Dear Shareholder

Time and again, we have seen how various global events and developing trends can have significant influence on financial markets. I hope you find that the following review of recent market conditions provides additional perspective on the performance of your investments as you read this shareholder report.

Over the past 12 months, we have seen a sluggish, stimulus-driven economic recovery at long last gain real traction, accelerate, and transition into a consumption-driven expansion. For the most part, 2010 was plagued with widely fluctuating economic data, but as the year drew to a close, it became clear that cyclical stimulus had beaten out structural problems as economic data releases generally became more positive and financial markets showed signs of continuing improvement. Although the sovereign debt crisis in Europe and high inflation in developing markets that troubled the global economy in 2010 remain challenges today, overall investor confidence has improved considerably. During the first four months of 2011, that confidence was shaken by political turmoil in the Middle East/North Africa region, soaring prices of oil and other commodities, tremendous natural disasters in Japan and a change in the ratings outlook for US debt. However, strong corporate earnings prevailed and financial markets resumed their course while the global economy continued to garner strength.

Equity markets experienced uneven growth and high volatility in 2010, but ended the year with gains. Following a strong start to 2011, the series of confidence-shaking events brought spurts of heightened volatility to markets worldwide, but was not enough to derail the bull market. Overall, global equities posted strong returns over the past 12 months. Emerging market equities, which had outperformed developed markets earlier in the period, fell prey to heightened inflationary pressures and underperformed developed markets later in the period. In the United States, strong corporate earnings and positive signals from the labor market were sources of encouragement for equity investors, although the housing market did not budge from its slump. Early in 2011, the US Federal Reserve announced that it would continue its Treasury purchase program ("QE2") through to completion and keep interest rates low for an extended period. This compelled investors to continue buying riskier assets, furthering the trend of small cap stocks outperforming large caps.

While fixed income markets saw yields trend lower (pushing bond prices higher) through most of 2010, the abrupt reversal in investor sentiment and risk tolerance in the fourth quarter drove yields sharply upward. Global credit markets were surprisingly resilient in the face of recent headwinds and yields regained relative stability as the period came to a close. Yield curves globally remained steep by historical standards and higher-risk sectors continued to outperform higher-quality assets. The tax-exempt municipal market enjoyed a powerful rally during the period of low yields in 2010, but when that trend reversed, the market was dealt an additional blow as it became evident that the Build America Bond program would not be extended. Meanwhile, municipal finance troubles raised credit concerns among investors and tax-exempt mutual funds experienced heavy outflows, resulting in wider spreads and falling prices. The new year brought relief from these headwinds and a steady rebound in the tax-exempt municipal market.

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST II - Form N-CSRS

Cash investments, as represented by the 3-month Treasury bill, returned only a fraction over 0% for the 12-month period as short-term interest rates remained low. Yields on money market securities remain near all-time lows.

Risk Assets Rallied on Growing Investor Confidence: Total Returns as of April 30, 2011	6-month	12-month
US large cap equities (S&P 500® Index)	16.36%	17.22%

Fund Summary as of April 30, 2011 BlackRock Credit Allocation Income Trust I, Inc.

Fund Overview

BlackRock Credit Allocation Income Trust I, Inc.'s (PSW) (the "Fund") primary investment objective is to provide holders of common shares ("Common Shareholders") with high current income. The secondary investment objective of the Fund is to provide Common Shareholders with capital appreciation.

The Fund seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in credit-related securities, including, but not limited to, investment grade corporate bonds, high yield bonds (commonly referred to as "junk" bonds), bank loans, preferred securities or convertible bonds or derivatives with economic characteristics similar to these credit-related securities. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended April 30, 2011, the Fund returned (0.82)% based on market price and 3.73% based on net asset value ("NAV"). For the same period, the closed-end Lipper Corporate Debt Funds (BBB-Rated) category posted an average return of (0.45)% based on market price and 2.46% based on NAV. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The primary driver of the Fund's positive performance was its allocation to high yield corporate credit, as the sector broadly rallied during the period on improving fundamentals and continued signs of economic recovery in the United States. Also contributing positively was the Fund's allocation and security selection within investment grade corporate credit. In particular, an allocation to capital securities, including trust preferreds and hybrid securities, had a positive impact due to a technical rally in that space sparked by the favorable outcome of financial regulatory reform. Within the industrials sector, the Fund's preference for media cable and media non-cable as well as wireless names boosted returns as these industries performed well during the period. The Fund also benefited from reducing its portfolio duration (sensitivity to interest rates) in the first half of the period, as interest rates rose following the announcement from the US Federal Reserve that it would implement a second round of quantitative easing.

Conversely, the Fund's shorter duration bias hurt performance in the later half of the period when interest rates turned lower on rising oil prices and the disastrous earthquake in Japan. In addition, as the yield curve steepened near the end of 2010 and into early 2011, the Fund's yield curve-flattening bias (fewer holdings of short-dated bonds in favor of longer-dated bonds) detracted from performance. Lastly, the Fund's financials and utilities holdings had a negative impact as both sectors underperformed for the six-month period.

Describe recent portfolio activity.

During the six-month period, the Fund increased exposure to high yield corporate credit in order to position itself to benefit from the positive effects of an accommodative monetary policy fueling an economic recovery and improving corporate fundamentals.

Describe Fund positioning at period end.

The Fund maintained diversified exposure across investment grade and high yield corporate credits with a quality bias toward lower-quality investment grade issues. The Fund ended the period with a smaller allocation to financials in favor of the industrials and utilities sectors, and a relatively short duration bias.

SEMI-ANNUAL REPORT

APRIL 30, 2011

11

Fund Summary as of April 30, 2011 **BlackRock Floating Rate Income Trust**

Fund Overview

BlackRock Floating Rate Income Trust's (BGT) (the "Fund") primary investment objective is to provide a high level of current income. The Fund's secondary investment objective is to seek the preservation of capital. The Fund seeks to achieve its investment objectives by investing primarily, under normal conditions, at least 80% of its assets in floating and variable rate instruments of US and non-US issuers, including a substantial portion of its assets in global floating and variable rate securities including senior secured floating rate loans made to corporate and other business entities. Under normal market conditions, the Fund expects that the average effective duration of its portfolio will be no more than 1.5 years. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

• For the six months ended April 30, 2011, the Fund returned 12.37% based on market price and 6.49% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 11.45% based on market price and 6.56% based on NAV. All returns reflect reinvestment of dividends. The Fund's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

• The main driver of positive performance for the period was the Fund's allocation (approximately 10% of the portfolio) to high yield bonds, as the asset class outperformed Floating Rate Loan Interests (bank loans). In addition, the Fund maintained its level of leverage at or above the Lipper category average, which benefited the Fund's performance relative to its peer group competitors that do not employ leverage, as would be expected when markets are advancing.

• As a matter of investment style, the Fund holds a considerable allocation to foreign bonds (approximately 30% of the portfolio). Many of those non-US issuers have investment grade credit quality ratings, such as Gazprom (Russia), which underperformed the Fund's high yield bond holdings.

• The Fund uses foreign currency exchange contracts to manage currency risk in the portfolio. The net effect of the contracts during the period

was negative.

Describe recent portfolio activity.

During the six-month period, the Fund decreased its exposure to higher-quality high yield credits and increased exposure to high yield credits with mid-range quality ratings as the economy gradually expanded and a robust new-issue market provided greater access to attractive opportunities. Relative to its competitors, the Fund continues to maintain a bias towards higher-quality and more liquid borrowers, sectors and loan structures, particularly as loan prices generally are approaching par.

Describe Fund positioning at period end.

At period end, the Fund held 85% of its total portfolio in bank loans and 15% in fixed-rate bonds, primarily high yield, with the remainder invested in a mix of convertible bonds, preferred securities, equities and cash. The Fund ended the period with leverage at approximately 31% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

BlackRock Floating Rate Income Trust**Fund Information**

Symbol on NYSE	BGT
Initial Offering Date	August 30, 2004
Yield on Closing Market Price as of April 30, 2011 (\$15.65) ¹	5.94%
Current Monthly Distribution per Common Share ²	\$0.0775
Current Annualized Distribution per Common Share ²	\$0.9300
Leverage as of April 30, 2011 ³	31%

¹ Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.

² The distribution rate is not constant and is subject to change.

³ Represents the loan outstanding as a percentage of total managed assets, which is the total assets of the Fund (including any assets attributable to any borrowings) minus the sum of liabilities (other than borrowings representing financial leverage). For a discussion of leveraging techniques utilized by the Fund, please see The Benefits and Risks of Leveraging on page 14.

The table below summarizes the changes in the Fund's market price and NAV per share:

	4/30/11	10/31/10	Change	High	Low
Market Price	\$15.65	\$14.52	7.78%	\$17.00	\$14.04
Net Asset Value	\$14.79	\$14.48	2.14%	\$14.80	\$14.35

The following charts show the portfolio composition of the Fund's long-term investments and credit quality allocations of the Fund's long-term investments excluding common stocks and floating rate loan interests:

⁵ The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of October 31, 2010, the market value of these securities was \$606,918 representing 1% of the Fund's long-term investments.

SEMI-ANNUAL REPORT

APRIL 30, 2011

13

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares ("Common Shares"). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage by borrowing through a credit facility or entering into reverse repurchase agreements. PSW, PSY, BPP, BTZ and BGT had auction market preferred shares ("Preferred Shares") issuances outstanding during the six-month period ended April 30, 2011. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund's Common Shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to Common Shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of each Fund's Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to Common Shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it borrows an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing cost and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing cost and interest expense of the borrowings is significantly lower than the income earned on the Fund's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays dividends on the higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates.

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST II - Form N-CSRS

Furthermore, the value of a Fund's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds' borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence each Fund's NAV positively or negatively in addition to the impact on Fund performance from leverage and borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds and Common Shareholders, but as described above, it also creates risks as short or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Fund's net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit each Fund's ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, each Fund is permitted to borrow up to $33\frac{1}{3}$ % of its total managed assets. Under normal circumstances, each Fund anticipates that the total economic leverage from reverse repurchase agreements and credit facility borrowings will not exceed $33\frac{1}{3}$ % of its total managed assets at the time such leverage is incurred. As of April 30, 2011, the Funds had economic leverage from reverse repurchase agreements and/or credit facility borrowings as a percentage of their total managed assets as follows:

	Percent of Leverage
PSW	25%
PSY	25%
BPP	19%
BTZ	21%
BGT	31%

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, swaps, options and foreign currency exchange contracts, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, foreign currency exchange rate, interest rate and/or other risks. Such derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative instrument. The Funds' ability to use a derivative instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements.

SEMI-ANNUAL REPORT

APRIL 30, 2011

19

BlackRock Credit Allocation Income Trust I, Inc. (PSW)
Schedule of Investments (continued)

(g) Investments in companies considered to be an affiliate of the Fund during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at October 31, 2010	Net Activity	Shares Held at April 30, 2011	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	5,884,098	(5,700,567)	183,531	\$ 1,655

(h) Represents the current yield as of report date.

- For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.
- Reverse repurchase agreements outstanding as of April 30, 2011 were as follows:

Interest Counterparty	Rate	Trade Date	Maturity Date	Net Closing Amount	Face Amount

	Fixed Rate	Counter-party				
iTraxx-Europe						
Sub						
Financial						
Index		Deutsche				
Series 15	1.00%	Bank AG	6/20/16	A	EUR 1,900	\$ 2,644

¹ Using S&P's rating of the underlying securities.

² The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

•Interest rate swaps outstanding as of April 30, 2011 were as follows:

Fixed Rate	Floating Rate	Counter-party	Expiration Date	Notional Amount (000)	Unrealized	
					Depreciation	
0.98%(a)	3-month					
	LIBOR	Citibank NA	3/30/13	USD	13,900	\$ (63,910)
4.34%(a)	3-month					
	LIBOR	Citibank NA	4/14/41	USD	400	(11,982)
4.38%(a)	3-month	Goldman Sachs				
	LIBOR	International	4/14/41	USD	600	(21,744)
4.35%(a)	3-month					
	LIBOR	Deutsche Bank AG	4/15/41	USD	700	(22,509)
Total						\$ (120,145)

(a) Pays a fixed interest rate and receives floating rate.

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are summarized in three broad levels for financial statement purposes as follows:

•Level 1 — price quotations in active markets/exchanges for identical assets and liabilities

•Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST II - Form N-CSRS

default rates) or other market-corroborated inputs)

•Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of April 30, 2011 in determining the fair valuation of the Fund's investments and derivative financial instruments:

(a) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(b) Variable rate security. Rate shown is as of report date.

(c) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.

(d) Security is perpetual in nature and has no stated maturity date.

(e) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.

(f) Non-income producing security.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

APRIL 30, 2011

25

BlackRock Credit Allocation Income Trust II, Inc. (PSY)
Schedule of Investments (continued)

(g) Investments in companies considered to be an affiliate of the Fund during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at October 31, 2010	Net Activity	Shares Held at April 30, 2011	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	1,483,567	539,833	2,023,400	\$ 6,501

(h) Represents the current yield as of report date.

•For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

•Reverse repurchase agreements outstanding as of April 30, 2011 were as follows:

SEMI-ANNUAL REPORT APRIL 30, 2011

BlackRock Credit Allocation Income Trust II, Inc. (PSY)
Schedule of Investments (concluded)

•Financial futures contracts sold as of April 30, 2011 were as follows:

Contracts Issue	Exchange	Expiration	Notional Value	Unrealized Depreciation
237 5-Year U.S. Treasury Note	Chicago Board of Trade	June 2011		\$27,823,308 \$ (253,786)
328 10-Year U.S. Treasury Note	Chicago Board of Trade	June 2011	38,900,454	(833,671)
128 Long-Term U.S. Treasury Bond	Chicago Board of Trade	June 2011	15,318,757	(345,243)
97 Ultra U.S. Treasury Bond	Chicago Board of Trade	June 2011	11,954,329	(255,546)
Total				\$(1,688,246)

•Credit default swaps on single-name issuer — sold protection outstanding as of April 30, 2011 were as follows:

Issuer	Receive Fixed Rate	Counter-party	Expiration	Issuer Credit Rating¹	Notional Amount (000)²	Unrealized Appreciation
MetLife, Inc.	1.00%	Deutsche Bank AG	3/20/18	A-	USD 900	\$ 23,446

¹ Using S&P's rating of the underlying securities.

² The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

•Credit default swaps on traded indexes — sold protection outstanding as of April 30, 2011 were as follows:

Index	Receive Fixed Rate	Counter-party	Expiration	Credit Rating³	Notional Amount (000)⁴	Unrealized Appreciation
iTraxx-Europe Sub Financial Index		Deutsche Bank AG				
Series 15	1.00%	Bank AG	6/20/16	A	EUR 8,100	\$ 11,272

³ Using S&P's rating of the underlying securities.

⁴ The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST II - Form N-CSRS

•Interest rate swaps outstanding as of April 30, 2011 were as follows:

Fixed Rate	Floating Rate	Counter-party	Expiration Date	Notional Amount (000)	Unrealized Depreciation
0.98% ^(a)	3-month LIBOR	Citibank NA	3/30/13	USD 59,200	\$ (272,191)
4.34% ^(a)	3-month LIBOR	Citibank NA	4/14/41	USD 1,700	(50,922)
4.38% ^(a)	3-month LIBOR	Goldman Sachs International	4/14/41	USD 2,400	(86,978)
4.35% ^(a)	3-month LIBOR	Deutsche Bank AG	4/15/41	USD 3,000	(96,469)
Total					\$ (506,560)

^(a)Pays a fixed interest rate and receives floating rate.

•Fair Value Measurements — Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are summarized in three broad levels for financial statement purposes as follows:

- Level 1 — price quotations in active markets/exchanges for identical assets and liabilities
- Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
- Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of April 30, 2011 in determining the fair valuation of the Fund's investments and derivative financial instruments:
