INCORPORATION BY REFERENCE

THIS REPORT ON FORM 6-K IS INCORPORATED BY REFERENCE INTO THE REGISTRATION STATEMENT ON FORM F-3, FILE NO. 333-92044, OF PETRÓLEO BRASILEIRO S.A -- PETROBRAS AND PETROBRAS INTERNATIONAL FINANCE COMPANY.

PETROBRAS ANNOUNCES THIRD QUARTER OF 2003 RESULTS

(Rio de Janeiro November 25, 2003) PETRÓLEO BRASILEIRO S.A. PETROBRAS today announced its consolidated results stated in U.S. Dollars, prepared in accordance with U.S. GAAP.

PETROBRAS reported consolidated net income of U.S.\$ 5,665 million for the nine month period ended September 30, 2003 (an increase of 153% in relation to the same period of 2002) and consolidated net operating revenues of U.S.\$ 22,648 million.

- Consolidated sales of products and services totaled U.S.\$ 31,300 million for the nine-month period ended September 30, 2003, a 26.8% increase from U.S.\$ 24,693 million for the nine-month period ended September 30, 2002. Net operating revenues totaled U.S.\$ 22,648 million for the nine-month period ended September 30, 2003, a 35.8% increase from net operating revenues of U.S.\$ 16,682 million for the nine-month period ended September 30, 2002. The increases in consolidated sales of products and services and net operating revenues were primarily attributable to our ability to increase the prices for certain oil products in the Brazilian market to achieve greater parity with the increased prices of such oil products in the international markets
- Consolidated sales of products and services totaled U.S.\$ 11,314 million for the third quarter of 2003, a 34.9% increase from U.S.\$ 8,388 million for the third quarter of 2002. Net operating revenues totaled U.S.\$ 8,218 million for the third quarter of 2003, a 38.4% increase from net operating revenues of U.S.\$ 5,939 million for the third quarter of 2002.
- Consolidated net income totaled U.S.\$ 2,238 million for the nine-month period ended September 30, 2002, as compared to consolidated net income of U.S. \$ 5,665 million for the nine-month period ended September 30, 2003. This increase was primarily due to the 35.8% increase in net operating revenues and, to a lesser extent, the cumulative effect of a change in accounting principles adopted in the first quarter of 2003 relating to future liabilities for site restoration costs, which generated a gain of U.S.\$ 697 million, net of taxes.
- Consolidated net income increased to U.S.\$ 1,897 million in the third quarter of 2003 from U.S.\$ 752 million in the third quarter of 2002, primarily due to the increase in net operating revenues.
- Earnings per share for the nine-month period ended September 30, 2003 increased to U.S.\$ 5.17 per share, as compared to earnings per share of U.S.\$ 2.06 for the nine-month period ended September 30, 2002.
- Net debt at September 30, 2003 increased 9.0% when compared to December 31, 2002, primarily due to the inclusion of U.S.\$ 1,801 million of PEPSA's net debt in our consolidated balance sheets and the issuance of U.S.\$ 1,900 million in long-term debt in the international capital markets in the nine-month period ended September 30, 2003.
- Our domestic production of crude oil and natural gas liquids (NGL) reached an average of 1,549 thousand barrels of oil equivalent per day in the nine-month period ended September 30, 2003, a 2.2% increase from an average of 1,515 thousand barrels of oil equivalent per day in the nine-month period ended September 30, 2002.
- On November 13, 2003, our Board of Directors approved the distribution of remuneration to shareholders in the form of interest on capital amounting to U.S.\$ 1,125 million (U.S.\$ 1.03 per share). This remuneration will be payable by February 13, 2004 and will be deducted from the dividend calculated on adjusted net income for the 2003 fiscal year. This distribution of interest on capital generated an income tax benefit of U.S.\$ 357 million, as shareholder remunerations in the form of interest on capital are tax deductible under Brazilian law.
- Our consolidated financial statements as of September 30, 2003 include the financial statements of Petrobras Energia Participaciones S.A. - PEPSA (formerly known as Pérez Companc S.A. (PECOM)) and Petrolera Entre Lomas PELSA (formerly known as Petrolera Pérez Companc S.A.) as of May 13, 2003, the date on which Argentina's antitrust regulatory agency, the Comisión Nacional de Defensa de la Competencia (the National Agency for Defense of Competition, or CNDC) approved our acquisition of 58.62% of the shares of PEPSA and 39.67% of the shares of PELSA.

Because the statements of income of PEPSA and PELSA for the period from May 13, 2003 to May 31, 2003 are not available we have consolidated the statements of income of PEPSA and PELSA as of June 1, 2003.

We believe that the inclusion of the statements of income of PEPSA and PELSA for the period from May 13, 2003 to May 31, 2003 would not have materially affected our net income for the nine-month period ended September 30, 2003.

COMMENTS FROM THE CEO , MR. JOSÉ EDUARDO DE BARROS DUTRA

This year we are commemorating our 50th anniversary as a company, and we have more than enough reasons to celebrate this event. We have completed a half-century of existence as the 15th largest oil company in the world, the largest company in Brazil, and a leader in Latin America.

We are, for the second consecutive year (2001 and 2002), one of ten finalists for a prestigious financial transparency award, in which we are evaluated against the 500 largest and best private companies in Brazil and the 50 largest state-owned Brazilian companies.

Our total capital expenditures increased to U.S.\$ 4.1 billion, in the nine-month period ended September 30, 2003 and were directed mainly towards crude oil and natural gas exploration and production. As a result, not only did production increase, but we also made important oil discoveries including important discoveries in the state of Espírito Santo. On a consolidated basis, in the last 12 months, our discoveries in Brazil totaled nearly 4 billion barrels of crude oil and 419 billion cubic meters of natural gas, representing 6.6 billion barrels of potentially recoverable oil equivalents.

Our positive evaluation by the capital markets was evidenced by the successful issue of U.S.\$ 750 million of bonds in the international capital markets in the third quarter of 2003. The strong interest shown by international investors resulted in issues being subscribed in record time, with demand substantially higher than the offer amount.

We have also signed contracts securing U.S.\$ 1 billion of financing to implement the Malhas Project. This project involves the extension of gas pipelines into southeastern and northeastern Brazil and will expand the transport capacity of natural gas by 9 million cubic meters per day to the Northeast, and by 13 million cubic meters per day to the Southeast.

We are an energy company with an international presence that seeks profitability in our businesses, and our activities are strongly associated with environmental and social responsibility, making it particularly significant for us to be awarded the Brazilian Social Balance Prize Prêmio Balanço Social in the category of National Outstanding Company for the year 2002.

Our important contribution to the country, measured by taxes and duties paid, already exceeds U.S.\$ 12 billion in the first nine months of the year.

With this positive landscape as a backdrop, we have reached our 50th year with renewed energy and embrace the challenge of continuing to grow over the next 50 years.

(3) Government take includes royalties, special government participation and rental of areas.

ANALYSIS OF OPERATING HIGHLIGHTS

Exploration and Production

Domestic crude oil and natural gas production increased 2.2% to 1,549 thousand barrels per day for the nine-month period ended September 30, 2003, as compared to 1,515 thousand barrels per day for the nine-month period ended September 30, 2002, largely due to the start-up of new wells in the Marlim and Espadarte (ESPF) fields and installation of the production system in the Marlim Sul field. The start-up of FPSO Brazil in the Roncador field in December 2002, and the start-up of production in the Jubarte field in October 2002 and the Coral field in February 2003, also contributed to increased production in the nine-month period ended September 30, 2003.

International crude oil and NGL production increased to 159 thousand barrels per day for the nine-month period ended September 30, 2003, as compared to 35 thousand barrels per day for the nine-month period ended September 30, 2002, principally due to the inclusion of production from Petrolera Santa Fe, PELSA and PEPSA in Argentina, Ecuador and Venezuela into our production results, as well as increased production in Bolivia resulting from increased demand for natural gas in that country. Part of this increase was offset by the reduced production in mature fields in Angola, Colombia and the United States.

Lifting Costs

Our lifting costs in Brazil, excluding government take, increased 8.6% to U.S.\$ 3.30 per barrel of oil equivalent in the nine-month period ended September 30, 2003, from U.S.\$ 3.04 per barrel of oil equivalent in the nine-month period ended September 30, 2002. This increase was primarily due to higher expenses associated with technical services for maintenance activities on oil flow lines, equipment, and installations that support production, as well as increased transport expenses associated with the Marlim, Albacora, Enchova, Namorado, Garoupa, Corvina and Cherne fields.

Our lifting costs in Brazil, including government take, increased 22.5% to U.S.\$ 8.44 per barrel of oil equivalent for the nine-month period ended September 30, 2003, from U.S.\$ 6.89 per barrel of oil equivalent for the nine-month period ended September 30, 2002, due to the new special participation charge assessed to the greater volume of production from the Marlim Sul field, the inclusion of the Canto do Amaro and Roncador fields as fields subject to the special participation tax and to the increase in domestic reference prices for domestic crude oil.

Our international lifting costs increased 22.9% to U.S.\$ 2.36 per barrel of oil equivalent for the nine-month period ended September 30, 2003, as compared to U.S.\$ 1.92 per barrel of oil equivalent for the nine-month period ended September 30, 2002. This increase was primarily due to the incorporation of the higher unit lifting costs of Petrolera Santa Fe, PELSA and PEPSA, as well as the increased expenses in relation to the start of production of the San Antonio block in Bolivia. This increase was partially offset by the decrease in maintenance expenses at the Arauca field, and the reduced consumption of natural gas and diesel oil at the Upia field, both in Colombia.

Refining costs

Domestic unit refining costs increased 10.5% to U.S.\$ 1.05 per barrel of oil equivalent for the nine-month period ended September 30, 2003, as compared to U.S.\$ 0.95 per barrel of oil equivalent for the nine-month period ended September 30, 2002, principally due to the higher costs of chemical products and catalyzers.

International unit refining costs increased 14.7% to U.S.\$ 1.09 per barrel of oil equivalent for the nine-month period ended September 30, 2003, as compared to U.S.\$ 0.95 per barrel of oil equivalent for the nine-month period ended September 30, 2002. This increase was primarily due to the incorporation of the higher refining unit costs of PELSA and PEPSA in Argentina, as well as increased expenses related to maintenance and operation expenses of EG3, our Argentine subsidiary that focuses on downstream distribution.

ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the nine-month period ended September 30, 2003 compared to the nine-month period ended September 30, 2002

The comparison between our results of operations for the nine-month period ended September 30, 2003 and the nine-month period ended September 30, 2002, has been significantly affected by the 17.3% rise in the average Real/U.S. dollar exchange rate in the nine-month period ended September 30, 2003 as compared to the average Real/U.S. dollar exchange rate in the nine-month period ended September 30, 2002. For ease, we refer to this change in the average exchange rate as the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Revenues

Net operating revenues increased 35.8% to U.S.\$ 22,648 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 16,682 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to our ability to increase prices of certain oil products in the Brazilian market to achieve greater parity with the increased prices of such oil products in the international markets (the average price of Brent crude oil, an international benchmark oil, increased 17.5% from U.S. \$ 24.38 during the nine-month period ended September 30, 2002 to U.S. \$ 28.65 during the nine-month period ended September 30, 2003). The increase in net operating revenues was also attributable, to a lesser extent, to an increase in sales volume outside Brazil (international sales), which includes sales conducted by PEPSA and PELS.A. These increases were partially offset by a 3.9% decrease in sales volume in the domestic market, primarily due to a decrease in Brazilian consumer demand.

Consolidated sales of products and services increased 26.8% to U.S.\$ 31,300 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 24,693 million for the nine-month period ended September 30, 2002, primarily as a result of the increase in the price of certain oil products in the international markets and the increase in sales volume outside Brazil (international sales).

Included in sales of products and services are the following amounts which we collected on behalf of the Brazilian federal or state governments:

- Value-added and other taxes on sales of products and services and social security contributions. These taxes increased 19.8% to U.S.\$ 4,655 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 3,887 million for the nine-month period ended September 30, 2002, primarily due to the increase in sales of products and services; and
- CIDE, the per-transaction tax due to the federal government, which decreased 3.1% to U.S.\$ 3,997 million for the nine-month period ended September 30, 2003, as compared to U. S.\$ 4,124 million for the nine-month period ended September 30, 2002. This decrease was primarily attributable to the 17.3% decrease in the value of the Real against the U.S. dollar and a 3.9% decrease in domestic sales volume for the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002. This decrease was partially offset by an increase in the CIDE rate charged on certain oil products.

Cost of sales

Cost of sales for the nine-month period ended September 30, 2003 increased 36.0% to U.S.\$ 11,058 million, as compared to U.S.\$ 8,131 million for the nine-month period ended September 30, 2002. This increase was principally a result of:

- a U.S.\$ 635 million increase in the cost of imports primarily attributable to the increase of crude oil and oil product prices in the international markets;
- a U.S.\$ 240 million, increase in costs associated with the consolidation of PEPSA and PELS.A;
- a net increase in cost of sales outside Brazil of approximately U.S.\$ 126 million, attributable to an increase in our sales volume in the international markets; and
- an increase in taxes and charges imposed by the Brazilian government, which amounted to U.S.\$ 2,201 million as compared to U.S.\$ 1,411 million for the nine-month period ended September 30, 2002. These taxes and charges included the special participation charge (an additional charge payable in the event of high production and/or profitability from our fields) which increased to U.S.\$ 1,171 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 638 million for the nine-month period ended September 30, 2002, as a result of our increased production of crude oil during the nine-month period ended September 30, 2003.

These increases were partially offset by:

- a decrease of approximately U.S.\$ 230 million in cost of sales related to the 3.9% reduction in our domestic sales volumes; and
- the effect on our cost of sales as expressed in U.S. dollars of the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Depreciation, depletion and amortization

We calculate depreciation, depletion and amortization relating to exploration and production assets on the basis of the units of production method. Depreciation, depletion and amortization expenses decreased 13.5% to U.S.\$ 1,322 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 1,528 million for the nine-month period ended September 30, 2002. This decrease was primarily attributable to the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002, as well as to the inclusion in our financial statements of approximately U.S.\$ 132 million of abandonment costs under the line item exploration, including exploratory dry holes. The decrease in depreciation, depletion and amortization, was partially offset by an increase of depreciation, depletion and amortization expenses of approximately U.S.\$ 88 million, related to PEPSA and PELSA.

Exploration, including exploratory dry holes

Exploration costs, including exploratory dry holes increased 3.3% to U.S. \$ 311 million for the nine-month period ended September 30, 2003 as compared to U.S.\$ 301 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to the increase of approximately U.S.\$ 35 million in dry holes expenses and U.S.\$ 24 million in abandonment costs in the nine-month period ended September 30, 2003. These costs and expenses had been recorded under the line item depreciation, depletion and amortization in 2002. The increase in exploration costs, including exploratory dry holes, was partially offset by the effect of the 17.3% decrease in the value of the Real against the U.S. dollar for the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Selling, general and administrative expenses

Selling, general and administrative expenses increased 3.3% to U.S.\$ 1,422 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 1,376 million for the nine-month period ended September 30, 2002.

- Selling expenses decreased 10.1% to U.S.\$ 715 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 795 million for the nine-month period ended September 30, 2002. This decrease was primarily attributable to the effect of the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002, and was partially offset by the increase of approximately U.S.\$ 20 million in selling expenses recognized in connection with the consolidation of PEPSA and PELSA.
- General and administrative expenses increased 21.7% to U.S.\$ 707 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 581 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to an increase of U.S.\$ 68 million in expenses related to technical consulting services in connection with our increased outsourcing of selected non-core general and administrative activities, an increase of U.S.\$ 29 million in expenses related to our profit sharing program, an increase of U.S.\$ 36 million in expenses related to employee training, and an increase of U.S.\$ 31 million in general and administrative expenses recognized in connection with the consolidation of PEPSA and PELSA. This increase in general and administrative expenses was partially offset by the effect of the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Research and development expenses

Research and development expenses increased 33.0% to U.S.\$ 137 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 103 million for the nine-month period ended September 30, 2002. This increase was primarily related to our additional investments in programs for environmental safety and deepwater and refining technologies of approximately U.S.\$ 49 million, and was partially offset by the effect of the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Equity in results of non-consolidated companies

Equity in results of non-consolidated companies increased to a gain of U.S.\$ 103 million for the nine-month period ended September 30, 2003, as compared to a loss of U.S.\$ 9 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to a gain of U.S.\$ 46 million for the nine-month period ended September 30, 2003, as compared to a loss of U.S.\$ 25 million for the nine-month period ended September 30, 2002 related to the financial results of our equity investments in Compañía Mega, an Argentine company that is engaged in natural gas activities, and was adversely affected by the devaluation of the Argentine Peso against the U.S. dollar in the nine-month period ended September 30, 2002. The increase in equity in results of non-consolidated companies was also attributable to a gain of U.S.\$ 51 million during the nine-month period ended September 30, 2003 from our investments in natural gas distribution and petrochemical companies, as compared to a gain of U.S.\$ 15 million for the nine-month period ended September 30, 2002.

Financial income

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

We derive financial income from several sources, including:

- interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold balances in U.S. dollar deposits;
- long-term government securities we acquired in connection with the privatization of our petrochemical assets; and
- Government receivables, primarily the Petroleum and Alcohol Account.

Financial income decreased 33.7% to U.S.\$ 606 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 914 million for the nine-month period ended September 30, 2002. This decrease was primarily attributable to a reduction in financial interest income from short-term investments, which declined 74.1% to U.S.\$ 180 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 695 million for the nine-month period ended September 30, 2002. The reduction in financial income was primarily attributable to the decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002. This decrease was partially offset by an increase of financial income of approximately U.S.\$ 20 million recognized in connection with the consolidation of PEPSA and PELSA.

Financial expense

Financial expense increased 97.3% to U.S.\$ 1,030 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 522 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to our additional debt and an increase of approximately U.S.\$ 90 million in financial expenses recognized in connection with the consolidation of PEPSA and PELSA.

Monetary and exchange variation on monetary assets and liabilities, net

Monetary and exchange variation on monetary assets and liabilities, net generated a gain of U.S.\$ 541 million for the nine-month period ended September 30, 2003, as compared to a loss of U.S.\$ 1,514 million for the nine-month period ended September 30, 2002. Approximately 90% of our indebtedness was denominated in foreign currencies during each of the nine-month periods ended September 30, 2003 and September 30, 2002. The increase in monetary and exchange variation on monetary assets and liabilities, net was primarily attributable to the effect of a 17.3% appreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2003, as compared to a 67.9% depreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2002.

Employee benefit expense

Employee benefit expense consists of financial costs relating to pension and other post-retirement benefits. Our employee benefit expense increased 13.3% to U.S.\$ 391 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 345 million for the nine-month period ended September 30, 2002. This rise in costs was attributable to an increase of U.S.\$ 98 million from the annual actuarial calculation of the pension plan liability. The increase was partially offset by the effect of the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002.

Other taxes

Other taxes, consisting of miscellaneous value-added, transaction and sales taxes, decreased 29.3% to U.S.\$ 224 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 317 million for the nine-month period ended September 30, 2002. This decrease was primarily attributable to the 17.3% decrease in the value of the Real against the U.S. dollar in the nine-month period ended September 30, 2003, as compared to the nine-month period ended September 30, 2002, and the decrease of U.S.\$ 90 million in the PASEP/COFINS taxes payable in respect of foreign exchange gains on assets, resulting from transactions with affiliates with assets denominated in foreign currencies.

Other expenses, net

Other expenses, net are primarily composed of gains and losses recorded on sales of fixed assets, general advertising and marketing expenses and certain other nonrecurring charges. Other expenses, net for the nine-month period ended September 30, 2003 increased to U.S.\$ 756 million, as compared to an expense of U.S.\$ 236 million for the nine-month period ended September 30, 2002. The most significant charges for the nine-month period ended September 30, 2003 were:

- a U.S.\$ 205 million provision for losses related to our investments in certain thermoelectric power plants due to our contractual obligations with certain power plants to cover losses when demand for power and electricity prices are low;
- a U.S.\$ 114 million expense for a lower of cost or market adjustment with respect to turbines, we originally expected to use in connection with our thermoelectric projects, but which we no longer intend to use for such projects;
- a U.S.\$153 million expense for unscheduled stoppages of plant and equipment; and
- a U.S.\$ 75 million expense for general advertising and marketing expenses unrelated to direct revenues.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

The most significant nonrecurring charges for the nine-month period ended September 30, 2002 were:

- a U.S.\$ 151 million loss for contractual contingencies relating to thermoelectric plants; and
- a U.S.\$ 72 million expense for general advertising and marketing expenses unrelated to direct revenues.

Income tax (expense) benefit

Income before income taxes, minority interest and accounting changes increased from U.S.\$ 3,214 million for the nine-month period ended September 30, 2002, to U.S.\$ 7,220 million for the nine-month period ended September 30, 2003. As a result, we recorded an income tax expense of U.S.\$ 2,014 million for the nine-month period ended September 30, 2003, a 49.2% increase from an expense of U.S.\$ 1,350 million for the nine-month period ended September 30, 2002. The increase in income tax expense was not proportional to the increase in income before taxes because of the benefits generated from the interest on stockholders' equity in the amount of U.S.\$ 357 million and the effect of the change in valuation allowance for the nine-month period ended September 30, 2003, which was approximately U.S.\$ 510 million higher than in the same period in 2002.

The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is discussed in Note 5 to our unaudited consolidated financial statements as of September 30, 2003.

Cumulative effect of change in accounting principle

In the first quarter of 2003, we generated a gain of U.S.\$ 697 million (net of U.S.\$ 359 million of taxes) resulting from the adoption of SFAS No. 143 Accounting for Asset Retirement Obligations. The adjustment was due to the difference in the method of accruing site restoration costs under SFAS 143, as compared with the method required by SFAS 19 Financial Accounting and Reporting by Oil and Gas Producing Companies. Under SFAS 19, we had accrued upstream site restoration costs ratably over the productive lives of the assets. Under SFAS 143, we record the fair value of asset retirement obligations as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. The income adjustment described above resulted from reversing the higher liability accumulated under SFAS 19 in order to adjust it to a lower present value amount resulting from transition to SFAS 143. Please see Note 3 to our unaudited consolidated financial statements as of September 30, 2003.

THE PETROLEUM AND ALCOHOL ACCOUNT

The Petroleum and Alcohol Account - Receivable from the Federal Government has been used to accumulate the impact on us of the federal government's regulatory policies for the Brazilian oil and gas industry.

According to legislation applicable to the Petroleum and Alcohol Account until December 31, 2001, we had the right to offset amounts owed to the federal government relating to the regulatory policies of the Brazilian oil and gas industry against the receivable that increased and decreased the Petroleum and Alcohol Account.

On June 30, 1998, the federal government issued National Treasury Bonds - Series H in our name, which were placed with a federal depository to support the balance of this account. On June 27, 2003, the National Treasury Department Secretary issued Administrative Instruction 348, authorizing the cancellation of 138,791 NTN-H, expired on June 30, 2003 and held in guarantee of payment of an eventual negative balance in the Petroleum and Alcohol Account and the issue of new 138,791 NTN-H, with the same terms but expiring on June 30, 2004. The value of the outstanding bonds at September 30, 2003 was U.S.\$ 58 million.

The federal government certified the balance of the Petroleum and Alcohol Account as of June 30, 1998. The changes in the Petroleum and Alcohol Account in the period from July 1, 1998 to December 20, 2002 are subject to audits by the National Petroleum Agency - ANP, and the results of the audit will be the basis for the settlement of the account with the federal government. The settlement of accounts with the federal government should have been completed by December 31, 2002, according to the provisions of Law No. 10453 of May 13, 2002, amended by Decree No. 4491 of November 29, 2002. On June 26, 2003, Provisional Measure 123, Article 11, which was converted into Law n° 10742 of October 6, 2003, extended the term of settlement of accounts involving reciprocal debts and credits between us and the federal government to June 30, 2004, and in so doing, automatically extended the term for certification of the outstanding balance in the Petroleum and Alcohol Account.

As a result of the deregulation of the Brazilian oil and gas market and applicable legislation, effective January 2, 2002, the Petroleum and Alcohol Account is no longer used to reimburse expenses related to the supply of oil products and alcohol to us and third parties.

The balance of the Petroleum and Alcohol Account at September 30, 2003 represents a credit to us against the federal government in the amount of U.S.\$ 234 million, an increase of 28.6% or U.S.\$ 52 million when compared with the U.S.\$182 million balance at December 31, 2002.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

The following summarizes the changes in the Petroleum and Alcohol Account for the nine-month period ended September 30, 2003:

TAX ASSESSMENT INTERNAL REVENUE SERVICE OF RIO DE JANEIRO

The Internal Revenue Service of Rio de Janeiro based on Law No. 9,537/97, Article 2, considers that drilling and production platforms cannot be classified as sea-going vessels and therefore should not be chartered but leased. Based on this interpretation, overseas remittances for servicing chartering agreements would be subject to withholding tax at the rate of 15% or 25%.

The Internal Revenue Service filed two tax assessments against us in connection with the withholding tax on foreign remittances (IRRF) of payments related to the charter of vessels of movable platform types for the years 1998 and 1999 through 2002.

On February 17, 2003, the Internal Revenue Service served us with a tax assessment notice amounting to R\$ 93 million (U.S.\$ 32 million) and covering disputed taxes for 1998. On March 20, 2003, we filed an appeal, but received an unfavorable ruling from the Internal Revenue Service. We recently filed an appeal to this decision with the highest-level administrative court competent to adjudicate the matter.

On June 27, 2003, the Internal Revenue Service served us with another tax assessment notice amounting to R\$ 3,064 million (U.S. \$ 1,066 million) and covering the period from 1999 to 2002.

We disagree with the Internal Revenue Service's interpretation as to charter contracts, given that the Federal Supreme Court has already ruled that with respect to the IPI (Federal VAT) tax, offshore platforms are to be classified as sea-going vessels. Additionally, the 1994 and 1999 Income Tax Regulations support the non-taxation (RIR/1994) and the zero tax rate (RIR/1999) for the remittances in question.

On July 28, 2003, we appealed the June 27th tax assessment, and have yet to receive a response from the Internal Revenue Service.

ACQUISITION OF AN INTEREST IN PETROBRAS ENERGIA PARTICIPACIONES S.A. PEPSA (FORMERLY KNOWN AS PEREZ COMPANC S.A.) AND PETROLERA ENTRE LOMAS S.A. PELSA (FORMERLY KNOWN AS PETROLERA PEREZ COMPANC S.A.)

On October 17, 2002, we signed the Final Share Acquisition Agreement with the Perez Companc family and the Fundación Perez Companc, completing the acquisition of a controlling interest of Perez Companc S.A. (currently known as Petrobras Energia Participaciones S.A PEPSA), and Petrolera Perez Companc S.A. (currently known as Petrolera Entre Lomas S.A - PELSA). In October 2002, in accordance with Argentine legislation, the necessary documentation was submitted to the national antitrust agency (CNDC - Comisión Nacional de Defensa de la Competencia) in order to obtain approval for the transaction.

On May 13, 2003, the Argentine Antitrust Committee (Comisión Nacional de Defensa de la Competencia), an agency reporting to the Argentine Secretariat of Competition, Deregulation and Consumer Protection (Secretaría de la Competencia, la Deregulación y la Defensa del Consumidor), approved the purchase of 58.62% of the capital stock of PEPSA and 39.67% of the capital stock of PELSA capital stock by PETROBRAS Participações S.L., a company controlled by PETROBRAS. As a result of the purchase of a 39.67% interest in the capital stock of PELSA, in conjunction with the acquisition of 58.62% of PEPSA's interest in the capital stock of PELSA, we have a controlling interest in PELSA equal to 50.73% and thus have consolidated the entity.

The acquisition was consummated principally to expand our operations into geographical markets where we had little activity. Through the acquisition of PEPSA and PELSA, we were able to gain immediate access to the Argentine market and capitalize on favorable brand recognition. The goodwill of U.S.\$183 million generated by the transaction is attributed principally to downstream activities.

The purchase price paid for PEPSA and PELSA was based on an economic valuation model of expected future earnings of those companies, which considered relevant factors including the potential effects of the economic situation of Argentina. We paid U.S.\$ 689 million in cash and U.S.\$ 338 million in bonds to the Perez-Companc family for our interest in PEPSA and PELSA.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

The acquisitions of PEPSA and PELSAs were recorded using the purchase method of accounting and the balance sheets of PEPSA and PELSAs were included in our consolidated financial statements, beginning on May 13, 2003. The statements of income of PEPSA and PELSAs were included in our consolidated financial statements beginning on June 1, 2003. The purchase price for the PEPSA and PELSAs acquisitions was allocated based on the fair market value of the assets acquired and the liabilities assumed as of the acquisition date as determined by independent appraisers.

The fair value of the net assets of PEPSA and PELSAs was based on undiscounted future cash flow models of PEPSA and PELSAs.

PEPSA operates principally in the areas of oil field exploration and production, refining, transport and commercialization, electricity generation, transmission and distribution, and petrochemicals. Its activities are primarily conducted in Argentina, Bolivia, Brazil, Ecuador, Peru and Venezuela. PELSAs operates primarily in the oil and gas exploration and production industry in Argentina.

The following unaudited pro forma summary financial information presents the consolidated results of operations as if the acquisition of PEPSA and PELSAs had occurred at the beginning of the periods presented:

(i) Consolidated Income Statements data for the nine-month period ended September 30,

Net income

(1) As of September 30, 2003, the international business segment includes the Argentine operations of Petrolera Santa Fe (acquired in October 2002), PEPESA and PELSA (both acquired in May, 2003).

Segment Information

The comparison between our results of operations for the nine-month period ended September 30, 2003 and the nine-month period ended September 30, 2002, has been significantly affected by the 17.3% rise in the average Real/U.S. dollar exchange rate in the nine-month period ended September 30, 2003 as compared to the average Real/U.S. dollar exchange rate in the nine-month period ended September 30, 2002.

Exploration and Production

Consolidated net income for our exploration and production segment increased 54.7% to U.S.\$ 4,715 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 3,048 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to:

- a U.S.\$ 2,280 million increase in net operating revenues as a result of the increase in the price of crude oil in the international markets and a 2.2% increase in production of crude oil, NGL and natural gas; and
- the cumulative effect of a change in accounting principles related to future liabilities for site restoration costs, which led to an increase in our net income of U.S.\$ 697 million, net of taxes.

These effects were partially offset by a U.S.\$ 995 million increase in cost of sales, primarily composed of:

- an increase of approximately U.S.\$ 77 million in costs related to crude oil, natural gas and NGL volumes sold or transferred to other business segments; and
- an increase of approximately U.S.\$ 790 million in taxes and charges imposed by the Brazilian government.

Supply

Consolidated net income for our supply segment increased to U.S.\$ 1,343 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 542 million for the nine-month period ended September 30, 2002.

This increase was primarily attributable to an increase of U.S.\$ 4,701 million in net operating revenues. This increase in net operating revenues was primarily due to our ability to increase prices of certain oil products in the Brazilian market to achieve greater parity with the increased prices of such oil products in the international markets.

This increase was partially offset by the increase of U.S.\$ 3,604 million in cost of sales, mainly due to the increase in import prices of crude oil and oil products and increases in prices of products transferred from other segments, notwithstanding the fact that the volume of sales in the Brazilian market decreased 3.9% as a result of a decrease in Brazilian consumer demand.

Gas and Energy

Our Gas and Energy segment registered a net loss of U.S.\$ 214 million for the nine-month period ended September 30, 2003, as compared to a net loss of U.S.\$ 213 million for the nine-month period ended September 30, 2002. This increase in net loss was primarily attributable to:

- a U.S.\$ 583 million increase in minority interest, mainly related to the effects of the 17.3% appreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2003, as compared to a 67.9% depreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2002, on the net loss of Transportadora Brasileira Gasoduto Bolívia-Brasil S.A. TBG;
- a U.S.\$ 302 million increase in cost of sales primarily due to a 16.2% increase in the volume of natural gas sold;
- a U.S.\$ 205 million provision for non-reimbursable contractual contingency payments, related to our investments in thermoelectric power plants; and
- a U.S.\$ 114 million expense for a lower of cost or market adjustment in thermoelectric equipment.

This increase in net loss was partially offset by:

- a U.S.\$ 371 million increase in net operating revenues primarily due to the increase of natural gas prices and the 16.2% increase in the volume of natural gas sold; and

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

- a U.S.\$ 360 million decrease in financial expenses net, primarily attributable to the effect of the 17.3% appreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2003, as compared to a 67.9% depreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2002.

Distribution

Consolidated net income for our distribution segment increased 55.4% to U.S.\$ 87 million for the nine-month period ended September 30, 2003, as compared to U.S.\$ 56 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to a U.S.\$ 1,007 million increase in net operating revenues as a result of the increase of oil products sales prices to refineries (we increased these sales prices in order to maintain our gross margin), notwithstanding the 6.4% decrease of volume of oil products sold in the nine-month period ended September 30, 2003, as compared to the volume sold in the nine-month period ended September 30, 2002 and the decrease in our market share in the Brazilian oil products market from 32.6% in the nine-month period ended September 30, 2002, to 31.3% in the nine-month period ended September 30, 2003.

This increase in consolidated net income was partially offset by the increase of U.S.\$ 976 million in cost of sales, reflecting the increase of oil products prices to refineries.

International

Consolidated net income for our international segment increased to U.S.\$ 162 million for the nine-month period ended September 30, 2003, as compared to a net loss of U.S.\$ 7 million for the nine-month period ended September 30, 2002. This increase was primarily attributable to:

- a U.S.\$ 820 million increase in net operating revenues resulting from the increase of oil products prices in the international markets and an increase in the volume of sales conducted by PEPSA and PELSA; and
- a U.S.\$ 57 million increase in the results of non-consolidated companies, primarily due to the results of our equity investments in Compañía Mega that generated a gain of U.S.\$ 46 million during the nine-month period ended September 30, 2003, as compared to a loss of U.S.\$ 25 million during the nine-month period ended September 30, 2002.

This increase was partially offset by a U.S.\$ 377 million increase in cost of sales, a U.S.\$ 103 million increase in depreciation, depletion and amortization, a U.S.\$ 72 million increase in selling, general and administrative expenses and a U.S.\$ 89 million increase in debt expense net, which were mainly attributable to the increased operations of our Argentine subsidiaries.

Corporate

Consolidated loss for the units that make up our corporate segment decreased 75.1% to a net loss of U.S.\$ 228 million during the nine-month period ended September 30, 2003, as compared to a net loss of U.S.\$ 917 million during the nine-month period ended September 30, 2002. This decrease was primarily attributable to the reduction of U.S.\$ 746 million in debt expenses net, primarily attributable to the effect of the 17.3% appreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2003, as compared to a 67.9% depreciation of the Real against the U.S. dollar during the nine-month period ended September 30, 2002.

Liquidity and Capital Resources

Capital expenditures

In the nine-month period ended September 30, 2003, we continued to prioritize capital expenditures for the development of crude oil and natural gas production projects. Total consolidated capital expenditures increased 15.1% from U.S.\$3,574 million in the first nine months of 2002 to U.S.\$4,114 million in the first nine months of 2003, primarily due to increased expenditures on our exploration and production activities and improvements in our refinery facilities. Of the capital expenditures incurred during the first nine months of 2003, U.S.\$2,293 million (55.7%) were directed to domestic exploration and production activities, which includes our exploration and production segment and our project financings.

The following table sets forth our consolidated capital expenditures (including project financings and investment in thermoelectric power plants) for each of our business segments for the first nine months of 2003 and 2002:

Activities

	U.S. \$ millions	
	Nine-month period ended	
	September 30,	
	2003	2002
Exploration and Production	2,293	2,239
Supply	1,060	667
Distribution	79	129
Gas and Energy	254	281
International	313	162
Corporate	115	96
Total capital expenditures	4,114	3,574

Our capital expenditures during the first nine months of 2003 were primarily directed towards increasing our production capabilities in the Campos Basin, modernizing our refineries, expanding our pipeline transportation and distribution systems and, to a lesser extent, investing in energy and gas related activities, such as investments in natural and thermoelectric power plants.

Financing

We fund our investments and working capital with internally generated funds, short-term debt, long-term debt, project financings, and sale and lease back agreements. In our opinion, our working capital is sufficient for our present requirements.

Financing Strategy

The objective of our financing strategy is to help us achieve the targets set forth in our Strategic Plan. We aim to increase the average life of our debt portfolio and reduce our cost of capital through a variety of medium and long-term financing arrangements, including supplier financing, project financing, bank financing, securitizations and the issuances of debt and equity securities.

Our Indebtedness

Government Regulation

The Ministry of Planning, Budget and Management controls the total amount of medium and long-term debt that we are allowed to incur through the annual budget approval process (*Plano de Dispêndio Global*, or PDG). Before issuing medium and long-term debt, Petrobras and its Brazilian subsidiaries must also obtain the approval of the National Treasury shortly before issuance.

In accordance with Senate Resolution N° 96/89 the level of our borrowings is subject to an annual maximum amount, exclusive of certain permitted commercial obligations, based on stockholders' equity, debt service expense and other factors as of the prior year and subject to certain ongoing quarterly adjustments. For 2003, the maximum level was initially set at U.S.\$932 million. The maximum level was set at U.S.\$824 million for 2002, U.S.\$1,211 million for 2001 and U.S.\$1,072 million for 2000.

All of the foreign currency denominated debt of Petrobras and its Brazilian subsidiaries requires registration with the Central Bank. The issuance of debt by our international subsidiaries, however, is not subject to registration with the Central Bank or approval by the National Treasury. In addition, all issuances of medium and long-term notes and debentures require the approval of our board of directors. Borrowings that exceed the approved budget amount for any year also require approval from the Brazilian Senate.

Our total debt (including short-term debt, long-term debt, capital lease obligations and project financings) increased 33.9% to U.S.\$19,659 million during the first nine months of 2003, as compared to U.S.\$14,680 million at December 31, 2002. During the first nine months of 2003, our short-term debt (including current portions of long-term debt obligations, capital lease obligations and current portions of project financings) increased 65.4% to U.S.\$3,284 million as compared to U.S.\$1,986 million at December 31, 2002.

Our net debt totaled U.S.\$12,237 million at September 30, 2003, a 9.0% increase from net debt of U.S.\$11,229 million at December 31, 2002, primarily due to the inclusion of PEPSA's and PELSA's net debt of U.S.\$1,801 million in our net debt totals and our issuance of

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

U.S.\$1,900 million in long-term debt in the international capital markets during the nine-month period ended September 30, 2003. These increases were partially offset by the increase in cash and cash equivalent as a result of the increase in net cash provided by operating activities.

Short-Term Debt

Our outstanding short-term debt serves mainly to support our imports of crude oil and oil products, and is provided almost completely by international banks and under our commercial paper program. During the first nine months of 2003, our short-term debt (excluding current portions of long-term obligations) increased to U.S.\$1,566 million as compared to U.S.\$671 million at December 31, 2002. This increase was due to the inclusion of PEPSA's short term debt in our consolidated balance sheets and our increased use of short-term credit facilities. Our short-term debt is denominated principally in U.S. dollars.

Long-Term Debt

Our total outstanding consolidated long-term debt consists primarily of the issuance of securities in the international capital markets and debentures in the domestic capital markets and amounts outstanding under facilities guaranteed by export credit agencies and multilateral agencies, as well as financing from the *Banco Nacional de Desenvolvimento Econômico e Social* (the National Bank for Economic and Social Development, or BNDES) and other financial institutions. Outstanding long-term debt, plus the current portion of our long-term debt, totaled U.S.\$ 11,593 million at the end of the nine-month period ended September 30, 2003, as compared to U.S.\$ 7,714 million at December 31, 2002. Included in these figures at September 30, 2003 are the following international debt issues:

Notes	Principal Amount
4.10% Notes due 2003(1)	¥165,300 million
9.00% Notes due 2004(2)	EUR 91 million
10.00% Notes due 2006	U.S.\$250 million
6.625% Step Down Notes due 2007(2)	EUR 134 million
9.125% Notes due 2007(3)	U.S.\$500 million
9.875% Notes due 2008(3)	U.S.\$450 million
6.750% Senior Trust Certificates due 2010(4)	U.S.\$95 million
Floating Rate Senior Trust Certificates due 2010(4)	U.S.\$55 million
9.750% Notes due 2011(3)	U.S.\$600 million
6.600% Senior Trust Certificates due 2011(4)	U.S.\$300 million
Floating Rate Senior Trust Certificates due 2013(4)	U.S.\$300 million
4.750% Senior Exchangeable Notes due 2007(5)	U.S.\$338 million
Global Step-up Notes due 2008(6)	U.S.\$400 million
9.125% Global Notes due 2013(7)	U.S.\$750 million
3.748% Senior Trust Certificates due 2013 (4)	U.S.\$ 200 million
6.436% Senior Trust Certificates due 2015 (4)	U.S.\$ 550 million

(1) Japanese yen; U.S.\$1.00 = ¥ 114.43 at September 30, 2003.

(2) Euro; U.S.\$1.00 = EUR 1.1656 at September 30, 2003.

(3) Issued by PIFCo to finance oil trading activities, with support from us through a standby purchase agreement and with insurance against 18 months of inconvertibility and transfer risk for interest payments.

(4) Issued in connection with our exports prepayment program.

(5) Issued by PIFCo on October 17, 2002 in connection with our acquisition of PEPSA.

(6) The Global Step-up Notes bear interest from March 31, 2003 at a rate of 9.00 % per year until April 1, 2006 and at rate of 12.375% per year thereafter, with interest payable semi-annually, and were issued by PIFCo to finance oil trading activities , with support from us through a standby purchase agreement.

(7) Issued by PIFCo to finance oil trading activities, with support from us through a standby purchase agreement.

On March 31, 2003, we issued U.S.\$400 million of 9.00% Global Step-Up Notes due 2008. These notes bear interest from March 31, 2003 at the rate of 9.00% per year until April 1, 2006 and at a rate of 12.375% thereafter. This transaction represented our first issuance under our U.S.\$8 billion universal shelf registration statement filed with the SEC in July 2002. On May 21, 2003, Petrobras Finance Ltd., a subsidiary of PIFCo, received U.S.\$550 million in 6.436% Senior Trust Certificates due 2015, and U.S.\$200 million in 3.748% Senior Trust Certificates due 2013 in connection with our exports prepayment program. On July 2, 2003, PIFCo issued Global Notes in an aggregate principal amount of U.S.\$500 million due July 2013. The notes will bear interest at the rate of 9.125% per annum, payable semiannually. On September 18, 2003, PIFCo issued an additional U.S.\$250 million in Global Notes, which form a single fungible series with its U.S.\$500 million Global Notes due

July 2013.

In addition to issuing foreign currency denominated debt in the international capital markets, we have historically issued Real denominated debentures in the local capital markets. These debentures are floating-rate obligations, and the coupon is based on an index plus a fixed spread. We did not issue any Real denominated debentures in 2003. In the year ending December 31, 2002, we issued R\$1,525 million (U.S.\$432 million) in Real-denominated debentures.

Risk Management Activities

Commodity Price Risk

We are exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. Our commodity risk management activities primarily consist of futures contracts traded on stock exchanges and options and swaps entered into with major financial institutions. The futures contracts provide economic hedges to anticipated crude oil purchases and sales, generally forecast to occur within a 30 to 360 day period, and reduce our exposure to volatile commodity prices.

Our exposure on these contracts is limited to the difference between contract value and market value on the volumes hedged. Crude future contracts are marked to market and related gains and losses are recognized currently into earnings, irrespective of when physical crude sales occur. During the nine-month period ended September 30, 2003, we carried out economic hedging activities on 51.2% of our total traded volume (imports and exports), as compared to 39.6% in the same period of 2002. The open positions on the futures market, compared to spot market value, resulted in a loss of U.S.\$ 0.6 million during the nine-month period ended September 30, 2003 and a gain of U.S.\$ 8 million during the nine-month period ended September 30, 2002.

Exchange Rate Risk

The exchange rate risk to which we are exposed is limited to the balance sheet and derives principally from the incidence of non-Real denominated obligations in our debt portfolio. In the event of a devaluation of the Real against the foreign currency in which our debt is denominated, we will incur a monetary loss with respect to such debt. Because our oil product prices are based on international prices, however, a considerable part of our operating revenue is linked to the U.S. dollar, while certain of our operating expenses are denominated in Reais.

Interest Rate Risk Management

Our interest rate risk is a function of our long-term debt and, to a lesser extent, short-term debt. Our foreign currency floating rate debt is principally subject to fluctuations in LIBOR and our floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP), as fixed by the Brazilian Central Bank. We currently do not utilize derivative financial instruments to manage our exposure to fluctuations in interest rates. However, we have been studying various forms of derivatives to reduce exposure to interest rate fluctuations and may use these financial instruments in the future.

Risk Management Activity at PEPSA

PEPSA also uses derivative instruments such as options, swaps and others, mainly to mitigate the impact of changes in crude oil prices, interest rates and future exchange rates. Such derivative instruments are designed to mitigate specific exposures, and are assessed periodically to assure high correlation of the derivative instrument to the risk exposure identified and to assure the derivative is highly effective in offsetting changes in cash flows inherent in the covered risk. PEPSA qualifies for hedge accounting treatment for its crude oil derivative instruments and its interest rate swap derivative instruments.

Project Finance and Off-Balance Sheet Arrangements

Project Finance

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

Since 1997, we have utilized project financings to provide capital for our large exploration and production and related projects. Our arrangements with respect to these projects are accounted for as capital leases and are on-balance sheet, as a component of property, plant and equipment, and the related debt obligations are accounted for under the line item "Project Financings". Under the contractual arrangements, we are responsible for completing the development of the oil and gas fields, operating the fields, paying all operating expenses relating to the projects and remitting a portion of the net proceeds generated from the fields to fund the special purpose companies' debt and return on equity payments. At the end of each financing project, we have the option to purchase the leased or transferred assets from the special purpose company.

Many of our capital expenditures during the first nine months of 2003 were made in connection with exploration and development projects in the Campos Basin, a number of which are being financed through project financings. Below are our material project finance expenditures by project for the nine-month period ended September 30, 2003, compared to the nine-month period ended September 30, 2002:

<u>For the Nine-Month Period Ended September 30,</u>		
	<u>2003</u>	<u>2002</u>
Field	Capital Expenditures	Capital Expenditures
	(in millions of U.S. dollars)	
Albacora	\$ -	\$ 33
Cabiúnas	\$ 19	\$ 16
Espadarte/Voador/Marimba	\$ 16	\$ 76
Marlim	\$ 73	\$ 58
Others	\$ 24	\$ 8
<hr/>		
Total	\$132	\$191
<hr/>		

Off Balance Sheet Arrangements

As noted above, all of our project financings are on-balance sheet. As of September 30, 2003, we had no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Our Cash Flow

Net cash provided by operating activities was U.S.\$ 6,241 million in the first nine months of 2003, as compared to U.S.\$3,645 million in the first nine months of 2002. This increase was due primarily to a 35.8% increase in net operating revenue.

Net cash provided by financing activities amounted to U.S.\$ 921 million for the first nine months of 2003, as compared to U.S.\$ 1.335 million in net cash used in the same period of 2002. This increase was due primarily to net issuances of short and long-term debt, which was partially offset by an increase in our repayments of short and long-term debt.

SUBSEQUENT EVENTS

Award of Contract for Exploration and Development Services in Mexico

As part of our strategy to expand our international operations, we bid for, and were awarded, a contract for the provision of exploration and development services in the Cuervito block in the Burgos Basin, in northeastern Mexico.

We will provide such services as part of a consortium. We are the operator under the consortium agreement and own a 45% interest, Japan's Teikoku, owns a 40% interest, and Mexico's Diavaz, owns a 15% interest.

The contract is one of the Multiple Services Contracts which are being offered by Pemex Exploración y Producción through an international call for tender for development and production of natural gas reserves. It is expected that U.S.\$ 260 million will be invested in 15 years in connection with these contracts.

The Cuervito block, located in the central part of the Burgos Basin, southwest of Reynosa city, has an area of 231 km. Six fields have already been discovered, with the greatest production coming from the Cuervito and Pamorana fields.

Issuance of Notes by Petrobras Energia S.A. (PESA)

On October 31, 2003, PESA, a wholly owned subsidiary of PEPSA, issued US\$100 million in Notes Series R maturing in 10 years, with interest payable semiannually and a 9.5% annual yield.

The issue is part of a financing program designed to improve PESA's financial profile through the refinancing of short-term debt and marked the successful return of PESA to the international capital markets.

Increase in the interest in TERMORIO S.A.

On October 30, 2003, our Board of Directors approved the acquisition of the 7% interest held by PRS Engenharia Ltda in Termorio S.A., for the amount of U.S.\$ 0.46 million, thereby increasing to 50% our interest in the capital of Termorio S.A. .

This press release contains statements that constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements are necessarily dependent on assumptions, data or methods that may be incorrect or imprecise and that may be incapable of being realized. Prospective investors are cautioned that any such forward looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those in the forward-looking statements as a result of various factors. The Company does not undertake, and specifically disclaims, any obligation to update any forward-looking statements, which speak only as of the date made.

INDEPENDENT ACCOUNTANTS REVIEW REPORT

To the Board of Directors and Stockholders of
Petróleo Brasileiro S.A. - PETROBRAS:

1. We have reviewed the accompanying unaudited consolidated balance sheet of **Petróleo Brasileiro S.A. - PETROBRAS** and its subsidiaries at September 30, 2003 and the related unaudited consolidated statements of income, cash flows and changes in stockholders' equity for the nine-month period then ended. These financial statements are the responsibility of the Company's management. The unaudited consolidated balance sheet of **Petróleo Brasileiro S.A. - PETROBRAS** and its subsidiaries at September 30, 2002 (not presented herein) and the related unaudited consolidated statements of income, cash flows and changes in stockholders' equity for the nine-month period then ended were reviewed by other independent accountants whose report (dated November 7, 2002) stated that they were not aware of any material modifications that should be made to those statements for them to be in conformity with accounting principles generally accepted in the United States of America.

2. We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, which will be performed for the full year with the objective of expressing an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

3. Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements as of September 30, 2003 and for the nine-month period then ended, for them to be in conformity with accounting principles generally accepted in the United States of America.

4. The consolidated balance sheet of **Petróleo Brasileiro S.A. - PETROBRAS** and its subsidiaries as of December 31, 2002, and the related consolidated statements of income, cash flows and changes in stockholders' equity for the year then ended (not presented herein), were previously audited by other auditors in accordance with auditing standards generally accepted in the United States of America and in their report dated February 13, 2003, they expressed an unqualified opinion on those consolidated financial statements.

5. As from January 1, 2003 the Company adopted SFAS No. 143 - Accounting for Asset Retirement Obligations, see Note 3.

PETRÓLEO BRASILEIRO S.A. PETROBRAS AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL INFORMATION

Expressed in Millions of United States Dollars

(except when specifically indicated)

1. Basis of Financial Statement Preparation

The accompanying unaudited consolidated financial statements of Petróleo Brasileiro S.A. - PETROBRAS (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC). Although certain information normally included in annual financial statements prepared in accordance with U.S. GAAP has been condensed or omitted, management believes that the disclosures are adequate to make the information presented not misleading. These unaudited consolidated financial statements and the accompanying notes should be read in conjunction with the consolidated financial statements for the year ended December 31, 2002 and the notes thereto.

The consolidated financial statements as of September 30, 2003 and for the nine-month period ended September 30, of 2003 and 2002, included in this report, are unaudited. However, in management's opinion, such consolidated financial statements reflect all normal recurring adjustments that are necessary for a fair presentation. The results for the interim periods are not necessarily indicative of trends or of results to be expected for the full year ending December 31, 2003.

Pursuant to Rule 436 (c) under the Securities Act of 1933 (the Act), this is not a report and should not be considered a part of any registration statement prepared or certified within the meanings of Sections 7 and 11 of the Act and therefore, the independent accountant's liability under section 11 does not extend to the information included herein.

2. Recently Issued Accounting Pronouncements

The Financial Accounting Standards Board (FASB) has recently issued Interpretation No. 46 (FIN 46) - Consolidation of Variable Interest Entities in January 2003. The Emerging Issues Task Force (EITF) has recently issued (i) EITF 01-08 Determining Whether an Arrangement Contains a Lease, and (ii) EITF 02-6, Classification in the Statement of Cash Flows of Payments made to Settle and Asset Retirement Obligation within the Scope of FASB 143. Additionally, EITF 03-08 respective to certain retroactive insurance contracts and claims-made insurance policies is in discussion.

FIN 46 provides guidance on when certain entities should be consolidated or the interests in those entities disclosed by enterprises that do not control them through a majority voting interest. Under FIN 46, entities are required to be consolidated by an enterprise that has a controlling financial interest in such entities when equity investors of that enterprise have significant capital risk, the obligation to absorb the majority of expected losses, or the right to receive the majority of expected returns from such entities. Entities identified with these characteristics are called variable interest entities and the interest that enterprises have in these entities are called variable interests. These interests may derive from certain guarantees, leases, loans or other arrangements that result in risks and rewards to the enterprise with the controlling financing interest in such entities, irrespective of such enterprises' voting interest in such entities.

The interpretation requires that if a business enterprise has a controlling financial interest in a variable entity, the assets, liabilities and results of the activities of the variable interest entity must be included in the consolidated financial statements with those of the business enterprise. This interpretation applies immediately to variable interest entities created after January 31, 2003. For variable interest entities created before February 1, 2003, FIN 46 must be adopted in the first reporting period ending after December 15, 2003.

The Company will adopt FIN 46 in its December 31, 2003 annual financial statements. There is a reasonable possibility that certain project financing arrangements in which the Company has an interest, together with certain thermoelectric project contracts, may be variable interest entities. A significant portion of the Company's share of commitments and debt obligations, as well as fixed asset contributions, are already included in the consolidated financial statements as these transactions qualify as capital leases. Adoption of FIN 46 is not expected to have a significant impact on the Company's financial condition, results of operation and cash flows. See also discussion at Note 18, for maximum exposures related to thermoelectric plants, a number of which may be subject to consolidation under the rules of FIN 46.

EITF 01-08 Determining Whether an Arrangement Contains a Lease, is applicable to arrangements entered into or modified in the first reporting period (annual or interim) beginning after May 28, 2003. This EITF expands former guidance respective to determination of whether an arrangement contains a lease that is within the scope of FASB Statement No. 13, Accounting for Leases, and offers specific guidance related to transportation and other energy contracts that may qualify as leases. The guidance in Issue 01-8 is based on whether the arrangement conveys to the purchaser the right to use a specific asset and provides criteria for when the definition of right to use is met. Adoption of this EITF did not have a significant impact on the Company's accounting for its energy and transportation contracts.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

EITF 02-6, Classification in the Statement of Cash Flows of Payments made to Settle and Asset Retirement Obligation within the Scope of FASB 143, determined that a cash payment made to settle an asset retirement obligation should be classified in the statement of cash flows as an operating activity. Petrobras has adopted the presentation outlined in EITF 02-6, with immaterial changes to prior classification of such costs as investment activities.

EITF Issue 86-12, Accounting by Insureds for Claims-Made Insurance Policies, EITF Issue 03-3, Accounting for Claims-Made Insurance Policies by the Insured Entity, and EITF Abstracts Topic D-79, Accounting for Retroactive Insurance Contracts Purchased by Entities Other than Insurance Enterprises, address various aspects of the accounting for retroactive insurance contracts and claims-made insurance policies by the insured entity. EITF Issue 03-8 is in discussion and has the purpose to codify the guidance set forth in the aforementioned pronouncements. The Company is monitoring EITF Issue 03-08, but has not yet assessed the impact of such literature on its accounting for certain retroactive insurance contracts and claims-made insurance policies.

3. Accounting change

As of January 1, 2003, PETROBRAS adopted SFAS No. 143 - Accounting for Asset Retirement Obligations ("SFAS 143"). The primary impact of SFAS 143 is to change the method of accruing for upstream site restoration costs. These costs were previously accrued ratably over the productive lives of the assets in accordance with SFAS No. 19 - Financial Accounting and Reporting by Oil and Gas Producing Companies ("SFAS 19"). At the end of 2002, the cumulative amount accrued under SFAS 19 was U.S.\$ 1,166. This provision for abandonment was recognized as a component of accumulated depreciation, depletion and amortization as of December 31, 2002, with no separate provision for abandonment liability being disclosed on the face of the financial statements. Under SFAS 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

The cumulative adjustment for the change in accounting principle reported in the first quarter of 2003 was an after-tax income of U.S.\$ 697 (net of U.S.\$ 359 deferred income tax effects). The effect of this accounting change on the balance sheet, was a U.S.\$ 1,056 reduction to the abandonment provision, and a U.S.\$ 359 increase in deferred income tax liabilities. Additionally, the change in accounting principle resulted in a U.S.\$ 16 increase to property, plant and equipment at original asset acquisition date, with accumulated depreciation through January 1, 2003 of U.S.\$9 on proved developed properties. Further, on January 1, 2003, Petrobras established an abandonment liability with respect to proved undeveloped reserves in the amount of U.S.\$ 44.

This adjustment is due to the difference in the method of accruing site restoration costs under SFAS 143 compared with the method required by SFAS 19. Under SFAS 19, site restoration costs are accrued on a unit-of-production basis of accounting as the oil and gas are produced. The SFAS 19 method matches the accruals with the revenues generated from production and results in most of the costs being accrued in early field life, when production is at the highest level. Because SFAS 143 requires accretion of the liability as a result of the passage of time using an effective interest method of allocation, a significant portion of costs will be accrued towards the end of field life, when production is at the lowest level. The cumulative income adjustment described above results from reversing the higher liability accumulated under SFAS 19 in order to adjust it to the lower present value amount resulting from transition to SFAS 143. This amount being reversed in transition, which was previously charged to operating earnings under SFAS 19, will again be charged to earnings under SFAS 143 in future years.

4. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from the normal course of business. Such market risks principally involve the possibility that changes in interest rates, currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings. The Company maintains an overall risk management policy that is developed under the direction of the Company's executive officers.

The Company may use derivative and non-derivative instruments to implement its overall risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the adverse effect on the value of a financial instrument that results from a favorable change in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue financial instruments for trading purposes.

a) Foreign Currency Risk Management

The Company's foreign currency risk management strategy may involve the use of derivative instruments to protect against foreign exchange rate volatility, which may impair the value of certain of the Company's obligations. The Company currently uses zero cost foreign exchange collars to implement this strategy.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

During 2000, the Company entered into three zero cost foreign exchange collars to reduce its exposure to variations between the U.S. Dollar and the Japanese Yen, and between the U.S. Dollar and EURO relative to long-term debt denominated in foreign currencies with a notional amount of approximately U.S.\$ 470. The Company does not use hedge accounting for these derivative instruments. These collars establish a ceiling and a floor for the associated exchange rates. If the exchange rate falls below the defined floor, the counterparties will pay to the Company the difference between the actual rate and the floor rate on the notional amount. Conversely, if the exchange rate increases above the defined ceiling, the Company will pay to the counterparties the difference between the actual rate and the ceiling rate on the notional amount. The contracts expire upon the maturity date of each note.

As of December 31, 2002, the Company had a fair value obligation of U.S.\$ 80 associated with its EURO and Japanese Yen zero cost collar contracts. The Yen zero cost collar contracts were settled on September 8, 2003, with a cash payment of U.S.\$ 68. As of September 30, 2003 the Company had a fair value asset of U.S.\$ 10 associated with its Euro zero cost collar contracts.

b) Commodity Price Risk Management

The Company is exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. The Company's commodity risk management activities primarily consist of futures contracts traded on stock exchanges and options and swaps entered into with major financial institutions. The futures contracts provide economic hedges to anticipated crude oil purchases and sales, generally forecast to occur within a 30 to 360 day period, and reduce the Company's exposure to volatile commodity prices.

The Company's exposure on these contracts is limited to the difference between contract value and market value on the volumes hedged. Crude future contracts are marked to market and related gains and losses are recognized currently into earnings, irrespective of when physical crude sales occur. During the nine-month periods ended September 30, 2003 and 2002, the Company carried out economic hedging activities on 51.2% and 39.6%, respectively, of its total traded volume (imports and exports). The open positions on the futures market, compared to spot market value, resulted in a loss of U.S.\$ 0.6 and gain of U.S.\$ 8 during the nine-month period ended September 30, 2003 and 2002, respectively.

c) Interest Rate Risk Management

The Company's interest rate risk is a function of the Company's long-term debt and, to a lesser extent, short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the Company's floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP), as fixed by the Brazilian Central Bank. The Company currently does not utilize derivative financial instruments to manage its exposure to fluctuations in interest rates. However, the Company has been studying various forms of derivatives to reduce exposure to interest rate fluctuations and may use these financial instruments in the future.

d) Risk Management Activity at PEPSA

PEPSA also uses derivative instruments such as options, swaps and others, mainly to mitigate the impact of changes in crude oil prices, interest rates and future exchange rates. Such derivative instruments are designed to mitigate specific exposures, and are assessed periodically to assure high correlation of the derivative instrument to the risk exposure identified and to assure the derivative is highly effective in offsetting changes in cash flows inherent in the covered risk. PEPSA qualifies for hedge accounting treatment for its crude oil derivative instruments and its interest rate swap derivative instruments.

5. Income Taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal income tax. The statutorily enacted tax rates applicable for the nine-month periods ended September 30, 2003 and 2002, are 25% for federal income tax and 9% for social contribution, respectively, which represent an aggregate rate of 34%.

Substantially all of the Company's taxable income is generated in Brazil and is therefore subject to the Brazilian statutory tax rate. The following table reconciles the tax calculated based upon statutory tax rates to the income tax expense recorded in this consolidated financial information.

	Nine-month period ended September 30,	
	2003	2002
Income before income taxes and minority interest and accounting changes	7,220	3,214

7. Receivable from Federal Government**a) Background**

The Petroleum and Alcohol Account - Receivable from the Federal Government (the Petroleum and Alcohol Account) was used to accumulate the impact of the Federal Government's regulation policies for the Brazilian oil and gas industry on the Company. The Petroleum and Alcohol Account accrues financial income on its outstanding balance at the Referential Rate Index - TR, which was 3.95 % for the nine-month period ended September 30, 2003 and 1.91% for the nine-month period ended September 30, 2002.

As provided in the applicable regulations, the Petroleum and Alcohol Account is a legal, valid and binding receivable from the Federal Government and collectibility of the receivable is not subject to future operations. The applicable regulations also provide that the Company has the right to offset amounts owed to the Federal Government relating to the regulation policies of the Brazilian oil and gas industry against the receivable. These increases and decreases in the Petroleum and Alcohol Account have been recognized in accordance with applicable law when the underlying transaction occurred.

According to specific legislation, until December 31, 2001, the Specific Parcel Price-PPE was presented as an adjustment to sales of basic oil products (gasoline, diesel oil and LPG). The amount of PPE for any period increased or decreased the balance of the Petroleum and Alcohol Account.

After December 31, 2001 the expenses related to alcohol programs, approved by the Interministerial Council for Sugar and Alcohol are supported by a portion of the financial resources derived from collection of the CIDE, as stipulated in Law No. 10453 of May 13, 2002.

b) Deregulation of the Brazilian fuel market

In accordance with the Petroleum Law and subsequent legislation, the fuel market in Brazil was deregulated in its entirety as of January 1, 2002. Therefore, as of that date, the Petroleum and Alcohol account would no longer be used to reimburse expenses in connection with the Federal Government's regulation of the price of oil products and fuel alcohol. Accordingly, the Petroleum and Alcohol account will only include changes in amounts with triggering events having occurred before December 31, 2001, in accordance with Law No. 10453, of May 13, 2002, and ANP regulations.

c) Changes in the Petroleum and Alcohol Account

The following summarizes the changes in the Petroleum and Alcohol Account for the nine-month period ended September 30, 2003:

	Nine-month period ended September 30, 2003
Opening balance	182
Reimbursements to third parties: subsidies paid to fuel alcohol producers	5
Translation gain	47
Ending balance	234

d) Certification by the Federal Government

The Federal Government certified the balance of the Petroleum and Alcohol Account as of June 30, 1998.

The changes in the Petroleum and Alcohol Account in the period July 1, 1998 to December 20, 2002 are subject to audits by the ANP. The results of the audit will be the basis for the settlement of the account with the Federal Government.

The settlement of the account with the Federal Government should have been completed by December 31, 2002, according to the provisions of Law No. 10453 of May 13, 2002, amended by Decree No. 4491 of November 29, 2002. On June 26, 2003 Provisional Measure 123, article 11, which was converted to Law n° 10742 dated October 6, 2003, extended the term of settlement of accounts involving reciprocal debits and credits between Petrobras and the Federal Government to June 30, 2004, and in so doing, automatically extending the term for certification of the

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

outstanding balance in the Petroleum and Alcohol Account.

After completion of the audit, the amount of the notes used to guarantee the debit balance in existence on June 30, 2004, or of the securitized credits, will be adjusted to the new amount calculated, as established in Provisional Measure No. 2181-45 of August 24, 2001.

e) National Treasury Bonds Series H (NTN-H)

On June 30, 1998, the Company and the Federal Government reached an agreement whereby the Federal Government issued National Treasury Bonds - H (NTN-H) into a federal depository on behalf of the Company to support the balance of the Petroleum and Alcohol account. On June 27, 2003, the National Treasury Secretary issued Administrative Instruction 348, authorizing the cancellation of 138,791 NTN-H, which expired on June 30, 2003 and were held in guarantee of payment of an eventual negative balance in the Petroleum and Alcohol Account and the issue of new 138,791 NTN-H, with the same terms as the cancelled bonds but expiring on June 30, 2004. The value of the outstanding bonds at September 30, 2003 was U.S.\$ 58, at which time the balance of the Petroleum and Alcohol Account was U.S.\$ 234. The legal, valid, and binding nature of the account is not affected by any difference between the balance of the account and the value of the outstanding bonds.

The Brazilian Government, upon the Company's consent, can effect the cancellation of all or a portion of the bonds outstanding balance. The NTN-H will mature on June 30, 2004 and currently Petrobras has no other rights on those bonds; withdrawal or transfers are not allowed.

8. Investments in non-consolidated companies and other investments

The investment balance at September 30, 2003 has increased significantly from that of December 31, 2002, principally as the result of the acquisition of PEPSA, as discussed in Note 16, and the consolidation of PEPSA investments. The PEPSA consolidation included a number of non-consolidated companies, with principal balances being related to Distrilic Inversora S.A, Oleoduto de Crudos Pesados Ltd and Inversora Mata. S.A.

9. Property, plant and equipment

The property, plant and equipment account at September 30, 2003 and December 31, 2002, respectively, includes U.S.\$ 726 and U.S.\$ 289 of assets under construction that are intended to be sold to third parties. These assets include thermoelectric plants, natural gas pipelines and other oil and gas projects. The Company intends to sell or transfer all or a portion of these assets to investors under structured financing deals, either retaining an interest or leasing the assets back under capital leases. Additionally, the property, plant and equipment account at September 30, 2003 and December 31, 2002, respectively, includes U.S.\$ 929 and U.S.\$ 653 of assets under agreements with investors.

10. Financings

a) Short-term debt

The Company's short-term borrowings are principally sourced from commercial banks and include import and export financing denominated in United States dollars, as follows:

	September 30, 2003	December 31, 2002
Import - oil and equipment	1,089	286
Working capital	477	385
	1,566	671

b) Long-term debt

● Composition

	September 30, 2003	December 31, 2002

2005	929
2006	1,516
2007	1,555
2008	1,591
2009 and thereafter	4,526
	10,755

● **Composition of long-term debt by annual interest rate**

Interest rates on long-term debt were as follows:

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

	September 30, 2003	December 31, 2002
Foreign currency		
6% or less	4,112	3,080
Over 6% to 8%	2,070	1,220
Over 8% to 10%	4,107	2,287
Over 10% to 15%	1	1
	10,290	6,588
Local currency		
6% or less	655	235
Over 6% to 8%	-	390
Over 10% to 15%	648	501
	1,303	1,126
	11,593	7,714

On March 31, 2003, the Company issued Global Step-up Notes in an aggregate principal amount of U.S.\$ 400 due April 2008. The notes will bear interest from March 31, 2003 at a rate of 9.00% per annum until April 1, 2006 and at a rate of 12.375% per annum thereafter, with interest payable semiannually. The Company used the proceeds from this issuance principally to repay trade-related debt.

In May 2003, the PF Export Trust issued to the Company additional U.S.\$ 750 in Senior Trust Certificates and U.S.\$ 150 in Junior Trust Certificates. The Senior Trust Certificates consist of Series 2003-A of U.S.\$ 550 bearing annual interest of 6.436% and due June 2015 and Series 2003-B of U.S.\$ 200 bearing annual interest due of 3.748% due in June 2013. The Junior Trust Certificates were issued with complementary terms as the new Senior Trust Certificates as they form a 20% guarantee to the senior trust certificates and expire ratably. These two new issuances complement the initial structured finance export prepayment program commenced in December 2001.

On July 2, 2003, the Company issued Global Notes in an aggregate principal amount of U.S.\$ 500 due July 2013. The notes will bear interest at the rate of 9.125% per annum, payable semiannually. On September 18, 2003, the Company issued an additional U.S.\$ 250 in Global Notes, which form a single fungible series with the Company's U.S.\$ 500 Global Notes due July 2013. The Company used the proceeds from these issuances principally to repay trade-related debt and inter-company loans.

11. Project Financings

Since 1997, the Company has utilized project financing to provide capital for the continued development of the Company's exploration and production and related projects.

The Company's arrangements with respect to these projects are considered leasing transactions for accounting purposes. The Company's responsibility under these contracts is to complete the development of the oil and gas fields, operate the fields, pay for all operating expenses related to the projects and remit a portion of the net proceeds generated from the fields to fund the special purpose companies' debt and return on equity payments. At the conclusion of the term of each financing project, the Company will have the option to purchase the leased or transferred assets from the consolidated special purpose company. Because the Company had commenced development or construction activities on each of these projects prior to completing the financing arrangement, and because of the Company's continuing involvement in these projects, the Company continues to reflect the assets related to the projects as a component of property, plant and equipment and the related obligation as a component of project financing.

The following summarizes the liabilities and the name of the fields where the projects were in progress at September 30, 2003 and December 31, 2002:

	September 30, 2003	December 31, 2002
Barracuda/Caratinga	1,793	1,481

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

Cabiúnas	834	673
Marlim	791	635
Espadarte/Voador/Marimbá (EVM)	451	575
Nova Marlim	568	508
Albacora	93	123
Pargo, Carapeba, Garoupa and Cherne (PCGC)	37	44
PDET On shore	1	-
Nova Transportadora do Sudeste	24	-

Current portion of project financings	(563)	(239)
	<hr/>	<hr/>
	4,037	3,800
	<hr/>	<hr/>

At September 30, 2003, the long-term portion of project financings becomes due in the following years:

2004	272
2005	1,101
2006	808
2007	544
2008	544
2009 and thereafter	768
	<hr/>
	4,037
	<hr/>

As of September 30, 2003 the amounts of commitments assumed arising from structured projects that will be reflected in future financial statements are presented as follows:

Barracuda/Caratinga	723
Cabiúnas	194
Nova Transportadora do Sudeste	452
Nova Transportadora do Nordeste	576
	<hr/>
	1,945
	<hr/>

12. Capital Leases

The Company leases certain offshore platforms, vessels and thermoelectric plants, which are accounted for as capital leases. At September 30, 2003, these assets had a net book value of U.S.\$ 2,701 (U.S.\$ 2,499 at December 31, 2002).

The following is a schedule by year of the future minimum lease payments at September 30, 2003:

2003, for the period October 1 to December 31, 2003	87
2004	382
2005	353
2006	306
2007	290
2008	278
2009 and thereafter	625
	<hr/>
Estimated future lease payments	2,321

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

Less amount representing interest at 6.2% to 12.0% annual	(415)
Less amount representing executory costs	(6)
	1,900
Present value of minimum lease payments	1,900
	(317)
Less current portion	(317)
	1,583
Long-term portion	1,583

13. Pension Plan

The determination of the expense and liability relating to the Company's pension plan involves the use of actuarial assumptions. These include estimates of future mortality, withdrawal, changes in compensation and discount rate to reflect the time value of money as well as the rate of return on plan assets. These assumptions are reviewed at least annually and may differ materially from actual results due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates or longer or shorter life spans of participants.

The Company, and its actuarial consultants are currently reviewing the basis for estimating the assumed discount rate in light of the recent development of a secondary bond market in Brazil for high-grade long-term government securities. As insufficient evidence was available at December 31, 2002 to support a change, the Company chose not to change the discount rate assumptions. In the event the rate of return offered by these securities (nominal rate of 15.6% at December 31, 2002) is deemed to be consistent with the requirements of SFAS No. 87, and subsequent interpretations for measurement of defined benefit obligations, the Company may adopt different assumptions in the future, which may have a significant impact on the amount of pension liability and expense.

14. Stockholders' Equity

The Company's subscribed and fully paid-in capital at September 30, 2003 consisted of 634,168,418 common shares and 462,369,507 preferred shares and, at December 31, 2002, consisted of 634,168,418 common shares and 451,935,669 preferred shares.

On January 29, 2003, the Board of Directors of the Company, approved the issuance of 9,866,828 preferred shares of the Company in connection with the public offer by the Company to acquire publicly traded shares of Petrobras Distribuidora - BR, at an issue price of U.S.\$ 12.76 per share, under the terms of the capital increase approved during the meeting of the Board of Directors of the Company held on November 7, 2002.

The Extraordinary Shareholders' Meeting, held jointly with the Shareholders' General Meeting on March 27, 2003, approved an increase in the Company's capital by capitalizing revenue reserves accrued during previous years, to the amount of US\$ 912, without issuing new shares, in accordance with Art. 169, paragraph 1 of Law No. 6404/76.

On May 9, 2003, the Board of Directors of the Company approved the issue of 567,010 preferred shares of the Company in connection with the public offer by the Company to acquire publicly traded shares of Petrobras Distribuidora - BR, at an issue price of U.S.\$ 15.65 per share.

The dividends related to the fiscal year ended December 31, 2002, in the amount of U.S.\$ 510 (excluding the portion of interest on stockholders' equity which was made available to shareholders on January 13, 2003), was made available to shareholders on May 5, 2003.

On November 13, 2003, the PETROBRAS Board of Directors approved the distribution of remuneration to stockholders in the form of interest on capital amounting to R\$ 3,290 million (U.S.\$ 1,125), in accordance with article 8 and 9, of the Company's bylaws, article 9 of Law No. 9249/95 and Decrees 2673/98 and 3381/00. This provision for interest on capital resulted in an income tax benefit in the amount of U.S.\$ 357.

This remuneration will be made available to stockholders by February 13, 2004, based on the stockholdings on November 25, 2003, corresponding to R\$ 3.00 (U.S.\$ 1.03) per common and preferred share, and will be deducted from the dividend calculated on adjusted net income for the 2003 financial year.

15. Basic and Diluted Earnings per Share

Basic and diluted earnings per share amounts have been calculated as follows:

Nine-month period ended

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

	September 30,	
	2003	2002
Income before effect of change in accounting principle	4,968	2,238
	697	-
Cumulative effect of change in accounting principle, net of taxes		
Net income for the period	5,665	2,238
Less priority preferred share dividends	(228)	(70)
Less common shares dividends, up to the priority preferred shares dividends on a per-share basis	(313)	(97)
Remaining net income to be equally allocated to common and preferred shares	5,124	2,071
Weighted average number of shares outstanding		
Common/ADS	634,168,418	634,168,418
Preferred/ADS	462,369,507	451,935,669
Basic and diluted earnings per share		
Common and Preferred		
Before effect of change in accounting principle	4.53	2.06
After effect of change in accounting principle	5.17	2.06

16. Acquisition of an interest in Petrobras Energia Participaciones S.A. - PEPSA - (formerly known as Perez Companc S.A.) and Petrolera Entre Lomas S.A. - PELSAs (formerly known as Petrolera Perez Companc S.A.)

On October 17, 2002, the Company signed the Final Share Acquisition Agreement with the Perez Companc family and the Fundación Perez Companc, completing the acquisition of a controlling interest of Perez Companc S.A. (currently known as Petrobras Energia Participaciones S.A. - PEPSA), and Petrolera Perez Companc S.A. (currently known as Petrolera Entre Lomas S.A. - PELSAs). In October 2002, in accordance with Argentine legislation, the necessary documentation was submitted to the Argentine antitrust agency (CNDC - Comisión Nacional de Defensa de la Competencia) in order to obtain approval for the transaction.

On May 13, 2003, the Argentine Antitrust Committee (Comisión Nacional de Defensa de la Competencia), an agency reporting to the Argentine Secretariat of Competition, Deregulation and Consumer Protection (Secretaria de la Competencia, la Deregulación y la Defensa del Consumidor), approved the purchase of 58.62% of the capital stock of PEPSA and 39.67% of the capital stock of PELSAs capital stock by PETROBRAS Participações S.L., a company controlled by PETROBRAS. As a result of the purchase of a 39.67% interest in the capital stock of PELSAs, together with the purchase of 58.62% of PEPSA's interest in the capital stock of PELSAs, the Company has a controlling interest in PELSAs equal to 50.73% and thus has consolidated the entity.

The purchase price to be paid for PEPSA and PELSAs was based on an economic valuation model of expected future earnings of those companies, which considered relevant factors, including the potential effects of the economic situation of Argentina. The Company paid U.S.\$689 in cash and U.S.\$338 in bonds to the Perez Companc family for the shares of PEPSA and PELSAs.

The acquisition was consummated principally to expand PETROBRAS operations into geographical markets where the Company had little activity. Through the acquisition of PEPSA and PELSAs, PETROBRAS was able to gain immediate access to the Argentine market and brand recognition. The goodwill of U.S.\$183 generated by the transaction is attributed principally to downstream activities.

The acquisition of PEPSA and PELSAs were recorded using the purchase method of accounting and the financial statements of PEPSA and PELSAs were included in the consolidated PETROBRAS financial statements, beginning on May 13, 2003. The purchase price for PEPSA and PELSAs was allocated based on the fair market value of the assets acquired and the liabilities assumed as of the acquisition date as determined by independent appraisers.

PEPSA operates principally in the areas of oil field exploration and production, refining, transport and commercialization, electricity generation, transmission and distribution, and petrochemicals. Its activities are primarily based in Argentina, but PEPSA also operates in Bolivia, Brazil, Ecuador, Peru and Venezuela. PELSAs operates primarily in the oil and gas exploration and production industry in Argentina.

The following unaudited pro forma summary financial information presents the consolidated results of operations as if the acquisition of PEPSA and PELSAs had occurred at the beginning of the periods presented.

18. Commitments and Contingencies

PETROBRAS is subject to a number of commitments and contingencies arising in the normal course of its business. Additionally, the operations and earnings of the Company have been, and may be in the future, affected from time to time in varying degrees by political developments and laws and regulations, such as the Federal Government's continuing role as the controlling shareholder of the Company, the status of the Brazilian economy, forced divestiture of assets, tax increases and retroactive tax claims, and environmental regulations. The likelihood of such occurrences and their overall effect upon the Company are not predictable.

a) Litigation

The Company is a defendant in numerous legal actions arising in the normal course of its business. Based on the advice of its internal legal counsel and management's best judgment, the Company has recorded accruals in amounts sufficient to provide for losses that are considered probable and reasonably estimable. The following presents these accruals by the nature of the claim:

	September 30, 2003	December 31, 2002
Labor claims	18	13
Tax claims	16	13
Civil claims	54	24
	88	50
Contractual contingencies - thermoelectric plants	71	205
Contingencies for joint liability	191	113
Other contingencies	11	-
	361	368
Total	361	368
	(71)	-
Current Contingencies	(71)	-

As of September 30, 2003 and December 31, 2002, in accordance with Brazilian law, the Company had paid U.S.\$ 541 and U.S.\$ 290, respectively, into federal depositories to provide collateral for these and other claims until they are settled. These amounts are reflected in the balance sheet as restricted deposits for legal proceedings and guarantees.

The Company is a party to several contracts related to the acquisition and upgrade of production Platform P-36, which was lost in its entirety in 2001. Pursuant to those contracts, the Company had an obligation to pay the insurance proceeds to a Security Agent for distribution according to specified clauses established in the contracts. The Company contends that it is entitled to the insurance proceeds under the contractual arrangements, and other parties contend that they are also entitled to such proceeds. The issue is subject to international proceedings in a British court. Pending determination of the issue by the international court, the Company committed to deposit cash collateral in the amount of U.S.\$ 175, in order to facilitate the issuance of a guarantee by a Security Agent, for the payment of creditors. At September 30, 2003, this amount was included in the balance sheet as restricted deposits for legal proceedings and guarantees.

b) Commitments undertaken by the energy segment

The Company has commitments for the purchase of energy, supply of gas and reimbursement of operating expenses with thermoelectric plants in connection with the Brazilian Government's Thermoelectric Priority Energy Program, summarized as follows:

(i) Thermoelectric Power Plants of the Merchant type

The Company has a commitment to make contingent payments for the Macaé Merchant, Eletrobolt and Termoeará thermoelectric power plants, for the purpose of reimbursing operating expenses, taxes and the opportunity cost on capital invested if the revenues earned on the sales of energy from these plants are insufficient to cover such costs and expenses. On September 30, 2003, the maximum commitment was approximately U.S.\$ 1,539 for the period from 2003 to 2008.

(ii) Thermoelectric Power Plants with energy purchase commitments

In addition the Company has a commitment to supply natural gas for the production of energy at the Termorio, Termobahia, UEG Araucária, FAFEN Energia, Ibiritermo and Nova Piratininga thermoelectric power plants, and to purchase part or all the energy generated by these plants at a price that remunerates invested capital. As of September 30, 2003, the maximum commitment was approximately U.S.\$ 1,984 for the period from 2003 to 2025.

Employing a discount rate of 12% per annum, the net present value of the maximum financial exposure as of September 30, 2003 of the energy segment is approximately U.S.\$ 1,745

(iii) Contingent financial exposure

As a result of these commitments and based on available information and assumptions with regard to expected actual cash outflow exposures and status of in process contract negotiations to sell energy, the Company's Board of Directors approved the recognition of a provision for thermoelectric financial exposure contingencies amounting to U.S.\$ 205 for the fiscal year ended December 31, 2002.

On May 7, 2003, the Executive Board authorized an increase in the above-mentioned accounting provision in the first quarter of 2003, as a result of the fact that planned levels of the expected sales of energy available through the Power Purchase Agreements (PPA's) in 2003 together with expected levels of technical dispatch from the thermal plants were not realized. The balance of this provision as of September 30, 2003, after deducting the losses incurred in the nine-month period ended on September 30, 2003 was U.S.\$ 71 which was recorded as other current liabilities. It is management's opinion that this provision is sufficient for the 2003 financial year to cover possible losses from the Company's investments in thermoelectric power plants and related contingency payments. Management has not accrued a loss for financial exposures on thermoelectric contracts for periods subsequent to 2003, as market conditions are too uncertain to allow reasonable estimation of an accrual.

c) Tax Assessments - Internal Revenue Service of Rio de Janeiro

The Internal Revenue Service of Rio de Janeiro filed two Tax Assessments against the Company in connection with Withholding Tax (IRRF) on foreign remittances of payments related to charter of vessels of movable platform types for the years 1998 and 1999 through 2002.

The Internal Revenue Service, based on Law No. 9,537/97, Article 2, considers that drilling and production platforms cannot be classified as sea-going vessels and therefore should not be chartered but leased. Based on this interpretation, overseas remittances for servicing chartering agreements would be subject to withholding tax at the rate of 15% or 25%.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

On June 27, 2003, the Internal Revenue Service served a tax assessment notice on the Company amounting to R\$ 3,064 million (U.S.\$1,066) covering the period from 1999 to 2002. Using the same arguments, on February 17, 2003, another tax assessment notice had already been issued for R\$ 93 million (U.S. \$ 32) with respect to 1998, against which, on March 20, 2003, the Company filed an appeal.

The Company disagrees with the Internal Revenue Service's interpretation as to charter contracts, given that the Federal Supreme Court has already ruled that, in the context of its judgment with respect to the IPI (Federal VAT) tax, offshore platforms are to be classified as sea-going vessels. Additionally, the 1994 and 1999 Income Tax Regulations support the non-taxation (RIR/1994) and the zero tax rate (RIR/1999) for the remittances in question.

On July 28, 2003, the Company filed an appeal against this most recent tax assessment. No provision has been recorded respective to this claim as the Company believes the claim is without merit.

d) Notification from the INSS - Join liability

The Company received various tax assessments related to social security amounts payable as a result of irregularities in presentation of documentation required by the INSS, to eliminate its joint liability in contracting civil construction and other services, stipulated in paragraphs 5 and 6 of article 219 and paragraphs 2 and 3 of article 220 of Decree 3048/99.

The Company made a provision for this contingency in the amount of U.S.\$ 105 at December 31, 2002, as it considers the chance of success in a defense filed against the INSS to be remote. On September 29, 2003, PETROBRAS received additional INSS tax assessments related to the joint liability for irregularities in presentation of contractors' documentation related to periods subsequent to past notifications. At September 30, 2002, the balance of contingencies associated with this joint liability was U.S.\$191.

Internally, procedures were revised to improve the inspection of contracts and require the presentation of documents, as stipulated in the legislation, to substantiate the payment of INSS amounts due by contractors. PETROBRAS continues to analyze each tax assessment received in order to recover amounts, as permitted through administrative processes of the INSS.

e) Environmental matters

The Company is subject to various environmental laws and regulations. These laws regulate the discharge of oil, gas or other materials into the environment and may require the Company to remove or mitigate the environmental effects of the disposal or release of such materials at various sites.

During 2000 the Company implemented an environmental excellence and operational safety program - PEGASO (Programa de Excelência em Gestão Ambiental e Segurança Operacional). Scheduled to be concluded in December 2003, the Company made expenditures of approximately U.S.\$ 2.1 billion from 2000 to September 30, 2003 under this program.

During the nine-month period ended September 30, 2003 and 2002 the Company made expenditures of approximately U.S.\$ 515 and U.S.\$ 497 respectively, under this program, including U.S.\$ 169 and U.S.\$ 166 through the Programa de Integridade de Dutos (Pipeline Integrity Program) through which it conducts inspections of, and improvements to, the Company's pipelines.

19. Subsequent Events

a) Tender for services of development and exploration in Mexico

Pursuant to its strategy to expand international operations, on October 2003 PETROBRAS won the bid for the provision of services relating to the development and exploration of the Cuervito block in the Burgos Basin, in northeastern Mexico.

PETROBRAS was awarded a contract as part of a consortium in which it participates as operator. The Company has a 45% share and partners with Japan's Teikoku and Mexico's Diavaz., who have 40% and 15% interests, respectively.

The Multiple Services Contracts are being offered by Pemex Exploración y Producción through an international Call for Tender for development and production of natural gas reserves. The contracts envision investments of up to US\$260 million over 15 years.

The Cuervito block, located in the central part of the Burgos Basin, southwest of Reynosa city, has an area of 231 square kilometers. Six fields have already been discovered in this area, with the main production coming from the Cuervito and Pamorana fields.

b) Increase in the Interest in Termorio S.A.

Edgar Filing: BRAZILIAN PETROLEUM CORP - Form 6-K

On October 30, 2003, the Board of Directors of PETROBRAS approved the acquisition, by PETROBRAS, of a 7.0% stake in Termorio S.A. held by PRS Engenharia Ltda in Termorio S.A., for the amount of U.S.\$.05, thereby increasing to 50% the Company's ownership in Termorio S.A.

c) Funding by PESA

On October 31, 2003, Petrobras Energía S.A. PESA, a subsidiary of PETROBRAS in Argentina, issued U.S.\$100 in Notes Series R maturing in 10 years, with interest payable semiannually and a 9.5% annual yield.

The issue is part of a financing program and consolidates PESA's financial profile through the long-term refinancing of short-term liabilities and represents a major milestone for PESA as it indicates a return of Petrobras Energía to international capital markets.

d) Change in the corporate name of Petrobras Energia Ltda.

On November 6, 2003, the Executive Board of PETROBRAS approved the change in the corporate name of its Brazilian subsidiary responsible for the commercialization of electric power from Petrobras Energia Ltda. to Petrobras Comercializadora de Energia Ltda. This change is aimed at avoiding possible misunderstandings with regard to transactions carried out by Petrobras Energia Participaciones S/A, which operates in Argentina.
