improvements constructed thereon, including but not limited to approximately 56,000 square feet of manufacturing facilities and office space and approximately 10 acres of land. The total sale price for the property was \$1,000,000. After payment of the mortgage on the property and other expenses incurred in connection with the sale, the net proceeds to the Company are estimated to be approximately \$690,000. The amount of consideration paid was determined in arms-length negotiations between the parties.

The Company's lease for the manufacturing facility will commence on June 1, 2004 and end on May 31, 2009. The current annual base rent payable under the lease is approximately \$180,000. The Company has the right, at its option, to extend the initial term of its lease for two additional five-year periods at a base rent to be negotiated, but not more than 10% over the base rent charged during the previous term. The Buyer, as landlord, is responsible for the maintenance and repair of the roof, plumbing, electrical, heating and air conditioning, exterior walls, doors, windows, corridors and other common areas of the manufacturing facility.
