EXPLANATORY NOTE

This report combines the reports on Form 10-Q for the three and nine month period ended September 30, 2016 of Essex Property Trust, Inc. and Essex Portfolio, L.P. Unless stated otherwise or the context otherwise requires, references to “Essex” mean Essex Property Trust, Inc., a Maryland corporation that operates as a self-administered and self-managed real estate investment trust (“REIT”), and references to “EPLP” mean Essex Portfolio, L.P. (the “Operating Partnership”). References to the “Company,” “we,” “us” or “our” mean collectively Essex, EPLP and those entities/subsidiaries owned or controlled by Essex and/or EPLP. References to the “Operating Partnership” mean collectively EPLP and those entities/subsidiaries owned or controlled by EPLP.

Essex is the general partner of EPLP and as the sole general partner of EPLP, Essex has exclusive control of EPLP's day-to-day management.

The Company is structured as an umbrella partnership REIT (“UPREIT”) and Essex contributes all net proceeds from its various equity offerings to the Operating Partnership. In return for those contributions, Essex receives a number of OP Units (see definition below) in the Operating Partnership equal to the number of shares of common stock it has issued in the equity offering. Contributions of properties to the Company can be structured as tax-deferred transactions through the issuance of OP Units in the Operating Partnership, which is one of the reasons why the Company is structured in the manner outlined above. Based on the terms of EPLP's partnership agreement, OP Units can be exchanged into Essex common stock on a one-for-one basis. The Company maintains a one-for-one relationship between the OP Units of the Operating Partnership issued to Essex and shares of common stock.

The Company believes that combining the reports on Form 10-Q of Essex and EPLP into this single report provides the following benefits:

- enhances investors' understanding of the Company and the Operating Partnership by enabling investors to view the business as a whole in the same manner as management views and operates the business;
- eliminates duplicative disclosure and provides a more streamlined and readable presentation since a substantial portion of the disclosure applies to both the Company and the Operating Partnership; and
- creates time and cost efficiencies through the preparation of one combined report instead of two separate reports.

Management operates the Company and the Operating Partnership as one business. The management of Essex consists of the same members as the management of EPLP.

All of the Company's property ownership, development, and related business operations are conducted through the Operating Partnership and Essex has no material assets, other than its investment in EPLP. Essex's primary function is acting as the general partner of EPLP. As general partner with control of the Operating Partnership, the Company consolidates the Operating Partnership for financial reporting purposes. Therefore, the assets and liabilities of the Company and the Operating Partnership are the same on their respective financial statements. Essex also issues equity from time to time and guarantees certain debt of EPLP, as disclosed in this report. The Operating Partnership holds substantially all of the assets of the Company, including the Company's ownership interests in its joint ventures. The Operating Partnership conducts the operations of the business and is structured as a partnership with no publicly traded equity. Except for the net proceeds from equity offerings by the Company, which are contributed to the capital of the Operating Partnership in exchange for additional limited partnership interests in the Operating Partnership (“OP Units”) (on a one-for-one share of common stock per OP Unit basis), the Operating Partnership generates all remaining capital required by the Company's business. These sources include the Operating Partnership's working capital, net cash provided by operating activities, borrowings under its revolving credit facilities, the issuance of secured and unsecured debt and equity securities and proceeds received from disposition of certain properties and joint ventures.

The Company believes it is important to understand the few differences between Essex and EPLP in the context of how Essex and EPLP operate as a consolidated company. Stockholders' equity, partners' capital and noncontrolling interest are the main areas of difference between the consolidated financial statements of the Company and those of the Operating Partnership. The limited partners of the Operating Partnership are accounted for as partners' capital in the Operating Partnership's consolidated financial statements and as noncontrolling interest in Essex's consolidated financial statements. The noncontrolling interest in the Operating Partnership's consolidated financial statements include the interest of unaffiliated partners in various consolidated partnerships and joint venture partners. The noncontrolling interest in the Company's consolidated financial statements include (i) the same noncontrolling interest as presented in the Operating Partnership's consolidated financial statements and (ii) limited partner OP Unitholders of the Operating Partnership. The differences between stockholders' equity and partners' capital result from differences in the equity issued at the Company and Operating Partnership levels.

To help investors understand the significant differences between the Company and the Operating Partnership, this report provides separate consolidated financial statements for the Company and the Operating Partnership; a single set of consolidated notes to such financial statements that includes separate discussions of stockholders' equity or partners' capital, and earnings per share/unit, as applicable; and a combined Management's Discussion and Analysis of Financial Condition and Results of Operations.

This report also includes separate Part I, Item 4. Controls and Procedures sections and separate Exhibits 31 and 32 certifications for each of the Company and the Operating Partnership in order to establish that the requisite certifications have been made and that the Company and the Operating Partnership are compliant with Rule 13a-15 or Rule 15d-15 of the Securities Exchange Act of 1934 and 18 U.S.C. §1350.

In order to highlight the differences between the Company and the Operating Partnership, the separate sections in this report for the Company and the Operating Partnership specifically refer to the Company and the Operating Partnership. In the sections that combine disclosure of the Company and the Operating Partnership, this report refers to actions or holdings as being actions or holdings of the Company. Although the Operating Partnership is generally the entity that directly or indirectly enters into contracts and joint ventures and holds assets and debt, reference to the Company is appropriate because the Company is one business and the Company operates that business through the Operating Partnership. The separate discussions of the Company and the Operating Partnership in this report should be read in conjunction with each other to understand the results of the Company on a consolidated basis and how management operates the Company.

The information furnished in the accompanying unaudited condensed consolidated balance sheets, statements of income and comprehensive income, equity, capital, and cash flows of the Company and the Operating Partnership reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the aforementioned condensed consolidated financial statements for the interim periods and are normal and recurring in nature, except as otherwise noted.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the notes to such unaudited condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations herein. Additionally, these unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2015.

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

(1) Organization and Basis of Presentation

The accompanying unaudited condensed consolidated financial statements present the accounts of Essex Property Trust, Inc. ("Essex" or the "Company"), which include the accounts of the Company and Essex Portfolio, L.P. and subsidiaries (the "Operating Partnership," which holds the operating assets of the Company), prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and in accordance with the instructions to Form 10-Q. In the opinion of management, all adjustments necessary for a fair presentation of the financial position, results of operations, and cash flows for the periods presented have been included and are normal and recurring in nature. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2015.

All significant intercompany accounts and transactions have been eliminated in the unaudited condensed consolidated financial statements. Certain reclassifications have been made to conform to the current year's presentation.

The unaudited condensed consolidated financial statements for the three and nine months ended September 30, 2016 and 2015 include the accounts of the Company and the Operating Partnership. Essex is the sole general partner in the Operating Partnership, with a 96.7% general partnership interest as of September 30, 2016. Total Operating Partnership limited partnership units outstanding were 2,219,268 and 2,214,545 as of September 30, 2016 and December 31, 2015, respectively, and the redemption value of the units, based on the closing price of the Company's common stock totaled \$494.2 million and \$530.2 million, as of September 30, 2016 and December 31, 2015, respectively.

As of September 30, 2016, the Company owned or had ownership interests in 244 stabilized apartment communities, aggregating 59,290 apartment homes, excluding the Company's ownership in preferred interest co-investments, (collectively, the "Communities", and individually, a "Community"), three operating commercial buildings and six active developments (collectively, the "Portfolio"). The Communities are located in Southern California (primarily Los Angeles, Orange, San Diego, and Ventura counties), Northern California (the San Francisco Bay Area) and the Seattle metropolitan areas.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU 2014-09, "Revenue from Contracts with Customers." The new standard provides a single comprehensive revenue recognition model for contracts with customers (excluding certain contracts, such as lease contracts) to improve comparability within industries. The new standard requires an entity to recognize revenue to reflect the transfer of goods or services to customers at an amount the entity expects to be paid in exchange for those goods and services and provide enhanced disclosures, all to provide more comprehensive guidance for transactions such as service revenue and contract modifications. In August 2015, the FASB deferred the effective date of the new standard by one year, and it is now effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted but not before the original effective date. The new standard may be applied using either a full retrospective or a modified approach upon adoption. The Company has not yet selected a transition method and is currently evaluating the impact of adopting the new standard on its consolidated results of operations and financial position.

In January 2016, the FASB issued ASU No. 2016-01 "Recognition and Measurement of Financial Assets and Financial Liabilities", which requires changes to the classification and measurement of investments in certain equity securities and to the presentation of certain fair value changes for financial liabilities measured at fair value. The new standard will be effective for the Company beginning on January 1, 2018 and early adoption is permitted. The Company does not expect that this will have a material effect on its consolidated results of operations or financial position.

In February 2016, the FASB issued ASU No. 2016-02 "Leases", which requires an entity that is a lessee to classify leases as either finance or operating and to recognize a lease liability and a right-of-use asset for all leases that have a duration of greater than 12 months. Leases of 12 months or less will be accounted for similar to existing guidance for operating leases today. For lessors, accounting for leases under the new standard will be substantially the same as existing guidance for sales-type leases, direct financing leases, and operating leases, but eliminates current real estate specific provisions and changes the treatment of initial direct costs. The new standard will be effective for the Company beginning on January 1, 2019 and early adoption is permitted, including adoption in an interim period. The new standard must be applied using a modified retrospective approach.

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

The Company is currently evaluating the impact of this amendment on its consolidated results of operations and financial position.

In March 2016, the FASB issued ASU No. 2016-07 "Simplifying the Transition to the Equity Method of Accounting", which eliminates the requirement to retroactively adjust an investment, results of operations, and retained earnings when the investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence. The new standard will be effective for the Company beginning on January 1, 2017 and early adoption is permitted. The Company does not expect the impact of this to be material on its consolidated results of operations or financial position.

In March 2016, the FASB issued ASU No. 2016-09 "Improvement to Employee Share-Based Payment Accounting", which amends certain aspects of how an entity accounts for share-based payments to employees. This amendment requires entities to recognize the income tax effects of share-based awards in the income statement when the awards vest or are settled, rather than recording such effects in additional paid-in capital. Entities will also be permitted to elect to account for forfeitures of share-based payments as they occur or continue with the current practice which requires estimating the number of awards expected to be forfeited and adjusting the estimate when it is likely to change. The new standard will be effective January 1, 2017, with early adoption permitted. The change in recognition of income tax effects of share-based awards will be applied prospectively. If the Company elects to account for forfeitures of share-based payments as they occur, such change will be applied using a modified retrospective approach, with a cumulative-effect adjustment to distributions in excess of accumulated earnings. The Company is currently evaluating the impact of this amendment on its consolidated results of operations and financial position.

In June 2016, the FASB issued ASU No. 2016-13 "Measure of Credit Losses on Financial Instruments", which amends the current approach to estimate credit losses on certain financial assets, including trade and other receivables, available-for-sale securities, and other financial instruments. Generally, this amendment requires entities to establish a valuation allowance for the expected lifetime losses of these certain financial assets. Subsequent changes in the valuation allowance are recorded in current earnings and reversal of previous losses are permitted. Currently, U.S. GAAP requires companies to write down credit losses only when losses are probable and loss reversals are not permitted. The new standard will be effective for the Company beginning on January 1, 2020 and early adoption is permitted. The Company is currently evaluating the impact of this amendment on its consolidated results of operations and financial position.

In August 2016, the FASB issued ASU No. 2016-15 "Classification of Certain Cash Receipts and Cash Payments", which requires entities to adhere to a uniform classification and presentation of certain cash receipts and cash payments in the statement of cash flows. The amendments in this update provide guidance on eight specific cash flow issues. The new standard will be effective for the Company beginning on January 1, 2018 and early adoption is permitted. The Company does not expect the impact of the other items identified in the ASU to be material on its consolidated results of operations and financial position.

Marketable Securities

The Company reports its available for sale securities at fair value, based on quoted market prices (Level 1 for the common stock and investment funds and Level 2 for the unsecured bonds, as defined by the FASB standard for fair value measurements), and any unrealized gain or loss is recorded as other comprehensive income (loss). Realized

gains and losses, interest income, and amortization of purchase discounts are included in interest and other income on the condensed consolidated statements of income and comprehensive income.

As of September 30, 2016 and December 31, 2015, marketable securities consisted primarily of investment-grade unsecured bonds, common stock, investments in mortgage backed securities, investment funds that invest in U.S. treasury or agency securities. As of September 30, 2016 and December 31, 2015, the Company classified its investments in mortgage backed securities, which mature through November 2019 and September 2020, as held to maturity, and accordingly, these securities are stated at their amortized cost. As of September 30, 2016 and December 31, 2015, marketable securities consist of the following (in thousands):

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES

The Company uses the specific identification method to determine the cost basis of a security sold and to reclassify amounts from accumulated other comprehensive income for securities sold.

For the three months ended September 30, 2016 and 2015, the proceeds from sales of available for sale securities totaled \$3.5 million and none, respectively, which resulted in \$1.0 million realized gains and no realized gains or losses, respectively. For the nine months ended September 30, 2016 and 2015, the proceeds from sales of available for sale securities totaled \$14.7 million and \$2.0 million, respectively, which resulted in \$2.9 million realized gains and no realized gains or losses, respectively.

For the three and nine months ended September 30, 2015, the proceeds from sales of other investments totaled \$5.6 million, which resulted in \$0.6 million realized gains. The Company did not own any other investments during the nine months ended September 30, 2016.

Variable Interest Entities

In February 2015, the FASB issued ASU No. 2015-02 "Consolidation: Amendments to the Consolidation Analysis," which provides new consolidation guidance and makes changes to both the variable interest model and the voting model. Among other changes, the new standard specifically eliminates the presumption in the current voting model that a general partner controls a limited partnership or similar entity unless that presumption can be overcome. The

Company adopted ASU No. 2015-02 on January 1, 2016. Based on the Company's evaluation of the new standard, it determined that no change was required to its accounting for variable interest entities ("VIEs"). However, under the guidance of ASU No. 2015-02, 9 previously consolidated co-investments now meet the definition of a VIE and requires additional disclosure about these VIEs which the Company continues to consolidate as they were determined to be the primary beneficiary.

The Company continues to be the primary beneficiary and consolidates the Operating Partnership and 19 DownREIT limited partnerships (comprising eleven communities). Commencing on January 1, 2016, 9 other consolidated co-investments were determined to be VIEs and the Company continues to consolidate those co-investments as the Company was determined to be

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

the primary beneficiary. The consolidated total assets and liabilities related to the 9 consolidated co-investments and 19 DownREIT limited partnerships, net of intercompany eliminations, were approximately \$954.6 million and \$267.3 million, respectively, as of September 30, 2016 and \$893.1 million and \$231.8 million, respectively, as of December 31, 2015. Noncontrolling interests in these entities was \$52.3 million and \$54.6 million as of September 30, 2016 and December 31, 2015, respectively. The Company's financial risk in each VIE is limited to its equity investment in the VIE. As of September 30, 2016 and December 31, 2015, the Company did not have any other VIEs of which it was deemed to be the primary beneficiary and did not have any VIEs of which it was not deemed to be the primary beneficiary.

Equity-based Compensation

The cost of share and unit based compensation awards is measured at the grant date based on the estimated fair value of the awards. The estimated fair value of stock options and restricted stock granted by the Company are being amortized over the vesting period. The estimated grant date fair values of the long term incentive plan units (discussed in Note 13, "Equity Based Compensation Plans," in the Company's Form 10-K for the year ended December 31, 2015) are being amortized over the expected service periods.

Fair Value of Financial Instruments

Management believes that the carrying amounts of the outstanding balances under its lines of credit, and notes and other receivables approximate fair value as of September 30, 2016 and December 31, 2015, because interest rates, yields, and other terms for these instruments are consistent with yields and other terms currently available for similar instruments. Management has estimated that the fair value of the Company's \$5.0 billion of fixed rate debt, including unsecured debt, at September 30, 2016 is approximately \$5.3 billion and the Company's variable rate debt at September 30, 2016 and December 31, 2015 approximates its fair value based on the terms of existing mortgage notes payable, unsecured debt, and variable rate demand notes compared to those available in the marketplace. Management believes that the carrying amounts of cash and cash equivalents, restricted cash, accounts payable and accrued liabilities, construction payables, other liabilities, and dividends payable approximate fair value as of September 30, 2016 and December 31, 2015 due to the short-term maturity of these instruments. Marketable securities, except mortgage backed securities that are held to maturity, and derivatives are carried at fair value as of September 30, 2016 and December 31, 2015.

At September 30, 2016, the Company's investments in mortgage backed securities had a carrying value of \$91.0 million and the Company estimated the fair value to be approximately \$105.9 million. At December 31, 2015, the Company's investments in mortgage backed securities had a carrying value of \$80.4 million and the Company estimated the fair value to be approximately \$110.2 million. The Company determines the fair value of the mortgage backed securities based on unobservable inputs (level 3 of the fair value hierarchy) considering the assumptions that market participants would make in valuing these securities. Assumptions such as estimated default rates and discount rates are used to determine expected discounted cash flows to estimate the fair value.

Capitalization of Costs

The Company's capitalized internal costs related to development and redevelopment projects were comprised primarily of employee compensation and totaled \$3.8 million and \$2.9 million during the three months ended September 30,

2016 and 2015, respectively, and \$10.6 million and \$8.3 million during the nine months ended September 30, 2016 and 2015, respectively. The Company capitalizes leasing commissions associated with the lease-up of development communities and amortizes the costs over the life of the leases. The amounts capitalized for leasing commissions are immaterial for all periods presented.

Co-investments

The Company owns investments in joint ventures (“co-investments”) in which it has significant influence, but its ownership interest does not meet the criteria for consolidation in accordance with U.S. GAAP. Therefore, the Company accounts for co-investments using the equity method of accounting. The equity method employs the accrual basis for recognizing the investor’s share of investee income or losses. In addition, distributions received from the investee are treated as a reduction in the investment account, not as income. The significant accounting policies of the Company’s co-investment entities are consistent with those of the Company in all material respects.

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

Upon the acquisition of a controlling interest of a co-investment, the co-investment entity is consolidated and a gain or loss is recognized upon the remeasurement of co-investments in the condensed consolidated statement of income equal to the amount by which the fair value of the co-investment interest the Company previously owned exceeds its carrying value. A majority of the co-investments, excluding the preferred equity investments, compensate the Company for its asset management services and some of these investments may provide promote income if certain financial return benchmarks are achieved. Asset management fees are recognized when earned, and promote fees are recognized when the earnings events have occurred and the amount is determinable and collectible. Any promote fees are reflected in equity income from co-investments.

Changes in Accumulated Other Comprehensive Loss, Net by Component

Realized gains and losses on available for sale securities are included in interest and other income on the condensed consolidated

statement of income and comprehensive income.

Accounting Estimates

The preparation of condensed consolidated financial statements, in accordance with GAAP, requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to acquiring, developing, and assessing the carrying values of its real estate portfolio, its investments in and advances to joint ventures and affiliates, its notes receivables, and its qualification as a Real Estate Investment Trust ("REIT"). The Company bases its estimates on historical experience, current market conditions, and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may vary from those estimates and those estimates could be different under different assumptions or conditions.

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

(2) Significant Transactions During the Third Quarter of 2016 and Subsequent Events

Significant Transactions

Preferred Equity Investments

In August 2016, the Company made a commitment to fund a \$11.6 million preferred equity investment in a limited liability company that owns The Line, a 228 apartment home community development project located in Santa Ana, CA. This investment is scheduled to mature in March 2020 and will accrue interest based on a 12.0% compounded preferred return. As of September 30, 2016, the Company has funded \$1.9 million of the \$11.6 million commitment.

Notes Receivable

In September 2016, the Company made a commitment to loan \$26.3 million to a limited liability company that owns Oceanaire, a 216 apartment home community development project located in Long Beach, CA. The loan investment is scheduled to mature in September 2020 and will accrue interest based on a 10.75% compounded return. As of September 30, 2016, the Company has funded \$4.4 million of the \$26.3 million commitment.

(3) Co-investments

The Company has joint ventures and preferred equity investments in co-investments which are accounted for under the equity method. The co-investments own, operate, and develop apartment communities. The carrying values of the Company's co-investments as of September 30, 2016 and December 31, 2015 are as follows (in thousands, except in parenthetical):

	Ownership Percentage	September 30, 2016	December 31, 2015
Membership interest/Partnership interest in:			
CPPIB	55 %	\$426,259	\$422,317
Wesco I, III and IV	50 %	202,531	218,902

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

(5) Related Party Transactions

The Company charges certain fees to its co-investments for asset management, property management, development, and redevelopment services. These fees from affiliates totaled \$3.1 million and \$3.3 million during the three months ended September 30, 2016 and 2015, respectively, and \$9.6 million and \$12.5 million during the nine months ended September 30, 2016 and 2015, respectively. All of these fees are net of intercompany amounts eliminated by the Company. The Company netted development and redevelopment fees of \$1.0 million and \$1.2 million against general and administrative expenses for the three months ended September 30, 2016 and 2015, respectively, and \$3.4 million and \$5.8 million for the nine months ended September 30, 2016 and 2015, respectively.

The Company's Chairman and founder, Mr. George Marcus, is the Chairman of the Marcus & Millichap Company ("MMC"), which is a parent company of a diversified group of real estate service, investment, and development firms. Mr. Marcus is also the Co-Chairman of Marcus & Millichap, Inc. ("MMI"), and Mr. Marcus owns a controlling interest in MMI, a national brokerage firm listed on the NYSE.

In March 2015, a multifamily property, located in Anaheim, CA that was owned by an entity affiliated with MMC, in which the Company held a \$13.7 million preferred equity investment, was sold. That investment of \$13.7 million plus an additional \$1.3 million in cash was invested as outlined in the following two paragraphs. Prior to the property sale, the \$13.7 million preferred equity investment earned a 9.0% preferred return and was scheduled to mature in September 2020.

In June 2015, the Company made a \$10.0 million preferred equity investment in an entity affiliated with MMC that owns Greentree Apartments, a 220 apartment community located in San Jose, CA. This investment earns a 9.5% preferred return and is scheduled to mature in June 2022.

In June 2015, the Company made a \$5.0 million preferred equity investment in an entity affiliated with MMC that owns Sterling Cove Apartments, a 218 apartment community located in Concord, CA. This investment earns a 9.5% preferred return and is scheduled to mature in June 2022.

In August 2015, the Company made a \$5.0 million preferred equity investment in an entity affiliated with MMC that owns Alta Vista Apartments, a 92 apartment community located in Los Angeles, CA. This investment earns a 9.5% preferred return and is scheduled to mature in August 2022.

In January 2013, the Company invested \$8.6 million as a preferred equity interest investment in an entity affiliated with MMC that owns an apartment development in Redwood City, CA. In March 2015, the Company's preferred interest investment was prepaid and the Company recognized a gain of \$0.5 million as a result of the prepayment.

The Company has provided short-term bridge loans to affiliates. As of September 30, 2016 and December 31, 2015, \$3.6 million and \$3.1 million, respectively, of short-term loans remained outstanding due from joint venture affiliates and is classified within notes and other receivables in the accompanying condensed consolidated balance sheets.

(6) Debt

The Company does not have indebtedness as debt is incurred by the Operating Partnership. The Company guarantees the Operating Partnership's unsecured debt including the revolving credit facilities for the full term of such debt.

Debt consists of the following (\$ in thousands):

(1) Includes unamortized premium and discounts of \$2.8 million and \$14.3 million and reduced by unamortized debt issuance costs of \$17.2 million and \$15.6 million, as of September 30, 2016 and December 31, 2015, respectively.

(2) Lines of credit, net, related to the Company's two lines of unsecured credit aggregating \$1.0 billion, excludes unamortized debt issuance costs of \$3.6 million as of September 30, 2016 as the net effect resulted in a negative debt balance and as such the amount was reclassified to prepaid expenses and other assets on the condensed consolidated balance sheets. The December 31, 2015 amount includes \$3.3 million of unamortized debt issuance costs because the net balance resulted in a positive debt balance and is presented on a net basis.

(3) Includes unamortized premium of \$55.3 million and \$64.8 million and reduced by unamortized debt issuance costs of \$7.4 million and \$8.0 million, as of September 30, 2016 and December 31, 2015, respectively.

The aggregate scheduled principal payments of the Company's outstanding debt as of September 30, 2016 are as follows (excluding lines of credit) (in thousands):

Remaining in 2016	\$207,668
2017	493,007
2018	321,328
2019	661,954
2020	693,868
Thereafter	3,173,339
Total	\$5,551,164

(7) Segment Information

The Company's segment disclosures present the measure used by the chief operating decision makers for purposes of assessing each segment's performance. Essex's chief operating decision makers are comprised of several members of its executive management team who use NOI to assess the performance of the business for the Company's reportable operating segments. NOI represents total property revenue less direct property operating expenses.

The executive management team evaluates the Company's operating performance geographically. The Company defines its reportable operating segments as the three geographical regions in which its communities are located: Southern California, Northern California, and Seattle Metro.

Excluded from segment revenues and net operating income are management and other fees from affiliates and interest and other income. Non-segment revenues and net operating income included in the following schedule also consist of revenue generated from commercial properties and properties that have been sold. Other non-segment assets include real estate under

(9) Derivative Instruments and Hedging Activities

As of September 30, 2016, the Company has entered into interest rate swap contracts with an aggregate notional amount of \$225 million that effectively fixed the interest rate on the \$225 million unsecured term loan at 2.4%. These derivatives qualify for hedge accounting.

As of September 30, 2016, the Company has interest rate caps, which are not accounted for as hedges, totaling a notional amount of \$20.7 million that effectively limit the Company's exposure to interest rate risk by providing a ceiling on the underlying variable interest rate for \$20.7 million of the Company's tax exempt variable rate debt.

As of September 30, 2016 and December 31, 2015, the aggregate carrying value of the interest rate swap contracts was a liability of \$0.2 million and \$1.0 million, respectively, and is included in other liabilities on the condensed consolidated balance sheets. The aggregate carrying value of the interest rate caps was zero on the condensed consolidated balance sheets as of both September 30, 2016 and December 31, 2015.

Hedge ineffectiveness related to cash flow hedges, which is included in interest expense on the condensed consolidated income statements, net was not significant for both the three and nine months ended September 30, 2016 and 2015.

Additionally, the Company has entered into total return swaps that effectively convert \$257.3 million of mortgage notes payable to a floating interest rate based on SIFMA plus a spread. The total return swaps provide fair market value protection on the mortgage notes payable to our counterparties during the initial period of the total return swap until the Company's option to call the mortgage notes at par can be exercised. The Company can currently call the total return swaps with \$114.4 million of the outstanding debt at par, while the call option on the total return swaps relating to the remaining \$142.9 million of outstanding debt can be exercised starting on January 1, 2017. These derivatives do not qualify for hedge accounting and had a carrying and fair value of \$16 thousand and \$4 thousand at

September 30, 2016 and December 31, 2015, respectively. These total return swaps are scheduled to mature between September 2021 and November 2022. Realized gains of \$3.1 million and \$9.1 million are reported in the condensed consolidated income statements as total return swap income for the three and nine months ended September 30, 2016, respectively. There was no total return swap income for both the three and nine months ended September 30, 2015.

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

September 30, 2016 and 2015

(Unaudited)

(10) Commitments and Contingencies

To the extent that an environmental matter arises or is identified in the future that has other than a remote risk of having a material impact on the condensed consolidated financial statements, the Company will disclose the estimated range of possible outcomes associated with it, and, if an outcome is probable, accrue an appropriate liability for that matter. The Company will consider whether any such matter results in an impairment of value on the affected property and, if so, impairment will be recognized. The Company is subject to various lawsuits in the normal course of its business operations. Such lawsuits could, but are not expected to, have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the Company's Condensed Consolidated Financial Statements and accompanying Notes thereto included elsewhere herein and with the Company's 2015 Annual Report on Form 10-K for the year ended December 31, 2015.

The Company is a self-administered and self-managed REIT that acquires, develops, redevelops, and manages apartment communities in selected residential areas located primarily in the West Coast of the United States. Essex owns all of its interests in its real estate investments, directly or indirectly, through the Operating Partnership. Essex is the sole general partner of the Operating Partnership and, as of September 30, 2016, had an approximately 96.7% general partner interest in the Operating Partnership.

The Company's investment strategy has two components: constant monitoring of existing markets, and evaluation of new markets to identify areas with the characteristics that underlie rental growth. The Company's strong financial condition supports its investment strategy by enhancing its ability to quickly shift acquisition, development, redevelopment, and disposition activities to markets that will optimize the performance of the portfolio.

As of September 30, 2016, the Company had ownership interests in 244 stabilized apartment communities, comprising 59,290 apartment homes, excluding the Company's ownership in preferred equity interest co-investments, and the Company also had ownership interests in three operating commercial buildings with approximately 154,465 square feet and six active developments. The Company's apartment communities are predominately located in the following major regions:

Southern California (Los Angeles, Orange, San Diego, and Ventura counties)

Northern California (the San Francisco Bay Area)

Seattle Metro (Seattle metropolitan area)

As of September 30, 2016, the Company's development pipeline was comprised of two consolidated projects under development, four unconsolidated joint venture projects under development, and various consolidated predevelopment projects all aggregating 2,223 apartment homes, with total incurred costs of \$0.6 billion, and estimated remaining project costs of \$0.7 billion for total estimated project costs of \$1.3 billion.

The Company's consolidated apartment communities are as follows:

Edgar Filing: ESSEX PROPERTY TRUST INC - Form 10-Q

	As of September 30, 2016			As of September 30, 2015		
	Apartment Homes			Apartment Homes		
Southern California	23,949	49 %		23,514	48 %	
Northern California	14,865	30 %		14,807	31 %	
Seattle Metro	10,239	21 %		10,239	21 %	
Total	49,053	100 %		48,560	100 %	

Co-investments, including Wesco I, LLC ("Wesco I"), Wesco III, LLC ("Wesco III"), Wesco IV, LLC ("Wesco IV"), Canadian Pension Plan Investment Board ("CPPIB" or "CPP"), Palm Valley, and BEXAEW, LLC ("BEXAEW") communities, developments under construction, and preferred equity interest co-investment communities are not included in the table presented above for both periods.

Comparison of the Three Months Ended September 30, 2016 to the Three Months Ended September 30, 2015

The Company's average financial occupancies for the Company's stabilized apartment communities or "Quarterly Same-Property" (stabilized properties consolidated by the Company for the quarters ended September 30, 2016 and 2015) was 96.5% and 96.0% for the three months ended September 30, 2016 and 2015, respectively. Financial occupancy is defined as the percentage resulting from dividing actual rental revenue by total potential rental revenue. Actual rental revenue represents contractual rental revenue pursuant to leases without considering delinquency and concessions. Total potential rental revenue represents the value of all apartment homes, with occupied apartment homes valued at contractual rental rates pursuant to leases and vacant apartment homes valued at estimated market rents. We believe that financial occupancy is a meaningful measure of occupancy because it considers the value of each vacant apartment home at its estimated market rate.

Market rates are determined using the recently signed effective rates on new leases at the property and are used as the starting point in the determination of the market rates of vacant apartment homes. The Company may increase or decrease these rates based on the supply and demand in the apartment community's market. Financial occupancy may not completely reflect short-term trends in physical occupancy and financial occupancy rates and the Company's calculation of financial occupancy may not be comparable to financial occupancy disclosed by other REITs.

The Company does not take into account delinquency and concessions to calculate actual rent for occupied apartment homes and market rents for vacant apartment homes. The calculation of financial occupancy compares contractual rates for occupied apartment homes to estimated market rents for unoccupied apartment homes, and thus the calculation compares the gross value of all apartment homes excluding delinquency and concessions. For apartment communities that are development properties in lease-up without stabilized occupancy figures, the Company believes the physical occupancy rate is the appropriate performance metric. While an apartment community is in the lease-up phase, the Company's primary motivation is to stabilize the property which may entail the use of rent concessions and other incentives, and thus financial occupancy, which is based on contractual revenue, is not considered the best metric to quantify occupancy.

The regional breakdown of the Company's Quarterly Same-Property portfolio for financial occupancy for the three months ended September 30, 2016 and 2015 is as follows:

	Three Months Ended September 30, 2016 2015	
Southern California	96.6 %	95.7 %
Northern California	96.5 %	96.2 %
Seattle Metro	96.1 %	96.1 %

The following table provides a breakdown of revenue amounts, including revenues attributable to the Quarterly Same-Properties:

	Number of	Three Months Ended September 30, 2016 2015		Dollar Change	Percentage Change
Property Revenues (\$ in thousands)	Properties				
Quarterly Same-Property Revenues:					
Southern California	92	\$ 131,710	\$ 123,681	\$ 8,029	6.5 %
Northern California	54	104,362	98,037	6,325	6.5
Seattle Metro	50	55,545	51,181	4,364	8.5

Edgar Filing: ESSEX PROPERTY TRUST INC - Form 10-Q

Total Quarterly Same-Property revenues	196	291,617	272,899	18,718	6.9	
Quarterly Non-Same Property Revenues		35,461	29,623	5,838	19.7	
Total property revenues		\$327,078	\$302,522	\$24,556	8.1	%

Quarterly Same-Property Revenues increased by \$18.7 million or 6.9% to \$291.6 million in the third quarter of 2016 from \$272.9 million in the third quarter of 2015. The increase was primarily attributable to an increase of 6.0% in average rental rates from \$1,969 per apartment home in the third quarter of 2015 to \$2,087 per apartment home in the third quarter of 2016.

Quarterly Non-Same Property Revenues increased by \$5.8 million or 19.7% to \$35.5 million in the third quarter of 2016 from \$29.6 million in the third quarter of 2015. The increase was primarily due to revenue generated by the acquisition or consolidation of six communities, net of dispositions, since July 1, 2015.

Management and other fees from affiliates remained relatively flat at \$2.1 million in both the third quarters of 2016 and 2015, reflecting no significant changes in management and other fee activity from joint ventures.

Property operating expenses, excluding real estate taxes increased \$3.3 million to \$63.8 million in the third quarter of 2016 from \$60.5 million in the third quarter of 2015, primarily due to the acquisition or consolidation of six communities, net of dispositions, since July 1, 2015 and increases in property management fees. Quarterly Same-Property operating expenses, excluding real estate taxes, increased by \$2.2 million or 3.9% for the third quarter of 2016 compared to the third quarter of 2015, primarily due to a \$1.2 million increase in property management fees and an increase of \$0.6 million in maintenance and repairs.

Real estate taxes increased by \$2.0 million for the third quarter of 2016 compared to the third quarter of 2015 due primarily to the acquisition or consolidation of six communities, net of dispositions, since July 1, 2015 and increases in tax rates and property valuations. Quarterly Same-Property real estate taxes increased by \$1.0 million or 3.3% for the third quarter of 2016 compared to the third quarter of 2015 primarily due to increases in tax rates and property valuations.

Depreciation and amortization expense decreased by \$5.8 million for the third quarter of 2016 compared to the third quarter of 2015, due to the amortization of a larger amount of acquired in-place leases during the third quarter of 2015 compared to the third quarter of 2016, partially offset by an increase due to the acquisition or consolidation of six communities, net of dispositions, since July 1, 2015.

Interest expense increased \$6.6 million for the third quarter of 2016 compared to the third quarter of 2015, primarily due to the \$450.0 million senior unsecured notes due on April 15, 2026 issued in April 2016 which resulted in \$3.9 million interest expense for the third quarter of 2016 and none for the third quarter of 2015. In addition, capitalized interest decreased \$0.7 million in the third quarter of 2016 compared to the third quarter of 2015, which was due to a decrease in development costs as compared to the same period in 2015.

Total return swap income of \$3.1 million in the third quarter of 2016 consists of monthly settlements related to the Company's total return swap contracts that were entered into during 2015 in connection with \$257.3 million of fixed rate tax-exempt mortgage notes payable. There was no total return swap income for the third quarter of 2015.

Interest and other income decreased by \$2.4 million for the third quarter of 2016 compared to the third quarter of 2015 primarily due a decrease of \$3.0 million in insurance reimbursements and legal settlements partially offset by an increase of \$0.4 million in income from the sale of marketable securities.

Equity income in co-investments increased \$2.4 million for the third quarter of 2016 compared to the third quarter of 2015 primarily due to a \$2.1 million increase in income from preferred equity investment, which was primarily attributable to three new preferred equity investments made during 2016.

Comparison of the Nine Months Ended September 30, 2016 to the Nine Months Ended September 30, 2015

Our average financial occupancies for the Company's stabilized apartment communities or "2016/2015 Same-Property" (stabilized properties consolidated by the Company for the nine months ended September 30, 2016 and 2015) was 96.2% and 96.0% for the nine months ended September 30, 2016 and 2015, respectively.

The regional breakdown of the Company's 2016/2015 Same-Property portfolio for financial occupancy for the nine months ended September 30, 2016 and 2015 is as follows:

	Nine Months Ended September 30,	
	2016	2015
Southern California	96.2 %	95.8 %
Northern California	96.3 %	96.2 %
Seattle Metro	95.9 %	96.1 %

The following table provides a breakdown of revenue amounts, including revenues attributable to the 2016/2015 Same-Properties:

	Number of	Nine Months Ended September 30,		Dollar	Percentage	
Property Revenues (\$ in thousands)	Properties	2016	2015	Change	Change	
2016/2015 Same-Property Revenues:						
Southern California	92	\$387,611	\$364,866	\$22,745	6.2	%
Northern California	54	307,414	285,519	21,895	7.7	%
Seattle Metro	50	161,193	149,661	11,532	7.7	%
Total 2016/2015 Same-Property revenues	196	856,218	800,046	56,172	7.0	%
2016/2015 Non-Same Property Revenues		102,600	76,806	25,794	33.6	%
Total property revenues		\$958,818	\$876,852	\$81,966	9.3	%

2016/2015 Same-Property Revenues increased by \$56.2 million or 7.0% to \$856.2 million in the nine months ended September 30, 2016 from \$800.0 million in the nine months ended September 30, 2015. The increase was primarily attributable to an increase of 6.8% in average rental rates from \$1,921 per apartment home for the nine months ended September 30, 2015 to \$2,052 per apartment home for the nine months ended September 30, 2016.

2016/2015 Non-Same Property Revenues increased by \$25.8 million or 33.6% to \$102.6 million in the nine months ended September 30, 2016 from \$76.8 million in the nine months ended September 30, 2015. The increase was primarily due to revenue generated by the acquisition or consolidation of ten communities, net of dispositions, since January 1, 2015.

Management and other fees from affiliates decreased by \$0.7 million in the nine months ended September 30, 2016 as compared to the nine months ended September 30, 2015. The decrease is primarily due to the loss of asset and management fees in the nine months ended September 30, 2016, as compared to the nine months ended September 30, 2015, associated with the Company's purchase of the joint venture partner's remaining membership interest in The Huxley, The Dylan, and Reveal communities during the nine months ended September 30, 2015 and the sale of certain communities.

Property operating expenses, excluding real estate taxes increased \$11.8 million to \$185.4 million in the nine months ended September 30, 2016 from \$173.5 million in the nine months ended September 30, 2015 primarily due to the acquisition or consolidation of ten communities, net of dispositions, since January 1, 2015 and increases in property management fees. 2016/2015 Same-Property operating expenses, excluding real estate taxes, increased by \$7.8 million or 4.8% for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015, primarily due to a \$3.6 million increase in property management fees and a \$2.1 million increase in maintenance and repairs.

Real estate taxes increased by \$6.7 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015 due primarily to the acquisition or consolidation of ten communities, net of dispositions, since January 1, 2015 and increases in tax rates and property valuations. 2016/2015 Same-Property real estate taxes increased by \$1.9 million or 2.2% for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015 primarily due to increases in tax rates and property valuations.

Depreciation and amortization expense decreased by \$7.1 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015 due to the amortization of a larger amount of acquired in-place leases during the nine months ended September 30, 2015 compared to the nine months ended September 30, 2016, partially offset by an increase due to the acquisition or consolidation of ten communities, net of dispositions,

since January 1, 2015.

Merger and integration expenses include, but are not limited to, advisor fees, legal, and accounting fees related to the merger with BRE and related integration activity. There were no merger and integration expenses for the nine months ended September 30, 2016 and \$3.8 million for the nine months ended September 30, 2015.

Interest expense increased \$16.3 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015, primarily due to the \$500.0 million senior unsecured notes due on April 1, 2025 issued in March 2015 and the \$450.0 million senior unsecured notes due on April 15, 2026 issued in April 2016 which resulted in an increase of \$11.0 million in interest expense for the nine months ended September 30, 2016 as compared to the nine months ended September 30, 2015. These additions were offset by the reduction in interest expense due to the payoff of \$150.0 million in private placement

unsecured bonds. In addition, capitalized interest decreased \$3.0 million for nine months ended September 30, 2016 compared to the nine months ended September 30, 2015, which was due to a decrease in development costs.

Total return swap income of \$9.1 million in the nine months ended September 30, 2016 consists of monthly settlements related to the Company's total return swap contracts that were entered into during 2015 in connection with \$257.3 million of fixed rate tax-exempt mortgage notes payable. There was no total return swap income for the nine months ended September 30, 2015.

Interest and other income increased by \$4.7 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015 primarily due to an increase of \$2.5 million in marketable securities and other interest income and \$2.3 million in income from the sale of marketable securities.

Equity income in co-investments increased \$23.0 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015 primarily due to \$13.0 million in income on the gain on the sale of two co-investment communities during the nine months ended September 30, 2016.

Gain on sale of real estate and land increased by \$13.1 million for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015, due to a \$10.7 million gain on the sale of Harvest Park before tax expense and a \$9.6 million gain on the sale of the Company's former headquarters office building during the nine months ended September 30, 2016 as compared to \$7.1 million in gains on the sales of Pinnacle South Mountain and two commercial buildings during the nine months ended September 30, 2015.

Deferred tax expense on gain on sale of real estate and land of \$4.3 million for the nine months ended September 30, 2016 was recorded due to the sale of Harvest Park, which was owned by our wholly owned taxable REIT subsidiary. There was no current tax expense on the sale of real estate and land for the nine months ended September 30, 2016, because Harvest Park was sold in a like-kind exchange transaction.

Gain on remeasurement of co-investment of \$34.0 million for the nine months ended September 30, 2015 was due to a remeasurement of the Company's investments, caused by the Company's purchase of the joint venture partner's remaining membership interest in The Huxley, The Dylan, and Reveal co-investments. There were no gains on remeasurement of co-investments for the nine months ended September 30, 2016.

Liquidity and Capital Resources

As of September 30, 2016, the Company had \$195.2 million of unrestricted cash and cash equivalents and \$153.7 million in marketable securities, of which \$62.8 million were available for sale. We believe that cash flows generated by our operations, existing cash, cash equivalents, and marketable securities balances, availability under existing lines of credit, access to capital markets and the ability to generate cash from the disposition of real estate are sufficient to meet all of our reasonably anticipated cash needs during the next twelve months. The timing, source and amounts of cash flows provided by financing activities and used in investing activities are sensitive to changes in interest rates and other fluctuations in the capital markets environment, which can affect our plans for acquisitions, dispositions, development and redevelopment activities.

As of September 30, 2016 Fitch Ratings ("Fitch"), Moody's Investor Service ("Moody's"), and Standard and Poor's ("S&P") credit agencies rate Essex Property Trust, Inc. and Essex Portfolio, L.P. BBB+/Stable, Baa2/Positive, and BBB/Positive, respectively. Moody's and S&P issued upgrades to Baa1/Stable and BBB+/Stable in October 2016.

The Company has two lines of unsecured credit aggregating \$1.03 billion. The Company has a \$1.0 billion unsecured line of credit, and as of September 30, 2016, there were no amounts outstanding on the line. The underlying interest rate is based on a tiered rate structure tied to the Company's credit ratings and was LIBOR plus 0.90% as of

September 30, 2016. This facility matures in December 2019 with one 18-month extension, exercisable at the Company's option. The Company has a working capital unsecured line of credit agreement for \$25.0 million. This facility matures in January 2018. As of September 30, 2016, there were no amounts outstanding on the \$25.0 million unsecured line. The underlying interest rate on the \$25.0 million line is based on a tiered rate structure tied to the Company's credit ratings and was LIBOR plus 0.90% as of September 30, 2016.

In April 2016, the Company issued \$450 million of 3.375% senior unsecured notes that mature in April 2026. The interest is paid semi-annually in arrears on April 15 and October 15 of each year, commencing on October 15, 2016 until the maturity date of April 15, 2026. The Company used the net proceeds of this offering to repay indebtedness under its unsecured lines of credit and for other general corporate and working capital purposes.

In April 2016, the Company redeemed all of the issued and outstanding 2,950,000 shares of the Company's 7.125% Series H Cumulative Redeemable Preferred Stock for \$25.00 per share, or a total of \$73.8 million in cash.

The Company has entered into equity distribution agreements with Cantor Fitzgerald & Co, Barclays Capital Inc., BMO Capital Markets Corp., BNB Paribas Securities Corp., Capital One Securities, Citigroup Global Markets Inc., Jefferies LLC, J.P. Morgan Securities LLC, Mitsubishi UFJ Securities (USA), Inc., and UBS Securities LLC. The Company has not issued any shares pursuant to its equity distribution program during the nine months ended September 30, 2016 and through October 27, 2016.

Essex pays quarterly dividends from cash available for distribution. Until it is distributed, cash available for distribution is invested by the Company primarily in investment grade securities held available for sale or is used by the Company to reduce balances outstanding under its line of credit.

Development and Predevelopment Pipeline

The Company defines development projects as new communities that are being constructed, or are newly constructed and are in a phase of lease-up and have not yet reached stabilized operations. As of September 30, 2016, the Company's development pipeline was comprised of two consolidated projects under development and four unconsolidated joint venture projects under development, all aggregating 2,223 apartment homes, with total incurred costs of \$0.6 billion, and estimated remaining project costs of approximately \$0.7 billion, \$0.6 billion of which represents the Company's estimated remaining costs, for total estimated project costs of \$1.3 billion.

The Company expects to fund the development and predevelopment pipeline by using a combination of some or all of the following sources: its working capital, amounts available on its lines of credit, net proceeds from public and private equity and debt issuances, and proceeds from the disposition of assets, if any.

Redevelopment Pipeline

The Company defines redevelopment communities as existing properties owned or recently acquired, which have been targeted for additional investment by the Company with the expectation of increased financial returns through property improvement. During redevelopment, apartment homes may not be available for rent and, as a result, may have less than stabilized operations. As of September 30, 2016, the Company had ownership interests in four major redevelopment communities aggregating 1,213 apartment homes with estimated redevelopment costs of \$149.9 million, of which approximately \$53.7 million remains to be expended. The Company has the ability to cease funding of the redevelopment pipeline as needed.

Derivative Activity

The Company uses interest rate swaps, interest rate cap, and total return swap contracts to manage certain interest rate risks. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves. The fair values of interest rate swaps and total return swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves. The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements.

Alternative Capital Sources

The Company utilizes co-investments as an alternative source of capital for acquisitions of both operating and development communities. As of September 30, 2016, the Company had an interest in 1,427 apartment homes of communities actively under development with joint ventures for total estimated costs of \$0.8 billion. Total estimated remaining costs total approximately \$0.4 billion, of which the Company estimates that our remaining investment in these development joint ventures will be approximately \$0.2 billion. In addition, the Company had an interest in 10,237 apartment homes of operating communities with joint ventures for a total book value of \$0.8 billion as of September 30, 2016.

Critical Accounting Policies and Estimates

The preparation of condensed consolidated financial statements, in accordance with GAAP requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. The Company defines critical accounting policies as those accounting policies that require the Company's management to exercise their most difficult, subjective and complex judgments. The Company's critical accounting policies and estimates relate principally to the following key areas: (i) accounting for business combinations (ii) consolidation under applicable accounting standards for entities that are not wholly owned; (iii) assessing the carrying values of our real estate properties and investments in and advances to joint ventures and affiliates; and (iv) internal cost capitalization. The Company bases its estimates on historical experience, current market conditions, and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from those estimates made by management.

The Company's critical accounting policies and estimates have not changed materially from the information reported in Note 2, "Summary of Critical and Significant Accounting Policies," in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Forward Looking Statements

Certain statements in this "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this quarterly report on Form 10-Q which are not historical facts may be considered forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended, including statements regarding the Company's expectations, hopes, intentions, beliefs and strategies regarding the future. Forward looking statements include statements regarding the Company's expectations as to the total projected costs of predevelopment, development and redevelopment projects, beliefs as to our ability to meet our cash needs during the next twelve months and to fund the Company's development and redevelopment pipeline, the expected impact of lawsuits on the Company, and statements regarding the Company's financing activities.

Such forward-looking statements involve known and unknown risks, uncertainties and other factors including, but not limited to, that the Company will fail to achieve its business objectives, that the total projected costs of current predevelopment, development and redevelopment projects will exceed expectations, that such development and redevelopment projects will not be completed, that development and redevelopment projects and acquisitions will fail to meet expectations, that estimates of future income from an acquired property may prove to be inaccurate, that future cash flows will be inadequate to meet operating requirements, that there may be a downturn in the markets in which the Company's properties are located, that the terms of any refinancing may not be as favorable as the terms of existing indebtedness, and that lawsuits will be more costly than anticipated, as well as those risks, special considerations, and other factors referred to in Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year ended December 31, 2015, and those risk factors and special considerations set forth in the Company's other filings with the Securities and Exchange Commission (the "SEC") which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. All forward-looking statements are made as of the date hereof, and the Company assumes no obligation to update this information.

Funds from Operations Attributable to Common Stockholders and Unitholders

Funds from Operations Attributable to Common Stockholders and Unitholders ("FFO") is a financial measure that is commonly used in the REIT industry. The Company presents funds from operations as a supplemental operating performance measure. FFO is not used by the Company as, nor should it be considered to be, an alternative to net earnings computed under GAAP as an indicator of the Company's operating performance or as an alternative to cash

from operating activities computed under GAAP as an indicator of the Company's ability to fund its cash needs.

FFO is not meant to represent a comprehensive system of financial reporting and does not present, nor does it intend to present, a complete picture of the Company's financial condition and operating performance. The Company believes that net earnings computed under GAAP is the primary measure of performance and that FFO is only meaningful when it is used in conjunction with net earnings. The Company considers FFO and FFO excluding non-recurring items and acquisition costs (referred to as "Core FFO") to be useful financial performance measurements of an equity REIT because, together with net income and cash flows, FFO and Core FFO provide investors with additional bases to evaluate operating performance and ability of a REIT to incur and service debt and to fund acquisitions and other capital expenditures and ability to pay dividends. Further, the Company believes that its consolidated financial statements, prepared in accordance with GAAP, provide the most meaningful picture of its financial condition and its operating performance.

In calculating FFO, the Company follows the definition for this measure published by the National Association of REITs (“NAREIT”), which is a REIT trade association. The Company believes that, under the NAREIT FFO definition, the two most significant adjustments made to net income are (i) the exclusion of historical cost depreciation and (ii) the exclusion of gains and losses (including impairment charges on depreciable real estate) from the sale of previously depreciated properties. The Company agrees that these two NAREIT adjustments are useful to investors for the following reason:

historical cost accounting for real estate assets in accordance with GAAP assumes, through depreciation charges, that the value of real estate assets diminishes predictably over time. NAREIT stated in its White Paper on Funds from Operations “since real estate asset values have historically risen or fallen with market conditions, many (a) industry investors have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves.” Consequently, NAREIT’s definition of FFO reflects the fact that real estate, as an asset class, generally appreciates over time and depreciation charges required by GAAP do not reflect the underlying economic realities.

REITs were created as a legal form of organization in order to encourage public ownership of real estate as an asset class through investment in firms that were in the business of long-term ownership and management of real estate. (b) The exclusion, in NAREIT’s definition of FFO, of gains and losses (including impairment charges on depreciable real estate) from the sales of previously depreciated operating real estate assets allows investors and analysts to readily identify the operating results of the long-term assets that form the core of a REIT’s activity and assists in comparing those operating results between periods.

Management believes that it has consistently applied the NAREIT definition of FFO to all periods presented. However, there is judgment involved and other REITs’ calculation of FFO may vary from the NAREIT definition for this measure, and thus their disclosure of FFO may not be comparable to the Company’s calculation.

The following table sets forth the Company’s calculation of FFO and Core FFO for the three and nine months ended September 30, 2016 and 2015 (in thousands except for share and per share data):

Essex Property Trust, Inc.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Net income available to common stockholders	\$65,561	\$42,323	\$215,555	\$147,241
Adjustments:				
Depreciation and amortization	110,467	116,308	329,847	336,946
Gains not included in Funds from Operations attributable to common stockholders and unitholders	—	—	(33,304)	(41,126)
Deferred tax expense on sale of real estate and land - taxable REIT subsidiary activity	—	—	4,279	—
Depreciation add back from unconsolidated co-investments	12,857	12,800	37,337	36,822
Noncontrolling interest related to Operating Partnership units	2,223	1,471	7,457	5,115
Insurance reimbursements	—	(1,751)	—	(1,751)
Depreciation attributable to third party ownership and other	(5)	(253)	(3)	(753)
Funds from Operations attributable to common stockholders and unitholders	\$191,103	\$170,898	\$561,168	\$482,494
Funds from Operations attributable to common stockholders and unitholders per share - diluted	\$2.81	\$2.53	\$8.27	\$7.19
Non-core items:				
Merger and integration expenses	—	—	—	3,798
Acquisition and investment related costs	284	381	1,379	1,357
Gain on sale of marketable securities	(1,033)	(598)	(2,876)	(598)
Loss on early retirement of debt	211	—	211	—
Co-investment promote income	—	(192)	—	(192)
Income from early redemption of preferred equity investments	—	(1,485)	—	(1,954)
Excess of redemption value of preferred stock over carrying value	—	—	2,541	—
Insurance reimbursements, legal settlements , and other, net	(31)	(569)	(4,041)	(2,526)
Core Funds from Operations attributable to common stockholders and unitholders	\$190,534	\$168,435	\$558,382	\$482,379
Core Funds from Operations attributable to common stockholders and unitholders per share-diluted	\$2.81	\$2.49	\$8.23	\$7.19
Weighted average number shares outstanding diluted ⁽¹⁾	67,914,123	67,535,685	67,881,126	67,135,143

(1) Assumes conversion of all outstanding operating partnership interests in the Operating Partnership and excludes all DownREIT units for which the Operating Partnership has the ability and intention to redeem the DownREIT limited partnership units for cash and does not consider them to be common stock equivalents.

Net Operating Income ("NOI")

Net Operating Income ("NOI") and same-property NOI are considered by management to be an important supplemental performance measures to earnings from operations included in the Company's consolidated statements of income. The presentation of same-property NOI assists with the presentation of the Company's operations prior to the allocation of depreciation and any corporate-level or financing-related costs. NOI reflects the operating performance of a community and allows for an easy comparison of the operating performance of individual communities or groups of communities. In addition, because prospective buyers of real estate have different financing and overhead structures, with varying marginal impacts to overhead by acquiring real estate, NOI is considered by many in the real estate industry to be a useful measure for determining the value of a real estate asset or group of assets. The Company defines same-property NOI as same-property revenue less same-property operating expenses, including property taxes. Please see the reconciliation of earnings from operations to same-property NOI, which in the table below is the

NOI for stabilized properties consolidated by the Company for the periods presented (Dollars in thousands):

33

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Earnings from operations	\$109,412	\$82,689	\$315,280	\$238,970
Adjustments:				
Depreciation and amortization	110,467	116,308	329,847	336,946
Management and other fees from affiliates	(2,093)	(2,104)	(6,145)	(6,809)
General and administrative	9,647	11,129	28,527	31,223
Merger and integration expenses	—	—	—	3,798
Acquisition and investment related costs	284	381	1,379	1,357
NOI	227,717	208,403	668,888	605,485
Less: Non-same property NOI	(24,456)	(20,729)	(70,793)	(53,858)
Same-property NOI	\$203,261	\$187,674	\$598,095	\$551,627

Item 3: Quantitative and Qualitative Disclosures About Market Risks

Interest Rate Hedging Activities

The Company's objective in using derivatives is to add stability to interest expense and to manage its exposure to interest rate movements or other identified risks. To accomplish this objective, the Company uses interest rate swaps as part of its cash flow hedging strategy. As of September 30, 2016, the Company has entered into seven interest rate swap contracts to mitigate the risk of changes in the interest-related cash outflows on its \$225.0 million variable rate five-year unsecured term debt. As of September 30, 2016, the Company also had \$291.7 million of variable rate indebtedness, of which \$20.7 million is subject to interest rate cap protection. All of the Company's interest rate swaps are designated as cash flow hedges as of September 30, 2016. The following table summarizes the notional amount, carrying value, and estimated fair value of the Company's cash flow hedge derivative instruments used to hedge interest rates as of September 30, 2016. The notional amount represents the aggregate amount of a particular security that is currently hedged at one time, but does not represent exposure to credit, interest rates, or market risks. The table also includes a sensitivity analysis to demonstrate the impact on the Company's derivative instruments from an increase or decrease in 10-year Treasury bill interest rates by 50 basis points, as of September 30, 2016.

	Notional	Maturity	Carrying and Estimated Fair Value	Estimated 50 Basis Points	Estimated -50 Basis Points
(in thousands)	Amount	Date Range			
Cash flow hedges:					
Interest rate swaps	\$225,000	2016-2017	\$ (244)	\$(122)	\$(368)
Interest rate caps	20,674	2018-2019	—	1	—
Total cash flow hedges	\$245,674	2016-2019	\$ (244)	\$(121)	\$(368)

Additionally, the Company has entered into total return swap contracts, with an aggregate notional amount of \$257.3 million that effectively converts \$257.3 million of fixed mortgage notes payable to a floating interest rate based on SIFMA plus a spread and has a carrying value of \$16 thousand at September 30, 2016. These derivatives do not qualify for hedge accounting.

Interest Rate Sensitive Liabilities

The Company is exposed to interest rate changes primarily as a result of its lines of credit and long-term tax exempt variable rate debt and unsecured term debt. The Company's interest rate risk management objective is to limit the

impact of interest rate changes on earnings and cash flows and to lower its overall borrowing costs. To achieve its objectives the Company borrows primarily at fixed rates and may enter into derivative financial instruments such as interest rate swaps, caps, and treasury locks in order to mitigate its interest rate risk on a related financial instrument. The Company does not enter into derivative or interest rate transactions for speculative purposes.

The Company's interest rate risk is monitored using a variety of techniques. The table below presents the principal amounts and weighted average interest rates by year of expected maturity to evaluate the expected cash flows.

For the Years Ended	2016	2017	2018	2019	2020	Thereafter	Total	Fair value
(in thousands, except for interest rates)								
Fixed rate debt	\$7,630	467,512	320,786	651,362	693,221	2,893,944	\$5,034,455	\$5,293,581
Average interest rate	4.6 %	3.0 %	5.5 %	4.3 %	5.0 %	3.7 %	4.0 %	
Variable rate debt	\$200,038	(1) 25,495	(1) 542	10,592	647	279,395	(2) (3) \$516,709	\$512,667
Average interest rate	2.4 %	2.4 %	1.5 %	1.7 %	1.5 %	1.3 %	1.8 %	

(1) \$225.0 million is subject to interest rate swap agreements.

(2) \$20.7 million is subject to interest rate caps.

(3) \$257.3 million is subject to total return swaps.

The table incorporates only those exposures that exist as of September 30, 2016; it does not consider those exposures or positions that could arise after that date. As a result, the Company's ultimate realized gain or loss, with respect to interest rate fluctuations and hedging strategies would depend on the exposures that arise prior to settlement.

Item 4: Controls and Procedures

Essex Property Trust, Inc.

As of September 30, 2016, Essex carried out an evaluation, under the supervision and with the participation of management, including Essex's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based upon that evaluation, Essex's Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2016, our disclosure controls and procedures were effective to ensure that the information required to be disclosed by Essex in the reports that Essex files or submit under the Exchange Act was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such disclosure controls and procedures were also effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to Essex's management, including Essex's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

There were no changes in Essex's internal control over financial reporting, that occurred during the quarter ended September 30, 2016, that have materially affected, or are reasonably likely to materially affect, the Essex's internal control over financial reporting.

Essex Portfolio, L.P.

As of September 30, 2016, the Operating Partnership carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based upon that evaluation, the Chief

Executive Officer and Chief Financial Officer concluded that as of September 30, 2016, our disclosure controls and procedures were effective to ensure that the information required to be disclosed by the Operating Partnership in the reports that the Operating Partnership files or submit under the Exchange Act was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such disclosure controls and procedures were also effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Operating Partnership's management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

There were no changes in the Operating Partnership's internal control over financial reporting, that occurred during the quarter ended September 30, 2016, that have materially affected, or are reasonably likely to materially affect, the Operating Partnership's internal control over financial reporting.

Part II -- Other Information

Index

Item 1: Legal Proceedings

The Company is subject to various lawsuits in the normal course of its business operations. Such lawsuits could, but are not expected to, have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Item 1A: Risk Factors

There were no material changes to the Risk Factors disclosed in Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the SEC and available at www.sec.gov.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities; Essex Portfolio, L.P.

During the three months ended September 30, 2016, the Operating Partnership issued partnership units in private placements in reliance on the exemption from registration provided by Section 4(2) of the Securities Act, in the amounts and for the consideration set forth below:

During the three months ended September 30, 2016, Essex Property Trust, Inc. issued an aggregate of 43,531 of its common stock upon the exercise of stock options, vesting of restricted stock awards, and the exchange of Operating Partnership limited partnership units by limited partners into shares of common stock. Essex Property Trust, Inc. contributed the proceeds from the option exercises during the three months ended September 30, 2016 to our Operating Partnership in exchange for an aggregate of 43,531 common operating partnership units ("common units"), as required by the Operating Partnership's partnership agreement.
