CRYPTOLOGIC OUTPERFORMS FIRST QUARTER EXPECTATIONS
Core business stabilizing; International growth & product
expansion fuel positive momentum

April 30, 2003 (Toronto, ON) - CryptoLogic Inc., a leading software developer to the Internet gaming and e-commerce industries, announced today its financial results for the first quarter ended March 31, 2003, ahead of the company's annual meeting scheduled for Thursday, May 1, 2003. Quarterly results exceeded expectations and reflect encouraging signs that the company's core business is stabilizing, and seeing growth momentum from international customers and new products. All financial figures are expressed in U.S. dollars.

"2003 is off to a positive start and continues a favourable trend for CryptoLogic," said Lewis Rose, CryptoLogic's President and CEO. "CryptoLogic is executing well, as evidenced by stronger than expected financial performance and a number of accomplishments in the first quarter. We are pleased with another solid quarter in light of ongoing industry challenges and we continue to be cautiously optimistic."

In the first quarter, CryptoLogic achieved promising results towards its 2003 growth objectives. Highlights included:

- o Signed two new international, brand name customers - Bingo Entertainment for the company's poker product, and ukbetting plc for the company's poker and casino products;
- o Extended casino agreement with a major U.K. licensee, William Hill, and secured a four-year exclusivity for their use of the online poker product developed by CryptoLogic;
- o Received license approval in Alderney, the company's second approval from a strictly regulated jurisdiction. This extends CryptoLogic's market advantage as a regulatory leader; and
- o Surpassed expectations for new poker and bingo products; these products are on track to exceed 10% of 2003 revenue.

Edgar Filing: CRYPTOLOGIC INC - Form 6-K

Solid Q1 Performance and Q2 Outlook

For the 2003 first quarter, CryptoLogic topped expectations by recording \$8.9 million in revenue, net income of \$1.8 million and diluted earnings per share of \$0.15. Management's first quarter 2003 forecasts were for revenue of \$8.0-\$8.3 million, net income of \$1.2-\$1.4 million and \$0.10-\$0.11 per diluted share. The first quarter results also compared solidly to revenue of \$8.7 million and net income of \$2.2 million or \$0.16 per share on a diluted basis from the first quarter of 2002.

CryptoLogic's better-than-expected performance in this year's first quarter reflects growth momentum from international customers and new products - particularly poker - along with broad and growing acceptance of the company's alternative payment solutions. Licensees' revenue from international sources is increasing steadily and was approaching 50% by the end of the first quarter of 2003, up from 40% for 2002.

2

CryptoLogic's balance sheet strength continues to provide a competitive advantage, especially as the industry experiences consolidation and creates attractive opportunities for growth. At March 31, 2003, CryptoLogic remained debt free and total cash reserves grew to \$50.7 million (comprising cash and cash equivalents and restricted cash) or US\$4.15 in cash per diluted share. This cash balance was unusually high due to operating cash flow of \$8.4 million (2002: \$2.8 million), which reflected temporary changes in working capital items in the quarter, and much of which is expected to reverse over the balance of the year. Cash flow from earnings was \$2.1 million during the first quarter, compared with \$2.4 million in the comparable 2002 period.

During the first quarter, CryptoLogic's business continued to stabilize. Notwithstanding these promising results, the company continues to operate in a challenging environment. Earnings in the quarter were affected due to higher investments to support the company's international focus, increasing marketing activities, regulatory efforts, expanding the range of payment methods and ongoing innovation, which continue to be vital for long-term growth. Management forecasts that second quarter revenue will range from \$8.8-\$9.0 million, with net income between \$1.7-\$1.9 million and diluted earnings per share of \$0.14-\$0.16.

International, Brand Name Customers Choose CryptoLogic-Developed Products

CryptoLogic continues to build one of the strongest rosters of brand name customers in the world. In the first quarter, two new international gaming clients, Bingo Entertainment and ukbetting plc, were signed by the company's WagerLogic subsidiary. This is halfway towards the goal of securing four new customers in 2003. As well, WagerLogic expanded its long-standing relationship with William Hill, one of the UK's top two sports betting operators.

William Hill has established one of the most profitable online casino businesses using CryptoLogic-developed software. Building on this success, William Hill reaffirmed its commitment to the relationship by extending the existing casino contract to 2006, and broadened its game suite by exclusively offering WagerLogic's new poker technology, also to 2006.

Edgar Filing: CRYPTOLOGIC INC - Form 6-K

Bingo Entertainment, one of the largest bingo operators on the Internet, chose the company's market-leading poker software to extend the world's most popular card game to its 120,000 players. The new poker site, www.pokerplex.com, was launched as part of the central CryptoLogic-developed poker room on April 14, 2003.

ukbetting plc was another new poker customer announced in the quarter. A licensed and regulated online sports book and the largest independent Internet sports content provider in the U.K., ukbetting reaches 145,000 betting customers and 3.5 million European sports fans each month. By leveraging both WagerLogic's online casino and poker solutions, ukbetting's sizeable international user community will add favourably to CryptoLogic's global expansion.

New Growth Products

CryptoLogic's innovative and results-oriented technologies are attracting new customers and driving organic growth for existing licensees. This is evident from the early success of the company's latest poker and bingo products. These products offer considerable upside for licensees and enable them to enter large, emerging markets that appeal to broader gaming audiences worldwide.

Poker is the Internet's latest big growth market, accounting for just 5% of the \$3.5 billion online gaming industry today and promises considerable upside potential. CryptoLogic's centralized poker technology offers a key advantage by streaming multiple operators into a single site for immediate liquidity. Players gain ready access to live, online poker action with real players from around the globe. Licensees expand

3

into a new, fast-growing game area with an immediate advantage for increased profitability. In less than six months since launch, CryptoLogic already powers one of the top 10 poker rooms on the Web.

Regulatory Leadership

CryptoLogic is at the regulatory forefront as one of the few software providers in the world that comply with the most rigorous requirements for online gaming. In the first quarter, the company obtained a regulatory license in Alderney, the second 'tier-one' regulatory jurisdiction for CryptoLogic.

As the global movement to regulate the industry gains momentum, CryptoLogic's experience and acceptance in highly regulated jurisdictions give the company a clear lead as more land-based operators migrate to regulated markets for online gaming. The Ritz Club London Online is now using CryptoLogic-developed software to achieve certification in Alderney.

Strong Management Team Established

In the quarter, Lewis Rose was confirmed as President and CEO in recognition of his leadership and the company's achievements since taking the helm of CryptoLogic. In addition, the company attracted an accomplished senior technology executive to its leadership team as Chief Technology Officer. Michael Starzynski has over 20 years of global information technology experience at some of North America's largest companies. Starzynski complements the other senior officers added in recent months, which firmly establish a strong, performance-driven management team to guide CryptoLogic's global leadership in online gaming.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As at March 31, 2003

(All figures are in U.S. dollars, except where otherwise indicated)

(Unaudited)

These consolidated interim financial statements of CryptoLogic Inc. (the "Company") have been prepared in accordance with Canadian generally accepted accounting principles using the same accounting policies as were used for the consolidated financial statements for the year ended December 31, 2002. These consolidated interim financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2002, as set out in the 2002 Annual Report.

1. Stock Option Plan

In accordance with the new recommendations adopted in 2002, the Company will continue its existing policy that no compensation cost is recorded on the grant of stock options to employees. Consideration paid by employees on the exercise of stock options is recorded as share capital. However, under the new standard, the Company is required to provide additional pro forma disclosures for options granted to employees as if the fair value based accounting method had been used to account for employee stock options.

The fair value of the options granted was determined using the Black-Scholes option pricing model using a dividend yield of 0% and the following weighted assumptions.

2003

2002

Edgar Filing: CRYPTOLOGIC INC - Form 6-K

	-----	-----
Risk-free rate	3.0%	2.0%
Expected volatility	75.0%	100.0%
Expected life of options in years	5.0	5.0

Had compensation expense been determined based on the fair value of the employee stock option awards at the grant dates in accordance with the new recommendations, the Company's net income and earnings per share would have been changed to the following pro-forma amounts:

	Three months ending March 31, 2003		Three months ending March 31, 2002	
	As reported (`000)	Pro forma (`000)	As reported (`000)	Pro forma (`000)
Net income	\$1,831	\$1,646	\$2,204	
Earnings per share				
Basic	\$0.15	\$0.13	\$0.18	
Diluted	\$0.15	\$0.13	\$0.16	

2. Sale of Investment

On February 18, 2003, the Company sold 100% of its investment in HIP Interactive Corp. (HP-TSX), representing 1,000,000 common shares at Cdn\$1.05 per share, net of transaction charges, for total proceeds of Cdn\$1,050,000 (US\$711,104), and resulting in a gain of US\$31,258.
