Mercury Advisors
A Division of Merrill Lynch Investment Managers
www.mercury.ml.com

These reports, including the financial information herein, are transmitted to shareholders of MuniYield Florida Insured Fund, MuniYield New Jersey Insured Fund, Inc. and MuniYield Pennsylvania Insured Fund for their information. This is not a prospectus. Past performance results shown in these reports should not be considered a representation of future performance. The Funds have leveraged their Common Shares or Stock and intend to remain leveraged by issuing Preferred Shares or Stock to provide the Common Shareholders or Common Stock Shareholders with potentially

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

higher rates of return. Leverage creates risks for Common Shareholders or Common Stock Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares or Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Shares or Stock may affect the yield to Common Shareholders or Common Stock Shareholders. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) at www.mutualfunds.ml.com; and (3) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. Information about how the Funds vote proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available (1) at www.mutualfunds.ml.com; and (2) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>.

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Shares or Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Funds issue Preferred Shares or Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Shares or Stock, is paid to Common Shareholders or Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Shares or Stock. However, in order to benefit Common Shareholders or Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Shareholders or Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Shares or Stock capitalization of \$100 million and the issuance of Preferred Shares or Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Shares or Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Shareholders or Common Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders or Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares or Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Shares or Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Shares' or Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Shares or Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Shares or Stock may also decline.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities. As of April 30, 2005, the percentages of MuniYield Florida Insured Fund's, MuniYield New Jersey Insured Fund, Inc.'s and MuniYield Pennsylvania Insured Fund's total net assets invested in inverse floaters were 5.49%, 9.32% and 12.53%, respectively, before the deduction of Preferred Shares or Stock.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

A Letter From the President

Dear Shareholder

Financial markets faced a number of crosscurrents over the past several months, but most major benchmarks managed to post positive returns for the annual and semi-annual reporting periods ended April 30, 2005:

Total Returns as of April 30, 2005	6-month	12-month
U.S. equities (Standard & Poor's 500 Index)	+3.28%	+ 6.34%
Small-cap U.S. equities (Russell 2000 Index)	-0.15%	+ 4.71%

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

International equities (MSCI Europe Australasia Far East Index)	+8.71%	+14.95%
Fixed income (Lehman Brothers Aggregate Bond Index)	+0.98%	+ 5.26%
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+1.93%	+ 6.81%
High yield bonds (Credit Suisse First Boston High Yield Index)	+0.65%	+ 6.92%

After expanding at an annualized rate of 4.4% in 2004, U.S. gross domestic product growth for the first quarter of 2005 came in at an estimated 3.1% (although that figure was later revised upward to 3.5%). Nevertheless, the Federal Reserve Board continued increasing interest rates at a measured pace to combat emergent inflation. The most recent hike came on May 3, and brought the federal funds rate to 3%. Recently, signs of inflation have taken the form of rising business costs and increasing consumer prices, particularly in the areas of gasoline, healthcare, housing and education.

U.S. equities ended 2004 in a strong rally, but stumbled into negative territory in 2005. The market weakness was largely fueled by the potential for slowing economic and corporate earnings growth, renewed energy price concerns and a lack of investor conviction. On the positive side, certain sectors of the market have been performing well (particularly energy) and corporate transactions, such as mergers and acquisitions, stock buy-backs and dividend payouts, have all increased. International equities, especially in Asia, have benefited from higher economic growth rates.

In the bond market, we witnessed a yield curve flattening trend over the past several months as short-term yields increased and longer-term interest rates remained more stable or fell. At the end of April 2005, the two-year Treasury note yielded 3.66% and the 10-year Treasury note yielded 4.21%, a difference of 55 basis points (.55%). This compared to a spread of 149 basis points six months earlier and 222 basis points 12 months ago.

Looking ahead, the environment is likely to be a challenging one for investors. With this in mind, we encourage you to meet with your financial advisor to review your goals and asset allocation and to rebalance your portfolio, as necessary, to ensure it remains aligned with your objectives and risk tolerance. As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

(Robert C. Doll, Jr.)
Robert C. Doll, Jr.
President and Director/Trustee

SEMI-ANNUAL REPORTS, APRIL 30, 2005

A Discussion With Your Funds' Portfolio Managers

We continued to focus our investment further out on the municipal yield

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

curve, a strategy that proved constructive as the curve flattened and long-term bonds outperformed short-term issues.

Describe the recent market environment relative to municipal bonds.

Amid significant volatility, long-term bond yields moved lower over the past six months as shorter-term yields increased. For all of 2004, real gross domestic product (GDP) grew at an annualized rate of 4.4%, well ahead of 2003's annual rate of 3%. An advanced estimate of first quarter 2005 GDP growth came in at an unexpectedly low 3.1%, although that figure was later revised upward to 3.5%.

Nevertheless, it appeared that continued economic improvements were generally disregarded as investors focused on inflationary trends, currency-related demand for long-term U.S. securities, and interest rate action on the part of the Federal Reserve Board (the Fed). Over the past six months, 30-year Treasury bond yields declined 28 basis points (.28%) to 4.51%, while 10-year Treasury note yields rose 16 basis points to 4.21%. The Fed, in the meantime, continued to raise short-term interest rates at each of its meetings throughout the period, and most recently increased the federal funds rate from 2.75% to 3% on May 3. As short-term interest rates rose while longer-term interest rates fell, the yield curve continued to flatten.

Tax-exempt bond yields exhibited a similar pattern during the period. Yields on 30-year revenue bonds, as measured by the Bond Buyer Revenue Bond Index, fell 14 basis points to 4.83%. According to Municipal Market Data, yields on AAA-rated issues maturing in 30 years declined 23 basis points to 4.37%, while AAA-rated bonds maturing in 10 years saw their yields rise 17 basis points to 3.57%.

During the past six months, more than \$186 billion in tax-exempt bonds was underwritten, an increase of 7.5% versus the same period a year earlier. Issuance so far in 2005 has been boosted by a 32% increase in refunding issues as municipalities have sought to refinance existing higher-coupon debt. These refunding issues have been heavily weighted in the 10-year - 20-year maturity range to lower the overall interest costs. This concentration has put pressure on intermediate tax-exempt bond yields while supporting longer-term bond prices.

Investor demand for municipal product remained generally positive during the period. Investment Company Institute statistics indicate that, year-to-date through March 31, 2005, net new cash flows into long-term municipal bond funds exceeded \$1.3 billion. This represented a significant improvement from the \$516 million seen during the same period in 2004. However, AMG Data Services reports that weekly figures for the month of April have shown a modest reversal in the positive flows seen in the first three months of the year.

MuniYield Florida Insured Fund

Describe conditions in the State of Florida.

During the past several months, ratings agency Moody's increased Florida's credit rating from AA2 to AA1, and Standard & Poor's increased its rating from AA+ to AAA. At period-end, Fitch maintained a rating of AA. The favorable ratings are based on the state's solid economic and financial performance, in addition to moderate debt and a proactive government that responds to economic downturns faster than other states.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Last year's hurricane season had little impact on the state's finances. Florida's continued economic strength is bolstered by robust population growth, which is attributed to its attractive physical environment and favorable business climate. Although the growth in population has put a strain on services such as education, transportation and healthcare, it also has allowed the state to recover more quickly from sub par economic trends.

Currently, the state's revenues are higher than budgeted and expenditures remain under control due to prudent fiscal oversight. The fiscal year 2005 budget was brought into balance through tight expenditure controls, including outsourcing work and requiring local governments to pick up costs historically incurred by the state. To pay for these additional expenses, municipalities imposed increases to property taxes and/or local sales taxes through voter initiatives. Given the government's concerns over the high healthcare costs facing the state - roughly \$15 billion or 26% in the upcoming budget - Governor Jeb Bush has proposed a partially private health insurance plan. Florida continues to maintain sound and solid fund balances with consistent General Fund operations. In addition, the state has a working Capital Reserve Fund and a Budget Stabilization Fund in excess of \$1.8 billion.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

How did the Fund perform during the period?

For the six-month period ended April 30, 2005, the Common Shares of MuniYield Florida Insured Fund had net annualized yields of 6.02% and 6.24%, based on a period-end per share net asset value of \$15.17 and a per share market price of \$14.63, respectively, and \$.453 per share income dividends. Over the same period, the total investment return on the Fund's Common Shares was +2.80%, based on a change in per share net asset value from \$15.22 to \$15.17, and assuming reinvestment of all distributions.

The Fund's return, based on net asset value, lagged the +3.23% average return of the Lipper Florida Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to securities exempt from taxation in Florida or a city in Florida.)

In the first three months of the period, we increased the Fund's use of leverage by issuing additional Auction Market Preferred Shares (AMPS). Although AMPS issuance comes at a cost and detracted from relative performance early in the period, we believe the increased accrual generated from the additional leverage will benefit Fund performance in the months ahead. Also detracting from relative performance was the fact that the Fund has more limited investment parameters than many of its Lipper peers. This prohibited us from taking fuller advantage of the spread compression trend that benefited lower-quality issues over the past several months. Overall, however, the Fund continued to provide a competitive yield and positive total return while investing in a portfolio consisting primarily of high-quality, insured bonds.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment return based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We did not make any material changes to our strategy or to the portfolio's structure over the past six months. Although the market was quite volatile, ultimately, it moved very little from where we started the period. We continued to focus on increasing the income provided to shareholders and muting the Fund's net asset value volatility.

To that end, we sought to sell bonds in the 10-year - 15-year maturity range, although this proved more challenging in recent months as the yield curve flattened and bonds in the intermediate range began to cheapen relative to longer-dated securities. In making new purchases, we focused on premium-coupon bonds in the 20-year - 30-year maturity range. Efforts on this front also were somewhat limited, as few new issues met our desired investment characteristics. While issuance of Florida municipal bonds increased 29% versus the same six-month period a year ago, the majority of the new issues offered maturities of only 15 years - 20 years and yields below 5%. We were not inclined to give up bonds booked in the portfolio at higher yields in order to take advantage of the new-issue calendar.

For the six-month period ended April 30, 2005, the Fund's AMPS had an average yield of 1.58% for Series A and 1.43% for Series B. At this point in the Fed's monetary tightening cycle, interest rate increases are having a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period. Despite the recent Fed interest rate increases, the tax-exempt yield curve has remained relatively steep and has continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. However, should the spread between short-term and long-term interest rates narrow, the benefits of leverage will decline and, as a result, reduce the yield on the Fund's Common Shares. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.99% of total net assets. (For a complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

SEMI-ANNUAL REPORTS, APRIL 30, 2005

A Discussion With Your Funds' Portfolio Managers (continued)

How would you characterize the Fund's position at the close of the period?

We maintained a slightly defensive market posture at the close of the period. The Fed is expected to continue its monetary tightening program, which should eventually prompt long-term market rates to follow short-term rates higher. We believe our defensive stance should ready the Fund for relative outperformance under these circumstances.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

As long as the municipal yield curve remains fairly steep, we will continue in our efforts to sell the intermediate part of the curve and use periods of volatility to pursue higher-coupon bonds whenever they are attractively priced. We believe this strategy has served the Fund well against the prevailing market and economic backdrop.

MuniYield New Jersey Insured Fund, Inc.

Describe conditions in the State of New Jersey.

New Jersey has remained active in the debt market, reflecting the state's efforts to manage its fiscal challenges.

Revenue collections for the first seven months of fiscal year 2005 (which ends June 30, 2005) fell short by \$204 million. However, income tax revenue increased by 19.9% and sales tax by 4.2%, while corporate business tax decreased by 7.4%. On March 1, Acting Governor Richard Codey submitted his fiscal year 2006 budget recommendations. He proposed a budget of \$27.4 billion, which was 2.2% less than the 2005 budget and relies much less on the use of one-time revenues. Proposed spending reductions include, among other things, \$1.2 billion from eliminating and reducing New Jersey's property tax rebates for at least one year, and savings of approximately \$600 million from reductions in government spending, including 500 job cuts. Further savings would be realized from freezing most direct state aid to municipalities and school districts at current levels.

On the revenue side, the budget proposal includes raising \$275 million by extending the state's 6% sales tax to some goods and services that are currently tax-exempt, \$500 million from asset sales, and \$150 million from installing video slot machines at the Meadowlands. The budget proposal received positive responses from credit rating agencies, prompting Moody's and Standard & Poor's to confirm their Aa3 and AA- ratings, respectively, on the state's debt.

New Jersey's unemployment rate is improving, according to U.S. Department of Labor Statistics. In February 2005, the state's unemployment rate was 4.4%, down from 5.4% in February 2004.

How did the Fund perform during the period?

For the six-month period ended April 30, 2005, the Common Stock of MuniYield New Jersey Insured Fund, Inc. had net annualized yields of 6.07% and 6.33%, based on a period-end per share net asset value of \$15.56 and a per share market price of \$14.92, respectively, and \$.468 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +3.80%, based on a change in per share net asset value from \$15.46 to \$15.56, and assuming reinvestment of all distributions.

While the Fund provided a highly competitive yield, its total return, based on net asset value, trailed the +4.25% average return of the Lipper New Jersey Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in New Jersey or a city in New Jersey.)

Several factors contributed to Fund performance. Most notable was our yield curve positioning, which was designed to capitalize on what we expected would be a flattening trend. We moved a portion of bonds in the 10-year - 15-year maturity range further out on the curve to the 20-year -

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

25-year area. Our strategy paid off, as the yield curve did flatten and shorter-term bonds significantly lagged longer-term issues. Also contributing to performance were our positions in zero-coupon, or capital appreciation, bonds, as well as the advance refunding of a portion of the Fund's holdings. We also were able to generate some incremental return through hedging strategies, employing both the swap and futures markets. Lastly, even though roughly 85% of the portfolio is invested in AAA-rated insured paper, we do have the capability to invest a portion of assets in lower-rated investment grade issues. To the extent that we did, the Fund benefited from the incremental yield generated by those investments as well as the ongoing compression in credit spreads that benefited these lower-quality issues.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Detracting from relative performance was, primarily, the fact that the Fund has more limited investment parameters than many of its peers. This prohibited us from taking fuller advantage of the spread compression trend. New Jersey municipal debt funds that invest in non-investment grade and non-rated bonds had a clear competitive advantage. Also, while we did extend the Fund's duration to a more neutral posture, we were reluctant to extend much further given our interest rate outlook and the likely impact on the portfolio's distribution yield. Thus, some shorter-dated bonds were retained in the portfolio and underperformed as the yield curve flattened. Having said that, in order to maintain a relatively competitive accrual for our shareholders, we were inclined to hold onto several of our shorter holdings that are booked at higher yields and generate meaningful income for the portfolio.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

As mentioned earlier, we focused on adding longer-dated bonds to the portfolio and selling some of our shorter-dated holdings. For the six-month period, issuance of long-term municipal bonds in New Jersey increased a remarkable 41.5% versus the same six months one year earlier. The significant increase in debt issuance was prompted by the state's need to close its budget gap and also reflected the state's efforts to aggressively refinance its debt in the low interest rate environment. The net result was that New Jersey municipal bonds cheapened on a relative basis. This presented us with sufficient opportunity to accomplish our restructuring goals.

For the six-month period ended April 30, 2005, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of 1.74% for Series A and 1.28% for Series B. At this point in the Fed's monetary tightening cycle, interest rate increases are having a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

basis points during the six-month period. Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.01% of total net assets. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

The Fund ended the period relatively neutral with respect to interest rate risk. As a result, we would expect the Fund to perform, on average, similar to its benchmark in the months ahead (absent further significant compression in credit spreads). We maintain a high-quality portfolio. In fact, the Fund's average credit quality improved during the period as spreads tightened, and we took profits on some of our lower-rated investment grade holdings, particularly bonds backed by tobacco revenues, which were among the market's best performers.

Overall, we do not anticipate any major changes in terms of portfolio composition or structure. We expect that New Jersey supply will remain robust as the state continues to refinance its debt, which should keep New Jersey bonds inexpensive on a relative basis.

MuniYield Pennsylvania Insured Fund

Describe conditions in the Commonwealth of Pennsylvania.

Following several years of recession and slow growth, Pennsylvania managed to protect its credit ratings of A2, AA and AA from Moody's, Standard & Poor's and Fitch, respectively, by maintaining conservative budgeting practices, a relatively low debt burden and a more diversified service economy.

In past years, a weak economy led the commonwealth to draw down its "rainy day" fund to balance its budget. Pennsylvania also resorted to a combination of tax increases, the use of one-time funds and spending cuts. The threat of a projected \$1 billion budget deficit for the 2004 fiscal year led to taxes on cigarettes and cell phones and an increase in the personal income tax rate - measures that helped to generate a \$637 million surplus. Pennsylvania's fiscal year 2005 budget of \$22.8 billion is balanced, thanks in part to the fiscal surplus and a full year impact of higher personal income taxes. At the end of February 2005, the commonwealth's general fund collections for the 2005 fiscal year exceeded budget estimates by 1.5%, or \$204 million.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

A Discussion With Your Funds' Portfolio Managers (concluded)

Pennsylvania's legislature recently approved Governor Edward Rendell's

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

plan to use slot machine revenues for increased state aid to local school districts. Expanded gaming in the commonwealth is projected to generate \$1 billion in local property-tax relief among Pennsylvania's 501 school districts.

Last year marked the first year of total job growth in Pennsylvania since 2000. Labor gains have continued into 2005, with March total employment up 1.5% compared to the prior year. Pennsylvania's seasonally adjusted unemployment rate of 5.4% in March matched the national average. Personal income growth continues to lag the rest of the nation, however, with income growth per capita of 4.5% in Pennsylvania, compared to 5.7% nationally.

How did the Fund perform during the period?

For the six-month period ended April 30, 2005, the Common Shares of MuniYield Pennsylvania Insured Fund had net annualized yields of 6.05% and 6.31%, based on a period-end per share net asset value of \$16.09 and a per share market price of \$15.43, respectively, and \$.483 per share income dividends. Over the same period, the total investment return on the Fund's Common Shares was +3.49%, based on a change in per share net asset value from \$16.04 to \$16.09, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +2.75% average return of the Lipper Pennsylvania Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in Pennsylvania or a city in Pennsylvania.) In addition, the Fund's six-month net yield of 6.23% exceeded the 5.94% average yield of the Lipper category.

The Fund's outperformance can be attributed to a few factors, including security selection, favorable timing and our focus on the long end of the municipal yield curve. As the yield curve flattened considerably over the past six months, long-term bonds outperformed shorter-term issues, and our focus on this segment of the curve enhanced Fund results.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

During the period, we focused primarily on protecting the Fund's net asset value and providing shareholders with above-average income. Several of the higher-coupon bonds in the portfolio were called during the past six months. The bonds had average coupon income of 6.67% and accounted for approximately 7.3% of the portfolio. Proceeds from the bond calls were reinvested in above-average coupon structures, when available, and despite today's lower-rate environment, the Fund was still able to maintain a very competitive current yield distribution.

Also during the period, we sought to pick up additional yield for the

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

portfolio by investing in longer-dated bonds. Although the yield curve began to flatten considerably, the long end remained fairly steep. This area of the curve also has been less subject to bouts of volatility, allowing us the opportunity to add incremental yield while also muting the Fund's price volatility. Implementing our strategy proved to be a challenge at times as the Pennsylvania new-issue market continued to be dominated by par bonds that did not fit our desired investment characteristics. The maturities of the new issues have been shorter, generally in the 20-year range. However, we were able to accomplish our goal through the purchase of newly issued Puerto Rico Electric Power insured bonds. (Bonds issued by Puerto Rico and other U.S. territories are fully tax-exempt in all 50 states.)

SEMI-ANNUAL REPORTS, APRIL 30, 2005

For the six-month period ended April 30, 2005, the Fund's Auction Market Preferred Shares (AMPS) had an average yield of 1.85% for Series A, 1.78% for Series B and 1.60% for Series C. At this point in the Fed's monetary tightening cycle, interest rate increases are having a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period. Despite the recent Fed interest rate increases, the tax-exempt yield curve has remained relatively steep and has continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. However, should the spread between short-term and long-term interest rates narrow, the benefits of leverage will decline and, as a result, reduce the yield on the Fund's Common Shares. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.56% of total net assets. (For a complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We remain somewhat cautious in our outlook for the municipal market in the months ahead. Inflationary data could prove troubling to the Fed, which at its March meeting expressed greater concern about rising prices. Our view is that the Fed will continue to steadily increase the federal funds rate toward 3.5% - 3.75% by the end of the year. All else being equal, we believe the municipal bond market is well positioned to outperform other fixed income markets given an expected decrease in supply with no loss of demand. Against this backdrop, we intend to maintain our focus on premium-coupon issues in the 20-year - 25-year maturity range.

Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligation to pay the other party to the agreement.

Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to their shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in these reports.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Notes to Financial Statements

1. Significant Accounting Policies:

MuniYield Florida Insured Fund, MuniYield New Jersey Insured Fund, Inc. and MuniYield Pennsylvania Insured Fund (the "Funds" or individually as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset values of their Common Stock/Shares on a daily basis. Common Stock/Shares are listed on the New York Stock Exchange under the symbol MFT for MuniYield Florida Insured Fund, MJI for MuniYield New Jersey Insured Fund, Inc. and MPA for MuniYield Pennsylvania Insured Fund. The following is a summary of significant accounting policies followed by the Funds.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of the Board of Directors/Trustees. Such valuations and procedures are reviewed periodically by the Board of Directors/Trustees of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Funds' pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors/Trustees of the Funds.

(b) Derivative financial instruments--The Funds may engage in various portfolio investment strategies both to increase the return of the Funds and to hedge, or protect, their exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

* Financial futures contracts--Each Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

* Options--Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Notes to Financial Statements (continued)

* Forward interest rate swaps--Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes--It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

(e) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Offering expenses--Direct expenses relating to the public offering of certain Fund's Preferred Stock/Shares were charged to capital at the time of issuance of the stock/shares.

2. Investment Advisory Agreement and Transactions with Affiliates:

Each Fund has entered into an Investment Advisory Agreement with Fund

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .50% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock/Shares. For the six months ended April 30, 2005, the Investment Adviser agreed to reimburse its management fee by the amount of management fees each Fund pays to FAM indirectly through its investment described below:

Fund	Investment	Reimbursement
Muni Yield Florida Insured Fund	Merrill Lynch Institutional Tax-Exempt Fund	\$ 944
MuniYield New Jersey Insured Fund, Inc.	CMA New Jersey Municipal Money Fund	\$4,677
MuniYield Pennsylvania Insured Fund	CMA Pennsylvania Municipal Money Fund	\$1,618

During the six months ended April 30, 2005, Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), an affiliate of FAM, received underwriting fees of \$120,000 relating to MuniYield Florida Insured Fund and \$140,000 relating to MuniYield Pennsylvania Insured Fund, in connection with the issuance of each Fund's Preferred Shares.

For the six months ended April 30, 2005, the Funds reimbursed FAM for certain accounting services. Each Fund's reimbursements were as follows:

Fund	Reimbursement
MuniYield Florida Insured Fund	\$2,426
MuniYield New Jersey Insured Fund, Inc.	\$2,709
MuniYield Pennsylvania Insured Fund	\$3,120

Certain officers and/or directors/trustees of the Funds are officers and/or directors of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended April 30, 2005 were as follows:

	MuniYield Florida Insured Fund	MuniYield New Jersey Insured Fund, Inc.	MuniYield Pennsylvania Insured Fund
Total Purchases	\$64,703,529	\$60,691,337	\$80,577,033
Total Sales	\$53,593,429	\$56,845,541	\$66,655,133

4. Share Transactions:

MuniYield Florida Insured Fund and MuniYield Pennsylvania Insured Fund are authorized to issue an unlimited number of common shares of beneficial

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

interest, par value \$.10 per share (the "Common Shares"), together with 1,000,000 Preferred Shares of beneficial interest, par value of \$.05 per share. The Board of Trustees is authorized, however, to reclassify any unissued shares of beneficial interest without approval of the holders of Common Shares.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Notes to Financial Statements (continued)

MuniYield New Jersey Insured Fund, Inc. is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to classify any unissued shares of stock without approval of holders of Common Stock.

Common Stock/Shares

MuniYield Florida Insured Fund

Shares issued and outstanding during the six months ended April 30, 2005 and the year ended October 31, 2004 remained constant.

MuniYield New Jersey Insured Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2005 and the year ended October 31, 2004 increased by 9,294 and 18,785, respectively, as a result of dividend reinvestment.

MuniYield Pennsylvania Insured Fund

Shares issued and outstanding during the six months ended April 30, 2005 increased by 8,702 as a result of dividend reinvestment and remained constant during the year ended October 31, 2004.

Preferred Stock/Shares

Auction Market Preferred Stock/Shares are redeemable Preferred Stock/Shares of the Funds, with a liquidation preference of \$25,000 per share plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods.

MuniYield Florida Insured Fund and MuniYield Pennsylvania Insured Fund have a par value of \$.05 per share. MuniYield New Jersey Insured Fund, Inc. has a par value of \$.05 per share for Series A and \$.10 per share for Series B. The yields in effect at April 30, 2005 were as follows:

MuniYield	MuniYield	MuniYield
Florida	New Jersey	Pennsylvania
Insured	Insured	Insured
Fund	Fund, Inc.	Fund

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Series A	2.55%	2.25%	2.55%
Series B	2.63%	2.25%	2.55%
Series C	--	--	2.65%

MuniYield Florida Insured Fund

Shares issued and outstanding for the six months ended April 30, 2005 increased by 480 shares from the issuance of an additional series of Preferred Shares. Shares issued and outstanding for the year ended October 31, 2004 remained constant.

MuniYield New Jersey Insured Fund, Inc.

Shares issued and outstanding for the six months ended April 30, 2005 remained constant. Shares issued and outstanding for the year ended October 31, 2004 increased by 700 shares from the issuance of an additional series of Preferred Stock.

MuniYield Pennsylvania Insured Fund

Shares issued and outstanding for the six months ended April 30, 2005 increased by 560 shares from the issuance of an additional series of Preferred Shares. Shares issued and outstanding for the year ended October 31, 2004 remained constant.

The Funds pay commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended April 30, 2005, MLPF&S earned commissions as follows:

Fund	Commissions
MuniYield Florida Insured Fund	\$42,368
MuniYield New Jersey Insured Fund, Inc.	\$61,414
MuniYield Pennsylvania Insured Fund	\$84,589

5. Capital Loss Carryforward:

MuniYield Florida Insured Fund

On October 31, 2004, the Fund had a net capital loss carryforward of \$4,109,860, of which \$2,028,135 expires in 2008 and \$2,081,725 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

MuniYield New Jersey Insured Fund, Inc.

On October 31, 2004, the Fund had a net capital loss carryforward of \$2,731,893, of which \$492,523 expires in 2008, \$1,078,250 expires in 2010 and \$1,161,120 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Notes to Financial Statements (concluded)

MuniYield Pennsylvania Insured Fund

On October 31, 2004, the Fund had a net capital loss carryforward of \$6,901,601, all of which expires in 2008. This amount will be available to offset like amounts of any future taxable gains.

6. Subsequent Event:

Each Fund paid a tax-exempt income dividend to holders of Common Stock/Shares on May 27, 2005 to stock/shareholders of record on May 13, 2005. The amount of the tax-exempt income dividend was as follows:

Fund	Per Share Account
MuniYield Florida Insured Fund	\$.075000
MuniYield New Jersey Insured Fund, Inc.	\$.078000
MuniYield Pennsylvania Insured Fund	\$.080000

Effective January 1, 2005, Robert C. Doll, Jr. became President and Director/Trustee of the Funds.

Investment Objectives

NYSE Symbol MFT MuniYield Florida Insured Fund seeks to provide shareholders with as high a level of current income exempt from federal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes and which enables shares of the Fund to be exempt from Florida intangible personal property taxes.

NYSE Symbol MJI MuniYield New Jersey Insured Fund, Inc. seeks to provide shareholders with as high a level of current income exempt from federal income tax and New Jersey personal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income tax and New Jersey personal income taxes.

NYSE Symbol MPA MuniYield Pennsylvania Insured Fund seeks to provide shareholders with as high a level of current income exempt from federal and Pennsylvania income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal and Pennsylvania income taxes.

SEMI-ANNUAL REPORTS, APRIL 30, 2005

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Availability of Quarterly Schedules of Investments

The Funds file their complete schedules of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Electronic Delivery

The Funds offer electronic delivery of communications to their shareholders. In order to receive this service, you must register your account and provide us with e-mail information. To sign up for this service, simply access this Web site at <http://www.icsdelivery.com/live> and follow the instructions. When you visit this site, you will obtain a personal identification number (PIN). You will need this PIN should you wish to update your e-mail address, choose to discontinue this service and/or make any other changes to the service. This service is not available for certain retirement accounts at this time.
