Forward-looking Statements

This announcement and other information provided from time to time by the company contain historical information as well as forward-looking statements about the company, the premium wine industry and general business and economic conditions. Such forward-looking statements include, for example, projections or predictions about the company's future growth, consumer demand for its wines, including new brands and brand extensions, margin trends, anticipated future investment in vineyards and other capital projects, the premium wine grape market and the premium wine industry in general. Actual results may differ materially from the company's present expectations. Among other things, a soft economy, a downturn in the travel and entertainment sector, risk associated with continued conflict in the Middle East, reduced consumer spending, or changes in consumer preferences could reduce demand for the company's wines. Similarly, increased competition or changes in tourism to the company's California properties could affect the company's volume and revenue growth outlook. The supply and price of grapes, the company's most important raw material, is beyond the company's control. A shortage of grapes might constrict the supply of wine available for sale and cause higher grape costs, putting more pressure on gross profit margins. A surplus of grapes might allow for greater sales and lower grape costs, but it might also result in more competition and pressure on selling prices or marketing spending. Interest rates and other business and economic conditions could increase significantly the cost and risks of projected capital spending. The separation of the company into two operating units may impair management's ability to focus on other needed areas of business execution. There are also significant risks associated

Edgar Filing: MONDAVI ROBERT CORP - Form DEFA14A

with separating the company's sizeable sales force into two operating units. Some of the company's strategic alternatives would involve lay offs and significant restructuring changes which could materially impair future earnings. For additional cautionary statements identifying important factors that could cause actual results to differ materially from such forward-looking information, please refer to Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in the company's Annual Report on Form 10-K for the fiscal year ended June 30, 2004, on file with the Securities and Exchange Commission. For these and other reasons, no forward-looking statement by the company can or should be taken as a guarantee of what will happen in the future.
