as of the date of this report. If the Company does not reach an agreement with the tenant to renew these two leases, the properties are expected to be sold on September 30, 2013 pursuant to the option terms.

The Company may from time to time sell additional properties and redeploy cash from property sales and mortgage repayments into investments. To the extent revenues related to the properties being sold and the mortgages being repaid exceed income from these investments, the Company's results of operations and cash flows could be adversely affected.

Financing Activities

Cash flows provided by financing activities for the six months ended June 30, 2013 were approximately \$53.3 million. Significant inflows from accessing the public debt and equity markets totaled \$497.0 million, net of costs incurred. Aggregate cash outflows totaled approximately \$443.7 million associated with repayments of indebtedness and dividends paid to common stockholders. Below is a summary of the significant financing activity. See Notes 3 and 5 to the Condensed Consolidated Financial Statements for more information on the capital markets and financing activities.

Changes in Debt Structure

On February 15, 2013, the Company amended the Unsecured Credit Facility, extending the maturity date to April 14, 2017, while providing the Company two six-month options to extend the maturity date to April 14, 2018. The amendment also reduced the applicable margin rate range to 0.95% to 1.75% (currently 1.4% based on the Company's credit rating) over LIBOR for purposes of determining interest and the annual facility fee to a range of 0.15% to 0.35% (currently at 0.30%). The Company paid up-front fees to the lenders of approximately \$2.7 million, which will be amortized over the term of the facility, and wrote-off \$0.3 million in certain unamortized deferred financing costs associated with the original facility in connection with the amendment. The Company had \$230.0 million outstanding under the Unsecured Credit Facility and had a remaining borrowing capacity of approximately \$470.0 million as of June 30, 2013. No significant changes were made to the covenant provisions.

On March 26, 2013, the Company issued \$250.0 million of unsecured senior notes due 2023 (the "Senior Notes due 2023"), bearing interest at 3.75%, payable semi-annually in arrears on April 15 and October 15, commencing October 15, 2013, and maturing on April 15, 2023 unless redeemed earlier by the Company. Proceeds received were net of a discount of approximately \$2.1 million, yielding a 3.85% interest rate per annum upon issuance. The Senior Notes due 2023 contain various financial covenant provisions that are required to be met on a quarterly and annual basis and are consistent with the Company's other outstanding senior notes.

The Company redeemed its 5.125% unsecured senior notes due 2014 (the "Senior Notes due 2014") on April 18, 2013, at a price of \$277.3 million consisting of the following:

outstanding principal of \$264.7 million,

accrued interest as of the redemption date of \$0.7 million; and

a "make-whole" amount of approximately \$11.9 million, resulting in a loss on extinguishment of debt totaling approximately \$12.3 million, including the write-off of unaccreted discount and unamortized costs.

On June 28, 2013, the Company prepaid in full a secured loan from Teachers Insurance and Annuity Association of America ("TIAA") bearing an interest rate of 7.25% at an amount equal to \$94.3 million consisting of the following:

outstanding principal of \$77.0 million

accrued interest as of the redemption date of \$0.5 million; and

a prepayment penalty of approximately \$16.8 million, resulting in a loss on extinguishment of debt totaling \$17.4 million, including the write-off of unamortized costs.

The Company believes these activities were warranted, including the costs incurred to execute the transactions, given the opportunities to refinance at lower interest rates that lower future costs of capital, improve the Company's debt and credit metrics and extend its debt maturities.

As of June 30, 2013, the Company's leverage ratio [debt divided by (debt plus stockholders' equity less intangible assets plus accumulated depreciation)] was approximately 42.3%.

Table of Contents

The Company's various debt agreements contain certain representations, warranties, and financial and other covenants customary in such debt agreements. Among other things, these provisions require the Company to maintain certain financial ratios and minimum tangible net worth and impose certain limits on the Company's ability to incur indebtedness and create liens or encumbrances. At June 30, 2013, the Company was in compliance with the financial covenant provisions under all of its various debt instruments.

Common Stock Issuances

- The following summarizes the Company shares of common stock sold under its at-the-market equity program:

During the six months ended June 30, 2013, the Company sold 4,844,771 shares of common stock under this program at prices ranging from \$24.19 per share to \$30.49 per share, generating approximately \$131.4 million in net proceeds. In July 2013, the Company sold 363,100 shares of common stock, generating \$9,100 million in net proceeds, with 5,391,400 authorized shares remaining available to be sold under these agreements.

On July 19, 2013, the Company issued 3,000,000 shares of common stock, par value \$0.01 per share, at \$26.13 per share in an underwritten public offering pursuant to the Company's existing effective registration statement. The net proceeds of the offering were approximately \$78.4 million before offering expenses.

Operating Activities

Cash flows provided by operating activities decreased from \$52.8 million for the six months ended June 30, 2012 to \$43.6 million for the six months ended June 30, 2013. Several items impact cash flows from operations including, but not limited to, cash generated from property operations, interest payments and the timing related to the payment of invoices and other expenses and receipts of tenant rent.

The Company may from time to time sell additional properties and redeploy cash from property sales and mortgage repayments into investments. To the extent revenues related to the properties being sold and the mortgages being repaid exceed income from these investments, the Company's results of operations and cash flows could be adversely affected.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements that are reasonably likely to have a current or future material effect on the Company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

New Accounting Pronouncements

See Note 1 to the Condensed Consolidated Financial Statements for the impact of new accounting standards. The adoption of the new standard did not have a material impact on the Company's results of operations or financial position.

Trends and Matters Impacting Operating Results

Management monitors factors and trends important to the Company and the REIT industry in order to gauge the potential impact on the operations of the Company. In addition to the matters discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2012, below are some of the factors and trends that management believes may impact future operations of the Company.

Expiring Leases

The Company expects that approximately 15%-20% of the leases in its multi-tenanted portfolio will expire each year. There are 393 leases that have expired or will expire during 2013. Approximately 89% of the leases expiring in 2013 are located in buildings on hospital campuses, are distributed throughout the portfolio and are not concentrated with any one tenant, health system or location. The Company typically expects 75% to 85% of multi-tenant leases to renew upon expiration and the renewals for the first six months of the year are within this range.

Leases on six single tenant net lease properties have expired and will expire during 2013. Two of the properties are outpatient medical office buildings that the Company anticipates will be vacated by the existing tenants. One of the outpatient medical office buildings is located on a hospital campus and is 12,000 square feet, the other is located off campus and is 110,000 square feet. These properties generated approximately \$0.9 million in net operating income during the six months ended June 30, 2013. At the expiration of the current lease term, the properties will be converted to the multi-tenant portfolio and the Company is currently working to lease the properties. The remaining four properties are inpatient rehabilitation facilities and the operator has exercised purchase options for these properties. One of the properties sold on July 15, 2013 and one is expected to sell on July 31, 2013. The Company continues to have discussions with the operator about potentially extending the leases for the two

Table of Contents

remaining facilities in Pennsylvania. The exercise of these four purchase options is discussed in more detail in Note 2 to the Condensed Consolidated Financial Statements.

Operating Expenses

The Company is experiencing an increase in property taxes throughout its portfolio as a result of increasing assessments and tax rates levied across the country. The effects of these increases are mitigated in leases that have operating expense reimbursement provisions. The Company continues its robust efforts to appeal all property tax increases. In addition, the Company anticipates a seasonal increase in utilities in the third quarter.

Non-GAAP Financial Measures**Same Store Net Operating Income**

The following table reflects the Company's same store NOI for the three months ended June 30, 2013 and 2012.

(Dollars in thousands)	Number of Properties ⁽¹⁾	Investment at June 30, 2013	Same Store NOI for the Three Months Ended June 30,	
			2013 ⁽²⁾	2012 ⁽²⁾
Multi-tenant Properties	127	\$1,622,970	\$31,276	\$31,254
Single-tenant Net Lease Properties	35	497,895	12,534	12,387
Total	162	\$2,120,865	\$43,810	\$43,641

(1) Mortgage notes receivable, construction in progress, an investment in one unconsolidated joint venture, corporate property and assets classified as held for sale are excluded.

(2) Reconciliation of Same Store NOI:

(Dollars in thousands)	Three Months Ended June 30,	
	2013	2012
Rental income	\$79,119	\$74,184
Rental lease guaranty income ^(a)	1,332	1,185
Property operating expense	(31,732)	(29,150)

NOI	46,745	44,891
NOI not included in same store	(2,935)	(1,250)
Same store NOI	\$43,810	\$43,641

(a) Other operating income reconciliation:

Rental lease guaranty income	\$1,332	\$1,185
Interest income	91	97
Management fee income	40	37
Other	45	51
	\$1,508	\$1,370

Net operating income ("NOI") and same store NOI are non-GAAP financial measures of performance. Management considers same store NOI an important supplemental measure because it allows investors, analysts and Company management to measure unlevered property-level operating results and to compare those results to other real estate companies and between periods on a consistent basis. The Company defines NOI as operating revenues (property operating revenue, single-tenant net lease revenue, and rental lease guaranty income) less property operating expenses related specifically to the property portfolio. NOI excludes straight-line rent, general and administrative expenses, interest expense, depreciation and amortization, gains and losses from property sales, property management fees and

other revenues and expenses not specifically related to the property portfolio. NOI may also be adjusted for certain expenses that are related to prior periods or are not considered to be part of the operations of the properties. Properties included in the same store analysis are stabilized properties that have been included in operations and were consistently reported as leased and stabilized properties for the duration of the year-over-year comparison period

presented. Accordingly, properties that were recently acquired or disposed of, properties classified as held for sale, and properties in stabilization or conversion are excluded from the same store analysis.

Funds from Operations

Funds from operations (“FFO”) and FFO per share are operating performance measures adopted by the National Association of Real Estate Investment Trusts, Inc. (“NAREIT”). NAREIT defines FFO as the most commonly accepted and reported measure of a REIT’s operating performance equal to “net income (computed in accordance with GAAP), excluding gains (or losses) from sales of property, plus depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures.” The Company follows the NAREIT definition in calculating and presenting FFO and FFO per share.

Management believes FFO and FFO per share to be supplemental measures of a REIT’s performance because they provide an understanding of the operating performance of the Company’s properties without giving effect to certain significant non-cash items, primarily depreciation and amortization expense. Historical cost accounting for real estate assets in accordance with generally accepted accounting principles (“GAAP”) assumes that the value of real estate assets diminishes predictably over time. However, real estate values instead have historically risen or fallen with market conditions. The Company believes that by excluding the effect of depreciation, amortization and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO and FFO per share can facilitate comparisons of operating performance between periods. The Company reports FFO and FFO per share because these measures are observed by management to also be the predominant measures used by the REIT industry and by industry analysts to evaluate REITs and because FFO per share is consistently reported, discussed, and compared by research analysts in their notes and publications about REITs. For these reasons, management has deemed it appropriate to disclose and discuss FFO and FFO per share. However, FFO does not represent cash generated from operating activities determined in accordance with GAAP and is not necessarily indicative of cash available to fund cash needs. FFO should not be considered as an alternative to net income attributable to common stockholders as an indicator of the Company’s operating performance or as an alternative to cash flow from operating activities as a measure of liquidity.

FFO for the three and six months ended June 30, 2013 compared to 2012 was primarily impacted by the various acquisitions and dispositions of the Company’s real estate portfolio, the results of operations of the portfolio from period to period and the loss on the extinguishments of debt of approximately \$29.9 million, or \$0.33 per common share. In addition, the Company completed an equity offering in the third quarter of 2012 of 9.2 million shares of common stock which negatively impacted the 2013 FFO per share by approximately \$0.03 per share.

The table below reconciles FFO to net income (loss) attributable to common stockholders for the three and six months ended June 30, 2013 and 2012:

(Amounts in thousands, except per share data)	Three Months Ended June 30,		Six Months Ended June 30,

The effect of nonvested stock totaling 1,320,412 shares and options under the Employee Stock Purchase Plan to purchase the Company's stock totaling 158,930 shares were excluded from the calculation of diluted loss per common share for the three months ended June 30, 2013 because the effect was anti-dilutive due to the negative FFO incurred during that period.

Table of Contents

Management believes that net income, as defined by GAAP, is the most appropriate earnings measurement. However, management considers certain non-GAAP financial measures to be useful supplemental measures of the Company's operating performance. A non-GAAP financial measure is generally defined as one that purports to measure historical or future financial performance, financial position or cash flows, but excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. Set forth below are descriptions of the non-GAAP financial measures management considers relevant to the Company's business and useful to investors, as well as reconciliations of these measures to the most directly comparable GAAP financial measures.

The non-GAAP financial measures presented herein are not necessarily identical to those presented by other real estate companies due to the fact that not all real estate companies use the same definitions. These measures should not be considered as alternatives to net income (determined in accordance with GAAP), as indicators of the Company's financial performance, or as alternatives to cash flow from operating activities (determined in accordance with GAAP) as measures of the Company's liquidity, nor are these measures necessarily indicative of sufficient cash flow to fund all of the Company's needs. Management believes that in order to facilitate a clear understanding of the Company's consolidated historical operating results, these measures should be examined in conjunction with net income as presented in the Condensed Consolidated Financial Statements and other financial data included elsewhere in this Quarterly Report on Form 10-Q.

• Acquisitions in 2012 and 2013 contributed \$1.5 million.

• Additional leasing activity at properties in stabilization contributed \$2.4 million.

Net leasing activity including contractual rent increases and renewals contributed in a decrease of \$1.0 million as a result of rent abatements included in certain lease renewals. The effects are partially offset in the increase in straight-line rent revenue.

Real estate taxes increased \$1.6 million.

General and administrative expenses increased approximately \$1.3 million, or 29.2%, for the three months ended June 30, 2013 compared to the prior year period because of an increase in compensation-related expenses totaling \$0.8 million, primarily non-cash stock-based compensation, and project costs of approximately \$0.2 million.

Depreciation expense increased \$1.3 million, or 6.4%, for the three months ended June 30, 2013 compared to the prior year period. Properties acquired in 2012 and 2013 and developments completed and commencing operations contributed a combined increase of \$1.0 million.

Other income (expense)

Loss on extinguishments of debt are associated with the redemption of the Senior Notes due 2014 of approximately \$12.3 million and the payoff of a secured loan with TIAA of approximately \$17.4 million. See Note 3 to the Condensed Consolidated Financial Statements for more detail.

Interest expense increased \$0.4 million for the three months ended June 30, 2013 compared to the prior year period.

Total Interest expense	\$18,925	\$18,506	\$419	2.3	%

Contractual interest decreased \$1.2 million primarily as a result of a lower average interest rate on the Unsecured Credit Facility, the lower interest on the Senior Notes due 2023 compared to the Senior Notes due 2014 and the repayment of a mortgage note payable. Capitalized interest expense decreased \$1.6 million from a decrease in development expenditures upon completion of various projects in progress.

Discontinued Operations
