Dear Shareholder:

We are pleased to provide you with the annual report for PIMCO California Municipal Income Fund II and PIMCO New York Municipal Income Fund II (each a []Fund[] and collectively, the []Funds[]) for the fiscal year ended May 31, 2006.

PIMCO New York Municipal Income Fund II returned 6.75% on net asset value and 1.65% on market price, compared to 3.50% and 6.18%, respectively, for the Lipper Analytical New York Municipal Debt Funds average.

(1) Inclusive of net assets attributable to market value of Preferred Shares outstanding of \$260 million.

(2) **Past performance is no guarantee of future results.** Total return is calculated by subtracting the value of an investment in the Fund at the beginning of each specified period from the value at the end of the period and dividing the remainder by the value of the investment at the beginning of the period and expressing the result as a percentage. The calculation assumes that all income dividends have been reinvested at prices obtained under the Fund[s dividend reinvestment plan. Total return does not reflect broker commissions or sales charges. Total return for a period more than one year represents the average annual total return.

An investment in the Fund involves risk, including the loss of principal. Total return, price, yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. A portion of the income generated by the Fund may be subject to federal, state and local taxes, and may at times be subject to the alternative minimum tax. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is total assets applicable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(3) Market Price Yield is determined by dividing the annualized current monthly per share dividend payable to common shareholders by the market price per common share at May 31, 2006.
