1. General information

1.1 The Group's business and general information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria ("Cresud" or the "Company") was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

In 2002, Cresud acquired a 19.85% interest in IRSA Inversiones y Representaciones Sociedad Anónima ("IRSA"), a real estate company related to certain shareholders of Cresud. In 2009, Cresud increased its ownership percentage in IRSA to 55.64% and IRSA became Cresud's principal subsidiary.

Cresud and its subsidiaries are collectively referred to hereinafter as the Group. See Note 2.3 to the Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's companies.

As of March 31, 2014, the Group operates in two major lines of business: (i) Agricultural business, (ii) Investment and Development Properties business. See Note 7 to the Unaudited Condensed Interim Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's segments.

The Group's Agricultural business operations are comprised of crop production, cattle feeding, raising and fattening, milk production, sugarcane production and brokerage activities. The Group's Agro-industrial business operations are conducted through its subsidiary, Cactus Argentina S.A., and are engaged in cattle feeding services in specialized feedlots primarily for third parties. Feedlots provide accommodation, health care and animal feeding services based on specialized diets. The Group currently has agricultural operations and investments in Argentina, Brazil, Paraguay and Bolivia.

The business line known as urban property and investments also includes the Group's financial transactions. The Group's Investment and Development Properties business operations are conducted primarily through its subsidiary IRSA and IRSA's principal subsidiary, Alto Palermo S.A. ("APSA"). Through APSA, the Group primarily owns, manages and develops shopping centers across Argentina. APSA has also a direct 20% stake in a credit card company. Through IRSA, the Group primarily owns, manages and develops a portfolio of office and other rental properties in Buenos Aires, the capital of Argentina. Through IRSA or APSA, the Group also develops residential properties for sale. The Group, through IRSA, is also involved in the operation of branded hotels. 2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements (Continued)

The Condensed Interim Consolidated Financial Statements corresponding to the nine-month periods ended as of March 31, 2014 and 2013 have not been audited. The Company's management believes they include all necessary adjustments to fairly present the results of each period. Results for the nine-month periods ended March 31, 2014 and 2013 do not necessarily reflect proportionally the Company's results for the complete fiscal year.

2.2 Significant Accounting Policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Consolidated Financial Statements are consistent with those applied in the preparation of the information under IFRS as of June 30, 2013. Most significant accounting policies are described in note 2 included in the Consolidated Financial Statements as of June 30, 2013 and 2012.

2.3 Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Consolidated Financial Statements, the significant judgments made by Management in applying the Group's accounting policies and the main sources of uncertainty were the same applied by the Group in the preparation of the annual consolidated financial statements for the year ended as of June 30, 2013, save for changes in accrued income tax, provision for legal claims and allowance for doubtful accounts.

2.4 Comparative information

Amounts as of March 31, 2013 and June 30, 2013, which are disclosed for comparative purposes have been taken from the Condensed Interim Consolidated Financial Statements as of such dates. The financial statements originally issued have been subject to certain reclassifications required in order to present these figures comparatively with this period.

2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements (Continued)

During the period, the Argentine Peso devalued against the US\$ and other currencies by around 32%, which has an impact in comparative information presented in these Financial Statements, due mainly to the currency exposure of our income and costs of Agricultural Business and of income from urban property and investments business line, especially from the “office and other rental properties” segment, and our net assets and liabilities in foreign currency as detailed in Note 40.

3. Seasonal effects on operations

The operations of the Group’s agricultural business are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between February and June every year. Wheat is generally harvested between November and January. In Bolivia, weather conditions make it possible to have two soybeans, corn and barley seasons and, therefore, these crops are harvested in April and October, whereas wheat and sunflower are harvested in August and September, respectively. Other segments of the agricultural business, such as beef cattle and milk production tend to be more stable. However, beef cattle and milk production is generally larger during the second quarter, when conditions are more favorable. In case of sugar cane, harvest and sale take place between May and November of each year. As a result, there may be material fluctuations in the agricultural business results across quarters.

The operations of the Group’s shopping centers are also subject to seasonal effects, which affect the level of sales recorded by lessees. During summer time (January and February), the lessees of shopping centers experience the lowest sales levels in comparison with the winter holidays (July) and December (Christmas) when they tend to record peaks of sales. Apparel stores generally change their collections during the spring and the fall, which impacts positively on shopping mall sales. Sale discounts at the end of each season also affect the business. As a consequence, a higher level of revenues is generally expected in the second half of the year rather than the first in shopping center operations.

5. Financial risk management

The group's diverse activities are exposed to a variety of financial risk: market risk (including foreign currency risk, interest rate risk and price risk) credit risk, liquidity risk and capital risk.

The Condensed Interim Consolidated Financial Statements do not include all the information and disclosures of the risk management, so they should be read together with the annual consolidated financial statements as of June 30, 2013. There have been no changes in the risk management or risk management policies applied by the Group since the fiscal year-end.

Since June 30, 2013 at the date of these financial statements, there have been no significant changes in business or economic circumstances affecting the fair value of the Company's financial assets or liabilities (either measured at fair value or amortized cost), except for our investment in Supertel Hospitality Inc. ("Supertel"), which fair value was affected by the decrease in the market value of its common shares, because of the suspension of dividends' payment. This had been decided in order to fortify its financial situation. Neither have been transfers between the several tiers used in estimating the fair value of the Company's financial instruments.

6. Segment information (Continued)

At the time of assessing the performance of business segments and deciding upon the allocation of resources, the Executive Committee uses information on operating income assets and liabilities of each such segment. In the Unaudited Condensed Consolidated Financial Statements, the transactions and balances between related parties which may affect more than one segment are eliminated. In order to obtain clear information that may be useful for Management's decision making, the Group has defined that, as from the nine-month period ending March 31, 2014, such transactions will not be eliminated for segment reporting purposes.

The comparative information presented as from such period has been adjusted retrospectively for the sake of comparability.

The following tables present reconciliation between the total results of segment operations and the results of operations as per the statement of income. The adjustments relate to the presentation of the results of operations of joint ventures accounted for under the equity method under IFRS and the non-elimination of the inter-segment transactions as explained in the preceding paragraph.

16. Financial instruments by category

Determining fair values

IFRS 9 defines the fair value of a financial instrument as the amount for which a financial asset could be exchanged, or a financial liability settled, between knowledgeable, willing parties in an arm's length transaction. All financial instruments recognized at fair value are allocated to one of the valuation hierarchy levels of IFRS 7. This valuation hierarchy provides for three levels. The initial basis for the allocation is the "economic investment class". Only if this does not result in an appropriate allocation the Company deviates from such an approach in individual cases. The allocation reflects which of the fair values derive from transactions in the market and where valuation is based on models because market transactions are lacking.

In the case of Level 1, valuation is based on non-adjusted quoted prices in active markets for identical financial assets or liabilities that the Group can refer to at the date of the statement of financial position. A market is deemed active if transactions take place with sufficient frequency and in sufficient quantity for price information to be available on an ongoing basis. Since a quoted price in an active market is the most reliable indicator of fair value, this should always be used if available. The financial instruments the Group has allocated to this level mainly comprise equity investments, mutual funds, government bonds and corporate bonds for which quoted prices in active markets are available. In the case of shares, the Group allocates them to this level when either a stock market price is available or prices are provided by a price quotation on the basis of actual market transactions.

16. Financial instruments by category (Continued)

In the case of Level 2, fair value is determined by using valuation methods based on inputs directly or indirectly observable in the market. If the financial instrument concerned has a fixed contract period, the inputs for valuation must be observable for the whole of this period. The financial instruments the Group has allocated to this level mainly comprise interest rate swaps and foreign currency future contracts.

In the case of Level 3, the Group uses valuation techniques not based on inputs observable in the market. This is only permissible insofar as no observable market data are available. The inputs used reflect the Group's assumptions regarding the factors which market players would consider in their pricing. The Group uses the best available information for this, including internal company data. The financial instruments that the Group has allocated to this level mainly comprise shares and warrants of Supertel.

As of March 31, 2014, the Group has determined that Arcos del Gourmet S.A.'s stock option is a Level 3 financial instrument and its fair value at the end of the period is zero.

Since June 30, 2013, there have been no transfers between the several tiers used in estimating the fair value of the Group's financial instruments, or reclassifications among their respective categories.

The Group's Finance Division has a team in place in charge of estimating valuation of financial assets required to be reported in the financial statements, including the fair value of Level 3 instruments. The team directly reports to the Chief Financial Officer (CFO).

The CFO and the valuation team discuss the valuation methods and results upon the acquisition of an asset and, if necessary, on a quarterly basis, in line with the Group's quarterly reports.

According to the Group's policy, transfers among the several categories of valuation tiers are recognized when occurred, or when there are changes in the prevailing circumstances requiring the transfer.

16. Financial instruments by category (Continued)

The following table presents the changes in Level 3 instruments for the nine-month period ended March 31, 2014:

	Call option for the shares of Arcos	Warrants of Supertel	Shares of Supertel	Total
Balance as of June 30, 2013	-	16,949	139,120	156,069
Acquisition				-
Total losses for the period (i)	-	(16,949)	(81,997)	(98,946)
Balance as of March 31, 2014	-	-	57,123	57,123

(i) The loss is not realized as of March 31, 2014 and is accounted for under “Other financial results” in the Statement of Income (Note 33)

Upon initial recognition (January, 2012), the consideration paid for the Shares and Warrants was assigned to both instruments based on the relative fair values of those instruments upon acquisition. The fair value of these instruments exceeded the transaction price and were determined using a valuation technique that uses inputs not observable in the market. As a result of the use of this technique, the Group has not recognized a gain at the time of initial recognition in the amount of US\$ 7.9 million.

On March 31, 2014, the fair value of warrants of Supertel as determined pursuant to the indicated method was lower than the gain not recognized upon initial recording; therefore, warrants are valued at zero.

According to Group estimates, all factors being constant, a 10% decline in the price of the underlying assets of Level 3 shares and warrants of Supertel (data observed in the market) as of March 31, 2014, would reduce pre-tax income by Ps. 2.6 million.

According to Group estimates, all factors being constant, a 10% increase in the credit spread (data which is not observable in the market) of shares and warrants of Supertel used in the valuation model applied to Level 3 financial instruments as of March 31, 2014, would reduce pre-tax income by Ps. 7.5 million. The rate used as of March 31, 2014 was 14.25%.

16. Financial instruments by category (Continued)

When no quoted prices in an active market are available, fair values (particularly with derivatives) are based on recognized valuation methods. The Company uses a range of valuation models for the measurement of Level 2 and Level 3 instruments, details of which may be obtained from the following table:

(ii) On January 9, 2014, RES entered into a credit facility of up to US\$ 2.0 million with Supertel Hospitality Inc. (SPPR). In the event SPPR successfully carries out an initial public offering not later than April 15, 2014, RES agrees to swap (capitalize) the balance of the loan at such time for shares of SPPR. In the event that SPPR fails to make an initial public offering within the term agreed, RES is entitled to a debt-for-equity swap until July 9, 2015 (subject to any limitation on shareholding that may apply). Since SPPR did not make a share public offering before April 15, 2014, the lending interest rate increased by 12.5% per annum. Subject to the limitations indicated above, RES has the option to capitalize the loan by swapping it into common shares that can be exercised until

July 9, 2015. In such a case, the price at which debt will be swapped by equity shall be the higher of (a) the weighted average price of common shares of the company within a term of 5 days prior to the date RES decides to exercise the debt-for-equity swap option or (b) the higher of market price and book value.

26. Taxation (Continued)

The Group did not recognize deferred income tax assets of Ps. 64.2 million and Ps. 70.1 million as of March 31, 2014 and June 30, 2013, respectively. Although management believes that it will become profitable in the foreseeable future, as a result of the history of recent losses incurred during the development phase of the different Group's business operations and the lack of verifiable and objective evidence due to the limited operating history of the Group itself, the Board of Directors has determined that there is sufficient uncertainty as to the generation of sufficient income to utilize the losses within a reasonable timeframe, therefore, no deferred tax asset is recognized in relation to these losses.

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	March 31, 2014	March 31, 2013
Tax calculated at the tax rates applicable to profits in the respective countries	307,032	(108,484)
Permanent differences:		
Share of loss of associates and joint ventures	24,446	4,825
Unrecognized tax losses	1,088	13,824
Non-taxable income	23,888	62,760
Non-deductible items	-	(3,237)
Non-punishable items	-	(1,166)
Others	1,519	731
Income tax expense	357,973	(30,747)

41. Incident

On February 5, 2014 there was a widely known fire in Iron Mountain's warehouse, which company is a supplier of the Group and where Group's documentation was being kept. To the date of these financial statements, the Group is waiting for the company that experienced the fire to report whether the documentation submitted has been actually affected by the fire and its condition after the accident. Nevertheless, based on the internal review carried out by the Group, duly reported to the Argentine Securities Exchange Commission on February 12, 2014, the information kept at the Iron Mountain premises that were on fire do not appear to be sensitive or capable of affecting normal operations.

42. Ongoing litigation with the city of Villa Mercedes

The Misdemeanours Court Judge to the city of Villa Mercedes, Province of San Luis, issued resolution No. 2980/08 about the situation of Cactus in such city, determining that the Company had a 36-month term to present its plan to conclude operations and transfer the establishment located on the Provincial Route 2B. Furthermore, it was determined that in such 36-month period, the Company should not host over 18,500 head of cattle.

Such brief was appealed by Cactus before the Municipality, which was negatively answered on April 7, 2009, by means of Decree No. 0662/09, thus ratifying the Misdemeanour Court Judge's ruling. Under the administrative justice of the city of Villa Mercedes, the Company would have until April 7, 2012 to present its plan to conclude operations and the transfer of the establishment.

As an answer to this Decree Cactus has filed appeals with the High Court of Justice of the Province of San Luis, objecting the lawfulness of the rulings entered by the Misdemeanours Court Judge of Villa Mercedes. This filing was denied by the High Court of Justice, and the Company lodged an appeal of unconstitutionality against this decision, whose resolution, as of the date of issuance of these financial statements, is pending. Irrespective of the above, the Company is carrying out a plan to improve its relationship with the community of Villa Mercedes, and to strengthen the company's position as a valuable member in the social and economic community in the region, whose final purpose is that the scheduled moving be reconsidered by municipal authorities.

As part of this plan, on January 27, 2012, Cactus filed with the Municipality of Villa Mercedes a report on the activities performed, the economic and social relevance of the exploitation carried out by Cactus and the special features, complexities and terms of a possible relocation. Such filing received by the Municipality of Villa Mercedes was opportunely forwarded to the Court of Misdemeanors for notification purposes. Additionally, in December 2012, Cactus filed all necessary documentation for renewal of municipal authorization.

Later, on November 13, 2013 and for purposes of amending previous filings, the company requested that enforcement of judgment be suspended and that an authorization be granted to be able to operate until December 2015 with reduced capacity, while it took the relevant steps. In the absence of an answer from Villa Mercedes Municipality, in January 2014, a new request was filed for the Municipality to make a decision on the original request.

As of the balance sheet date, the competent authorities are yet to render a decision on the request.

• On April 11, 2014, Cresud reported on a potential repurchase of shares intended to curb the drop in prices and reduce fluctuations on the Company's shares and ADSs and strengthen its position in the market, thus minimizing potential temporary imbalances that may arise between supply and demand. On that same date, the Shareholders' Meeting approved a partial release of the account "Reserve for new projects" in an amount of up to Ps. 200 million, in order to appropriate such amount of money to set up a reserve entitled "Reserve for the repurchase of securities". In view of this measure, the Shareholders' Meeting approved the repurchase of securities issued by the Company in an amount of Ps. 200 million, to be carried out before December 31, 2014, which period may be extended for an identical term. - (v) Term for the repurchase transactions to be carried out: up to December 31, 2014.
- (vi) Source of funds: The repurchase transactions shall be funded from optional reserves set up by the Company.

On the balance sheet date, 73,862 shares were repurchased for an amount of US\$ 0.7 million and Ps. 0.2 million, in compliance with the terms and conditions of the share repurchase plan. 1. General information

1.1 The Company's business and general information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria ("Cresud" or the "Company") was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

Cresud is a company organized and domiciled in the Republic of Argentina. The address of its registered office is Moreno 877, 23rd Floor, Buenos Aires, Argentina.

These Unaudited Condensed Interim Separate Financial Statements have been approved for issue by the Board of Directors on May 12, 2014.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statement

2.1. Basis of preparation

These Unaudited Condensed Interim Separate Financial Statements of the Company have been prepared in accordance with Technical Resolutions No. 26 (RT 26) of Argentine Federation of Professional Councils of Economic Sciences ("F.A.C.P.C.E.", as per its Spanish acronym) and IAS 34 "Interim Financial Reporting".

Furthermore, some additional questions were included as required by the Business Companies Act and/or regulations of the CNV, including supplementary information provided in the last paragraph of section 1, Chapter III, Title IV of General Ruling 622/13 of the CNV. Such information is included in the Notes to the Unaudited Condensed Interim Separate Financial Statements according to IFRS.

These Unaudited Condensed Interim Separate Financial Statements should be read together with the annual Separate Financial Statements of the Company as of June 30, 2013. These Unaudited Condensed Interim Separate Financial Statements are expressed in thousands of Argentine Pesos.

The Unaudited Condensed Interim Separate Financial Statements for the nine-month periods ended March 31, 2014 and 2013 have not been audited. The Company's management believes they include all necessary adjustments to fairly present the results of each period. Results for the nine-month periods ended March 31, 2014 and 2013 do not necessarily reflect proportionally the Company's results for the complete fiscal years.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statement (Continued)

2.2. Significant accounting policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Separate Financial Statements are consistent with those applied in the preparation of the information under RT 26 as of June 30, 2013. Most significant accounting policies are described in Note 2 to the annual Consolidated Financial Statements.

2.3. Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Separate Financial Statements, the significant judgments made by Management in applying the Company's accounting policies and the main sources of uncertainty were the same applied by the Company in the preparation of the annual financial statements relative to the year ended June 30, 2013, except for changes in accrued income tax, provision for legal claims and allowance for doubtful accounts.

2.4. Comparative information

Amounts as of March 31, 2013 and June 30, 2013, which are disclosed for comparative purposes have been taken from the condensed interim separate financial statements as of such dates. These financial statements originally issued have been subject to certain reclassifications required in order to present these figures comparatively with this period.

During the period, the Argentine Peso devalued against the US\$ and other currencies by around 32%, which has an impact in comparative information presented in these Financial Statements, due mainly to the currency exposure of our income and our assets and liabilities in foreign currency as detailed in Note 34.

3. Seasonal effects on operations

The operations of the Company are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between February and June every year. Wheat is generally harvested between November and January. However, milk production is generally larger during the second quarter, when conditions are more favorable. As a result, there may be material fluctuations in the agricultural business results across quarters.

4. Acquisitions and disposals

Sale of receivables with subsidiaries

On September 30, 2013, the Company sold receivables due from Agropecuaria Acres de Sud S.A., Yuchán Agropecuaria S.A., Yatay Agropecuaria S.A. and Ombú Agropecuaria S.A. to Doneldon, for a total amount of US\$ 12.4 million, which were capitalized on that same date.

See summary of acquisition and additional disposal of the Company for the nine-month period ended March 31, 2014 in Note 4 to Unaudited Condensed Interim Consolidated Financial Statements.

5. Financial risk management and fair value estimates

5.1. Financial risk

The Company's activities are exposed to several financial risks, namely: market risk (including exchange rate risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

Note 5 to the annual Consolidated Financial Statements provide information on financial risk management as of June 30, 2013 and 2012 and July 1, 2011. Since June 30, 2013 there have been no changes in the risk management or risk management policies applied by the Company.

5.2. Fair value estimates

Since June 30, 2013 there have been no significant changes in business or economic circumstances affecting the fair value of the Company's financial assets or liabilities (either measured at fair value or amortized cost). Nor there have been transfers between the several tiers used in estimating the fair value of the Company's financial instruments, or reclassifications among their respective categories.

During the nine-month period our revenues were 35.1% higher than in the same period of the previous fiscal year. This was mainly due to a 52.0% increase in the agricultural segment, explained by higher sales of grains, beef cattle and milk, along with a 22.2% increase in revenues from the urban segment.

Gross profit rose 49.7% due to an increase of 34.9% in the urban segment, accompanied by an increase of 116.8% in gross profit from the agricultural segment, mainly grains, sugarcane and beef cattle, which recorded an increase in the fair value of biological assets and higher activity in the agro-industrial segment. The increase in gross profit outpaced the higher selling and administrative expenses, leading to an operating income equal to ARS 47.2 million attributable to the agricultural segment for the nine-month period of fiscal year 2014, while the urban segment's operating results were ARS 892.2 million (a 18.4% increase). Consequently, Income before financial results and income tax grew by 36.2%, reaching ARS 1,045.9 million for the first nine months of fiscal year 2014.

The strong depreciation of the Argentine Peso against the U.S Dollar experienced during the past year had a negative impact on our net financial results, which went down from a loss of ARS 474.0 million in 9M 2013 to a loss of ARS 1,931.4 million during this period.

Therefore, a net loss of ARS 524.6 million was recorded, out of which a loss of ARS 494.2 million is attributable to Cresud's shareholders.

Grains and Sugarcane

Weather conditions improved at the beginning of the season, allowing us to expect a 2013/2014 season with good results. To date, we have completed harvesting of wheat, sunflower and sorghum in Argentina. Soybean harvesting has started, with a 42% degree of progress; on the other hand, corn harvesting has recently started, reaching a 28% degree of progress. It should be noted that 80% of the corn planted is late corn; therefore, harvesting of this crop will start in June. In our farms of Bolivia, where we are able to carry out two planting and harvesting cycles per year, we have completed harvesting of our winter crops, including soybean, corn and wheat. On the other hand, harvesting of summer soybean crops has reached 97%, whereas corn harvesting shows a 47% degree of progress. Soybean harvesting activities in our farms of Paraguay have progressed 17%, whereas in Brazil, the harvesting of soybean has reached 95% and the harvesting of corn has reached 60%. Moreover, sugarcane continues to develop in these farms.

During this nine-month period higher revenues have been recorded in the grain segment, mainly due to higher prices than those for the same period of the previous year and a rise in soybean sales (additional 24,000 tons).

Gross profit from the Grains segment for this period shows a significant increase of 136.2% compared to the same nine-month period of the previous fiscal year. This is explained mainly by the higher fair value of biological assets reflecting better yields and higher prices of our products.

In this sense, the fair value of biological assets reached ARS 764.6 million thanks to the higher volumes of wheat and late corn production throughout the entire portfolio and a rise in the estimates of soybean and corn production for this season, mainly in Argentina.

Higher administrative expenses are recorded due to an increase in salaries and in the proportional allocation to the grain segment compared to other segments.

The improvement in Gross profit was offset by a decrease in Other operating results, net, originated in derivative transactions that adversely impacted on the segment.

Mainly due to the higher gross profit, income from this segment totaled ARS 70.1 million.

The sugarcane segment shows a gross loss of ARS 19.7 million caused by a change in our output estimations in Bolivia and Brazil; therefore, we recognized a lower fair value of biological assets.

Area in Operation – Grains (hectares) <u>1</u>	As of 3/31/14	As of 3/31/13	YoY var

Own farms and farms under concession leased to third parties	8,101	18,223	-55.5	%
Total Area Assigned to Grain Production	212,930	202,555	5.1	%

The area in operation for the Grains segment increased by 5.1%, reaching 212,930 hectares. This was mainly due to a reduction in the area in operation in our own farms, close to 3.4%, and the smaller area consisting of farms leased to third parties (55.5%) while the area in operation in leased farms grew by 28.5% accompanied by an increase in the area in operation in farms under concession (134.3%).

The area of own farms decreased mainly due to the sale of farms during the past year, offset by an expansion in productive areas in Argentina.

Compared to the previous quarter we have reduced the planted area by approximately 8,000 hectares. This reflects, on the one hand, a fall of 4,000 hectares in the area planted in Argentina due to the drought in the north region of the country, including a surface area of 1,600 hectares in which there will be no double harvesting and a reduction of 700 hectares in the area of leased farms. On the other hand, certain farms in Bolivia will not engage in double harvesting, generating a decrease of 2,500 hectares in the area planted in Bolivia.

During this season we have expanded the area of leased farms assigned to agricultural production in Argentina and Brazil. We expect a good season, and for such reason we increased the area by over 12,000 hectares.

We have increased the area assigned to agricultural production in the farms under the long term concession granted to Cresud in the Province of Salta, where we operate nearly 21,000 hectares. This is offset by a reduction in the area of farms leased to third parties.

¹ Includes surface area under double cropping totaling 15,750 hectares and 17,639 hectares as of March 31, 2014 and 2013 respectively, our proportional interest in AgroUranga and all of Cresca S.A.'s farms

During this nine-month period, beef cattle production was lower than in the same nine-month period of the previous year (-1.1%), while cattle sales grew by 19.9%.

The higher number of tons sold and cattle beef prices caused sales from this segment to rise by 14.1%; in turn, the changes in the value of biological assets and agricultural produce caused results to rise by 69.3%. Consequently, gross profit reached ARS 41.1 million, a 258% increase.

Profit from this segment was ARS 7.1 million for the nine-month period of 2014, offsetting the losses recorded in previous quarters.

Milk Production / Milking Cow / Day (liters)	20.3	20.5	-1.2	%	20.7	21.1	-1.9	%

We have increased milk production by 6.1% compared to the same period of the previous fiscal year hand in hand with the number of milking cows per day. The level of production per milking cow per day is stable. Therefore, the levels of more than 20 liters by milking cow per day still exceed the targets set by us following the consolidation of our operations in our state-of-the-art milking facility.

There has been an increase in revenues from sales of this segment compared to the same quarter of the previous fiscal year, thanks to an increase in production and higher sales of milk, along with better prices. On the other hand, the costs in this segment increased due to inflation, resulting in an operating profit for the segment of ARS 0.8 million.

We perform our milking business in El Tigre farm. The change in the area assigned to milking cows is explained by a variation in the areas planted with crops and pastures.

In this segment we report the results from the lease of farms, mainly developed in our Santa Bárbara and La Gramilla farms. We have reduced leased acreage due to the non-renewal of lease agreements, resulting in a decrease in income as compared to the same period of the previous fiscal year. For this reason, and also due to higher costs, there has been a deterioration in this segment.

Evolution of Exchange Rate

During the last months, the depreciation of the Argentine Peso to the U.S. Dollar accelerated as compared to the previous months. In the first nine-month period of fiscal year 2014 (from July 2013 to March 2014) the Argentine currency depreciated 49%, whereas in the same period of the previous fiscal year, it had depreciated 13%. Given that a significant portion of our debt is denominated in USD, this process had an adverse impact on our Financial Results. Most of our assets are positive correlated to the dollar; however, in our financial statements they are valued at historical cost plus investments, and are not affected by any kind of revaluation due to the fluctuation of market prices.

Prospects for the next fiscal year

After two years of experiencing severe droughts in the region, the 2014 season shows a better outlook. While at the start of the planting season there were signs of drought, in the last months rains started to fall in Salta (north of Argentina) and Paraguay, hence the planting season went back to normal. If this level of rainfall continues, the harvest will generate regular yields and higher production levels than in the past fiscal year. On the other hand, in view of the evolution of the exchange rate in Argentina in the last months, we expect better results in our agricultural segments. We expect to sow approximately 213,000 hectares in the group of countries of the region where we have operations. In terms of prices, the sector is withstanding the juncture of a great U.S. harvest; therefore, prices continue to be depressed but stable. We will keep track of the evolution of commodity prices in calendar year 2014, in light of the seeding estimations in the USA.

As concerns our beef cattle business in Argentina, during this season we stabilized production as weather conditions in Salta improved, whereas cattle prices stay on upward trend. On the other hand, we expect sound prices for the milk business and a competitive margin from our “El Tigre” dairy facility. In addition, we will continue to roll out our strategy of supplementing agriculture in our own farms with agriculture in leased farms and farms under concession. We have increased the area of leased farms by 10%, relocating part of our portfolio in better areas. We expect to obtain good results from this business if the weather continues to be favorable throughout the second part of the 2014 season. Our feedlot and meat packing businesses, which we hold through Cactus Argentina, have started to show positive results, after several months of losses. We hope that market conditions will further improve in the short or medium term, so that the segment becomes as profitable as it was.

As concerns land transformation and value-adding activities, we will make progress in the development of our farms in Argentina, Paraguay and Brazil, where we plan to transform approximately 21,000 hectares that will be placed into production during this fiscal year and in 2015. We remain watchful of sale opportunities that may arise, by disposing of those farms that have reached their highest degree of appreciation. In addition, we will continue to analyze opportunities in other countries of the region, as we plan to form a regional portfolio with high potential for development and value enhancement.
