Brazil
(Name, telephone, e-mail and/or facsimile number and
address of company contact person)**

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class:

Name of each exchange on which registered:

Edgar Filing: PETROBRAS INTERNATIONAL FINANCE CO - Form 20-F

Petrobras Common Shares, without par value	New York Stock Exchange*
Petrobras American Depositary Shares, or ADSs (evidenced by American Depositary Receipts, or ADRs), each representing 2 Common Shares	New York Stock Exchange
Petrobras Preferred Shares, without par value*	New York Stock Exchange*
Petrobras American Depositary Shares (as evidenced by American Depositary Receipts), each representing 2 Preferred Shares	New York Stock Exchange
6.125% Global Notes due 2016, issued by PifCo	New York Stock Exchange
5.875% Global Notes due 2018, issued by PifCo	New York Stock Exchange
7.875% Global Notes due 2019, issued by PifCo	New York Stock Exchange

* Not for trading, but only in connection with the registration of American Depositary Shares pursuant to the requirements of the New York Stock Exchange.

Securities registered or to be registered pursuant to Section 12(g) of the Act: None
Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

Title of each class:

9.750% Senior Notes due 2011, issued by PifCo
9.125% Global Notes due 2013, issued by PifCo
7.75% Global Notes due 2014, issued by PifCo
8.375% Global Notes due 2018, issued by PifCo

The number of outstanding shares of each class of stock of Petrobras and PifCo as of December 31, 2008 was:

5,073,347,344 Petrobras Common Shares, without par value
3,700,729,396 Petrobras Preferred Shares, without par value
300,050,000 PifCo Common Shares, at par value U.S.\$1 per share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined by Rule 405 of the Securities Act.

Yes No

If this report is an annual or transitional report, indicate by check mark if the registrant is not required to file reports pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). N/A

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [Petrobras] Accelerated filer Non-accelerated filer [PifCo]

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

FORWARD-LOOKING STATEMENTS

Many statements made in this annual report are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act), that are not based on historical facts and are not assurances of future results. Many of the forward-looking statements contained in this annual report may be identified by the use of forward-looking words, such as believe, expect, anticipate, should, planned, estimate and potential, among others. We have made forward-looking statements that address, among other things, our:

- regional marketing and expansion strategy;
- drilling and other exploration activities;
- import and export activities;
- projected and targeted capital expenditures and other costs, commitments and revenues;
- liquidity; and
- development of additional revenue sources.

Because these forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements. These factors include, among other things:

- our ability to obtain financing;
- general economic and business conditions, including crude oil and other commodity prices, refining margins and prevailing exchange rates;
- global economic conditions and the current global credit crisis;
- our ability to find, acquire or gain access to additional reserves and to successfully develop our current ones;
- uncertainties inherent in making estimates of our oil and gas reserves including recently discovered oil and gas reserves;
- competition;
- technical difficulties in the operation of our equipment and the provision of our services;
- changes in, or failure to comply with, laws or regulations;
- receipt of governmental approvals and licenses;

international and Brazilian political, economic and social developments; military operations, acts of terrorism or sabotage, wars or embargoes;

the cost and availability of adequate insurance coverage; and

other factors discussed below under Risk Factors.

These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially from those expressed or forecast in any forward-looking statements as a result of a variety of factors, including those in Risk Factors set forth below.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this annual report. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

The crude oil and natural gas reserve data presented or described in this annual report are only estimates and our actual production, revenues and expenditures with respect to our reserves may materially differ from these estimates.

This is the annual report of both Petróleo Brasileiro S.A. PETROBRAS (Petrobras) and its direct wholly owned Cayman Islands subsidiary, Petrobras International Finance Company (PifCo). PifCo's operations, which consist principally of purchases and sales of crude oil and oil products, are described in further detail below.

Unless the context otherwise requires, the terms Petrobras, we, us, and our refer to Petróleo Brasileiro S.A. PETROBRAS and its consolidated subsidiaries and special purpose companies, including Petrobras International Finance Company. The term PifCo refers to Petrobras International Finance Company and its subsidiaries.

Table of Contents

GLOSSARY OF PETROLEUM INDUSTRY TERMS

Unless the context indicates otherwise, the following terms have the meanings shown below:

ANP	The <i>Agência Nacional de Petróleo, Gás Natural e Biocombustíveis</i> (National Petroleum, Natural Gas and Biofuels Agency), or ANP, is the federal agency that regulates the oil, natural gas and renewable fuels industry in Brazil.
Barrels	Barrels of crude oil.
BSW	Basic sediment and water, a measurement of the water and sediment content of flowing crude oil.
Catalytic cracking	A process by which hydrocarbon molecules are broken down (cracked) into lighter fractions by the action of a catalyst.
Coker	A vessel in which bitumen is cracked into its fractions.
Condensate	Light hydrocarbon substances produced with natural gas, which condense into liquid at normal temperatures and pressures.
Deep water	Between 300 and 1,500 meters (984 and 4,921 feet) deep.
Distillation	A process by which liquids are separated or refined by vaporization followed by condensation.
EWT	Extended well test
FPSO	Floating Production, Storage and Offloading Unit.
FPU	Floating Production Unit.
FSO	Floating Storage and Offloading Unit.
FSRU	Floating Storage and Regasification Unit, a vessel that receives liquefied natural gas and converts it into gas suitable for use or transmission by pipeline.
Heavy crude oil	Crude oil with API density less than or equal to 22°.
Intermediate crude oil	Crude oil with API density higher than 22° and less than or equal to 31°.
Light crude oil	Crude oil with API density higher than 31°.
LNG	Liquefied natural gas.

LPG	Liquefied petroleum gas, which is a mixture of saturated and unsaturated hydrocarbons, with up to five carbon atoms, used as domestic fuel.
NGLs	Natural gas liquids, which are light hydrocarbon substances produced with natural gas, which condense into liquid at normal temperatures and pressures.
Oil	Crude oil, including NGLs and condensates.
Pre-salt reservoir	A geological formation containing oil or natural gas deposits located beneath an evaporitic layer.

Table of Contents

Proved reserves	Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty are recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not escalations based upon future conditions.
Proved developed reserves	Proved developed reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery are included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.
Proved undeveloped reserves	Proved undeveloped reserves are reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion, but do not include reserves attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir. Reserves on undrilled acreage are limited to those undrilled units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units are claimed only where it is demonstrated with certainty that there is continuity of production from the existing productive formation.
SS	Semi-submersible unit.
Ultra-deep water	Over 1,500 meters (4,921 feet) deep.

Table of Contents**CONVERSION TABLE**

1 acre	=	0.0040 km ²	
1 barrel	=	42 U.S. gallons	= Approximately 0.13 t of oil
1 boe	=	1 barrel of crude oil equivalent	= 6,000 cf of natural gas
1 m ³ of natural gas	=	35.315 cf	= 0.0059 boe
1 km	=	0.6214 miles	
1 km ²	=	247 acres	
1 meter	=	3.2808 feet	
1 t of crude oil	=	1,000 kilograms of crude oil	= Approximately 7.5 barrels of crude oil (assuming an atmospheric pressure index gravity of 37° API)

Table of Contents**ABBREVIATIONS**

bbbl	Barrels
bn	Billion (thousand million)
bnbbbl	Billion barrels
bncf	Billion cubic feet
bnm ³	Billion cubic meters

mmboe	Million barrels of oil equivalent
mmboe/d	Million barrels of oil equivalent per day
mmcf	Million cubic feet
mmcf/d	Million cubic feet per day
mmm ³	Million cubic meters
mmm ³ /d	Million cubic meters per day
mmt/y	Million metric tons per year
MW	Megawatts
MWavg	Amount of energy (in MWh) divided by the time (in hours) in which such energy is produced or consumed
MWh	One megawatt of power supplied or demanded for one hour
P\$	Argentine pesos
R\$	Brazilian <i>reais</i>
t	Metric ton
tcf	Trillion cubic feet
U.S.\$	United States dollars
/d	Per day
/y	Per year

Table of Contents

PRESENTATION OF FINANCIAL INFORMATION

In this annual report, references to *real*, *reais* or R\$ are to Brazilian *reais* and references to U.S. dollars or U.S.\$ are to the United States dollars. Certain figures included in this annual report have been subject to rounding adjustments; accordingly, figures shown as totals in certain tables may not be an exact arithmetic aggregation of the figures that precede them.

Petrobras

The audited consolidated financial statements of Petrobras and our consolidated subsidiaries as of December 31, 2008 and 2007, and for each of the three years in the period ended December 31, 2008, and the accompanying notes, contained in this annual report have been presented in U.S. dollars and prepared in accordance with U.S. generally accepted accounting principles, or U.S. GAAP. See Item 5. Operating and Financial Review and Prospects and Note 2(a) to our audited consolidated financial statements. We also publish financial statements in Brazil in *reais* in accordance with the accounting principles required by Law No. 6404/76, as amended, or Brazilian Corporate Law and the regulations promulgated by the *Comissão de Valores Mobiliários* (Brazilian Securities Commission, or the CVM), or Brazilian GAAP, which differs in significant respects from U.S. GAAP.

Certain prior year amounts for 2007, 2006, 2005 and 2004 have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

Our functional currency is the Brazilian *real*. As described more fully in Note 2(a) to our audited consolidated financial statements, the U.S. dollar amounts as of the dates and for the periods presented in our audited consolidated financial statements have been recalculated or translated from the *real* amounts in accordance with the criteria set forth in Statement of Financial Accounting Standards No. 52, or SFAS 52, of the U.S. Financial Accounting Standards Board, FASB. U.S. dollar amounts presented in this annual report have been translated from *reais* at the period-end exchange rate for balance sheet items and the average exchange rate prevailing during the period for income statement and cash flow items.

Unless the context otherwise indicates:

historical data contained in this annual report that were not derived from the audited consolidated financial statements have been translated from *reais* on a similar basis;

forward-looking amounts, including estimated future capital expenditures, have all been based on our Petrobras 2020 Strategic Plan, which covers the period from 2008 to 2020, and on our 2009-2013 Business Plan, and have been projected on a constant basis and have been translated from *reais* in 2009 at an estimated average exchange rate of R\$2.10 to U.S.\$1.00, and future calculations involving an assumed price of crude oil have been calculated using a Brent crude oil price of U.S.\$58 per barrel for 2009, U.S.\$61 per barrel for 2010, U.S.\$72 for 2011, U.S.\$74 for 2012 and U.S.\$68 per barrel for 2013, adjusted for our quality and location differences, unless otherwise stated; and

estimated future capital expenditures are based on the most recently budgeted amounts, which may not have been adjusted to reflect all factors that could affect such amounts.

PifCo

PifCo's functional currency is the U.S. dollar. Substantially all of PifCo's sales are made in U.S. dollars and all of its debt is denominated in U.S. dollars. Accordingly, PifCo's audited consolidated financial statements as of December 31, 2008 and 2007, and for each of the three years in the period ended December 31, 2008, and the accompanying notes contained in this annual report have been presented in U.S. dollars and prepared in accordance with U.S. GAAP and include PifCo's wholly owned subsidiaries: Petrobras Europe Limited, Petrobras Finance Limited, Bear Insurance Company Limited (BEAR) and Petrobras Singapore Private Limited.

Table of Contents

RECENT DEVELOPMENTS

Since December 31, 2008, PifCo has incurred U.S.\$1,500 million of indebtedness through the issuance of notes in the international capital market and U.S.\$4,000 million of indebtedness through various credit facilities. See Item 5.

Operating and Financial Review and Prospects Liquidity and Capital Resources PifCo Long-Term Indebtedness Incurred after December 31, 2008.

On May 19, 2009, we concluded negotiations with China Development Bank for a bilateral loan in the amount of U.S.\$10 billion. The loan will have a tenor of 10 years and the proceeds will be used to finance our 2009-2013 Business Plan and to finance the acquisition of goods and services from Chinese companies.

PRESENTATION OF INFORMATION CONCERNING RESERVES

The estimates of our proved reserves of crude oil and natural gas as of December 31, 2008, included in this annual report have been calculated according to the technical definitions required by the U.S. Securities and Exchange Commission, or the SEC. DeGolyer and MacNaughton provided estimates of most of our net domestic reserves as of December 31, 2008. All reserve estimates involve some degree of uncertainty. See Item 3. Key Information Risk Factors Risks Relating to Our Operations for a description of the risks relating to our reserves and our reserve estimates.

We also file oil and gas reserve estimates with governmental authorities in most of the countries in which we operate. On January 15, 2009, we filed reserve estimates for Brazil with the ANP, in accordance with Brazilian rules and regulations, totaling 11.9 billion barrels of crude oil and condensate and 12.7 trillion cubic feet of natural gas. The reserve estimates we filed with the ANP and those provided herein differ by approximately 27%. This difference is due to (i) the ANP requirement that we estimate proved reserves through the technical abandonment of production wells, as opposed to limiting reserve estimates to the life of our concession contracts as required by Rule 4-10 of Regulation S-X and (ii) different technical criteria for booking proved reserves, including the use of 3-D seismic data to establish proved reserves in Brazil and the use of

average oil prices as opposed to year-end prices to determine the economic producibility of reserves in Brazil.

We also file reserve estimates from our international operations with various governmental agencies under the guidelines of the Society of Petroleum Engineers, or SPE. The aggregate reserve estimates from our international operations, under SPE guidelines, amounted to 0.497 billion barrels of crude oil and NGLs and 2,967 billion cubic feet of natural gas, which is approximately 8.24% higher than the reserve estimates calculated under Regulation S-X, as provided herein. This difference occurs because, unlike Regulation S-X, the SPE's technical guidelines allow for the booking of our reserves in Nigeria based on certain oil recovery techniques, such as fluid injection, based on analogous fields.

In December 2008, the SEC adopted revisions to its oil and gas reporting rules in order to modernize and update the oil and gas disclosure requirements. The changes bring the reporting guidance up to date with advances made in the industry around oil and gas reserves determinations. We are studying the impact of the new SEC guidelines for reporting of our oil and gas proved reserves. The new SEC guidelines have not gone into effect and have not been used in the determination of reserves for year-end 2008.

Table of Contents**PART I****Item 1. Identity of Directors, Senior Management and Advisers**

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information**Selected Financial Data***Petrobras*

The following tables set forth our selected consolidated financial data, presented in U.S. dollars and prepared in accordance with U.S. GAAP. The data for each of the five years in the period ended December 31, 2008 has been derived from our audited consolidated financial statements, which were audited by KPMG Auditores Independentes for the years ended December 31, 2008, 2007 and 2006 and by Ernst & Young Auditores Independentes S/S for each of the years ended December 31, 2005 and 2004. The information below should be read in conjunction with, and is qualified in its entirety by reference to, our audited consolidated financial statements and the accompanying notes and Item 5. Operating and Financial Review and Prospects.

Certain prior year amounts for 2007, 2006, 2005 and 2004 have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

Table of Contents**Exchange Rates**

Subject to certain procedures and specific regulatory provisions, there are no limitations to the purchase and sale of foreign currency and the international transfer of *reais* as long as the underlying transaction is valid. Foreign currencies may only be purchased through financial institutions domiciled in Brazil and authorized to operate in the exchange market. We cannot predict whether the Central Bank or the Brazilian government will continue to let the *real* float freely or will intervene in the exchange rate market through a currency band system or otherwise.

The *real* appreciated 8.1% in 2004 against the U.S. dollar and continued to appreciate 11.8% in 2005, 8.7% in 2006 and 17.2% in 2007 and 10.1% in the first half of 2008. Beginning in the second half of 2008, the *real* greatly depreciated against the U.S. dollar. The *real* depreciated 31.9% against the U.S. dollar in 2008. As of May 20, 2009, the *real* has appreciated to R\$2.020 per U.S.\$1.00, representing an appreciation of approximately 13.6% in 2009 year-to-date. The *real* may depreciate or appreciate substantially in the future. See Risk Factors Risks Relating to Brazil.

The following table provides information on the selling exchange rate, expressed in *reais* per U.S. dollar (R\$/U.S.\$), for the periods indicated. The table uses the commercial selling rate prior to March 14, 2005.

	(R\$/U.S.\$)			Period End
	High	Low	Average(1)

- (1) Annual average exchange rates represent the average of the month-end exchange rates during the relevant period. Monthly average exchange rates represent the average of the exchange rates at the close of trading on each business day during such period.

Brazilian law provides that, whenever there is a serious imbalance in Brazil's balance of payments or there are serious reasons to foresee

a serious imbalance, temporary restrictions may be imposed on remittances of foreign capital abroad. See Risk Factors Risks Relating to Brazil.

Table of Contents

RISK FACTORS

Risks Relating to Our Operations

Substantial or extended declines and volatility in the international prices of crude oil, oil products and natural gas may have a material adverse effect on our income

The majority of our revenue is derived primarily from sales of crude oil and oil products and, to a lesser extent, natural gas. We do not, and will not, have control over the factors affecting international prices for crude oil, oil products and natural gas. The average price of Brent crude, an international benchmark oil, was approximately U.S.\$96.99 per barrel for 2008, U.S.\$72.52 per barrel for 2007 and U.S.\$65.14 per barrel for 2006, and the price of Brent crude was U.S.\$41.76 per barrel on April 30, 2009. Changes in crude oil prices typically result in changes in prices for oil products and natural gas.

Historically, international prices for crude oil, oil products and natural gas have fluctuated widely as a result of many factors. These factors include:

global and regional economic and geopolitical developments in crude oil producing regions, particularly in the Middle East;

the ability of the Organization of Petroleum Exporting Countries (OPEC) to set and maintain crude oil production levels and defend prices;

global and regional supply and demand for crude oil, oil products and natural gas;

competition from other energy sources;

domestic and foreign government regulations; and

weather conditions.

Volatility and uncertainty in international prices for crude oil, oil products and natural gas may continue. Substantial or extended declines in international crude oil prices may have a material adverse effect on our business, results of operations and financial condition, and the value of our proved reserves. Significant decreases in the price of crude

oil may cause us to reduce or alter the timing of our capital expenditures, and this could adversely affect our production forecasts in the medium term and our reserve estimates in the future. In addition, our pricing policy in Brazil is intended to be at parity with international product prices over the long term. In general we do not adjust our prices for diesel, gasoline and LPG during periods of volatility in the international markets. As a result, material rapid or sustained increases in the international price of crude oil and oil products may result in reduced downstream margins for us, and we may not realize all the gains that our competitors realize in periods of higher international prices.

Our ability to achieve our long-term growth objectives depends on our ability to discover additional reserves and successfully develop them, and failure to do so could prevent us from achieving our long-term goals for growth in production.

Our ability to achieve our long-term growth objectives, including those defined in our 2009-2013 Business Plan, is highly dependent upon our ability to obtain new concessions through new bidding rounds and discover additional reserves, as well as to successfully develop our existing reserves. We will need to make substantial investments to achieve the growth targets set forth in our 2009-2013 Business Plan and we cannot assure you we will be able to raise the required capital.

Further, our competitive advantage in bidding rounds for new concessions in Brazil has diminished over the years as a result of the increased competition in the oil and gas sector in Brazil. In addition, our exploration activities expose us to the inherent risks of drilling, including the risk that we will not discover commercially productive crude oil or natural gas reserves. The costs of drilling wells are often uncertain, and numerous factors beyond our control (such as unexpected drilling conditions, equipment failures or accidents, and shortages or delays in the availability of drilling rigs and the delivery of equipment) may cause drilling operations to be curtailed, delayed or cancelled. These risks are heightened when we drill in deep and ultra-deep water. Deep and ultra-deepwater drilling represented approximately 35% of the exploratory wells we drilled in 2008.

Table of Contents

Unless we conduct successful exploration and development activities or acquire properties containing proved reserves, or both, and are able to raise the necessary capital to fund these activities, our proved reserves will decline as reserves are extracted. If we fail to gain access to additional reserves we may not achieve our goals for production growth for 2009 through 2013 and our results of operations and financial condition may be adversely affected.

The current global financial crisis and uncertain economic environment have led to lower oil prices that, if sustained, may reduce our cash flow and make it difficult for us to achieve our growth objectives as defined in our 2009-2013 Business Plan.

The current global financial crisis and uncertain economic environment that worsened in the second half of 2008 have led to a worldwide decrease in demand for oil products. As a result, prices for oil products have fallen and our cash flows have been reduced. If oil prices remain low, we may be required to revise our growth objectives, particularly in light of substantial decreases in the availability of credit in the capital markets. The global financial and economic situation may also have a negative impact on third parties with whom we do, or may do, business. Any of these factors may affect our results of operations, financial condition and liquidity.

We do not own any of the crude oil and natural gas reserves in Brazil.

A guaranteed source of crude oil and natural gas reserves is essential to an oil and gas company's sustained production and generation of income. Under Brazilian law, the Brazilian government owns all crude oil and natural gas reserves in Brazil and the concessionaire owns the oil and gas it produces. We possess the exclusive right to develop our reserves pursuant to concession agreements awarded to us by the Brazilian government and we own the hydrocarbons we produce under the concession agreements, but if the Brazilian government were to restrict or prevent us from exploiting these crude oil and natural gas reserves, our ability to generate income would be adversely affected.

Our crude oil and natural gas reserve estimates involve some degree of uncertainty, which could adversely affect our ability to generate income.

The proved crude oil and natural gas reserves set forth in this annual report are our estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty to be recoverable from known reservoirs under existing economic and operating conditions (i.e., prices and costs as of the date the estimate is made). Our proved developed crude oil and natural gas reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. There are uncertainties in estimating quantities of proved reserves related to prevailing crude oil and natural gas prices applicable to our production, which may lead us to make revisions to our reserve estimates. Downward revisions in our reserve estimates could lead to lower future production, which could have an adverse effect on our results of operations and financial condition.

We may not have sufficient resources to support future exploration, production and development activities in our newly discovered pre-salt reservoirs.

Exploiting our oil and gas discoveries in the pre-salt reservoirs will require substantial additional amounts of capital, human resources and a broad range of offshore oil services. A primary operational challenge will be increasing our drilling rig fleet. The availability of existing rigs is limited, as is shipyard capacity to build new drilling units. We are continually forced to prioritize between development wells and exploration wells, and we may not be able to secure as many drilling rigs as we will require to meet our exploration, production and development goals with respect to our pre-salt reservoirs.

We are subject to numerous environmental and health regulations that have become more stringent in the recent past and may result in increased liabilities and increased capital expenditures.

Our activities are subject to a wide variety of federal, state and local laws, regulations and permit requirements relating to the protection of human health and the environment, both in Brazil

Table of Contents

and in other jurisdictions in which we operate. In Brazil, we could be exposed to administrative and criminal sanctions, including warnings, fines and closure orders for non-compliance with these environmental regulations, which, among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations. We have experienced oil spills in the past that resulted in fines by various state and federal environmental agencies, and several civil and criminal proceedings and investigations. See Item 8. Financial Information Legal Proceedings. Waste disposal and emissions regulations may also require us to clean up or retrofit our facilities at substantial cost and could result in substantial liabilities. The *Instituto Brasileiro do Meio Ambiente e dos Recursos Naturais Renováveis* (Brazilian Institute of the Environment and Renewable Natural Resources, or IBAMA) routinely inspects our oil platforms in the Campos Basin, and may impose fines, restrictions on operations or other sanctions in connection with its inspections. In addition, we are subject to environmental laws that require us to incur significant costs to cover damage that a project may cause to the environment. These additional costs may have a negative impact on the profitability of the projects we intend to implement or may make such projects economically unfeasible.

As environmental regulations become more stringent, and as new laws and regulations relating to climate change, including carbon controls, become applicable to us, it is probable that our capital expenditures for compliance with environmental regulations and to effect improvements in our health, safety and environmental practices will increase substantially in the future. In addition, because our capital expenditures are subject to approval by the Brazilian government, increased expenditures to comply with environmental regulations could result in reductions in other strategic investments. Any substantial increase in expenditures for compliance with environmental regulations or reduction in strategic investments may have a material adverse effect on our results of operations or financial condition.

We may incur losses and spend time and money defending pending litigations and arbitrations.

We are currently a party to numerous legal proceedings relating to civil, administrative, environmental, labor and tax claims filed against us. These claims involve substantial amounts of money and other remedies. Several individual disputes account for a significant part of the total amount of claims against us. For example, on the grounds that drilling and production platforms may not be classified as sea-going vessels, the Brazilian Revenue Service asserted that overseas remittances for charter payments should be reclassified as lease payment and subject to a withholding tax of 25%. The Revenue Service has filed two tax assessments against us that in the aggregate, on December 31, 2008, amounted to R\$4,372 million (approximately U.S.\$1,871 million). See Item 8. Financial Information Legal Proceedings.

In the event that claims involving a material amount and for which we have no provisions were to be decided against us, or in the event that the losses estimated turn out to be significantly higher than the provisions made, the aggregate cost of unfavorable decisions could have a material adverse effect on our financial condition and results of operations. In addition, our management may be required to direct its time and attention to defending these claims, which could preclude them from focusing on our core business. Depending on the outcome, certain litigation could result in restrictions on our operations and have a material adverse effect on certain of our businesses.

Our investment in the natural gas and domestic power markets may not generate the returns we expect.

Over the past five years, we have invested, alone or with other investors, in a number of gas-fired power plants in Brazil. These gas-fired power plants provide non-base-load capacity to the grid and tend to operate at low average utilization rates. This low utilization rate has a negative effect on our ability to provide a return on these investments.

Natural gas demand is also influenced by general economic conditions and oil prices. In the first quarter of 2009, non-thermoelectric demand for natural gas in Brazil declined 22% compared to average demand in 2008, due

primarily to a downturn in the industrial sector and lower

Table of Contents

international prices for crude oil and oil products, the primary alternatives to natural gas. Our natural gas prices do not immediately adjust to fluctuations in the international price of crude oil and oil products, which can make natural gas less competitive until it adjusts to lower international prices. Sustained declines in the Brazilian natural gas market may have a material adverse effect on our results of operations and financial condition.

We are also subject to fines and may lose our license to sell electricity if we are unable to fulfill our energy delivery commitments to the *Agência Nacional de Energia Elétrica ANEEL*, the Brazilian energy regulator, due to gas supply constraints. There are several factors that may affect our ability to deliver gas to our gas-fired power plants including our inability to secure supply of natural gas, problems affecting our natural gas infrastructure and increasing demand in the non-thermoelectric market. See Item 4. Information on the Company Gas and Energy Power Electricity Sales for a more detailed description of these risks.

As a result of the foregoing, our investment in the natural gas and domestic power markets has generated losses in the past and may not generate the returns we expect in the future.

Currency fluctuations could have a material adverse effect on our financial condition and results of operations, because most of our revenues are in reais and a large portion of our liabilities are in foreign currencies.

The impacts of fluctuations in exchange rates, especially the *real*/U.S. dollar rate, on our operations are varied and may be material. The principal market for our products is Brazil, as over the last three fiscal years over 73% of our revenues have been denominated in *reais*, while some of our operating expenses and capital expenditures and a substantial portion of our indebtedness are, and are expected to continue to be, denominated in or indexed to U.S. dollars and other foreign currencies. In addition, during 2008 we imported U.S.\$22.2 billion of crude oil and oil products, the prices of which were all denominated and paid in U.S. dollars. Conversely, a substantial share of our liquid assets are held in U.S. dollar denominated assets, or indexed to the U.S. dollar, but we do not use forwards, swaps and futures contracts to mitigate the impact of changes in currency values

on our operations and financial statements because of their limited liquidity and cost.

Our recent financial statements reflect the appreciation of the *real* by 11.8%, 8.7% and 17.2% against the U.S. dollar in 2005, 2006 and 2007, respectively, and the depreciation of the *real* by 31.9% against the U.S. dollar in 2008. The weakness of the U.S. dollar against other currencies in general has also affected our results. As of May 20, 2009, the exchange rate of the *real* to the U.S. dollar was R\$2.020 per U.S.\$1.00, representing an appreciation of approximately 13.6% in 2009, year-to-date.

We are exposed to increases in prevailing market interest rates, which leaves us vulnerable to increased financing expenses.

As of December 31, 2008, approximately 66% U.S.\$17,956 million of our total indebtedness consisted of floating rate debt. In light of cost considerations and market analysis, we decided not to enter into derivative contracts or make other arrangements to hedge against the risk of an increase in interest rates. Accordingly, if market interest rates (principally LIBOR) rise, our financing expenses will increase, which could have an adverse effect on our results of operations and financial condition.

We are not insured against business interruption for our Brazilian operations and most of our assets are not insured against war or sabotage.

We do not maintain coverage for business interruptions of any nature for our Brazilian operations, including business interruptions caused by labor action. If, for instance, our workers were to strike, the resulting work stoppages could have an adverse effect on us. In addition, we do not insure most of our assets against war or sabotage. Therefore, an attack or an operational incident causing an interruption of our business could have a material adverse effect on our financial condition or results of operations.

We are subject to substantial risks relating to our international operations, in particular in Latin America, West Africa and the Middle East.

We operate in a number of different countries, particularly in Latin America, West Africa and the Middle East, that can be politically, economically and socially unstable. The results of operations and financial condition of our

Table of Contents

subsidiaries in these countries may be adversely affected by fluctuations in their local economies, political instability and governmental actions relating to the economy, including:

the imposition of exchange or price controls;

the imposition of restrictions on hydrocarbon exports;

the fluctuation of local currencies;

the nationalization of oil and gas reserves, as experienced in recent years in Venezuela, Ecuador and Bolivia;

increases in export tax and income tax rates for crude oil and oil products, as experienced in recent years in Argentina, Venezuela, Ecuador and Bolivia; and

unilateral (governmental) institutional and contractual changes, including controls on investments and limitations on new projects, as experienced in recent years in Venezuela, Ecuador and Bolivia.

If one or more of the risks described above were to materialize we may lose part or all of our reserves in the affected country and we may not achieve our strategic objectives in these countries or in our international operations as a whole, which may result in a material adverse effect on our results of operations and financial condition.

Of the countries outside of Brazil in which we operate, Argentina is the most significant, representing 44.65% of our total international crude oil and natural gas production and 31.71% of our international proved crude oil and natural gas reserves as of December 31, 2008. The Argentine government has established export tax rates for crude oil, natural gas and oil products that have negatively affected our results of operations and financial condition. We also have significant operations in Bolivia and Venezuela that represented, respectively, 24.32% and 6.29% of our total international production in barrels of oil equivalent at December 31, 2008. Bolivia accounted for 31.02% of our international proved crude oil and natural gas reserves at December 31, 2008. On

January 25, 2009, Bolivia adopted a new constitution that prohibits private ownership of the country's oil and gas resources. In light of the new constitution, we may be required to write off some or all of our proved reserves in Bolivia at the end of 2009. For more information about our operations outside Brazil, see Item 4, Information on the Company International.

Risks Relating to PifCo

PifCo's operations and debt servicing capabilities are dependent on us.

PifCo's financial position and results of operations are directly affected by our decisions. PifCo is a direct wholly owned subsidiary of Petrobras incorporated in the Cayman Islands as an exempted company with limited liability. PifCo purchases crude oil and oil products from third parties and sells them at a premium to us on a deferred payment basis. PifCo also purchases crude oil and oil products from us and sells them outside Brazil. Accordingly, intercompany activities and transactions, and therefore PifCo's financial position and results of operations, are affected by decisions made by us. Additionally, PifCo sells and purchases crude oil and oil products to and from third parties and related parties mainly outside Brazil. Commercial operations are carried out under market conditions and at market prices. PifCo's ability to service and repay its indebtedness is consequently dependent on our own operations.

Financing for PifCo's operations is provided by us, as well as third-party credit providers in favor of whom we provide credit support. Our support to PifCo's debt obligations is made through guarantees and standby purchase agreements whereby we agree to repurchase from the holders of PifCo's notes their right to receive payment from PifCo in the event PifCo defaults on its payment obligations.

Our own financial condition and results of operations, as well as our financial support of PifCo, directly affect PifCo's operational results and debt servicing capabilities. For a more detailed description of certain risks that may have a material adverse impact on our financial condition or results of operations and therefore affect PifCo's ability to meet its debt obligations, see Risks Relating to Our Operations.

Table of Contents

PifCo depends on its ability to pass on its financing costs to us.

PifCo is principally engaged in the purchase of crude oil and oil products for sale to us, as described above. PifCo regularly incurs indebtedness related to such purchases and/or in obtaining financing from us or third-party creditors. All such indebtedness has the benefit of a guaranty, a standby purchase obligation or other support from us, and PifCo has historically passed on its financing costs to us by selling crude oil and oil products to us at a premium to compensate for its financing costs. If for any reason we are not permitted to continue these practices, this would have a materially adverse effect on PifCo's business and on its ability to meet its debt obligations in the long term.

Risks Relating to Our Relationship with the Brazilian Government

The Brazilian government, as our controlling shareholder, may cause us to pursue certain macroeconomic and social objectives that may have an adverse effect on our results of operations and financial condition.

The Brazilian government, as our controlling shareholder, has pursued, and may pursue in the future, certain of its macroeconomic and social objectives through us. Brazilian law requires the Brazilian government to own a majority of our voting stock, and so long as it does, the Brazilian government will have the power to elect a majority of the members of our board of directors and, through them, a majority of the executive officers who are responsible for our day-to-day management. As a result, we may engage in activities that give preference to the objectives of the Brazilian government rather than to our own economic and business objectives.

In particular, we continue to assist the Brazilian government to ensure that the supply and pricing of crude oil and oil products in Brazil meets Brazilian consumption requirements. Accordingly, we may make investments, incur costs and engage in sales on terms that may have an adverse effect on our results of operations and financial condition. Prior to January 2002, prices for crude oil and oil products were regulated by the Brazilian government, occasionally set below prices prevailing in the world oil markets. We cannot assure you that future governments in Brazil will not reinstate price controls.

We may not be able to obtain financing for some of our planned investments, and failure to do so could adversely affect our operating results and financial condition.

The Brazilian government maintains control over our investment budget and establishes limits on our investments and long-term debt. As a state-controlled entity, we must submit our proposed annual budgets to the Ministry of Planning, Budget and Management, the Ministry of Mines and Energy, and the Brazilian Congress for approval. If our approved budget reduces our proposed investments and incurrence of new debt and we cannot obtain financing that does not require Brazilian government approval, we may not be able to make all the investments we envision, including those we have agreed to make to expand and develop our crude oil and natural gas fields. If we are unable to make these investments, our operating results and financial condition may be adversely affected.

Risks Relating to Brazil

The Brazilian government has historically exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions have a direct impact on our business and may have a material adverse effect on our results of operations and financial condition.

The Brazilian government's economic policies may have important effects on Brazilian companies, including us, and on market conditions and prices of Brazilian securities. Our financial condition and results of operations may be

adversely affected by the following factors and the Brazilian government's response to these factors:

devaluations and other exchange rate movements;

inflation;

exchange control policies;

social instability;

price instability;

interest rates;

liquidity of domestic capital and lending markets;

Table of Contents

tax policy;

regulatory policy for the oil and gas industry, including pricing policy; and

other political, diplomatic, social and economic developments in or affecting Brazil.

We may specifically be affected by certain initiatives to increase taxation on our upstream activities. In June 2003, the State of Rio de Janeiro enacted a new tax law that imposed a Domestic State Tax (ICMS) on our upstream activities, including on import of oil and gas exploratory equipment. The State of Rio de Janeiro has never enforced this law, and its constitutionality is being challenged in the Brazilian Supreme Court (*Supremo Tribunal Federal*, or STF). In the event that the state government attempts to enforce this law and the courts uphold that enforcement, we estimate that the amount of ICMS that we would be required to pay to the State of Rio de Janeiro could increase approximately R\$10.7 billion (U.S.\$6.2 billion) per year. In addition, there have been recent initiatives in the Brazilian Congress to reform the Brazilian tax laws and there is a risk that the proposed reforms would increase taxation on our upstream activities. Due to the uncertainties related to these initiatives, we cannot quantify what our tax burden would be if the new laws or reforms were approved.

In addition, the recent discovery of large petroleum and natural gas reserves in the pre-salt geological layer of the Campos and Santos basins has prompted discussions on possible changes to the existing Oil Law. The Brazilian government has created an inter-ministerial committee to consider substantial changes in the regulation of exploration and production activities in areas of the pre-salt geological layer not subject to existing concessions. The committee has not yet made a formal recommendation to the Brazilian government, and we cannot estimate the impact that any change to the Oil Law would have on Petrobras, or when any new regulations may become effective. See Item 4.

Information on the Company Regulation of the Oil and Gas Industry in Brazil Discussions on Possible Changes to the Oil Law.

Uncertainty over whether the Brazilian government will implement these or other changes in policy or regulations that may affect any of the factors mentioned above or other

factors in the future may lead to economic uncertainty in Brazil and increase the volatility of the Brazilian securities market and securities issued abroad by Brazilian companies. Such changes in policies and regulations may have a material adverse effect on our results of operations and financial condition.

Inflation and government measures to curb inflation may contribute significantly to economic uncertainty in Brazil and to heightened volatility in the Brazilian securities markets and, consequently, may adversely affect the market value of our securities and financial condition.

Our principal market is Brazil, which has, in the past, periodically experienced extremely high rates of inflation. Inflation, along with governmental measures to combat inflation and public speculation about possible future measures, has had significant negative effects on the Brazilian economy. The annual rates of inflation have been historically high in Brazil prior to 1995 and Brazil experienced hyperinflation in the past. As measured by the National Consumer Price Index (*Índice Nacional de Preços ao Consumidor Amplo*, or IPCA), Brazil had annual rates of inflation of 3.14% in 2006, 4.46% in 2007 and 5.90% in 2008. Considering the historically high rates of inflation, Brazil may experience higher levels of inflation in the future. The lower levels of inflation experienced since 1995 may not continue. Future governmental actions, including actions to adjust the value of the *real*, could trigger increases in inflation, which may adversely affect our financial condition.

Developments and the perception of risk in other countries, especially in the United States and in emerging market countries, may adversely affect the market price of Brazilian securities, including our shares and ADSs, and limit our ability to finance our operations.

The market value of securities of Brazilian companies is affected to varying degrees by economic and market conditions in other countries, including the United States and other Latin American and emerging market countries. Although economic conditions in these countries may differ significantly from economic conditions in Brazil, investors' reactions to developments in these other countries may have an adverse effect on the market value of securities of Brazilian issuers. Crises in other countries or economic policies of other

Table of Contents

countries may diminish investor interest in securities of Brazilian issuers, including ours. This could adversely affect the market price of our shares and ADSs, and could limit our ability to finance our operations.

The recent global financial crisis has had significant consequences worldwide, including in Brazil, such as stock and credit market volatility, unavailability of credit, higher interest rates, a general slowdown of the world economy, volatile exchange rates and inflationary pressure, among others, which have and may continue to, directly or indirectly, adversely affect our operating results, financial position and the price of securities issued by Brazilian companies.

Risks Relating to Our Equity and Debt Securities

The size, volatility, liquidity and/or regulation of the Brazilian securities markets may curb the ability of holders of ADSs to sell the common or preferred shares underlying our ADSs.

Petrobras shares are some of the most liquid in the São Paulo Stock Exchange (Bovespa), but overall, the Brazilian securities markets are smaller, more volatile and less liquid than the major securities markets in the United States and other jurisdictions, and may be regulated differently from the way in which U.S. investors are accustomed. Factors that may specifically affect the Brazilian equity markets may limit the ability of holders of ADSs to sell the common or preferred shares underlying our ADSs at the price and time they desire.

The market for PifCo s notes may not be liquid.

Some of PifCo s notes are not listed on any securities exchange and are not quoted through an automated quotation system. We can make no assurance as to the liquidity of or trading markets for PifCo s notes. We cannot guarantee that the holders of PifCo s notes will be able to sell their notes in the future. If a market for PifCo s notes does not develop, holders of PifCo s notes may not be able to resell the notes for an extended period of time, if at all.

Holders of ADSs may be unable to exercise preemptive rights with respect to the common or preferred shares underlying the ADSs.

Holders of ADSs who are residents of the United States may not be able to exercise the preemptive rights relating to the common or preferred shares underlying our ADSs unless a registration statement under the U.S. Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement with respect to the common or preferred shares relating to these preemptive rights, and therefore we may not file any such registration statement. If a registration statement is not filed and an exemption from registration does not exist, JPMorgan Chase Bank, N.A., as depository, will attempt to sell the preemptive rights, and holders of ADSs will be entitled to receive the proceeds of the sale. However, the preemptive rights will expire if the depository cannot sell them. For a more complete description of preemptive rights with respect to the common or preferred shares, see Item 10. Additional Information Memorandum and Articles of Association of Petrobras Preemptive Rights.

Restrictions on the movement of capital out of Brazil may impair the ability of holders of ADSs to receive dividends and distributions on, and the proceeds of any sale of, the common or preferred shares underlying the ADSs and may impact our ability to service certain debt obligations, including guarantees and standby purchase agreements we have entered into in support of PifCo s notes.

The Brazilian government may impose temporary restrictions on the conversion of Brazilian currency into foreign currencies and on the remittance to foreign investors of proceeds from their investments in Brazil. Brazilian law permits the Brazilian government to impose these restrictions whenever there is a serious imbalance in Brazil's balance of payments or there are reasons to foresee a serious imbalance.

The Brazilian government imposed remittance restrictions for approximately six months in 1990. The Brazilian government could decide to take similar measures in the future. Similar restrictions, if imposed, could impair or prevent the conversion of dividends, distributions,

Table of Contents

or the proceeds from any sale of common or preferred shares from *reais* into U.S. dollars and the remittance of the U.S. dollars abroad. If such restrictions were imposed, the depository for the ADSs would hold the *reais* it cannot convert for the account of the ADS holders who have not been paid. The depository would not invest the *reais* and would not be liable for the interest.

Similar restrictions, if imposed, could also impair or prevent the conversion of payments under guaranty and standby purchase agreements supporting PifCo's notes from *reais* into U.S. dollars and the remittance of the U.S. dollars abroad. In the case that the PifCo noteholders receive payments in *reais* corresponding to the equivalent U.S. dollar amounts due under PifCo's notes, it may not be possible to convert these amounts into U.S. dollars. These restrictions, if imposed, could also prevent us from making funds available to PifCo in U.S. dollars abroad, in which case PifCo may not have sufficient U.S. dollar funds available to make payment on its debt obligations.

In addition, payments of dividends and other distributions to shareholders and payments under Petrobras' guarantees and standby purchase agreements in connection with PifCo's notes do not currently require approval by or registration with the Central Bank of Brazil. The Central Bank of Brazil may nonetheless impose prior approval requirements on the remittance of U.S. dollars abroad, which could cause delays in such payments.

If holders of our ADSs exchange their ADSs for common or preferred shares, they risk losing the ability to remit foreign currency abroad and forfeiting Brazilian tax advantages.

The Brazilian custodian for our common or preferred shares underlying our ADSs must obtain a certificate of registration from the Central Bank of Brazil to be entitled to remit U.S. dollars abroad for payments of dividends and other distributions relating to our preferred and common shares or upon the disposition of the common or preferred shares. If holders of ADSs decide to exchange their ADSs for the underlying common or preferred shares, they will be entitled to continue to rely, for five Brazilian business days from the date of exchange, on the custodian's certificate of registration. After that period, such holders may not be able to obtain and remit U.S. dollars abroad

upon the disposition of the common or preferred shares, or distributions relating to the common or preferred shares, unless they obtain their own certificate of registration or register under Resolution No. 2,689, of January 26, 2000, of the *Conselho Monetário Nacional* (National Monetary Council), which entitles registered foreign investors to buy and sell on the São Paulo Stock Exchange. In addition, if such holders do not obtain a certificate of registration or register under Resolution No. 2,689, they may be subject to less favorable tax treatment on gains with respect to the common or preferred shares.

If such holders attempt to obtain their own certificate of registration, they may incur expenses or suffer delays in the application process, which could delay their ability to receive dividends or distributions relating to the common or preferred shares or the return of their capital in a timely manner. The custodian's certificate of registration or any foreign capital registration obtained by such holders may be affected by future legislative or regulatory changes and we cannot assure such holders that additional restrictions applicable to them, the disposition of the underlying common or preferred shares, or the repatriation of the proceeds from the process will not be imposed in the future.

Holders of ADSs may face difficulties in protecting their interests.

Our corporate affairs are governed by our bylaws and Brazilian Corporate Law, which differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States or elsewhere outside Brazil. In addition, the rights of an ADS holder, which are derivative of the rights of holders of our common or preferred shares, as the case may be, to protect their interests against actions by our board of directors are different under Brazilian Corporate Law than under the laws of other jurisdictions. Rules against insider trading and self-dealing and the preservation of shareholder interests may also be less developed and enforced in Brazil than in the United States. In addition,

shareholders in Brazilian companies ordinarily do not have standing to bring a class action.

We are a state-controlled company organized under the laws of Brazil and all of our directors and officers reside in Brazil. Substantially

Table of Contents

all of our assets and those of our directors and officers are located in Brazil. As a result, it may not be possible for holders of ADSs to effect service of process upon us or our directors and officers within the United States or other jurisdictions outside Brazil or to enforce against us or our directors and officers judgments obtained in the United States or other jurisdictions outside Brazil. Because judgments of U.S. courts for civil liabilities based upon the U.S. federal securities laws may only be enforced in Brazil if certain requirements are met, holders of ADSs may face greater difficulties in protecting their interest in actions against us or our directors and officers than would shareholders of a corporation incorporated in a state or other jurisdiction of the United States.

Holders of our ADSs may encounter difficulties in the exercise of voting rights and preferred shares and the ADSs representing preferred shares generally do not give holders of ADSs voting rights.

Holders of ADSs may encounter difficulties in the exercise of some of their rights as a shareholder if they hold our ADS rather than the underlying shares. For example, if we fail to provide the depositary with voting materials on a timely basis, holders of ADSs may not be able to vote by giving instructions to the depositary on how to vote for them.

In addition, a portion of our ADSs represents our preferred shares. Under Brazilian law and our bylaws, holders of preferred shares generally do not have the right to vote in meetings of our stockholders. This means, among other things, that holders of ADSs representing preferred shares are not entitled to vote on important corporate transactions or decisions. See Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Voting Rights for a discussion of the limited voting rights of our preferred shares.

Enforcement of our obligations under the standby purchase agreement might take longer than expected.

We have entered into a standby purchase agreement in support of some of PifCo's obligations under its notes and indentures. Our obligation to purchase from the PifCo noteholders any unpaid amounts of principal, interest and other amounts

due under the PifCo notes and the indenture applies, subject to certain limitations, irrespective of whether any such amounts are due at the maturity of the PifCo notes or otherwise.

We have been advised by our counsel that the enforcement of the standby purchase agreement in Brazil against us, if necessary, will occur under a form of judicial process that, while similar, has certain procedural differences from those applicable to enforcement of a guarantee and, as a result, the enforcement of the standby purchase agreement may take longer than would otherwise be the case with a guarantee.

We would be required to pay judgments of Brazilian courts enforcing our obligations under the guaranty and standby purchase agreement relating to PifCo's notes only in reais.

If proceedings were brought in Brazil seeking to enforce our obligations in respect of the guaranty and standby purchase agreement relating to PifCo's notes, we would be required to discharge our obligations only in *reais*. Under the Brazilian exchange control rules, an obligation to pay amounts denominated in a currency other than *reais*, which is payable in Brazil pursuant to a decision of a Brazilian court, may be satisfied in *reais* at the rate of exchange, as determined by the Central Bank of Brazil, in effect on the date of payment.

A finding that we are subject to U.S. bankruptcy laws and that the guaranty and standby purchase agreement executed by us were a fraudulent conveyance could result in PifCo noteholders losing their legal claim against us.

PifCo's obligation to make payments on the PifCo notes is supported by our obligation under the guaranty or standby purchase agreement. We have been advised by our external U.S. counsel that the guaranty and the standby purchase agreement are valid and enforceable in accordance with the laws of the State of New York and the United States. In addition, we have been advised by our general counsel that the laws of Brazil do not prevent the guaranty and the standby purchase agreement from being valid, binding and enforceable against us in accordance with their terms. In the event that U.S. federal fraudulent conveyance or similar laws are applied to the guaranty and the standby purchase agreement, and we, at the time we

Table of Contents

entered into the relevant guaranty or standby purchase agreement:

were or are insolvent or rendered insolvent by reason of our entry into such guaranty or standby purchase agreement;

were or are engaged in business or transactions for which the assets remaining with us constituted unreasonably small capital; or

intended to incur or incurred, or believed or believe that we would incur, debts beyond our ability to pay such debts as they mature; and

in each case, intended to receive or received less than reasonably equivalent value or fair consideration therefore,

then our obligations under the guaranty and the standby purchase agreement could be avoided, or claims with respect to such agreements could be subordinated to the claims of other creditors. Among other things, a legal challenge to the guaranty and the standby purchase agreement on fraudulent conveyance grounds may focus on the benefits, if any, realized by us as a result of PifCo's issuance of these notes. To the extent that the guaranty and the standby purchase agreement are held to be a fraudulent conveyance or unenforceable for any other reason, the holders of the PifCo notes would not have a claim against us under the relevant guaranty and standby purchase agreement and will solely have a claim against PifCo. We cannot assure you that, after providing for all prior claims, there will be sufficient assets to satisfy the claims of the PifCo noteholders relating to any avoided portion of the guaranty and the standby purchase agreement.

Item 4. Information on the Company

History and Development

Petróleo Brasileiro S.A. PETROBRAS was incorporated in 1953 to conduct the Brazilian government's hydrocarbon activities. We began operations in 1954 and for approximately forty years carried out crude oil and natural gas production and refining activities in Brazil on behalf of the government.

In the 1990s, in a series of legislative actions, the Brazilian state relinquished its monopoly on oil and gas activities. On November 9, 1995, the Brazilian constitution was amended to authorize the Brazilian government to contract with any state or privately owned company to carry out upstream and downstream oil and gas activities in Brazil. On August 6, 1997, Brazil enacted the Oil Law (Law No. 9,478), which established competition in Brazilian markets for crude oil, oil products and natural gas. Effective January 2, 2002, Brazil deregulated prices for crude oil, oil products and natural gas. See Regulation of the Oil and Gas Industry in Brazil Price Regulation.

Our common and preferred shares have been traded on the São Paulo Stock Exchange since 1968. Petrobras was incorporated as a state-controlled company under Law No. 2,004 (effective October 3, 1953), and a majority of our voting capital must be owned by the Brazilian federal government, a state or a municipality. As of December 31, 2008, the Brazilian government owned 32.2% of our outstanding capital stock and 55.7% of our voting shares. We operate through subsidiaries, joint ventures, and associated companies established in Brazil and many other countries. Our principal executive office is located at Avenida República do Chile 65, 20031-912 Rio de Janeiro, RJ, Brazil and our telephone number is (55-21) 3224-4477.

Overview of the Group

We are an integrated oil and gas company that is the largest corporation in Brazil and one of the largest companies in Latin America in terms of revenues. Because of our legacy as Brazil's former sole supplier of crude oil and oil products and our ongoing commitment to development and growth, we operate most of Brazil's producing oil and gas fields and hold a large base of proved reserves and a fully developed operational infrastructure. In 2008, our average domestic daily hydrocarbons production was 2,176 mboe/d, an estimated 98.5% of Brazil's total. Over 84% of our proved reserves are in large, contiguous and highly productive fields in the offshore Campos Basin, which allows us to concentrate our operational infrastructure and limit our costs of exploration, development and production. In 40 years of developing Brazil's offshore basins we have developed special expertise in deepwater

Table of Contents

exploration and production, which we exploit both in Brazil and in other offshore oil provinces.

We operate substantially all the refining capacity in Brazil. Most of our refineries are located in Southeastern Brazil, within the country's most populated and industrialized markets and adjacent to the Campos Basin that provides most of our crude oil. Our domestic refining capacity of 1,942 mbbbl/d is well balanced with our domestic refining production of 1,787 mbbbl/d and sales of oil products to domestic markets of 1,748 mbbbl/d. We are also involved in the production of petrochemicals and fertilizers. We distribute oil products through our own BR network of retailers and to wholesalers.

We participate in most aspects of the Brazilian natural gas market. This market has been constrained by the level of domestic gas production and our transportation and distribution infrastructure. We expect that our natural gas activities will grow in the future as we expand our production of both associated and non-associated gas, mainly from offshore fields in the Campos, Espírito Santo and Santos basins, and extend Brazil's gas transportation infrastructure. We use LNG terminals to meet demand and diversify our supply. We also participate in the domestic power market primarily through our investments in gas-fired thermoelectric power plants.

Internationally, we are active in 23 countries. In Latin America, our operations extend from exploration and production to refining,

marketing, retail services and natural gas pipelines. In North America, we produce oil and gas and have refining operations in the United States. In Africa, we produce oil in Angola and Nigeria, and in Asia, we have refining operations in Japan. In other countries, we are engaged only in oil and gas exploration.

Our activities comprise five business segments:

Exploration and Production: oil and gas exploration, development and production in Brazil;

Supply: downstream activities in Brazil, including refining, oil products and crude oil exports and imports, petrochemicals and fertilizers;

Distribution: distribution of oil products to wholesalers and through our BR retail network in Brazil;

Gas and Energy: gas transmission and distribution, electric power generation using natural gas and renewable energy sources and biofuels operations in Brazil; and

International: exploration and production, supply (downstream activities including refining, petrochemicals and fertilizers), distribution and natural gas and energy operations outside of Brazil.

Table of Contents

The following table sets forth key information for each business segment in 2008:

	2008							Group Total
	Exploration & Production	Supply	Distribution	Gas and Energy	International	Corporate(1)	Eliminations	
	(U.S.\$ million)							
Net operating revenues	59,024	96,202	30,892	8,802	10,940		(87,603)	118,257
Income (loss) before minority interest and income tax	31,657	(2,956)	1,245	(504)	(605)	(1,986)	141	26,992
Total assets at December 31	51,326	27,521	4,775	14,993	13,439	17,583	(3,942)	125,695

(1) Companies in which Petrobras has a minority interest.

We calculate reserves based on forecasts of field production, which depend on a number of technical parameters, such as seismic interpretation, geological maps, well tests and economic data. All reserve estimates involve some degree of uncertainty. The uncertainty depends mainly on the amount of reliable geological and engineering data available at the

time of the estimate and the interpretation of this data. Our estimates are thus made using the most reliable data at the time of the estimate, in accordance with the best practices in the oil and gas industry. DeGolyer and MacNaughton (D&M) reviewed and certified 94% of our domestic proved crude oil, condensate and natural gas reserve estimates as of December 31, 2008. The

Table of Contents

estimates for the certification were performed in accordance with Rule 4-10 of Regulation S-X of the SEC. See Supplementary Information on Oil and Gas Producing Activities beginning on page F-107 for further details on our proved reserves.

The statements contained in this Item 4 regarding exploration and development projects and production estimates are forward-looking and subject to significant risks and uncertainties. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that our actual levels of activity, production or performance will meet these expectations. See Item 3. Key Information Risk Factors.

Exploration and Production

Oil and gas exploration and production activities in Brazil are the largest component of our company portfolio. In 1970, we produced 164 mbbbl/d of crude oil, condensate and natural gas liquids in Brazil. We increased production to 181 mbbbl/d in 1980, 654 mbbbl/d in 1990, 1,271 mbbbl/d in 2000 and 1,855 mbbbl/d in 2008. In 1974 we made our first discovery in the Campos Basin offshore in Brazil, which now accounts for over 84% of our proved reserves. We aim to grow oil and gas reserves and production sustainably and be recognized for excellence in Exploration and Production operations. Our primary goals are to:

- explore and develop oil resources in increasingly deeper waters in the Campos Basin;

- explore and develop Brazil's two other most promising offshore basins: Espírito Santo (light oil, heavy oil and gas) and Santos (gas and light oil);

- develop gas resources in the Santos Basin and elsewhere to meet Brazil's growing demand for gas and increase the contribution of domestic gas production to meeting that demand;

- explore and develop the potentially substantial pre-salt reservoirs that lie below the Espírito Santo, Campos and Santos basins; and

- sustain and increase production from onshore fields through drilling and enhanced recovery operations.

In new areas, our activities typically begin with geological research and seismic activities, followed by exploratory drilling. When this yields encouraging results, we proceed with extended well tests, development drilling and pilot production, which typically involve substantial investments. It usually takes several years for successful exploration activity to be reflected in increased reserves and production.

During 2008, our oil and gas production from Brazil averaged 2,176 mboe/d, of which 85% was oil and 15% was natural gas. On December 31, 2008, our estimated net proved crude oil and natural gas reserves in Brazil were 10.3 billion boe, of which 85% was crude oil and 15% was natural gas. Brazil provided 91% of our worldwide production in 2008 and accounted for 92% of our worldwide reserves at December 31, 2008 on a barrels of oil-equivalent basis. Historically, approximately 85% of our total Brazilian production has been oil; in the future, we plan to increase the share of natural gas to meet increasing domestic demand.

Brazil's richest oil fields are located offshore, most of them in deep waters. Since 1971, when we started exploration in the Campos Basin, we have been active in these waters and we have become globally recognized as innovators in the technology required to explore and produce hydrocarbons in deep and ultra-deep water. We operate more production (on a boe basis) from fields in deep and ultra-deep water than any other company, according to PFC Energy, an energy

consultancy. In 2008, offshore production accounted for 88% of our production and deepwater production accounted for 76% of our production in Brazil. At December 31, 2008, we operated 155 wells in water deeper than 1,000 meters (3,281 feet). By December 31, 2008, we had drilled around 322 exploratory wells in water deeper than 1,000 meters (3,281 feet). We continue to upgrade our deepwater technologies. See Item 5. Operating and Financial Review and Prospects Research and Development.

Offshore exploration, development and production costs are generally higher than those onshore, but we have been able to offset these higher costs by higher drilling success ratios, larger discoveries and greater production volumes. We have historically been successful in finding and developing significant oil reservoirs offshore,

Table of Contents

which has allowed us to achieve economies of scale by spreading the total costs of exploration, development and production over a large base. By focusing on opportunities that are close to existing production infrastructure, we limit the incremental capital requirements of new field development.

We have also implemented a variety of asset-rationalization programs designed to increase oil recovery from existing fields and reduce natural decline from producing fields.

Our exploration and production activities outside Brazil are included in our International business segment. See International.

Exploration and Production Key Statistics

	2008	2007 (U.S.\$ million)	2006
Exploration and Production:			
Net operating revenues	59,024	41,991	35,738
Income before minority interest and income tax	31,657	21,599	18,441
Total assets at December 31	51,326	53,175	38,366
Capital expenditures	14,293	9,448	7,329

Table of Contents

Information about our principal oil and gas producing fields in Brazil is summarized in the table below.

Basin	Fields	Petrobras %	Type	Fluid(1)
Alagoas	Pilar/Rio Remedio	100%	Onshore	Light Oil/Natural Gas
Camamu	Manati	35%	Shallow	Natural Gas
Campos	Albacora	100%	Shallow	Intermediate Oil
			Deepwater	Intermediate Oil
	Albacora Leste	90%	Deepwater	Intermediate Oil
	Barracuda	100%	Deepwater	Intermediate Oil
	Bicudo	100%	Shallow	Intermediate Oil
	Bijupirá/Salema	22.4%(2)	Deepwater	Intermediate Oil
	Bonito	100%	Shallow	Intermediate Oil
	Carapeba	100%	Shallow	Intermediate Oil
	Caratinga	100%	Deepwater	Intermediate Oil
	Cherne	100%	Shallow	Intermediate Oil
	Corvina	100%	Shallow	Intermediate Oil
	Enchova	100%	Shallow	Heavy Oil
	Espadarte	100%	Deepwater	Intermediate Oil
	Jubarte	100%	Deepwater	Heavy Oil

Recôncavo	Jandaia	100%	Onshore	Light Oil

Edgar Filing: PETROBRAS INTERNATIONAL FINANCE CO - Form 20-F

	Miranga	100%	Onshore	Light Oil/Natural Gas
Santos	Merluza	100%	Shallow	Natural Gas
Sergipe	Carmopolis	100%	Onshore	Intermediate Oil
	Sirirízinho	100%	Onshore	Intermediate Oil
Solimões	Leste do Urucu	100%	Onshore	Light Oil/Natural Gas
	Rio Urucu	100%	Onshore	Light Oil/Natural Gas

(1) Heavy oil = up to 22° API; intermediate oil = 22° API to 31° API; light oil = greater than 31° API

(2) Petrobras is not the operator in this field.

We conduct exploration, development and production activities in Brazil through concession contracts, which we obtain through participation in bid rounds conducted by the ANP. Some of our existing concessions were granted by the ANP without an auction in 1998, as provided by the Oil Law. These are known as the Round Zero concession contracts. Since such time, we have participated in all

of the auction rounds and in the most recent round of December 2008, we acquired 27 of the 54 blocks offered, for a total of 10,476 km² (2.6 million acres).

Our domestic oil and gas exploration and production efforts are primarily focused on three major basins offshore in Southeastern Brazil: Campos, Espírito Santo and Santos.

Table of Contents

The following map shows our concession areas in Brazil as of December 2008.

Campos Basin

The Campos Basin, which covers approximately 115,000 km² (28.4 million acres), is the most prolific oil and gas basin in Brazil as measured by proved hydrocarbon reserves and annual production. Since we began exploring this area in 1971, over 60 hydrocarbon accumulations have been discovered, including eight large oil fields in deep and ultra-deep water. The Campos Basin is our largest oil- and gas-producing region, producing an average 1,547 mbbbl/d of oil and 23.7 mmm³/d (894.3 mmcf/d) of associated natural gas during 2008, 77% of our total production from Brazil.

At December 31, 2008, we were producing from 39 fields at an average rate of 1,593 mbbbl/d of oil and held proved crude oil reserves representing 90% of our total proved crude oil reserves in Brazil.

At December 31, 2008, we held proved natural gas reserves in the Campos Basin representing 49% of our total proved natural gas reserves in Brazil. We operated 34 floating production systems, 14 fixed platforms and 5,697 km (3,540 miles) of pipeline and flexible pipes in water depths from 80 to 1,886 meters (262 to 6,188 feet), delivering oil with an average API gravity of 23.1° and an average BSW of 1%.

We expect that future new-source production from Campos will be predominantly from deepwater oil fields. We are currently developing 12 major projects in the Campos Basin: Marlim Sul Modules 2 and 3, Marlim Leste Module 2, Roncador Modules 3 and 4, Jubarte Phase II, Cachalote Phase I, pre-salt reservoirs of Parque das Baleias, Papa-Terra, Frade, Ostra and Baleia Azul.

Table of Contents

At December 31, 2008, we held exploration rights to 22 blocks in the Campos Basin, comprising 6,679.71 km² (1.6 million acres).

Espírito Santo Basin

We have made several discoveries of light oil and natural gas in the Espírito Santo Basin, which covers approximately 75,000 km² (18.5 million acres) offshore and 14,000 km² (3.5 million acres) onshore. At December 31, 2008, we were producing from 41 fields at an average rate of 69.2 mbbbl/d and held proved crude oil reserves, representing 1% of our total proved crude oil reserves in Brazil. At December 31, 2008, we were producing natural gas at an average rate of 7.2 mmm³/d (273 mmcf/d) and held proved natural gas reserves representing 7% of our total proved natural gas reserves in Brazil.

On December 31, 2008, we held exploration rights to 35 blocks, 18 onshore and 17 offshore, comprising 9,359.88 km² (2.3 million acres).

We are developing two deepwater projects to increase natural gas production from the Espírito Santo Basin the Camarupim project served by the FPSO Cidade de São Mateus with capacity to produce 10 mmm³/d, and the Canapu project served by the FPSO Cidade de Vitória with capacity to produce 2 mmm³/d both of which are expected to come on stream in the second quarter of 2009.

In addition to developing new projects, we are also optimizing existing resources in the Golfinho field by moving the FPSO Capixaba to the Parque das Baleias field in the Campos Basin in anticipation of our pre-salt exploration efforts there. We will reconnect the well previously served by the FPSO Capixaba to another FPSO in the Golfinho field.

Santos Basin

The Santos Basin, which covers approximately 348,900 km² (86 million acres) off the city of Santos, in the State of São Paulo, is one of the most promising exploration areas offshore Brazil and the focus of our plans to develop domestic natural gas. At December 31, 2008, we produced oil from one field at an average rate of 1.8 mbbbl/d and held proved crude oil reserves representing 0.5% of our total proved crude oil reserves in

Brazil. At December 31, 2008, we produced natural gas at an average rate of 0.721 mmm³/d (25.46 mmcf/d) and held proved natural gas reserves in the Santos Basin representing 17% of our total proved natural gas reserves in Brazil.

In January 2006, we approved the U.S.\$18 billion ten-year Master Plan for Development of Natural Gas and Oil Production in the Santos Basin, which will substantially increase our gas production to meet increasing domestic gas demand. We subsequently established a second plan, known as Plangas, to accelerate gas production and build supporting infrastructure in the Santos and Espírito Santo basins. As part of this plan, we are developing the Mexilhão and Urugua-Tambau deepwater fields described below. We expect these investment plans to increase our average gas production from the Santos Basin from 0.66 mmm³/d (23.3 mmcf/d) in 2008 to 11.4 mmm³/d (402.5 mmcf/d) in 2010.

Gas development plans for the Santos Basin include:

Mexilhão, located in shallow water in Santos Basin Block BS-400, is scheduled to come on stream in 2010 with initial production of approximately 6.5 mmm³/d (229.5 mmcf/d), potentially increasing to 8.0 mmm³/d (282.5 mmcf/d) in 2012;

Urugua-Tambau is expected to produce at an initial rate of 3.5 mmm³/d (123.6 mmcf/d) in 2010, potentially increasing to 7.0 mmm³/d (247.2 mmcf/d) of gas and 30 mbbbl/d of light oil in 2012; and

Lagosta, expected to come on stream in 2009, with initial production of approximately 1.4 mmm³/d (49.4 mmcf/d), potentially increasing to 1.8 mmm³/d (63.6 mmcf/d).

On December 31, 2008, we held exploration rights to 62 blocks in the Santos Basin, comprising 36,259.54 km² (9.0 million acres).

Pre-Salt Reservoirs

In recent years, we have focused our offshore exploration efforts on pre-salt reservoirs located in a region approximately 800 km (497 miles) long and 200 km (124 miles) wide stretching from the Campos to the Santos basins.

Table of Contents

We have drilled 30 wells in this 114,000 km² (28.2 million acre) area since 2005, 87% of which have yielded discoveries of hydrocarbon resources. We are the operator in most of these exploration areas, and hold interests in them ranging from 20% to 100%. In the southern part of the region, where the salt layer is thick and the hydrocarbons have been more perfectly preserved, we have made particularly promising discoveries, including Block BM-S-11 (Tupi and Iara) in the Santos Basin in 2006 and 2008. In the northern part of the region, we made a significant discovery in the area known as Parque das Baleias, in the Campos Basin in 2008.

We intend to commit substantial resources to develop these pre-salt discoveries, which are located in deep and ultra-deep waters at target depths of between 5,000 and 7,000 meters (16,404 and 22,966 feet) and present considerable technical challenges. Over the next five years we plan to invest U.S.\$28.9 billion, approximately 31% of our total domestic capital expenditures for exploration and production in the period, in the development of the pre-salt reservoirs.

Our existing concessions cover approximately 23% (26,000 km² or 6.4 million acres) of the pre-salt reservoirs. An additional 2% (3,000 km² or 0.7 million acres) is under concession to other oil companies for exploration. The remaining 75% (85,000 km² or 21 million acres) of the pre-salt region is not yet under concession, and the licensing of new pre-salt concessions is on hold pending the outcome of a regulatory review by the Brazilian government. See

Regulation of the

Oil and Gas Industry in Brazil Discussions on Possible Changes to the Oil Law.

In the pre-salt region of the Santos Basin, first oil was produced during an extended well test in Tupi, which began in May 2009. It will be followed by a pilot system FPSO with capacity of 100 mbb/d, which is scheduled to start up in Tupi by the end of 2010. Although we have made promising discoveries in the region, we are still in the early stages of our exploration efforts and do not expect to classify any pre-salt reserves as proven before 2010. In addition to the EWTs, we will drill a number of appraisal wells to better understand and delineate the pre-salt reservoirs in the Santos Basin. We also expect to start up two pilot systems in Iara and Guar during 2013-2014. We expect that future new-source production from the Santos Basin will be predominantly from pre-salt reservoirs.

In the pre-salt region of the Campos Basin, we drilled two wells off the coast of the State of Esprito Santo and made a significant discovery of intermediate oil (30 API) in the Parque das Baleias area. In September 2008, we commenced an EWT in this area, with a single well pilot system producing in the Jubarte field at an average rate of 10 to 12 mbb/d. We are continuing to study these promising finds and expect to accelerate pre-salt production in Parque das Baleias using existing infrastructure in the area. In December 2008, we began another EWT with a dynamic positioned vessel in the Cachalote field and we expect to start producing from this field and from the Baleira Franca field using an existing FPSO by the second half of 2010.

Table of Contents

The map below shows the location of the pre-salt reservoirs as well as the status of our exploratory activities there.

Other Basins

We produce hydrocarbons and hold exploration acreage in eight other basins in Brazil. Of these, the most significant are the shallow offshore Camamu Basin and the onshore Potiguar, Recôncavo, Rio Grande do Norte, Sergipe, Alagoas and Solimões basins. While our onshore production

is primarily in mature fields, we plan to sustain and slightly increase production from these fields in the future by using enhanced recovery methods.

We had a total of 312 production agreements as of December 31, 2008, and were the 100% owner in 285 of them. We are operators under 15 of our 27 partnership agreements.

Table of Contents

The following table describes our principal development projects in the various basins and their production capacity:

Field	Unit Type	Production Unit	Crude Oil Nominal Capacity (bbl/d)	Natural Gas Nominal Capacity (mcf/d)	Water Depth (meters)	Start Up (year)	Notes
Marlim Sul Module 2	SS	P-51	180,000	211,884	1,255	2009(1)	
Marlim Leste Module 2	FPSO	Cidade de Niteroi	100,000	123,599	1,400	2009(2)	Chartered from Modec
Tupi EWT	FPSO	BW Cidade de São Vicente	30,000	0	2,170	2009(3)	Chartered by BW Offshore
Canapu	n/a	n/a	0	70,628	1,440	2009	Production by FPSO Cidade de Vitória
Camarupim	FPSO	Cidade de São Mateus	25,000	353,140	720	2009	Chartered from Prosafe
Lagosta	n/a	n/a	0	52,971	131	2009	Production by PMLZ-1
Frade(4)	FPSO	Frade	100,000	81,222	900	2009	
Ostra(5)	FPSO	Espírito Santo	100,000	49,440	1,600	2009	
Mexilhão	Fixed Platform	PMXL-1	0	529,710	172	2010

Tupi pilot	FPSO	Cidade de Angra dos Reis	100,000	123,603	2,200	2010	Chartered from Modec
Cachalote and Baleia Franca	FPSO	Capixaba	100,000	123,599	n/a	2010	Existing FPSO chartered from SBM
Marlim Sul Module 3	SS	P-56	100,000	211,884	n/a	2011	
Jubarte Phase II	FPSO	P-57	180,000	70,628	1,300	2011	
Baleia Azul	FPSO	Espadarte	100,000	88,285	1,400	2012	Existing FPSO chartered from SBM
Roncador Module 3	SS	P-55	180,000	211,884	1,790	2012	
Roncador Module 4	FPSO	P-62	180,000	211,884	1,545	2013	
	TLWP	P-61	0	0	1,180	2013	

Papa-Terra Module 1							Production by P-63
Papa-Terra Module 2	FPSO	P-63	150,000	31,783	1,165	2013	
Piloto de Guara	FPSO	n/a	100,000	176,570	n/a	2013	
Pre-salt reservoirs of Parque das Baleias	FPSO	P-58	180,000	211,884	1,400	2014	

- (1) Production began in January 2009.
- (2) Production began in February 2009.
- (3) Production began in May 2009.
- (4) Petrobras 30%, Chevron (operator) 51.74%, Frade Japão 18.26%.
- (5) Petrobras 35%, Shell (operator) 35%, Esso 30%.

Exploration

As of December 31, 2008, we had 186 exploration agreements covering 256 blocks, and 35 evaluation plans. We are exclusively responsible for conducting the exploration activities in 77 of the 186 exploration agreements. As of December 31, 2008, we had partnerships in exploration with 29 foreign and domestic companies, for a total of 109 agreements. We conduct exploration activities under 70 of our 109 partnership agreements.

We focus much of our exploration effort on deepwater drilling, where the discoveries are substantially larger and our technology and expertise create a competitive advantage. In

2008, we invested a total of U.S.\$2.47 billion in exploration activities in Brazil. We drilled a total of 135 gross exploratory wells in 2008, of which 47 were offshore and 88 onshore, with a success ratio of 44%.

Because offshore Brazil is geographically isolated from other offshore drilling areas, and because we often drill in unusually deep waters, we plan carefully for our future drilling rig needs. By using a combination of our own rigs and units that we contract for periods of five years or longer, we have historically ensured the availability of drilling units to meet our needs, and paid lower average day rates than if we had contracted the units on a spot basis. We continually evaluate our need for rigs,

Table of Contents

renew our drilling contracts, contract ahead for rigs as needed, and stimulate new rig construction by signing long-term operating leases with drilling contractors for rigs that are not yet built.

Drilling Units in Use by Exploration and Production

	On December 31					
	2008		2007		2006	
	Leased	Owned	Leased	Owned	Leased	Owned
Onshore	25	11	14	13	6	13
Offshore, by water depth (WD)	31	8	27	8	24	9
Jack-up rigs	2	4	1	4	1	5
Floating rigs:						
500 to 1000 meter WD	9	2	6	2	4	2
1000 to 1500 meters WD	10	1	10	1	10	1
1500 to 2000 meters WD	7	1	7	1	7	1
2000 to 2500 meters WD	2	0	2	0	1	0
2500 to 3000 meters WD	1	0	1	0	1	0

We have entered into five- to seven-year contracts beginning in 2009 and 2010 for 15 new drilling rigs. Two will operate in water depths of less than 1,000 meters (6,560 feet), three may operate in water depths of 2,000 meters (6,560 feet), nine may operate in water depths of 2,400 meters (7,830 feet), and one will drill in water depths of 3,000 meters (9,840 feet). All of such new rigs will be chartered.

In 2008, higher oil prices contributed to cost inflation in the industry and reduced availability of oil and gas production equipment. We have taken measures to minimize cost and risk by simplifying and standardizing our equipment, wherever possible. We are increasing our use of industry-standard equipment instead of developing our own custom-made standards and equipment. We also intend to minimize costs by dividing engineering procurement and construction packages into smaller pieces and purchasing equipment from or contracting with a greater number of competitors, as well as by increasing oversight over suppliers.

Reserves

On December 31, 2008, our estimated reserves of crude oil and natural gas in Brazil totaled 10.3 billion barrels of oil equivalent, including: 8.7 billion barrels of crude oil and natural gas liquids and 247.6 bnm³ (9.3 tcf) of natural gas. As of December 31, 2008, our domestic proved developed crude oil reserves represented 61% of our total domestic proved developed and undeveloped crude oil reserves. Our domestic proved developed natural gas reserves represented 54% of our total domestic proved developed and undeveloped natural gas reserves. Total domestic proved crude oil reserves decreased at an average annual rate of 1% in the last

five years. Natural gas proved reserves increased at an average annual rate of 3% over the same period. Recent discoveries in our pre-salt reservoirs are still under evaluation and are not included in our proved reserves.

We are in discussions with ANP about the possible extension of the production concessions we hold for our major producing fields. In 2007 and 2008, we received a positive response from ANP about extending the concession for the Albacora Leste, Barracuda, Marlim Leste, Marlim Sul, Roncador, Marlim, Espadarte, Albacora, Jubarte, Cachalote,

Baleia Franca, Candeias, Canto do Amaro, Ubarana and Siririzinho fields, which resulted in an increase in our proved reserves in those fields. We are discussing with ANP similar amendments to other production concessions.

See Overview of the Group, and Supplementary Information on Oil and Gas Producing Activities in our audited consolidated financial statements for further details on our proved reserves.

Supply (Downstream Brazil)

We are an integrated company with a dominant market share in our home market. As of December 31, 2008, we operated 98.4% of Brazil's total refining capacity and we supplied almost all of the refined product needs of third-party wholesalers, exporters and petrochemical companies, in addition to the needs of our Distribution segment. We own and operate eleven refineries in Brazil, with a total net distillation capacity of 1,942 mbbbl/d, making us the world's eighth largest refiner among publicly traded companies.

We operate a large and complex infrastructure of pipelines and terminals and a

Table of Contents

shipping fleet to transport oil products and crude oil to domestic and export markets. Most of our refineries are located near our crude oil pipelines, storage facilities, refined product pipelines and major petrochemical facilities, facilitating access to crude oil supplies and end-users.

We also import and export crude oil and oil products. We import certain oil products, particularly diesel, for which Brazilian demand exceeds refining capacity. We expect the need for imports to decline in the future as we build

additional refining capacity and upgrade our refineries to facilitate the processing of domestically produced crudes. We export our surplus heavy crude oil, and expect exports to increase as our production increases more rapidly than Brazilian demand for oil.

Our Supply segment also includes petrochemical and fertilizer operations that add value to the hydrocarbons we produce and provide beneficial inputs to the growing Brazilian economy.

Supply Key Statistics

	2008	2007 (U.S.\$ million)	2006
Supply:			
Net operating revenues	96,202	69,549	57,959
Income (loss) before minority interest and income tax	(2,956)	4,171	3,850
Total assets at December 31	27,521	31,218	20,820
Capital expenditures	7,234	4,488	1,936

Refining

Our refining capacity in Brazil as of December 31, 2008, was 1,942 mbb/d and our average throughput during 2008 was 1,765 mbb/d.

The following table shows the installed capacity of our Brazilian refineries as of December 31, 2008, and the average daily throughputs of our refineries in Brazil and production volumes of principal oil products in 2008, 2007 and 2006.

Name (Alternative Name)(1)	Location	Crude Distillation Capacity at December 31, 2008 (mbbl/d)	Average Throughput		
			2008	2007	2006
			(mbbl/d)

Total		1,942	1,765	1,779	1,746

(1) We have a 100% interest in each of these refineries, with the exception of REFAP, in which we have a 70% share.

The crude oil we currently produce in Brazil is heavy or intermediate, while our refineries were originally designed to run on lighter imported crude. We import some lighter crude to balance the slate for our refineries and are investing in our refinery

system to maximize our ability to process heavier domestic crude. These investments will give us the flexibility to adjust our mix between heavy and light crudes to take advantage of market prices and match our refinery outputs to product demand.

Table of Contents

In general, we plan to invest in refinery projects designed to:

- enhance the value of Brazilian crude oil by increasing our capacity to refine greater quantities of the heavier crude oil that is produced domestically;
- increase production of oil products that the Brazilian market demands but that we must currently import, such as diesel;
- improve gasoline and diesel quality to comply with stricter environmental regulations currently being implemented; and
- reduce emissions and pollutant streams.

We are in the early stages of building a new 230 mbb/d refinery at Abreu e Lima in Northeastern Brazil in a proposed partnership with PDVSA, the Venezuelan state oil company. This refinery is designed to process 16° API crude and will produce 162 mbb/d of diesel as well as LPG, naphtha, bunker fuel and petroleum coke.

We are also planning two new refineries located in Northeastern Brazil: Premium I and Premium II with capacity of 600 mbb/d and 300 mbb/d, respectively. These refineries are designed to process heavy crude oil (20° API) and to maximize production of low-sulfur diesel in addition to LPG, naphtha, low-sulfur kerosene, bunker fuel and petroleum coke.

The following table shows our most significant planned investments in our refineries for 2009 to 2013:

Planned Investments 2009-2013	(U.S.\$ million)
Quality (diesel and gasoline)	13,196
Cokers	4,602
Expansion and metallurgic adaptation	590
Total	18,388

Major Refinery Projects

In addition to the new projects mentioned above, our 2009-2013 Business Plan includes investments in several key refineries, primarily for hydro-treating units to reduce sulfur and meet international standards and coking units capable of converting heavy oil into lighter products. These investments will allow us to begin offering diesel in metropolitan areas containing a maximum sulfur content of 50 parts per million, significantly lower than current levels in 2009. Of our total U.S.\$18.4 billion in planned refinery investments for 2009 to 2013,

Table of Contents

U.S.\$13.2 billion will be used for improving diesel and gasoline quality and U.S.\$4.6 billion for delayed coking units to convert fuel oil into lighter fractions. The principal planned investments are:

Refinery (Alternative Name)	Objective
RECAP (Capuava)	Upgrade diesel and gasoline quality
REDUC (Duque de Caxias)	Increase heavy oil processing, upgrade diesel and gasoline quality
REFAP (Alberto Pasqualini)	Upgrade diesel and gasoline quality
REGAP (Gabriel Passos)	Upgrade diesel and gasoline quality
REMAN (Isaac Sabbá)	Install mild thermal cracking units to upgrade the quality of diesel and gasoline
REPAR (Presidente Getúlio Vargas)	Expand refinery, increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
REPLAN (Paulínia)	Expand refinery, increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
REVAP (Henrique Lage)	Increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
RLAM (Landulpho Alves)	Upgrade diesel and gasoline quality
RPBC (Presidente Bernardes)	Upgrade diesel and gasoline quality

Imports and Exports

We use exports and imports of crude oil and oil products to balance our domestic production and refinery capacity with market needs and optimize our refining margins, importing light crude for our refineries and exporting heavier crude that is surplus to our needs. We import diesel due to insufficient production in our Brazilian refineries and export gasoline, largely because ethanol and vehicular natural gas provide a substantial share of Brazil's light vehicle transportation fuels. We also export fuel oil and approximately 79% of our bunker fuel production.

The table below shows our exports and imports of crude oil and oil products in 2008, 2007 and 2006:

	2008	2007 (mmbbl/d)	2006
Exports(1)			
Crude oil	439	353	335
Fuel oil (including bunker fuel)	152	160	168
Gasoline	40	59	44
Other	42	43	34
Total exports	673	615	581

Imports

Crude oil	373	390	370
Diesel and other distillates	100	83	56
LPG	40	29	27
Naphtha	23	17	20
Other	34	19	15
Total imports	570	538	488

(1) Includes sales made by PifCo to unaffiliated third parties, including sales of oil and oil products purchased internationally.

Logistics and Infrastructure

We own and operate an extensive network of crude oil and oil products pipelines in Brazil that connect our terminals, refineries and other primary distribution points. On December 31, 2008, our

onshore and offshore, crude oil and oil products pipelines extended 13,830 km (8,595 miles). We operate 26 marine storage terminals and 20 other tank farms with nominal aggregate storage capacity

Table of Contents

of 65 million barrels. Our marine terminals handle an average 5,000 vessels annually.

We operate a fleet of owned and chartered vessels. These provide shuttle services between our producing basins offshore Brazil and the Brazilian mainland, domestic shipping and international shipping to other parts of South America, the Caribbean Sea and Gulf of Mexico, Europe, West Africa and the Middle East. The fleet includes double-hulled vessels, which operate internationally where required by law, and single-hulled vessels, which operate in South America and Africa only. According to our 2009-2013 Business Plan, we will contract with Brazilian shipyards to construct 49 new vessels by 2015. The new ships are needed to upgrade our fleet and handle increased production volumes. Upgrades will include replacing single-hulled tankers with double-hulled vessels and

replacing vessels nearing the end of their 25-year useful life.

We have signed contracts with three shipyards for 23 of these vessels for delivery between 2010 and 2014, including:

ten Suezmax and five Aframax ships to be constructed by the Atlantico Sul shipyard, in Suape, Pernambuco;

four Panamax ships to be constructed by the EISA shipyard in Rio de Janeiro; and

four tankers to be constructed by the Mauá shipyard in Niterói.

We expect that we will continue to charter additional vessels as needed in the future.

The table below shows our operating fleet and vessels under construction as of December 31, 2008.

	In Operation		Under Construction	
		000 Tons		000 Tons
	Number	Deadweight	Number	Deadweight
		Capacity		Capacity
Owned fleet:				
Tankers	45	2,666,082	23	2,620,450
LPG tankers	6	40,146	0	0
Anchor Handling Tug Supply (AHTS)	1	1,920	0	0
Floating, Storage and Offloading (FSO)	1	28,903	0	0
Layed-up vessel	1	143,929	0	0
Total	54	2,880,980	23	2,620,450

PG tankers	24	539.09		

Total	135	11,631.85
-------	-----	-----------

Prior to the 1997 Oil Law, we held a monopoly on Brazilian oil and natural gas pipelines and shipping oil products to and from Brazil. The Oil Law provided for open competition in the construction and operation of pipeline facilities and gave the ANP the power to authorize other entities to transport crude oil, natural gas and oil products. We subsequently transferred our transportation and storage network and fleet to a separate wholly owned subsidiary, Petrobras Transporte S.A. Transpetro. The transfer was required by the Oil Law and facilitates access to excess capacity by third parties on a non-discriminatory basis. We enjoy preferred access to the Transpetro network based on our historical usage levels. In practice, third parties make very limited use of this network.

We have distributed ethanol to the domestic market through our pipelines for 30 years. As the global demand for ethanol has increased, we are investing to expand our ethanol pipeline and logistics capacity, including:

converting the existing oil products pipeline between Guararema and Guanabara Bay to transport 2.88 mmm³/y of ethanol by June 2010, with a plan to expand to 4 mmm³/y by December 2010; and

building a new ethanol pipeline from Paulínia to São Sebastião to transport 12.9 mmm³/y of ethanol, primarily for export.

Table of Contents

Petrochemicals and Fertilizers

Our petrochemicals operations provide a growing market for the crude oil and other hydrocarbons we produce, increase our value added and provide domestic sources for products that would otherwise be imported. We aim to expand our petrochemicals operations in Brazil and elsewhere in South America and to integrate these into our overall business.

Our strategies are to:

increase domestic production of basic petrochemicals and engage in second generation and biopolymers activities through investments in companies in Brazil and abroad, capturing synergies within all our businesses; and

increase production of fertilizers in order to supply the Brazilian market.

In the past, the Brazilian petrochemicals industry was fragmented into a large number of small companies, many of which were not internationally competitive and were therefore poor customers for our petrochemical feedstocks.

In 2008, we participated in the consolidation and restructuring of the Brazilian petrochemicals industry.

In June 2008, we combined our interests in Suzano Petroquímica (Suzano), including our interest in Rio Polímeros S.A. and Petroquímica União, with certain petrochemical assets of União de Indústrias Petroquímicas S.A. (Unipar) in a new company, Quattor Participações (Quattor). Both we and Unipar increased production of polyolefins and basic petrochemicals as a result of this joint venture.

Also in 2008, Odebrecht S.A., Nordeste Química S.A. and Braskem S.A. (Braskem) implemented a similar restructuring in connection with the acquisition of Ipiranga Química's assets.

We and our partners combined our interests in certain petrochemical companies at Braskem.

As a result of this restructuring, we hold minority stakes in the two principal companies in the Brazilian petrochemical industry, Quattor (40% of total capital, 40% of voting stock) and Braskem (23.8% of total capital, 31% of voting stock).

Quattor and Braskem together operate 27 petrochemical plants producing basic petrochemicals and plastics, and related distribution and waste processing operations. The table below shows the primary production capacities of each of Quattor and Braskem as of December 31, 2008.

Petrochemical Materials	Nominal Capacity (mmt/y)
Quattor Participações	
Ethylene	1.02
Propylene	0.32

Cumene	0.31
Polyethylene	1.01
Polypropylene	0.88
Braskem	
Ethylene	2.48
Propylene	1.13
Polyethylene	1.82
Polypropylene	1.04
PVC	0.52

Through our minority holdings in Brazil's two new major petrochemicals companies, we can better participate in planning the industry's future needs.

We have four new petrochemicals projects under construction or in various stages of engineering or design:

Complexo Petroquímico do Rio de Janeiro - Comperj: a 150 mbb/d petrochemical facility that will use

our innovative proprietary Petrochemical FCC technology to convert Brazilian heavy crude into basic and intermediate petrochemicals, plastic resins, aromatics, coke, diesel oil and naphtha. We are in the process of selecting strategic partners and planning this project with a goal of starting up in 2012;

Companhia Petroquímica de Pernambuco - PetroquímicaSuape: a 700,000 t/y purified terephthalic

Table of Contents

acid plant to start up in 2010. PetroquímicaSuape was originally a joint venture between Companhia Integrada Têxtil do Nordeste Citene and Petroquisa. In August 2008, Citene declared its intention to withdraw from this partnership and Petroquisa subsequently acquired 100% of the project. Construction began in 2008;

Companhia Integrada Têxtil de Pernambuco Citepe: a 240,000 t/y of polyester yarn facility expected to start up in 2010; and

Companhia de Coque Calcinado de Petróleo Coquepar: two calcined petroleum coke plants, one in Rio de Janeiro and one in Paraná, with a combined capacity of 700,000 t/y. The first of the two plants is expected to start up in 2011. Coquepar is a joint venture between Petroquisa (40%), Unimetal (30%) and Brazil Energy (30%).

Our fertilizer plants in Bahia and Sergipe produce ammonia and urea for the Brazilian market. In 2008, these plants sold a combined 231,000 t of ammonia and 695,000 t of urea. We are currently conducting feasibility studies for two additional fertilizer facilities:

Bahia: 120,000 t/y nitric acid plant to supply Pólo Petroquímico de Camaçari; and

South-Central Brazil: facility (UFN-3) to produce 1 million t/y of urea and 760,000 t/y of ammonia from natural gas.

Distribution

Our Distribution segment sells oil products that are primarily produced by our Supply operations and works to expand the domestic market for these and other liquid and transportation fuels. Our primary goals are to: create value by meeting growing customer needs for fuels, including both traditional hydrocarbons and biofuels; and sustain and expand our market share by providing superior quality, service and leadership in the growing biofuels sector.

We supply and operate Petrobras Distribuidora S.A. BR, which accounts for 34.9% of the total Brazilian distribution market, according to the ANP. BR distributes oil products, ethanol and biodiesel, and vehicular natural gas to retail, commercial and industrial customers. In 2008, BR sold the equivalent of 698.0 mbbbl/d of oil products to wholesale and retail customers, of which the largest portion (39.6%) was diesel.

Distribution Key Statistics

	2008	2007	2006
	(U.S.\$ million)		
Distribution:			
Net operating revenues	30,892	23,320	18,681
Income before minority interest and income tax	1,245	676	451
Total assets at December 31	4,775	5,652	3,675
Capital expenditures	309	327	351

At December 31, 2008, our BR network included 5,998 service stations, or 17.1% of the stations in Brazil. This total does not include the 784 stations in Northern, Northeastern and Northwestern Brazil that we acquired from Ipiranga in 2007, and which were incorporated into the BR network in April 2009. See Supply Petrochemicals and Fertilizers. The integration of Ipiranga and its service stations into our network was approved by the *Conselho Administrativo de Defesa Econômica*, or CADE (Brazilian Antitrust Authority) in December 2008.

BR was Brazil's leading service station in 2008, with BR-owned and franchised stations making 26.3% of Brazil's retail diesel, gasoline, ethanol, vehicular natural gas and lubricant sales, according to the ANP. Most BR stations are owned by franchisees that use the BR brand name under license and purchase exclusively from us; we also provide technical support, training and advertising. We own 656 of the BR stations and are required by law to subcontract the operation of these owned stations to third parties.

The retail fuel market in Brazil is highly competitive and we expect that prices will be

Table of Contents

subject to continued pressure. We seek to enhance profitability and customer loyalty by building on our strong brand image and providing superior quality and service. We believe that our market share position is supported by a strong BR brand image and by the remodeling of service stations and the addition of lubrication centers and convenience stores.

The primary fuel used in Brazil is diesel, which accounts for approximately 766.8 mbbbl/d (45.5%) of the total Brazilian fuels market. By law, all diesel sold in Brazil from July 2008, was required to be at least 3% biodiesel; this proportion will be increased to 4% in July 2009. We acted as a catalyst for developing the new market by securing and blending biodiesel supplies and furnishing these to smaller distributors as well as our own service stations. Brazil is a global leader in the use of ethanol as a fuel for light vehicles. Today, 91.2% of new gasoline vehicles sold in Brazil have flexfuel capability, and service stations offer a choice of 100% ethanol as well as a blend of 25% ethanol and gasoline, as required by the regulator. Although we do not produce ethanol, we have supported the development of that market by distributing and wholesaling ethanol and by stimulating improvements in product quality.

Service stations in our network also sell vehicular natural gas. The number of stations offering this product increased to 453 in December 2008, from 409 in December 2007, and total gas sales in 2008 were 566 mmm³ (19,989 mmcf).

We also distribute oil products and biofuels under the BR brand to commercial and industrial customers. Our customers include aviation, transportation and industrial companies, as well as utilities and government entities, all of which generate relatively stable demand.

We also sell oil products produced by our Supply operations to other retailers and to wholesalers.

Our LPG distribution business, Liquigas Distribuidora, held a 22.3% market share and ranked third in LPG sales in Brazil in 2008, according to the ANP.

We participate in the retail sector in other Latin American countries through our International business segment. See International.

Gas and Energy (Gas, Power and Renewables Brazil)

For many years, we have been simultaneously developing Brazil's natural gas reserves, infrastructure and markets. As part of this process, we developed gas sources off shore Brazil and in Bolivia, the Bolivia-Brazil gas pipeline, a domestic transportation system and gas-fired electric power generation capacity. We built two LNG terminals in 2008 to supplement our domestic supply of natural gas. These initiatives contributed to increase our supply of natural gas from approximately 11.0 mmm³/d (388.5 mmcf/d) in 1999 to 60.7 mmm³/d (2,143.6 mmcf/d) in 2008. Natural gas supplied 3.7% of Brazil's total energy needs in 1998 compared to 10.3% today and a projected 14.0% in 2010, according to Empresa de Pesquisa Energética, a branch of the Ministry of Mines and Energy.

The development plans of our Exploration and Production operations are expected to result in substantial increases in gas production from the Espírito Santo and Santos basins off the Brazilian coast, including from pre-salt reservoirs. We are investing in transportation infrastructure to deliver these new volumes to markets in Northeastern and Southeastern Brazil and to improve the flexibility of our distribution system. Natural gas imported from Bolivia will play a lesser though still important role in our operations as we increase domestic gas production. We are also improving our commercial operations through a suite of natural gas sales contracts that better allow us to match supply and demand for gas and electric power.

Our primary goals for our gas and energy segment are to:

add value by monetizing Petrobras' natural gas reserves;

assure flexibility and reliability in the commercialization of natural gas in thermoelectric and non-thermoelectric markets;

expand our LNG business to meet demand and diversify our supply of natural gas; and

optimize our thermoelectric power plant portfolio.

Table of Contents*Gas and Energy Key Statistics*

	2008	2007 (U.S.\$ million)	2006
Gas and Energy:			
Net operating revenues	8,802	4,912	4,090
Loss before minority interest and income tax	(504)	(947)	(414)
Total assets at December 31	14,993	15,536	9,597
Capital expenditures	4,256	3,223	1,664

Natural Gas

Our natural gas business comprises three activities: transportation (building and operating natural gas pipeline networks in Brazil); equity participation in distribution companies that sell natural gas to end-users; and commercialization (purchase and resale).

Transportation

Our natural gas transportation system in Brazil comprises two main pipeline networks – the 4,413 km (2,743 mile) Malha Sudeste (Southeast Network), which connects our main offshore natural gas producing fields in the Campos and Espírito Santo basins to the growing markets of the Southeast Region, including Rio de Janeiro and São Paulo, and the 1,980 km (1,231 mile) Malha Nordeste (Northeast Network), which transmits gas from onshore and offshore natural gas fields in the Northeast to consumers in that region. The Southeast Network includes the 2,593 km (1,612 mile) Brazilian portion of the Bolivia-Brazil natural gas pipeline. The two main pipeline networks will be linked by the Southeast Northeast Interconnection Gas Pipeline (GASENE), which we expect to be completed by the first quarter of 2010. In the Northern Region, the 660 km (410 mile) Urucu-Coari-Manaus pipeline will connect the Solimões Basin to Manaus, where natural gas will be used primarily to generate electric power, and also to meet industrial, commercial and retail demand.

In 2008, we invested U.S.\$3.3 billion to improve and expand our natural gas transportation system. We extended our natural gas transport system by a total of 776 km (482 miles) to 6,933 km (4,309 miles), including the following additions to the Southeast and Northeast Networks:

303 km (188 mile) gas pipeline linking Cabiúnas to Vitória, the site of the gas processing facility that handles gas produced from the Campos

Basin. This pipeline has the capacity to transport up to 20 mmm³/d (707 mmcf/d) from the Espírito Santo Basin to the Southeast Region;

255 km (158 mile) addition to the Campinas – Rio pipeline in the Southeast Region with capacity to transport up to 8.6 mmm³/d (303.7 mmcf/d) of natural gas, increasing our ability to deliver volumes imported via the Bolivia-Brazil gas pipeline to market;

196 km (122 mile) gas pipeline linking Catu to Itaporanga with the capacity to transport up to 10 mmm³/d (353 mmcf/d) of natural gas from the Manati gas field and other sources to the Northeast Region; and

22 km (14 mile) gas pipeline linking the Pecém LNG terminal to our distribution network in the Northeast Region with capacity to transport up to 7 mmm³/d (247 mmcf/d) of natural gas.

In addition, we are in the final stages of a pipeline construction program that will connect most of Brazil's principal gas pipelines, allowing gas to be transported through pipelines from the South to the Northeast of the country and from the Solimões Basin to the Amazonian market. This will increase the capacity and flexibility of our natural gas networks and allow us to make better use of growing gas supplies. We expect that the program will be completed by the first quarter of 2010. The program includes:

constructing the 954 km (593 mile) final section of the GASENE, completing the link between Malha Sudeste and Malha Nordeste. This pipeline will transport up to 20 mmm³/d (707 mmcf/d) from

Table of Contents

Cacimbas to the city of Catu in the State of Bahia and will be completed in the first quarter of 2010; and completing the 660 km (410 mile) Urucu-Coari-Manaus pipeline, which will supply up to 5.5 mmm³/d (194 mmcf/d) of natural gas from the Solimões Basin to the city of Manaus starting in the third quarter of 2009.

The map below shows our existing pipelines and our pipelines under construction.

We have completed construction of two LNG terminals, one in Rio de Janeiro with a send-out capacity of 20 mmm³/d (706 mmcf/d) that was completed in January 2009, and the other in Pecém in Northeastern Brazil with a send-out capacity of 7 mmm³/d (247 mmcf/d) that was completed in December 2008. The terminals will be supported by two large LNG regasification ships with a capacity of 14 mmm³/d (494 mmcf/d) and 7 mmm³/d (247 mmcf/d), respectively. The new terminals and regasification ships give us the flexibility to import gas from other sources to supplement domestic natural gas supplies. We have negotiated and signed with several

companies LNG supply contracts and Master Sales Agreements that will be used to acquire spot cargoes as needed.

Equity Participation in Distribution Companies

Under Brazilian law, each state holds a monopoly over local gas distribution. Most states have formed companies to act as local gas distributors and we hold interests that vary from 24% to 100% in 20 of these 27 distribution companies. Nonetheless, in all of the companies where we hold a minority stake, we appoint executive officers and members of the board of

Table of Contents

directors. The State of Espírito Santo has assigned us exclusive rights to distribute natural gas through our BR subsidiary. In 2008, Brazil's distribution

companies sold a combined 50 mmm³/d (1,732 mmcf/d) of natural gas, of which our share was 22%, according to our estimates.

The map below shows the name and location of each local gas distributor in which we have an equity interest and our share in those companies.

Our most significant distribution holdings are:

Name	State	Group Share %	Average Gas Sales	
			in 2008 (mmm ³ /d)	Customers
CEG RIO	Rio de Janeiro	37.40	8.99	21,537
BAHIAGAS	Bahia	41.50	3.47	277
GASMIG	Minas Gerais	40.00	2.41	269
BR	Espirito Santo	100.00	1.83	13,480

According to our estimates, our two most significant holdings, CEG Rio and Bahiagás, sold 18.3% and 7.1% of Brazil's national gas volumes in 2008, respectively. CEG Rio and Bahiagás are Brazil's second and fourth largest gas distributors. These companies, together with independent distributors Comgás (28.3% of Brazil's 2008 national gas volumes) and CEG (17.3% of the same), supply 71% of the Brazilian market.

Commercialization

In 2008, our Gas and Energy segment supplied an average 60.7 mmm³/d (2,143.6 mmcf/d) of natural gas for consumption. Of the 2008 total, 18.3% was used in our refineries, 21.1% was used for thermoelectric power generation and the remaining 60.6% was consumed by industrial, commercial and retail natural gas users.

Table of Contents

In 2008, our Exploration and Production segment supplied 50% of our total gas needs and we imported the balance of 50% from Bolivia. We expect the proportion of domestic gas in our total

supply mix to increase in future years as our Exploration and Production segment brings new gas fields on stream.

The table below shows the sources of our natural gas supply, our sales and internal consumption of natural gas, and our revenues for each of the past three years:

Supply and Sales of Natural Gas	2008	2007 (mmm³/d)	2006
Sources of natural gas supply			
Domestic production	30.3	22.4	21.9
Imported from Bolivia	30.4	26.9	24.4
Liquified Natural Gas	0.0	0.0	0.0
Total natural gas supply	60.7	49.3	46.3
Sales of natural gas			
Sales to local gas distribution companies(1)	36.8	35.1	33.7
Sales to gas-fired power plants	12.8	4.1	6.1
Total sales of natural gas	49.6	39.3	39.8
Internal consumption (refineries and gas-fired power plants)(2)	11.1	10.0	6.5
Revenues (U.S.\$ billion)(3)	6.0	3.4	1.8

(1) Includes sales to local gas distribution companies in which we have an equity interest.

(2) Includes gas used in the transport system.

(3) Excludes internal consumption.

The table below shows how the natural gas we supplied was utilized in our principal markets from 2006 to 2008:

Natural Gas Consumption	2008	2007 (mmm³/d)	2006
Industrial, commercial and retail	36.8	35.1	33.7
Gas-fired power plants	14.7	5.8	6.1

Refineries	7.9	10.3	6.5
------------	-----	------	-----

Consumption by industrial, commercial and retail natural gas customers increased 4.5% per year from 2006 to 2008. The increase in the non-thermoelectric market was due mainly to the competitive price of natural gas compared to fuel oil, the primary energy alternative. Thermoelectric consumption increased 153% from 2007 to 2008, due primarily to increased participation by gas-fired plants in Brazil's power grid.

Gas Sales Contracts and Pricing

In 2007, we adopted a new suite of gas contracts that offer customers four different supply options to give us the flexibility to match our gas sales more closely to the volumes we have available. The principal characteristics of these contracts are:

Firm Inflexible: the distributor assures payment under take-or-pay contracts and we guarantee delivery of the contracted volume.

Firm Flexible: we may interrupt supplies in accordance with negotiated conditions, in which case we agree to supply a substitute fuel and compensate the end user for additional costs. The price is equivalent to the gas sold under Firm Inflexible contracts.

Interruptible: we have the right to interrupt supplies in accordance with negotiated conditions and the distributor or end user is responsible for finding alternative fuels. The distributor pays a lower price for gas under this type of contract.

Preferential: we are obligated to provide natural gas as demanded, but the consumer has the right to interrupt purchases at any time. We expect this type of contract to be used predominantly by thermoelectric customers using LNG.

Table of Contents

The price of gas under the first three contracts includes a fixed component, which is revised annually based on the IGP-M inflation index, and a variable component, which is revised quarterly based on a fuel oil basket and exchange rate variation. Preferential contracts are priced based on a fixed component, which is revised annually based on the IPCA inflation index, and a variable component based on the price of imported LNG, which is revised monthly based on the Henry Hub rate and exchange rate variation.

During 2008, we converted nine out of 18 customers to the new contracts in addition to the three customers converted in 2007. Of our total sales of 36.8 mmm³/d (1,299.6 mmcf/d) to distribution companies in the non-thermoelectric market in 2008, approximately 53% was delivered under the new contracts. We will use the new contracts to deliver up to 63% of the volumes committed to the non-thermoelectric market through 2012.

The table below shows the volumes committed to the non-thermoelectric market through 2012 under the new supply contracts:

Year Contract Signed	Type of Supply Contract			Total
	Firm Inflexible	Firm Flexible (mmm ³ /d)	Interruptible	
2007	7.37	1.75	2.6	11.72
2008	15.24	2.03	1.90	19.17
Total	22.61	3.78	4.50	30.89

The table below shows our future gas supply commitments from 2009 to 2013, including sales to both local gas distribution companies and gas-fired power plants.

Natural Gas Sales Contracts	2009	2010	2011 (mmm ³ /d)	2012	2013
To local gas distribution companies:					
Related parties(1)	15.06	17.16	18.66	19.23	19.50
Third parties	17.63	18.09	17.68	17.36	17.21
To gas-fired power plants:					
Related parties(1)	4.71	3.57	4.65	3.72	3.39
Third parties	0.82	6.38	7.06	8.00	8.71
Total(2)	38.22	45.20	48.05	48.31	48.81
Estimated contract revenues (U.S.\$ billion)(3)(4)	3.5	4.0	4.5	4.8	5.0

(1)

For purposes of this table, related parties include all local gas distribution companies and power generation plants in which we have an equity interest and third parties refer to those in which we do not have an equity interest.

- (2) Estimated volumes are based on take or pay agreements in our contracts, expected volumes and contracts under negotiation, not maximum sales.
- (3) Figures show revenues net of taxes. Estimates are based on outside sales and do not include internal consumption or transfers.
- (4) Prices may be adjusted in the future and actual amounts may vary.

Long-Term Natural Gas Commitments

When we invested in the Bolivia-Brazil pipeline in 1996, we entered into a series of long-term contracts with three companies:

Gas Supply Agreement (GSA) with the Bolivian state-owned company Yacimientos Petrolíferos Fiscales Bolivianos (YPFB) to purchase certain minimum volumes of natural gas at prices linked to the international fuel oil price through 2019, after which the agreement

may be extended until all contracted volume is delivered. In February 2007, we agreed to make additional payments to YPFB for liquids contained in the natural gas purchased through the GSA, in the amount of between U.S.\$100 million and U.S.\$180 million per year. The amendment to the GSA is still under negotiation, and payment will be retroactive to May 2007;

Table of Contents

Ship-or-Pay agreement with Gás Transboliviano (GTB), owner and operator of the Bolivian portion of the pipeline to transport certain minimum volumes of natural gas through 2019; and

Ship-or-Pay agreement with Transportadora Brasileira Gasoduto Bolivia-Brasil (TBG), owner and operator of the Brazilian portion of the pipeline to transport certain minimum volumes of natural gas through 2019.

Our volume obligations under the ship-or-pay arrangements were generally designed to match our gas purchase obligations under the GSA. The tables below show our contractual commitments under these agreements for the five-year period from 2009 through 2013.

Commitments to Purchase and Transport Natural Gas	2009	2010	2011	2012	2013
Purchase commitments to YPFB					
Volume obligation (mmm ³ /d)(1)	24.06	24.06	24.06	24.06	24.06
Volume obligation (mmcf/d)(1)	850.00	850.00	850.00	850.00	850.00
Brent crude oil projection (U.S.\$)(2)	58.00	61.00	72.00	74.00	68.00
Estimated payments (U.S.\$ million)(3)	1,488.00	1,235.00	1,359.00	1,475.00	1,441.00
Ship-or-pay contract with GTB					
Volume commitment (mmm ³ /d)	30.00	30.00	30.00	30.00	30.00
Volume commitment (mmcf/d)	1,059.00	1,059.00	1,059.00	1,059.00	1,059.00
Estimated payments (U.S.\$ million)(4)	59.08	59.37	59.67	59.98	60.28
Ship-or-pay contract with TBG					
Volume commitment (mmm ³ /d)	30.00	30.00	30.00	30.00	30.00
Volume commitment (mmcf/d)	1,059.00	1,059.00	1,059.00	1,059.00	1,059.00
Estimated payments (U.S.\$ million)(4)	398.21	400.20	402.20	404.21	406.23

(1) 25.3% of contracted volume supplied by Petrobras Bolivia.

(2) Brent price forecast based on our 2009-2013 Business Plan.

(3) Current prices. Gas prices may be adjusted in the future based on contract clauses and actual amounts may vary.

(4) Amounts calculated based on current prices defined in natural gas transport contracts.

Power

Brazil has a total of 98,809 MW of installed electric power capacity, of which around 81% is in low-cost hydroelectric stations that supply around 89% of the country's electric power needs. While hydroelectric power facilities have many advantages, and are particularly suited to meeting base electric power needs, they cannot be readily expanded, have limited ability to meet surges in demand and are vulnerable to periods of prolonged drought. Brazil has accordingly been developing thermoelectric power generation capacity to supplement the base hydroelectric system.

Thermoelectric generation is expected to play an increasing role in meeting Brazil's power needs as the country's economic growth fuels the demand for energy.

As part of this national trend, we have been developing and operating gas-fired thermoelectric power generation plants. We currently own stakes in 23 thermoelectric power plants, and we control 14 of them. As a result of our investments in the power sector, we currently provide 50% of the total gas-fired thermoelectric installed capacity in Brazil, according to the ANEEL.

During 2008, we generated 2,025 MWavg of electricity, of which 78% was generated in the Southeast Region of the country, 8% in the South, and 14% in the Northeast.

Electricity Sales

We participate in the Brazilian power market by selling standby availability to public utilities in regulated auctions and entering into bilateral contracts primarily with power distribution companies. We sold an average of 1,902 MWavg in 2008 compared to an average of 1,535 MWavg in 2007, a 24% increase. Our strategy also includes exporting energy to neighboring countries. In 2008, we exported 39.4 MWavg to Argentina and Uruguay.

Our gas-fired power plants have 4,550.0 gross MW of installed capacity, equal to about 5% of Brazil's total power grid. We also control one oil-fired thermoelectric power plant with 31.8 gross MW of installed capacity. At year-end 2008, however, we had only 1,815 MW of commercial capacity at these plants due to gas supply constraints.

Commercial capacity is the power-generating capacity that the Brazilian regulator allows us to sell as determined by a certification process.

Table of Contents

The table below shows our installed capacity, certified commercial capacity and electricity generation for each of the last three years:

Petrobras Installed Capacity and Utilization	2008	2007 (MW)	2006
Gross installed capacity	4,581.8	4,261.8	4,143.0
Net installed capacity	4,427.0	4,112.0	3,997.0
Certified commercial capacity(1)	1,595.0	1,682.0	2,083.0
Electricity generated(MWavg)	2,025.0	578.3	354.4

(1) Weighted average of certified commercial capacity for the year.

Standby Availability

Non-base-load thermoelectric plants like ours are used to supplement hydroelectric generation when needed. Historically, Brazil's power pricing regime made it difficult for such plants, which operate at low average utilization rates, to cover their operating costs and provide a return on capital. In 2004, Brazil enacted the New Regulatory Model for the power sector, under which public utilities are required to secure their expected energy needs under long-term contracts through auctions coordinated by the Ministry of Mines and Energy. Thermoelectric power generators bid in these auctions to supply standby availability up to their certified commercial capacity, although they will not necessarily be called upon to generate this power. Only that portion of our thermoelectric capacity defined as New Energy under the New Regulatory Model for the power sector is eligible to be sold through the auction system.

In the 2005 and 2006 auctions, we sold standby availability of 1,391 and 205 MWavg, respectively, on 15-year contracts beginning in 2008 to 2011. Under the terms of these contracts, we will be compensated a fixed amount whether or not we generate any power, and we receive an additional amount for the energy we actually generate at a price that is set on the date of the auction and revised annually based on an inflation-adjusted fuel oil basket. These contracts generate losses when our actual costs of generating power increase and our prices as adjusted by the formula do not rise accordingly. In the 2007 auction, we did not sell all our eligible available capacity because gas-fired plants were less competitive than other sources of power. We did not participate in the 2008 auction due to a lack of eligible thermoelectric capacity.

Bilateral Contracts

We sell most of the commercial capacity that is not defined as New Energy under long-term

bilateral contracts, primarily with power distribution companies. Such contracts are subject to the regulations that governed the power sector in Brazil before the enactment of the New Regulatory Model for the power sector. Under these agreements, we are compensated for our thermoelectric capacity based on a combination of factors, including whether or not we actually generate energy, the certified power generation capacity of each power plant, and conditions of supply and demand in Brazil's power market. Each of these factors are determined by the appropriate regulatory bodies in Brazil, including the Ministry of Mines and Energy, the *Operador Nacional do Sistema Elétrico* ONS (National Electricity System Operator), and the *Câmara de Comercialização de Energia Elétrica* CCEE (Electricity Trading Board).

Our revenues under these contracts have been reduced by the limited supply of natural gas, which affects the certified power generation capacity of our gas-fired plants. Even as we increase the available supply of natural gas, our earnings under these contracts are difficult to predict because the net margins are subject to adjustments coordinated by the CCEE. Additionally, the contracts do not permit us to directly pass on to our customers changes in the cost of acquiring natural gas. In 2009, 1,124 MWavg of our generating capacity will be subject to the terms of these bilateral contracts, with 1,032 MWavg committed in 2010, 1,030 MWavg in each of 2011 and 2012 and 1,029 MWavg in 2013. The agreements will run off gradually, with the last contract expiring in 2028.

During periods of high international gas prices and low demand for power in Brazil, it is often more profitable for us to sell our gas directly to the market than to generate contracted amounts of energy from our own gas-fired plants. Under these circumstances, we have the flexibility to fulfill our contractual commitments by purchasing power from third parties. In the past, limited

Table of Contents

supplies of natural gas affected our ability to generate electricity from our own thermoelectric plants, even when it would have been profitable for us to do so. Problems with our natural gas infrastructure also exposed us to fines when we were unable to deliver contracted amounts of electricity. We paid fines in the total amount of R\$434 million (U.S.\$236 million) in 2008, R\$89 million (U.S.\$48 million) of which related to events that occurred in 2007. We expect to be able to fully supply our gas-fired plants when our natural gas distribution network is completed in 2010. At that time, we expect to have even greater flexibility to decide, on a weekly basis, how best to utilize our gas resources in the thermoelectric or non-thermoelectric markets based on prevailing economic conditions.

Increasing Our Commercial Capacity

In May 2007, in accordance with rules applicable to the industry, we entered into an agreement with the ANEEL under which we are required to increase our ability to supply power to the grid from our own plants to 4,766.1 MW by 2011. We will accomplish this by increasing natural gas supplies, including LNG, converting some existing power plants to dual-fuel operation and leasing backup oil-fired power plants. Exclusive of our own power requirements, we expect to have an average 3,259 MW commercial capacity available for sale by 2011, of which approximately 49% has already been sold in the 2005 and 2006 auctions and 46% is subject to bilateral contracts.

The following table summarizes our commitments under standby availability and bilateral contracts, power purchased from third parties, and the power we expect to be available for sale if the infrastructure to deliver gas to our thermoelectric power plants is completed.

	2008	2009	2010	2011
		(MWavg)		
Standby availability contracts	352	821	1,391	1,596
Bilateral contracts	1,902	1,438	1,789	1,737
Commercial capacity(MW)(1)	1,595	2,707	3,543	3,724
Purchased from third parties	888	230	200	200
Available for sale(1)	229	679	563	591

(1) Projections based on existing capacity and expected supply of gas

Renewable Energy and Reduction of Greenhouse Gases (GHG)

We have also invested in a number of renewable power generation sources in Brazil including wind, solar and small hydroelectric plants. Our small hydroelectric plants have 243 gross MW of installed capacity, of which 73.4 MW is expected to become operational in 2009.

As part of our 2020 Strategic Plan, we adopted climate change guidelines to reduce GHG under the Clean Development Mechanism. Among our GHG reduction projects are the development of a wind energy plant in Northeastern Brazil, a small hydroelectric plant in Southeastern Brazil, power generation using turbo expanders at our refineries, reducing nitrous oxide emissions at our fertilizer plants and the use of waste heat for cogeneration at our refineries.

Our Internal Energy Conservation Program works to improve energy efficiency in all our units. In 2008, we avoided nearly 40 thousand tons of carbon dioxide emissions as a result of this program.

Bio-Renewables

We aim to become a major producer of biodiesel in Brazil and actively participate in Brazil's growing ethanol industry, particularly in the production, transportation and exportation of ethanol. Brazil has highly favorable climate and soil conditions for growing sugarcane and vegetable oil crops and is an important player in the international biofuels market.

Ethanol from sugarcane is widely used as a substitute for gasoline in Brazil. We do not currently produce ethanol, but distribute it through our Distribution business segment. We intend to expand our participation in the ethanol business through partnerships with ethanol producers and international offtakers where our role would primarily be as a producer, transporter and exporter of Brazilian ethanol. We also intend to participate in

Table of Contents

the growth of the domestic ethanol market by investing in ethanol plants that will reach 63.6 mbb/d of production by 2013.

In recent years, we invested in the introduction of biodiesel into the Brazilian market. By law, all diesel sold in Brazil was required to be at least 2% biodiesel since January 2008; this proportion was increased to 3% in July 2008. In an effort to adhere to this mandate, we have been securing and blending biodiesel supplies and furnishing these to smaller distributors as well as our own service stations.

We have signed contracts to secure the purchase of vegetable oils from family farmers and industrial producers in order to supply our three biodiesel plants with a combined capacity of 2,950 bbl/d. These plants are located in Northeastern Brazil at Candeias and Quixada and in Southeastern Brazil at Montes Claros. We intend to increase our participation in the industry, with a targeted installed capacity to produce 11 mbb/d of biodiesel in Brazil by 2013. The creation of Petrobras Biocombustível in July 2008 to consolidate all initiatives regarding ethanol and biodiesel production reinforces our commitment to the environment and social responsibility.

We have also developed a new refining technology (H-Bio) that allows us to introduce vegetable oils into our existing refineries to produce a cleaner form of diesel. Six of our refineries are already prepared to use H-Bio technology and we plan to adapt all of our refineries for this process, which will give us increased raw materials flexibility and access to markets seeking cleaner forms of diesel.

International

We have operations in 23 countries outside Brazil that encompass all phases of the energy business. Our primary goals for our international operations are to:

use our technical expertise in deepwater exploration and production to participate in high-potential and frontier offshore regions; and

expand and integrate international downstream operations with our domestic activities.

International Key Statistics

	2008	2007 (U.S.\$ million)	2006
International:			
Net operating revenues	10,940	9,101	6,071
Income (loss) before minority interest and income tax	(605)	(237)	571
Total assets at December 31	13,439	11,717	10,274
Capital expenditures	2,908	2,864	2,637

The net operating revenues of our International segment represented 9.3% of our total net operating revenues in 2008, (10.4% in 2007 and 8.4% in 2006). The total assets of our International segment at December 31, 2008 represented 10.7% of our total assets (9.0% in 2007 and 10.4% in 2006).

International Upstream Activities

We aim to integrate our operations by capturing synergies in our upstream and downstream operations within Latin America, North America and Asia. We are focusing our international upstream activities on areas such as the Gulf of Mexico and West Africa, where there are opportunities to leverage the deepwater expertise we have developed in Brazil. We also have

preliminary exploratory efforts underway in North Africa, Asia, Europe and the Middle East. Our recent discoveries of reserves in the pre-salt reservoirs in Brazil have led us to reduce our planned expenditures for international activities, relative to our domestic activities.

During 2008, we conducted exploration and production activities in 19 countries outside Brazil (Argentina, Bolivia, Colombia, Ecuador, Mexico, Peru, Venezuela, the U.S., Angola, Nigeria, Tanzania, Mozambique, Senegal, India, Portugal, Iran, Pakistan, Libya and Turkey). See [Overview of the Group](#) for information about production and reserves in individual countries.

During 2008, our capital expenditures for international exploration and production

Table of Contents

represented 16.1% of our total capital spending for exploration and production.

We have contracted three drilling units and one platform to support our ultra-deepwater

exploration operations in West Africa and the U.S. Gulf of Mexico, among other regions. These rigs will go into operation between 2009 and 2011 under five- to ten-year contracts.

The table below shows our international exploration expenditures and how these were distributed geographically in 2008, 2007 and 2006.

	2008	2007	2006
Total capex international exploration (U.S.\$ billion)	0.92	1.17	1.26
Of which:			
South America	9.74%	11.57%	11.70%
Argentina	5.43%	3.27%	6.40%
Bolivia	2.90%	0.01%	0.60%
Colombia	0.00%	6.67%	3.60%
Peru, Ecuador, Venezuela	1.41%	1.62%	1.10%
West Coast of Africa	4.47%	5.76%	43.70%
Gulf of Mexico	53.92%	23.72%	31.50%
Drilling rigs and other(1)	31.87%	58.95%	13.10%

(1) In 2008, 31.52% of the 31.87% relates to investments in drilling rigs.

In 2008, our net production outside Brazil averaged 123.6 mbbbl/d of crude oil and NGLs and 17.1 mmm³/d (602.6 mmcf/d) of natural gas. The table below shows our international development capital expenditures and how these were distributed geographically in 2008, 2007 and 2006.

	2008	2007	2006
Total capex international development (U.S.\$ billion)	1.62	1.39	1.04
Of which:			
South America	44.27%	40.55%	41.80%
Argentina	30.81%	21.48%	26.50%
Bolivia	1.21%	1.60%	1.30%
Colombia	4.80%	5.55%	2.80%
Peru, Ecuador, Venezuela	7.45%	11.92%	11.20%
West Coast of Africa	38.32%	36.05%	41.00%
Gulf of Mexico	17.41%	23.40%	17.20%

Latin America

We are active in nearly all of the key hydrocarbon basins of Argentina, Bolivia, Colombia, Ecuador, Mexico, Peru and Venezuela. In 2008, our average net production from the region (excluding Brazil) was 211.6 mboe/d, or 94.44% of our international production. Reserves in the region represent 86.27% of our international reserves.

Our largest operating region outside Brazil is **Argentina**, which in 2008 represented 44.65% of our international production. We operate in the country primarily through our 67.2% interest in Petrobras Energia S.A. (PESA). Our production is concentrated in the Neuquen, Austral and San Jorge basins with a smaller contribution from the Noroeste Basin. During 2008, we increased our stake in the Sierra Chata and Parva Negra blocks to 45.55% and 100%, respectively, and acquired a 13.72% stake in the El Tordillo and La Tapera Puesto Quiroga blocks. In addition, we signed an

agreement with two partners to explore two blocks in the Malvinas Basin and one block in the Golfo San Jorge Basin, in which Petrobras Energia S.A. (PESA) has a 33% interest. Our production in Argentina averaged 100.0 mboe/d in 2008. At December 31, 2008, our proved reserves were approximately 290.6 mmboe, representing a decline of 1.45% from 2007.

In **Bolivia**, we produced an average of 276.40 mmcf/d of natural gas in 2008, 20.53% of our total international production, principally from the San Alberto and San Antonio fields. Following enactment of the Bolivian government's May 1, 2006 decree on the nationalization of hydrocarbons, we entered into new agreements under which we continue to operate the fields, but are required to make all sales of the hydrocarbons through YPFB with the right to recover our costs and participate in profits. At December 31, 2008, our proved reserves of natural gas were approximately 248.2 mmboe in

Table of Contents

Bolivia. On January 25, 2009, Bolivia adopted a new constitution that prohibits private ownership of the country's oil and gas resources. In light of the new constitution, we may be required to write off some or all of our proved reserves in Bolivia at the end of 2009.

In **Colombia**, we hold interests in seven onshore production contracts and 15 exploration contracts, eight of which we operate. Our production averaged 15.43 mboe/d in 2008 and represented 6.91% of our international production. At December 31, 2008 our proved reserves in Colombia were approximately 28.8 mmboe.

In **Ecuador**, we hold a 30% interest in Block 18. We also have a 11.42% stake in the 500 km (311 mile) Oleoducto de Crudos Pesados (OCP) crude oil pipeline with capacity of 450 mbbbl/d. In October 2008, we signed an agreement with the Ecuadorian government establishing a one-year deadline to renegotiate our concession in Block 18. On December 31, 2008, we relinquished our concession to explore Block 31 in accordance with an agreement with the Ecuadorian government and wrote off U.S.\$77 million related to that block. Our production averaged 11.40 mboe/d in 2008. At December 31, 2008, our proved reserves were approximately 6.6 mmboe, representing a 85.16% decline from 2007 due to production and reserve reclassifications.

We have held service contracts for the Cuervito and Fronterizo blocks in the Burgos Basin of **Mexico** since 2003. Under these service contracts, we receive fees for our services, but any producing wells are transferred to the Mexican national oil company Pemex. We have other agreements to share deepwater expertise with Pemex.

We hold interests in six blocks in **Peru**. In Block X, in the Talara Basin, we are engaged in development and secondary recovery activities. Our production averaged 16.12 mboe/d in 2008. At December 31, 2008, our proved reserves were approximately 118.6 mmboe. We conduct exploration activities at our remaining five blocks. In 2008, our partner Repsol reported a gas discovery in Block 57, in which we hold a 46.2% stake. Tests on the area are ongoing and we have yet to quantify the size of the discovery.

Our net production from **Venezuela** in 2008 averaged 14.10 mboe/d from joint ventures in the Oritupano-Leona, Acema, La Concepción and Mata fields, where the Venezuelan government is the majority holder and operator.

North America

The Gulf of Mexico is a strategically important region for us where we focus primarily on deepwater fields that leverage our experience in Brazil.

As of December 31, 2008, we held interests in 259 offshore blocks in the **United States** GOM, 161 of which we operate. Our production averaged 4.55 mboe/d in 2008. At December 31, 2008, our proved reserves were approximately 36.6 mmboe, representing a 27.34% reduction from 2007 due mainly to lower oil prices. During 2008, we wrote off U.S.\$115 million related to our investment in the Cottonwood field.

We hold interests in four fields in the Lower Tertiary, in the Walker Ridge Quadrant. We operate the Cascade and Chinook fields, in which we have interests of 50% and 66%, respectively, and we have a non-operating interest of 25% in each of the St. Malo and Stones fields. Other discoveries in deep waters in the GOM include the Cottonwood and Coulomb fields, which are already in production.

In December 2006, the U.S. Minerals Management Service approved the Conceptual Plan for the development of the Cascade and Chinook fields, which includes the first deployment of an FPSO facility in the GOM. The plan incorporates six technologies that are tested in Brazilian offshore waters, but are new to the GOM, including a disconnectable turret buoy, crude transportation by shuttle tanker, free-standing hybrid risers, under water electric submersible pumps, torpedo pile vertical loaded anchors and polyester mooring systems. We expect to begin

production in the Cascade and Chinook fields in mid 2010.

Continuing our active participation in GOM Lease Sales, we secured 23 blocks in Sale 206 in March 2008 and one block in Sale 207 in August 2008. The new blocks are located primarily in deepwater areas of Keathley Canyon, Green Canyon, Mississippi Canyon and Walker Ridge.

Table of Contents

Europe

In 2006, Petrobras International Braspetro BV signed a joint study agreement with Galp and Partex to study seismic data related to the Peniche Basin offshore **Portugal**. We hold a 50% interest in this consortium, and we signed four concession contracts in May 2007 in this Basin (Camarão, Amêijoa, Ostra and Mexilhão). We jointly invested approximately U.S.\$22.0 million on the first exploration period in the Peniche Basin through 2008.

We have also expanded our operations by acquiring exploration rights in **Turkey** in 2006. In 2006, we formed a partnership with the national oil company of Turkey to explore the Kirklarelli and Sinop blocks in the Black Sea.

Middle East

In 2004, we signed a service contract with the National Iranian Oil Company (NIOC) in **Iran**. The agreement called for seismic data acquisition and processing and the drilling of at least two exploratory wells in the Tusan block in the Iranian Persian Gulf.

To date, Petrobras has acquired and processed seismic data at a cost of approximately U.S.\$22 million and drilled two exploratory wells at a cost of U.S.\$156 million in Iran. In February 2008, we discovered evidence of hydrocarbons in the Tusan block. The discovery is not considered economically viable.

Our expenditures are reimbursed under the service contract with the NIOC only if exploration results in economically viable oil discoveries. Petrobras has not had any assets, material liabilities, revenues or proved reserves associated with its operations in Iran in any of the last three years. The service contract with the NIOC is scheduled to expire in July 2009, and we have no additional commitments or further plans in Iran at this time.

Africa

Our operations in Africa date back to 1979 and include production in Angola and Nigeria, development activities in Nigeria and exploration in these and other countries.

In **Angola**, we produced an average of 2.57 mboe/d from the mature Block 2/85, in which we

hold a non-operator 27.5% interest. We also have interests in five offshore blocks, three of which we operate, where exploratory efforts are ongoing. Our combined crude oil and natural gas reserves in Angola were 1.2 mmboe.

In **Nigeria**, we hold interests in two development blocks in which the Agbami field commenced production in July 2008 and the Akpo field, in March 2009. The Agbami field is located on blocks OML 127 and OML 128 and is operated by Chevron as a unitized development in which we hold a 13% interest. We expect peak production to reach 250 mbb/d in early 2010. We expect the Akpo field on Block OML 130, operated by Total, in which we hold a 20% interest, to reach peak production of 185 mbb/d in late 2009. Our investments in the Agbami and Akpo fields are estimated at U.S.\$2.4 billion, of which we had invested U.S.\$1.8 billion as of December 31, 2008. Block OML 130 also contains the Egina, Egina South and Preowei fields. The Egina field had its development plan approved by the Nigerian government in March 2009, while in the Preowei and Egina South fields exploration activities are underway. We are also the operator of block OPL 315, with a 45% interest, in which exploration activities are underway. We also operated block OPL 324, where we drilled two wells and concluded all exploratory efforts and which we relinquished in December 2008.

We have been active in **Libya** since March 2005, when we acquired exploratory and shared production rights for Area 18, consisting of four blocks offshore northeastern Libya. We are the operator of the consortium exploring the block,

holding a 70% share. The production sharing agreement mandates a five-year exploration stage and 25 years of production rights shared with the Libyan National Oil Company.

In 2006, we acquired a 17% working interest in the offshore Zambezi Delta Block in **Mozambique**. The license has been extended until June 30, 2009. The partners have acquired 2-D seismic over the block and will consider applying for the next phase of the license.

We have a 40% interest in the Rufisque Profond exploration block in **Senegal**, in waters ranging from 150 to 3,000 meters (approximately 500 to 10,000 feet), which is under evaluation.

Table of Contents

Our interests in **Tanzania** consist of two deepwater to ultra-deepwater exploration blocks located in the Mafia Basin, for which we acquired 100% operating interests in 2004 and 2006.

Asia

During 2007, we began our first exploration activities in Asia, another region where offshore and deep offshore regions hold substantial potential.

Since June 2007, we hold interests in two exploration blocks in the Krishna Godavari, Mahanadi and Cauvery basins offshore eastern **India**. In the Cauvery block, we have committed to drill three wells, two of which have been drilled

with no discoveries. In the Krishna Godavari block, three wells will be drilled as part of an appraisal plan beginning in April 2009.

We have been in **Pakistan** since February 2007, when we signed an agreement with Oil and Gas Development Company Limited (OGDCL) to explore offshore block G, in which we have a 50% interest. The offshore block is located in the Indus Basin and remains largely unexplored. We have committed to undertake geological and geophysical studies that will allow us to develop a full model of the region's oil system. We have the option to terminate our agreements before drilling any wells.

Other International Activities

Most of our international activities are focused on exploration and production. Our other international activities are summarized in the tables below and described in the text that follows.

Petrobras International Refining Assets at December 31, 2008

Region	Refinery (Group Share %)	Supplied by:	Crude Distillation Capacity (mmbbl/d)
Latin America			
Argentina(1)	Bahia Blanca (100%)	Oxy, Petroleum, Apco	31
	Refinor/Campo Duran (28.5%)	Palmar Largo (AR), Bolivia	26.4
	San Lorenzo (100%)	Total, Chevron	50
North America			
United States	Pasadena, TX (50%)	Campos Basin, Brazil	100
Asia			
Japan	Nansei Sekiyu Kabushiki Kaisha, Okinawa (87.5%)	Third-party suppliers	100

(1) All Argentine refining operations are held through our 67.2% share in PESA.

Petrobras International Petrochemical Assets at December 31, 2008

Region	Plant(1)	Products
Latin America		
Argentina	Campana	Ammonia, Urea, UAN
	Puerto General San Martin	Styrene and SBR
	Zarate	Polystyrene and Bops
		Ethylbenzene, styrene,
Brazil	INNOVA	polystyrene

(1) All international petrochemical operations held through our 67.2% share in PESA.

We have integrated operations in Latin America, particularly in **Argentina**, where we participate across the energy value chain. In Argentina, we own the Pichi Picún Leufú hydroelectric plant, the gas-fired thermoelectric plant Genelba, an interest in natural gas transportation company TGS (Transportadora Gas del Sur), and interests in energy marketer Edesur, and Mega Company, a natural gas separation facility. We also own through our interest in PESA four petrochemical plants (three in Argentina and one

in Brazil), two refineries providing 81 mbb/d of net capacity, and an interest in the Refinor/Campo Duran Refinery. We own 644 retail service stations operating under the brand names Petrobras.

In **Bolivia**, we operate gas fields that supply gas to Brazil. We hold an 11% stake in Gas Transboliviano S.A. (GTB), owner of the Bolivian section of the Bolivia-to-Brazil (BTB) pipeline that transports natural gas we produce in Bolivia to the

Table of Contents

Brazilian market. We also hold a 44.5% stake in Transierra S.A., which owns the Yacuiba-Rio Grande gas pipeline (Gasyrg) linking the San Alberto and San Antonio fields to the BTB pipeline.

In **Colombia**, we operate 68 service stations under the Petrobras logo, a storage facility and a lubricant blending plant in Puente Aranda.

In **Chile**, we have a marketing and representative office and we acquired the downstream operations of ExxonMobil in 2009. The assets include 233 gas stations and commercial aviation operations at 11 airports.

We acquired fuel and lubricant retailing and commercial businesses in **Paraguay** in 2006 and rebranded our 165 service stations with the Petrobras logo in 2007. We also operate aviation fueling installations and an LPG refueling plant.

In 2006, we acquired fuel and lubricant retailing and commercial businesses in **Uruguay**. We operate 89 service stations, installations for commercialization of marine and aviation products, petrochemicals and asphalt. We also hold stakes in the country's two gas distribution companies.

In 2006, we entered the **United States** refining market by acquiring 50% of the Pasadena Refining System (PRSI), formerly the Crown Refinery in Pasadena, Texas. In October 2008, an arbitration panel of the International Centre for Dispute Resolution issued a preliminary decision establishing the validity of the put option exercised by our 50% partner Astra Oil Company for the sale of its stake in PRSI against Petrobras America, our subsidiary in the United States. In April 2009, the arbitration panel issued the final decision, which set the put option exercise price at U.S.\$466 million.

In November 2007, we agreed to purchase 87.5% of Nansei Sekiyu Kabushiki Kaisha (NSS), a refinery in Okinawa, **Japan**. As a result of this acquisition, which was finalized in April 2008, we started refining operations in Asia for the first time with a capacity of 100 mbbbl/d, and we recently began producing a 3% ethanol-gasoline mix.

Information on PifCo

PifCo was incorporated in order to facilitate and finance the import of crude oil and oil products by us into Brazil, and has been our wholly owned subsidiary since 2000. PifCo acts as an intermediary between third-party oil suppliers and us by engaging in crude oil and oil product purchases from international suppliers, and reselling crude oil and oil products in U.S. dollars to us on a deferred payment basis, at a price which includes a premium to compensate PifCo for its financing costs. PifCo also purchases crude oil and oil products from us for sale outside Brazil. Additionally, PifCo sells and purchases crude oil and oil products to and from third parties and related parties, mainly outside Brazil. PifCo is generally able to obtain credit to finance purchases on the same terms granted to us, and PifCo buys crude oil and oil products at the same price that suppliers would charge us directly.

As part of our strategy to expand our international operations and facilitate our access to international capital markets, PifCo engages in borrowings in international capital markets supported by us, primarily through guaranties or standby purchase agreements of the related securities. There are certain risks associated with the standby purchase agreement, see Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities. However, PifCo may use the cash flows generated by the import of oil products to pay amounts due under its debt securities.

PifCo's Corporate Structure

PifCo was established on September 24, 1997 as Brasoil Finance Company, a wholly owned subsidiary of Braspetro Oil Services Company, or Brasoil, a wholly owned subsidiary of Petrobras Internacional S.A. (Braspetro), which has

since been absorbed by us. PifCo's voting shares were transferred from Brasoil to us in 2000, since which time it has been our wholly owned subsidiary. Petrobras International Finance Company is an exempted company incorporated with limited liability under the laws of the Cayman Islands. PifCo's registered office is located at Harbour Place, 103 South Church Street, 4th floor, George Town, Grand Cayman, Cayman Islands, and PifCo's telephone number is 55-21-3487-2375.

Table of Contents

PifCo's four subsidiaries are:

Petrobras Europe Limited (PEL): In May 2001, PifCo established PEL, a wholly owned subsidiary incorporated and based in the United Kingdom, to consolidate our trade activities in Europe, the Middle East, the Far East and North Africa. These activities consist of advising on, and negotiating the terms and conditions for, crude oil and oil products supplied to PifCo, PIB BV, and us, as well as marketing Brazilian crude oil and crude oil products exported to the geographic areas in which PEL operates. PEL plays an advisory role in connection with these activities and undertakes no direct or additional commercial or financial risk. PEL provides these advisory and marketing services as an independent contractor, pursuant to a services agreement between PEL and us. In exchange, we compensate PEL for all costs incurred in connection with these activities, plus a margin.

Petrobras Finance Limited (PFL): In December 2001, PifCo established PFL, a wholly owned subsidiary incorporated and registered in the Cayman Islands. PFL primarily purchases fuel oil from us and sells the products in the international market in order to generate export receivables to cover its obligations to transfer these receivables to a trust under an exports prepayment program. Until June 1, 2006, PFL also purchased bunker fuel from us. The exports prepayment program helps provide PFL with the funding necessary to purchase oil products from us, as described below.

Bear Insurance Company Limited (BEAR): In January 2003, BEAR was transferred to PifCo from Brasoil. This transaction took place as part of the restructuring of our international business segment. BEAR currently serves as our captive insurance company, advising on and negotiating the terms and conditions of, certain of our insurance policies and certain insurance policies of our subsidiaries.

Petrobras Singapore Private Limited (PSPL): In April 2006, PifCo created PSPL, a company incorporated in Singapore to trade oil and derivatives in connection with our trading activities in Asia. This company initiated operations on July 1, 2006.

PifCo's Principal Commercial Activities

PifCo purchases crude oil and oil products for resale to us and third parties. PifCo acquires substantially all of its crude oil and oil products either through purchases on the spot market or short-term supply contracts. PifCo also acquires a small portion of its crude oil and oil products through long-term supply contracts. PifCo's crude oil and oil product purchase obligations are, in most instances, guaranteed by us. PifCo then resells the products purchased to us at the purchase price it paid, plus a premium, determined in accordance with a formula designed to pass on PifCo's average costs of capital to us. PifCo also purchases crude oil and oil products from us for sale outside Brazil. Additionally, PifCo sells and purchases crude oil and oil products to and from third parties and related parties, mainly outside Brazil.

In addition, PifCo finances its oil trading activities principally from commercial banks, including lines of credit, as well as through inter-company loans from us and the issuance of notes in the international capital markets.

Table of Contents

The following chart illustrates how PifCo acts as the intermediary between international crude oil suppliers and us:

PifCo purchases crude oil and oil products from international oil suppliers on a free-on-board (F.O.B.) basis under standard terms that traditionally require payment within 30 days from the bill of lading. We would typically be unable to meet the 30-day payment term imposed by international suppliers because of the complexity of Brazilian customs and importing regulations. For example, if a shipment to which a bill of lading relates must be delivered to different parts of Brazil, different sets of documents must be delivered to each delivery point. Depending on the unloading ports locations, this process may be completed up to 120 days from the vessel's departure. Because PifCo is not subject to the Brazilian regulations applicable to us, PifCo can pay the international supplier on time without having to produce these different sets of documents. To cover its financing costs, PifCo includes a premium when it sells crude oil and oil products to us. We are then able to buy crude oil and oil products from PifCo under terms that allow for payment up to 330 days from the date of the bill of lading, to ensure sufficient time to meet customs and importing regulations.

Exports Prepayment Program

In 2001, we created an export prepayment program to finance our fuel oil exports through the

securitization of our fuel oil exports receivables. A Cayman Islands trust, the PF Export Receivables Master Trust (the Trust), raises funds by issuing certificates to investors and providing this funding to PFL to purchase fuel oil from us. PFL purchases fuel oil from us under a Master Export Contract and a Prepayment Agreement, which establishes quarterly minimum purchase commitments. PFL assigns all receivables from the sale of such exports to the Trust, and the receivables serve as collateral for the payment obligations due under the certificates. The certificates represent senior undivided beneficial interests in the property of the Trust.

The value of receivables to be designated for sale in any quarterly period represents a portion, but not all, of the receivables expected to result from the sale of fuel oil by PFL in such period. The balance of the receivables is the property of PFL.

Since the creation of the program, the Trust has issued a total of U.S.\$1,500 million in Senior Trust Certificates. We have prepaid or amortized a portion of the Senior Trust Certificates. Currently, there are U.S.\$398 million in Senior Certificates outstanding.

As the support for the exports prepayment program, we sell fuel oil to utilities, refineries and traders. The following table sets forth our fuel oil export sales for the period from 2004 to 2008:

	2008	2007	2006	2005	2004
Millions of U.S.\$	2,848.5	2,205.9	1,500.1	1,077.6	1,306.1
Millions of barrels	51.8	39.6	67.3	25.5	47.5

Table of Contents

Organizational Structure

Of our 30 direct subsidiaries listed below, 24 are incorporated under the laws of Brazil and six (PifCo, Petrobras International Braspetro B.V. (PIB BV), Braspetro Oil Company (BOC), Braspetro Oil Services Company (Brasoil), Petrobras Netherlands

B.V. (PNBV) and Cordoba Financial Services GmbH) are incorporated abroad. See Exhibit 8.1 for a complete list of our subsidiaries, including their full names, jurisdictions of incorporation and our percentage equity interest.

Table of Contents

The following diagram sets forth our significant consolidated subsidiaries as of December 31, 2008:

Table of Contents

Property, Plants and Equipment

Petrobras

Our most important tangible assets are wells, platforms, refining facilities, pipelines, vessels and other transportation assets, and power plants. Most of these are located in Brazil. We own and lease our facilities and some owned facilities are subject to liens, although the value of encumbered assets is not material.

We have the right to exploit crude oil and gas reserves in Brazil under concession agreements, but the reserves themselves are the property of the government under Brazilian law. Item 4. Information on the Company includes a description of our reserves and sources of crude oil and natural gas, key tangible assets, and material plans to expand and improve our facilities.

PifCo

PifCo does not itself own or lease any material property, plant or equipment.

Regulation of the Oil and Gas Industry in Brazil

Discussions on Possible Changes to the Oil Law

The recent discovery of large petroleum and natural gas reserves in the pre-salt geological layer of the Campos and Santos Basins has prompted discussions on possible changes to the existing oil legislation. The Brazilian government created an inter-ministerial committee by presidential decree on July 17, 2008 to consider changes in the regulation of exploration and production activities in areas of the pre-salt geological layer not subject to existing concessions. The Chair of our Board of Directors, Dilma Vana Rousseff, and our Chief Executive Officer, J.S. Gabrielli de Azevedo, are members of the committee. The committee has not yet made a formal recommendation to the Brazilian government on this matter.

We cannot estimate the impact that any change to the Oil Law would have on Petrobras, or when any new regulations may become effective.

Current Regulatory Framework

Under Brazilian law, the Brazilian government owns all crude oil and natural gas reserves in Brazil. Between 1953 and 1997, the Brazilian government held a monopoly over the

research, exploration, production, refining and transportation of crude oil and oil products in Brazil and its continental shelf, with the exception that companies that were engaged in refining and distribution in 1953 were permitted to continue those activities. We were the Brazilian government's exclusive agent for exploiting its monopoly, including the importation and exportation of crude oil and oil products.

In 1995, as part of a comprehensive reform of the oil and gas regulatory system, the Brazilian Congress amended the Brazilian Constitution to authorize the Brazilian government to contract with any state or privately-owned company to carry out activities related to the upstream and downstream segments of the oil and gas sector. This amendment led to the enactment of the Oil Law, which provided for the establishment of a new regulatory framework, ended our exclusive agency and allowed competition in all aspects of the oil and gas industry in Brazil. Since that time, we have been operating in an environment of gradual deregulation and increasing competition.

The Oil Law also created an independent regulatory agency, the ANP. The ANP's function is to regulate the oil, natural gas and renewable fuels industry in Brazil and to create a competitive environment in the oil and gas sector. Its principal responsibilities include regulating concession terms for upstream development and awarding new exploration concessions.

The Oil Law granted us the exclusive right to exploit crude oil reserves in each of our producing fields for 27 years from the date when they were declared commercially profitable. This initial 27-year period for production can be extended, at the request of the concessionaire and subject to approval from the ANP. The Oil Law also established a procedural framework for us to claim exclusive exploratory rights for a period of up to three years, later extended to five years, to areas where we could demonstrate that we had established prospects prior to the enactment of the Oil Law. In order to perfect our claim to explore and develop these areas, we had to demonstrate that we had the financial capacity to carry out these activities, either alone or through other cooperative arrangements.

In March 2009, the Brazilian Congress enacted a law regulating activities in the gas industry, including transport and commercialization. The Gas Law created a

Table of Contents

concession regime for the construction and operation of new pipelines to transport natural gas, while maintaining an authorization regime for pipelines subject to international agreements. According to the Gas Law, after a certain exclusivity period, operators will be required to grant access to transport pipelines and maritime terminals, except LNG terminals, to third parties in order to maximize utilization of capacity. Authorizations previously issued by the ANP for natural gas transport will remain valid for 30 years from the date of publication of the Gas Law, and initial carriers were granted exclusivity in these pipelines for 10 years. The ANP will issue regulations governing third-party access and carrier compensation if no agreement is reached between the parties.

The Gas Law also authorized certain consumers, which can purchase natural gas on the open market or obtain their own supplies of natural gas, to construct distribution facilities and pipelines for their own use in the event local gas distributors controlled by the states, which have monopoly over local gas distribution, do not meet their distribution needs. These consumers are required to delegate the operation and maintenance of the facilities and pipelines to local gas distributors, but they are not required to sign gas supply agreements with the local gas distributors.

See Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources Petrobras for a discussion of the regulations governing our budget and strategic planning process.

Since Brazil is not a member of OPEC, neither Brazil nor we are bound by OPEC guidelines. However, to the extent that OPEC influences international crude oil prices, our prices are affected, as our prices are linked to international crude oil prices. We have been invited to attend OPEC meetings as an observer.

Price Regulation

Until the passage of the Oil Law in 1997, the Brazilian government had the power to regulate all aspects of the pricing of crude oil, oil products, ethanol, natural gas, electric power and other energy sources. In 2002, the government eliminated price controls for crude oil and oil products, although they retained regulation over

certain natural gas sales contracts and electricity. Also in 2002, the Brazilian government established an excise tax on the sale and import of crude oil, oil products and natural gas products (*Contribuição de Intervenção no Domínio Econômico*, Contribution for Intervention in the Economic Sector, or CIDE). In 2009, the Gas Law authorized the ANP to regulate prices for the use of gas transport pipelines subject to the new concession regime, based on a procedure defined in the Gas Law as a *chamada pública*, and to approve prices submitted by carriers, according to previously established criteria, for the use of new gas transport pipelines subject to the authorization regime.

Exploration and Development Regulation

According to the Oil Law and under our concession agreements with ANP, we are required to pay the government the following:

signature bonuses paid upon the execution of the concession agreement, which are based on the amount of the winning bid, subject to the minimum signature bonuses published in the relevant bidding guidelines (*edital de licitação*);

annual retention bonuses for the occupation or retention of areas available for exploration and production, at a rate established by the ANP in the relevant bidding guidelines based on the size, location and geological characteristics of the concession block;

special participation charges at a rate ranging from 0 to 40% of the net operating revenues derived from the production of the field. In 2008, we paid this tax on 21 of our fields, including Marlim, Albacora, Roncador, Leste do Urucu, Rio Urucu, Canto do Amaro, Marimbá, Marlim Sul, Namorado, Carapeba, Pampo, Albacora Leste, Barracuda, Caratinga, Cherne, Miranga, Carmópolis, Espadarte, Jubarte, Peroá and Golfinho. Net revenues are gross revenues less royalties paid, investments in exploration, operational costs and depreciation

Table of Contents

adjustments and applicable taxes. The Special Participation Tax uses as a reference international oil prices converted to *reais* at the current exchange rate; and

royalties, typically at 5% and 10% of the value of production, are based on reference prices for crude oil or natural gas established in the relevant bidding guidelines and concession contract. In calculating royalty rates, the ANP also takes into account the geological risks and expected productivity levels for each concession. Virtually all our crude oil production is currently taxed at the maximum royalty rate.

The Oil Law also requires concessionaires of onshore fields to pay to the owner of the land a special participation fee that varies between 0.5% and 1.0% of the net operating revenues derived from the production of the field.

Environmental Regulations

All phases of the crude oil and natural gas business present environmental risks and hazards. Our facilities in Brazil are subject to a wide range of federal, state and local laws, regulations and permit requirements relating to the protection of human health and the environment. At the federal level, our offshore activities and those that involve more than one Brazilian state are subject to the regulatory authority of the *Conselho Nacional do Meio Ambiente* (National Council for the Environment, or CONAMA) and to the administrative authority of IBAMA, which issues operating and drilling licenses. We are required to submit reports, including safety and pollution monitoring reports (IOPP) to IBAMA in order to maintain our licenses. Onshore environmental, health and safety conditions are controlled at the state rather than federal level, and there is strict liability for environmental damage, mechanisms for enforcement of environmental standards and licensing requirements for polluting activities.

Individuals or entities whose conduct or activities cause harm to the environment are subject to criminal and administrative sanctions. Government environmental protection agencies may also impose administrative sanctions for

noncompliance with environmental laws and regulations, including:

finer;

partial or total suspension of activities;

requirements to fund reclamation and environmental projects;

forfeit or restriction of tax incentives or benefits;

closing of the establishments or undertakings; and

forfeiture or suspension of participation in credit lines with official credit establishments.

We are subject to a number of administrative proceedings and civil and criminal claims relating to environmental matters. See Item 8. Financial Information Legal Proceedings Environmental Claims.

In 2008, we invested approximately U.S.\$1,075 million in environmental projects, compared to approximately U.S.\$1,015 million in 2007 and U.S.\$645 million in 2006. These investments were primarily directed at reducing emissions and wastes resulting from industrial processes, managing water use and effluents, remedying impacted

areas, implementing new environmental technologies, upgrading our pipelines and improving our ability to respond to emergency situations.

Health, Safety and Environmental Initiatives

The protection of human health and the environment is one of our primary concerns, and is essential to our success as an integrated energy company. We have created a Health, Safety and Environment (HSE) Management Committee composed of executive managers of our business units and directors of our subsidiaries BR Distribuidora, Transpetro and Petrobras Biocombustível. The Committee's work is supported by four commissions and four subcommissions as well as by temporary work groups, each responsible for a specific HSE issue, such as licensing and environmental compensation, emissions and climate change and health management.

Table of Contents

We have also created an Environmental Committee composed of three members of our board of directors. This committee's responsibilities include: (i) overseeing and managing environmental and work safety issues affecting us; (ii) establishing measurable environmental targets and ensuring compliance; and (iii) recommending changes in environmental, health and safety policy, if necessary, to our board of directors. The Environmental Committee charter is awaiting approval by our board of directors.

Our actions to address health, safety and environmental concerns and ensure compliance with environmental regulations include:

PEGASO program to upgrade pipelines and other equipment, implement new technologies, improve our emergency response readiness, reduce emissions and residues and prevent environmental accidents. From April 2000 to December 2008, we spent approximately U.S.\$5,003 million under this program, including the *Programa de Integridade de Dutos* (Pipeline Integrity Program) through which we conduct inspections of, and improvements to, our pipelines. In 2008, we spent approximately U.S.\$355 million in connection with the PEGASO program;

new HSE policy and corporate guidelines, which focus on principles of sustainable development, compliance with legislation and environmental performance indicators;

ten environmental protection centers and thirteen advanced bases for oil spill prevention, control and response, local and regional, onshore and offshore oil spill contingency plans involving public services and communities, three dedicated oil spill recovery vessels (OSRVs) fully equipped for oil spill control and fire fighting;

ISO 14001 (environment) and OHSAS 18001 (health and safety) certification of our operating units. As of December 2008, Petrobras held 38

certificates for its operating units in Brazil and units abroad. Because some of those certificates cover more than one site, the total number of certified sites is 183 in Brazil and 20 abroad. The *Frota Nacional de Petroleiros* (National Fleet of Vessels) has been fully certified by the IMO International Management Code for Safe Operation of Ships and for Pollution Prevention (ISM Code) since December 1997;

regular and active engagement with the Brazilian Ministry of Mines and Energy and IBAMA, including negotiating new environmental compensation regulations and discussing environmental issues connected with new gas pipelines, oil and gas production projects and other aspects of our operations.

a new Climate Change strategic project, which aims to implement the highest standards in the energy industry regarding greenhouse gas management. By reducing the environmental impact of our operations, we will contribute to our sustainability and mitigate global climate change.

In addition, we conduct environmental studies for all new projects as required by Brazilian environmental legislation, and our HSE department evaluates every project with a total budget exceeding U.S.\$25 million to confirm its compliance with all HSE requirements and adoption of the best HSE practices throughout the project's life cycle.

In 2008, we experienced oil spills totaling 115,179 gallons of crude oil, compared to 101,970 gallons of crude oil in 2007 and 77,402 gallons in 2006.

We continue to evaluate and develop initiatives to address HSE concerns and to reduce our exposure to HSE risks.

Insurance

Our insurance programs focus principally on the evaluation of risks and the replacement of value of assets, which we believe is customary for our industry. Under our risk management policy,

Table of Contents

risks associated with our principal assets, such as refineries, tankers, our fleet and offshore production and drilling platforms, are insured for their replacement value with third-party Brazilian insurers. Although the policies are issued in Brazil, most of our policies are reinsured abroad with reinsurers rated A- or higher by Standard & Poor's rating agency or B+ or higher by A.M. Best. Part of our international operations are insured or reinsured by our Bermudian subsidiary Bear Insurance Company Limited following exactly the same rating criteria.

Less valuable assets, such as small auxiliary boats, certain storage facilities, and some administrative installations, are self-insured. We do not maintain coverage for business interruption, except for a minority of our international operations and a few specific assets in Brazil. We also do not maintain coverage for our wells for substantially all of our Brazilian operations. We maintain coverage for operational third-party liability with respect to our onshore and offshore activities, including environmental risks such as oil spills. Although we do not insure most of our pipelines, we have insurance against damage or loss to third parties resulting from specific incidents, as well as oil pollution. We also maintain coverage for risks associated with cargo, hull and machinery risk. All projects and installations under construction that have an estimated maximum loss above U.S.\$50 million are covered by a construction policy.

The premium for renewing our domestic property risk insurance policy for a 12-month period commencing June 2008 was U.S.\$27.9 million. This represented an increase of 7% over the preceding 12-month period. The increase was primarily due the increase in the insured value of our assets, which in the same period, increased by 28%, from U.S.\$48 billion to U.S.\$61 billion. Since 2001, our risk retention has increased and our deductibles may reach U.S.\$50 million in certain cases.

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

Management's Discussion and Analysis of Petrobras Financial Condition and Results of Operations

You should read the following discussion of our financial condition and results of operations together with our audited consolidated financial statements and the accompanying notes beginning on page F-2 of this annual report.

Overview

We earn income from:

domestic sales, which consist of sales of oil products (such as diesel oil, gasoline, jet fuel, naphtha, fuel oil and liquefied petroleum gas), natural gas, ethanol, electricity and petrochemical products;

export sales, which consist primarily of sales of crude oil and oil products;

international sales (excluding export sales), which consist of sales of crude oil, natural gas and oil products that are purchased, produced and refined abroad; and

other sources, including services, investment income and foreign exchange gains.

Our expenses include:

costs of sales (which are composed of labor expenses, operating costs and purchases of crude oil and oil products); maintaining and repairing property, plant and equipment; depreciation and amortization of fixed assets; depletion of oil fields; and exploration costs;

selling (which include expenses for transportation and distribution of our products), general and administrative expenses; and

interest expense, monetary and foreign exchange losses.

Table of Contents

Fluctuations in our financial condition and results of operations are driven by a combination of factors, including:

- the volume of crude oil, oil products and natural gas we produce and sell;
- changes in international prices of crude oil and oil products, which are denominated in U.S. dollars;
- related changes in the domestic prices of crude oil and oil products, which are denominated in *reais*;
- fluctuations in the *real*/U.S. dollar and Argentine peso/U.S. dollar exchange rates; and
- the amount of production taxes that we are required to pay with respect to our operations.

Sales Volumes and Prices

The profitability of our operations in any particular accounting period is related to the sales volume of, and prices for, the crude oil, oil products and natural gas that we sell. Our consolidated net sales in 2008 totaled approximately 1,227,106 thousand barrels of crude oil equivalent, representing U.S.\$118,257 million in net operating revenues, compared to 1,182,235 thousand barrels of crude oil equivalent, representing U.S.\$87,735 million in net operating revenues in 2007, and approximately 1,104,723 thousand barrels of crude oil equivalent, representing U.S.\$72,347 million in net operating revenues in 2006.

As a vertically integrated company, we process most of our crude oil production in our refineries and sell the refined oil products primarily

in the Brazilian domestic market. Therefore, it is oil product prices, rather than crude oil prices, that most directly affect our financial results. Nonetheless, as crude oil production increases, and as exports increase, crude oil production will have a greater relative importance.

Oil product prices vary over time as the result of many factors, including the price of crude oil. Over the long term, we intend to sell our products in Brazil at parity with international product prices, however we do not adjust our prices for gasoline, diesel and LPG to reflect short-term volatility in the international markets. As a result, material rapid or sustained increases or decreases in the international price of crude oil and oil products may result in downstream margins for us that are materially different than those of other integrated international oil companies, within a given financial reporting period.

The average prices of Brent crude, an international benchmark oil, were approximately U.S.\$96.99 per barrel in 2008, U.S.\$72.52 per barrel in 2007 and U.S.\$65.14 per barrel in 2006. For December 2008, Brent crude oil prices averaged U.S.\$41.58 per barrel. Crude oil prices averaged U.S.\$45.04 per barrel in the first quarter of 2009. We announced price increases of 10% for gasoline and 15% for diesel in the domestic market in May 2008 to reflect international oil product prices during the first half of 2008. These increases were partially offset by the reduction in the CIDE by the Brazilian Government by similar percentages.

During 2008, approximately 60.9% of our net operating revenues were derived from sales of crude oil and oil products in Brazil, compared to 69.2% in 2007 and 69.7% in 2006. As export volumes of crude oil and oil products have increased, domestic sales as a percentage of net operating revenues have declined.

Table of Contents

Our revenues are principally derived from sales in Brazil. The following table sets forth our domestic sales by volume of oil products, natural gas and ethanol for each of 2008, 2007 and 2006:

	For the Year Ended December 31,								
	2008	2008	Net	2007			2006	2006	Net
Volume	Net	Operating	Volume	Net	Operating	Volume	Net	Operating	
(mdbl, except as otherwise noted)	Average Price (U.S.\$) (1)	Revenues (U.S.\$ million)	(mdbl, except as otherwise noted)	Average Price (U.S.\$) (1)	Revenues (U.S.\$ million)	(mdbl, except as otherwise noted)	Average Price (U.S.\$) (1)	Revenues (U.S.\$ million)	(U.S. million)
Energy products:									
Automotive gasoline	114,544	91.44	10,474	109,654	83.73	9,181	112,541	73.86	8,331

(1) Net average price calculated by dividing net sales by the volume for the year.

Effect of Taxes on Our Income

In addition to taxes paid on behalf of consumers to federal, state and municipal governments, such as the *Imposto sobre Circulação de Mercadorias e Serviços*, or ICMS, we are required to pay three principal charges on our oil production activities in Brazil: royalties, special participation and retention bonuses. See Item 4. Information on the Company Regulation of the Oil and Gas Industry in Brazil Exploration and Development Regulation and Item 3. Key Information Risk Factors Risks Relating to Brazil.

These charges imposed by the Brazilian government are included in our cost of goods sold. In addition, we are subject to tax on our income at an effective rate of 25% and a social contribution tax at an effective rate of 9%, the standard corporate tax rate in Brazil. See Note 3 to our audited consolidated financial statements.

Inflation and Exchange Rate Variation

Inflation

Since the introduction of the *real* as the Brazilian currency in July 1994, inflation in Brazil has remained relatively stable. Inflation was 5.90% in 2008, 4.46% in 2007 and 3.14% in 2006, as measured by IPCA, the National Consumer Price Index. Inflation has had, and may continue to have, effects on our financial condition and results of operations.

Exchange Rate Variation

Since we adopted the *real* as our functional currency in 1998, fluctuations in the value of the *real* against the U.S. dollar have had multiple effects on our results of operations.

Our reporting currency for all periods is the U.S. dollar. We maintain our financial records in *reais*, and translate our statements of operations into

Table of Contents

U.S. dollars at the average rate for the period. Although substantially all of our revenues are in *reais*, they have been, and continue to be, linked to U.S. dollar-based international prices, since virtually all of our sales are of crude oil or oil products. When the *real* strengthens relative to the U.S. dollar as it did from 2003 through the first half of 2008, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the *real* strengthens, prices for our products when expressed in *reais* may remain constant, while in dollar terms they increase.

Beginning in the second half of 2008, the *real* greatly depreciated against the U.S. dollar. However, considering the annual average exchange rate, the *real* appreciated 5.7% against the U.S. dollar in 2008, compared to an appreciation of 10.5% in 2007 and 10.7% in 2006. When the *real* weakens relative to the U.S. dollar, our prices when expressed in dollars decline, unless we raise prices.

Foreign currency translation adjustments have a significant impact on the balance sheet of a company such as ours, whose assets are primarily denominated in *reais*, but whose liabilities are primarily denominated in foreign currencies. Asset values decrease when the *real* depreciates. The changes in our asset values are charged to shareholders' equity, but do not necessarily affect our cash flows, since our revenues and cash earnings are to a large degree linked to the U.S. dollar, and a

portion of our operating expenses are linked to the *real*. See Note 2 of our audited consolidated financial statements for the year ended December 31, 2008, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

Exchange rate variation also affects the amount of retained earnings available for distribution by us when measured in U.S. dollars. Amounts reported as available for distribution in our statutory accounting records are calculated in *reais* and prepared in accordance with Brazilian accounting principles increase or decrease when measured in U.S. dollars as the *real* appreciates or depreciates against the U.S. dollar. In addition, the exchange rate variation creates foreign exchange gains and losses that are included in our results of operations determined in accordance with Brazilian accounting principles and that affect the amount of our unretained earnings available for distribution.

Results of Operations

The differences in our operating results from year to year occur as a result of a combination of factors, including primarily: the volume of crude oil, oil products and natural gas we produce and sell, the price at which we sell our crude oil, oil products and natural gas and the differential between the Brazilian inflation rate and the depreciation or appreciation of the *real* against the U.S. dollar.

Table of Contents

The table below shows the amount by which each of these variables has changed during the last three years:

	2008	2007	2006
Crude oil and NGL production (mmbbl/d):			
Brazil	1,855	1,792	1,778
International	111	112	130
Non-consolidated international production(1)	13	14	12
Total crude oil and NGL production	1,979	1,918	1,920
Change in crude oil and NGL production	3.2%	(0.1)%	4.0%
Average sales price for crude (U.S.\$/barrel):			
Brazil	81.55	61.57	54.71
International	63.16	50.46	44.02
Natural gas production (mmcf/d):			
Brazil	1,926	1,638	1,660
International	594	648	595
Non-consolidated international production(1)	6	12	12
Total natural gas production	2,526	2,298	2,267
Change in natural gas production (sold only)	9.9%	1.4%	2.2%
Average sales price for natural gas (U.S.\$/mcf):			
Brazil	6.69	5.86	2.61
International	2.84	2.68	2.16
Year-end exchange rate (<i>Reais</i> /U.S.\$)	2.34	1.77	2.14
Appreciation (depreciation) during the year(2)	(31.9)%	17.2%	8.7%
Average exchange rate for the year (<i>Reais</i> /U.S.\$)	1.84	1.95	2.18
Appreciation (depreciation) during the year(3)	5.7%	10.5%	10.7%
Inflation rate (IPCA)	5.9%	4.5%	3.1%

(2) Based on year-end exchange rate.

(3) Based on average exchange rate for the year.

Results of Operations 2008 compared to 2007

Virtually all of our revenues and expenses for our Brazilian activities are denominated and payable in *reais*. When the *real* strengthens relative to the U.S. dollar as it did in 2008 (5.7%) and 2007 (10.5%), the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. However, the appreciation of the *real* against the U.S. dollar affects the line items discussed below in different ways. The following comparison between our results of operations in 2008 and 2007 is impacted by the increase in the value of the *real* against the U.S. dollar during that period. See Note 2 of our audited consolidated financial statements for the year ended December 31, 2008, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

Certain prior year amounts have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

Revenues

Net operating revenues increased 34.8% to U.S.\$118,257 million for 2008 compared to U.S.\$87,735 million for 2007. This increase was primarily attributable to an increase of 28.8% in average prices for our products in domestic and international markets and an increase of 5.5% in sales volumes in Brazil.

Consolidated sales of products and services increased 30.3% to U.S.\$146,529 million for 2008 compared to U.S.\$112,425 million for 2007 due to the increases mentioned above.

Included in sales of products and services are the following amounts that we paid to the federal or state governments:

Value-added taxes, contributions to the *Programa de Formação do Patrimônio do Servidor Público* (Civil Servant Savings Program, or PASEP), *Contribuição para o Financiamento da Seguridade Social* (Contribution for

Table of Contents

the Financing of Social Security, or COFINS) and other taxes on sales and services and social security contributions. These taxes increased 21.2% to U.S.\$25,046 million for 2008 compared to U.S.\$20,668 million for 2007, primarily due to higher prices and sales volumes; and

CIDE, the per-transaction fee due to the Brazilian government, which decreased 19.8% to U.S.\$3,226 million for 2008 compared to U.S.\$4,022 million for 2007, due to the reduction of the rates on gasoline and diesel sales by the Brazilian Government in May 2008, when we increased our prices for these products.

Cost of Sales (Excluding Depreciation, Depletion and Amortization)

Cost of sales for 2008 increased 46.3% to U.S.\$72,865 million, compared to U.S.\$49,789 million for 2007. This increase was principally a result of:

37.4% (U.S.\$6,318 million) increase in the cost of imports due to a 51.0% increase in average prices and a 5.9% increase in volumes;

81.4% (U.S.\$4,111 million) increase in costs for our international trading activities due to increased offshore operations conducted by PifCo;

47.9% (U.S.\$3,554 million) increase in production taxes and charges totaling U.S.\$10,975 million for 2008 compared to U.S.\$7,420 million for 2007. Production taxes and charges include royalties, which increased 49.4% to U.S.\$5,124 million in 2008 compared to U.S.\$3,430 million in 2007, and a special participation charge (an extraordinary charge payable in the event of high production or profitability from our fields), which increased 47.3% to U.S.\$5,792 million in 2008 compared to U.S.\$3,933 million in 2007. The increase in production taxes and charges in 2008 was due primarily

to a 35% increase in the international price of oil, which is used to determine the reference price for the calculation of royalties (U.S.\$3,087 million of the total) and, to a lesser extent, increased output from new production systems, principally from the Roncador and Espadarte fields (U.S.\$467 million of the total); and

11.2% (U.S.\$3,524 million) increase in costs related to higher sales volumes in the domestic market.

Depreciation, Depletion and Amortization

We calculate depreciation, depletion and amortization of most of our exploration and production assets using the units of production method. Depreciation, depletion and amortization expenses increased 6.9% to U.S.\$5,928 million for 2008 compared to U.S.\$5,544 million for 2007. This increase resulted from higher capital expenditures and increased domestic oil and gas production.

Exploration, including Exploratory Dry Holes

Exploration costs, including costs for exploratory dry holes, increased 24.7% to U.S.\$1,775 million for 2008 compared to U.S.\$1,423 million for 2007. This increase was primarily attributable to a U.S.\$520 million increase in expenses related to the write-off of dry and economically unviable wells in Brazil, due to:

more wells drilled as a result of our investment program;

higher day rates and services rates; and

lower exploration success rate as a result of drilling in new frontier areas in the Santos and Espírito Santos basins.

These effects were partially offset by a U.S.\$256 million decrease in expenses related to dry holes in international operations.

Impairment of Oil and Gas Properties

For 2008, we recorded an impairment charge of U.S.\$519 million, compared to

Table of Contents

U.S.\$271 million for 2007. The impairment charge in 2008 was primarily attributable to:

U.S.\$223 million goodwill impairment at the Pasadena Refining System, our indirect subsidiary in the United States; and

U.S.\$171 million impairment at our Guajá field and other producing properties in Brazil due to reduced year-end international oil prices.

The impairment charge in 2007 was primarily related to the following international investments:

U.S.\$174 million impairment in Ecuador due to tax and legal changes implemented by the government;

U.S.\$39 million impairment in the United States; and

U.S.\$13 million impairment in Angola.

See Notes 9(b) and 18(a) to our audited consolidated financial statements for the year ended December 31, 2008.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 18.9% to U.S.\$7,429 million for 2008 compared to U.S.\$6,250 million for 2007.

Selling expenses increased 19.0% to U.S.\$3,517 million for 2008 from U.S.\$2,956 million for 2007. This increase was primarily attributable to a U.S.\$367 million increase in transportation costs due primarily to increased sales volumes.

General and administrative expenses increased 18.8% to U.S.\$3,912 million for 2008 from U.S.\$3,294 million for 2007. Excluding the impact of the appreciation of the *real*, the increase in general and administrative expenses was primarily due to higher personnel expenses in 2008 caused by an increase in salaries and number of employees and increased costs for third-party technical consulting, auditing and data processing services in Brazil.

Research and Development Expenses

Research and development expenses increased 6.8% to U.S.\$941 million for 2008 from U.S.\$881 million for 2007. This increase was primarily due to higher training and research costs related to production from current reserves and new exploratory areas.

Employee Benefit Expense for Non-Active Participants

Employee benefit expense for non-active participants consists of financial costs associated with our expected pension and health care costs of retired employees. Our employee benefit expense for non-active participants decreased 15.1% to U.S.\$841 million for 2008 compared to U.S.\$990 million for 2007. The decrease in employee benefit expense for non-active participants was primarily due to an increase in the expected return on plan assets as estimated by actuarial calculations from December 2007.

Other Operating Expenses

Other operating expenses increased 24.8% to U.S.\$2,665 million for 2008 from U.S.\$2,136 million for 2007. The most significant changes between 2008 and 2007 were:

U.S.\$545 million extraordinary expense for marking inventory to market value;

96.0% (U.S.\$169 million) increase in expense for idle capacity at thermoelectric power plants, to U.S.\$345 million in 2008 from U.S.\$176 million in 2007;

37.0% (U.S.\$87 million) increase in expense related to the negotiation of collective bargaining agreements, to U.S.\$322 million in 2008 from U.S.\$235 million in 2007;

29.4% (U.S.\$62 million) increase in expense for losses and contingencies related to legal proceedings, to U.S.\$273 million in 2008 from U.S.\$211 million in 2007;

4.0% (U.S.\$26 million) increase in expense for institutional relations and cultural projects, to

Table of Contents

U.S.\$675 million in 2008 from U.S.\$649 million in 2007;

1.3% (U.S.\$3 million) decrease in expense for contractual fines, to U.S.\$237 million in 2008 from U.S.\$240 million in 2007; and

12.3% (U.S.\$30 million) decrease for health, safety and environment (HSE), to U.S.\$214 million in 2008 from U.S.\$244 million in 2007.

Equity in Results of Non-Consolidated Companies

Equity in results of non-consolidated companies decreased to a loss of U.S.\$21 million for 2008 compared to a gain of U.S.\$235 million for 2007, due mainly to losses from investments in affiliated petrochemical companies, principally Quattor Companhia Petroquímica (U.S.\$126 million) and Braskem S.A. (U.S.\$116 million), caused by foreign exchange variation expenses related to debt.

Financial Income

We derive financial income from several sources, including interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold U.S. dollar deposits.

Financial income increased 5.9% to U.S.\$1,641 million for 2008 compared to U.S.\$1,550 million for 2007. This increase was primarily attributable to gains on derivatives instruments primarily related to commodities contracts (U.S.\$517 million). This increase was partially offset by the decrease in financial income related to investments (U.S.\$185 million) and accounts receivable from clients (U.S.\$102 million). A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2008.

Financial Expenses

Financial expenses increased 25.3% to U.S.\$848 million for 2008 compared to U.S.\$677 million for 2007, primarily due to the increase in losses on derivative instruments related to foreign exchange contracts (U.S.\$158 million) and the increase in capitalized

interest (U.S.\$253 million). These increases were partially offset by the decrease in financial expenses related to project financing (U.S.\$304 million). A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2008.

Monetary and Exchange Variation

Monetary and exchange variation changed to a gain of U.S.\$1,584 million for 2008 compared to a loss of U.S.\$1,455 million for 2007. This change is primarily attributable to foreign exchange gain on net monetary assets denominated in U.S. dollars, due to the appreciation of the U.S. dollar against the *real* in the second half of 2008.

Other Taxes

Other taxes, consisting of various taxes on financial transactions, decreased 34.6% to U.S.\$433 million for 2008 compared to U.S.\$662 million for 2007. This decrease is primarily attributable to the elimination of the CPMF tax, a tax payable in connection with certain bank account transactions, on January 1, 2008. This decrease was partially

offset by an increase in the IOF tax, a tax payable on financial transactions, on January 1, 2008.

Other Expenses, Net

Other expenses, net are primarily gains and losses recorded on sales of fixed assets and certain other non-recurring charges. Other expenses, net increased to a loss of U.S.\$225 million for 2008 compared to a loss of U.S.\$143 million for 2007, primarily due to the U.S.\$77 million write-off of Block 31 in Ecuador in the fourth quarter of 2008.

Income Tax (Expense) Benefit

Income before income taxes and minority interest increased 39.9% to U.S.\$26,992 million for 2008 compared to U.S.\$19,299 million for 2007. Income tax expense increased 57.3% to U.S.\$9,259 million for 2008 compared to U.S.\$5,888 million for 2007. The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is set forth in Note 3 of our audited consolidated financial statements for the year ended December 31, 2008.

Table of Contents*Net Income by Business Segment*

We measure performance at the segment level on the basis of net income. Following is a discussion of the net income of our six business segments at December 31, 2008, compared to December 31, 2007.

	Year Ended December 31,	
	2008	2007
	(U.S.\$ million)	
Exploration and Production	21,031	14,072
Supply	(1,996)	2,785
Distribution	839	446
Gas and Energy	(223)	(834)
International	(808)	(815)
Corporate	(57)	(1,796)
Eliminations	93	(720)
Net income	18,879	13,138

Exploration and Production

Our Exploration and Production segment includes our exploration, development and production activities in Brazil, sales and transfers of crude oil in domestic and foreign markets, transfers of natural gas to our Gas and Energy segment and sales of oil products produced at natural gas processing plants.

Consolidated net income for our Exploration and Production segment increased 49.5% to U.S.\$21,031 million for 2008 compared to U.S.\$14,072 million for 2007, primarily due to higher average prices for our domestic oil production and a 3.5% increase in oil and NGL production.

These effects were partially offset by:

higher production taxes; and

U.S.\$171 million impairment charges in Brazil as a result of decreased international prices at the end of 2008, which affected future projections and increased exploration costs due to write-offs of dry or economically unviable wells.

The spread between our average domestic heavy crude oil sale/transfer price and the average Brent price rose from U.S.\$10.95/bbl in 2007 to U.S.\$15.44/bbl in 2008. The increase in the difference was the result of a similar widening between the price of light oil and heavy oil in the international market, which to some extent mitigated revenues from the sharp increase in global oil prices during the first half of 2008.

Supply

Our Supply segment comprises our downstream activities in Brazil, including refining, logistics, transportation, export and purchase of crude oil, as well as the purchase and sale of oil products and ethanol. Additionally, this segment

includes the petrochemical and fertilizers division, which includes investments in domestic petrochemical companies and our two domestic fertilizer plants.

Our Supply segment generated a net loss of U.S.\$1,996 million in 2008 compared to net income of U.S.\$2,785 million in 2007.

This decrease is primarily a result of:

- higher oil sale/transfer costs from our Exploration and Production segment due to the trend in international oil prices;

- higher costs for imported oil products on the international market;

- higher freight costs as a result of higher volume;

- higher naphtha prices; and

- marking inventory to market value.

The net loss for our Supply segment was also adversely affected by our pricing policy. We do not adjust our domestic prices for diesel, gasoline and LPG which constitute approximately 60% of our downstream revenues to reflect short-term volatility in the international markets. The costs for oil and oil products purchased by our supply segment do, however, reflect the volatility of international prices. During 2008, our

Table of Contents

downstream margins were reduced, as the increase our prices for gasoline and diesel in the domestic market in May 2008 did not fully compensate for higher costs of oil and oil products during most of the year. Only in the fourth quarter of 2008, when international prices declined sharply but our prices for gasoline and diesel remained stable, did our prices reach parity with international levels.

Distribution

Our Distribution segment comprises the oil product and ethanol distribution activities conducted by our majority owned subsidiary, Petrobras Distribuidora S.A. BR, in Brazil.

Net income for our Distribution segment increased 88.1% to U.S.\$839 million for 2008 compared to U.S.\$446 million for 2007.

This increase was primarily the result of:

higher sales volumes; and

reduced operating expenses due to the elimination of the CPMF tax and gains from reversed accruals for legal proceedings in 2007.

This segment accounted for 34.9% of the total Brazilian fuel distribution market in 2008 compared to 34.3% in 2007.

Gas and Energy

Our Gas and Energy segment consists primarily of the purchase, sale, transportation and distribution of natural gas produced in or imported into Brazil. Additionally, this segment includes our participation in domestic natural gas transportation, natural gas distribution and thermoelectric power generation.

Net loss for our Gas and Energy segment decreased 73.3% to U.S.\$223 million for 2008 compared to a net loss of U.S.\$834 million for 2007. This decrease in our net loss was a result of:

higher margins in our natural gas and electricity business, reflecting higher sales prices; and

higher natural gas and electricity sales volumes in 2008 compared to 2007.

These effects were partially offset by an allowance for the reduced market value of our NGL inventory.

International

The International segment comprises our activities in other countries, which include Exploration and Production, Supply, Distribution, and Gas and Energy.

Net loss for our International segment decreased 0.9% to U.S.\$808 million for 2008 compared to a net loss of U.S.\$815 million for 2007. This decrease was primarily attributable to increased margins as a result of higher oil prices during the first nine months of 2008.

These effects were offset by:

marking inventory to market value in the United States, Japan and Argentina;

accrued royalty expenses;

the write-off of Block 31 in Ecuador;

the complete amortization of goodwill on the Pasadena Refinery; and

non-recurring profits on the sale of Bolivian refineries and Argentine companies in 2007.

Corporate

Our Corporate segment includes our financing activities not attributable to other segments, including corporate financial management, central administrative overhead and actuarial expenses related to our pension and health care plans for inactive participants.

Net loss for our Corporate segment decreased 96.8% to U.S.\$57 million for 2008 compared to a net loss of U.S.\$1,796 million for 2007, primarily due to:

increased financial income from foreign exchange gains on international investments;

reduced pension plan expenses; and

the elimination of the CPMF tax.

These effects were partially offset by increased selling, general and administrative expenses, primarily attributable to higher personnel expenses.

Table of Contents

Results of Operations 2007 compared to 2006

The following comparison is also impacted by the increase in the value of the *real* against the U.S. dollar during 2007 (10.5%) and 2006 (10.7%). See Note 2 of our audited consolidated financial statements for the year ended December 31, 2007, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

Certain prior year amounts have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

Revenues

Net operating revenues increased 21.3% to U.S.\$87,735 million for 2007, compared to U.S.\$72,347 million for 2006. This increase was primarily attributable to higher sales volumes and prices for our products in domestic and international markets.

Consolidated sales of products and services increased 19.7% to U.S.\$112,425 million for 2007, compared to U.S.\$93,893 million for 2006, primarily due to the increases mentioned above.

Included in sales of products and services are the following amounts that we collected on behalf of federal or state governments:

Value-added taxes, social security contributions payable on sales and financial revenues called PASEP and COFINS, and other taxes on sales and services and social security contributions. These taxes increased 15.4% to U.S.\$20,668 million for 2007, compared to U.S.\$17,906 million for 2006, primarily due to higher prices and sales volumes; and

CIDE, the per-transaction fee due to the Brazilian government, increased 10.5% to U.S.\$4,022 million for 2007, compared to U.S.\$3,640 million for 2006, primarily due to higher prices and sales volumes.

Cost of Sales (Excluding Depreciation, Depletion and Amortization)

Cost of sales for 2007 increased 23.9% to U.S.\$49,789 million, compared to U.S.\$40,184 million for 2006. This increase was principally a result of:

20% (U.S.\$2,472 million) increase in the cost of imports due to higher volumes and prices;

15.3% (U.S.\$2,443 million) increase in costs associated the increase in our international market prices, including costs related to Pasadena Refinery;

16.8% (U.S.\$1,567 million) increase in costs associated with a 10.7% increase in our international market sales volumes, including costs related to Pasadena Refinery;

11.1% (U.S.\$505 million) increase in costs for our international trading activities, due to increases in volume from offshore operations conducted by PifCo; and

0.1% (U.S.\$11 million) increase in production taxes and charges totaling U.S.\$7,420 million for 2007 compared to U.S.\$7,409 million for 2006. Production taxes and charges include royalties, which

decreased 1.3% to U.S.\$3,430 million in 2007 compared to U.S.\$3,475 million in 2006, and a special participation charge (an extraordinary charge payable in the event of high production or profitability from our fields), which increased 1.2% to U.S.\$3,933 million in 2007 compared to U.S.\$3,885 million in 2006. The increase in production taxes and charges in 2007 was primarily due to an increase in the average reference price used to calculate production taxes for our domestic production. This increase was partially offset by a lower special participation charge for some of our offshore mature fields with declining production.

Table of Contents

Depreciation, Depletion and Amortization

We calculate depreciation, depletion and amortization of most of our exploration and production assets using the units of production method. Depreciation, depletion and amortization expenses increased 50.9% to U.S.\$5,544 million for 2007, compared to U.S.\$3,673 million for 2006. This increase resulted from higher capital spending and increased depletion and amortization charges relating to increased oil and gas production.

Exploration, including Exploratory Dry Holes

Exploration costs, including costs for exploratory dry holes, increased 52.4% to U.S.\$1,423 million for 2007, compared to U.S.\$934 million for 2006. This increase was primarily attributable to:

U.S.\$243 million increase in expenses for international seismic activities; and

U.S.\$99 million increase in expenses related to dry holes in international operations.

Impairment of Oil and Gas Properties

For 2007, we recorded an impairment charge of U.S.\$271 million, compared to U.S.\$21 million for 2006. The impairment charge was principally related to the following international investments:

U.S.\$174 million impairment in Ecuador due to tax and legal changes implemented by the government;

U.S.\$39 million impairment in the United States; and

U.S.\$13 million impairment in Angola.

The impairment charge in 2006 was related primarily to our Córrego de Pedras on-shore field in Brazil. See Note 9(b) and 9(d) to our audited consolidated financial statements for the year ended December 31, 2007.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 29.6% to U.S.\$6,250 million for 2007, compared to U.S.\$4,824 million for 2006.

Selling expenses increased 23.5% to U.S.\$2,956 million for 2007 from U.S.\$2,394 million for 2006. This increase was primarily attributable to:

approximately U.S.\$182 million in higher transportation costs due mainly to increased exports; and

approximately U.S.\$75 million in higher personnel expenses.

General and administrative expenses increased 35.6% to U.S.\$3,294 million for 2007 from U.S.\$2,430 million for 2006. This increase was primarily attributable to:

approximately U.S.\$309 million in increased personnel expenses; and

approximately U.S.\$229 million in additional technical consulting services due to increased outsourcing of selected non-core general activities.

Research and Development Expenses

Research and development expenses increased 20.7% to U.S.\$881 million for 2007 from U.S.\$730 million for 2006. This increase was primarily due to higher costs for training the technical workforce and research and development for production from current reserves and new exploratory frontiers.

Employee Benefit Expense for Non-Active Participants

The employee benefit expense for non-active participants consists of financial costs associated with our expected pension and health care costs. Our employee benefit expense for non-active participants decreased 2.7% to U.S.\$990 million for 2007 compared to U.S.\$1,017 million for 2006. This decrease was primarily attributable to a decrease in employee benefit expense for non-active participants of U.S.\$146 million, primarily due to higher expected market return on plan assets during 2007.

Other Operating Expenses

Other operating expenses increased to a total of U.S.\$2,136 million for 2007, from

Table of Contents

U.S.\$1,120 million for 2006. The most significant changes between 2007 and 2006 were:

U.S.\$498 million extraordinary expense related to changes in Petros Pension Plan regulations;

173.3%(U.S.\$149 million) increase in expense related to the implementation of our new salary plan, to U.S.\$235 million in 2007 from U.S.\$86 million in 2006;

181.3% (U.S.\$136 million) increase in expense for losses resulting from legal proceedings and contingencies related to pending lawsuits, to U.S.\$211 million in 2007 from U.S.\$75 million in 2006;

83.5% (U.S.\$111 million) increase in expense for health, safety and environment (HSE) in 2007, to U.S.\$244 million in 2007 from U.S.\$133 million in 2006;

14.3% (U.S.\$81 million) increase in expense for institutional relations and cultural projects, to U.S.\$649 million in 2007 from U.S.\$568 million in 2006;

1.6% (U.S.\$1 million) increase in expense for unscheduled stoppages of plant and equipment, to U.S.\$65 million in 2007 from U.S.\$64 million in 2006; and

26.1% (U.S.\$62 million) decrease in expense for idle capacity from thermoelectric power plants, to U.S.\$176 million in 2007 from U.S.\$238 million in 2006.

Equity in Results of Non-Consolidated Companies

Equity in results of non-consolidated companies increased to U.S.\$235 million for 2007 compared to U.S.\$28 million in 2006, primarily as a result of the increase in gains in investments in affiliated companies of Petrobras Gás S.A. Gaspetro (U.S.\$71 million), Petrobras Química S.A. Petroquisa (U.S.\$62 million) and Petrobras International Braspetro B.V. PIB (U.S.\$37 million).

Financial Income

We derive financial income from several sources, including interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold U.S. dollar deposits.

Financial income increased 33.0% to U.S.\$1,550 million for 2007 compared to U.S.\$1,165 million for 2006. This increase was primarily attributable to the increase in financial interest income from investments in the amount of U.S.\$258 million in 2007 compared to 2006. A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2007.

Financial Expenses

Financial expenses decreased 49.5% to U.S.\$677 million for 2007 compared to U.S.\$1,340 million for 2006. This decrease was primarily attributable to a decrease of U.S.\$214 million in losses on derivative instruments and U.S.\$122 million in losses on repurchased securities in 2007 compared to 2006. A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2007.

Monetary and Exchange Variation

Monetary and exchange variation generated a loss of U.S.\$1,455 million for 2007 compared to a gain of U.S.\$75 million for 2006. The increase in monetary and exchange variation is primarily attributable to the increase in the appreciation of the real from 8.7% to 17.2% on U.S. dollar denominated investments both in Brazil (via our Exploration and Production segment) and abroad (via our International segment and financial investments).

Other Taxes

Other taxes, consisting of various taxes on financial transactions, increased 11.4% to U.S.\$662 million for 2007 compared to U.S.\$594 million for 2006.

Table of Contents*Other Expenses, Net*

Other expenses, net are primarily gains and losses recorded on sales of fixed assets and certain other non-recurring charges. Other expenses, net decreased to a loss of U.S.\$143 million for 2007 compared to a loss of U.S.\$17 million for 2006, primarily due to expenses from damage to third-party equipment installed in wells in the Campos Basin (U.S.\$71 million) and the write-off of Exploration and Production-related sunk costs (U.S.\$53 million).

Income Tax (Expense) Benefit

Income before income taxes and minority interest increased 0.7% to U.S.\$19,299 million for 2007 compared to U.S.\$19,161 million for 2006. Income tax expense increased 3.5% to U.S.\$5,888 million for 2007 compared to U.S.\$5,691 million for 2006. The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is set forth in Note 3 of our audited consolidated financial statements for the year ended December 31, 2007.

Net Income by Business Segment

We measure performance at the segment level on the basis of net income. Following is a discussion of the net income of our six business segments at December 31, 2007, compared to December 31, 2006.

	Year Ended December 31,	
	2007	2006
	(U.S.\$ million)	
Exploration and Production	14,072	11,942
Supply	2,785	2,533
Distribution	446	298
Gas and Energy	(834)	(505)
International	(815)	123
Corporate	(1,796)	(1,436)
Eliminations	(720)	(129)
Net income	13,138	12,826

Exploration and Production

Our Exploration and Production segment includes our exploration, development and production activities in Brazil, sales and transfers of crude oil in domestic and foreign markets, transfers of natural gas to our Gas and Energy segment and sales of oil products produced at natural gas processing plants.

Consolidated net income for our Exploration and Production segment increased 17.8% to U.S.\$14,072 million for 2007 compared to U.S.\$11,942 million for 2006.

This result was primarily attributable to a U.S.\$6,253 million increase in net operating revenues, primarily related to:

higher sales and transfer prices for oil in Brazil;

0.8% increase in crude oil and NGL production; and

higher transfer prices to our other segments for natural gas due to new

methodology that takes into consideration natural gas substitutes such as fuel oil as well as international natural gas prices.

These effects were partially offset by:

(U.S.\$1,492 million) increase in cost of sales as a result of higher lifting costs and production taxes when expressed in U.S. dollars, as well as slightly increased production;

U.S.\$1,169 million increase in depreciation, depletion and amortization primarily as result of increased capital expenditures, depletion expenses associated with our increased crude oil and natural gas production; and

U.S.\$214 million increase in other operating expenses, mainly attributable to a one-time charge of U.S.\$104 million related to

Table of Contents

amendments in Petros Plan regulations.

Supply

Our Supply segment comprises our downstream activities in Brazil, including refining, transportation, export and purchase of crude oil, as well as the purchase and sale of oil products and ethanol. Additionally, this segment includes the petrochemical and fertilizers division, which includes investments in domestic petrochemical companies and our domestic fertilizer plants.

Consolidated net income for our Supply segment increased 9.9% to U.S.\$2,785 million for 2007 compared to U.S.\$2,533 million for 2006.

This increase was primarily a result of a U.S.\$11,590 million increase in net operating revenues, mainly attributable to:

higher sales volumes;

higher average prices for our products sold in Brazil, despite constant prices in reais for diesel, gasoline and LPG as the appreciation of the real yielded higher revenues when expressed in U.S. dollars; and

higher international prices for oil products exports.

These effects were partially offset by:

19.4% (U.S.\$10,069 million) increase in the cost of sales, mainly attributable to a rise in the cost and volume of domestic and imported crude oil and an increase in the cost and volume of imported oil products, primarily diesel. Higher refining costs also contributed to the increased cost of sales;

47.1% (U.S.\$640 million) increase in selling, general and administrative expenses as a result of higher selling expenses, due to increased sales volumes and increased personnel expenses;

61.0% (U.S.\$408 million) increase in depreciation, depletion and amortization primarily as result of higher capital expenditures to upgrade and modernize our refineries; and

441.1% (U.S.\$179 million) increase in other operating expenses, mainly attributable to a one-time charge of U.S.\$61 million related to amendments in Petros Plan regulations and a U.S.\$69 million expense related to HSE.

Distribution

Our Distribution segment comprises oil product and ethanol distribution activities conducted by our majority owned subsidiary, Petrobras Distribuidora S.A. BR, in Brazil.

Consolidated net income for our Distribution segment increased 49.7% to U.S.\$446 million for 2007 compared to U.S.\$298 million for 2006.

This result reflected a U.S.\$4,639 million increase in net operating revenues, primarily resulting from higher sales volumes.

These effects were partially offset by a U.S.\$4,157 million increase in cost of sales, mainly due to higher sales volumes.

Gas and Energy

Our Gas and Energy segment consists principally of the purchase, sale, transportation and distribution of natural gas produced in or imported into Brazil. Additionally, this segment includes our participation in domestic natural gas transportation, natural gas distribution and thermoelectric power generation.

Our Gas and Energy segment registered net loss of U.S.\$834 million for 2007 compared to net loss of U.S.\$505 million for 2006.

This increase in our net loss was primarily attributable to:

24.5%(U.S.\$890 million) increase in cost of sales, primarily due to higher natural gas costs; and

144.1%(U.S.\$257 million) increase in other operating expenses, mainly attributable to a U.S.\$240 million expense related to the payment of contractual fines related to gas and electricity supply.

Table of Contents

These effects were partially offset by a U.S.\$822 million increase in net operating revenues as a result of:

higher sales price for natural gas; and

2.1% increase in natural gas sales volume.

International

The International segment comprises our activities in other countries, which include Exploration and Production, Supply, Distribution and Gas and Energy.

Our International segment generated net loss of U.S.\$815 million in 2007 compared to net income of U.S.\$123 million in 2006.

This decrease was primarily attributable to:

higher cost of sales in the amount of U.S.\$2,954 million, primarily as a result of: (i) the consolidation of the Pasadena refinery acquired in 2006; and (ii) increased lifting cost, primarily in Argentina;

U.S.\$342 million increase in exploration and drilling expenses, mainly in Turkey, Angola, Iran, Argentina, Libya, and Venezuela;

U.S.\$225 million increase in impairment expenses, mainly in Ecuador, the United States and Angola;

U.S.\$151 million increase in selling, general and administrative expenses, due to increased operations by our foreign subsidiaries, corporate acquisitions and the formation of new companies; and

U.S.\$150 million increase in depreciation, depletion and amortization primarily as result of an increase in capital expenditures related to property, plant and

equipment associated with our crude oil and natural gas production.

These increases were partially offset by U.S.\$3,030 million increase in net operating revenues as a result of the consolidation of the Pasadena refinery and an increase in petrochemical business revenues in Argentina, partially offset by the exclusion of revenues from Venezuelan operations from our consolidated results.

Corporate

Our Corporate segment includes our financing activities not attributable to other segments, including corporate financial management, central administrative overhead and actuarial expenses related to our pension and health care plans for inactive participants.

Consolidated net loss for our Corporate segment increased to U.S.\$1,796 million in 2007 compared to a net loss of U.S.\$1,436 million in 2006.

This larger net loss was primarily affected by the following items:

38.2% (U.S.\$436 million) increase in selling, general and administrative expenses, mainly due to personnel expenses due to staffing for our planned growth as well as increased activity in 2007, a new

salary plan to make our salaries more competitive with the Brazilian labor market and the renewal of a collective bargaining agreement; and

a one-time charge of U.S.\$305 million included in other operating expenses related to the amendments in Petros Pension Plan regulations.

These effects were partially offset by a decrease in income tax expense in the amount of U.S.\$601 million due to the additional tax incentives in relating to operations in the region covered by the Northeast Development Agency (ADENE).

Table of Contents**Additional Business Segment Information**

Set forth below is additional selected financial data by business segment for 2008, 2007 and 2006:

- (1) As a vertically integrated company, not all of our segments have significant third-party revenues. For example, our exploration and production segment accounts for a large part of our economic activity and capital expenditures, but has little third party revenues.
- (2) Revenues from commercialization of oil to third parties are classified in accordance with the points of sale, which could be either the Exploration and Production or Supply segments.
- (3) In order to align the financial statements of each business segment with the best practices of companies in the oil and gas sector and to improve our management's understanding, since the first quarter of 2006 we have switched to allocating all financial results and items of a financial nature to the corporate level, including prior years.

Table of Contents

Management's Discussion and Analysis of PifCo's Financial Condition and Results of Operations

Overview

PifCo is our wholly owned subsidiary. Accordingly, PifCo's financial position and results of operations are significantly affected by our decisions. PifCo's ability to meet its outstanding debt obligations depends on a number of factors, including:

our financial condition and results of operations;

the extent to which we continue to use PifCo's services for market purchases of crude oil and oil products;

our willingness to continue to make loans to PifCo and provide PifCo with other types of financial support;

PifCo's ability to access financing sources, including the international capital markets and third-party credit facilities; and

PifCo's ability to transfer our financing costs to us.

PifCo earns income from:

sales of crude oil and oil products to us;

sales of crude oil and oil products to third parties and affiliates; and

the financing of sales to us, inter-company loans to us and investments in marketable securities and other financial instruments.

PifCo's operating expenses include:

cost of sales, which is comprised mainly of purchases of crude oil and oil products;

selling, general and administrative expenses; and

financial expense, mainly from interest on its lines of credit and capital markets indebtedness, sales of future receivables and inter-company loans from us.

Purchases and Sales of Crude Oil and Oil Products

PifCo typically purchases crude oil and oil products in transactions with payment terms of approximately 30 days. We typically pay for shipments of crude oil and oil products that PifCo sells to us over a period of up to 330 days, which allows us sufficient time to assemble the necessary documentation under Brazilian law to commence the payment process for our shipments. During this period, PifCo typically finances the purchase of crude oil and oil products through either funds previously provided by us or third-party trade finance arrangements. The difference between the

amount PifCo pays for crude oil and oil products and the amount we pay for that same crude oil and oil products is deferred and recognized as part of PifCo's financial income on a straight-line basis over the period in which our payments to PifCo come due. PifCo also purchases crude oil and oil products from us for sale outside Brazil. Additionally, PifCo sells and purchases crude oil and oil products to and from third parties and related parties, mainly outside Brazil.

Results of Operations 2008 compared to 2007

Net (Loss) Income

PifCo had a loss of U.S.\$772 million in 2008 compared to net income of U.S.\$29 million in 2007.

Sales of Crude Oil and Oil Products and Services

PifCo's sales of crude oil and oil products and services increased 58.8% to U.S.\$42,443 million in 2008 compared to U.S.\$26,732 million in 2007. This increase was primarily due to:

44% increase in average sales price, mainly as a result of a 34% increase in the average price of Brent crude oil, to U.S.\$96.99 per barrel in 2008 from U.S.\$72.52 per barrel in 2007; and

14.1% increase in sales volumes, primarily due to increased sales of crude oil and oil products purchased from third parties and affiliates and subsequently sold to Petrobras.

Cost of Sales

Cost of sales increased 60.5% to U.S.\$42,231 million in 2008 compared to

Table of Contents

U.S.\$26,311 million in 2007. This increase was proportionally higher than the increase in sales of crude oil and oil products and services primarily due to the same reasons and also as a result of higher average inventory price formation in the last quarter of 2008, since oil and oil products were largely acquired prior to the decline in international oil prices.

Selling, General and Administrative Expenses

PifCo's selling, general and administrative expenses consist primarily of shipping costs and fees for services, including accounting, legal and rating services. These expenses increased 90.8% to U.S.\$562 million in 2008 compared to U.S.\$294 million in 2007. This increase resulted primarily from increases in offshore sales and average freight rates in 2008, as a result of changes in international market trends and shipping routes in the amount of U.S.\$452 million.

Other Operating Expenses

PifCo recognized a loss of US\$577 million due to inventory impairment for the year ended December 31, 2008, as a result of the recent decline in the international oil prices.

Financial Income

PifCo's financial income consists of the financing of sales to us, inter-company loans to us, investments in marketable securities and other financial instruments. PifCo's financial income increased 12.3% to U.S.\$2,325 million in 2008 compared to U.S.\$2,070 million in 2007. This increase was primarily due to:

increased sales to us during 2007 compared to 2006, resulting in additional financial income in 2008 due to financing terms granted to us and interest calculated on a monthly basis. See Purchases and Sales of Crude Oil and Oil Products ; and

increased derivative income related to exchange traded contracts as a result of increases in offshore sales and the average price of crude oil and oil products in the international market.

This increase was partially offset by a decrease in financial income from loans to related parties, due to the transfer of U.S.\$8,231 million in notes receivable to Braspetro Oil Services Company (Brasoil) as a consequence of the assumption by Brasoil of PifCo's obligations under the notes payable to Petrobras in the same amount. See Note 5(v) to PifCo's audited consolidated financial statements.

Financial Expense

PifCo's financial expense consists of interest paid and accrued on PifCo's outstanding indebtedness, other fees associated with PifCo's issuance of debt and other financial instruments. PifCo's financial expense remained substantially stable, at U.S.\$2,170 million in 2008 compared to U.S.\$2,168 million in 2007.

There was an increase in derivative expenses related to exchange traded contracts as a result of increases in offshore sales and the average price of crude oil and oil products in the international market and an increase in interest expenses relating to recent issuances of notes, including the issuance of U.S.\$1.0 billion in Global Notes in November 2007, and a reopening of those Global Notes in the amount of U.S.\$750 million in January 2008.

These increases were offset by a decrease in interest expenses due to the assumption by Brasoil of PifCo's obligations under notes payable to Petrobras in the amount of U.S.\$8,231 million, as a consequence of the transfer of notes

receivable to Brasoil in the same amount.

Results of Operations 2007 compared to 2006

Net Income (Loss)

PifCo had a net income of U.S.\$29 million for 2007 compared to a loss of U.S.\$211 million for 2006.

Sales of Crude Oil and Oil Products and Services

PifCo's sales of crude oil and oil products and services increased 21.1% to U.S.\$26,732 million for 2007 compared to U.S.\$22,070 million for 2006.

This increase was primarily due to:

25% increase in sales volume caused by higher sales of crude oil and oil products purchased from third parties and affiliates and subsequently sold to Petrobras, and higher sales associated

Table of Contents

with trading activities in Asia by PifCo's subsidiary PSPL; and

11.3% increase in the average price of Brent crude oil to U.S.\$72.52 per barrel for 2007 compared to U.S.\$65.14 per barrel for 2006.

Cost of Sales

Cost of sales increased 20.1% to U.S.\$26,311 million for 2007 compared to U.S.\$21,901 million for 2006. This increase was proportional to the increase in sales of crude oil and oil products and services and was primarily due to the same reasons.

Selling, General and Administrative Expenses

PifCo's selling, general and administrative expenses consist primarily of shipping costs and fees for services, including accounting, legal and rating services. These expenses increased 42.1% to U.S.\$295 million for 2007 compared to U.S.\$207 million in 2006, U.S.\$136 million of which consisted of higher shipping expenses caused by increased offshore sales and higher average freight rates.

Financial Income

PifCo's financial income consists of financing of sales to us, inter-company loans to us, investments in marketable securities and other financial instruments. PifCo's financial income increased 61.1% to U.S.\$2,070 million for 2007 compared to U.S.\$1,285 million for 2006, primarily due to:

increased loans to related parties; and

higher sales volumes to us during 2006 compared to 2005. See Purchases and Sales of Crude Oil and Oil Products.

Financial Expense

PifCo's financial expense consists of interest paid and accrued on PifCo's outstanding indebtedness and other fees associated with PifCo's issuance of debt. PifCo's financial expense increased 48.7% to U.S.\$2,168 million for 2007 compared to U.S.\$1,458 million for 2006, primarily due to increased inter-company loans from us to meet short-term financing needs.

Liquidity and Capital Resources

Petrobras

Overview

Our principal uses of funds are for capital expenditures, dividend payments and repayment of debt. Historically we have met these requirements with internally generated funds, short-term debt, long-term debt, project financing and sale and lease-back transactions. We believe these sources of funds, together with our strong position of cash and cash equivalents, will continue to allow us to meet our currently anticipated capital requirements. In 2009, our major cash needs include planned capital expenditures of U.S.\$28,695 million, announced dividends of U.S.\$4,242 million and

payments of U.S.\$3,562 million on our long-term debt, leasing and project financing obligations.

Financing Strategy

The objective of our financing strategy is to help us achieve the targets set forth in our Business Plan released on January 23, 2009, which provides for capital expenditures of U.S.\$174.4 billion from 2009 through 2013. We will continue our policy of extending the term of our debt maturity profile. We will raise debt capital through a variety of medium and long-term financing arrangements, including the issuance of bonds in the international capital markets, supplier financing, project financing and bank financing.

In planning for our financial needs for 2009 and 2010, we have assumed an average Brent crude oil price of U.S.\$37.0/bbl in 2009 and U.S.\$40.0/bbl in 2010. Based on these prices, and making other assumptions regarding our cash flow generation, we expect that we would need U.S.\$18.1 billion of new financing in 2009 and U.S.\$18.9 billion in 2010 in order to meet the capital expenditures set forth in our 2009-2013 Business Plan.

For 2009, we intend to fund our financial needs through loans from the BNDES, Brazilian banks, international commercial banks and other traditional sources of funding such as export credit agencies and non-Brazilian government development banks. As of May 20, 2009, we have raised approximately U.S.\$500 million (R\$1.2 billion) from Brazilian banks and U.S.\$4.0 billion from international commercial banks toward our financing needs for 2009.

Table of Contents

We expect to repay the loans from international commercial banks with the issuance of long-term bonds in the capital markets. In February 2009, we issued U.S.\$1.5 billion of long-term bonds in the capital markets, which reduced the total amount of required bank financing. All amounts raised in 2009 in excess of U.S.\$18.1 billion will be used to pre-fund our financing needs for 2010.

We intend to fund a significant portion of the U.S.\$18.9 billion of capital expenditures needed for 2010 through loan facilities from the BNDES. We expect to raise additional amounts from our traditional sources of funding, as well as realize cost savings on some of our capital projects.

In the last quarter of 2008, there was a substantial decrease in demand for, and prices of, oil. If Brent crude oil prices drop below the reference prices we use to calculate the cash flows assumed in our 2009-2013 Business Plan, we may need to reduce our expenditures as well as evaluate additional sources of capital.

Government Regulation

We are required to submit our annual capital expenditures budget (*Plano de Dispêndio Global*, or PDG) to the Brazilian Ministry of Planning, Budget and Management, and the Ministry of Mines and Energy. Following review by these agencies, the Brazilian Congress must approve the budget. Although the total level of our annual capital expenditures is regulated, the specific application of funds is left to our discretion. Since mid-1991, we have obtained substantial amounts of our financing from the international capital markets, mainly through the issuance of commercial paper and short, medium and long-term notes, and have increasingly been able to raise long-term funds for large capital expenditure items such as rigs and platforms.

The Brazilian Ministry of Planning, Budget and Management controls the total amount of medium and long-term debt that we and our Brazilian subsidiaries can incur through the annual budget approval process. Before issuing medium and long-term debt, we and our Brazilian subsidiaries must also obtain the approval of the National Treasury Secretariat. Borrowings that exceed the approved budgeted amount for any year also require approval of the Brazilian Senate.

All of our foreign currency denominated debt, as well as the foreign currency denominated debt of our Brazilian subsidiaries, requires registration with the Central Bank. The issuance of debt by our international subsidiaries, however, is not subject to registration with the Central Bank or approval by the National Treasury Secretariat.

Sources of Funds

Our Cash Flow

On December 31, 2008, we had cash and cash equivalents of U.S.\$6,499 million compared to U.S.\$6,987 million at December 31, 2007. The decrease in our cash and cash equivalents was primarily due to increased capital expenditures during 2008 compared to 2007.

Operating activities provided net cash flows of U.S.\$28,220 million for 2008 compared to U.S.\$22,664 million for 2007. Cash generated by operating activities was mainly affected by net operating revenues, which increased U.S.\$30,522 million during 2008 compared to 2007.

Net cash used in investing activities increased to U.S.\$29,466 million for 2008 compared to U.S.\$24,026 million for 2007. This increase was due primarily to capital expenditures totaling U.S.\$29,874 million, including U.S.\$14,293 million related to exploration and production projects in Brazil, mainly in the Campos Basin.

Net cash provided by financing activities amounted to U.S.\$2,778 million for 2008 compared to net cash used in financing activities of U.S.\$5,988 million for 2007. This increase was primarily due to funds raised by PifCo through the issuance of Global Notes and proceeds from project financing, primarily from the Gasene, Codajás and Companhia de Desenvolvimento e Modernização de Plantas Industriais CDMPI projects. See Notes 12 and 14 of our consolidated financial statements for the year ended December 31, 2008.

Our net debt increased to U.S.\$20,852 million as of December 31, 2008 compared to U.S.\$14,908 million as of December 31, 2007, primarily due to increased capital expenditures, as we continue to expand our activities, which exceeded our internally generated cash flow. The deficit was funded by increased long-term debt, drawdowns from credit lines to finance ethanol exports, funds raised by

Table of Contents

PifCo through the issuance of Global Notes, increased project financing proceeds, as well as a reduction in cash and cash equivalents.

Short-Term Debt

Our outstanding short-term debt serves mainly to support our imports of crude oil and oil products, and is provided almost entirely by international banks. On December 31, 2008, our short-term debt (excluding current portions of long-term debt) amounted to U.S.\$2,399 million compared to U.S.\$1,458 million on December 31, 2007.

Long-Term Debt

Our outstanding long-term debt consists primarily of the issuance of securities in the international capital markets, debentures in the domestic capital markets, amounts outstanding under facilities guaranteed by export credit agencies and multilateral agencies and loans from the BNDES and other financial institutions. Outstanding long-term debt, plus the current portion of our long-term debt amounted to U.S.\$17,562 million at December 31, 2008 compared to U.S.\$13,421 million at December 31, 2007.

Included in these figures at December 31, 2008 are the following international debt issues:

Notes	Principal Amount (U.S.\$ million)
PEPSA s 9.00% Notes due 2009	181
PEPSA s 8.13% Notes due 2010	349
PEPSA s 3.55% Notes due 2011	87
PifCo s 9.750% Notes due 2011	600
PEPSA s 9.38% Notes due 2013	200
PifCo s 3.748% Senior Trust Certificates due 2013(1)	200
PifCo s 9.125% Global Notes due 2013	750
PifCo s 7.75% Global Notes due 2014	600
PifCo s 6.436% Senior Trust Certificates due 2015(1)	550
PifCo s 2.15% Japanese Yen Bonds due 2016	386
PifCo s 6.125% Global Notes due 2016	899
PEPSA s 6.66% Notes due 2017(2)	300
PifCo s 8.375% Global Notes due 2018	750
PifCo s 5.875% Global Notes due 2018	1,750

Unless otherwise noted, all debt is issued by PifCo, with support from us through a standby purchase agreement.

- (1) Issued in connection with our export prepayment program. Unless otherwise noted, all debt issued by PifCo, with support from us through a standby purchase agreement.
- (2) Issued by PESA, with support from us through a standby purchase agreement.

Project Financing

Since 1997, we have utilized project financings to provide capital for our extensive exploration and production operations and related projects, including some natural gas processing and transportation systems. All of these projects and the related debt obligations of special purpose companies established for these financings are on-balance sheet and accounted for under the line item Project Financings. Under typical contractual arrangements, we are responsible for completing the development of the oil and gas fields, operating the fields, paying all operating expenses relating to the projects and remitting a portion of the net proceeds generated from the fields to fund the

special purpose companies' debt and return on equity payments. At the end of each financing project, we have the option to purchase the project assets from the special purpose company or, in some cases, acquire control over the special purpose company itself.

Outstanding project financing, plus the current portion of our project financing, totaled U.S.\$6,795 million at December 31, 2008, compared to U.S.\$6,278 million at December 31, 2007. This increase in outstanding project financing was primarily due to increased debt relating to the Gasene, Codajás and CDMPI projects. See Note 14 of our consolidated financial statements for the year ended December 31, 2008.

Table of Contents

As of December 31, 2008, the long-term portion of our project financings becomes due in the following years:

	Amount Due (U.S.\$ million)
2010	529
2011	878
2012	335
2013	335
2014	384
2015 and thereafter	2,554
	5,015

PifCo*Overview*

PifCo finances its oil trading activities principally through commercial banks, including lines of credit, as well as through inter-company loans from us and the issuance of notes in the international capital markets. As an offshore non-Brazilian company, PifCo is not legally obligated to receive prior approval from the Brazilian National Treasury before incurring debt or registering debt with the Central Bank. As a matter of policy, however, the issuance of any debt follows the recommendation by any of our Chief Financial Officer, executive board or board of directors, depending on the aggregate principal amount and the tenor of the debt to be issued.

*Sources of Funds**PifCo's Cash Flow*

At December 31, 2008, PifCo had cash and cash equivalents of U.S.\$288 million compared to U.S.\$675 million at December 31, 2007. PifCo's operating activities used net cash of U.S.\$9,149 million in 2008 compared to U.S.\$5,210 million in 2007, primarily as a result of an increase in related-party trade accounts receivables. This increase was a result of increased sales of crude oil and oil products and services, primarily due to higher average prices of crude oil and oil products in the international market.

PifCo's investing activities provided net cash of U.S.\$26 million in 2008 compared to U.S.\$5,945 million in 2007, primarily as a result of a decrease in the amount of loans to related parties and investments in marketable securities held by a fund that includes investments in titles of Petrobras' special purposes companies.

PifCo's financing activities provided net cash of U.S.\$8,736 million in 2008 compared to

net cash of U.S.\$11,319 million in 2007, primarily as a result of a decrease in proceeds from short-term loans from us and a decrease in proceeds from the issuance of long-term debt.

PifCo's Accounts Receivable

Accounts receivable from related parties increased 62.3% to U.S.\$24,155 million at December 31, 2008, from U.S.\$14,886 million at December 31, 2007, primarily as a result of an increase in sales of crude oil and oil products mainly due to increased average prices of crude oil and oil products in the international market.

PifCo's Short-Term Borrowings

PifCo's short-term borrowings are denominated in U.S. dollars and consist of short-term lines of credit, loans from financing institutions and the short-term portion of long-term lines of credit and loans from financing institutions. At December 31, 2008, PifCo had short-term borrowings of U.S.\$143 million, consisting of the short-term portion of long-term lines of credit and loans from financing institutions, compared to U.S.\$311 million of short-term borrowings at December 31, 2007. The weighted average annual interest rate on these short-term borrowings was 3.59% at December 31, 2008 compared to 5.59% at December 31, 2007. At December 31, 2008, PifCo had no short-term lines of credit or loans from financing institutions outstanding.

The short-term portion of PifCo's notes payable to related parties consists of notes payable to us, and increased 5.7% to U.S.\$25,353 million at December 31, 2008, from U.S.\$23,978 million at December 31, 2007, primarily as a result of PifCo's short-term financing needs. This increase was partially offset by the assumption by Brasoil of PifCo's obligations under the notes payable to us in the amount of U.S.\$8,231 million, as a consequence of the transfer of PifCo's notes receivable to Brasoil in the same amount.

Table of Contents

PifCo's Long-Term Borrowings

At December 31, 2008, PifCo had long-term borrowings outstanding in financing institutions of:

U.S.\$631 million in long-term lines of credit due between 2009 and 2017 compared to U.S.\$646 million at December 31, 2007. At December 31, 2008, PifCo had used all funds from lines of credit to finance imports and exports of crude oil and oil products; and

U.S.\$358 million under the loan agreement with Malha Gas Investment Co. Ltd. (M-GIC), which acts as a Facility Agent for the Japan Bank for International Cooperation (JBIC). This loan bears interest at Libor plus 0.8% p.a., payable semi-annually. The principal amount will be paid semi-annually starting on December 15, 2009 through December 15, 2014.

On January 11, 2008, PifCo reopened the series of its outstanding U.S.\$1.0 billion 5.875% Global Notes due March 1, 2018, issuing an additional amount of U.S.\$750 million in Global Notes. The Global Notes are fungible with the original 5.875% Global Notes issued on November 1, 2007, and bear interest at a rate of 5.875% per year, payable semi-annually. The total amount of U.S.\$1,750 million in 5.875% Global Notes due 2018 is included in the Current and Long-Term Debt table below under the heading Global Notes .

On March 31, 2008, PifCo paid U.S.\$127 million of principal on the Global Step-Up Notes that matured on April 1, 2008.

On May 8, 2008, PifCo paid U.S.\$224 million of principal on the Senior Notes that matured on May 9, 2008.

At December 31, 2008, PifCo also had outstanding:

U.S.\$235 million in Senior Notes due 2011, bearing interest at the rate of 9.75%;

U.S.\$332 million (U.S.\$67 million current portion) in connection with Petrobras' export prepayment program, U.S.\$550 million in 6.436% Senior Trust Certificates due 2015, and U.S.\$200 million in 3.748% Senior Trust Certificates due 2013;

U.S.\$3,941 million in Global Notes, consisting of U.S.\$374 million in Global Notes due July 2013 that bear interest at the rate of 9.125% per year; U.S.\$577 million in Global Notes due December 2018 that bear interest at the rate of 8.375% per year; U.S.\$398 million in Global Notes due 2014 that bear interest at the rate of 7.75% per year; U.S.\$899 million in Global Notes due October 2016 that bear interest at the rate of 6.125% per year; and U.S.\$1,750 million in Global Notes due March 2018 that bear interest at the rate of 5.875% per year. Interest on these notes is paid semi-annually and the proceeds were used for general corporate purposes, including the financing of the purchase of oil product imports and the repayment of existing trade-related debt and inter-company loans; and

U.S.\$386 million (¥35 billion) in Japanese Yen Bonds issued in September 2006 and due September 2016. The issue was a private placement in the Japanese market with a partial guaranty from JBIC and was designed to tap the Japanese market, access a new investor base and achieve a competitive cost. The bonds bear interest at the rate of 2.15% per year, payable semi-annually. On the same date, PifCo entered into a swap agreement with Citibank, swapping the total amount of this debt to a U.S. dollar denominated debt.

Pifco's outstanding position at December 31, 2008 in irrevocable letters of credit was U.S.\$628 million compared to U.S.\$730 million at December 31, 2007, supporting crude oil and oil

Table of Contents

products imports and services. At December 31, 2008, PifCo had standby committed facilities available in the amount of U.S.\$546 million, which are not committed to any specific use. PifCo has not drawn down amounts related to these facilities, and, as of the date of this filing, PifCo has not scheduled a date for the drawdown.

In June 2008, PifCo issued a corporate guaranty to International Finance Corporation IFC in the amount of U.S.\$40 million to guarantee a loan entered into by the affiliate company Quattor Petroquímica in connection with Petrobras

consolidation of petrochemical assets in Southeastern Brazil. Accordingly, Quattor Petroquímica assumed the obligation to pay interest annually, in *reais*, at a rate of 1% per year over the amount guaranteed by PifCo up to the maturity date of the loan in 2017, or until certain contractual conditions are reached, whichever comes first. In the event PifCo is required to make payments under the guaranty, PifCo will have the right to recover those payments from Quattor Petroquímica.

The following table sets forth the sources of PifCo's current and long-term debt at December 31, 2008, and December 31, 2007:

	December 31, 2008		December 31, 2007	
	Current	Long-term	Current	Long-term
		(U.S.\$ million)		
Financing Institutions	143	989	311	1,040
Senior Notes	11	235	239	235
Global Step-Up Notes			131	
Sale of right to future receivables	70	482	69	549
Assets related to export prepayment to be offset against sales of rights to future receivables		(150)		(150)
Global Notes	76	3,941	37	3,200
Japanese Yen Bonds	2	386	2	313
Total debt	302	5,883	789	5,187

Long-Term Indebtedness Incurred After December 31, 2008

On February 11, 2009, PifCo issued Global Notes in the total amount of U.S.\$1,500 million in the international capital market, due March 15, 2019. The Global Notes bear interest at the rate of 7.875% per year, payable semiannually beginning on September 15, 2009. The funds raised will be used for general corporate purposes, including financing the 2009-2013 Business Plan. The offering had an estimated cost of U.S.\$6 million, a discount of U.S.\$26 million and an effective interest rate of 8.187% per year. The Global Notes constitute general senior unsecured and unsubordinated obligations of PifCo and are unconditional and irrevocably guaranteed by Petrobras.

Between March 24, 2009, and May 20, 2009, PifCo borrowed an aggregate amount of U.S.\$4,000 million under lines of credit with Banco Santander, S.A., Citibank, N.A., HSBC Bank USA, N.A. and JPMorgan Chase Bank, N.A. The loans will mature in 2011 and bear interest at an initial rate of Libor plus spreads reflecting prevailing rates at the time of incurrence. The proceeds will be used

by PifCo to purchase oil on the international market for sale to Petrobras and to purchase our oil exports.

Extinguished Securities

On December 31, 2008 and December 31, 2007, we had amounts invested abroad in an exclusive investment fund that held debt securities of some of our group companies in the amount of U.S.\$749 million and U.S.\$856 million, respectively. Once these securities are purchased by the fund, the related amounts, together with applicable interest, are removed from the presentation of marketable securities and project financings. See Note 14 to our audited consolidated financial statements for the year ended December 31, 2008.

Off Balance Sheet Arrangements

As noted above, all of our project financings are on-balance sheet. As of December 31, 2008, neither we nor PifCo had off-balance sheet arrangements that have, or are reasonably likely to have, a material effect on our financial condition, revenues or expenses, results of

Table of Contents

operations, liquidity, capital expenditures or capital resources.

*Uses of Funds**Capital Expenditures*

We invested a total of U.S.\$29,874 million in 2008, a 42.4% increase compared to our investments of U.S.\$20,978 million in 2007. Our 2008 investments were primarily directed toward

increasing production in the Campos Basin, modernizing our refineries and expanding our pipeline transportation and distribution systems. Of the total capital expenditures in 2008, U.S.\$14,293 million was invested in exploration and development projects (47.8% in the Campos Basin), including investments financed through project financing.

The following table sets forth our consolidated capital expenditures (including project financings and investments in gas-fired power plants) for each of our business segments for 2008, 2007 and 2006:

	For the Year Ended December 31		
	2008	2007	2006
	(U.S.\$ million)		
Exploration and Production	14,293	9,448	7,329
Supply	7,234	4,488	1,936
Distribution	309	327	351
Gas and Energy	4,256	3,223	1,664
International			
Exploration and Production	2,734	2,555	2,304
Supply	102	247	202
Distribution	20	37	77
Gas and Energy	52	25	54
Corporate	874	628	726
Total	29,874	20,978	14,643

On January 23, 2009, we announced our 2009-2013 Business Plan, which contemplates total budgeted capital expenditures of U.S.\$174.4 billion from 2009 to 2013, approximately U.S.\$158.2 billion of which will be directed towards our activities in Brazil, while U.S.\$16.2 billion will be directed to our activities abroad. We expect that the majority of our capital expenditures from 2009 to 2013, approximately U.S.\$104.6 billion, will be directed towards exploration and production, of which U.S.\$91.9 billion is slated for our activities in Brazil (U.S.\$28 billion of which is dedicated to the pre-salt reservoirs).

Our 2009-2013 Business Plan contemplates greater domestic capital expenditures for our oil and gas activities in Brazil. We estimate that of the U.S.\$158.2 billion in domestic capital expenditures through 2013, at least U.S.\$100.7 billion (64%) will be utilized to pay for equipment and services provided by Brazilian contractors, suppliers and other service providers.

Our capital expenditure budget for 2009, including our project financings, is U.S.\$28.6 billion, allocated as follows:

Exploration and Production segment: U.S.\$13.0 billion;

Supply segment: U.S.\$7.9 billion;

Distribution segment: U.S.\$0.3 billion;

Gas and Energy segment: U.S.\$3.2 billion;

International segment: U.S.\$3.0 billion;

Corporate segment: U.S.\$0.8 billion; and

Our subsidiary Petrobras Biocombustível: U.S.\$0.4 billion

We plan to meet our budgeted capital expenditures primarily through internally generated cash, issuances in the international capital markets, project finance loans, commercial bank loans and other sources of capital. Our actual capital expenditures may vary substantially from the projected numbers set forth above as a result of market conditions and the cost and availability of the necessary funds.

Dividends

Our shareholders approved a dividend distribution of U.S.\$4,242 million at the Ordinary General Shareholder Meeting held on April 8, 2009. This proposal complies with our by-laws regarding the guaranteed rights of preferred shares and

Table of Contents

includes interest on shareholders' equity already approved by the board of directors.

The dividends and interest on shareholders' equity will be paid on the dates established at the Ordinary General Shareholder Meeting. These amounts will be restated

according to the SELIC rate from December 31, 2008 to the initial date of payment. The first payment was scheduled for April 24, 2009, but was not paid until April 29, 2009 due to the imposition of an injunction by a Rio de Janeiro court that was quickly overturned.

Contractual Obligations**Petrobras**

The following table summarizes our outstanding contractual obligations and commitments at December 31, 2008:

	Total	Payments Due by Period			³ 5 years
		³ 1 year	1-3 years	3-5 years	
		(U.S.\$ million)			
Contractual obligations					
Balance sheet items:					
Long-term debt obligations	17,562	1,531	6,392	3,363	6,276
Pension fund obligations(1)	16,168	923	2,124	2,555	10,566
Project financings obligations	6,795	1,780	1,407	670	2,938
Capital (finance) lease obligations	595	251	302	30	12
Total balance sheet items	41,120	4,485	10,225	6,618	19,792
Other long-term contractual commitments					
Natural gas ship-or-pay	5,108	457	921	931	2,799
Contract service	44,843	17,273	16,166	5,621	5,783
Natural gas supply agreements	11,687	1,112	1,938	2,178	6,459
Operating lease	23,166	4,271	7,975	6,254	4,666
Purchase commitments	5,154	1,446	1,284	595	1,829
International purchase commitments	10,933	1,543	6,229	1,449	1,712
Total other long-term commitments	100,891	26,102	34,513	17,028	23,248
Total	142,011	30,587	44,738	23,646	43,040

(1) Our pension fund obligations are guaranteed by U.S.\$14,115 million in plan assets. These assets are presented as a reduction to the net actuarial liabilities. See Note 16(f) to our consolidated financial statements for the year ended December 31, 2008.

PifCo

The following table sets forth PifCo's contractual obligations as of December 31, 2008, and the period in which the contractual obligations come due:

	Total	Payments Due by Period			
		³ 1 year	1-3 years	3-5 years	³ 5 years
		(U.S.\$ million)			
Contractual obligations					
Long-term debt	6,081	198	866	1,253	3,764
Purchase obligations long-term	2,448	1,246	912	145	145
Operating leases	11	1	3	4	3
Total	8,540	1,445	1,781	1,402	3,912

Table of Contents

Critical Accounting Policies and Estimates

The following discussion describes those areas that require the most judgment or involve a higher degree of complexity in the application of the accounting policies that currently affect our financial condition and results of operations. The accounting estimates we make in these contexts require us to make assumptions about matters that are highly uncertain. In each case, if we had made other estimates, or if changes in the estimates occur from period to period, our financial condition and results of operations could be materially affected.

The discussion addresses only those estimates that we consider most important based on the degree of uncertainty and the likelihood of a material impact if we used a different estimate. There are many other areas in which we use estimates about uncertain matters, but the reasonably likely effect of changed or different estimates is not material to our financial presentation.

Oil and Gas Reserves

Evaluations of oil and gas reserves are important for the effective management of upstream assets. They are used to make investment decisions about oil and gas properties. Oil and gas reserve quantities are also used as the basis for calculation of unit-of-production rates for depreciation and evaluation for impairment. Oil and gas reserves are divided between proved and unproved reserves. Proved reserves are estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Unproved reserves are those with less than reasonable certainty of recoverability and are classified as either probable or possible. Probable reserves are reserves that are more likely to be recovered than not. Possible reserves are less likely to be recovered than probable reserves.

The estimation of proved reserves is an ongoing process that takes into account engineering and geological information such as well logs, pressure data and fluid sample core data. Proved reserves can also be divided in two categories: developed and undeveloped. Developed proved reserves are expected to be recovered from

existing wells including line pack, or when the costs necessary to put them in production are relatively low. For undeveloped proved reserves, significant investments are necessary, including drilling new wells and installing production or transportation facilities.

We use the successful efforts method to account for our exploration and production activities. Under this method, costs are accumulated on a field-by-field basis with certain exploratory expenditures and exploratory dry holes being expensed as incurred. Exploratory wells that find oil and gas in an area requiring major capital expenditure before production can begin are evaluated annually to ensure that commercial quantities of reserves have been found or that additional exploration work is under way or planned in a timeframe reasonable for the Petrobras development cycle and with consideration to ANP timing requirements. Exploratory well costs not meeting either of these criteria are charged to expense. Costs of productive wells and development dry holes are capitalized and amortized on the unit-of-production method because it provides a more timely accounting of the success or failure of our exploration and production activities.

Impact of Oil and Gas Reserves on Depreciation and Depletion

The calculation of unit-of-production depreciation and depletion is a critical accounting estimate that measures the depreciation and depletion of upstream assets. It is the ratio of (i) actual volumes produced to (ii) total proved

developed reserves (those proved reserves recoverable through existing wells with existing equipment and operating methods) applied to (iii) asset cost. Proved undeveloped reserves are considered in the amortization of leasehold acquisition costs. The volumes produced and asset cost are known and while proved developed reserves have a high probability of recoverability they are based on estimates that are subject to some variability. This variability may result in net upward or downward revisions of proved reserves in existing fields, as more information becomes available through research and production. As a result of these revisions, we increased our proved reserves by 162.7 mmboe in 2008, 762.9 mmboe in 2007 and 425.5 mmboe in 2006.

Table of Contents

Impact of Oil and Gas Reserves and Prices on Testing for Impairment

At December 31, 2008, our property, plant, and equipment, net of accumulated depletion, amounted to U.S.\$85 billion. A substantial part of this amount consisted of oil and gas producing properties. These properties are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. We estimate the future and discounted cash flows of the affected properties to judge the recoverability of carrying amounts. In general, analyses are based on proved reserves, except in circumstances where it is probable that additional non-proved reserves will be developed and contribute to cash flows in the future; the percentage of probables that we include in cash flows does not exceed our past success ratios in developing probable reserves.

We perform asset valuation analyses on an ongoing basis as a part of our management program. These analyses monitor the performance of assets against corporate objectives. They also assist us in reviewing whether the carrying amounts of any of our assets may not be recoverable. In addition to estimating oil and gas reserve volumes in conducting these analyses, it is also necessary to estimate future oil and gas prices.

In general, we do not view temporarily low oil prices as a trigger event for conducting impairment tests. The markets for crude oil and natural gas have a history of significant price volatility. Although prices will occasionally drop precipitously, industry prices over the long term will continue to be driven by market supply and demand fundamentals. Accordingly, any impairment tests that we perform make use of our long-term price assumptions for the crude oil and natural gas markets. These are the same price assumptions that are used in our planning and budgeting processes and our capital investment decisions, and they are considered to be reasonable, conservative estimates given market indicators and past experience. Significantly lower future oil and gas prices could lead to impairments in the future, if such decreases were considered to be indicative of long-term trends. In addition, significant changes in production curve expectation, discount and/or required production and lifting costs, could affect impairment analysis.

While such uncertainties are inherent to this estimation process, the amount of impairment charges in past years has been small relative to the total value of oil and gas producing properties: U.S.\$519 million in 2008, U.S.\$271 million in 2007 and U.S.\$21 million in 2006. Based on our experience, we believe that future variability in estimates will have a small impact on both assets and expense.

Pension and Other Post-Retirement Benefits

The determination of the expense and liability relating to our pension and other post-retirement benefits involves the use of judgment in the determination of actuarial assumptions. These include estimates of future mortality, withdrawal, changes in compensation and discount rate to reflect the time value of money as well as the rate of return on plan assets. These assumptions are reviewed at least annually and may differ materially from actual results due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates or longer or shorter life spans of participants.

We account for our Employees' Post-Retirement Benefits and Other Benefits, according to FASB Statements No. 87, 88, 106, 132(R) and 158. These standards require that we recognize the over-funded or under-funded status of each of our defined benefit pension and other post-retirement benefit plans as an asset or liability and to reflect changes in the funded status through Accumulated other comprehensive income, as a separate component of stockholder's equity.

According to the requirements of SFAS 87, and subsequent interpretations, the discount rate should be based on present value for settling the pension obligation. The use of the precepts of SFAS 87 in Brazil, which has been subject to inflation from time to time, creates certain issues to the extent that the ability for a company to settle a pension

obligation at a future point in time may not exist because long-term financial instruments of suitable grade may not exist locally.

Although the Brazilian market has been demonstrating signs of stabilization as reflected in market interest rates, interest rates may be unstable.

Table of Contents

We adopt a mortality table relating to actuarial assumptions of our pension and healthcare plans in Brazil, which reflects changes with respect to the profile of employees, retirees and pensioners, based on longevity, age of invalidity and invalid mortality tables.

The progressive increase in longevity has direct impact on the plan's estimated and provisioned volume of commitments and obligations and in our liabilities under the line Employees' post-retirement benefits obligation Pension and our shareholders' equity under the line Post-retirement benefit reserves adjustments net of tax pension cost.

The change of the mortality table has been affecting the results for the years subsequent to 2004 due to increased expenses related to the interest costs and amortization of Post-retirement benefit reserves adjustments net of tax pension.

Post-retirement benefit reserves adjustments net of tax pension cost are values calculated as the difference between the forecasted restatement of the net value of the obligations according to the actuarial assumptions and the variations effectively occurring over time. These amounts are to be amortized and posted to the results of subsequent fiscal years over the average life expectancy of the pension plan's members. See Note 16 to our audited consolidated financial statements for the year ended December 31, 2008.

In 2008, we began to account for employee benefit expenses for non-active participants as part of operating expenses rather than non-operating expenses. This reclassification had no effect on our consolidated net income, other than disclosure of our consolidated statements of income.

Litigation, Tax Assessments and Other Contingencies

Claims for substantial amounts have been made against us arising in the normal course of business. We are sometimes held liable for spills and releases of oil products and chemicals from our operating assets. In accordance with the guidance provided by U.S. GAAP, we accrued for these costs when it is probable that a liability has been incurred and reasonable estimates of the liability can be made. At December 31, 2008, we had accrued U.S.\$379 million for litigation contingencies. Significant management judgment is required to

comply with this guidance and it includes management's discussion with our attorneys, taking into account all of the relevant facts and circumstances. We believe that payments required to settle the amounts related to these claims, in case of loss, will not vary significantly from our estimated costs, and thus will not have a material adverse effect on our operations or cash flows. In past periods, the difference between the actual payout and the amount of the provision liability, with respect to contingency estimation, has been insignificant, with no material income statement impact in the period of the payout. In the last five years, our annual cash payouts for contingencies relating to claims against us, the parent company, reached an average of U.S.\$104 million per year.

Asset Retirement Obligations and Environmental Remediation

Under various contracts, permits and regulations, we have material legal obligations to remove equipment and restore the land or seabed at the end of operations at production sites. Our most significant asset removal obligations involve removal and disposal of offshore oil and gas production facilities worldwide. We accrue the estimated discounted costs of dismantling and removing these facilities at the time of installation of the assets. We also estimate costs for future environmental clean-up and remediation activities based on current information on costs and expected plans for remediation. The aggregate amount of estimated costs on a discounted basis for asset retirement and environmental remediation provision at December 31, 2008 was U.S.\$2,825 million. Estimating asset retirement, removal and

environmental remediation costs requires performing complex calculations that necessarily involve significant judgment because our obligations are many years in the future, the contracts and regulation have vague descriptions of what removal and remediation practices and criteria will have to be met when the removal and remediation events actually occur and asset removal technologies and costs are constantly changing, along with political, environmental, safety and public relations considerations. Consequently, the timing and amounts of future cash flows are subject to significant uncertainty. However, given the significant amount of time to the ultimate retirement date, any modifications in

Table of Contents

technological specifications, legal requirement, or other matters, would not have a materially adverse effect on any one reporting period.

In 2008, we reviewed and revised our estimated costs associated with well abandonment and the demobilization of oil and gas production areas, considering new information about date of expected abandonment and revised cost estimates to abandon. The changes to estimated asset retirement obligation were principally related to declaration of new fields as economically viable, certain changes in revised cost estimates to abandon provided by non-operated joint-ventures. A summary of the annual changes in the abandonment provisions is presented in Note 9(a) to our audited consolidated financial statements, as of December 31, 2008.

Derivative Transactions

SFAS 133 requires that we recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value. Accounting for derivative transactions requires us to employ judgment to arrive at assumptions to compute fair market values, which are used as the basis for recognition of the derivative instruments in the financial statements. Such measurement may depend on the use of estimates such as estimated future prices, long-term interest rates and inflation indexes, and becomes increasingly complex when the instrument being valued does not have counterparts with similar characteristics traded in an active market.

In the course of our business we have entered into contracts that meet the definition of derivatives under SFAS 133, certain of which have not qualified to receive hedge accounting. For the majority of these contracts, the estimates involved in the calculations for the fair value of such derivative instruments have not been considered likely to have a material impact in our financial position had we used different estimates, due to the majority of our derivative instruments being traditional over the counter instruments with short term maturities.

Impact of New Accounting Standards

Brazilian GAAP Is in the Process of Adopting IFRS Principles

Enacted in 2007, Law No. 11,638/07 amended the Brazilian Corporate Law to permit Brazilian GAAP to converge with International Financial Reporting Standards, or IFRS, as issued by the International Accounting Standards Board, or IASB. The transition from Brazilian GAAP to IFRS is being made gradually as official accounting pronouncements are issued. Financial statements prepared in accordance with Brazilian GAAP for the fiscal year ended December 31, 2008 were impacted by the new pronouncements. As a result, the basis for calculating dividend and profit sharing distributions to our employees were also affected. Our financial statements prepared in accordance with U.S. GAAP were not affected by Law No. 11,638/07 other than dividends payable and profit sharing payable to our employees, which are based on net income as calculated under Brazilian GAAP.

In 2008, Provisional Measure No. 449/08 was enacted to create a transitional tax regime that will allow the changes to Brazilian GAAP brought by Law No. 11,638/07 to be tax neutral until further legislation regulating the tax effects of the new accounting principles becomes effective. The adoption of the transitional tax regime is optional for the fiscal years ended December 31, 2008 and 2009 and mandatory as from fiscal year ended December 31, 2010. The temporary tax effects caused by the adoption of this transitional tax regime are reported in our financial statements as deferred income taxes.

SFAS No. 157

Effective January 1, 2008, we adopted FASB Statement No. 157, Fair Value Measurements (SFAS 157), which was amended in February 2008 by FASB Staff Position (FSP) SFAS No. 157-1, Application of SFAS 157 to SFAS 13 and its Related Interpretive Accounting Pronouncements That Address Leasing Transactions, and by FSP SFAS 157-2, Effective Date of SFAS 157, which delayed our application of SFAS 157 for non-recurring non-financial assets and liabilities until January 1, 2009. SFAS 157 was further amended in October 2008 by FSP SFAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active, which clarifies the

Table of Contents

application of SFAS 157 to assets participating in inactive markets.

SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. It does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards.

The implementation of SFAS 157 did not have material impact on our consolidated financial statements other than additional disclosures that have been incorporated into Note 21 of our consolidated financial statements.

SFAS No. 159

In February 2007, the FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which permits the measurement of certain financial instruments at fair value. Entities may choose to measure eligible items at fair value at specified election dates, reporting unrealized gains and losses on such items in earnings at each subsequent reporting period. We adopted this Statement effective January 1, 2008, but did not make a fair value election at that time or during the remainder of 2008 for any financial instruments not already carried at fair value in accordance with other accounting standards. Accordingly, the adoption of SFAS 159 did not impact our consolidated financial statements.

SFAS No. 141-R

In December 2007, the FASB issued FASB Statement No. 141 (revised 2007), Business Combinations (SFAS 141-R), which will become effective for business combination transactions having an acquisition date on or after January 1, 2009. This standard requires the acquiring entity in a business combination to recognize the assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree at the acquisition date to be measured at their respective fair values. SFAS 141-R changes the accounting treatment for the following items: acquisition-related costs and restructuring costs to be generally expensed when incurred; in-process research and development to be recorded at fair value as an indefinite-lived intangible asset at the acquisition date; changes

in deferred tax asset valuation allowances and income tax uncertainties after the acquisition to be generally recognized in income tax expense; acquired contingent liabilities to be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies. SFAS 141-R also includes a substantial number of new disclosures requirements. The impact on the application of SFAS 141-R in the consolidated financial statements will depend on the business combinations arising during 2009 and thereafter.

SFAS No. 160

In December 2007, the FASB issued FASB Statement No. 160, Non-controlling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160), that establishes new accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 requires the recognition of a non-controlling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the non-controlling interest will be included in consolidated net income on the face of the income statement. Certain changes in a parent's ownership interest are to be accounted for as equity transactions and when a subsidiary is deconsolidated, any non-controlling equity investment in the former subsidiary is to be initially measured at fair value. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its non-controlling interest and is effective for fiscal

years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Our income statement and balance sheet disclosure will be changed by the application of SFAS 160, due to the reclassification of minority interest.

EITF No. 08-6

In November 2008, the FASB reached a consensus on Emerging Issues Task Force Issue No. 08-6, Equity Method Investment Accounting Considerations (EITF 08-6), which was issued to clarify how the application of equity method accounting will be affected by SFAS No. 141(R) and SFAS 160. EITF 08-6, among other

Table of Contents

requirements, determines that an equity method investor shall account for a share issuance by an investee as if the investor had sold a proportionate share of its investment. Any gain or loss to the investor resulting from an investee's share issuance shall be recognized in earnings. This issue went into effect on January 1, 2009, and will be applied prospectively.

FASB Staff Position (FSP) No. 132(R)-1

In December 2008, the FASB issued FASB Staff Position (FSP) No. 132(R)-1, *Employers' Disclosures About Post-Retirement Benefit Plan Assets* (FSP No. 132(R)-1), which amends SFAS 132(R) to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other post-retirement plan. This FSP requires disclosures about: (a) Investment Policies and Strategies; (b) Categories of Plan Assets; (c) Fair Value Measurements of Plan Assets; and (d) Significant Concentrations of Risk. This FSP is effective for annual statements beginning with 2009; our consolidated financial statements will be impacted only by additional disclosures.

FASB FSP SFAS 140-4 and FIN 46(R)-8

In December 2008, the FASB issued FSP SFAS 140-4 and FIN 46(R)-8, *Disclosures About Transfers of Financial Assets and Interest in Variable Interest Entities* (SFAS 140-4 and FIN 46(R)-8). This FSP requires additional disclosures about an entity's involvement with a variable interest entity (VIE) and certain transfers of financial assets to special-purpose entities and VIEs. This FSP requires the methodology for determining whether the company is the primary beneficiary of a VIE, whether it has provided financial or other support the company is not contractually required to provide, and other qualitative and quantitative information. We did not have any transfers of financial assets within the scope of this FSP. This FSP was effective December 31, 2008, and the additional disclosures related to VIEs have been incorporated into Note 14 of our consolidated financial statements.

FASB Statement No. 161

In March 2008, the FASB issued FASB Statement No. 161, *Disclosures about Derivative*

Instruments and Hedging Activities an amendment of FASB No. 133 (SFAS 161), which expands disclosure requirements of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133) and related interpretations. This statement requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. This statement is effective for interim and annual financial statements beginning with the first quarter of 2009. We adopted SFAS 161 early, and its implementation did not have material impact on our consolidated financial statements other than additional disclosures that have been incorporated into Note 20 of our consolidated financial statements.

Research and Development

We are deeply committed to research and development as a means to extend our reach to new production frontiers and achieve continuous improvement in operations. We have a history of successfully developing and implementing innovative technologies, including the means to drill, complete and produce wells in increasingly deep water. We are one of the largest investors in research and development among the world's major oil companies, and we spend a large percentage of revenues on research and development. In 2008, we spent U.S.\$941 million on research and development, equivalent to 0.8% of our net operating revenues. In 2007, we spent U.S.\$881 million on research and

development, equivalent to 1.0% of our net operating revenues. In 2006, we spent U.S.\$730 million on research and development, equivalent to 1.0% of our net operating revenues. Our bylaws require us to place at least 0.5% of our paid-in corporate capital in a reserve for research and development expenses.

Our research and development activities focus on three strategic areas: (i) offshore deepwater and ultra-deepwater exploration and production; (ii) refining and conversion of heavy crude; and (iii) biofuels. Among the breakthroughs we have achieved have been semi-submersible production platforms capable of operating in

Table of Contents

water depths of up to 3,000 meters (9,843 feet) and the H-Bio process to convert vegetable oils to biodiesel in existing refineries. In the three-year period ended December 31, 2008, our research and development operations were awarded 48 patents in Brazil and 148 overseas. Our portfolio of patents covers all of our areas of activities.

We have operated a dedicated research and development facility in Rio de Janeiro, Brazil since 1966. As of December 31, 2008, we had 2,036 employees working at this facility. We also conduct research and development through joint research projects with universities and other research centers in Brazil and abroad and participate in technology exchange and assistance partnerships with other oil and gas and oilfield services companies.

PifCo does not itself conduct research and development.

Trends

We plan to expand all segments of operations in our target markets. In support of this goal we plan total capital expenditures of U.S.\$174.4 billion over 2009-2013. Of this total, 59% is in the upstream segment, where constant investment in exploration and development is needed to exploit newly discovered resources and offset natural declines in production from existing fields as they mature. Based on our slate of development projects, we have set a target of increasing production by 8.8% annually over the period 2008 to 2013 while replacing our reserves through organic growth.

The price we realize for the oil we produce is determined by international oil prices, although we generally sell our oil at a discount to the Brent and West Texas Intermediate (WTI) benchmark prices because it is heavier and thus more expensive to refine. International oil prices reached record levels in 2008, driven largely by three factors:

(i) continuing increases in global demand for oil products, particularly for middle distillates; (ii) increasingly tight oil production and refining capacity, aggravated by growing expectations of continued supply-side constraints; and (iii) international geopolitical risks, including civil strife in Nigeria and worries over Iran's nuclear program, which magnified upward

pressures on prices. However, from mid-August until the end of 2008, there was a strong downward correction in oil prices, in part due to the recent global financial crisis. The International Energy Agency (IEA) projects that after full recovery from the global economic crisis, the global energy demand will continue to grow and that, in the absence of concomitant increases in supply-side investment or stronger policy action to curb demand growth in all countries the world would be faced with higher energy prices in the medium to long term.¹

During 2009 to 2013, we plan to increase our refining throughput and our capacity to refine heavier crudes. During 2008, downstream gross margins varied between -6 and 11 percent reflecting the fluctuation in international prices. Future refining margins will depend on capacity utilization in the global and Brazilian refining industries and the relative prices and volumes of light and heavy crudes that are produced and can be processed.

Our net-debt-to-equity ratio is targeted to remain in the range of 25-35% from 2009 and 2013, based on an estimated average exchange rate of R\$2.00 per U.S.\$1.00.

The dividends we pay to shareholders depend on our earnings and other factors. Under Brazilian law, shareholders are entitled to a mandatory dividend of 25% of annual adjusted net income.

Item 6. Directors, Senior Management and Employees

Directors and Senior Management

Directors of Petrobras

Our board of directors is composed of a minimum of five and a maximum of nine members and is responsible for, among other things, establishing our general business policies. The members of the board of directors are elected at the annual general meeting of shareholders.

Under Brazilian Corporate Law, shareholders representing at least 10% of the company's voting capital have the right to demand that a cumulative voting procedure be adopted to entitle each common share to as

¹ Source: IEA World Energy Outlook 2008

Table of Contents

many votes as there are board members and to give each common share the right to vote cumulatively for only one candidate or to distribute its votes among several candidates.

Furthermore, our bylaws enable (i) minority preferred shareholders that together hold at least 10% of the total capital stock (excluding the controlling shareholders) to elect and remove one member to our board of directors; and (ii) minority common shareholders to elect one member to our board of directors, if a greater number of directors is not elected by such minority shareholders by means of the cumulative voting procedure. Our bylaws provide that, regardless of the rights above granted to minority shareholders, the Brazilian federal government always has the right to elect the majority of our

directors, independently of their number. In addition, under Law 10,683, dated May 28, 2003, one of the board members elected by the Brazilian federal government must be indicated by the Minister of Planning, Budget and Management. The maximum term for a director is one year, but re-election is permitted. In accordance with the Brazilian Corporate Law, the shareholders may remove any director from office at any time with or without cause at an extraordinary meeting of shareholders. Following an election of board members under the cumulative vote procedure, the removal of any board member by an extraordinary meeting of shareholders will result in the removal of all the other members, after which new elections must be held.

Table of Contents

We currently have nine directors. The following table sets forth certain information with respect to these directors:

Name	Date of Birth	Position	Current Term Expires	Business Address
Dilma Vana Rousseff(1)	Dec. 14, 1947	Chair	April 2010	Casa Civil Praça dos Três Poderes Palácio do Planalto 4º andar sala 57 Brasília DF Cep 70.150-900
Silas Rondeau Cavalcante Silva(1)	Dec. 15, 1952	Director	April 2010	S.A.U.S. Quadra 3 Lote 2 Bloco C Ed. Business Point Salas 308/9 Brasília -DF Cep 70.070-934

Jorge Gerdau Johannpeter(3)	Dec. 8, 1936	Director	April 2010	Av. Farrapos, 1.811 Porto Alegre RS Cep 90.220-005
Luciano Galvão Coutinho(1)	Sep. 29, 1946	Director	April 2010	Av. República do Chile, no. 100 19º andar Rio de Janeiro RJ Cep 20.031-917
Sergio Franklin Quintella(1)	Feb. 21, 1935	Director	April 2010	Praia de Botafogo, 190 12º andar Rio de Janeiro RJ Cep 22.450-900

- (1) Appointed by the controlling shareholder.
- (2) Appointed by the minority common shareholders.
- (3) Appointed by the minority preferred shareholders.

Dilma Vana Rousseff Ms. Rousseff has been the Chair of the board of directors of Petrobras and Petrobras Distribuidora S.A. BR since January 3, 2003. She has been the Chief State Minister of the Civil Cabinet of the Presidency of the Republic of Brazil since June 14, 2005. She was Brazil's Minister of Mines and Energy from January 2003 to June 2005. Ms. Rousseff has a bachelor's degree in economics from the Universidade Federal do Rio Grande do Sul (1977), a master's degree in economic theory from the Universidade de Campinas (Unicamp) (1979) and is currently pursuing a doctorate degree in monetary and financial economics at Unicamp.

Silas Rondeau Cavalcante Silva Mr. Silva has been a member of our board of directors since April 3, 2006, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. Mr. Silva was the Minister of Mines and Energy from July 2005 to May 2007 and president of Centrais Elétricas Brasileiras Eletrobrás from May 2004 to September 2005. He is currently a consultant in electrical engineering for RV2 Consultoria e Assessoria, where he carries out special projects in the electrical sector. Mr. Silva has a degree in electrical engineering from the Universidade Federal de Pernambuco and a specialized degree in transmission lines

Table of Contents

engineering from the Universidade Federal do Rio de Janeiro.

Guido Mantega Mr. Mantega has been a member of our board of directors since April 3, 2006, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Remuneration and Succession Committee of our board of directors since October 15, 2007. Mr. Mantega has been Brazil's Minister of Finance since March 28, 2006, and he served as chairperson of the Group of 20 Finance Ministers and Central Bank Governors (G-20) in 2008. He is a member of the Conselho de Desenvolvimento Econômico e Social CDES (Economic and Social Development Council), an advisory body to the Brazilian government. Mr. Mantega has also held the post of president of the Banco Nacional de Desenvolvimento Econômico e Social BNDES (Brazilian Development Bank) and of Minister of Planning. He received a bachelor's degree in economics from the Escola de Economia, Administração e Contabilidade FEA (School of Economy, Administration and Accounting) at the Universidade de São Paulo (USP) in 1971, and a Ph.D. in development sociology from the Faculdade de Filosofia, Letras e Ciências Humanas FFLCH (School of Philosophy, Literature and Human Sciences) at USP, and completed specialized studies at the Institute of Development Studies IDS at the University of Sussex, England in 1977.

J.S. Gabrielli de Azevedo Mr. Gabrielli has been a member of our board of directors since July 22, 2005, and is also a member of the board of directors of Petrobras Distribuidora, Petrobras Biocombustível, Transpetro, Gaspetro and Petroquisa. He was our Chief Financial Officer from January 2003 to July 2005, and he has been our Chief Executive Officer since July 22, 2005. Mr. Gabrielli holds a Ph.D. in economics from Boston University (1987). He is a full professor of economics on leave from the Universidade Federal da Bahia (UFBA).

Francisco Roberto de Albuquerque Mr. de Albuquerque has been a member of our board of directors since April 2, 2007, and he is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Audit Committee and the Remuneration and Succession Committee of our board of directors since April 13, 2007, and October 15, 2007,

respectively. He earned a bachelor's degree in military sciences from the Academia Militar das Agulhas Negras (AMAN) in Resende, Rio de Janeiro (1958) and in economics from the Universidade de São Paulo (1968), a master's degree in military sciences from the Escola de Aperfeiçoamento de Oficiais (1969), and a Ph.D. in military sciences from the Escola de Comando e Estado-Maior do Exército in Rio de Janeiro (1977).

Fabio Colletti Barbosa Mr. Barbosa has been a member of our board of directors since January 3, 2003, and is also a director of Petrobras Distribuidora S.A. BR. He has been the President of the Audit Committee of our board of directors since June 17, 2005. He has been the Chief Executive Officer of Grupo Santander Brasil since August 2008. Mr. Barbosa is also the Chairman of the board of directors and of the executive board of the Federação Brasileira de Bancos FEBRABAN (Brazilian Federation of Banks). Mr. Barbosa has a bachelor's degree in management from the Fundação Getúlio Vargas - São Paulo (1976) and an MBA from the Institute for Management and Development in Lausanne, Switzerland (1979).

Jorge Gerdau Johannpeter Mr. Johannpeter has been a member of our board of directors since October 19, 2001, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Remuneration and Succession Committee of our board of directors since October 15, 2007. Mr. Johannpeter is the President of the board of directors of Grupo Gerdau (Gerdau Group), and is a member of the board of directors of the Instituto Brasileiro de Siderurgia IBS (Brazilian Steel Institute). He also participates in the Conselho de Desenvolvimento Econômico e Social CDES (Economic and Social Development Council) and in the World Steel Association, where he is a member of the executive committee. Mr. Johannpeter is involved in Brazil's non-profit sector as president of the board of the Programa Gaúcho da Qualidade e Produtividade PGQP (State Program for Quality and Productivity in Rio Grande do Sul), leader of the Movimento Brasil Competitivo MBC (Movement for

Brazilian Competitiveness), member of the deliberative council of Parceiros Voluntários (Volunteer Partners) and coordinator of Ação Empresarial (Business Action). Mr. Johannpeter received a bachelor's degree in law and social sciences from the Universidade

Table of Contents

Federal do Rio Grande do Sul (UFRGS), Porto Alegre, in 1961.

Luciano Coutinho Mr. Coutinho has been a member of our board of directors since April 4, 2008, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been the President of the Banco Nacional de Desenvolvimento Econômico e Social BNDES (Brazilian Development Bank) since April 27, 2007. In addition, Mr. Coutinho is a member of the board of directors of Companhia Vale do Rio Doce, a member of the Curator Committee for the Fundação Nacional da Qualidade FNQ (Brazilian Quality Foundation), and the BNDES representative at the Fundo Nacional de Desenvolvimento Científico e Tecnológico FNDCT (Brazilian Fund for Scientific and Technological Development). Mr. Coutinho has a Ph.D. in economics from Cornell University, a master's degree in economics from the Institute of Economic Research at the Universidade de São Paulo (USP), and a bachelor's degree in economics from USP.

Sergio Franklin Quintella Mr. Quintella has been a member of our board of directors since April 8, 2009, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He is vice president of Fundação Getúlio Vargas FGV. He was member of the board of

directors of the Banco Nacional de Desenvolvimento Econômico e Social BNDES (Brazilian Development Bank) from 1975 to 1980, member of the Conselho Monetário Nacional (National Monetary Council) from 1985 to 1990, and president of the Tribunal de Contas (Court of Auditors) of the State of Rio de Janeiro from 1993 to 2005.

Mr. Quintella holds a degree in civil engineering from the Pontifícia Universidade Católica do Rio de Janeiro PUC-Rio, in economic engineering from the Escola Nacional de Engenharia and in economics from the Faculdade de Economia do Rio de Janeiro. He also holds a master's degree in business from IPSOA in Italy and graduated from the Advanced Management Program at Harvard Business School. Mr Quintella is currently a member of the council of PUC-Rio.

Directors of PifCo

PifCo is managed by a board of directors, consisting of three members, and by its executive officers. The board of directors is responsible for preparing PifCo's year-end accounts, convening shareholders' meetings and reviewing and monitoring its financial performance and strategy. Although not required by PifCo's memorandum and articles of association, it is PifCo's policy that the Chairman and all of its executive officers be Petrobras employees.

PifCo's directors serve indefinite terms and can be removed with or without cause. The following table sets forth certain information about PifCo's board of directors:

Name	Date of Birth	Position	Year of Appointment
Daniel Lima de Oliveira	December 29, 1951	Chairman	2005
Marcos Antonio Silva Menezes	March 24, 1952	Director	2003
José Raimundo Brandão Pereira	October 27, 1956	Director	2008

Daniel Lima de Oliveira Mr. Lima de Oliveira has been PifCo's Chairman and Chief Executive Officer and Petrobras Executive Manager of Corporate Finance since September 1, 2005. Since January 2002, Mr. Lima has been a director of Petrobras International Braspetro BV (PIB BV) and Braspetro Oil Services Company Brasoil and since March 2004, he has been a member of the board of directors of REFAP S.A. Mr. Lima de Oliveira graduated in mechanical engineering from São José dos Campos's Industrial Engineering School in 1975.

Marcos Antonio Silva Menezes Mr. Menezes has been a PifCo director since

2003, and Petrobras Executive Manager of Accounting since 1998. Mr. Menezes currently serves as a member of the Fiscal Council and of the Audit Committee of Braskem S.A., and he has been the Chairman of the Fiscal Council of the Instituto Brasileiro de Petróleo e Gás IBP (Brazilian Institute of Petroleum and Gas), and the Organização Nacional das Indústrias de Petróleo ONIP (National Organization of the Petroleum Industry) since 1998 and 1999, respectively. Mr. Menezes holds bachelor's degrees in accounting and business management from the Faculdade Moraes Júnior in Rio de Janeiro, a post-graduate degree in financial management from the Fundação Getúlio Vargas, and has

Table of Contents

completed an advanced management program (PGA) at the Fundação Dom Cabral/INSEAD France.

José Raimundo Brandão Pereira Mr. Pereira has been a PifCo director, and has served as PifCo's Executive Manager of Marketing and Trading since June 2008. Mr. Pereira graduated in civil engineering from the Universidade Estadual de Maranhão in 1979.

Executive Officers of Petrobras

Our board of executive officers, composed of one Chief Executive Officer and up to six executive officers, is responsible for our day-to-day management. Under our bylaws, the

board of directors elects the executive officers, including the Chief Executive Officer. The Chief Executive Officer is chosen from among the members of the board of directors. All of the executive officers are Brazilian nationals and reside in Brazil. According to our bylaws, in electing executive officers our board of directors must consider their personal qualification, knowledge and specialization in their respective areas. The maximum term for executive officers is three years, but re-election is permitted. The board of directors may remove any executive officer from office at any time with or without cause. Six of the current executive officers are experienced Petrobras career managers, engineers or technicians.

The following table sets forth certain information with respect to our executive officers:

Name	Date of Birth	Position	Current Term
J.S. Gabrielli de Azevedo	October 3, 1949	Chief Executive Officer	April 2011
Almir Guilherme Barbassa	May 19, 1947	Chief Financial Officer and Chief Investor Relations Officer	April 2011
Renato de Souza Duque	September 29, 1955	Chief Services Officer	April 2011
Guilherme de Oliveira Estrella	April 18, 1942	Chief Exploration and Production Officer	April 2011
Paulo Roberto Costa	January 1, 1954	Chief Downstream Officer	April 2011
María das Graças Silva Foster	August 26, 1953	Chief Gas and Energy Officer	April 2011
Jorge Luiz Zelada	January 20, 1957	Chief International Officer	April 2011

J. S. Gabrielli de Azevedo Mr. Gabrielli has been our Chief Executive Officer and a member of our board of directors since July 22, 2005. For biographical information regarding Mr. Gabrielli, see Directors of Petrobras.

Almir Guilherme Barbassa Mr. Barbassa has been our Chief Financial Officer and Chief Investor Relations Officer since July 22, 2005. Mr. Barbassa joined Petrobras in 1974 and has worked in several financial and planning capacities, both in Brazil and abroad. Mr. Barbassa has served as Petrobras' corporate finance and treasury manager, and he has also served at various times as financial manager and chairman of Petrobras subsidiaries that carry out international financial activities. In addition, he was an economics professor at Petrópolis Catholic University and Faculdades Integradas Bennett from 1973 to 1979. Mr. Barbassa holds a master's degree in economics from the Fundação Getúlio Vargas.

Renato de Souza Duque Mr. Duque has been our Chief Services Officer since January 31, 2003. Currently, Mr. Duque is a member of the board of directors of Petrobras Gás S.A.

Gaspetro and Chief Executive Officer of Petrobras Negócios Eletrônicos S.A. Mr. Duque holds a degree in electrical engineering from the Universidade Federal Fluminense and an MBA from the Universidade Federal do Rio de Janeiro (UFRJ).

Guilherme de Oliveira Estrella Mr. Guilherme Estrella has been our Chief Exploration and Production Officer since 2003. He has been Chairman of the board of the Instituto Brasileiro de Petróleo, Gás e Biocombustíveis (Brazilian Petroleum, Gas and Biofuels Institute) since 2003. Mr. Estrella graduated in 1964 from the School of Geology of the Universidade Federal do Rio de Janeiro.

Paulo Roberto Costa Mr. Paulo Roberto has been our Chief Downstream Officer since May 14, 2004. Mr. Paulo Roberto graduated in mechanical engineering from the Universidade Federal do Paraná in 1976. Mr. Costa joined Petrobras in 1977 and worked for a long period in our Exploration and Production activities.

Maria das Graças Silva Foster Ms. Maria das Graças Silva Foster has been our Chief Gas and

Table of Contents

Energy Officer since September 21, 2007. She holds a degree in chemical engineering from the Universidade Federal Fluminense, a master's degree in nuclear engineering from the Universidade Federal do Rio de Janeiro and an MBA in economics from the Fundação Getúlio Vargas.

Jorge Luiz Zelada Mr. Zelada has been our Chief International Officer since March 3, 2008. Mr. Zelada received a degree in electrical engineering from the Universidade Federal do Rio

de Janeiro in 1979 and an MBA from IBMEC/Rio de Janeiro in 2000.

Executive Officers of PifCo

All of the current executive officers are experienced managers from Petrobras, some of whom have served on the boards of directors of Petrobras subsidiaries and in representative offices abroad. The executive officers work as a board and are responsible for PifCo's day-to-day management. PifCo's executive officers serve indefinite terms and can be removed with or without cause.

The following table sets forth certain information about PifCo's executive officers:

Name	Date of Birth	Position	Year of Appointment
Daniel Lima de Oliveira	December 29, 1951	Chief Executive Officer	2005
Guilherme Pontes Galvão França	January 18, 1959	Chief Commercial Officer	2005
Sérvio Túlio da Rosa Tinoco	June 21, 1955	Chief Financial Officer	2005
Mariângela Monteiro Tizatto	August 9, 1960	Chief Accounting Officer	1998
Nilton Antônio de Almeida Maia	June 21, 1957	Chief Legal Officer	2000
Gérson Luiz Gonçalves	September 29, 1953	Chief Audit Officer	2000
Juarez Vaz Wasserten	August 26, 1954	Chief Businesses Officer	2009

Daniel Lima de Oliveira Mr. Lima de Oliveira has been PifCo's Chairman and Chief Executive Officer and Petrobras Executive Manager of Corporate Finance since September 1, 2005. For biographical information regarding Mr. Lima de Oliveira, see Directors of PifCo.

Guilherme Pontes Galvão França Mr. França has served as PifCo's Chief Commercial Officer since October 1, 2005. Mr. França graduated in chemical engineering from the Universidade Federal do Rio de Janeiro in 1981.

Sérvio Túlio da Rosa Tinoco Mr. Tinoco has been PifCo's Chief Financial Officer since September 1, 2005. Mr. Tinoco holds a bachelor's degree in economics from Universidade Oswaldo Cruz, São Paulo (1978), and had an MBA from the Fundação Getúlio Vargas, São Paulo (1983) partially completed with one year at the Institut Supérieur des

Affaires ISA/HEC, France.

Mariângela Monteiro Tizatto Ms. Tizatto has served as PifCo's Chief Accounting Officer since 1998, and has been Petrobras Executive Manager of Corporate Accounting since 1999. Ms. Tizatto has a bachelor's degree in accounting from Universidade Cândido Mendes and an executive MBA from the Universidade Federal do Rio de Janeiro. She has been a member of the Fiscal Council of Petrobras Distribuidora S.A. BR since 2006, and she has been a member of the Auditing

and Accounting Rules Commission of the Associação Brasileira das Companhias Abertas ABRASCA (Brazilian Association of Public Companies) since 1995.

Nilton Antônio de Almeida Maia Mr. Maia has served as PifCo's Chief Legal Officer since April 19, 2000. Mr. Maia also currently serves as General Counsel for Petrobras. He has completed post-graduate degrees in law, with specializations in energy and tax law, from the Universidade Cândido Mendes and the Universidade Estácio de Sá.

Gerson Luiz Gonçalves Mr. Gonçalves has served as PifCo's Chief Audit Officer since April 19, 2000. He is responsible for all of Petrobras' internal accounting control activities. Mr. Gonçalves is a member of the Brazilian Institute of Internal Auditors (AUDIBRA) and of the United States Institute of Internal Auditors (IIA). He received a bachelor's degree in accounting from the Universidade de São Paulo in 1975.

Juarez Vaz Wasserten Mr. Wasserten has been PifCo's Businesses Officer since January 2009. Mr. Wasserten holds a bachelor's degree in production engineering from Universidade Federal do Rio de Janeiro and a master's degree in economics from Universidade Candido Mendes.

Table of Contents

Compensation

Petrobras

For 2008, the aggregate amount of compensation we paid to all members of the board of directors and executive officers was approximately U.S.\$5 million.

In addition, the members of the board and the executive officers receive certain additional benefits generally provided to our employees and their families, such as medical assistance, payment of educational expenses and supplementary social security benefits.

We have no service contracts with our directors providing for benefits upon termination of employment. We have a remuneration and succession committee in the form of an advisory committee. See Other Advisory Committees.

PifCo

PifCo's directors and executive officers are paid by Petrobras in respect of their function as Petrobras employees, but they do not receive any additional compensation, pension or other benefits from PifCo or Petrobras in respect of their functions as PifCo directors or executive officers, as the case may be.

Share Ownership

Petrobras

As of April 30, 2009, the members of our board of directors, our executive officers, the members of our Fiscal Council, and close members of their families, as a group, beneficially held a total of 19,787 common shares and 54,416 preferred shares of our company. Accordingly, on an individual basis, and as a group, our directors, executive officers, Fiscal Council members, and close members of their families beneficially owned less than one percent of any class of our shares. The shares held by our directors, executive officers, Fiscal Council members, and close

members of their families have the same voting rights as the shares of the same type and class that are held by our other shareholders. None of our directors, executive officers, Fiscal Council members, or close members of their families holds any options to purchase common shares or preferred shares. Petrobras does not have a stock option plan for its directors, officers or employees.

PifCo

As of December 31, 2008, PifCo's share capital was composed of 300,050,000 shares at par value of U.S.\$1.00 per share. All of PifCo's issued and outstanding shares of common stock are owned by us.

Fiscal Council

We have established a permanent Fiscal Council (*Conselho Fiscal*) in accordance with applicable provisions of the Brazilian Corporate Law, composed of up to five members. As required by the Brazilian Corporate Law our Fiscal Council is independent of our management and external auditors. The Fiscal Council's responsibilities include, among others: (i) monitoring management's activities and (ii) reviewing our annual report and financial statements. The members and their respective alternates are elected by the shareholders at the annual general shareholder's meeting.

Holders of preferred shares without voting rights and minority common shareholders are each entitled, as a class, to elect one member and his respective alternate to the Fiscal Council. The Brazilian government has the right to appoint the majority of the members of the Fiscal Council and their alternates. One of these members and his respective alternate are appointed by the Minister of Finance representing the Brazilian Treasury. The members of the Fiscal Council are elected at our annual general shareholders meeting for a one-year term and re-election is permitted.

The following table lists the current members of the Fiscal Council:

Name	Year of First Appointment
Marcus Pereira Aucélio	2005
César Acosta Rech	2008
Túlio Luiz Zamin	2003
Nelson Rocha Augusto	2003
Maria Lúcia de Oliveira Falcón	2003

Table of Contents

The following table lists the alternate members of the Fiscal Council:

Name	Year of First Appointment
Eduardo Coutinho Guerra	2005
Ricardo de Paula Monteiro	2008
Edson Freitas de Oliveira	2002
Maria Auxiliadora Alves da Silva	2003
Celso Barreto Neto	2002

Petrobras Audit Committee

We have an Audit Committee that advises our board of directors, composed exclusively of members of our board of directors.

On June 17, 2005, our board of directors approved the appointment of our Audit Committee to satisfy the audit committee requirements of the Sarbanes-Oxley Act of 2002 and Rule 10A-3 under the Securities Exchange Act of 1934.

The Audit Committee is responsible for, among other things:

making recommendations to our board of directors with respect to the appointment, compensation and retention of our independent auditor;

assisting our board of directors with analysis of our financial statements and the effectiveness of our internal controls over financial reporting in consultation with internal and independent auditors;

assisting in the resolution of conflicts between management and the independent auditor with respect to our financial statements;

conducting an annual review of related party transactions involving interested members of our board of directors and executive officers and companies that employ any of these people, as well any other material transactions with related parties; and

establishing procedures for the receipt, retention and treatment of complaints regarding accounting, internal control and auditing matters, including procedures for the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

On December 16, 2005, our Audit Committee's charter was amended to meet the audit committee requirements of the Sarbanes-Oxley Act of 2002 and Rule 10A-3 under the Securities Exchange Act of 1934, including the incorporation of the powers mentioned above.

Our Audit Committee is typically composed of three members. The current members of our Audit Committee are Directors Fabio Colletti Barbosa and Francisco Roberto de Albuquerque, both of whom are independent as defined in 17 CFR 240.10A-3. The third member of our Audit Committee will be appointed in 2009.

Other Advisory Committees

We implemented two additional advisory committees in 2007: the *Comitê de Remuneração e Sucessão* (Remuneration and Succession Committee) and the *Comitê de Meio Ambiente* (Environmental Committee). Also in 2007, we formalized a relationship between the *Comissão de Governança Corporativa* (Corporate Governance Commission) and a *Comitê de Gestão da Petrobras* (Management Committee), in order to study and refine our corporate governance practices.

Petrobras Ombudsman

Created in May 2002 to advise the President's office, the Petrobras General Ombudsman's Office has been an official part of our corporate structure since October 2005, when it became directly linked to the board of directors. The General Ombudsman's Office is the official channel for receiving and responding to denunciations and information regarding possible irregularities in accounting, internal controls and auditing. The General Ombudsman's Office reports directly to the Audit Committee and guarantees the anonymity of informants. In December 2007, the board of directors approved the Policies and Directives of the Petrobras Ombudsmen, which was an important step in aligning the General Ombudsman's practices with those of the other

Table of Contents

ombudsmen in the system, contributing to better corporate governance.

PifCo Advisory Committees

PifCo does not have any committees of its board of directors.

Employees and Labor Relations

We attract and retain valuable employees by offering competitive compensation and benefits, merit-based promotions and a profit-sharing plan. In accordance with Brazilian law, total profit-sharing payments to employees are limited to 25% of the amount of proposed dividends for the year.

We increased our employee numbers in 2008 due to the growth of our business.

The table below shows our employee numbers for the last three years:

	As of December 31,		
	2008	2007	2006
Petrobras employees:			
Parent company	55,199	50,207	47,955
Subsidiaries	12,266	11,941	7,454
Abroad	6,775	6,783	6,857
Total Petrobras Group	74,240	68,931	62,266
Parent company by level:			
High school	35,490	33,114	32,265
College	18,868	16,234	14,809
Maritime employees	841	859	881
Total parent company	55,199	50,207	47,955
Parent company by region:			
Southeastern Brazil	38,188	34,910	33,057
Northeastern Brazil	13,641	12,243	11,978
Other locations	3,370	3,054	2,920
Total parent company	55,199	50,207	47,955

The table below sets forth the main expenses related to our employees for the last three years:

	2008	2007 (U.S.\$ million)	2006
Salaries	4,957.8	3,625.7	2,736.5
Employee training	232.5	198.4	151.1
Profit sharing distributions	732.2	519.7	550.3

We have had no major labor stoppages since 1995, and we consider our relations with our employees and the unions that represent our employees to be good. Forty-six percent of our employees are members of the Oil Workers National Union, and 34% of our maritime employees belong to the Maritime Employees Union. We negotiate collective bargaining agreements annually with each union. Under the agreement in effect until August 31, 2009 with the Oil Workers National Union, employees received a 6.17% cost of living increase, which reflects an increase in inflation in that period, as measured by the *Índice Nacional de Preços ao Consumidor Amplo*, a 9.89% increase in the minimum pay scale, and a one-time payment of 100% of monthly salary - an agreement comparable to those in prior years. The collective bargaining agreement with the

Maritime Employees Union was signed on November 18, 2008. This agreement is retroactive to November 1, 2008, and is valid until October 31, 2009.

Pension and Health Care Plan

We sponsor a contributory defined benefit pension plan known as Petros, which covers 96.5% of our employees. The principal objective of Petros has been to supplement the social security pension benefits of our employees. Employees that participate in the plan make mandatory monthly contributions. Our historical funding policy has been to make annual contributions to the plan in the amount determined by actuarial appraisals. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

Table of Contents

The table below shows the benefits paid, contributions made, and outstanding Petros liabilities for 2008, 2007 and 2006:

	2008	2007 (U.S.\$ million)	2006
Total benefits paid	932	835	713
Total contributions	286	282	187
Petros liabilities(1)	2,054	5,042	4,843

- (1) The excess of the actuarial value of our obligation to provide future benefits over the fair value of the plan assets used to satisfy that obligation. The decrease in these liabilities in 2008 was primarily due to the change of discount rate from 6% p.a. in 2007 to 7.17% p.a. in 2008. See Note 16(f) to our audited consolidated financial statements for the year ended December 31, 2008.

On August 9, 2002, the Petros Plan stopped admitting new participants and since 2003 we have been engaged in complex negotiations with representatives of the Oil Worker's National Union to address the deficits of the plan and develop a supplementary pension plan. We have also been subject to material legal proceeding in connection with the Petros Plan. In August 2007, we approved new regulations for the Petros Plan and entered into an agreement with the Oil Worker's National Union and other parties involved which will extinguish the existing lawsuits in connection with the Petros Plan. The main changes introduced to the Petros Plan include: (i) salary increases of active employees will no longer be passed to retired employees, (ii) the benefits of participants of the plan will be adjusted according to the IPCA inflation index, and (iii) decreases in pensions provided by the government plan will not be supplemented by the Petros Plan. We agreed to pay R\$5.8 billion updated retroactively to December 31, 2006 by the consumer price index (IPCA) plus 6% per year, which will be paid in semi-annual installments with interest of 6% per year on the balance for the next 20 years, as previously agreed during the renegotiation.

On July 1, 2007, we implemented the Petros Plan 2, a variable contribution or mixed pension plan, for employees with no supplementary pension plan. A portion of this plan with defined benefits characteristics includes risk coverage for disability and death, a guaranty of a minimum benefit and a lifetime income, and the related actuarial commitments are recorded according to the projected credit unit method. The portion of the plan with defined contribution characteristics, earmarked for forming a reserve for programmed retirement, is recognized in the results for the year as the contributions are made. In 2008, the contribution of Petrobras and its subsidiaries to the defined contribution portion of this plan was U.S.\$267 million. The expenses and benefit

obligations related to Petros Plan 2 were recorded according to FASB Statement No. 87, Employers' Accounting for Pensions.

We maintain a health care benefit plan (AMS), which offers health benefits and covers all employees (active and inactive) together with their dependents. We manage the plan, with the employees contributing fixed amounts to cover principal risks and a portion of the costs relating to other types of coverage in accordance with participation tables defined by certain parameters, including salary levels.

Our commitment related to future benefits to plan participants is calculated on an annual basis by an independent actuary, based on the Projected Unit Credit method. The health care plan is not funded or otherwise collateralized by assets. Instead, we make benefit payments based on annual costs incurred by plan participants.

On December 15, 2006, we implemented the Medicine Benefit, which provides special terms on the acquisition of certain medications by members of the AMS from participating drugstores, located throughout Brazil. See Item 5.

Operating and Financial Review and Prospects Critical Accounting Policies and Estimates Pension and Other Post-Retirement Benefits.

In addition, some of our consolidated subsidiaries have their own benefit plans.

PifCo

With the exception of 40 employees of Petrobras Europe Limited, or PEL, and 24 employees of Petrobras Singapore Private Limited, or PSPL, PifCo's personnel consist solely of our employees, and PifCo relies on us to provide all administrative functions.

Table of Contents**Item 7. Major Shareholders and Related Party Transactions****Major Shareholders***Petrobras*

Our capital stock is composed of common shares and preferred shares, all without par value. On April 30, 2009, there were 5,073,347,344 outstanding common shares and 3,700,729,396 outstanding preferred shares. These totals reflect the two-for-one split of our common and preferred shares, which became effective in Brazil as of April 30, 2009.

On May 11, 2007, our shareholders approved a four-for-two reverse capital stock split. As a result of the stock split, the ratio of

our common and preferred shares to ADRs changed to two shares to one ADR. The stock split and change of ADR ratio became effective as of July 2, 2007.

Under the Brazilian Corporate Law, as amended, the number of non-voting shares of our company may not exceed two-thirds of the total number of shares. The Brazilian government is required by law to own at least a majority of our voting stock and currently owns 55.7% of our common shares, which are our only voting shares. The Brazilian government does not have any special voting rights, other than the right to always elect a majority of our directors, irrespective of the rights our minority shareholders may have to elect directors, set forth in our bylaws.

The following table sets forth information concerning the ownership of our common shares and preferred shares as of April 30, 2009, by the Brazilian government, certain public sector entities and our officers and directors as a group. We are not aware of any other shareholder owning more than 5% of our common shares.

Shareholder	Common Shares	%	Preferred Shares	%	Total Shares	%
Brazilian government	2,826,516,456	55.7			2,826,516,456	32.2
BNDES Participações S.A. BNDESPar	94,492,328	1.9	574,047,334	15.5	668,539,662	7.6
Other Brazilian public sector entities	3,460,280	0.1	1,515,416	0.04	4,975,696	0.1
All directors and executive officers as a Group (15 persons)	19,787		54,416		74,203	
Others	2,148,858,493	42.3	3,125,112,230	84.5	5,273,970,723	60.1
Total	5,073,347,344	100.0	3,700,729,396	100.0	8,774,076,740	100.0

As of April 30, 2009, approximately 34.74% of our preferred shares and approximately 27.12% of our common shares were held of record in the United States directly or in the form of American Depositary Shares. As of April 30, 2009, we had approximately 642,752,920 record holders of preferred shares, or American Depositary Shares representing preferred shares, and approximately 688,049,314 record holders of common shares, or American Depositary Shares representing common shares, in the United States. The ratio of our common and preferred share ADRs is two shares to one ADR. This ratio was changed by the reverse stock split effective July 2, 2007.

PifCo

As of December 31, 2008, PifCo's capital stock was composed of 300,050,000 shares at par value of U.S.\$1.00 per share. All of PifCo's issued and outstanding shares are owned by us.

Petrobras Related Party Transactions

Board of Directors

Direct transactions with interested members of our board of directors or our executive officers require the approval of our board of directors, and must follow the conditions of an arms-length transaction and market practices guiding transactions with third parties. None of the members of our board of directors, our executive officers or close members of their families has had any direct interest in any transaction we effected which is or was unusual in its nature or conditions or material to our business during the current or the three immediately preceding financial years or during any earlier financial year, which transaction remains in any way outstanding or unperformed. In addition, we have not entered into any transaction with related parties which is or was unusual in its nature or conditions during the current or the three

Table of Contents

immediately preceding financial years, nor is any such transaction proposed, that is or would be material to our business.

We have no outstanding loans or guarantees to the members of our board of directors, our executive officers or any close member of their families.

For a description of the shares beneficially held by the members of our board of directors and close members of their families, see Item 6. Directors, Senior Management and Employees Share Ownership.

Brazilian Government and Petros

We engage in numerous transactions in the ordinary course of business with our controlling shareholder, the Brazilian government, and with other companies controlled by it, including financings from BNDES and banking, asset management and other transactions with Banco do Brasil S.A. The above-mentioned transactions with Banco do Brasil had a negative net balance of U.S.\$1,543 million as of December 31, 2008. See Note 23 to our audited consolidated financial statements as of December 31, 2008.

As of December 31, 2008, we had a receivable (the Petroleum and Alcohol Account) from the Brazilian government, our controlling shareholder, of U.S.\$346 million secured by a U.S.\$53 million blocked deposit account. See Note 23 to our audited consolidated financial statements as of December 31, 2008.

We also have restricted deposits made by us, which serve as collateral for legal proceedings involving the Brazilian government. As of December 31, 2008, these deposits amounted to U.S.\$677 million. See Note 23 to our audited consolidated financial statements as of December 31, 2008.

In addition, according to Brazilian law, we are only permitted to invest in securities issued by the Brazilian government in Brazil. This restriction does not apply to investment outside of Brazil. As of December 31, 2008, the value of these government securities that has been directly acquired and held by us amounted to U.S.\$3,172 million. See Note 23 to our audited consolidated financial statements as of December 31, 2008.

For additional information regarding our principal transactions with related parties, see Note 23 to our audited consolidated financial statements as of December 31, 2008.

PifCo Related Party Transactions

As a result of being our wholly owned subsidiary, PifCo has numerous transactions with us and other affiliated companies in the ordinary course of business. PifCo engages in crude oil and oil product purchases from international suppliers and resells crude oil and oil products in U.S. dollars to us on a deferred payment basis, at a price which represents a premium to compensate PifCo for its financing costs. PifCo also purchases crude oil and oil products from us and for sale outside Brazil. Substantially all of PifCo's revenues are generated by transactions with us. Additionally, PifCo sells and purchases crude oil and oil products to and from third parties and related parties, mainly outside Brazil.

Since PifCo's inception there have been no, and there are no proposed, material transactions with any of PifCo's officers and directors. PifCo does not extend any loans to its officers and directors.

Table of Contents

PifCo's transactions with related parties resulted in the following balances in 2008 and 2007:

	December 31, 2008		December 31, 2007

See Item 18. Financial Statements and Index to Financial Statements.

Legal Proceedings*Petrobras*

We are currently subject to numerous proceedings relating to civil, criminal, administrative, environmental, labor and tax claims. Several individual disputes described in further detail below account for a significant part of the total amount of claims against us. Our audited consolidated financial statements only include provisions for probable and reasonably estimable losses and expenses we may incur in connection with pending proceedings. See Note 19 to our audited consolidated financial statements. The table below sets forth our recorded financial provisions by type of claim:(1)

	Provisions as of December 31,	
	2008	2007
	(U.S.\$ million)	
Labor claims	50	58
Tax claims	81	149
Civil claims	220	155
Commercial claims and other contingencies	28	20
Total	379	382

(1) Excludes provisions for contractual contingencies and tax assessments by the *Instituto Nacional do Seguro Social*, or INSS.

The amount accrued related to claims against Petrobras, the parent company, as of December 31, 2008, corresponded to approximately 29.1% of the total amount accrued by us related to claims against us and the amounts paid by us in respect of legal claims against Petrobras in the last five years averaged U.S.\$104 million per year. As of December 31, 2008, we estimate that the total amount of claims against us, excluding disputes involving non-monetary claims or claims not easily evaluated in the current stage of the proceedings, was approximately U.S.\$18.6 billion.

The most significant claims against us are summarized below:

Civil Claims

On November 23, 1992, Porto Seguro Imóveis Ltda., a minority shareholder of Petroquisa, filed a lawsuit on behalf of Petroquisa (a shareholder derivative suit) against us for alleged losses suffered as a result of the sale of Petroquisa's stake in various petrochemical companies included in the National Privatization Program (*Programa Nacional de Desestatização*). The plaintiff in the lawsuit requests that we, as controlling

shareholder of Petroquisa, be compelled to reinstate the damages made to Petroquisa's equity, since we approved the minimum sales price for the privatized companies. An initial decision on January 14, 1997, held us liable to Petroquisa for damages in an amount equivalent to U.S.\$3,406 million. In addition, we were required to pay the plaintiff 5% of such amount as a premium, as well as attorney's fees of 20% of such amount. In 2006, we purchased all of the minority interests of Petroquisa, and we now own 100.0% of its share capital. We appealed and prevailed in canceling the judgment, but a subsequent appellate decision on March 30, 2004, required Petrobras to indemnify Petroquisa and Porto Seguro for U.S.\$2,359 million and U.S.\$590 million, respectively (the latter representing 5% in premium and 20% in attorney's fees).

If this award is not reversed, the indemnity estimated to Petroquisa, including monetary corrections and interest, would be U.S.\$5,854 million. However, because Petrobras owns 100% of Petroquisa's share capital, our actual liability to Petroquisa would be approximately U.S.\$3,863 million. We will also be

Table of Contents

required to pay U.S.\$293 million to Porto Seguro and U.S.\$1,171 million in attorney's fees if the award is not reversed. For more information on this claim, see Note 19(a) to our audited consolidated financial statements as of December 31, 2008.

In 1981, Kallium Mineração S.A. brought an action against Companhia de Pesquisa de Recursos Minerais (CPRM) seeking an indemnification of approximately U.S.\$450 million for the early termination of a contract for the exploration of a very large potassium salt mine in Sergipe. CPRM terminated the contract when the Brazilian government, which had previously granted CPRM the right to develop an exploration project for the mine, cancelled the concession to CPRM and transferred it to Petromisa, our former subsidiary. As a result, CPRM brought us and the Brazilian government into the proceedings as co-defendants. In 1999, despite denying most of Kallium's claims, the court required us to indemnify Kallium for their research and exploration costs, which correspond to approximately U.S.\$1 million. We and Kallium have appealed the decision and are awaiting a judgment. The total damages amount that may be payable will be subject to monetary adjustment and to interest at 6% calculated as of the date of the filing of the lawsuit.

Several individuals have filed a collective lawsuit (an *ação popular*) against us, Repsol-YPF and the Brazilian government seeking to unwind the 2001 exchange of certain of our operating assets in Brazil for some of YPF's operating assets in Argentina. The plaintiffs maintain that the assets exchanged were not properly valued and that, therefore, the transaction was not in our best interests. In 2002, the court granted an injunction to the plaintiffs, which was then suspended by the Superior Court of Justice of Brazil. The lawsuit was subsequently judged on the merits in our favor and the other parties appealed. We are awaiting a final decision on the merits.

On January 18, 2000, a pipeline connecting one of our terminals to a refinery in Guanabara Bay ruptured, causing a release of approximately 341,000 gallons of crude oil into the bay. We undertook action to control the spill in an effort to prevent the oil from threatening additional areas. As a result of this spill, several individual damage lawsuits were filed by fishermen of the State of Rio

de Janeiro, in an aggregate amount of approximately R\$52 million. In addition, the Federation of Fishermen of the State of Rio de Janeiro filed a lawsuit against us claiming damages of approximately R\$537 million. In 2002, the judge hearing this matter found that damages were due, but not in the amount claimed. Both parties appealed this decision, and later in 2002, the Court of Appeals of the State of Rio de Janeiro denied the appeal filed by the plaintiff and dismissed numerous claims, including those of all fishermen who had already settled their claims against us, those who had already filed individual lawsuits against us, and certain others. Further appeals (*agravos de instrumento*) by both sides presented in 2003, to the *Superior Tribunal de Justiça* (STJ) and the STF, respectively, were denied. On February 2, 2007, the judge who initially heard the case published a decision overturning the appellate court's decision and partially accepting the court expert report that defined the period over which Guanabara Bay's fish would be affected by the spill. Given that the amount of damages for each fisherman affected is the same, this decision resulted in an aggregate amount of damages equal to R\$1,102 million through December 2005 (without interest and monetary indexation after that date). We appealed this decision and our appeal was denied in July 2007. An appeal filed by the Federation of Fishermen of the State of Rio de Janeiro was granted and, as a result, the number of fishermen entitled to damages increased from 12,000 to 20,000. We have appealed both of these decisions to the STJ.

Tax Claims

We have been served with four tax assessments by the Brazilian Revenue Service relating to a withholding tax (IRRF) that they claim should have been paid by us. Two assessments relate to payments we made to purchase oil we imported, and the other two relate to charter payments we made with respect to movable platform vessels. On May 8, 2008, we filed suit concerning one of the two tax assessments related to charter payments, and the court granted

preliminary injunctive relief (*tutela antecipada*) suspending the withholding tax until a final judgment is reached. On December 31, 2008, the total amount of these four tax assessments corresponded to approximately R\$5,092 million (approximately U.S.\$2,179 million). We have

Table of Contents

contested all four of these assessments, and they are pending appeal at the administrative level. If necessary, we will bring suit at the federal judicial level.

We sold imported naphtha for the production of petrochemical raw materials, as opposed to the production of gasoline or diesel. In 2006, the Brazilian Revenue Service filed a tax assessment (*auto de infração*) against us for the payment of CIDE, an excise tax applied to the sale and import of crude oil, oil products and natural gas products, on the grounds that we did not prove that the naphtha was not used to produce gasoline or diesel. As we have provided evidence that the naphtha was used solely in petrochemical activities, we believe these imports are not taxable. The assessment is being reviewed, and we will continue to appeal at the federal administrative level and later at the federal judicial level, if necessary. As of December 31, 2008, Petrobras' maximum exposure in this matter, including monetary restatement, was R\$1,421 million (U.S.\$608 million).

Petrobras was obligated to sell its products to fuel distributors free of CIDE (an excise tax) due to judicial decisions obtained by the distributors against the federal government of Brazil. The judicial decisions have been revoked, and in 2007, the Brazilian federal government commenced an administrative proceeding against us to recover unpaid CIDE. We filed an appeal at the administrative level in light of the first unfavorable administrative decision. As of December 31, 2008, Petrobras' maximum exposure in this matter, including monetary restatement, was R\$1,107 million (U.S.\$474 million).

Environmental Claims

In the period between 2004 to 2008, we experienced several accidents, some of which led to significant oil spills: 115,179 gallons in 2008, 101,970 gallons in 2007, 77,402 gallons in 2006, 71,141 gallons in 2005 and 140,000 gallons in 2004. In addition, in the years 2000 through 2002, we experienced accidents that resulted in several administrative, civil and criminal investigations and proceedings, some of which have not yet been concluded, and the most significant of which are specified below. We cannot predict whether additional litigation will result from those

accidents or whether any such additional proceedings would have a material adverse effect on us. See Note 19 to our audited consolidated financial statements.

January 2000 spill Guanabara Bay

On January 18, 2000, a pipeline connecting one of our terminals to a refinery in Guanabara Bay ruptured, causing a release of approximately 341,000 gallons of fuel oil into the bay. We undertook action to control the spill in an effort to prevent the oil from threatening additional areas. We have spent approximately R\$104 million in connection with the clean-up efforts and fines imposed by the federal environmental protection agency (IBAMA) in connection with this spill, and are subject to several legal proceedings that remain pending as a result of this spill.

July 2000 spill Curitiba

On July 16, 2000, the Santa-Catarina/Paraná pipeline ruptured at our President Getúlio Vargas refinery, located approximately 15 miles (24 kilometers) from Curitiba, capital of the State of Paraná. Approximately 1.06 million gallons of crude oil spilled into the surrounding area. We spent approximately R\$74 million at the time on the clean-up effort and fines imposed by the State of Paraná authorities. In addition, in relation to this spill:

IBAMA fined us R\$168 million, which we are contesting;

three public civil actions (*ações civis públicas*) have been filed against us, the most important of which was filed on January 1, 2001, by the Federal Public Ministry and the Paraná State Public Ministry seeking damages of approximately R\$2,300 million. Currently, this suit is awaiting the results of an expert examination (*prova pericial*); and

the Federal Public Ministry instituted a criminal action against us, our former chief executive officer and the former superintendent of the REPAR refinery. This action has been dismissed with respect to our former chief executive officer and suspended, pending appeal, with respect to us

Table of Contents

and the former superintendent of the REPAR refinery.

February 2001 spill Rivers in the State of Paraná

On February 16, 2001, our Araucária-Paranaguá pipeline ruptured as a result of an unusual movement of the soil and spilled approximately 15,059 gallons of fuel oil into several rivers located in the State of Paraná. Within four days, we cleaned the river surfaces, recovering approximately 13,738 gallons of fuel oil. As a result of the accident:

the *Instituto Ambiental do Paraná*, or IAP, fined us approximately R\$150 million, which was subsequently reduced to R\$90 million, which we are contesting; and

the Federal Public Ministry and the Paraná State Public Ministry filed public civil actions against us seeking approximately R\$3.7 billion in damages. In addition, the IAP filed a class action against us seeking damages of approximately R\$150 million. Both legal proceedings have been suspended due to a jurisdictional conflict between the state and federal courts. These lawsuits are still pending appeal.

March 2001 gas explosion and spill Roncador field

On March 15, 2001, a gas explosion inside one of the columns of the *P-36* production platform, located in the Roncador field (75 miles off the Brazilian coast) led to the death of 11 employees and eventual sinking of the platform. The accident also caused 396,300 gallons of diesel fuel and oil to spill into the ocean. As a result of the accident:

the Federal Public Ministry filed a lawsuit in 2002 seeking the payment of R\$100 million as environmental damages, among other demands. We have presented our defense to these claims and are awaiting a decision; and

IBAMA fined us approximately R\$7 million. We challenged these

finances through administrative proceedings. One of these proceedings has ended and the fine (in the amount of R\$2 million) has been upheld by IBAMA. We filed suit (*ação anulatória*) to annul the administrative decision upholding the R\$2 million fine. The other administrative proceeding has not yet been decided.

October 2002 FPSO accident

On October 13, 2002, a power blackout in FPSO *P-34*, which is located in the Barracuda-Caratinga fields, affected the ship's water balance system and causing the FPSO to roll. Four days later, the stability of the ship had been restored, without casualties or spill of oil into the sea. As a result of the investigation of this accident, several measures to prevent similar accidents were incorporated into our *Programa de Excelência Operacional*, or PEO (Operational Excellence Program). In connection with the accident, we also executed a *Termo de Ajustamento de Conduta* (Agreement for Regularization of Conduct), or TAC, with IBAMA, agreeing to conduct certain actions in the Campos Basin to reduce the risk of environmental damage. The Federal Public Ministry challenged the validity of the TAC in 2003 and attempted to prevent us from obtaining new licenses from IBAMA for our platforms located in the Campos Basin. We obtained a favorable court decision, which was appealed by the Federal Public Ministry. The Court decided the appeal partially in favor of the Federal Public Ministry. We challenged this decision and are awaiting judgment.

Campos Basin Drilling Operations

On February 3, 2006, IBAMA imposed a fine on us for our alleged breach of the August 11, 2004 *Termo de Ajustamento de Conduta* (TAC) with IBAMA relating to drilling operations in the Campos Basin, in an adjusted amount of R\$122.9 million. We are contesting the fine through an administrative proceeding. We believe the drilling performed by us along the Brazilian coast, including the drilling performed in the Campos Basin, is legitimate based on IBAMA's previous drilling license, Federal Government Decree of December 9, 2002, and the August 11, 2004 TAC, which is still valid.

Table of Contents**Pollution**

On January 15, 1986, the Public Ministry of the State of São Paulo and the *União dos Defensores da Terra* (Union for Defense of the Earth), filed a public civil action against us and 23 other companies in the State Court of São Paulo for alleged damages caused by pollution. This lawsuit is entering the discovery phase. The amount alleged in the initial pleading filed with the Court is equivalent to R\$4,217, but it is difficult to estimate the actual damages that could be assessed by the Court. The Public Ministry of the State of São Paulo has publicly stated that the amount of U.S.\$800 million would ultimately be required to remedy the alleged

environmental damage. The Court refused to assert joint and several liability of the defendants, and we believe that it will be difficult to determine the environmental damage attributable to each defendant.

PifCo

There is no litigation or governmental proceeding pending or, to PifCo's knowledge, threatened against PifCo or any of its subsidiaries that, if adversely determined, would have a significant effect on its financial position or profitability.

Dividend Distribution*Petrobras*

The tables below describe our dividend payments for the last five fiscal years, including amounts paid in the form of interest on shareholders' equity.

	2008	For the Year Ended December 31,			2004
		2007	2006	2005	
		(U.S.\$ million)			
Dividends paid to shareholders	4,343	3,860	3,144	2,104	1,785
Dividends paid to minority interests	404	143	69	6	24
	4,747	4,003	3,213	2,110	1,809

For Brazilian Corporate Law's minimum dividend distribution requirements, see Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Payment of Dividends and Interest on Shareholders' Equity and Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Mandatory Distribution. We may

change our dividend policy at any time within the limits set forth by Brazilian law.

PifCo

For a description of PifCo's dividend distribution policy, see Item 10. Additional Information Memorandum and Articles of Association of PifCo Dividends.

Item 9. The Offer and Listing

Petrobras

Trading Markets

Our shares and ADSs are listed or quoted on the following markets:

Common Shares	São Paulo Stock Exchange (Bovespa) São Paulo (ticker symbol PETR3); Mercado de Valores Latinoamericanos en Euros (Latibex) Madrid, Spain (ticker symbol XPBR)
Preferred Shares	São Paulo Stock Exchange (Bovespa) São Paulo (ticker symbol PETR4); Mercado de Valores Latinoamericanos en Euros (Latibex) Madrid, Spain (ticker symbol XPBRA)
Common ADSs	New York Stock Exchange (NYSE) New York (ticker symbol PBR)
Preferred ADSs	New York Stock Exchange (NYSE) New York (ticker symbol PBRA)
Common Shares	<i>Bolsa de Comercio de Buenos Aires</i> (BCBA) Buenos Aires, Argentina (ticker symbol APBR)
Preferred Shares	<i>Bolsa de Comercio de Buenos Aires</i> (BCBA) Buenos Aires, Argentina (ticker symbol APBRA)

Our common and preferred shares have been traded on the São Paulo Stock Exchange since 1968. Our ADSs representing two common shares and our ADSs representing two preferred shares have been traded on the New York Stock Exchange since 2000 and 2001, respectively. JPMorgan Chase Bank, N.A. serves as depositary for both the common and preferred ADSs. In March 2008, our shareholders approved a two-for-one split of our common and preferred shares trading on the São Paulo Stock Exchange, and our common and preferred ADSs trading on the New York Stock Exchange. The stock split became effective as of April 28, 2008 on the São Paulo Stock Exchange, and

May 8, 2008, on the New York Stock Exchange. The two-for-one stock split did not affect the ratio of our ADSs to our underlying shares.

Our common and preferred shares have been traded on the LATIBEX since 2002. The LATIBEX is an electronic market created in 1999 by the Madrid Stock Exchange in order to enable trading of Latin American equity securities in euro denominations.

Our common and preferred shares have been traded on the *Bolsa de Comercio de Buenos Aires* (Buenos Aires Stock Exchange) since April 27, 2006.

Table of Contents*Share Price History*

The following table sets forth trading information for our common shares and preferred shares, as reported by the São Paulo Stock Exchange, and for our common and preferred American Depositary Shares, as reported by the New York Stock Exchange, for the periods indicated.

The São Paulo Stock Exchange

The São Paulo Stock Exchange is less liquid than the New York Stock Exchange. At December 31, 2008, the aggregate market capitalization of the 439 companies listed on the São Paulo Stock Exchange was approximately U.S.\$588 billion and the ten largest companies represented approximately 52% of the total market capitalization of all listed companies. All the outstanding shares of an exchange-listed company may trade on the São Paulo Stock Exchange, but in most cases, less than half of the listed shares are actually available for trading by the public. The remainder is held by small groups of controlling persons, by governmental entities or by one principal shareholder.

Trading on the São Paulo Stock Exchange by a holder not deemed to be a resident of Brazil for Brazilian tax and regulatory purposes (a non-Brazilian holder) is subject to certain limitations under Brazilian foreign investment legislation. With limited exceptions, non-Brazilian holders may only trade on the São Paulo Stock Exchange in accordance with the requirements of Resolution No. 2,689 of the National Monetary Council. Resolution No. 2,689

requires that securities held by non-Brazilian holders be maintained in the

custody of, or in deposit accounts with, financial institutions duly authorized by the Central Bank of Brazil and the CVM. In addition, Resolution No. 2,689 requires non-Brazilian holders to restrict their securities trading to transactions on Brazilian stock exchanges or qualified over-the-counter markets. With limited exceptions, non-Brazilian holders may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through a private transaction.

PifCo

PifCo's common stock is not registered and there is no trading market for it. PifCo's Senior Notes are listed in the Luxembourg Stock Exchange. PifCo's Global Notes due 2016, 2018 and 2019 are registered on the New York Stock Exchange. PifCo's other debt securities have not been listed on any securities exchange.

Table of Contents

Item 10. Additional Information

Memorandum and Articles of Incorporation of Petrobras

General

We are a publicly traded company duly registered with the CVM under identification number 951-2. Article 3 of our bylaws establishes our corporate purposes as research, prospecting, extraction, processing, trade and transportation of crude oil from wells, shale and other rocks, of its derivatives, natural gas and other fluid hydrocarbons, as well as other related or similar activities, such as activities connected with energy, including research, development, production, transportation, distribution, sale and trade of all forms of energy, as well as other related or similar activities. We may conduct outside Brazil, directly or through our subsidiaries, any of the activities within our corporate purpose.

Qualification of Directors

Brazilian law provides that only shareholders of a company may be appointed to its board of directors, but there is no minimum share ownership or residency requirement for qualification as a director. Members of our board of executive officers must be Brazilian nationals and reside in Brazil. Our directors and executive officers are prevented from voting on any transaction involving companies in which they hold more than 10% of the total capital stock or of which they have held a management position in the period immediately prior to their taking office. Under our bylaws, shareholders set the aggregate compensation payable to directors and executive officers. The board of directors allocates the compensation among its members and the executive officers.

Allocation of Net Income

At each annual general shareholders meeting, our board of directors is required to recommend how net profits for the preceding fiscal year are to be allocated. The Brazilian Corporate Law defines net profits as net income after income taxes and social contribution taxes for such fiscal year, net of any accumulated losses from prior fiscal years and any amounts allocated to employees and management's participation in our profits. In accordance with the Brazilian

Corporate Law, the amounts available for dividend distribution or payment of interest on shareholders' equity equals net profits less any amounts allocated from such net profits to the legal reserve.

We are required to maintain a legal reserve, to which we must allocate 5% of net profits for each fiscal year until the amount for such reserve equals 20% of our paid-in capital. However, we are not required to make any allocations to our legal reserve in a fiscal year in which the legal reserve, when added to our other established capital reserves, exceeds 30% of our capital. The legal reserve can only be used to offset losses or to increase our capital.

As long as we are able to make the minimum mandatory distribution described below, we must allocate an amount equivalent to 0.5% of subscribed and fully paid-in capital at year-end to a statutory reserve. The reserve is used to fund the costs of research and technological development programs. The accumulated balance of this reserve cannot exceed 5% of the subscribed and fully paid-in capital stock.

Brazilian law also provides for three discretionary allocations of net profits that are subject to approval by the shareholders at the annual general shareholders meeting, as follows:

first, a percentage of net profits may be allocated to a contingency reserve for anticipated losses that are deemed probable in future years. Any amount so allocated in a prior year must be either reversed in the fiscal year in which the reasons justifying the reserve cease to exist, or written off in the event that the anticipated loss occurs;

second, if the mandatory distributable amount exceeds the sum of realized net profits in a given year, this excess may be allocated to an unrealized revenue reserve. The Brazilian Corporate Law defines realized net profits as the amount of net profits that exceeds the sum of the net positive result of equity adjustments and profits or revenues from operations whose financial results take place after the end of the next succeeding fiscal year; and

Table of Contents

third, a portion of our net profits that exceeds the minimum mandatory distribution may be allocated to fund working capital needs and investment projects, as long as such allocation is based on a capital budget previously approved by our shareholders. Capital budgets for more than one year must be reviewed at each annual shareholders meeting.

Mandatory Distribution

Under Brazilian Corporate Law, the bylaws of a Brazilian corporation may specify a minimum percentage of the amounts available for distribution by such corporation for each fiscal year that must be distributed to shareholders as dividends or interest on shareholders equity, also known as the mandatory distributable amount, which cannot be lower than 25% of the adjusted net profit for the fiscal year. Under our bylaws, the mandatory distributable amount has been fixed at an amount equal to not less than 25% of our net profits, after the allocations to the legal reserve, contingency reserve and unrealized revenue reserve. Furthermore, the net profits that are not allocated to the reserves above to fund working capital needs and investment projects as described above or to the statutory reserve must be distributed to our shareholders as dividends or interest on shareholders equity.

The Brazilian Corporate Law, however, permits a publicly held company, such as ours, to suspend the mandatory distribution if the board of directors and the Fiscal Council report to the annual general shareholders meeting that the distribution would be inadvisable in view of the company's financial condition. The suspension is subject to approval of holders of common shares. In this case, the board of directors must file a justification for such suspension with the CVM. Profits not distributed by virtue of the suspension mentioned above shall be allocated to a special reserve and, if not absorbed by subsequent losses, shall be distributed as soon as the financial condition of the company permits such payments.

Payment of Dividends and Interest on Shareholders Equity

We are required by the Brazilian Corporate Law and by our bylaws to hold an annual general shareholders meeting by the fourth month after the end of each fiscal year at which, among other things, the shareholders have to decide on the payment of an annual dividend. The payment of annual dividends is based on the financial statements prepared for the relevant fiscal year.

Law No. 9,249 of December 26, 1995, as amended, provides for distribution of interest attributed to shareholders equity to shareholders as an alternative form of distribution. Such interest is limited to the daily *pro rata* variation of the TJLP interest rate, the Brazilian government's long-term interest rate.

We may treat these payments as a deductible expense for corporate income tax and social contribution purposes, but the deduction cannot exceed the greater of:

50% of net income (before taking into account such distribution and any deductions for income taxes and after taking into account any deductions for social contributions on net profits) for the period in respect of which the payment is made; or

50% of retained earnings.

Any payment of interest on shareholders equity to holders of ADSs or common shares, whether or not they are Brazilian residents, is subject to Brazilian withholding tax at the rate of 15% or 25%. The 25% rate applies if the beneficiary is resident in a tax haven. See Taxation Relating to Our ADSs and Common and Preferred Shares Brazilian Tax Considerations. The amount paid to shareholders as interest attributed to shareholders equity, net of any

withholding tax, may be included as part of any mandatory distribution of dividends. Under the Brazilian Corporate Law, we are required to distribute to shareholders an amount sufficient to ensure that the net amount received, after payment by us of applicable Brazilian withholding taxes in respect of the distribution of interest on shareholders equity, is at least equal to the mandatory dividend.

Table of Contents

Under the Brazilian Corporate Law and our bylaws, dividends generally are required to be paid within 60 days following the date the dividend was declared, unless a shareholders' resolution sets forth another date of payment, which, in either case, must occur prior to the end of the fiscal year in which the dividend was declared. The amounts of dividends due to our shareholders are subject to financial charges at the SELIC rate from the end of each fiscal year through the date we actually pay such dividends. Shareholders have a three-year period from the dividend payment date to claim dividends or interest payments with respect to their shares, after which the amount of the unclaimed dividends reverts to us.

Holders of preferred shares are entitled to priority in the distribution equal to the greater of a 5% of their pro rata share of our paid-in capital, or 3% of their shares book value with a participation equal to the common shares in corporate capital increases obtained from the incorporation of reserves and profits.

Our board of directors may distribute dividends or pay interest based on the profits reported in interim financial statements. The amount of interim dividends distributed cannot exceed the amount of our capital reserves.

Shareholders' Meetings

Our shareholders have the power to decide on any matters related to our corporate purposes and to pass any resolutions they deem necessary for our protection and development, through voting at a general shareholders' meeting.

We convene our shareholders' meetings by publishing a notice in the *Diário Oficial da União* (Official Gazette), *Jornal do Commercio*, *Gazeta Mercantil* and *Valor Econômico*. The notice must be published no fewer than three times, beginning at least 15 calendar days prior to the scheduled meeting date. The notice must contain the meeting's agenda and, in the case of a proposed amendment to the bylaws, an indication of the subject matter. For ADS holders, we are required to provide notice to the ADS depository at least 30 calendar days prior to a shareholders' meeting.

The board of directors or, in some specific situations set forth in the Brazilian Corporate Law, the shareholders, call our general shareholders' meetings. A shareholder may be represented at a

general shareholders' meeting by an attorney-in-fact, so long as the attorney-in-fact was appointed within a year of the meeting. The attorney-in-fact must be a shareholder, a member of our management, a lawyer or a financial institution. The attorney-in-fact's power of attorney must comply with certain formalities set forth by Brazilian law.

In order for a valid action to be taken at a shareholders' meeting, shareholders representing at least one quarter of our issued and outstanding common shares must be present at the meeting. However, in the case of a general meeting to amend our bylaws, shareholders representing at least two-thirds of our issued and outstanding common shares must be present. If no such quorum is present, the board may call a second meeting giving at least eight calendar days notice prior to the scheduled meeting in accordance with the rules of publication described above. The quorum requirements will not apply to the second meeting, subject to the voting requirements for certain matters described below.

Voting Rights

Pursuant to the Brazilian Corporate Law and our bylaws, each of our common shares carries the right to vote at a general meeting of shareholders. The Brazilian government is required by law to own at least a majority of our voting stock. Pursuant to our bylaws, our preferred shares generally do not confer voting rights.

Holders of common shares, voting at a general shareholders' meeting, have the exclusive power to:

amend our bylaws;

approve any capital increase beyond the amount of the authorized capital;

approve any capital reduction;

elect or dismiss members of our board of directors and Fiscal Council, subject to the right of our preferred shareholders to elect or dismiss one member of our board of directors and to elect one member of our Fiscal Council;

receive the yearly financial statements prepared by our management and accept or reject

Table of Contents

management's financial statements, including the allocation of net profits for payment of the mandatory dividend and allocation to the various reserve accounts;

authorize the issuance of debentures, except for the issuance of non-convertible unsecured debentures, which may be approved by our board of directors;

suspend the rights of a shareholder who has not fulfilled the obligations imposed by law or by our bylaws;

accept or reject the valuation of assets contributed by a shareholder in consideration for issuance of capital stock;

pass resolutions to approve corporate restructurings, such as mergers, spin-offs and transformation into another type of company;

participate in a centralized group of companies;

approve the disposal of the control of our subsidiaries;

approve the disposal of convertible debentures issued by our subsidiaries and held by us;

establish the compensation of our senior management;

approve the cancellation of our registration as a publicly-traded company;

decide on our dissolution or liquidation;

waive the right to subscribe to shares or convertible debentures issued by our subsidiaries or affiliates; and

choose a specialized company to work out the appraisal of our shares by economic value, in cases of the canceling of our registry as a publicly-traded company or deviation from the standard rules of corporate governance defined by a stock exchange or an entity in charge of maintaining an organized

over-the-counter market registered with the CVM, in order to comply with such corporate governance rules and with contracts that may be executed by us and such entities.

Except as otherwise provided by law, resolutions of a general shareholders' meeting are passed by the majority of the outstanding common shares. Abstentions are not taken into account.

The approval of holders of at least one-half of the issued and outstanding common shares is required for the following actions involving our company:

reduction of the mandatory dividend distribution;

merger into another company or consolidation with another company, subject to the conditions set forth in the Brazilian Corporate Law;

participation in a group of companies subject to the conditions set forth in the Brazilian Corporate Law;

change of our corporate purpose, which must be preceded by an amendment in our bylaws by federal law as we are controlled by the government and our corporate purpose is established by law;

cessation of the state of liquidation;

spin-off of a portion of our company, subject to the conditions set forth in the Brazilian Corporate Law;

transfer of all our shares to another company or receipt of shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary of such company, known as *incorporação de ações*; and

approval of our liquidation.

Under Brazilian Corporate law, if shareholder has a conflict of interest with the company in connection with any proposed transaction, the shareholder may not vote in any decision regarding such transaction. For example, an interested shareholder may not vote to approve the valuation of assets contributed by that

Table of Contents

shareholder in exchange for capital stock or, when the shareholder is a member of senior management, to approve the management's report on the company's financial statements. Any transaction approved with the vote of a shareholder with a conflict of interest may be annulled and such shareholder may be liable for any damages caused and be required to return to the company any gain it may have obtained as a result of the transaction.

According to the Brazilian Corporate Law, the following actions shall be submitted for approval by the outstanding adversely affected preferred shares before they are submitted for approval of at least half of the issued and outstanding common shares:

creation of preferred shares or increase in the existing classes of preferred shares, without preserving the proportions to any other class of preferred shares, except as set forth in or authorized by the company's bylaws;

change in the preferences, privileges or redemption or amortization conditions of any class of preferred shares; and

creation of a new class of preferred shares entitled to more favorable conditions than the existing classes.

Decisions on our transformation into another type of company require the unanimous approval of our shareholders, including the preferred shareholders, and an amendment of our bylaws by the federal law.

Our preferred shares will acquire voting rights if we fail to pay the minimum dividend to which such shares are entitled for three consecutive fiscal years. The voting right shall continue until payment has been made. Preferred shareholders also obtain the right to vote if we enter into a liquidation process.

Under Brazilian Corporate Law, shareholders representing at least 10% of the company's voting capital have the right to demand that a cumulative voting procedure be adopted to entitle each common share to as many votes as there are board members and to give each common share the right to vote

cumulatively for only one candidate or to distribute its votes among several candidates. Furthermore, minority common shareholders holding at least 10% of our voting capital also have the right to appoint or dismiss one member to or from our Fiscal Council.

Preferred shareholders holding, individually or as a group, 10% of our total capital have the right to appoint and/or dismiss one member to or from our board of directors. Preferred shareholders have the right to separately appoint one member to our Fiscal Council.

Our bylaws provide that, independently from the exercise of the rights above granted to minority shareholders, through cumulative voting process, the Brazilian government always has the right to appoint the majority of our directors.

Preemptive Rights

Pursuant to the Brazilian Corporate Law, each of our shareholders has a general preemptive right to subscribe for shares or securities convertible into shares in any capital increase, in proportion to the number of shares held by them. In the event of a capital increase that would maintain or increase the proportion of capital represented by the preferred shares, holders of preferred shares would have preemptive rights to subscribe to newly issued preferred shares only. In

the event of a capital increase that would reduce the proportion of capital represented by the preferred shares, holders of preferred shares would have preemptive rights to subscribe to any new preferred shares in proportion to the number of shares held by them, and to common shares only to the extent necessary to prevent dilution of their interests in our total capital.

A period of at least 30 days following the publication of notice of the issuance of new shares or securities convertible into shares is allowed for exercise of the right, and the right is negotiable. According to our bylaws, our board of directors may eliminate preemptive rights or reduce the exercise period in connection with a public exchange made to acquire control of another company or in connection with a public offering of shares or securities convertible into shares.

In the event of a capital increase by means of the issuance of new shares, holders of ADSs, of

Table of Contents

common or preferred shares, would have, except under circumstances described above, preemptive rights to subscribe for any class of our newly issued shares. However, holders of ADSs may not be able to exercise the preemptive rights relating to the preferred shares underlying their ADSs unless a registration statement under the Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities.

Redemption and Rights of Withdrawal

Brazilian law provides that, under limited circumstances, a shareholder has the right to withdraw his or her equity interest from the company and to receive payment for the portion of shareholder's equity attributable to his or her equity interest.

This right of withdrawal may be exercised by the holders of the adversely affected common or preferred shares in the event that we decide:

to create preferred shares or to increase the existing classes of preferred shares, without preserving the proportions to any other class of preferred shares, except as set forth in or authorized by our bylaws; or

to change the preferences, privileges or redemption or amortization conditions of any class of preferred shares or to create a new class of preferred shares entitled to more favorable conditions than the existing classes.

Holders of our common shares may exercise their right of withdrawal in the event we decide:

to merge into another company or to consolidate with another company, subject to the conditions set forth in the Brazilian Corporate Law; or

to participate in a centralized group of companies as defined under the Brazilian Corporate Law and subject to the conditions set forth therein.

The right of withdrawal may also be exercised by our dissenting shareholders in the event we decide:

to reduce the mandatory distribution of dividends;

to change our corporate purposes;

to spin-off a portion of our company, subject to the conditions set forth in the Brazilian Corporate Law;

to transfer all of our shares to another company or to receive shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary of our company, known as *incorporação de ações*; or

to acquire control of another company at a price, which exceeds the limits set forth in the Brazilian Corporate Law, subject to, the conditions set forth in the Brazilian Corporate Law.

This right of withdrawal may also be exercised in the event that the entity resulting from a merger, *incorporação de ações*, as described above, or consolidation or spin-off of a listed company fails to become a listed company within 120 days of the shareholders' meeting at which such decision was taken.

Any redemption of shares arising out of the exercise of such withdrawal rights would be made based on the book value per share, determined on the basis of the last balance sheet approved by our shareholders. However, if a shareholders meeting giving rise to redemption rights occurred more than 60 days after the date of the last approved balance sheet, a shareholder would be entitled to demand that his or her shares be valued on the basis of a new balance sheet dated within 60 days of such shareholders meeting. The right of withdrawal lapses 30 days after publication of the minutes of the shareholders meeting that approved the corporate actions described above. We would be entitled to reconsider any action giving rise to withdrawal rights within ten days following the expiration of such rights if the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

Table of Contents

Other Shareholders Rights

According to the Brazilian Corporate Law, neither a company's bylaws nor actions taken at a general meeting of shareholders may deprive a shareholder of some specific rights, such as:

the right to participate in the distribution of profits;

the right to participate equally and ratably in any remaining residual assets in the event of liquidation of the company;

the right to supervise the management of the corporate business as specified in the Brazilian Corporate Law;

the right to preemptive rights in the event of a subscription of shares, debentures convertible into shares or subscription bonuses (other than with respect to a public offering of such securities, as may be set out in the bylaws); and

the right to withdraw from the company in the cases specified in the Brazilian Corporate Law.

Liquidation

In the event of a liquidation, holders of preferred shares are entitled to receive, prior to any distribution to holders of common shares, an amount equal to the paid-in capital with respect to the preferred shares.

Conversion Rights

According to our bylaws, our common shares are not convertible into preferred shares, nor are preferred shares convertible into common shares.

Liability of Our Shareholders for Further Capital Calls

Neither Brazilian law nor our bylaws provide for capital calls. Our shareholders' liability for capital calls is limited to the payment of the issue price of the shares subscribed or acquired.

Form and Transfer

Our shares are registered in book-entry form and we have hired Banco do Brasil to perform all the services of safe-keeping and transfer of shares. To make the transfer, Banco do Brasil makes an entry in the register, debits the share account of the transferor and credits the share account of the transferee.

Our shareholders may choose, at their individual discretion, to hold their shares through the *Companhia Brasileira de Liquidação e Custódia* or CBLC. Shares are added to the CBLC system through Brazilian institutions, which have clearing accounts with the CBLC. Our shareholder registry indicates which shares are listed on the CBLC system. Each participating shareholder is in turn registered in a registry of beneficial shareholders maintained by the CBLC and is treated in the same manner as our registered shareholders.

Dispute Resolution

Our bylaws provide for mandatory dispute resolution through arbitration, in accordance with the rules of the *Câmara de Arbitragem do Mercado* (Market Arbitration Chamber), with respect to any dispute regarding us, our shareholders, the officers, directors and Fiscal Council members and involving the provisions of the Brazilian Corporate Law, our bylaws, the rules of the National Monetary Council, the Central Bank of Brazil and the CVM or any other capital markets legislation, including the provisions of any agreement entered into by us with any stock exchange or over-the-counter entity registered with the CVM, relating to adoption of differentiated corporate governance practices.

However, decisions of the Brazilian government, as exercised through voting in any general shareholders meeting, are not subject to this arbitration proceeding, in accordance with Article 238 of the Brazilian Corporate Law.

Self-dealing Restrictions

Our controlling shareholder, the Brazilian government, and the members of our board of directors, board of executive officers and Fiscal Council are required, in accordance with our bylaws, to:

refrain from dealing with our securities either in the one-month period prior to any fiscal year-end,

Table of Contents

up to the date when our financials are published, or in the period between any corporate decision to raise or reduce our stock capital, to distribute dividends or stock, and to issue any security, up to the date when the respective public releases are published; and

communicate to us and to the stock exchange their periodical dealing plans with respect to our securities, if any, including any change or default in these plans. If the communication is an investment or divestment plan, the frequency and planned quantities must be included.

Restrictions on Non-Brazilian Holders

Non-Brazilian holders face no legal restrictions on the ownership of our common or preferred shares or of ADSs based on our common or preferred shares, and are entitled to all the rights and preferences of such common or preferred shares, as the case may be.

However, the ability to convert dividend payments and proceeds from the sale of common or preferred shares or preemptive rights into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, the registration of the relevant investment with the Central Bank of Brazil. Nonetheless, any non-Brazilian holder who registers with the CVM in accordance with Resolution No. 2,689 may buy and sell securities on the São Paulo Stock Exchange without obtaining a separate certificate of registration for each transaction.

In addition, Annex III to Resolution No. 1,289 of the National Monetary Council, as amended, known as Annex III Regulations, allows Brazilian companies to issue depositary receipts in foreign exchange markets. We currently have an ADR program for our common and preferred shares duly registered with the CVM and the Central Bank of Brazil. The proceeds from the sale of ADSs by holders outside Brazil are free of Brazilian foreign investment controls.

Transfer of Control

According to Brazilian law and our bylaws, the Brazilian government is required to own at least the majority of our voting shares. Therefore, any change in our control would require a change in the applicable legislation.

Disclosure of Shareholder Ownership

Brazilian regulations require that any person or group of persons representing the same interest that has directly or indirectly acquired or sold an interest corresponding to 5% of the total number of shares of any type or class must disclose its share ownership or divestment to the CVM and the São Paulo Stock Exchange. In addition, a statement containing the required information must be published in the newspapers. Any subsequent increase or decrease by 5% or more in ownership of shares of any type or class must be similarly disclosed.

Memorandum and Articles of Association of PifCo

Register

PifCo is an exempted company incorporated with limited liability in the Cayman Islands under the Companies Law, as amended, with company registration number 76600. PifCo registered and filed its Memorandum and Articles of Association with the Registrar of Companies on September 24, 1997. The company adopted an Amended and Restated Memorandum and Articles of Association by sole shareholder special resolution on May 7, 2007, and adopted a further Amended and Restated Memorandum and Articles of Association by sole shareholder special

resolution on February 23, 2008. PifCo was initially incorporated with the name Brasoil Finance Company, which name was changed by special resolution of PifCo's shareholders to Petrobras International Finance Company on September 25, 1997. The last amendment to PifCo's Memorandum & Articles of Association occurred on February 23, 2008, to amend the stated objects and purposes of PifCo.

Table of Contents

Objects and Purposes

PifCo's Memorandum and Articles of Association grants PifCo full power and authority to:

conduct marketing, sales, financing, purchase, storage and transportation of petroleum, natural gas and all other hydrocarbons and by-products thereof, including ethanol and other biofuels, as well as the businesses of purchase, sale, leasing and rental of platforms, equipment and drilling units employed in the activities of exploration and production of petroleum and gas, and any business incidental thereto;

to conduct and carry on in any and all parts of the world, any of the objects noted above, through or by means of creating or subscribing for or otherwise acquiring securities in companies, associations, partnerships or trust estates engaged in or carrying on or conducting any one or more of the businesses set out above and to exercise all voting and other rights arising in respect of such securities (including without limitation to effect the liquidation or dissolution of such entities) and to dispose of such securities;

to acquire, hold and dispose of securities for hedging, investment or speculative purposes and to exercise all voting and other rights arising in respect of such securities; and

to borrow or raise money for any of the above referenced purposes of PifCo and, from time to time, to do or make, accept, endorse, execute and issue promissory notes, drafts, bills of exchange, warrants, bonds, debentures and to secure the payment of any thereof, and of the interest thereon, by the creation of security interests over of the property of PifCo, whether at the time owned or thereafter acquired and to sell, pledge or otherwise dispose of such

bonds or other obligations of PifCo for its corporate purposes.

As a matter of Cayman Islands law, PifCo cannot trade in the Cayman Islands except in furtherance of the business carried on outside the Cayman Islands.

Directors

Directors may vote on a proposal, arrangement or contract in which they are interested. However, interested directors must declare the nature of their interest at a directors' meeting. If the interested directors declare their interest, their votes are counted and they are counted in the quorum of such meeting.

The directors may, in PifCo's name, exercise their powers to borrow money, issue debt securities and to mortgage or charge any of the undertaking or property of PifCo and are generally responsible for its day-to-day management and administration.

Directors are not required to own shares.

Rights and Obligations of Shareholders

Dividends

Shareholders may declare dividends in a general meeting but the dividends cannot exceed the amount recommended by the directors. The directors may pay the shareholders interim dividends and may, before recommending any

dividend, set aside reserves out of profits. The directors can invest these reserves in their discretion or employ them in PifCo's business.

Dividends may be paid in cash or in kind but may only be paid out of profits or, subject to certain restrictions of Cayman Islands law, a share premium account.

Voting Rights

Votes may be cast at a general meeting by a show of hands or by a poll. On a vote by a show of hands, each shareholder or shareholder represented by proxy has one vote. On a vote by a poll, each shareholder or shareholder represented by proxy has one vote for each share owned.

Directors are elected by ordinary resolution by the shareholders at general meetings or by a board resolution of the

Table of Contents

directors. Shareholders are not entitled to vote at a general meeting unless calls or other amounts payable on their shares have been paid. In lieu of voting on a matter at a general meeting, the shareholders entitled to vote on that matter may adopt the matter by signing a written resolution.

Redemption

PifCo may issue shares, which are redeemable by PifCo or by its shareholders, on such terms and in such manner as the directors may determine before the issuance of such shares. PifCo may repurchase its own shares on such terms and in such manner as the directors may determine and agree with the relevant shareholder.

Shareholder Rights Upon Liquidation

If PifCo is liquidated, the liquidator may (in accordance with an ordinary shareholder resolution):

set a fair value on PifCo's assets, divide all or part of PifCo's assets among the shareholders and determine how the assets will be divided among shareholders or classes of shareholders; and

vest all or part of PifCo's assets in trustees.

Shareholders will not be compelled to accept any securities on which there is a liability.

Calls on Shares

Directors may make calls on the shareholders to the extent any amounts remain unpaid on their shares. Each shareholder shall pay to the company the amounts called on such shares.

Change to Rights of Shareholders

Shareholders may change the rights of their class of shares by:

getting the written consent of two-thirds of the shareholders of that class; or

passing a special resolution at a meeting of the shareholders of that class.

There are no general limitations on the rights to own shares specified by the articles.

General Meetings

A general meeting may be convened:

by the directors at any time; or

by any two shareholders holding not less than 10% of the paid-up voting share capital of PifCo, by written request.

Notice of a general meeting is given to all shareholders.

All business carried out at a general meeting is considered special business except:

sanctioning a dividend;

consideration of the accounts, balance sheets, and ordinary report of the directors and auditors;

appointment and removal of directors; and

fixing of remuneration of the auditors.

Unanimous shareholder consent is required to carry out special business at a meeting unless notice of the special business is given in the notice of the meeting. A quorum of shareholders is required to be present at any meeting in order to carry out business. One or more shareholders holding at least a majority of the shares of PifCo that are present in person or represented by proxy is a quorum.

There is no requirement under Cayman Islands law to convene an annual meeting or to convene any general meeting of the shareholders. The directors are permitted to designate any general meeting of shareholders as an annual general meeting.

Liability of Shareholders

In normal circumstances, the liability of any shareholder to PifCo is limited to the amount, which such shareholder has agreed to pay in respect of the subscription of his shares.

Changes in Capital

PifCo may increase its authorized share capital by ordinary resolution. The new shares will be subject to all of the provisions to which the original shares are subject.

Table of Contents

PifCo may also by ordinary resolution:

consolidate and divide all or any of its share capital into shares of a larger amount than its existing shares;

convert all or any part of its paid-up shares into stock and reconvert that stock into paid-up shares of any denomination;

split existing shares into shares of a smaller amount, subject to the provisions of Section 13 of the Companies Law; and

cancel any shares, which, at the date of the resolution, are not held or agreed to be held by any person and diminish the amount of its share capital by the amount of the shares so cancelled.

PifCo may reduce its share capital and any capital redemption reserve by special resolution in accordance with relevant provision of Cayman Islands law.

Indemnity

PifCo's directors and officers are indemnified out of its assets and funds against all actions, proceedings, costs, charges, expenses, losses, damages or liabilities which they incur or sustain in or regarding the conduct of PifCo's business or affairs in the execution or discharge of their respective duties, powers, authorities or discretions. Under PifCo's Memorandum of Association, directors and officers are excused from all liability to PifCo, except for any losses, which arise as a result of such party's own dishonesty.

Accounts

Accounts relating to PifCo's affairs are kept in such manner as may be determined from time to time by the directors and may be audited in such manner as may be determined from time to time by the directors. There is, however, no requirement as a matter of Cayman Islands law to have PifCo's accounts audited.

Amendment of the Articles

PifCo may, by special resolution of the shareholders, amend its memorandum and articles of association.

Transfer out of Jurisdiction

PifCo may, by special resolution of the shareholders, transfer out of the Cayman Islands into any jurisdiction permitting such transfer.

Material Contracts

Petrobras

For information concerning our material contracts, see Item 4. Information on the Company and Item 5. Operating and Financial Review and Prospects.

PifCo

For information concerning PifCo's material contracts, see Item 4. Information on the Company and Item 5. Operating and Financial Review and Prospects.

Statements contained in this annual report regarding the contents of any contract or other document are not necessarily complete, and, where the contract or other document is an exhibit to the annual report, each of these statements is qualified in all aspects by the provisions of the actual contract or other documents.

Petrobras Exchange Controls

There are no restrictions on ownership of the common or preferred shares by individuals or legal entities domiciled outside Brazil.

The right to convert dividend payments and proceeds from the sale of shares into foreign currency and to remit such amounts outside Brazil may be subject to restrictions under foreign investment legislation, which generally requires, among other things, that the relevant investments be registered with the Central Bank of Brazil. If any restrictions are imposed on the remittance of foreign capital abroad, they could hinder or prevent *Companhia Brasileira de liquidação e Custódia*, or CBLC, as custodian for the common and preferred shares represented by the American Depositary Shares, or registered holders who have exchanged American Depositary Shares for

Table of Contents

common shares or preferred shares, from converting dividends, distributions or the proceeds from any sale of such common shares or preferred shares, as the case may be, into U.S. dollars and remitting the U.S. dollars abroad.

Foreign investors may register their investment under Law No. 4,131 of September 3, 1962 or Resolution No. 2,689. Registration under Resolution No. 2,689 affords favorable tax treatment to foreign investors who are not resident in a tax haven, as defined by Brazilian tax laws. See [Taxation Relating to Our ADSs and Common and Preferred Shares](#) Brazilian Tax Considerations.

Under Resolution No. 2,689, foreign investors may invest in almost all financial assets and engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are fulfilled. In accordance with Resolution No. 2,689, the definition of foreign investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Under Resolution No. 2,689, a foreign investor must:

- appoint at least one representative in Brazil, with powers to perform actions relating to its investment;
- appoint an authorized custodian in Brazil for its investments;
- register as a foreign investor with the CVM; and
- register its foreign investment with the Central Bank of Brazil.

Securities and other financial assets held by a Resolution No. 2,689 investor must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank of Brazil or the CVM. In addition, any transfer of securities held under Resolution No. 2,689 must be carried out in the stock exchanges or through organized over-the-counter markets licensed by the CVM, except for transfers resulting from a corporate reorganization or occurring upon the death of an investor by operation of law or will.

Holders of American Depositary Shares who have not registered their investment with

the Central Bank of Brazil could be adversely affected by delays in, or refusals to grant, any required government approval for conversions of payments made in *reais* and remittances abroad of these converted amounts.

Annex III Regulations provide for the issuance of depositary receipts in foreign markets with respect to shares of Brazilian issuers. The depositary of the ADSs has obtained from the Central Bank of Brazil an electronic certificate of registration with respect to our existing ADR program. Pursuant to the registration, the custodian and the depositary will be able to convert dividends and other distributions with respect to the relevant shares represented by ADSs into foreign currency and to remit the proceeds outside Brazil. Following the closing of an international offering, the electronic certificate of registration will be amended by the depositary with respect to the ADSs sold in the international offering and will be maintained by the Brazilian custodian for the relevant shares on behalf of the depositary.

In the event that a holder of ADSs exchanges such ADSs for the underlying shares, the holder will be entitled to continue to rely on such electronic registration for five business days after the exchange. Thereafter, unless the relevant shares are held pursuant to Resolution No. 2,689 by a duly registered investor, or a holder of the relevant shares applies for and obtains a new certificate of registration from the Central Bank of Brazil, the holder may not be able to convert into foreign currency and to remit outside Brazil the proceeds from the disposition of, or distributions

with respect to, the relevant shares, and the holder, if not registered under Resolution No. 2,689, will be subject to less favorable Brazilian tax treatment than a holder of ADSs. In addition, if the foreign investor resides in a tax haven jurisdiction, the investor will be also subject to less favorable tax treatment. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities and Taxation Relating to Our ADSs and Common and Preferred Shares Brazilian Tax Considerations.

PifCo

There are:

no governmental laws, decrees or regulations in Cayman Islands that

Table of Contents

restrict the export or import of capital, including dividend and other payments to holders of notes who are not residents of the Cayman Islands, provided that such holders are not resident in countries subject to certain sanctions by the United Nations or the European Union; and

no limitations on the right of nonresident or foreign owners imposed by Cayman Island law or PifCo's Memorandum of Association to hold or vote PifCo's shares.

Taxation Relating to Our ADSs and Common and Preferred Shares

The following summary contains a description of material Brazilian and U.S. federal income tax considerations that may be relevant to the purchase, ownership and disposition of preferred or common shares or ADSs by a holder. This summary does not describe any tax consequences arising under the laws of any state, locality or taxing jurisdiction other than Brazil and the United States.

This summary is based upon the tax laws of Brazil and the United States as in effect on the date of this annual report, which are subject to change (possibly with retroactive effect). This summary is also based upon the representations of the depositary and on the assumption that the obligations in the deposit agreement and any related documents will be performed in accordance with their respective terms.

This description is not a comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors. **Prospective purchasers of common or preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of common or preferred shares or ADSs.**

There is no income tax treaty between the United States and Brazil. In recent years, the tax authorities of Brazil and the United States have held discussions that may culminate in such a treaty. We

cannot predict, however, whether or when a treaty will enter into force or how it will affect the U.S. holders of common or preferred shares or ADSs.

Brazilian Tax Considerations

General

The following discussion summarizes the material Brazilian tax consequences of the acquisition, ownership and disposition of preferred or common shares or ADSs, as the case may be, by a holder that is not domiciled in Brazil, also called a non-Brazilian holder, for purposes of Brazilian taxation and, in the case of a holder of preferred or common shares, which has registered its investment in preferred or common shares at the Central Bank of Brazil as a U.S. dollar investment.

Under Brazilian law, investors may invest in the preferred or common shares under Resolution No. 2,689 or under Law No. 4,131 of September 3, 1962. Investments under Resolution No. 2,689 afford favorable tax treatment to foreign investors who are not resident in a tax haven jurisdiction. The rules of Resolution No. 2,689 allow foreign investors to invest in almost all instruments and to engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are met. In accordance with Resolution No. 2,689, the definition of foreign investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Pursuant to this rule, foreign investors must: (i) appoint at least one representative in Brazil with powers to perform actions relating to the foreign investment; (ii) complete the appropriate foreign investor registration form; (iii) register as a foreign investor with the CVM; and (iv) register the foreign investment with the Central Bank of Brazil.

Securities and other financial assets held by foreign investors pursuant to Resolution No. 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank of Brazil or the CVM. In addition, securities trading is restricted to transactions carried out in the stock exchanges or organized over-the-counter markets licensed by the CVM.

Table of Contents

Taxation of Dividends

Dividends paid by us, including stock dividends and other dividends paid in property to the depositary in respect of the ADSs, or to a non-Brazilian holder in respect of the preferred or common shares, are currently not subject to withholding tax in Brazil.

We must pay to our shareholders (including holders of common or preferred shares or ADSs) interest on the amount of dividends payable to them, at the SELIC rate, from the end of each fiscal year through the date of effective payment of those dividends. These interest payments are considered as fixed-yield income and are subject to withholding income tax at varying rates depending on the length of period of interest accrual. The tax rate ranges from 15%, in case of interest accrued for a period greater than 720 days, to 22.5%, in case of interest accrued for a period up to 180 days. However, holders of ADSs and holders of common or preferred shares not resident or domiciled in tax haven jurisdictions investing under Resolution No. 2,689 are subject to such withholding tax at a reduced rate, currently at 15%. See *Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdictions*.

Taxation on Interest on Shareholders' Equity

Any payment of interest on shareholders' equity to holders of ADSs or preferred or common shares, whether or not they are Brazilian residents, is subject to Brazilian withholding income tax at the rate of 15% at the time we record such liability, whether or not the effective payment is made at that time. See *Memorandum and Articles of Incorporation of Petrobras - Payment of Dividends and Interest on Shareholders' Equity*. In the case of non-Brazilian residents that are resident in a tax haven jurisdiction, the applicable withholding income tax rate is 25%. See

Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdiction. The payment of interest at the SELIC rate that is applicable to payments of dividends applies equally to payments of interest on shareholders' equity. The determination of whether or not we will make distributions in the form of interest on shareholders' equity or in the form of dividends is made by our board of directors at the time distributions are to be made. We cannot determine how our board of directors will make

these determinations in connection with future distributions.

Taxation of Gains

For purposes of Brazilian taxation, there are two types of non-Brazilian holders of ADSs or preferred or common shares: (i) non-Brazilian holders that are not resident or domiciled in a tax haven jurisdiction, and that, in the case of holders of preferred or common shares, are registered before the Central Bank of Brazil and the CVM to invest in Brazil in accordance with Resolution No. 2,689; and (ii) other non-Brazilian holders, which include any and all non-residents of Brazil who invest in equity securities of Brazilian companies through any other means (including under Law No. 4,131 of 1962) and all types of investors that are located in tax haven jurisdictions. The investors identified in clause (i) above are subject to favorable tax treatment in Brazil, as described below. See *Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdictions*.

According to Law no. 10,833, dated December 29, 2003, capital gains realized on the disposition of tangible assets located in Brazil, by non-Brazilian residents, whether or not to other non-residents and whether made outside or within Brazil, are subject to taxation in Brazil at a rate of 15% (a rate of 25% is applicable if realized by investors resident in a tax haven jurisdiction, i.e. a country that does not impose any income tax or that imposes tax at a maximum rate of less than 20%). We understand the ADSs do not fall within the definition of tangible assets located in Brazil for the purposes of this law, but there is still no pronouncement from tax authorities nor judicial court rulings in this respect. Therefore, we are unable to predict whether such understanding will prevail in the courts of Brazil.

The deposit of preferred or common shares in exchange for ADSs may be subject to Brazilian capital gains at the rate of 15% if the amount previously registered with the Central Bank of Brazil as a foreign investment in the preferred or common shares is lower than:

the average price per preferred or common share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit; or

Table of Contents

if no preferred or common shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred or common shares were sold in the 15 trading sessions immediately preceding such deposit. In such a case, the difference between the amount previously registered and the average price of the preferred or common shares calculated as above, will be considered a capital gain. Investors registered under Resolution No. 2,689 and not located in a tax haven jurisdiction are exempt from this type of taxation. The withdrawal of ADSs in exchange for preferred or common shares is not subject to Brazilian tax. On receipt of the underlying preferred or common shares, the non-Brazilian holder registered under Resolution No. 2,689 will be entitled to register the U.S. dollar value of such shares with the Central Bank of Brazil as described below in Registered Capital.

Non-Brazilian holders are not subject to tax in Brazil on gains realized on sales of preferred or common shares that occur abroad to non-Brazilian holders.

Non-Brazilian holders which are not located in a tax haven jurisdiction are subject to income tax imposed at a rate of 15% on gains realized on sales or exchanges of the preferred or common shares that occur in Brazil or with a resident of Brazil, other than in connection with transactions on the Brazilian stock, future or commodities exchanges. With respect to proceeds of a redemption or of a liquidating distribution with respect to the preferred or common shares, the difference between the amount effectively received by the shareholder and the amount of foreign currency registered with the Central Bank of Brazil, accounted for in *reais* at the commercial market rate on the date of the redemption or liquidating distribution, will be also subject to income tax at a rate of 15% given that such transactions are treated as a sale or exchange not carried out on the Brazilian stock, future and commodities exchanges.

Gains realized arising from transactions on the Brazilian stock, future or commodities exchanges by an investor registered under Resolution No. 2,689 who is not located in a tax haven jurisdiction are exempt from Brazilian income tax. Otherwise, gains realized on transactions related to the Brazilian stock, future or commodities exchanges are subject to income tax at a rate of 20%.

Therefore, non-Brazilian holders are subject to income tax imposed at a rate of 20% on gains realized on sales or exchanges of preferred or common shares that occur on the stock exchange unless such a sale is made by a non-Brazilian holder who is not resident in a tax haven jurisdiction and:

such sale is made within five business days of the withdrawal of such preferred or common shares in exchange for ADSs and the proceeds thereof are remitted abroad within such five-day period; or

such sale is made under Resolution No. 2,689 by registered non-Brazilian holders who obtain registration with the CVM.

In these two cases, the transaction will not be subject to taxation in Brazil. The gain realized is for tax purposes the difference between the amount in *reais* realized on the sale or exchange and the acquisition cost measured in *reais*, without any adjustment to account for inflation of the shares sold. The gain realized as a result of a transaction that occurs other than on the stock exchange will be the positive difference between the amount realized on the sale or exchange and the acquisition cost of the preferred or common shares, both such values to be taken into account in *reais*. There are reasonable grounds, however, to hold that the gain realized should be calculated based on the foreign currency amount registered with the Central Bank of Brazil, such foreign currency amount to be translated into *reais* at the commercial market rate on the date of such sale or exchange.

Any exercise of preemptive rights relating to the preferred or common shares will not be subject to Brazilian taxation. Any gain on the sale or assignment of preemptive rights relating to the preferred or common shares by the depositary on

Table of Contents

behalf of holders of the ADSs will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of preferred or common shares, unless such sale or assignment is performed on the stock exchange by an investor under Resolution No. 2,689 who is not resident in a tax haven jurisdiction, in which case the gains are exempt from income tax.

There is no assurance that the current preferential treatment for holders of the ADSs and some non-Brazilian holders of the preferred or common shares under Resolution No. 2,689 will continue in the future.

Taxation of Foreign Exchange Transactions (IOF/Câmbio)

Under Law No. 8,894 of June 21, 1994, and Decree No. 6,306 of December 14, 2007, the conversion into Brazilian currency of proceeds received by a Brazilian entity from a foreign investment in the Brazilian securities market (including those in connection with an investment in preferred or common shares or the ADSs and those under Resolution No. 2, 689) and the conversion into foreign currency of proceeds received by a non-Brazilian holder is subject to a tax on exchange transactions known as IOF/Câmbio, which is currently applicable at a zero percent rate in most transactions made abroad. However, according to Law No. 8,894, the IOF/Câmbio rate may be increased at any time to a maximum of 25% by a decision of the Minister of Finance, but only in relation to exchange transactions carried out after the increase of the applicable rate.

Taxation on Bonds and Securities Transactions (IOF/Títulos)

Law No. 8,894 of June 21, 1994, and Decree No. 6,306 of December 14, 2007, created the Tax on Bonds and Securities Transactions, or IOF/Títulos, which may be imposed on any transactions involving bonds and securities carried out in Brazil, even if these transactions are performed on the Brazilian stock, futures or commodities exchange. As a general rule, the rate of this tax is currently zero but the Brazilian government may increase such rate up to 1.5% per day, but only in relation to transactions carried out after the increase of the applicable rate.

Other Brazilian Taxes

There are no Brazilian inheritance, gift or succession taxes applicable to the ownership, transfer or disposition of preferred or common shares or ADSs by a non-Brazilian holder, except for gift and inheritance taxes which are levied by some states of Brazil on gifts made or inheritances bestowed by individuals or entities not resident or domiciled in Brazil to individuals or entities resident or domiciled within such states in Brazil. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by holders of preferred or common shares or ADSs.

Beneficiaries Resident or Domiciled in Tax Havens or Low Tax Jurisdictions

Law No. 9,779 of January 1, 1999 states that, except for limited prescribed circumstances, income derived from transactions by a beneficiary, resident or domiciliary of a country considered a tax haven is subject to withholding income tax at the rate of 25%. Tax havens are generally considered to be countries which do not impose any income tax or which impose such tax at a maximum rate of less than 20%. Law No. 11,727 of June 23, 2008 expanded the list of characteristics that may classify a country as a tax haven. The Brazilian Revenue Service currently maintains a list of countries and jurisdictions considered to be tax havens and may amend this list to include other countries or jurisdictions due to this new law. Accordingly, if the distribution of interest attributed to shareholders equity is made to a beneficiary resident or domiciled in a tax haven jurisdiction, the applicable income tax rate will be 25% instead of 15%. Capital gains are not subject to this 25% tax, even if the beneficiary is resident in a tax haven jurisdiction. See Taxation of Gains.

Registered Capital

The amount of an investment in preferred or common shares held by a non-Brazilian holder who obtains registration under Resolution No. 2,689, or by the depositary representing such holder, is eligible for registration with the Central Bank of Brazil; such registration (the amount so registered being called registered capital) allows the remittance outside Brazil of foreign currency, converted at the commercial market rate, acquired with the proceeds of distributions on, and amounts realized with respect to dispositions of, such preferred or common shares. The registered

Table of Contents

capital for each preferred or common share purchased as part of the international offering or purchased in Brazil after the date hereof, and deposited with the depository will be equal to its purchase price (in U.S. dollars). The registered capital for a preferred or common share that is withdrawn upon surrender of an ADS will be the U.S. dollar equivalent of:

the average price of a preferred or common share on the Brazilian stock exchange on which the greatest number of such shares were sold on the day of withdrawal; or

if no preferred or common shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred or common shares were sold in the 15 trading sessions immediately preceding such withdrawal.

The U.S. dollar value of the average price of preferred or common shares is determined on the basis of the average of the U.S. dollar/*real* commercial market rates quoted by the Central Bank of Brazil information system on that date (or, if the average price of preferred or common shares is determined under the second option above, the average of such average quoted rates on the same 15 dates used to determine the average price of preferred or common shares).

A non-Brazilian holder of preferred or common shares may experience delays in effecting such registration, which may delay remittances abroad. Such a delay may adversely affect the amount, in U.S. dollars, received by the non-Brazilian holder. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities.

U.S. Federal Income Tax Considerations

This summary describes the principal tax consequences of the ownership and disposition of common or preferred shares or ADSs, based upon the U.S. Internal Revenue Code of 1986, as amended (the Code), its legislative history, existing and proposed U.S. Treasury regulations promulgated thereunder, published rulings by the U.S. Internal Revenue Service (the IRS), and court decisions, all in effect as of the date hereof, all of which authorities are subject to change or differing

interpretations, which changes or differing interpretations could apply retroactively. This summary does not purport to be a comprehensive description of all of the tax consequences that may be relevant to a decision to hold or dispose of common or preferred shares or ADSs. This summary applies only to purchasers of common or preferred shares or ADSs who hold the common or preferred shares or ADSs as capital assets (generally, property for investment), and does not apply to special classes of holders such as dealers in securities or currencies, holders whose functional currency is not the U.S. dollar, holders of 10% or more of our shares (taking into account shares held directly or through depository arrangements), tax-exempt organizations, financial institutions, holders liable for the alternative minimum tax, securities traders who elect to account for their investment in common or preferred shares or ADSs on a mark-to-market basis, and persons holding common or preferred shares or ADSs in a hedging transaction or as part of a straddle or conversion transaction.

EACH HOLDER SHOULD CONSULT SUCH HOLDER'S OWN TAX ADVISOR CONCERNING THE OVERALL TAX CONSEQUENCES TO IT, INCLUDING THE CONSEQUENCES UNDER LAWS OTHER THAN U.S. FEDERAL INCOME TAX LAWS, OF AN INVESTMENT IN COMMON OR PREFERRED SHARES OR ADSs.

Shares of our preferred stock will be treated as equity for U.S. federal income tax purposes. In general, a holder of an ADS will be treated as the holder of the shares of common or preferred stock represented by those ADSs for U.S. federal income tax purposes, and no gain or loss will be recognized if you exchange an ADS for the shares of

common or preferred stock represented by that ADS.

In this discussion, references to ADSs refer to ADSs with respect to both common and preferred shares, and references to a U.S. holder are to a holder of an ADS that is:

a citizen or resident of the United States;

a corporation organized under the laws of the United States or any state thereof; or

Table of Contents

otherwise subject to U.S. federal income taxation on a net basis with respect to the shares or the ADS.

Taxation of Distributions

A U.S. holder will recognize ordinary dividend income for U.S. federal income tax purposes in an amount equal to the amount of any cash and the value of any property we distribute as a dividend to the extent that such distribution is paid out of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes, when such distribution is received by the custodian, or by the U.S. holder in the case of a holder of common or preferred shares. The amount of any distribution will include the amount of Brazilian tax withheld on the amount distributed, and the amount of a distribution paid in *reais* will be measured by reference to the exchange rate for converting *reais* into U.S. dollars in effect on the date the distribution is received by the custodian, or by a U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares, does not convert such *reais* into U.S. dollars on the date it receives them, it is possible that the U.S. holder will recognize foreign currency loss or gain, which would be ordinary loss or gain, when the *reais* are converted into U.S. dollars. Dividends paid by us will not be eligible for the dividends received deduction allowed to corporations under the Code.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2011, with respect to the ADSs will be subject to taxation at a maximum rate of 15% if the dividends are qualified dividends. Dividends paid on the ADSs will be treated as qualified dividends if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) the Company was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid, a passive foreign investment company as defined for U.S. federal income tax purposes (PFIC). The ADSs are listed on the New York Stock Exchange, and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on the Company's audited financial statements and relevant market and shareholder

data, the Company believes that it was not treated as a PFIC for U.S. federal income tax purposes with respect to its 2007 or 2008 taxable years. In addition, based on the Company's audited financial statements and its current expectations regarding the value and nature of its assets, the sources and nature of its income, and relevant market and shareholder data, the Company does not anticipate becoming a PFIC for its 2009 taxable year. Based on existing guidance, it is not clear whether dividends received with respect to the shares will be treated as qualified dividends, because the shares are not themselves listed on a U.S. exchange. In addition, the U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of ADSs and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to treat dividends as qualified for tax reporting purposes. Because such procedures have not yet been issued, it is not clear whether the Company will be able to comply with the procedures.

Distributions out of earnings and profits with respect to the shares or ADSs generally will be treated as dividend income from sources outside of the United States and generally will be treated as passive category income for foreign tax credit purposes. Subject to certain limitations, Brazilian income tax withheld in connection with any distribution with respect to the shares or ADSs may be claimed as a credit against the U.S. federal income tax liability of a U.S. holder if such U.S. holder elects for that year to credit all foreign income taxes. Alternatively, such Brazilian withholding tax may be taken as a deduction against taxable income. Foreign tax credits may not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities or in respect of arrangements in which a U.S. holder's expected economic profit is insubstantial. U.S. holders should consult their own tax advisors concerning the implications of these rules in light of their particular circumstances.

Holders of ADSs that are foreign corporations or nonresident alien individuals (non-U.S. holders) generally will not be subject to U.S. federal income tax or withholding tax on distributions with respect to shares or ADSs that are treated as dividend income for U.S. federal income tax purposes unless such dividends are

Table of Contents

effectively connected with the conduct by the holder of a trade or business in the United States.

Holders of shares and ADSs should consult their own tax advisers regarding the availability of the reduced dividend tax rate in the light of the considerations discussed above and their own particular circumstances.

Taxation of Capital Gains

Upon the sale or other disposition of a share or an ADS, a U.S. holder will generally recognize gain or loss for U.S. federal income tax purposes. The amount of the gain or loss will be equal to the difference between the amount realized in consideration for the disposition of the share or the ADS and the U.S. holder's tax basis in the share or the ADS. Such gain or loss generally will be subject to U.S. federal income tax and will be treated as capital gain or loss. The net amount of long-term capital gain recognized by an individual holder before January 1, 2011 generally is subject to taxation at a maximum rate of 15%. Capital losses may be deducted from taxable income, subject to certain limitations.

A non-U.S. holder will not be subject to U.S. federal income tax or withholding tax on gain realized on the sale or other disposition of a share or an ADS unless:

such gain is effectively connected with the conduct by the holder of a trade or business in the United States; or

such holder is an individual who is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

Backup Withholding and Information Reporting

Dividends paid on, and proceeds from the sale or other disposition of, the ADSs or common or preferred shares to a U.S. holder generally may be subject to the information reporting requirements of the Code and may be subject to backup withholding unless the U.S. holder provides an accurate taxpayer identification number or otherwise establishes an exemption. The amount of any backup withholding collected from a payment to a U.S. holder will be allowed as a credit against the U.S. holder's U.S. federal

income tax liability and may entitle the U.S. holder to a refund, provided that certain required information is furnished to the Internal Revenue Service.

A non-U.S. holder generally will be exempt from these information reporting requirements and backup withholding tax, but may be required to comply with certain certification and identification procedures in order to establish its eligibility for such exemption.

Taxation Relating to PifCo's Notes

The following summary contains a description of material Cayman Islands, Brazilian and U.S. federal income tax considerations that may be relevant to the purchase, ownership, and disposition of PifCo's debt securities. This summary does not describe any tax consequences arising under the laws of any state, locality or taxing jurisdiction other than the Cayman Islands, Brazil and the United States.

This summary is based on the tax laws of the Cayman Islands, Brazil and the United States as in effect on the date of this annual report, which are subject to change (possibly with retroactive effect). This description is not a

comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors. **Prospective purchasers of notes should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of notes.**

There is no tax treaty to avoid double taxation between the Cayman Islands and the United States, the Cayman Islands and Brazil or Brazil and the United States. In recent years, the tax authorities of Brazil and the United States have held discussions that may culminate in such a treaty. We cannot predict, however, whether or when a treaty will enter into force or how it will affect the U.S. holders of notes.

Cayman Islands Taxation

Under current law, PifCo is not subject to income, capital, transfer, sales or other taxes in the Cayman Islands.

Table of Contents

PifCo was incorporated as an exempted company under the laws of the Cayman Islands on September 24, 1997. PifCo has received an Undertaking as to Tax Concessions pursuant to Section 6 of the Tax Concessions Law (1999 Revision) which provides that, for a period of twenty years from the date thereof no law hereafter enacted in the Cayman Islands imposing any tax or duty to be levied on income or on capital assets, gains or appreciation will apply to any of PifCo's income or property and which is deemed to provide that no tax is to be levied on profits, income, gains or appreciations or which is in the nature of estate duty or inheritance tax shall be payable or in respect of shares, debentures or other of PifCo's obligations, or by way of withholding of any part of a payment of principal due under a debenture or other of PifCo's obligations.

No Cayman Islands withholding tax applies to distributions by PifCo in respect of the notes. Noteholders are not subject to any income, capital, transfer, sales or other taxes in the Cayman Islands in respect of their purchase, holding or disposition of the notes.

Noteholders whose notes are brought into or issued in the Cayman Islands will be liable to pay stamp duty of up to C.I.\$250 on each note, unless stamp duty of C.I.\$500 has been paid in respect of the entire issue of notes (in which case no further stamp duty in respect of such notes is payable).

Brazilian Taxation

The following discussion is a summary of the Brazilian tax considerations relating to an investment in the notes by a non-resident of Brazil. The discussion is based on the tax laws of Brazil as in effect on the date hereof and is subject to any change in Brazilian law that may come into effect after such date. The information set forth below is intended to be a general discussion only and does not address all possible consequences relating to an investment in the notes.

INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISERS AS TO THE CONSEQUENCES OF PURCHASING THE NOTES, INCLUDING, WITHOUT LIMITATION, THE CONSEQUENCES OF THE RECEIPT OF INTEREST AND THE SALE, REDEMPTION OR REPAYMENT OF THE NOTES OR COUPONS.

Generally, an individual, entity, trust or organization domiciled for tax purposes outside

Brazil (a Non-resident) is taxed in Brazil only when income is derived from Brazilian sources. Therefore, any gains or income paid by PifCo in respect of the notes issued by it in favor of Non-resident noteholders are not subject to Brazilian taxes.

Interest (including original issuer discount, or OID, fees, commissions, expenses and any other income payable by a Brazilian resident to a non-resident) is generally subject to income tax withheld at source. Currently, the rate of withholding tax is 15% or such other lower rate as provided for in an applicable tax treaty between Brazil and another country. If the recipient of the payment is domiciled in a tax haven jurisdiction, as defined by Brazilian tax regulations, the rate will be 25%.

If the payments with respect to the notes are made by a Brazilian source, the noteholders will be indemnified so that, after payment of all applicable Brazilian taxes collectable by withholding, deduction or otherwise, with respect to principal, interest (including the OID) and additional amounts payable with respect to the notes (plus any interest and penalties thereon), a noteholder will retain an amount equal to the amounts that such noteholder would have retained had no such Brazilian taxes (plus interest and penalties thereon) been payable. The Brazilian obligor will, subject to certain exceptions, pay additional amounts in respect of such withholding or deduction so that the holder receives the net amount due.

According to Law no. 10,833, dated December 29, 2003, capital gains realized on the disposition of tangible assets located in Brazil, by non-Brazilian residents, whether or not to other non-residents and whether made outside or within Brazil, are subject to taxation in Brazil at a rate of 15% (a rate of 25% is applicable if realized by investors resident in a tax haven jurisdiction, i.e. a country that does not impose any income tax or that imposes tax at a maximum rate of less than 20%). We understand the notes do not fall within the definition of tangible assets located in Brazil for the purposes of this law, but there is still no pronouncement from tax authorities nor judicial court rulings in this respect. Therefore, we are unable to predict whether such understanding will prevail in the courts of Brazil.

Generally, there are no inheritance, gift, succession, stamp, or other similar taxes in Brazil

Table of Contents

with respect to the ownership, transfer, assignment or any other disposition of the notes by a Non-resident, except for gift and inheritance taxes imposed by some Brazilian states on gifts or bequests by individuals or entities not domiciled or residing in Brazil to individuals or entities not domiciled or residing within such states.

U.S. Federal Income Taxation

The following summary sets forth certain United States federal income tax considerations that may be relevant to a holder of a note that is, for U.S. federal income purposes, a citizen or resident of the United States or a domestic corporation or that otherwise is subject to U.S. federal income taxation on a net income basis in respect of the notes (a U.S. holder). This summary is based upon the Code, its legislative history, existing and proposed U.S. Treasury regulations promulgated thereunder, published rulings by the U.S. Internal Revenue Service, or the IRS, and court decisions, all in effect as of the date hereof, all of which authorities are subject to change or differing interpretations, which changes or differing interpretations could apply retroactively. This summary does not purport to discuss all aspects of the United States federal income taxation which may be relevant to special classes of investors, such as financial institutions, insurance companies, dealers or traders in securities or currencies, regulated investment companies, tax-exempt organizations, certain short-term holders of notes, persons that hedge their exposure in the notes or hold notes as part of a position in a straddle or as part of a hedging transaction or conversion transaction for U.S. federal tax purposes, persons that enter into a constructive sale transaction with respect to the notes or U.S. holder whose functional currency is not the U.S. dollar. U.S. holders should be aware that the U.S. federal income tax consequences of holding the notes may be materially different for investors described in the prior sentence.

In addition, this summary does not discuss any foreign, state or local tax considerations. This summary only applies to original purchasers of notes who purchase notes at the original issue price and hold the notes as capital assets (generally, property held for investment) within the meaning of Section 1221 of the Code.

EACH HOLDER SHOULD CONSULT SUCH HOLDER'S OWN TAX ADVISOR CONCERNING THE OVERALL TAX CONSEQUENCES TO IT, INCLUDING THE CONSEQUENCES UNDER LAWS OTHER THAN U.S. FEDERAL INCOME TAX LAWS, OF AN INVESTMENT IN THE NOTES.

Payments of Interest

Payments of qualified stated interest (as defined below) on a note (including additional amounts, if any) generally will be taxable to a U.S. holder as ordinary interest income when such interest is accrued or received, in accordance with the U.S. holder's regular method of tax accounting. In general, if the issue price of a note is less than the stated redemption price at maturity by more than a *de minimis* amount, such note will be considered to have original issue discount (OID). The issue price of a note is the first price at which a substantial amount of such notes are sold to investors. The stated redemption price at maturity of a note generally includes all payments other than payments of qualified stated interest.

In general, each U.S. holder of a note, whether such holder uses the cash or the accrual method of tax accounting, will be required to include in gross income as ordinary interest income the sum of the daily portions of OID on the note for all days during the taxable year that the U.S. holder owns the note. The daily portions of OID on a note are determined by allocating to each day in any accrual period a ratable portion of the OID allocable to that accrual period. In general, in the case of an initial holder, the amount of OID on a note allocable to each accrual period is determined by (i) multiplying the adjusted issue price, as defined below, of the note at the beginning of the accrual period by the yield to maturity of the note, and (ii) subtracting from that product the amount of qualified stated interest allocable to that accrual period. U.S. holders should be aware that they generally must include OID in gross income as ordinary

interest income for U.S. federal income tax purposes as it accrues, in advance of the receipt of cash attributable to that income. The adjusted issue price of a note at the beginning of any accrual period will generally be the sum of its issue price (generally including accrued interest, if any) and the amount of OID allocable to all prior accrual periods, reduced by the amount of all payments other than payments of qualified stated

Table of Contents

interest (if any) made with respect to such note in all prior accrual periods. The term "qualified stated interest" generally means stated interest that is unconditionally payable in cash or property (other than debt instruments of the issuer) at least annually during the entire term of a note at a single fixed rate of interest, or subject to certain conditions, based on one or more interest indices.

Interest income, including OID, in respect of the notes will constitute foreign source income for U.S. federal income tax purposes and, with certain exceptions, will be treated separately, together with other items of "passive category" income, for purposes of computing the foreign tax credit allowable under the U.S. federal income tax laws. The calculation of foreign tax credits, involves the application of complex rules that depend on a U.S. holder's particular circumstances. U.S. holders should consult their own tax advisors regarding the availability of foreign tax credits and the treatment of additional amounts.

Sale or Disposition of Notes

A U.S. holder generally will recognize capital gain or loss upon the sale, exchange, retirement or other disposition of a note in an amount equal to the difference between the amount realized upon such sale, exchange, retirement or other disposition (other than amounts attributable to accrued qualified stated interest, which will be taxed as such) and such U.S. holder's adjusted tax basis in the note. A U.S. holder's adjusted tax basis in the note generally will equal the U.S. holder's cost for the note increased by any amounts included in gross income by such U.S. holder as OID and reduced by any payments other than payments of qualified stated interest on that note. Gain or loss realized by a U.S. Holder on the sale, exchange, retirement or other disposition of a note generally will be U.S. source gain or loss for U.S. federal income tax purposes unless it is attributable to an office or other fixed place of business outside the United States and certain other conditions are met. The gain or loss realized by a U.S. holder will be capital gain or loss, and will be long-term capital gain or loss if the notes were held for more than one year. The net amount of long-term capital gain recognized by an individual holder before January 1, 2011 generally is subject to taxation at a maximum rate

of 15%. Capital losses may be deducted from taxable income, subject to certain limitations.

Backup Withholding and Information Reporting

A U.S. holder may, under certain circumstances, be subject to "backup withholding" with respect to certain payments to that U.S. holder, unless the holder (i) is a corporation or comes within certain other exempt categories, and demonstrates this fact when so required, or (ii) provides a correct taxpayer identification number, certifies that it is not subject to backup withholding and otherwise complies with applicable requirements of the backup withholding rules. Any amount withheld under these rules generally will be creditable against the U.S. holder's U.S. federal income tax liability. While non-U.S. holders generally are except from backup withholding, a non-U.S. holder may, in certain circumstances, be required to comply with certain information and identification procedures in order to prove entitlement to this exemption.

Non-U.S. Holder

A holder or beneficial owner of a note that is not a U.S. holder (a "non-U.S. holder") generally will not be subject to U.S. federal income or withholding tax on interest received on the notes. In addition, a non-U.S. holder will not be subject to U.S. federal income or withholding tax on gain realized on the sale of notes unless, in the case of gain realized by an individual non-U.S. holder, the non-U.S. holder is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

Documents on Display

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, and accordingly file reports and other information with the SEC. Reports and other information filed by us with the SEC may be inspected and copied at the public reference facilities maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549. You can obtain further information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. You may also inspect Petrobras reports and other information at the offices of the New York Stock Exchange, 11 Wall Street,

For further information on obtaining copies of Petrobras public filings at the New York Stock Exchange, you should call (212) 656-5060.

We also file financial statements and other periodic reports with the CVM.

Item 11. Qualitative and Quantitative Disclosures about Market Risk

Petrobras

Risk Management

We are exposed to a number of market and credit risks arising from our normal business activities. Market risk is the possibility that changes in interest rates, currency exchange rates or commodity prices will adversely affect the value of our financial assets, liabilities or expected future cash flows. Credit risk is the failure of a counterparty to perform a payment obligation under a commercial contract or a derivative contract.

We use derivative instruments to address market risks related to commodity prices, interest rates and currency exchange rates. Such derivative instruments are used only to offset market exposures, and are not used for trading purposes. Our executive officers manage market risk. We address credit risk by following rigid rules,

overseen by a Credit Committee, to evaluate counterparties and define proper guarantees.

We have a Risk Management Committee that evaluates our risk exposures and establishes guidelines that we use to measure, monitor, and manage risk related to our activities. The Risk Management Committee is comprised of members of all our business areas.

Commodity Price Risk

Our sales of crude oil and oil products are related to international prices, which exposes us to price fluctuations in international markets.

We enter into derivative transactions, primarily energy futures contracts, forwards, swaps, and options, in order to mitigate some of the impact of such fluctuations. Our derivatives contracts provide economic hedges for anticipated crude oil and byproducts purchases and sales in the international markets, generally forecast to occur within a 30- to 360-day period. Our exposure on these contracts is limited to the difference between contract value and market value on the volumes hedged.

The open positions on the futures market, compared to spot market value, resulted in recognized losses of U.S.\$28.7 million in 2008, U.S.\$24.7 million in 2007 and U.S.\$1.6 million in 2006. See Note 20 to our audited consolidated financial statements for more information about our commodity derivative transactions.

The following table sets forth a sensitivity analysis demonstrating the net change in fair value of a 10% adverse change in the price of the underlying commodity as of December 31, 2008, which is a 10% increase in the price of the underlying commodity for options, futures and swaps.

Outstanding as of December 2008	Petrobras		PifCo		Quantity (mdbl)	Total Fair Value(1) (U.S.\$ million)	+10% Sensitivity (U.S.\$ million)

Table of Contents

- (1) Fair value represents an estimate of gain or loss that would be realized if contracts were settled at the balance sheet date.

Interest Rate and Exchange Rate Risk

The interest rate risk to which we are exposed is a function of our long-term debt and, to a lesser extent, our short-term debt. Our long-term debt consists principally of notes and borrowings incurred primarily in connection with capital expenditures and investments in exploration and development projects and loans to affiliated companies. Our short-term debt consists principally of U.S. dollar denominated import and export financing and working capital borrowings from commercial banks. In general, our foreign currency floating rate debt is principally subject to fluctuations in LIBOR. Our floating rate debt denominated in *reais* is principally subject to fluctuations in the *Certificado de Depósito Interbancário* (Interbank Deposit Certificate, or

CDI) and in the *Taxa de Juros de Longo Prazo* (Brazilian long-term interest rate, or TJLP), as fixed by the National Monetary Council.

We do not currently utilize derivative instruments to manage our exposure to interest rate fluctuation. We have been considering various forms of derivatives to reduce our exposure to interest rate fluctuations and may utilize these financial instruments in the future.

The exchange rate risk to which we are exposed is limited to the balance sheet and derives principally from the incidence of non-*real* denominated obligations in our debt portfolio. See Item 5. Operating and Financial Review and Prospects Inflation and Exchange Rate Variation.

The table below provides summary information regarding our exposure to interest rate and exchange rate risk in our total debt portfolio for 2008 and 2007. Total debt portfolio includes long-term debt, capital leases, project financings, and current portions thereof, and short-term debt.

	Total Debt Portfolio

Total debt obligations	5,961	3,059	5,003	2,306	1,795	9,227	27,351	26,188

Our foreign currency risk management strategy includes the use of derivative instruments to protect against foreign exchange rate volatility, which may impact the value of certain of our obligations.

PifCo

PifCo faces market risks in the normal course of business, including interest rate risk, risk related to changes in oil and oil products prices, and risk related to changes in foreign exchange rates. PifCo makes limited use of derivatives to manage its exposure to these market risks. PifCo does not hold derivative instruments for trading purposes.

Commodity Price Risk

PifCo enters into derivative transactions in order to mitigate the impact of fluctuations in the price of crude oil and byproducts. PifCo uses futures contracts, swaps and options to protect its margins in anticipation of purchases and sales in the international markets, as shown in the sensitivity analysis above.

Interest Rate and Exchange Rate Risk

PifCo is not subject to material foreign exchange rate risk because 94% of its debt is U.S. dollar denominated. PifCo does not enter into derivative contracts or make other arrangements to hedge against interest rate risk.

Table of Contents

The table below sets forth the amounts and related weighted average annual interest rates by expected maturity dates for PifCo's long-term debt obligations at December 31, 2008:

Debt Obligations	2010	2011	2012	2013	2014	2015-2018	Total	Fair Value as of December 31, 2008

Floating rate debt	0 %	0.0 %
Total debt portfolio	100.0 %	100.0 %

At December 31, 2008, the short-term portion of PifCo's long-term debt obligations, consisting of long-term lines of credit and loans from financing institutions, was U.S.\$143 million. The weighted average annual interest rate on this

short-term portion was 3.59% at December 31, 2008 compared to 5.59% at December 31, 2007. At December 31, 2008, PifCo had no short-term lines of credit or loans from financing institutions outstanding.

The table below sets forth the value of PifCo's cross currency swap, in which it swaps principal and interest payments on Yen denominated funding into U.S. dollar amounts. The change in fair value indicates that the hedging instrument is highly effective.

Cross Currency Swaps Maturing in 2016	Interest Rate (%)	Notional Amount (Japanese Yen million)	Fair Value	
			December 31, 2008	December 31, 2007
Fixed to fixed		35,000	47	3
Average pay rate (U.S.\$)	5.69			
Average receive rate (Japanese Yen)	2.15			
Total cross currency swaps		35,000	47	3

Item 15. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Both PifCo and we have evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of December 31, 2008. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of December 31, 2008 were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

The managements of Petróleo Brasileiro S.A. PETROBRAS and Petrobras International Finance Company PifCo (each, a Company) are responsible for establishing and maintaining

effective internal control over financial reporting and for their assessments of the effectiveness of internal control over financial reporting.

Each Company's internal control over financial reporting is a process designed by, or under the supervision of Petrobras' Audit Committee and each of the Company's Chief Executive Officer, Chief Financial Officer and effected by each Company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Each Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with accounting principles generally accepted in the United States, and that receipts

and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to consolidated financial statements preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Each of the Company's management assessed the effectiveness of each Company's internal control over financial reporting as of December 31, 2008, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of

Table of Contents

Sponsoring Organizations of the Treadway Commission (COSO). Based on that assessment, each of the Company's management has concluded that as of December 31, 2008, each Company's internal control over financial reporting is effective.

The effectiveness of each of the Company's internal control over financial reporting as of December 31, 2008, has been audited by KPMG Auditores Independentes, an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Controls

The management of each Company identified no change in its internal control over financial reporting during the fiscal year ended December 31, 2008, that has materially affected or is reasonably likely to materially affect its internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

On June 17, 2005, our board of directors approved the appointment of an audit committee for purposes of the Sarbanes-Oxley Act of 2002. Our

board of directors has determined that Fabio Colletti Barbosa is the audit committee financial expert, and he is independent, as defined in 17 CFR 240.10A-3.

PifCo's board of directors currently serves as its audit committee for purposes of the Sarbanes-Oxley Act of 2002. PifCo's board of directors has determined that Marcos Antonio Silva Menezes is an audit committee financial expert within the meaning of this Item 16A. Mr. Menezes is not independent as defined in 17 CFR 240.10A-3.

Item 16B. Code of Ethics

We have adopted a Code of Ethics applicable to our employees and executive officers and a Code of Good Practices applicable to our directors and executive officers, both of which are also applicable to PifCo. In 2006, we revised and updated our Code of Ethics. No waivers of the provisions of the Code of Ethics or Code of Good Practices are permitted. Both documents are available on our website: www.petrobras.com.br/investor_relations/corporate_governance. In 2008, Petrobras' board of directors created an Ethics Commission to promote ethical behavior and act as a forum for discussion of subjects related to ethics.

Table of Contents**Item 16C. Principal Accountant Fees and Services****Audit and Non-Audit Fees***Petrobras*

The following table sets forth the fees billed to us by our independent auditors, KPMG Auditores Independentes, during the fiscal years ended December 31, 2008 and 2007:

	Year Ended December 31,	
	2008	2007
	(thousand reais)	
Audit fees	23,673	23,328
Audit-related fees	287	2,136
Tax fees	859	603
Total fees	24,819	26,067

Audit fees in the above table are the aggregate fees billed by KPMG Auditores Independentes in connection with the audit of our annual financial statements (U.S. GAAP and Brazilian GAAP), interim reviews (U.S. GAAP and Brazilian GAAP), subsidiary audits (U.S. GAAP and Brazilian GAAP, among others) and review of periodic documents filed with the SEC. In 2008, audit fees include the aggregate fees billed by KPMG Auditores Independentes, in the amount of R\$2,750 thousand, related to the audit of the internal controls. Audit-related fees in the above

table are the aggregate fees billed by KPMG Auditores Independentes for assurance and related services that are reasonably related to the performance of the audit or reviews of our financial statements and are not reported under audit fees.

Tax fees in the above table are fees billed by KPMG Auditores Independentes for services related to tax compliance reviews of the annual federal tax return and procedures with respect to income and sales taxes.

PifCo

The following table sets forth the fees billed to PifCo by its independent auditors KPMG Auditores Independentes, during the fiscal years ended December 31, 2008 and 2007:

	Year Ended December 31,	
	2008	2007
	(thousand reais)	
Audit fees	966	764
Audit-related fees	67	29
Table of Contents		285

Total fees	1,033	793
------------	-------	-----

Audit fees are the aggregate fees billed by KPMG Auditores Independentes in connection with the audit of PifCo's annual financial statements (U.S. GAAP and Brazilian GAAP), interim reviews (U.S. GAAP and Brazilian GAAP), subsidiary audits (U.S. GAAP and local GAAP) and review of periodic documents filed with the SEC. Fees disclosed under the category "audit-related fees" relate to services provided in connection with the issuance of PifCo's notes in the international capital markets and its exports prepayment program, and assurance and related services that are reasonably related to the performance of the audit or reviews of PifCo's financial statements and are not reported under "audit fees."

Audit Committee Approval Policies and Procedures

Our audit committee has the authority to recommend pre-approval policies and procedures to our board of directors for the engagement of our or PifCo's independent auditor for services. At present, our board of directors has decided not to establish such pre-approval policies and procedures. Our board of directors expressly approves on a case-by-case basis any engagement of our independent auditors for all services provided to our subsidiaries or to us. Our bylaws prohibit our independent auditor from providing any consulting services to our subsidiaries or to us during the term of such auditor's contract.

Table of Contents

Item 16D. Exemptions from the Listing Standards for Audit Committees

Under the listed company audit committee rules of the NYSE and the SEC, we must comply with Exchange Act Rule 10A-3, which requires that we establish an audit committee composed of members of the board of directors that meets specified requirements. In reliance on the exemption in Rule 10A-3(b)(iv)(E), we have designated one member to our audit committee, Francisco Roberto de Albuquerque, who is a designee of the Brazilian government, which is one of our affiliates. In our assessment, each of these members acts independently in performing the responsibilities of an audit committee member under the Sarbanes-Oxley Act and satisfy the other requirements of Exchange Act Rule 10A-3.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Petrobras

During the fiscal year ended December 31, 2008, neither any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act, nor we have purchased any of our equity securities.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

Comparison of Petrobras Corporate Governance Practices with NYSE Corporate Governance Requirements Applicable to U.S. Companies

Under the rules of the New York Stock Exchange, foreign private issuers are subject to a more limited set of corporate governance requirements than U.S. domestic issuers. As a foreign private issuer, we must comply with four principal NYSE corporate governance rules: (i) we must satisfy the requirements of Exchange Act Rule 10A-3; (ii) our Chief Executive Officer must promptly notify the NYSE in writing after any executive officer becomes aware of any material non-compliance with the applicable NYSE corporate governance rules; (iii) we must provide the NYSE with annual and interim written affirmations as required under the NYSE corporate governance rules; and (iv) we must provide a brief description of any significant differences between its corporate governance practices and those followed by U.S. companies under NYSE listing standards.

Table of Contents

The table below briefly describes the significant differences between our domestic practices and the NYSE corporate governance rules.

Section	New York Stock Exchange Corporate Governance Rules for U.S. Domestic Issuers Director Independence	Petrobras Practices
303A.01	Listed companies must have a majority of independent directors. Controlled companies are not required to comply with this requirement.	Petrobras is a controlled company because more than a majority of its voting power is controlled by the Brazilian Federal Government. As a controlled company, Petrobras would not be required to comply with the majority of independent directors requirement if it were a U.S. domestic issuer. There is no legal provision or policy that requires us to have independent directors.
303A.03	The non-management directors of each listed company must meet at regularly scheduled executive sessions without management.	With the exception of the CEO of the company (who is also a director), all of Petrobras directors are non-management directors. These non-management directors do not meet at regularly scheduled executive sessions without the presence of the CEO.

Nominating/Corporate Governance Committee

303A.04

Listed companies must have a nominating/corporate governance committee composed entirely of independent directors, with a written charter that covers certain minimum specified duties.

Controlled companies are not required to comply with this requirement.

Petrobras does not have a nominating committee. Petrobras also does not have a corporate governance committee composed of directors.

Instead, the entire board of directors develops, evaluates and approves corporate governance principles with the assistance of an advisory corporate governance commission not composed of directors. As a controlled company, Petrobras would not be required to comply with the nominating/corporate governance committee requirement if it were a U.S. domestic issuer.

Compensation Committee

303A.05

Listed companies must have a compensation committee composed entirely of independent directors, with a written charter that covers certain minimum specified duties.

Petrobras has a committee that advises the board of directors with respect to compensation and management succession. There is no legal provision or policy that requires the members of this committee to be independent.

Controlled companies are not required to comply with this requirement

As a controlled company, Petrobras would not be required to comply with the compensation committee requirement if it were a U.S. domestic issuer.

Audit Committee

303A.06

303A.07

Listed companies must have an audit committee with a minimum of three independent directors that satisfy the independence requirements of Rule 10A-3 under the Exchange Act, with a written charter that covers certain minimum specified duties.

Petrobras Audit Committee is an advisory committee to the board of directors. It is currently composed of two independent members according to Rule 10A-3 under the Exchange Act, and both members of the Audit Committee are also members of our board of directors. The Audit Committee has a written charter that sets forth its responsibilities that include, among other things: (i) strengthening ties with the external auditors, permitting closer supervision of their work and of issues regarding their competency and independence, (ii) assuring legal and regulatory compliance, including with regard to certification, internal controls, compliance procedures and ethics, and (iii) monitoring the financial position of the company, especially as to risks, internal auditing work and financial disclosure.

Table of Contents

Section	New York Stock Exchange Corporate Governance Rules for U.S. Domestic Issuers	Petrobras Practices
	Equity Compensation Plans	
303A.08	Shareholders must have the opportunity to vote for compensation plans through shares and material reviews, with limited exceptions as set forth by the NYSE's rules.	Under the Brazilian Corporate Law, shareholder approval is required for the adoption and revision of any equity compensation plans. Petrobras does not currently have any equity compensation plans.
	Corporate Governance Guidelines	
303A.09	Listed companies must adopt and disclose corporate governance guidelines.	Petrobras has a set of Corporate Governance Guidelines (<i>Diretrizes de Governança Corporativa</i>) that address director qualification standards, responsibilities, compensation, orientation, self-appraisals and access to management. The guidelines do not reflect the independence requirements set forth in Sections 303A.01 and .02 of the NYSE rules. Certain portions of the guidelines, including the responsibilities and compensation sections, are not discussed with the same level of detail set forth in the commentaries to the NYSE rules. The guidelines are available on Petrobras' website.
	Code of Ethics for Directors, Officers and Employees	
303A.10	Listed companies must adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers.	Petrobras has adopted a Code of Ethics (<i>Código de Ética</i>) applicable to its employees and a Code of Good Practices (<i>Código de Boas Práticas</i>) applicable to directors and executive officers. No waivers of the provisions of the Code of Ethics or Code of Good Practices are permitted. Both documents are available on Petrobras' website.
	Certification Requirements	
303A.12	Each listed company CEO must certify to the NYSE each year that he or she is not aware of any violation by the company of NYSE corporate governance listing standards.	Our CEO will promptly notify the NYSE in writing if any executive officer becomes aware of any material noncompliance with any applicable provisions of the NYSE corporate governance rules.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
Petróleo Brasileiro S.A. - Petrobras

We have audited the accompanying consolidated balance sheets of Petróleo Brasileiro S.A. - Petrobras and subsidiaries (the Company) as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in shareholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2008. We also have audited the Company's internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements, and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statements presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Petróleo Brasileiro S.A. - Petrobras and subsidiaries as of December 31, 2008 and 2007, and the

results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, Petróleo Brasileiro S.A. - Petrobras and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in COSO.

Table of Contents

PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Expressed in Millions of United States Dollars
(except when specifically indicated)

1. The Company and its Operations

Petróleo Brasileiro S.A. - Petrobras is Brazil's national oil company and, directly or through its subsidiaries (collectively, Petrobras or the Company), is engaged in the exploration, exploitation and production of oil from reservoir wells, shale and other rocks, and in the refining, processing, trade and transport of oil and oil products, natural gas and other fluid hydrocarbons, in addition to other energy related activities. Additionally, Petrobras may promote the research, development, production, transport, distribution and marketing of all sectors of energy, as well as other related or similar activities.

2. Summary of Significant Accounting Policies

In preparing these consolidated financial statements, the Company has followed accounting policies that are in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The preparation of these financial statements requires the use of estimates and assumptions that affect the assets, liabilities, revenues and expenses reported in the financial statements, as well as amounts included in the notes thereto.

Estimates adopted by management include: oil and gas reserves, pension and health care liabilities, depreciation, depletion and amortization, abandonment costs, contingencies and income taxes. While the Company uses its best estimates and judgments, actual results could differ from those estimates as future confirming events occur.

Certain prior years amounts have been reclassified to conform to current year presentation standards. These reclassifications are not significant to the consolidated financial statements and had no impact on the Company's net income.

(a) Basis of financial statements preparation

The accompanying consolidated financial statements of Petróleo Brasileiro S.A. - Petrobras (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC). U.S. GAAP differs in certain respects from Brazilian accounting practice as applied by Petrobras in its statutory financial statements prepared in accordance with Brazilian Corporate Law and regulations promulgated by the Brazilian Securities and Exchange Commission (CVM).

The U.S. dollar amounts for the years presented have been translated from the Brazilian Real amounts in accordance with Statement of Financial Accounting Standards SFAS No. 52 - Foreign Currency Translation (SFAS 52) as applicable to entities operating in non-hyperinflationary economies. Transactions occurring in foreign currencies are first remeasured to the Brazilian Real and then translated to the U.S. dollar, with remeasurement gains and losses being recognized in the statements of income. While Petrobras has selected the U.S. Dollar as its reporting currency, the functional currency of Petrobras and all Brazilian subsidiaries is the Brazilian Real. The functional currency of Petrobras International Finance Company - PifCo and some subsidiaries and certain of the special purpose companies that operate in the international economic environment is the U.S. dollar, and the functional currency of Petrobras Energía Participaciones S.A. - PEPSA is the Argentine Peso.

The Company has translated all assets and liabilities into U.S. dollars at the current exchange rate (R\$2.337 and R\$ R\$1.771 to US\$1.00 at December 31, 2008 and 2007, respectively), and all accounts in the statements of income and cash flows (including amounts relative to local currency indexation and exchange variances on assets and liabilities denominated in foreign currency) at the average rates prevailing during the year. The net translation loss in the amount of US\$20,001 in 2008 (net translation gain in 2007 - US\$10,357 and in 2006 -

- (1) At December 31, 2008, the Company had amounts invested in the Petrobras Group's Non-Standardized Credit Rights Investment Fund (Fundo de Investimento em Direitos Creditórios não-padronizados do Sistema Petrobras - FIDC-NP). This investment fund is predominantly intended for acquiring credit rights, performed and/or non-performed, in the Petrobras System companies, and aims to optimize the Company's cash management.

(c) Cash and cash equivalents

Cash and cash equivalents consist of highly liquid investments that are readily convertible into cash and have an original maturity of three months or less at date of acquisition.

(d) Marketable securities

Marketable securities have been classified by the Company as available-for-sale, held-to-maturity or trading based upon intended strategies with respect to such securities.

Trading securities are marked-to-market through current period earnings, available-for-sale securities are marked-to-market through other comprehensive income, and held-to-maturity securities are recorded at amortized cost.

There were no material transfers between categories.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

2. Summary of Significant Accounting Policies (Continued)

(e) Inventories

Inventories are stated as follows:

Raw material comprises mainly the stocks of petroleum, which are stated at the average value of the importing and production costs, adjusted, when applicable, to their realization value;

Oil products and fuel alcohol are stated, respectively, at average refining and purchase cost, adjusted when applicable to their realizable value;

Materials and supplies are stated at average purchase cost, not exceeding replacement value and imports in transit are stated at identified cost.

(f) Investments in non-consolidated companies

The Company uses the equity method of accounting for all long-term investments for which it owns between 20% and 50% of the investee's outstanding voting stock or has the ability to exercise significant influence over operating and financial policies of the investee without controlling it. The equity method requires periodic adjustments to the investment account to recognize the Company's proportionate share in the investee's results, reduced by receipt of investee's dividends.

(g) Property, plant and equipment

Costs incurred in oil and gas producing activities

The costs incurred in connection with the exploration, development and production of oil and gas are recorded in accordance with the successful efforts method. This method requires that costs the Company incurs in connection with the drilling of developmental wells and facilities in proved reserve production areas and successful exploratory wells be capitalized. In addition, costs the Company incurs in connection with geological and geophysical activities are charged to the statements of income in the year incurred, and the costs relating to exploratory dry wells on unproved reserve properties are charged to the statements of income when determined as dry or uneconomical.

Capitalized costs

The capitalized costs are depreciated based on the unit-of-production method using proved developed reserves. These reserves are estimated by the Company's geologists and petroleum engineers in accordance with SEC standards and are reviewed annually, or more frequently when there are indications of significant changes.

Property acquisition costs

Costs of acquiring developed or undeveloped leaseholds including lease bonus, brokerage, and other fees are capitalized. The costs of undeveloped properties that become productive are transferred to a producing property account.

Exploratory costs

Exploratory wells that find oil and gas in an area requiring a major capital expenditure before production begins are evaluated annually to assure that commercial quantities of reserves have been found or that additional exploration work is underway or planned. Exploratory costs related to areas where commercial

(except when specifically indicated)

2. Summary of Significant Accounting Policies (Continued)

(g) Property, plant and equipment (Continued)

quantities have been found are capitalized, and exploratory costs where additional work is underway or planned continue to be capitalized pending final evaluation. Exploratory well costs not meeting either of these tests are charged to expense. All other exploratory costs (including geological and geophysical costs) are expensed as incurred. Exploratory dry holes are expensed.

Development costs

Costs of development wells including wells, platforms, well equipment and attendant production facilities are capitalized.

Production costs

Costs incurred with producing wells are recorded as inventories and are expensed when the products are sold.

Abandonment costs

The Company makes its annual reviews and revision of its estimated costs associated with well abandonment and the demobilization of oil and gas production areas, considering new information about date of expected abandonment and revised cost estimates to abandon. The changes in estimated asset retirement obligation are principally related to the commercial declaration of new fields, certain changes in cost estimates, and revisions to abandonment information provided for non-operated joint ventures.

Depreciation, depletion and amortization

Depreciation, depletion and amortization of leasehold costs of producing properties are recorded using the unit-of-production method applied on a field by field basis as a ratio of proved developed reserves. Production platform under capital lease which is not tied to the respective wells, are depreciated on a straight-line basis over the estimated useful lives of the platforms. Depreciation, depletion and amortization of all other capitalized costs (both tangible and intangible) of proved oil and gas producing properties is recorded using the unit-of-production method applied on a field by field basis as a ratio of proved developed reserves produced. The straight-line method is used for assets with a useful life shorted than the life of the field.

Other plant and equipment are depreciated on a straight-line basis over the following estimated useful lives:

Building and improvements	25-40 years
Equipment and other assets	3-30 years

Platforms	15-25 years
Pipelines	30 years

Impairment

In accordance with SFAS No. 144 - Impairment of Long-Lived Assets (SFAS 144), management reviews long-lived assets, primarily property, plant and equipment to be used in the business and capitalized costs relating to oil and gas producing activities, whenever events or changes in circumstances indicate that the carrying value of an asset or group of assets may not be recoverable on the bases of undiscounted future cash flows. The reviews are carried out at the lowest level of assets to which the Company is able to attribute identifiable future cash flows. The net book value of the underlying assets is adjusted to their fair value using a discounted future cash flows model, if the sum of the expected undiscounted future cash flows is less than the book value.

F-16

PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

2. Summary of Significant Accounting Policies (Continued)

(g) Property, plant and equipment (Continued)

Maintenance and repairs

The actual costs of major maintenance, including turnarounds at refineries and vessels, as well as other expenditures for maintenance and repairs, are expensed as incurred.

Capitalized interest

Interest is capitalized in accordance with SFAS No. 34 - Capitalization of Interest Cost (SFAS 34). Interest is capitalized on specific projects when a construction process involves considerable time and involves major capital expenditures. Capitalized interest is allocated to property, plant and equipment and amortized over the estimated useful lives or unit-of-production method of the related assets. Interest is capitalized at the Company's weighted average cost of borrowings.

(h) Revenues, costs and expenses

Revenue from sales of crude oil and oil products, petrochemical products, natural gas and other related products is recognized when title passes to the customer, because at that time the amount can be reasonably measured, collectibility is reasonably assured, persuasive evidence of an arrangement exists, the seller's price to the buyer is fixed or determinable and the significant risks and rewards of ownership have been transferred. Title is transferred to the customer when delivery occurs pursuant to the terms of the sales contracts. Revenues from the production of natural gas properties in which Petrobras has an interest with other producers are recognized based on the actual volumes sold during the period. Subsequent adjustments to revenues based on production sharing agreements or volumetric delivery differences are not significant. Costs and expenses are accounted for on an accrual basis.

(i) Income taxes

The Company accounts for income taxes in accordance with SFAS No. 109 - Accounting for Income Taxes (SFAS 109), which requires an asset and liability approach to recording current and deferred taxes. The effects of differences between the tax bases of assets and liabilities and the amounts recognized in the financial statements have been treated as temporary differences for the purpose of recording deferred income taxes.

The Company records the tax benefit of all net operating losses as a deferred tax asset and recognizes a valuation allowance for any part of this benefit which management believes will not be recovered against future taxable income using a more likely than not criterion.

The Company adopted FASB Interpretation 48, Accounting for Uncertainty in Income Taxes an Interpretation of Statement of Financial Accounting Standard No. 109 (FIN 48) on January 1, 2007 and the Company recognizes the

effect of an income tax position only if that position is more likely than not of being sustained upon examination, based on technical merits of the position. A recognized income tax position is measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interests and penalties related to unrecognized tax benefits in Other operating expenses .

2. Summary of Significant Accounting Policies (Continued)

(j) Employees postretirement benefits

The Company sponsors a contributory defined-benefit pension plan covering substantially all of its employees, which is accounted for by the Company in accordance with SFAS No. 87 - Employers Accounting for Pensions (SFAS 87) and SFAS 158 - Employers Accounting for Defined Benefit Pension and Other Postretirement Plans - an Amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS 158). Disclosures related to the plan are in accordance with FASB Statement No. 132-R, Employers Disclosures about Pensions and Other Postretirement Benefits (SFAS No. 132-R).

In addition, the Company provides certain health care benefits for retired employees and their dependents. The cost of such benefits is recognized in accordance with SFAS No. 106 - Postretirement Benefits Other Than Pensions (SFAS 106) and SFAS 158 .

The Company also contributes to the Brazilian pension and government sponsored pensions of international subsidiaries, social security and redundancy plans at rates based on payroll, and such contributions are expensed as incurred. Further indemnities may be payable upon involuntary severance of employees but, based on current operating plans, management does not believe that any amounts payable under this plan will be significant.

(k) Earnings per share

Earnings per share are computed using the two-class method, which is an earnings allocation formula that determines earnings per share for both preferred shares, which are participating securities and common shares as if all of the net income for each year had been distributed in accordance with a predetermined formula described in Note 17(c).

(l) Accounting for derivatives and hedging activities

The Company applies SFAS No. 133 - Accounting for Derivative Instruments and Hedging Activities, together with its amendments and interpretations, referred to collectively herein as SFAS 133 . SFAS 133 requires that all derivative instruments be recorded in the balance sheet of the Company as either an asset or a liability and measured at fair value. SFAS 133 requires that changes in the derivative s fair value be recognized in the income statement unless specific hedge accounting criteria are met; and the Company designates. For derivatives designated as accounting hedges, fair value adjustments are recorded either in the income statements or Accumulated other comprehensive income , a component of shareholders equity, depending upon the type of accounting hedge and the degree of hedge effectiveness.

The Company uses derivative financial instruments, not designated as hedge accounting, to mitigate the risk of unfavorable price movements for crude oil purchases. These instruments are marked-to-market with the associated gains or losses recognized as Financial income or Financial expenses .

The Company may also use non-hedging derivatives to mitigate the risk of unfavorable exchange-rate movements on its foreign currency-denominated funding. Gains and losses from changes in the fair value of these contracts are recognized as Financial income or Financial expenses .

The Company may also use hedging derivatives to protect exchange of interest rates in different currencies. These hedging derivatives used as well as the risk being hedged are accounted for a cash flow model. Under this model, the gains and losses associated with the derivative instruments are deferred and recorded in

Accumulated other comprehensive income until such time as the hedged transaction impacts earnings, with the exception of any hedge ineffectiveness; which is recorded directly in the statements of income.

(m) Recently issued accounting pronouncements

FASB Statement No. 141 (revised 2007), Business Combinations (SFAS 141-R)

In December 2007, the FASB issued SFAS 141-R, which will become effective for business combination transactions having an acquisition date on or after January 1, 2009. This standard requires the acquiring entity in a business combination to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date to be measured at their respective fair values. SFAS 141-R changes the accounting treatment for the following items: acquisition-related costs and restructuring costs to be generally expensed when incurred; in-process research and development to be recorded at fair value as an indefinite-lived intangible asset at the acquisition date; changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition to be generally recognized in income tax expense; acquired contingent liabilities to be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies. SFAS 141-R also includes a substantial number of new disclosures requirements. The impact on the application of SFAS 141-R in the consolidated financial statements will depend on the business combinations arising during 2009 and thereafter.

FASB Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160)

In December 2007, the FASB issued SFAS 160, which establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement. Certain changes in a parent's ownership interest are to be accounted for as equity transactions and when a subsidiary is deconsolidated, any noncontrolling equity investment in the former subsidiary is to be initially measured at fair value. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest and is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company's disclosure of income statement and balance sheet will be changed by the application of SFAS 160, due to the reclassification of minority interest.

EITF No. 08-6, Equity Method Investment Accounting Considerations (EITF No. 08-6)

In November 2008, the FASB reached a consensus on Emerging Issues Task Force Issue No. 08-6, Equity Method Investment Accounting Considerations (EITF 08-6), which was issued to clarify how the application of equity method accounting will be affected by SFAS No. 141(R) and SFAS 160. EITF 08-6, among other requirements, determines that an equity method investor shall account for a share issuance by an investee as if the investor had sold a proportionate share of its investment. Any gain or loss to the investor resulting from an investee's share issuance shall be recognized in earnings. This issue is effective January 1, 2009, and will be applied prospectively.

(m) Recently issued accounting pronouncements (Continued)

FASB Staff Position (FSP) No. 132(R)-1, Employers' Disclosures about Postretirement Benefit Plan Assets ((FSP) No. 132(R)-1)

In December 2008, the FASB issued (FSP) No. 132(R)-1, which amends SFAS 132(R) to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. This FSP requires disclosures about: (a) Investment Policies and Strategies; (b) Categories of Plan Assets; (c) Fair Value Measurements of Plan Assets and (d) Significant Concentrations of Risk. This FSP is effective for annual statements beginning with 2009; the Company's consolidated financial statements will be impacted only by additional disclosures.

(n) Recently adopted accounting pronouncements

FASB Statement No. 157, Fair Value Measurements (SFAS 157)

Effective January 1, 2008, the Company adopted the SFAS 157, which was amended in February 2008 by FASB Staff Position (FSP) SFAS No. 157-1, Application of SFAS 157 to SFAS 13 and Its Related Interpretive Accounting Pronouncements That Address Leasing Transactions, and by FSP SFAS 157-2, Effective Date of SFAS 157, which delayed the company's application of SFAS 157 for nonrecurring nonfinancial assets and liabilities until January 1, 2009. SFAS 157 was further amended in October 2008 by FSP SFAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, which clarifies the application of SFAS 157 to assets participating in inactive markets.

SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements, however does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards.

The implementation of SFAS 157 did not have material impact on the Company's consolidated financial statements other than additional disclosures that have been incorporated into Note 21 of these financial statements.

FASB Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159)

In February 2007, the FASB issued SFAS 159, which permits the measurement of certain financial instruments at fair value. Entities may choose to measure eligible items at fair value at specified election dates, reporting unrealized gains and losses on such items in earnings at each subsequent reporting period. The Company adopted this Statement effective January 1, 2008, but did not make a fair value election at that time or during the remainder of 2008 for any financial instruments not already carried at fair value in accordance with other accounting standards. Accordingly, the adoption of SFAS 159 did not impact the Company's consolidated financial statements.

FASB FSP SFAS 140-4 and FIN 46(R)-8, Disclosures about Transfers of Financial Assets and Interest in Variable Interest Entities (SFAS 140-4 and FIN 46(R)-8)

In December 2008, the FASB issued FSP SFAS 140-4 and FIN 46(R)-8, Disclosures about Transfers of Financial Assets and Interest in Variable Interest Entities. This FSP requires additional disclosures about an entity's involvement with a variable interest entity (VIE) and certain transfers of financial assets to special-purpose entities and VIEs. This FSP requires the methodology for determining whether the Company is the primary beneficiary of a VIE, whether it has provided financial or other support the Company is not contractually required to provide, and other qualitative and quantitative information. The Company did not have any transfers of financial assets within the scope of this FSP. This FSP was effective December 31, 2008, and the additional disclosures related to VIEs have been incorporated into Note 14.

FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB No. 133 (SFAS 161)

In March 2008, the FASB issued SFAS 161, that expands disclosure requirements of FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133) and related interpretations. This statement requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This statement is effective for interim and annual financial statements beginning with the first quarter of 2009. The Company early adopted SFAS 161, and its implementation did not have material impact on the Company's consolidated financial statements other than additional disclosures that have been incorporated into Note 20.

3. Income Taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal income tax. The statutory enacted tax rates for income tax and social contribution have been 25% and 9%, respectively for the years ended December 31, 2008, 2007 and 2006.

The Company's taxable income is substantially generated in Brazil and therefore subject to the Brazilian statutory tax rate.

(except when specifically indicated)

3. Income Taxes (Continued)

The following table reconciles the tax calculated based upon the Brazilian statutory tax rate of 34% to the income tax expense recorded in these consolidated statements of income.

	Year ended December 31,		
	2008	2007	2006
Income before income taxes and minority interest:			
Brazil	27,597	19,536	18,590
International	(605)	(237)	571
	26,992	19,299	19,161
Tax expense at statutory rate - (34%)	(9,177)	(6,562)	(6,515)
Adjustments to derive effective tax rate:			
Non-deductible postretirement and health-benefits	(254)	(315)	(277)
Change in valuation allowance	(1,004)	(575)	74
Foreign income subject to different tax rates	25	(199)	(147)
Tax incentive (1)	219	712	138
Tax benefit on interest on shareholders' equity (see Note 17 (b))	995	998	994
Goodwill Impairment (see Note 18 (a))	(76)	-	-
Other	13	53	42
Income tax expense per consolidated statement of income	(9,259)	(5,888)	(5,691)

- (1) On May 10, 2007, the Brazilian Federal Revenue Office recognized Petrobras' right to deduct certain tax incentives from income tax payable, covering the tax years of 2006 until 2015. During the year ended December 31, 2008, Petrobras recognized a tax benefit in the amount of US\$219 (US\$712 on December 31, 2007) primarily related to these incentives in the Northeast, within the region covered by the Northeast Development Agency (ADENE), granting a 75% reduction in income tax payable, calculated on the profits of the exploration of the incentive activities and these have been accounted for under the flow through method.

3. Income Taxes (Continued)

The following table shows a breakdown between domestic and international income tax benefit (expense) attributable to income from continuing operations:

	Year ended December 31,		
	2008	2007	2006
Brazil:			
Current	(6,583)	(4,473)	(4,758)
Deferred	(2,463)	(991)	(679)
	(9,046)	(5,464)	(5,437)
International:			
Current	(321)	(353)	(253)
Deferred	108	(71)	(1)
	(213)	(424)	(254)
Income tax expense	(9,259)	(5,888)	(5,691)

All the deferred tax assets and liabilities recorded are principally related to Brazil and there are no significant deferred tax assets and liabilities from international locations. There is no netting of deferred taxes between jurisdictions.

(except when specifically indicated)

3. Income Taxes (Continued)

The major components of the deferred income tax accounts in the consolidated balance sheet are as follows:

	As of December 31,	
	2008	2007
Current assets	505	498
Valuation allowance	(5)	-
Current liabilities	(8)	(7)
Net current deferred tax assets	492	491
Non-current assets		
Employees postretirement benefits, net of Accumulated postretirements benefit reserves adjustments	116	2,065
Tax loss carryforwards	1,944	628
Other temporary differences	742	601
Valuation allowance	(1,609)	(667)
	1,193	2,627
Non-current liabilities		
Capitalized exploration and development costs	(5,251)	(5,810)
Property, plant and equipment	(1,197)	(1,494)
Exchange variation	(1,226)	-
Other temporary differences, not significant individually	(476)	(110)
	(8,150)	(7,414)
Net non-current deferred tax liabilities	(6,957)	(4,787)
Non-current deferred tax assets	123	15
Non-current deferred tax liabilities	(7,080)	(4,802)
Net deferred tax liability	(6,465)	(4,296)

The Company has domestic accumulated tax loss carryforwards amounting to US\$1,440 as of December 31, 2008, which are available to offset future taxable income, limited to 30% of taxable income in any individual year. These tax

loss carryforwards can be carried forward indefinitely in Brazil. Management believes that it is more likely than not that it will realize these tax benefits within ten years at the maximum.

The Company has foreign accumulated tax loss carryforwards amounting to US\$4,427 as of December 31, 2008. Tax loss carryforwards exists in many international jurisdictions. Whereas some of these tax loss carryforwards do not have expiration date, others expire at various times from 2009 to 2028.

Valuation allowance have been established for certain tax loss carryforwards that reduce deferred tax to an amount that will, more likely than not, be realized. Annually management evaluates the realizability of its deferred tax assets taking into consideration, among other elements, the level of historical taxable income, the projected future taxable income, tax-planning strategies, expiration dates of the tax loss carryforwards, and scheduled reversal of the existing temporary differences. The amount of the deferred tax asset considered realizable could, however, be

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES**

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

3. Income Taxes (Continued)

reduced if estimates of future taxable income are reduced. The following presents the net change in the valuation allowance for the years ended December 31, 2008, 2007 and 2006:

	Year ended December 31,		
	2008	2007	2006
Balance at January 1,	(667)	(453)	(524)
Additions	(1,071)	(587)	(27)
Reductions allocated to income tax expense	67	12	101
Reductions allocated to goodwill	-	168	-
Reductions due to expiration	-	209	-
Cumulative translation adjustments	57	(16)	(3)
Balance at December 31,	(1,614)	(667)	(453)
Current valuation allowance	(5)	-	-
Long term valuation allowance	(1,609)	(667)	(453)

Valuation allowance additions of US\$1,071 in 2008 and US\$587 in 2007, primarily relates to tax loss carryforwards from foreign operations and domestic thermoelectric power plants for which no tax benefit is expected to be realized in the next few years.

The reduction in valuation allowance in 2007 was primarily related to PEPSA, of which a tax benefit of US\$168 was allocated to reduce goodwill for the deferred asset that was not previously recognized at the acquisition date. The majority of the remaining amount was related to the reduction in both gross deferred tax asset and related valuation allowance due to the expiration of the unutilized tax loss carryforwards in PEPSA. Subsequent recognition of tax benefits related to the valuation allowance for deferred tax assets as of December 31, 2008, will be recorded in the consolidated statement of income.

The Company has not recognized a deferred tax liability of approximately US\$199 for the undistributed earnings of its foreign operations that arose in 2008 and prior years as the Company considers these earnings to be indefinitely reinvested (US\$117 in 2007). A deferred tax liability will be recognized when the Company no longer demonstrates that it plans to indefinitely reinvest the undistributed earnings. As of December 31, 2008, the undistributed earnings of these subsidiaries were approximately US\$1,329 (US\$779 as of December 31, 2007).

The Company has no unrecognized tax benefits relating to uncertain tax positions and accrued penalties and interest as of January 1, 2007 and 2008 and for the years ended December 31, 2007 and 2008. In addition, the Company does not expect that the amount of unrecognized tax benefits will increase significantly within the next 12 months.

The Company and its subsidiaries file tax returns in Brazilian jurisdiction and in many foreign jurisdictions. The Brazilian and Argentinean income tax returns remain subject to examination by the respective tax authorities for the years beginning in 2002.

(except when specifically indicated)

4. Cash and Cash Equivalents

	As of December 31,	
	2008	2007
Cash	1,075	1,241
Investments - Brazilian reais (1)	2,813	2,279
Investments - U.S. dollars (2)	2,611	3,467
	6,499	6,987

(1) Comprised primarily federal public bonds with immediate liquidity and the securities are tied to the American dollar quotation or to the remuneration of the Interbank Deposits - DI.

(2) Comprised primarily by Time Deposit and securities with fixed income.

5. Marketable Securities

	As of December 31,	
	2008	2007
Marketable securities classification:		
Available-for-sale	1,608	2,036
Trading	57	127
Held-to-maturity	197	248
	1,862	2,411
Less: Current portion of marketable securities	(124)	(267)
Long-term portion of marketable securities	1,738	2,144

Marketable securities are comprised primarily of amounts that the Company has invested in an exclusive fund, excluding the Company's own securities, which are considered repurchased. The exclusive fund is consolidated, and the equity and debt securities within the portfolio are classified as trading or available-for-sale under SFAS 115 based on management's intent. Trading securities are principally Brazilian bonds, which are bought and sold frequently with the objective of making short-term-profits on market price changes. Available-for-sale securities are principally, CLN (Credit Liquid Note) agreements and certain other bonds for which the Company does not have current expectations to

trade actively. Trading securities are presented as current assets, as they are expected to be used in the near term for cash funding requirements. Available-for-sale securities are presented as Non-current assets, as they are not expected to be sold or liquidated within the next twelve months.

As of December 31, 2008, Petrobras had a balance of US\$1,608 (US\$1,907 in 2007) linked to B Series National Treasury Notes, which are accounted for as available-for-sale securities in accordance with SFAS 115. On October 23, 2008, the B Series National Treasury Notes were used as a guarantee after the confirmation of the agreements entered into with Petros, Petrobras pension plan (see Note 16 (b)). The nominal value of the NTN-Bs is restated based on variations in the Amplified Consumer Price Index (IPCA). The maturity of these notes are 2024 and 2035 and they bear interest coupon of 6% p.a., which is paid semi-annually. At December 31, 2008, the balances of the National Treasury Notes - Series B (NTN-B) are updated in accordance with their market value, based on the average price disclosed by the National Association of Open Market Institutions (ANDIMA).

6. Accounts Receivable, Net

Accounts receivable, net consisted of the following:

	As of December 31,	
	2008	2007
Trade	8,727	9,295
Less: Allowance for uncollectible accounts	(1,191)	(1,290)
	7,536	8,005
Less: Long-term accounts receivable, net	(923)	(1,467)
Current accounts receivable, net	6,613	6,538

	As of December 31,		
	2008	2007	2006
Allowance for uncollectible accounts			
Balance at January 1,	(1,290)	(1,120)	(1,063)
Additions	(84)	(215)	(78)
Write-offs	16	160	60
Cumulative translation adjustments	167	(115)	(39)
Balance at December 31,	(1,191)	(1,290)	(1,120)
Allowance on short-term receivables	(638)	(746)	(584)
Allowance on long-term receivables	(553)	(544)	(536)

At December 31, 2008 and 2007, long-term receivables include US\$624 and US\$616, respectively relating to payments made by the Company to suppliers and subcontractors on behalf of certain contractors. These contractors had been hired by the subsidiary Brasoil for the construction/conversion of vessels into FPSO (Floating Production, Storage and Offloading) and FSO (Floating, Storage and Offloading) and failed to make the payments to their suppliers and subcontractors. The Company made the payments to avoid further delays in the construction/conversion of the vessels and consequent losses to Brasoil.

The Company's management has determined that these payments can be reimbursed, since they represent Brasoil's rights with respect to the contractors, for which reason judicial action was filed with international courts to seek reimbursement. However, as a result of the uncertainties related to the realization of such receivables, the Company recorded an allowance for all credits not backed by collateral. Such allowance amounted to US\$553 and US\$544 as of December 31, 2008 and 2007, respectively.

7. Inventories

	As of December 31,	
	2008	2007
Products:		
Oil products	2,770	2,493
Fuel alcohol	256	181
	3,026	2,674
Raw materials, mainly crude oil	3,301	4,818
Materials and supplies	1,578	1,681
Others	134	110
	8,039	9,283
Current inventories	7,990	9,231
Long-term inventories	49	52

Inventories are stated at the lower of cost or market. Due to the recently declines in the oil international market prices, the Company recognized a loss of US\$545 for the year ended December 31, 2008, which was classified as other operating expenses in the consolidated statement of income. The Company adopted the realizable value for inventory impairment purposes.

8. Recoverable Taxes

Recoverable taxes consisted of the following:

	As of December 31,	
	2008	2007
Local:		
Domestic value-added tax (ICMS) (1)	1,924	2,173
PASEP/COFINS (2)	2,622	2,772
Income tax and social contribution	1,176	527
Foreign value-added tax (IVA)	113	243
Other recoverable taxes	541	250

	6,376	5,965
Less: Long-term recoverable taxes	(3,095)	(2,477)
Current recoverable taxes	3,281	3,488

- (1) Domestic value-added sales tax is composed of credits generated by commercial operations and by the acquisition of property, plant and equipment and can be offset with taxes of the same nature.
- (2) Composed of credits arising from non-cumulative collection of PASEP and COFINS, which can be compensated with other federal taxes payable.

The income tax and social contribution recoverable will be offset against future income tax payable.

Petrobras plans to fully recover these taxes, and as such, no allowance has been provided.

(except when specifically indicated)

9. Property, Plant and Equipment, Net (Continued)**(a) SFAS No. 143 - Accounting for asset retirement obligations**

Since January 1, 2003, Petrobras adopted SFAS No. 143 - Accounting for Asset Retirement Obligations (SFAS 143). Under SFAS 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

Measurement of asset retirement obligations is based on currently enacted laws and regulations, existing technology and site-specific costs. There are no assets legally restricted to be used in the settlement of asset retirement obligations.

A summary of the annual changes in the abandonment provision is presented as follows:

	Liabilities
Balance as of December 31, 2006	1,473
Accretion expenses	147
Liabilities incurred	1,836
Liabilities settled	(29)
Revision of provision	(401)
Cumulative translation adjustment	436
Balance as of December 31, 2007	3,462
Accretion expenses	153
Liabilities incurred	687
Liabilities settled	(23)
Revision of provision	(640)
Cumulative translation adjustment	(814)
Balance as of December 31, 2008	2,825

(b) Impairment

For the years ended December 31, 2008, 2007 and 2006, the Company recorded impairment charges of US\$519, US\$271 and US\$21, respectively. During 2008, the impairment charge was primarily related to goodwill impairment of Petrobras indirect subsidiary in the United States Pasadena Refining System (US\$223) and to producing properties in Brazil (US\$171) and principle amounts were related to Petrobras Guajá field. During 2007, the impairment charge was primarily related to international investments (US\$226): in Ecuador (US\$174), due to the tax and legal changes implemented by the government of that country, previously mentioned (see Note 9(b)); in the United States (US\$39); and in Angola (US\$13). During 2006, the impairment charge was primarily related to producing properties in Brazil and principle amounts were related to Petrobras Córrego de Pedras on-shore field.

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES**

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

10. Investments in Non-Consolidated Companies and Other Investments

Petrobras conducts portions of its business through investments in companies accounted for using the equity and cost methods. These non-consolidated companies are primarily engaged in the petrochemicals and product transportation businesses.

	Total ownership	Investments	
		2008	2007
Equity method	20% - 50% (1)	2,517	4,373(2)
Investments available-for-sale	8% - 17%	109	400
Investments at cost		572	339
Total		3,198	5,112

(1) As described further in this Note, certain thermoelectrics with ownership of 10% to 50% are also accounted as equity investments due to particularities of significant influence.

(2) As described in Notes 10(d) and 10(e) it also includes investments in Ipiranga Group in the amount of US\$1,175 and in Suzano Petroquímica, in the amount of US\$1,177.

At December 31, 2007, the Company had investments in companies with publicly traded shares: Braskem S.A., Petroquímica União S.A. - PQU. Those investments amounted to less than 20% of the investee's total voting shares, were classified as available-for-sale and were recorded at market value. The Company has recorded unrealized gains for the difference between the fair value and the cost of the investment as a component of shareholders' equity, net of tax. During 2008 those interest investments changed according to the Braskem investment agreement (see note 10-(d.1)), and Investment agreement with Unipar (see note 10-(e.1)) and the Company realized this gain with changes in the unrealized balance recorded as a component of comprehensive income.

At December 31, 2008, the Petroquímica União S.A. - PQU, Braskem S.A., and Quattor Companhia Petroquímica continued having publicly traded shares. According to Investment agreement with Unipar, Quattor Companhia Petroquímica had interest investment of 90.8% in Petroquímica União S.A. - PQU.

At December 31, 2008, the Company had investments interest of 31.9% and 23.8% with balance of US\$550 and US\$428 in Braskem S.A. and Quattor Companhia Petroquímica, respectively, that were recorded according to equity method.

The Company did not restate the prior period financials for the increase in the interest in Braskem that became equity method investments as they are immaterial.

The Company also has investments in companies for the purpose of developing, constructing, operating, maintaining and exploring thermoelectric plants included in the federal government's Priority Thermoelectric Energy Program, with equity interests of between 10% and 50%. The balance of these investments as of December 31, 2008 and 2007 includes US\$80 and US\$95 respectively, and are included as equity method investments due to the Company's ability to exercise significant influence over such operations.

(a) Hydrocarbons Law of Bolivia

As of May 1, 2006, Supreme Decree 28,701 came into force in Bolivia, which nationalized all natural hydrocarbon resources, obliging companies currently producing gas and oil to transfer ownership of the entire hydrocarbon production to YPFB.

Table of Contents

PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

10. Investments in Non-Consolidated Companies and Other Investments (Continued)

(a) Hydrocarbons Law of Bolivia (Continued)

In addition, by means of the above mentioned decree the Bolivian government nationalized the shares required for YPFB to control, with a minimum of 50% plus one share, Petrobras Bolívia Refinación S.A. - PBR, in which Petrobras had an indirect interest of 100% (Petrobras Bolívia Inversiones e Servicios S.A. - 51% and Petrobras Energía Internacional S.A. - 49%).

On June 25, 2007, a share purchase agreement for the shares of PBR was signed, transferring all the shares to YPFB for the amount of US\$112. The capital gain made by Petrobras in the sale of the shares of PBR is recorded in Other expenses, net in the amount of US\$37, on December 31, 2007.

(b) New Hydrocarbons Law in Ecuador

On October 18, 2007 the Hydrocarbons Law was amended, increasing the State's share in the extraordinary surpluses in the price of the oil to 99%, thus reducing the share of the oil companies to 1%. On December 28, Ecuador's Constituent Assembly passed the Ley de Equidad Tributaria, which implements a major tax reform, including new taxes, as from January 01, 2008.

The set of changes brought about the above-mentioned amendment, altered the terms established by the parties with regard to the approval of the respective share contracts, affecting projections of development of current business operations in Ecuador and the ability to recoup the investments made. Consequently, on December 31, 2007, an impairment charge was recognized in the amount of US\$174, based on the future cash flows derived from the continuous use of the assets in order to adjust the book value of the assets to their estimated recovery value.

On December 31, 2008, Petrobras Energía Ecuador, a subsidiary of Petrobras Energia S.A. (PESA), signed an agreement with the government of Ecuador for the devolution of the concession of exploratory block 31, which implied recognition of loss in the amount of US\$77.

(c) Investments in Venezuela

In March, 2006, through its subsidiaries and affiliated companies in Venezuela, PESA executed with PDVSA and Corporación Venezolana del Petróleo S.A. (CVP), Memoranda of Understanding (MOU) for the purpose of completing the migration of the operating partnerships to the form of mixed capital companies in accordance with legal articles. The MOU established that the interest held by the private partners in the mixed capital companies is 40%, with the Venezuelan government holding an interest of 60%.

According to the corporate and governance structure specified for the mixed capital companies, as from April 01, 2006, PESA no longer recorded the assets, liabilities and results referring to the aforesaid operations in consolidated statements, presenting them as equity method investments. Recovery of these investments is strongly tied to the

volatility of oil prices, social, economic and regulatory conditions in Venezuela and, in particular, to shareholders interest in developing the oil reserves. Consequently a provision for loss on investments has been made in the amount of US\$23 in 2008, (US\$67 in 2007).

(d) Ipiranga current developments and restructuring of the Petrochemical companies with Braskem

On April 18, 2007, Ultrapar (the Commissioner), having Braskem S.A. and Petróleo Brasileiro S.A. - Petrobras (through a commission agreement) as intervening parties, acquired control of companies comprising Ipiranga Group for the amount of US\$2,694 (R\$5,486 million).

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

10. Investments in Non-Consolidated Companies and Other Investments (Continued)

**(d) Ipiranga current developments and restructuring of the Petrochemical companies with Braskem
(Continued)**

On February 27, 2008, in fulfillment of the Investment Agreement signed on March 18, 2007, Ultrapar transferred an interest of 40% of the shares comprising the share capital of Ipiranga Química S.A. to Petrobras, which disbursed US\$552. The purchase price of the petrochemical assets has been allocated US\$154, net of tax to property, plant and equipment, US\$194 to goodwill and the remaining US\$204 referred to net assets acquired.

On May 14, 2008, Ultrapar effected the transfer of the fuel and lubricants Distribution Assets located in the North, Northeast and Central-West and the asphalt Assets received by Petrobras through a special purpose company called 17 de Maio Participações S.A. (17 de Maio).

17 de Maio is a closed-capital corporation and its relevant assets are the asphalt assets, contained within Ipiranga Asfaltos - IASA, and the distribution assets held by a limited company called Alvo Distribuidora de Combustíveis Ltda. Petrobras disbursed the amount of US\$619. This amount has been allocated US\$52, net of tax to property, plant and equipment, US\$229 to goodwill and the remaining US\$338 referred to net assets acquired.

On December 17, 2008, CADE approved, definitively, the distribution and asphalt assets of the Ipiranga Group by Petrobras, conditioned to the signing of and complete compliance with the Performance Commitment Agreement, entered into by Petrobras and Alvo, thus making the immediate, direct management of these assets possible.

Due to this successful result, Petrobras began the process of transferring the assets represented by the companies IASA and Alvo, to BR Distribuidora, in line with the initial planning for the operation which aimed at increasing the leadership of the abovementioned subsidy in the Brazilian distribution market with assured profitability, through the increase in market share.

d.1) Braskem Investment Agreement

On November 30, 2007, an investment agreement was signed between Braskem, Odebrecht, Petrobras, Petroquisa and Norquisa, by which it was agreed that some petrochemical assets held by Petrobras and Petroquisa would be integrated in Braskem in exchange for a participation interest in Braskem. On May 14, 2008, an addendum to the investment agreement was made dividing the exchange transaction into two stages.

The first stage was completed on May 30, 2008, whereby Petrobras and Petroquisa transferred to Braskem the following participation interests: (i) 36.50% of the total capital of Copesul; (ii) 40% of the voting and total capital of IPQ; (iii) 40% of the voting and total capital of IQ; (iv) 40% of the voting and total capital of Petroquímica Paulínia (PPSA), therefore now holding 30% of the voting capital and 23.1% of the total capital of Braskem. The exchange transaction was based on the fair value of the participation interest exchanged.

The transaction was accounted for in accordance with FASB Statement N° 153 - Exchanges of Non-monetary Assets - An Amendment of APB Opinion No. 29 , (SFAS 153) and FASB Statement 140 - Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities , (SFAS 140) based on the fair value of the participation interest received from Braskem. As a result of the transaction a non-operating income of US\$64, net of tax, was recorded.

**(d) Ipiranga current developments and restructuring of the Petrochemical companies with Braskem
(Continued)**

d.1) Braskem Investment Agreement (Continued)

On May 30, 2008, Petrobras, Petroquisa, Odebrecht and Norquisa, with Braskem as the intermediary, agreed the terms of the new shareholders' agreement for Braskem shareholders.

In the second stage, Petrobras and Petroquisa will have the option of: (i) integrating into Braskem up to 100% of the voting and total capital of Petroquímica Triunfo (Triunfo), or (ii) transfer of cash to Braskem in the same amount of the fair value of the voting and total capital of Petroquímica Triunfo (Triunfo); thus increasing the joint interest of Petrobras and Petroquisa in the total capital of Braskem, as established in the Investment Agreement.

On July 9, 2008, the transaction was approved without restrictions by the CADE.

On December 22, 2008, Braskem cancelled treasury shares corresponding to 6,251,744 registered common shares (ON), 10,389,665 registered preferred class A shares (PNA) and 209,248 registered preferred class B shares (PNB), and thus Petroquisa now holds 31.0% of the voting capital and 23.8% of the total capital of Braskem.

(e) Acquisition of Suzano Petroquímica S.A.

On November 30, 2007, Petrobras acquired 76.57% of the total shares of Suzano Petroquímica S.A. (SZPQ), by acquiring Pramoia Participações S.A. (Pramoia) and its controlled company, Dapean Participações S.A. (Dapean), including 99.9% of the total common shares, for the amount of US\$1,186 (US\$7.49 per common share and US\$5.99 per preferred share). The purchase price has been allocated US\$72, net of tax to property, plant and equipment and US\$5, net of tax, to inventories and the remaining US\$602 to goodwill.

Petrobras incorporated Pramoia Participações S.A. on March 24, 2008, after approval at the Extraordinary General Meeting held on that date.

On April 30, 2008, the Brazilian Securities Commission (Comissão de Valores Mobiliários - CVM) approved the registration of the Public Offerings (PO) to purchase the shares of SZPQ, conditioned to certain adjustments which Petrobras has fulfilled.

The PO of Suzano Petroquímica was held on June 20, 2008, in which Quattor Participações S.A. acquired (i) 102,906 of the common shares (92.7% adhesion) for the price of US\$8.78 per common share; and (ii) 50,147,172 preferred shares (94.6% adhesion) for the price of US\$7.02 per preferred share.

On June 30, 2008, the name of Suzano Petroquímica S.A. was changed to Quattor Petroquímica S.A.

e.1) Investment Agreement with Unipar

On November 30, 2007, the Investment Agreement between Unipar and Petrobras defined, among other matters, the creation of an integrated company into which they plan to integrate their assets for the production of thermoplastic resins, basic petrochemicals and correlated activities.

The petrochemical assets contributed by the Petrobras Companies were: (i) 99.9% of the voting capital and 76.57% of the total capital of Suzano Petroquímica S.A. (SZPQ), acquired on November 30, 2007;

(e) Acquisition of Suzano Petroquímica S.A. (Continued)

e.1) Investment Agreement with Unipar (Continued)

(ii) 17.48% of the voting capital and 17.44% of the total capital held by Petroquisa in Petroquímica União S.A. (PQU).

The assets contributed by Unipar were: (i) 33.3% of the voting and total capital of Rio Polímeros S.A. (Riopol); (ii) 54.96% of the voting capital and 51.35% of the total capital of PQU; (iii) 99.99% of the voting and total capital of Polietilenos União S.A. (PU); (iv) all the assets, rights and obligations relating to the operation of Unipar Divisão Química (UDQ); and (v) the amount in cash of US\$217, which corresponds to the value of the price to be paid for: (a) 16.67% interest in the total share capital held by Petroquisa in Riopol; and 15.98% of SZPQ's interest in Riopol, for the understood and agreed price of US\$0.5232 per share.

On June 11, 2008, Petrobras and Unipar contributed their participation interest described above in exchange for a participation interest in the new created company Quattor Participações S.A. . As a result of the transaction, based on the fair value of the participation interest exchanged, Unipar became the majority shareholder with 60% of the voting and total capital of Quattor and Petrobras became the minority shareholder with the remaining participation interest of 40% of the voting and total capital of Quattor.

The investment in Quattor was accounted for in accordance with SFAS 153 and SFAS 140 based on the fair value of the participations interest obtained. As a result of the transaction a non-operating income of US\$3, net of tax, was recognized.

The transaction was approved without restrictions by the CADE on July 09, 2008.

On August 1, 2008, Quattor concluded the acquisition of (i) 1,670,279 common shares and 876,216 preferred shares of PQU held by Companhia Brasileira de Estireno S.A. at the price of US\$9.80 per share, and (ii) 1,489,109 common shares and 1,314,256 preferred shares of PQU held by Oxiteno S.A. - Indústria e Comércio at the price of US\$11.02 per common share and US\$9.80 per preferred share. Accordingly, Quattor now directly and indirectly holds 86.91% of the voting capital and 82.31% of the total capital of PQU. On the same date PQU's shareholders' agreement was cancelled.

On December 2, 2008, Quattor Participações made a public offering for the shares of PQU with the aim of cancelling the registration of the publicly held company of the invested company. In the process 6,536,039 common shares and 11,176,718 preferred shares were acquired for the total amount of US\$116 and, since the conditions established by the CVM were met, the company had its registration as a publicly held company cancelled on December 16, 2008.

On December 16, 2008, Quattor Participações made a public offering for the shares of Quattor Petroquímica with the aim of discontinuing the level 2 corporate governance practices of the São Paulo stock exchange (Bovespa) in the company. In this auction 407 common shares and 1,308,386 preferred shares were acquired for the total price of US\$5. On the following day, Quattor Petroquímica discontinued the level 2 corporate governance practices; however it continues to keep its registration as a publicly held company with shares traded on the São Paulo stock exchange (Bovespa).

On December 31, 2008, the shareholding breakdown of the assets controlled by Quattor Participações was: 75% of the total capital of Riopol, 99.3% of the total capital of Quattor Petroquímica, 99.2% of the

total capital of PQU, 100% of the total capital of PU, and all the assets, rights and obligations related to the operating of UDQ.

11. Petroleum and Alcohol Account - Receivable from Federal Government**Changes in the Petroleum and Alcohol account**

The following summarizes the changes in the Petroleum and Alcohol account for the years ended December 31, 2008 and 2007:

	Year Ended December 31,	
	2008	2007
Opening balance	450	368
Financial income (Note 23)	7	6
Translation gain	(111)	76
Ending balance	346	450

The Petroleum and Alcohol account arose in periods previous to December 31, 2002 as a result of regulation in the fuels market. The Federal Government has certified the balance and placed a portion of the amount (US\$53) in a restricted use account.

In order to conclude the settlement of accounts with the Federal Government, pursuant to Provisional Measure nº 2.181, of August 24, 2001, and after providing all the information required by the National Treasury Office - STN, Petrobras is seeking to settle all the remaining disputes between the parties.

The remaining balance of the Petroleum and Alcohol account may be paid as follows: (1) National Treasury Bonds issued at the same amount as the final balance of the Petroleum and Alcohol account; (2) offset of the balance of the Petroleum and Alcohol account, with any other amount owed by Petrobras to the Federal Government, including taxes; or (3) by a combination of the above options.

12. Financings**(a) Short-term debt**

The Company's short-term borrowings are principally sourced from commercial banks and include import and export financing denominated in United States dollars, as follows:

	As of December 31,	
	2008	2007
Import - oil and equipment	479	5
Working capital	1,920	1,453
	2,399	1,458

Structured finance of exports

Petrobras and Petrobras Finance Ltd. - PFL have certain contracts (Master Export Contract and Prepayment Agreement) between themselves and a special purpose entity not related to Petrobras, PF Export Receivables Master Trust (PF Export), relating to the prepayment of export receivables to be generated by PFL by means of sales on the international market of fuel oil and other products acquired from Petrobras.

As at December 31, 2008, the balance of export prepayments amounted to US\$348 in non-current liabilities (US\$398 as of December 31, 2007) and US\$75 in current liabilities (US\$68 as of December 31, 2007).

US\$899 Global Notes issue - Petrobras International Finance Company - (PifCo)

On October 06, 2006, PifCo issued Global Notes to the amount of US\$500. The notes have an effective rate of 6.185% per annum and a ten-year term. The Global Notes were offered at 99.557% of the face value with a stated of 6.125% per annum. PifCo used the proceeds from this issuance principally to repay trade-related debt.

The subsidiary Petrobras International Finance Company - PifCo made a note exchange offer, with the transaction being settled on February 07, 2007. PifCo consequently received and accepted offers to the amount of US\$399 (face value). The old securities received under the exchange were cancelled on the same date and as a result PifCo issued new securities on the transaction settlement date maturing in 2016 with a coupon of 6.125% p.a. to the amount of US\$399. The securities constitute a single, fungible issuance with the US\$500

issued on October 06, 2006, amounting to US\$899 in securities issued with maturity in 2016. PifCo also paid investors the amount equal to US\$56 as a result of the offering to exchange the securities. The transaction has been treated as an exchange for financial reporting purposes and accordingly, the US\$56 are amortized to interest expense over the life term of the notes in accordance with the effective interest method. As of December 31, 2008 and 2007, the Company had an outstanding balance of net premiums on reissuance that amounted to US\$13 and US\$22, respectively.

US\$1,750 Global Notes issue - PifCo

On November 01, 2007 Petrobras, through its wholly-owned subsidiary Petrobras International Finance Company (PifCo) concluded its bond issue of US\$1,000 in senior debt, unsecured Global Notes on the international market, due March 01, 2018, with the following characteristics: (i) coupon of 5.875% p.a.; and (ii) issue price of 98.612%. Interest will be paid on March 01 and September 01 of each year, with the first payout due March 01, 2008.

On January 11, 2008, PifCo issued Senior Global Notes of US\$750 that constitute a single issue fungible with the US\$1,000 launched on November 1, 2007, amounting to US\$1,750 in issued bonds due on March 1, 2018. The Notes bear interest at the rate of 5.875% per annum, payable semiannually, beginning on March 1, 2008. The purpose of this issue was to access long-term debt capital markets, refinance prepayments of maturing debt and to reduce the cost of capital.

(c) Loans to Petrobras Netherlands BV (PNBV)

On September 12, 2007 the subsidiary Petrobras Netherlands BV (PNBV) signed a loan agreement with Banco Bilbao Vizcaya Argentaria (BBVA) for the amount of US\$200, with interest of 5.94% p.a. and a term of four years.

In addition, PNBV contracted a line of credit with Banco Santander Overseas Bank, Inc. - Santander for up to US\$300. The term is for one year and may be extended for up to two years in the full amount, and partially, for the full term of six years. The rate of interest charged is 5.30% p.a.

On January 02, 2008, PNBV signed an offshore loan agreement with Société Générale for the amount of US\$85, with interest of 5.10% p.a. and a term of five years.

In addition, on January 24, 2008, PNBV signed an offshore trade-related loan agreement with Banco Bilbao Vizcaya Argentaria S.A. for the amount of US\$100, with interest of 3.96% p.a. and a term of four years.

Edgar Filing: PETROBRAS INTERNATIONAL FINANCE CO - Form 20-F

PNBV contracted a credit facility of up to US\$200 from Santander Overseas Bank. Inc - SANTANDER. On June 25, 2008, the subsidiary used the funds available. The initial term of the credit facility is one year, renewable for the full amount for up to three years, with interest of 4.12% p.a.

PNBV contracted financing from Banco BNP Paribas in the amount of US\$204, including political and commercial risk insurance from SACE S.P.A. in the amount of US\$4. Contractual expenses were paid in the amount of US\$1. The term will be for 12 years and the contracted rate of interest was 2.60% p.a.

It also contracted financing from Export Development Canada (EDC) and Sumitomo Mitsui Banking Corporation (SMBC), Mizuho Corporate Bank Ltd. (MHCB) and the Bank of Tokyo-Mitsubishi Ufj Ltd.

(c) Loans to Petrobras Netherlands BV (PNBV) (Continued)

(BMTU), in the amount of US\$500 (discounting loan expenses of US\$2) and ¥75,142 million, equivalent to US\$837 (the loan and insurance expenses total ¥3,730 million, equivalent to US\$41), with maturities of 12 and 10 years. The contracted interest rates were 4.74% p.a. and 1.59% p.a., respectively.

The financing from BNP is earmarked for financing of corporate expenses of PNBV. The other financings are earmarked for the settling of loans from Braspetro Oil Services Company (Brasoil).

Additionally, on October 3 and December 1, 2008, PNBV renewed lines of credit with Santander Overseas Bank, Inc (SANTANDER) in the amounts of US\$75 and US\$200, whose term will be one year, which may be fully renewed for one more year, and partially for the final term of six years. The contracted interest rates were 3.62% p.a. and 3.11% p.a. respectively.

(d) Notes - PESA

On May 07, 2007, Petrobras Energía S.A. (PESA), a company indirectly controlled by Petrobras, issued notes amounting to US\$300 with a term of 10 years and 5.875% interest p.a. Interest will be paid semiannually and the principal will be paid in a single installment at maturity. The issuance was made both in the Argentinean and in the International market.

(e) Platform P-56 construction project

On October 30, 2007, Petrobras signed an agreement with FSTP Consortium (Keppel Fels and Technip) for the construction of the P-56 semi-submersible platform to allow production to be anticipated at Module 3 of the Marlim Sul field, worth approximately US\$677 (R\$1,200 million), including the platform's engineering, supply, construction and assembly (hull and process plant) services.

(f) Credit facility agreement to finance exports

On October 03, 2007, Petrobras contracted a credit facility of US\$282 with the Banco do Brasil. The transaction was ensured by an Export Credit Note (NCE), the sole purpose of which is to increase Petrobras' exports of ethanol, in light of the future prospects for growth of biofuel business, as highlighted in the Company's strategic plan.

This transaction marks the return of Petrobras to credit facility contracting in the local market and was negotiated with the following terms:

Term: 2 years, with settlement of the principal and interest at the end of the term;

Interest rate: 96.2% of the CDI;

Clause providing for early repayment as from 180 days of the withdrawal with no penalties;

Exemption of IOF tax; and

Waiver of guarantees.

On March 17 and 26, 2008, Petrobras contracted a credit facility of US\$435 and US\$289, respectively, with the Banco do Brasil. The transaction was ensured by an Export Credit Note, the sole purpose of which is to

increase Petrobras' exports of ethanol, in light of the future prospects for growth of biofuel business, as highlighted in the Company's strategic plan and was negotiated with the following terms:

Term: 2 years and 3 years, with settlement of the principal and interest at the end of the term;

Interest rate: 95% of the CDI;

Clause providing for early repayment as from 180 days of the withdrawal with no penalties;

Exemption of IOF tax on presentation of proof of the export operations; and

Waiver of guarantees.

On April 4 and 11, 2008 Petrobras took out financing of US\$234 and US\$948 from Banco do Brasil. The transaction was made viable through the issuing of Export Credit Notes (NCE), whose purpose is to increase the company's exports of oil and oil products. This transaction was settled in advance on December 23, 2008 and re-contracted for the same amount initially negotiated in reais (US\$171 and US\$685, respectively), however with the following conditions:

Term: On January 12, 2011, with interest payable every 6 months and settlement of the principal at the end of the term;

Interest rate: 108.20% of the CDI + Flat fee of 2% (payment on January 9, 2009);

Clause providing for early repayment as from 180 days of the withdrawal with no penalties;

Exemption of IOF tax on presentation of proof of the export operations; and

Waiver of guarantees.

(g) Advance on Export Contracts - ACC

On October 23, 2008, Petrobras negotiated an Advance on Export Contracts - ACC with Banco do Brasil in the amount of US\$300. This advance was negotiated with the following conditions:

Term: 179 days, with maturity on April 20, 2009;

Interest rate: 6.30% p.a. With payment on April 20, 2009; and

Exemption from IOF (Tax on Financial Operations) and income tax (IR) provided that the exports are made.

On December 3, 2008, Petrobras negotiated an Advance on Export Contracts - ACC with Bradesco in the amount of US\$200. This advance was negotiated with the following conditions:

Term: 360 days, with maturity on November 28, 2009;

Interest rate: 6.% p.a. With payment on November 28, 2009;

Exemption from IOF (Tax on Financial Operations) and income tax (IR) provided that the exports are made;
and

(h) Bank Credit Certificate

On October 31, 2008, Petrobras took out a loan (Bank Credit Certificate) from Caixa Econômica Federal (CEF) in the amount of US\$1,057. The objective of the loan is to reinforce the Company's working capital. This loan was negotiated with the following conditions:

Term: 180 days, principal and charges with amortization in a single payment at the end of the term;

Interest rate: 104% of the CDI Over;

Levying of IOF; and

A clause for extraordinary amortization and early liquidation. The Company may make extraordinary payments at any time to amortize the debt, in addition to making early liquidation.

On December 22, 2008, Petrobras negotiated with Caixa Econômica Federal (CEF) an amendment and renewal of the bank credit certificate of US\$677. This transaction was negotiated with the following conditions:

Term: 760 days, with payment of the charges each quarter and the principal at the end of the term;

Rate of interest: 110% of CDI Over;

Levying of IOF; and

Due to the additional loan and the payment of the financial charges on the loan granted previously, the parties consolidated the total amount lent into US\$1,543.

(i) Program for Modernization and Expansion of the Fleet (PROMEF)

In 2007 Transpetro signed agreements for conditioned purchase and sale with three Brazilian shipyards for the construction of 23 tankers, in the amount of US\$2,232. These funds were raised from BNDES with the following conditions:

Qty	Ships Type	Shipyard	US\$ Amount	Rate of interest	Term
10	Suezmax	Estaleiro Atlantico Sul S.A.	1,054		20 years and a grace period of
5	Aframax	Estaleiro Atlantico Sul S.A. Estaleiro Mauá - Petro UM	542	TJLP + 2.5%	48
4	Tank/Product	S.A.	270	p.a.	months as from the first
4	Panamax	EISA - Estaleiro Ilha S.A.	366		drawdown

In the period from July to December 2008, Transpetro made payments referring to the advances in the total amount of US\$7, as follows:

US\$6 Funds financed by BNDES/Transpetro (36% of the price of the ship);

US\$1 Transpetro's own funds (5% of the price of the ship).

(i) Program for Modernization and Expansion of the Fleet (PROMEF) (Continued)

During fiscal year 2008 Estaleiro Atlântico Sul recorded financial movement in the total amount of US\$72, the financing of which by BNDES will be passed on to Transpetro, after the signing of the DELIVERY AND ACCEPTANCE INSTRUMENT for the ship, distributed as follows:

US\$8 The shipyard's own funds (8% of the price of the ship);

US\$64 Funds financed by BNDES/Shipyard (46% of the price of the ship).

(j) Debentures issue

On August 02, 2006 the Extraordinary General Meeting held by Alberto Pasqualini - REFAP S.A., a subsidiary of the Company, approved the value of the private issue of simple, nominative and book-entered debentures in the amount of US\$391. The debentures were issued in order to expand and modernize REFAP's industrial facilities and to raise its oil processing capacity from 20,000 m³/day to 30,000 m³/day, in addition to increasing the portion of national oils being processed.

The issue was made under the following terms: up to December 30, 2006, amortization over 96 months plus a 6-month grace period; 90% of the debentures shall be subscribed by the BNDES yielding interest at the Long-term Interest Rate +3.8% p.a.; and 10% of the debentures shall be subscribed by BNDES Participações S.A. (BNDESPAR) at the interest rate of the BNDES basket of currencies + 2.3% p.a.

On September 08, 2006, the Financing Contract was executed and the first installment was made available in the amount of US\$278. On December 19, 2006 was made available the remaining amount of US\$113. In May 2008, REFAP made a second issue with similar characteristics in the total amount of US\$217, and raised US\$23 in 2008. The balance at December 31, 2008 was US\$314, with US\$52 in current liabilities.

(k) Raising of funds for the international segment

In fiscal year 2008 the subsidiaries of Petrobras abroad raised funds in the amount equivalent to US\$1,181, basically to finance working capital and projects associated with the activities of exploration and production of oil and gas.

The most significant funds were raised by the following companies, indirect subsidiaries of Petrobras:

Refinaria Nansei Sekiyu K.K. - It raised short-term funding in the total amount of US\$472, through Sumitomo Mitsui Bank, Mizuho Bank, Bank Tokyo of Mitsubishi and Development Bank Japan, with average maturity of 320 days at an average rate of 1.09% p.a. + spread from 0.5% p.a. to 1.0% p.a. and long-term funding in the amount of US\$7, basically to finance the company's working capital;

Petrobras Energia S.A. - It raised long-term funding in the amount of US\$44, and short-term funding in the amount of US\$353, through Banco HSBC, Banco Rio, Itaú, BBVA, Banco Ciudad, ABN Amro Bank, Banco do Brasil and Banco Santander, mainly through advances on export contracts (ACC) and exchange contracts (ACE), aiming at maintaining the company's working capital and replacing inventories. The long-term operations have final maturity in 2015 and an average interest rate between 6% p.a. and 10% p.a. was made available.

(k) Raising of funds for the international segment (Continued)

P&M Drilling raised long-term funding through Sumitomo Mitsui Banking, in the amount of US\$98, with maturity in 2010. The interest rates range from 3.625% p.a. to 3.9375% p.a. Its purpose is to finance the building of the sonar ship PETROBRAS 10000.

(l) Guarantees and covenants

Financial institutions abroad do not require guarantees from the Company. The financing granted by BNDES - National Bank for Social and Economic Development is guaranteed by a lien on the assets being financed.

On account of a guarantee agreement issued by the Federal Government in favor of Multilateral Loan Agencies, motivated by financings funded by TBG, counter guarantee agreements were signed, which had as signatories the Federal Government, TBG, Petrobras, Petroquisa and Banco do Brasil S.A., where TBG undertakes to entail its revenues to the order of the Brazilian Treasury until the settlement of the obligations guaranteed by the Federal Government. This debt had an outstanding balance of US\$292 and US\$330 at December 31, 2008 and 2007, respectively.

In guarantee of the debentures issued, REFAP has a short-term investment account (bank deposits indexed to credit operations), tied to variations of the Interbank Deposit Certificate - CDI. REFAP has to maintain three times the value of the sum of the last installment due of the amortization of the principal and related charges.

The Company's debt agreements contain affirmative covenants regarding, among other things, provision of information; financial reporting; conduct of business; maintenance of corporate existence; maintenance of government approvals; compliance with applicable laws; maintenance of books and records; maintenance of insurance; payment of taxes and claims; and notice of certain events. The Company's debt agreements also contain negative covenants, including, without limitation, limitations on the incurrence of indebtedness; limitations on the incurrence of liens; limitations on transactions with affiliates; limitations on the disposition of assets; limitation on consolidations, mergers, sales and/or conveyances; negative pledge restrictions; change in ownership limitations; ranking; use of proceeds limitations; and required receivables coverages. Petrobras' management affirms that the Company is in compliance with the covenants within debt agreements.

At December 31, 2008 and 2007, Gaspetro had secured certain debentures issued to finance the purchase of the transportation rights in the Bolivia/Brazil pipeline with 3,000 shares of its interest in TBG, a subsidiary of Gaspetro responsible for the operation of the pipeline.

(m) Lines of credit

At December 31, 2008 and 2007, the Company had fully utilized all available lines of credit for the purchase of imports. Outstanding lines of credit at December 31, 2008 and 2007 were US\$1,132 and US\$1,351, respectively. Lines of credit are included in short-term debt and long-term debt.

14. Project Financings - (Variable Interest Entities - VIE s)

The Company has utilized project financings to provide capital for the continued development of the Company's exploration and production and related projects.

The VIEs associated with the project finance projects are consolidated based on FIN 46(R).

The Company is the primary beneficiary of the VIEs due to the finance lease arrangements. The VIEs are the lessors and the Company is the lessee. At the conclusion of the leased term, the Company will have the option to purchase the leased assets or all the common stock from the VIEs. All risks associated with the use and development of the leased assets rely on the Company. The Company's payments fund the VIEs' third party debt and return on equity payments. The Company's variable interest in these VIEs, the financial lease arrangement, will absorb the majority of expected losses and receive a majority of the expected residual returns.

The Company's responsibility under these contracts is to complete the development of the oil and gas fields, operate the fields, pay for all operating expenses related to the projects and remit a portion of the net proceeds generated from the fields to fund the special purpose companies' debt and return on equity payments. At the conclusion of the

(b) Pension plan - Fundação Petrobras de Seguridade Social - Petros

The Fundação Petrobras de Seguridade Social (Petros) was established by Petrobras as a private, legally separate nonprofit pension entity with administrative and financial autonomy.

The Petros plan is a contributory defined-benefit pension plan introduced by Petrobras in July of 1970, to supplement the social security pension benefits of employees of Petrobras and its Brazilian subsidiaries and affiliated companies. The Petros Plan is now closed to new employees of the Petrobras system since September 2002, and as from July 1, 2007, the Company introduced a new private pension plan, Petros Plan 2.

In order to fund its objectives, Petros receives monthly contributions from the sponsoring companies and retired participants. With the most recent regulatory adjustments of the Plano Petros, the plan now receives from the sponsoring companies, instead of the 12,93% until then practiced on the payroll of the employees who are members of the plan, regular contributions in amounts equal to the amounts of the contributions of the employees and retired employees, in an equal way, amounts which represented, on average, 12% of the participating payroll.

(except when specifically indicated)

16. Employees Postretirement Benefits and Other Benefits (Continued)

(b) Pension plan - Fundação Petrobras de Seguridade Social - Petros (Continued)

Additionally, Petros is funded by income resulting from the investment of these contributions. The Company's funding policy is to contribute to the plan annually the amount determined by actuarial calculations. In the calendar 2008 year, benefits paid totaled US\$932 (US\$835 in 2007).

The Company's liability related to future benefits to plan participants is calculated on an annual basis by an independent actuary, based on the Projected Unit Credit method. The assets that guarantee the pension plan are presented as a reduction to the net actuarial liabilities.

The actuarial gains and losses generated by the differences between the values of the obligation and assets determined based on projections and the actual figures, are respectively included or excluded from the calculation of the net actuarial liability and recorded as Postretirement benefit reserves adjustments net of tax - pension cost, in shareholders equity. Actuarial gains and losses are amortized during the average remaining service period of the active employees of approximately 8 years at December 31, 2008, in accordance with the procedure established by SFAS 87.

The relation between contributions by the sponsors and participants of the Petros Plan, considering only those attributable to the Company and subsidiaries in the 2008 and 2007 financial years was 1.00 to 1.00. The Company's best estimate of contributions expected to be paid in 2009 respective to the pension plan approximates US\$238, with total pension benefit payments in 2009 expected to be US\$923.

According to Constitutional Amendment No. 20, the computation of any deficit in the defined-benefit plan in accordance with the actuarial method of the current plan (which differs from the method defined in SFAS 87), must be equally shared between the sponsor and the participants, by an adjustment to the normal contributions.

Petrobras and its subsidiaries sponsoring the Petros plan, trade unions and Petros executed a Financial Commitment Agreement on October 23, 2008, after legal homologation on August 25, 2008, to cover commitments with pension plans in the amount of US\$2,483 updated retroactively to December 31, 2006 by the amplified consumer price index (IPCA) + 6% p.a., which will be paid in semi-annually installments with interest of 6% p.a. on the debtor balance updated by the IPCA, for the next 20 years, as previously agreed during the renegotiation. On the same date, Petrobras used the balance of government securities in the amount of US\$623 (US\$670 at December 31, 2007), to settle part of the obligations with the Petros Plan, as set forth in the Term of Financial Commitment.

At December 31, 2008, the balance of the obligation of Petrobras and subsidiaries referring to the Financial Commitment Agreement was US\$1,850, of which US\$36 matures in 2009.

The Company's obligation, through the Financial Commitment Agreement, presents a counterpart to the concessions made by the members/beneficiaries of the Petros Plan in the amendment of the plan's regulations, in relation to the benefits, and in the closing of existing litigations.

At December 31, 2008, Petrobras had long-term National Treasury Notes in the amount of US\$1,608 (US\$1,907 at December 31, 2007), acquired to balance liabilities with Petros, which will be held in the Company's portfolio and used as a guarantee for the Financial Commitment Agreement.

As from July 01, 2007, the Company implemented the new supplementary pension plan, a Variable Contribution (CV) or mixed plan, called Petros Plan 2, for employees with no supplementary pension plan.

16. Employees Postretirement Benefits and Other Benefits (Continued)**(b) Pension plan - Fundação Petrobras de Seguridade Social - Petros (Continued)**

A portion of this plan with defined benefits characteristics refers to the risk coverage for disability and death, a guarantee of a minimum benefit and a lifetime income, and the related actuarial commitments are recorded according to the projected credit unit method. The portion of the plan with defined contribution characteristics, earmarked for forming a reserve for programmed retirement, was recognized in the results for the year as the contributions are made. In fiscal year 2008, the contribution of Petrobras and subsidiaries to the defined contribution portion of this plan was US\$267.

Petrobras and the other sponsors fully assumed the contributions corresponding to the period in which the participants had no plan. This past service shall consider the period as from August 2002, or from the date of hiring, until August 29, 2007. The plan will continue to admit new subscribers after this date but no longer including any payment for the period relating to past service.

The disbursements related to the cost of past service will be made on a monthly basis over the same number of months during which the participant had no plan and, therefore, should cover the part related to the participants and the sponsors.

Plan assets

Plan assets are invested primarily in government securities, investment funds, equity instruments and properties.

The table below describes the types of plan assets:

	As of December 31,			
	2008		2007	
	Defined-Benefits	Variable Contribution	Defined-Benefits	Variable Contribution
Government securities	43%	-	41%	-
Investments funds	38%	92%	33%	100%
Equity instruments	12%	8%	20%	-
Other	7%	-	6%	-
	100%	100%	100%	100%

Petros provided certain financing for the continued development of the Albacora oil and gas field located in the Campos basin, that is classified as securities of other related parties (see Note 14).

The investment portfolio of the Petros Plan and Petros 2 at December 31, 2008 was composed of: 70% of fixed income, with expected profitability of 7.37% p.a.; 24% of variable income, with expected profitability of 6% p.a.; and 6% of other investments (transactions with members, real estate and infrastructure projects), with expected profitability of 8% p.a., which resulted in an average interest rate of 7.02% p.a.

Plan assets include the following securities of related parties:

	As of December 31,	
	2008	2007
Petrobras common shares	134	405
Petrobras preferred shares	219	602
Government controlled companies	112	129
Government securities	5,712	6,806
Securities of other related parties	103	172
	6,280	8,114

The Petros Plan has 43% of its investments in government bonds, of which 94% are represented by NTN-B, which through entailment with the Department of Supplementary Pensions, will be held until maturity.

(c) Petrobras Internacional Braspetro B.V. - PIB BV**Petrobras Energía S.A. - PEPSA (including PESA)****Defined contribution plan****Supplementary Pension Plan for Personnel**

In 2005, Petrobras Energia S.A. (Pesa) implemented a voluntary plan for all employees who met certain conditions. The company contributes with amounts equal to the contributions made by the employees, in accordance with the contribution specified for each salary level.

The cost of the plan is recognized in accordance with the contributions that the company makes, which at December 31, 2008 was equivalent to US\$3 (US\$2 at December 31, 2007).

Defined benefit plan

Termination Indemnity Plan

This is a benefit plan in which employees who meet certain targets are eligible on retirement to receive one month's salary for each year they have worked in the company, according to a decreasing scale, according to the number of the years the plan has existed.

Compensating Fund

This benefit is available to all Pesa employees who joined the defined contribution plans in force in the past and who joined the company prior to May 31, 1995 and have accumulated the required time of service. The benefit is calculated in complement to the benefits awarded under these plans and by the retirement system, so that the total benefit received by each employee is equivalent to the amount defined in this plan.

16. Employees Postretirement Benefits and Other Benefits (Continued)

(c) Petrobras Internacional Braspetro B.V. - PIB BV (Continued)

Defined benefit plan (Continued)

In accordance with Pesa's bylaws, based on a proposal made in the general meeting by the Board of Directors, the Company contributes to the fund up to a maximum amount equal to 1.5% of the net income each year.

If a surplus is recorded and duly certified by an independent actuary in the funds allocated to trusts for payment of the defined benefits awarded by the plan, Pesa may use these funds simply by notifying the trustee of this fact.

BNansei Sekiyu S.A.

Defined benefit pension plan

The Nansei Sekiyu Refinery offers its employees a programmed supplementary retirement benefits plan, a defined benefit plans, where the members in order to become eligible for the benefit need to be at least 50 years old and have 20 years service in the company. Contributions are made only by the sponsor. The plan is managed by the Sumitono Trust.

(d) Other defined contribution plans

The subsidiaries Transpetro and some subsidiaries of Petrobras sponsor defined contribution retirement plans for their employees, such as: Petroquímica Triunfo S.A. and Transportadora Brasileira Gasoduto Bolívia-Brasil (TBG).

(e) Health care benefits - Assistência Multidisciplinar de Saúde (AMS)

Petrobras and its Brazilian subsidiaries maintain a health care benefit plan (AMS), which offers defined benefits and covers all employees (active and inactive) together with their dependents. Those plans are managed by the Company, with the employees contributing fixed amounts to cover principal risks and a portion of the costs relating to other types of coverage in accordance with participation tables defined by certain parameters including salary levels, besides the Medicine Benefit, which provides special terms on the acquisition of certain medicines from participating drugstores, located throughout Brazil.

The Company's commitment related to future benefits to plan participants is calculated on an annual basis by an independent actuary, based on the Projected Unit Credit method. The health care plan is not funded or otherwise collateralized by assets. Instead, the Company makes benefit payments based on costs incurred by plan participants.

For measurement purposes, a 8.5% annual rate of increase in the per capita cost of covered health care benefits was assumed upon adoption of SFAS 106. The annual rate was assumed to decrease to 4% from 2009 to 2037.

(except when specifically indicated)

16. Employees Postretirement Benefits and Other Benefits (Continued)**(f) Funded status of the plans (Continued)**

Components of Net Periodic Benefit Cost for next year:

Amounts included in accumulated other comprehensive income at December 31, 2008, that are expected to be amortized into net periodic postretirement cost during 2009 are provided below:

	Pension Plans Defined Benefits	Pension Plans Variable Contribution	Health Care Benefits
Unrecognized net actuarial loss (gain)	(1,719)	(28)	(1,812)
Unrecognized prior service cost	-	1	-

The main assumptions adopted in 2008 and 2007 for the actuarial calculation are summarized as follows:

	2008		2007	
	Pension Benefits	Health Care Benefits	Pension Benefits	Health Care Benefits
Discount rates	Inflation: 5% to 4% p.a. + 7.7% p.a.	Inflation: 5% to 4% p.a. + 7.7% p.a.	Inflation: 4% p.a.+ 6% p.a.	Inflation: 4% p.a. + 6% p.a.
Rates of increase in compensation levels	Inflation: 5% to 4% p.a. + 2.24% p.a.	Inflation: 5% to 4% p.a. + 2.24% p.a.	Inflation: 4% p.a.+ 2.4% p.a.	Inflation: 4% p.a. + 2.4% p.a.
Expected long-term rate of return on assets	Inflation: 5% p.a. + 7.02% p.a.	Not applicable	Inflation: 4% p.a. + 6.32% p.a.	Not applicable
Mortality table	AT 2000*	AT 2000*	AT 2000 *	AT 2000*

(*) Segregated by sex (male and female).

Petrobras has aggregated information for all defined benefit pension plans. The domestic benefit plans of Petrobras, BR Distribuidora, Petroquisa, and REFAP contain similar assumptions and the benefit obligation related to PEPSA, the international plan, is not significant to the total obligation and thus has also been aggregated. All Petrobras group pension plans have accumulated benefit obligation in excess of plan assets.

The determination of the expense and liability relating to the Company's pension plan involves the use of judgment in the determination of actuarial assumptions. These include estimates of future mortality, withdrawal, changes in compensation and discount rate to reflect the time value of money as well as the rate of return on plan assets. These assumptions are reviewed at least annually and may differ materially from actual results due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates or longer or shorter life spans of participants.

According to the requirements of SFAS 87, and subsequent interpretations, the discount rate should be based on current prices for settling the pension obligation. Applying the precepts of SFAS 87 in historically inflationary environments such as Brazil creates certain issues as the ability for a company to settle a pension obligation at a future point in time may not exist as long-term financial instruments of suitable grade may not exist locally as they do in the United States.

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(except when specifically indicated)

16. Employees Postretirement Benefits and Other Benefits (Continued)**(f) Funded status of the plans (Continued)**

Although the Brazilian market has been demonstrating signs of stabilization under the present economic model, as reflected in market interest rates, it is not yet prudent to conclude that market interest rates will be stable.

(g) Cash contributions and benefit payments

In 2008, the Company contributed US\$286 to its pension plans. In 2009, the Company expects contributions to be approximately US\$230. Actual contribution amounts are dependent upon investment returns, changes in pension obligations and other economic factors. Additional funding may ultimately be required if investment returns are insufficient to offset increases in plan obligations.

The following benefit payments, which include estimated future service, are expected to be paid by the pension fund in the next 10 years:

	Pension Plans		Health
	Defined	Variable	Care
	Benefits	Contribution	Benefits
2009	921	2	211
2010	1,010	3	238
2011	1,107	4	266
2012	1,214	6	294
2013	1,326	9	327
Subsequent five years	8,535	85	2,140

17. Shareholders Equity**(a) Capital**

The Company's subscribed and fully paid-in capital at December 31, 2008 and 2007, consisted of 5,073,347,344 common shares and 3,700,729,396 preferred shares as retroactively restated for the stock split discussed below. The preferred shares do not have any voting rights and are not convertible into common shares and vice-versa. Preferred shares have priority in the receipt of dividends and return of capital.

The Extraordinary General Meeting held on March 24, 2008, decided to effect a split of each Company's share into two, resulting: (a) in a free distribution of 1 (one) new share of the same type for each original share and based on the shareholding structure at April 25, 2008; (b) in a free distribution of 1 (one) new American Depository Shares (ADS)

of the same type for each original ADS and based on the shareholding structure at April 25, 2008. At the same date, an amendment to article 4 of the Company's by-laws to cause capital be divided into 8,774,076,740 shares, of which 5,073,347,344 are common shares and 3,700,729,396 are preferred shares, with no nominal value, was approved. This amendment to the Company's bylaws is effective from April 25, 2008. The relation between the ADS and shares of each class remains of 2 (two) shares for one ADS. All share, ADS, per share and per ADS information in the accompanying financial statements and notes have been adjusted to reflect the result of the share split.

17. Shareholders Equity (Continued)

(a) Capital (Continued)

On May 11, 2007, the Board of Directors approved the change in the ratio of underlying shares issued in the Company's name and the American Depositary Shares (ADS's) from 4 (four) shares for each ADS to 2 (two) shares for each ADS. This change came into effect on July 2, 2007. All per ADS information in the accompanying financial statements and notes has been adjusted to reflect the result of the change in the ratio of underlying shares issued in the Company's name and the ADS's.

Current Brazilian law requires that the Federal Government retain ownership of 50% plus one share of the Company's voting shares.

Shareholders at the Extraordinary General Meeting held June 01, 2006, approved the incorporation of shares in Petroquisa by Petrobras, pursuant to the re-ratification of the Protocol of Merger and Incorporation on the share incorporation transaction executed by the two companies. The Board of Directors of the Company approved the issue of 886,670 preferred shares of the Company in connection with the incorporation of shares in Petroquisa by Petrobras.

On December 15, 2006, pursuant to article 29, section II of the Company By-laws, the Board of Directors authorized the buyback of up to 91,500,000 of the preferred shares in circulation for future cancellation, using funds from the profit reserves.

The authorized timeframe for the repurchase expired in 2007 and the buyback option had not been exercised.

The Extraordinary General Meeting, held together with the Ordinary General Meeting on April 4, 2008, approved the increase of the Company's capital from US\$20,816 (R\$52,644 million) to US\$36,194 (R\$78,967 million), through the capitalization of part of retained earnings recorded during previous years amounting to US\$14,782 (R\$25,302 million) and part of the capital reserves, amounting to US\$596 (R\$1,020 million), consisting of US\$99 (R\$169 million) of the Merchant Navy AFRMM subsidy reserve and US\$497 (R\$851 million) from the tax incentives reserve, and without issuing any new shares, in accordance with article 169, paragraph 1 of Law N° 6404/76.

At an Extraordinary General Meeting held together with the Ordinary General Meeting, on April 2, 2007, the shareholders of Petrobras approved an increase in the Company's capital to US\$20,816 (R\$52,644 million) through the capitalization of revenue reserves accrued during previous financial years, in the amount of US\$1,647 (R\$3,372 million), and of statutory reserve, in the amount of US\$492 (R\$1,008 million), and without the issuance of new shares, in accordance with article 169, paragraph 1, Law No. 6.404/76.

At an Extraordinary General Meeting held together with the Ordinary General Meeting, on April 3, 2006, the shareholders of the Company approved an increase in the Company's capital to US\$18,677 (R\$48,248 million) through the capitalization of retained earnings accrued during previous financial years, in the amount of US\$6,976 (R\$15,012 million), and without the issuance of new shares, in accordance with article 169, paragraph 1, Law

no. 6,404/76.

(b) Dividends and interest on shareholders' equity

In accordance with the Company's by-laws, holders of preferred and common shares are entitled to a minimum dividend of 25% of annual net income as adjusted under Brazilian Corporate Law. In addition, the preferred shareholders have priority in the receipt of an annual dividend of at least 3% of the book value of the shares or 5% of the paid-in capital in respect of the preferred shares as stated in the statutory accounting records. As of

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

17. Shareholders Equity (Continued)

(b) Dividends and interest on shareholders equity (Continued)

January 1, 1996, amounts attributed to shareholders as interest (see below) can be deducted from the minimum dividend computation. Dividends are paid in Brazilian reais. The Company paid US\$158 in dividends during the year ended December 31, 2008 (2007 - US\$778, 2006 - US\$760). No withholding tax is payable on distributions of dividends made since January 1, 1996.

The Company provides either for its minimum dividends or for the total interest on shareholders equity where the tax benefit has been recognized as of December 31.

Brazilian corporations are permitted to attribute interest on shareholders equity, which may either be paid in cash or be used to increase capital stock. The calculation is based on shareholders equity amounts as stated in the statutory accounting records and the interest rate applied may not exceed the non-current interest tax (long-term interest rate or the TJLP) as determined by the Brazilian Central Bank. Such interest may not exceed the greatest of 50% of net income or 50% of retained earnings plus revenue reserves. Interest on shareholders equity, is subject to withholding tax at the rate of 15%, except for untaxed or exempt shareholders, as established by Law No. 9,249/95. The Company paid US\$4,589 in interest on shareholders equity during the year ended December 31, 2008 (2007 - US\$3,225, 2006 - US\$2,453).

Interest on shareholders equity was included with the proposed dividend for the year, as established in the Company s by-laws, and generated an income tax and social contribution credits of US\$995 (US\$998 in 2007, and US\$994 in 2006) (see Note 3).

The proposal for 2008 dividends that is being submitted by the Petrobras Board of Directors for approval of the shareholders at the Ordinary General Meeting to be held on April 08, 2009, in the amount of US\$4,242, conforms to the by-laws in regard to guaranteed rights of preferred shares (article 5), include interest on capital, already approved by the Board of Directors.

The dividends and the portion of the interest on shareholders equity will be paid on a date to be established by the Ordinary General Meeting of Shareholders. These amounts will be monetarily restated from December 31, 2008, to the initial date of payment, according to the variation in the SELIC rate.

On April 04, 2008, the Ordinary General Meeting approved dividends referring to the year ended December 31, 2007, in the amount of US\$3,715, conforms to the by-laws in regard to guaranteed rights of preferred shares (article 5), include interest on shareholders equity, already approved by the Board of Directors. The dividends were monetarily restated in accordance with the SELIC rate variation as from December 31, 2007 to the initial date of payment.

The remaining balance of dividends relating to the financial year of 2007, approved by the Ordinary General Meeting held on April 04, 2008, in the amount of US\$495 (after deducting those distributed earlier to shareholders on

January 23, March 31 and April 30, 2008, in the amount of US\$3,220), were paid out to shareholders on June 03, 2008.

Interest on shareholders' equity was included with the proposed dividend for the year, as established in the Company's By-laws.

On April 02, 2007, the Ordinary General Meeting approved dividends referring to the year end 2006, amounting to US\$3,693, including interest on shareholders' equity, for which US\$2,052 were made available to the shareholders on January 04, 2007, based on the share position as of October 31, 2006, US\$923 was provided on March 30, 2007, based on the share position as of December 28, 2006, and the remaining balance

of US\$718, were provided within the legal term on May 17, 2007, based on the share position as of April 02, 2007.

These dividends were restated according to the Selic interest rate from December 31, 2006, to May 17, 2007, the payment date.

Brazilian law permits the payment of dividends only from retained earnings as stated in the statutory accounting records. At December 31, 2008, the Company had appropriated all such retained earnings.

In addition, at December 31, 2008, the undistributed reserve in appropriated retained earnings, amounting to US\$12,123, may be used for dividend distribution purposes, if so approved by the shareholders, however, the Company's stated intent is to use such reserve to fund working capital and capital expenditures.

(c) Basic and diluted earnings per share

Basic and diluted earnings per share amounts have been calculated as follows:

	2008	Year ended December 31, 2007	2006
Net income for the year	18,879	13,138	12,826
Less priority preferred share dividends	(749)	(813)	(577)
Less common shares dividends, up to the priority preferred shares dividends on a per-share basis	(1,027)	(1,115)	(791)
Remaining net income to be equally allocated to common and preferred shares	17,103	11,210	11,458
Weighted average number of shares outstanding			
Common/ADS	5,073,347,344	5,073,347,344(**)	5,073,347,344(**)
Preferred/ADS	3,700,729,396	3,700,729,396(**)	3,699,806,288(**)

Basic and diluted earnings per share			
Common and preferred	2.15	1.50(**)	1.46(**)
Basic and diluted earnings per ADS	4.30	3.00(**)	2.92(*)(**)

(*) Restated for the effect of the change in the ratio of underlying shares issued in the Company's name and the American Depositary Shares on July 2, 2007.

(**) Considers effect of 2 for 1 stock split that occurred on April 25, 2008.

(d) Capital reserves

AFRMM

Relates to the Merchant Marine (AFRMM) freight surcharges levied in accordance with relevant legislation. These funds are used to purchase, enlarge or repair vessels of the Company's transport fleet.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

17. Shareholders Equity (Continued)

(d) Capital reserves (Continued)

Fiscal incentive reserve

This reserve consists of investments in tax incentives, arising from allocations of part of the Company's income tax. It relates to tax incentives in the Northeast, within the region covered by the Northeast Development Agency (ADENE), granting a 75% reduction in income tax payable, calculated on the profits of the exploration of the incentivized activities. Up to December 31, 2008, this incentive amounted to US\$219 (US\$712 on December 31, 2007), which may only be utilized to offset losses or for a capital increase, as provided for in Article 545 of the Income Tax Regulations and has been accounted for under the flow through method.

On May 10, 2007, the Brazilian Federal Revenue Office recognized Petrobras' right to deduct this incentive from income tax payable, covering the tax years of 2006 until 2015.

The donations and subsidies for investment recorded in the accounting up to December 31, 2007 will be maintained until they have been totally used.

(e) Appropriated retained earnings

Brazilian Law and the Company's by-laws require that certain appropriations be made from retained earnings to reserve accounts annually. The purpose and basis of appropriation to such reserves are as follows:

Legal reserve

This reserve is a requirement for all Brazilian corporations and represents the annual appropriation of 5% of net income as stated in the statutory accounting records up to a limit of 20% of capital stock. The reserve may be used to increase capital or to compensate for losses, but may not be distributed as cash dividends.

Undistributed earnings reserve

This reserve is established in accordance with Article 196 of Law No. 6,404/76 to fund the Company's annual investment program. The destination of net income for the year ended December 31, 2006, includes retention of profits of US\$8,004 with a US\$7,775 amount, arising from net income for the year, and the US\$229 retaining earnings remaining balance. This proposal was intended to partially meet the annual investment program established in the 2007 capital budget, ad referendum of the General Shareholders' Meeting of April 2, 2007.

The destination of net income for the year ended December 31, 2007, includes retention of profits of US\$7,954 with a US\$7,951 amount, arising from net income for the year, and the US\$3 retaining earnings remaining balance. This proposal was intended to partially meet the annual investment program established in the 2008 capital budget, ad

referendum of the General Shareholders Meeting held on April 4, 2008.

The destination of net income for the year ended December 31, 2008, includes retention of profits of US\$10,790 with a US\$10,175 amount, arising from net income for the year, and the US\$615 retaining earnings remaining balance. This proposal is intended to partially meet the annual investment program established in the 2009 capital budget, ad referendum of the General Shareholders Meeting to be held on April 8, 2009.

(except when specifically indicated)

17. Shareholders Equity (Continued)

(e) Appropriated retained earnings (Continued)

Statutory reserve

This reserve is provided through an amount equivalent to a minimum of 0.5% of subscribed and fully paid in capital at year-end. The reserve is used to fund the costs incurred with research and technological development programs. The accumulated balance of this reserve cannot exceed 5% of the capital stock, according to Article 55 of the Company's by-laws.

18. Domestic and International Acquisitions

(a) Goodwill

Goodwill represents the excess of the purchase price over the estimated fair value of the net assets acquired in the acquisition of a business. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets (SFAS 142), the Corporation's goodwill is not amortized, but is tested for impairment at a reporting unit level, which is an operating segment or one level below an operating segment. The Company conducts its annual goodwill impairment review in the fourth quarter of each year and whenever events and changes in circumstances suggest that the carrying amount may not be recoverable.

Goodwill impairment encompasses a two step approach. In the first step the Company compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value is lower than the carrying amount including goodwill, there is an indication of impairment loss that is measured by performing the second step. In the second step, the estimated fair value from the first step is used as the purchase price in a hypothetical acquisition of the reporting unit. Purchase business combination accounting rules are followed to determine a hypothetical purchase price allocation to the reporting unit's assets and liabilities. The residual amount of goodwill that results from this hypothetical purchase price allocation is compared to the recorded amount of goodwill for the reporting unit, and the recorded amount is written down to the hypothetical amount, if lower.

During the fourth quarter of 2008, the Company recorded a goodwill impairment of US\$223 in Petrobras' indirect subsidiary in United States, Pasadena Refining System, that encompasses a refinery and a trading company. The primary factors for the goodwill impairment were: (a) a decline in the price of crude oil and oil products (b) a gross margin decrease of refined products in the wholesale market, and (c) a decrease in the demand for refined products.

(b) Acquisition of Japanese Refinery and other assets

On November 09, 2007, Petrobras signed a share purchase agreement to buy 87.5% of the shares of the Japanese company Nansei Sekiyu Kabushiki Kaisha (NSS) from TonenGeneral Sekiyu Kabushiki Kaisha (TGSK), a subsidiary of ExxonMobil for an amount of approximately US\$50. The acquisition includes a refinery with a capacity of 100,000 bpd, which refines light oil and produces high quality oil products. It also comprises an oil and oil products terminal with a storage capacity of 9.6 million barrels, three piers with a capacity to receive ships laden with up to 97,000 deadweight tonnage (dwt) and a single point mooring for Very Large Crude Carriers (VLCC) of up to 280,000 dwt.

The transfer of the share control took place in April 2008. Due to immateriality, pro forma information has not been presented.

(c) Incorporation of a biofuels company - Petrobras Biocombustível S.A.

With the creation of the subsidiary Petrobras Biocombustível S.A. on June 16, 2008, Petrobras took advantage of the business opportunity arising from the increase in the worldwide demand for biofuels and also strengthened its position as a company committed to the environment and social development. In addition to contributing to a reduction in global warming, biofuels help generate employment and income in rural areas with the use of family agriculture in the

production of the raw materials.

UBiodiesel refineries

On July 29, 2008, Petrobras' first refinery for commercial production of biodiesel was inaugurated in Candeias in the state of Bahia. Usina de Quixadá in the state of Ceará was inaugurated on August 20, 2008, and in January 2009, Usina de Montes Claros in the state of Minas Gerais entered into production. The three refineries have the same production capacity, totalling 170 million liters per year. In 2008, the refineries that had been inaugurated were operated by Petróleo Brasileiro S.A. - Petrobras, while Petrobras Biocombustível S/A was awaiting definition of certain regulatory questions involving authorization to start production, issued by the Brazilian Agency for Petroleum, Natural Gas and Biofuels (ANP). This authorization was granted on January 8, 2009.

(except when specifically indicated)

18. Domestic and International Acquisitions (Continued)

(c) Incorporation of a biofuels company - Petrobras Biocombustível S.A. (Continued)

UBiodiesel refineries (Continued)

The implementation of the three refineries is accompanied by a program for development of the regional agricultural market, which will supply the raw material for the production of biodiesel. Thus there will be an increase in the creation of employment and income, always observing entrepreneurial, social and environmental sustainability. The Company follows the premises of the National Program for Production and Use of Biodiesel and is committed to obtaining the Fuel Seal, which has already been awarded to the Candeias and Quixadá refineries and which the Montes Claro refinery is in the final stage of obtaining.

In the first quarter of 2009, Petrobras Biocombustível will deliver the volume negotiated in ANP's 12th auction, totalling 14.5 millions liters from the three biodiesel refineries.

International agreement for encouraging development of family agriculture

Petrobras Biocombustível, GTZ (German Technical Cooperation) and Empresa de Assistência Técnica e Extensão Rural do Estado do Ceará (Ematerce) entered into an agreement that will extend the providing of technical assistance services to family farmers that provide raw material to the Quixadá Refinery in the state of Ceará.

This partnership will increase the support for social organization and strengthening of family agriculture in the state of Ceará in a sustainable way. In all there will be 47 technical professionals and consultants provided by the three partners, who will carry out the activities established by this agreement for a period of two years, benefiting around eight thousand family farmers from the hinterland (Sertão Central) of Ceará, of the Quixadá region.

GTZ - a German government owned company that manages technical cooperation projects in partnership with public and private institutions in various parts of the world - will contribute with its experience in supporting family agriculture.

UBioenergy Complexes

Steps have been initiated for transfer of the shareholding interest of Petróleo Brasileiro S.A. - Petrobras in the company Participações em Complexos Bioenergéticos S.A. - PCBIOS to Petrobras Biocombustível S.A.

PCBIOS is a closely held joint stock company incorporated under prevailing law in Brazil, formed by Petrobras and Mitsui & Co. with a 50% shareholding interest each, whose corporate purpose is to hold interests in bioenergy complexes as a shareholder, or in any other company or undertaking in Brazil, especially for investment in companies set up for the development of bioenergy projects.

(d) Acquisition of distribution interests in Chile

On August 07, 2008, Petrobras signed an agreement to purchase ExxonMobil's interest in Esso Chile Petrolera and in other associated Chilean companies.

The agreement encompasses the retail, industrial and aviation fuels businesses (ExxonMobil's chemical, lubricants and special products businesses in Chile are not included in the agreement) and the transfer of control is scheduled to take place in the second quarter of 2009, together with the payment of approximately US\$400. Due to immateriality, pro forma information has not been presented.

(except when specifically indicated)

18. Domestic and International Acquisitions (Continued)

(e) Acquisition in Argentina

On September 29, 2008, was concluded the acquisition by PESA in Argentina of 25.67% of the assets of the Sierra Chata blocks, already producing natural gas, and of 52.37% of the assets of Parva Negra, in the exploration stage, from ConocoPhillips for the total amount of US\$77, increased primarily of changes in working capital. Due to immateriality, pro forma information has not been presented.

(f) Acquisition option of the remaining 50% of Pasadena refinery

In a preliminary decision handed down on October 24, 2008, in the arbitration process between Petrobras America Inc. and others (PAI) and Astra Oil Trading NV and others (ASTRA), which is in progress in accordance with the arbitration rules of the International Centre for Dispute Resolution, the exercise of the put option exercised by ASTRA with respect to PAI of the remaining 50% of the shares of ASTRA in Pasadena Refinery Systems Inc. (PRSI), a company which holds interests in Refinaria de Pasadena, and in its related trading company, both with operational offices in Texas, was considered valid. The decision also determined as valid the exercise of the sale option, by its affiliated companies, of PRSI Trading Company LP, a company set up for trading, selling and distributing crude oil and products refined by the refinery.

The operating, management and financial responsibilities were transferred to PAI, based on this preliminary decision. However, the final price to be paid for these remaining shares will be defined in the final decision to be handed down in the arbitration, since the parties disagree with respect to the value to be attributed to the shares.

No business combination has been recorded as there was no transfer of shares, exchanges of consideration and transfer of effective control.

(g) Acquisition of Juiz de Fora Thermoelectric Power Station

On October 04, 2007, Petrobras purchased from Energisa S.A. 100% of the shares of the Juiz de Fora Thermoelectric Power Station, a natural gas powered power station, with an installed power-generation capacity of 87 MW, and which has supply contracts to sell energy until 2022.

In addition, Petrobras Comercializadora de Energia Ltda. and Energisa S.A. entered into a contract for use of the rights to sell energy with the subsidiaries of Energisa in the Northeast of Brazil. The purchase price was US\$119 (R\$210 million). Due to immateriality, pro forma information has not been presented.

(h) Refinaria Abreu e Lima

Refinaria Abreu e Lima S.A. was established on March 7, 2008, as a closely held joint stock company. The company has its head office at Complexo Industrial Portuário do SUAPE, in the municipality of Ipojuca in the State of Pernambuco and its corporate purpose is the construction and operation of an oil refinery, as well as refining,

processing, trading, importing, exporting and transporting oil and oil products, correlated products and biofuels.

The start-up of operations is forecast for the second half of 2010, reaching full capacity in 2011. The investment in Refinaria Abreu e Lima will be US\$4,050 and it will have the capacity to process 200,000 barrels of petroleum per day. Around 65% of the processed volume will be diesel oil, the fuel that is most consumed in Brazil. Kitchen gas (LPG), petrochemical naphtha and coke (a solid fuel used in

(h) Refinaria Abreu e Lima (Continued)

ironworks, the cement industry, thermal electric power stations and the aluminum industry) will also be produced.

The project for the refinery is particularly advanced with respect to technology. This oil refinery will be the Petrobras first unit to process 100% heavy crude oil. In addition, it will have the capacity to produce oil products with low sulfur levels. Refinaria Abreu e Lima will start up its operations producing diesel with 50 ppm of sulfur and will be capable of producing diesel with 10 ppm of sulfur, the current European standard.

19. Commitments and Contingencies

Petrobras is subject to a number of commitments and contingencies arising in the normal course of its business. Additionally, the operations and earnings of the Company have been, and may be in the future, affected from time to time in varying degrees by political developments and laws and regulations, such as the Federal Government's continuing role as the controlling shareholder of the Company, the status of the Brazilian economy, forced divestiture of assets, tax increases and retroactive tax claims, and environmental regulations. The likelihood of such occurrences and their overall effect upon the Company are not predictable.

The Company currently has several contracts to purchase crude oil, diesel fuel and other oil products, which require the Company to purchase a minimum of approximately 134,031 barrels per day at respective current market prices.

Petrobras provided guarantees to the ANP for the minimum exploration program defined in the concession contracts for exploration areas, totaling US\$2,513 (US\$2,984 in 2007). Out of this total, US\$1,154 (US\$1,302 in 2007) represents a pledge on the oil to be extracted from previously identified fields already in production, for areas in which the Company had already made commercial discoveries or investments. For areas whose concessions were obtained by bidding from the ANP, Petrobras has given bank guarantees totaling US\$522 through December 31, 2008 (US\$506 in 2007).

Petrobras entered into an agreement with Yacimientos Petrolíferos Fiscales Bolivianos (YPFB), to purchase a total of 201,9 billion m³ of natural gas during the term of the agreement, undertaking to purchase minimum annual volumes at a price calculated according to a formula indexed to the price of fuel oil. The agreement is valid until 2019 and will be renewed until the total contracted volume has been consumed. The pipeline achieved an average throughput of 29.3 million cubic meters per day during 2008.

The Company has exclusive supply contracts with certain service stations. These contracts are typically for seven years and require the Company to sell product at market prices.

(a) Litigation

The Company is a defendant in numerous legal actions involving civil, tax, labor, corporate and environment issues arising in the normal course of its business. Based on the advice of its internal legal counsel and management's best judgment, the Company has recorded accruals in amounts sufficient to provide for losses

F-72

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES**

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

19. Commitments and Contingencies (Continued)**(a) Litigation (Continued)**

that are considered probable and reasonably estimable. At December 31, 2008 and 2007, the respective amounts accrued by type of claims are as follows:

	As of December 31,	
	2008	2007
Labor claims	50	58
Tax claims	81	149
Civil claims	220	155
Commercials claims and other contingencies	28	20
Total	379	382
Current contingencies	(23)	(30)
Long-term contingencies	356	352

As of December 31, 2008 and 2007, in accordance with Brazilian law, the Company had paid US\$798 and US\$977, respectively, into federal depositories to provide collateral for these and other claims until they are settled. These amounts are reflected in the balance sheet as restricted deposits for legal proceedings and guarantees.

Brasoil and Petrobras participate in several contracts relating to the conversion and acquisition of P-36 Platform, which suffered a total loss in 2001 accident. Under these contracts, Brasoil and Petrobras have committed to depositing any insurance reimbursement, in the amount of US\$175, in case of an accident, in favor of a Security Agent for the payment of creditors, in accordance with contractual terms. A legal action brought by companies that claim part of these payments is currently in progress in a London Court, since Brasoil and Petrobras understand to be entitled to such amounts in accordance with the distribution mechanism established in the contract.

At the current stage of the proceedings, Petromec, the contractual party involved, filed a claim against Brasoil and Petrobras in the amount of US\$154 plus interest, on September 29, 2008. The defense for Brasoil and Petrobras should be filed in May 2009. The hearing of Petromec's claim should take place in 2010.

Plaintiff: Porto Seguro Imóveis Ltda.

On November 23, 1992, Porto Seguro Imóveis Ltda., a minority shareholder of Petroquisa, filed a suit against Petrobras in the State Court of Rio de Janeiro related to alleged losses resulting from the sale of a minority holding by Petroquisa in various petrochemical companies included in the National Privatization Program introduced by Law No. 8,031/90.

In this suit, the plaintiff claims that Petrobras, as the majority shareholder in Petroquisa, should be obliged to reinstate the loss caused to the net worth of Petroquisa, as a result of the acts that approved the minimum sale price of its holding in the capital of privatized companies. A decision was handed down on January 14, 1997, that considered Petrobras liable with respect to Petroquisa for losses and damages in an amount equivalent to US\$3,406.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

19. Commitments and Contingencies (Continued)

(a) Litigation (Continued)

Plaintiff: Porto Seguro Imóveis Ltda. (Continued)

In addition to this amount, Petrobras was required to pay the plaintiff 5% of the value of the compensation as a premium (see art. 246, paragraph 2 of Law No. 6,404/76), in addition to attorneys' fees of approximately 20% of the same amount. However, since the award would be payable to Petroquisa and Petrobras holds 99.0% of its capital, the effective disbursement if the ruling is not reversed will be restricted to 25% of the total award.

In performance of the decision published on June 05, 2006, the Company is now awaiting assignment of the agenda to re-examine the matter relating to the blocking of Petrobras' Special Appeal. If the award is not reversed, the indemnity estimated to Petroquisa, including monetary correction and interest, would be US\$5,854. As Petrobras owns 100% of Petroquisa's share capital, a portion of the indemnity estimated at US\$3,863, will not represent a disbursement from Petrobras' Group. In case of loss, Petrobras would have to pay US\$293 to Porto Seguro and US\$1,171 to Lobo & Ibeas by means of attorney's fees, however based on the opinion of its legal advisers, the Company does not expect to obtain an unfavorable ruling in this case and considers the risk of loss with respect to this lawsuit to be possible.

Plaintiff: The Fishermen's Federation of the State of Rio de Janeiro (FEPERJ)

On behalf of its members, FEPERJ is making a number of claims for indemnification as a result of an oil spill in Guanabara Bay which occurred on January 18, 2000. At the time, Petrobras paid out extrajudicial indemnification to all who proved they were fishermen when the accident happened. According to the records of the national fishermen's registry, only 3,339 people were eligible to claim indemnification.

On February 2, 2007, the decision, partially accepting the expert report, was published and, on the pretext of quantifying the amount of the conviction, established that the parameters for the respective calculation based on the criteria would result in an amount of US\$472. Petrobras appealed against this decision before the Court of Appeals of Rio de Janeiro, as the parameters stipulated in that the decision had already been specified by the Court of Appeals of Rio de Janeiro, itself. The appeal was accepted. On June 29, 2007, the decision of the First Civil Chamber of the Court of Appeals of the State of Rio de Janeiro was published, denying approval of the appeal filed by Petrobras and approving the appeal lodged by FEPERJ, which presents a significant increase in the value of the damages, since in addition to having maintained the 10- year indemnification period, it increased the number of fishermen included in the claim. Special appeals were lodged against the decision by the Company, which is awaiting a hearing before the Superior Court of Justice (STJ). In accordance with the Company's expert assistant calculation, the recorded amount of US\$15 represents the award that will be set by the court at the end of the process. Based on its legal counsel's opinion, the Company's Management believes it is possible that the Company will not prevail in this case.

Plaintiff: Distribution Companies

The Company was sued in court by certain small oil distribution companies under the allegation that it does not pass on to state governments the State Value-Added Tax (ICMS) collected according to the legislation upon fuel sales. These suits were filed in the states of Goiás, Tocantins, Bahia, Pará, Maranhão and in the Federal District.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

19. Commitments and Contingencies (Continued)

(a) Litigation (Continued)

Plaintiff: Distribution Companies (Continued)

Of the total amount related to legal actions of approximately US\$312, up to December 31, 2008 some US\$34 (US\$45 in 2007) had been withdrawn from the Company's accounts as a result of judicial rulings of advance relief, which were annulled as a result of an appeal filed by the Company.

The Company, with the support of the state and federal authorities, has succeeded in stopping the execution of other withdrawals, and is making all possible efforts to obtain reimbursement of the amounts that were previously withdrawn from its accounts.

Plaintiff: IBAMA (Brazilian Institute for the Environment and Renewable Resources)

Failure to comply with the Settlement and Commitment Agreement (TAC) clause relating to Campos Basin of 08/11/2004 by continuing drilling without prior consent. The lower administrative court sentenced Petrobras to pay for the non-compliance to the TAC. The Company filed an administrative appeal which is awaiting judgment. The maximum exposure including monetary restatement for Petrobras as at December 31, 2008, is US\$56. Based on its legal counsel's advice, the Company has assessed risk of loss to be possible.

(b) Notification from the INSS - joint liability

The Company received various tax assessments related to social security amounts payable as a result of irregularities in presentation of documentation required by the INSS, to eliminate its joint liability in contracting civil construction and other services, stipulated in paragraphs 5 and 6 of article 219 and paragraphs 2 and 3 of article 220 of Decree No. 3,048/99.

In order to guarantee the appeals' filing and/or the obtainment from INSS of Debt Clearance Certificate, US\$49 from the amounts disbursed by the Company is recorded as restricted deposits for legal proceedings and guarantees and may be recovered under the respective proceedings in progress, which are related to 331 assessments amounting to US\$155. Petrobras' legal department expects a possible defeat regarding these assessments, as it considers the risk of future disbursement to be possible.

(c) Tax assessments

Plaintiff: Internal Revenue Service of Rio de Janeiro - Withholding Income Tax related to charter of vessels

The Internal Revenue Service of Rio de Janeiro filed two Tax Assessments against the Company in connection with Withholding Income Tax (IRRF) on foreign remittances of payments related to charter of vessels of movable platform types for the years 1998 through 2002.

The Internal Revenue Service, based on Law No. 9,537/97, Article 2, considers that drilling and production platforms cannot be classified as sea-going vessels and therefore should not be chartered but leased. Based on this interpretation, overseas remittances for servicing chartering agreements would be subject to withholding tax at the rate of 15% or 25%.

Petrobras has defended itself against these tax assessments. Administrative appeals were lodged with High Court of Appeals for Fiscal Matters, last administrative level, which still await trial. The maximum exposure

including monetary restatement for Petrobras as of December 31, 2008 is US\$1,871. Based on its legal counsels advice, the Company has assessed risk of loss to be possible.

Plaintiff: Rio de Janeiro state finance authorities - II and IPI Tax related to the Sinking of P-36 Platform

Rio de Janeiro state finance authorities filed a Tax Assessment against the Company in connection with II (Import Tax) and IPI (Federal VAT) related to the Sinking of P-36 Platform. Trial court ruling against Petrobras. An appeal was lodged, which is pending judgment. Petrobras filed for a writ of mandamus and obtained an injunction that barred tax collection until the investigations determining the reasons causing the sinking of the platform have been concluded. The Federal Government / National Finance Office have filed an appeal which is pending judgment. With the decision of the Maritime Court, the Company filed a Tax Debt Annulment Lawsuit and obtained an injunction suspending the collection of the tax. The maximum exposure including monetary restatement for Petrobras as of December 31, 2008, is US\$104 of II and US\$47 of IPI. Based on its legal counsels advice, the Company has assessed risk of loss to be remote.

Plaintiff: Rio de Janeiro state finance authorities - ICMS Tax related to the Sinking of P-36 Platform

Rio de Janeiro state finance authorities filed a Tax Assessment against the Company in connection with ICMS (Domestic value-added tax) related to the Sinking of P-36 Platform. ICMS - Sinking of Platform P-36. Lower court decision favorable to Petrobras Appeal filed by the State of Rio de Janeiro and by Petrobras, with respect to the amount of the fees. By a majority decision the appeal of the State of Rio de Janeiro was approved and the appeal by the company was considered invalid. Awaiting publication of the court decision. The maximum exposure including monetary restatement for Petrobras as of December 31, 2008, is US\$331. Based on its legal counsels advice, the Company has assessed risk of loss to be possible.

Plaintiff: Rio de Janeiro state finance authorities - II and IPI Tax related to Termorio equipments

Rio de Janeiro state finance authorities filed a Tax Assessment against the Company in connection with II (Import Tax) and IPI (Federal VAT) contesting the tax classification as Other Electricity Generation Groups for the import of the equipment belonging to the thermoelectric power station Termorio S.A.

On August 15, 2006, the Company filed in the inspector s department of the Federal Revenue Department of Rio de Janeiro a refutation against this tax deficiency notice, considering that the tax classifications that were made were

based on a technical report of a renowned institute. In a session on October 11, 2007, the First Panel of Judgment dismissed the tax assessment, prevailing over a judge who voted for partial granting. The inspector's department of the Federal Revenue Department lodged an appeal with the Taxpayers' Council, which has not yet been heard. The maximum exposure including monetary restatement for Petrobras as of December 31, 2008, is US\$277. Based on its legal counsel's advice, the Company has assessed risk of loss to be possible.

Plaintiff: Rio de Janeiro state finance authorities - II and IPI Tax related to Termorio equipments (Continued)

Plaintiff: Federal Revenue Service - Contribution of Intervention in the Economic Domain - CIDE

The Federal Revenue service filed a Tax Assessment against the Company due to non-payment in the period of March 2002 to October 2003 of the Contribution of Intervention in the Economic Domain - CIDE, the per-transaction tax payable to the Brazilian government, required to be paid by producers, blenders and importers upon sales and purchases of specified oil and fuel products at a set amount for different products based on the unit of measurement typically used for such products, pursuant to court orders obtained by Distributors and Fuel Stations, protecting them from levying of this charge. The lower court ruled the charge was correct. Petrobras filed a Voluntary Appeal. The maximum exposure for Petrobras, including monetary restatement, as at December 31, 2008 is US\$474. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

Plaintiff: Federal Revenue Service

The Federal Revenue Service filed a Tax Assessment against the Company related to IRRF - Withholding Income Tax on remittances to pay for oil imports. The claim was accepted by the lower court. An Appeal was filed by the Federal Revenue Office to the Council of Taxpayers, which was accepted. Petrobras is awaiting notification in order to file a voluntary appeal. The maximum exposure including monetary restatement for Petrobras as at December 31, 2008 is US\$308. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

Plaintiff: State Revenue Service of Rio de Janeiro

Rio de Janeiro state finance authorities filed a Tax Assessment against the Company in connection with 2003 late payment fine on payment made by voluntary admission of the corporate income tax and social contribution on net income. The lower court ruled the charge was correct. Petrobras filed a Voluntary Appeal. The maximum exposure including monetary restatement for Petrobras as at December 31, 2008 is US\$103. The Company assessed that it is more likely than not on the technical merits that the Company's position will be sustained.

Plaintiff: State Revenue Service of Alagoas

Alagoas state finance authorities filed a Tax Assessment against the Company in connection with alleged issue of invoices for transfer on unprocessed natural gas (called "rich gas" by State Revenue Service of Alagoas) to the state of Sergipe at lower than market prices between 2000 and 2004. The lower court ruled the charge was correct. Petrobras filed a Voluntary which is awaiting judgment. The maximum exposure including monetary restatement for Petrobras as at December 31, 2008, is US\$47. Based on its legal counsels' advice, the Company has assessed risk of loss to be

possible.

Plaintiff: Federal Revenue Service - Contribution of Intervention in the Economic Domain Charge- CIDE

The Federal Revenue service filed a Tax Assessment against the Company in connection with the failure by Petrobras to withhold CIDE (Contribution of Intervention in the Economic Domain Charge) on naphtha import operations resold to Braskem. The lower court ruled, by a majority decision, that the charge was correct. Petrobras filed a voluntary appeal which is awaiting judgment. The maximum exposure for Petrobras,

including monetary restatement, as at December 31, 2008, is US\$608. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

Plaintiff: Federal Revenue Service - Contribution of Intervention in the Economic Domain Charge- CIDE

The Federal Revenue service filed a Tax Assessment against the Company in connection with the failure by Petrobras to withhold CIDE (Contribution of Intervention in the Economic Domain Charge) on propane and butane import operations. The lower court considered the assessment to have grounds. Petrobras filed a voluntary appeal which is awaiting judgment. The maximum exposure for Petrobras, including monetary restatement, as at December 31, 2008, is US\$78. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

Plaintiff: Agência Nacional de Petróleo (National Petroleum Agency, or ANP) - Special Participation in the Marlim Field

The governmental participation was established by the Brazilian Law on Oil No. 9,478/97 and is collected as a means of compensation for oil production activities, incident upon high volume production fields.

The method used by Petrobras to calculate the special participation due for the Marlim field, is based on the legally legitimate interpretation of Directive 10 of January 14, 1999, approved by the National Petroleum Agency (ANP) itself.

On August 16, 2006 the full Board of Directors of the ANP approved the report on the certification of the payment of the special participation in the Marlim field that established the methodology to be applied with regard to the Special Participation in Marlim, and also determined that Petrobras make an additional payment in the amount of US\$195 (R\$400 million), relating to underpayments by Petrobras as a result of having used the calculation method initially determined by the ANP.

Petrobras accepted the order of the ANP on the grounds that the new methodology would not be applied retroactively, thus ensuring compliance with constitutional principles such as legal security and perfect legal and paid the additional amount charged in accordance with the final decision of the highest level of the decision-making of the ANP - its Full Board of Directors.

On July 18, 2007, Petrobras was notified of a new ANP Board Resolution stipulating the payment of further sums considered due, retroactively to 1998, annulling the earlier Board Resolution on August 16, 2006.

Petrobras filed a petition of writ of mandamus and obtained an injunction to suspend the charge of the differences with regard to the Special Participation mentioned in ANP Resolution No. 400/2007, until the legal proceedings, currently underway in the Federal Courts of Rio de Janeiro, are concluded.

The administrative collection, which had been suspended due to the injunction granted in a Writ of Security, was resumed due to the dismissal of the appeal by Petrobras. The company filed an appeal with the Civil Appeals Court and also filed for a temporary stage, both of which are awaiting a hearing by the Court.

Question decided judicially. The maximum exposure for Petrobras, including monetary restatement, as at December 31, 2008, is US\$1,366. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

(d) Environmental matters

The Company is subject to various environmental laws and regulations. These laws regulate the discharge of oil, gas or other materials into the environment and may require the Company to remove or mitigate the environmental effects of the disposal or release of such materials at various sites.

The Company's management considers that any expenses incurred to correct or mitigate possible environmental impacts should not have a significant effect on operations or cash flows.

PEGASO - (Programa de Excelência em Gestão Ambiental e Segurança Operacional)

During 2000 the Company implemented an environmental excellence and operational safety program - PEGASO - (Programa de Excelência em Gestão Ambiental e Segurança Operacional). The Company made expenditures of approximately US\$5,003 from 2000 to December 31, 2008 under this program. During the years ended December 31, 2008 and 2007 the Company made expenditures of approximately US\$355 and US\$567, respectively. The Company believes that future payments related to environmental clean-up activities resulting from these incidents, if any, will not be material.

Presidente Getúlio Vargas refinery oil spill

On July 16, 2000, an oil spill occurred at the Presidente Getúlio Vargas refinery releasing crude oil in the surrounding area. The Federal and State of Paraná Prosecutors have filed a civil lawsuit against the Company seeking US\$1,176 in damages, which have already been contested by the Company. Additionally, there are two other actions pending, one by the Instituto Ambiental do Paraná (Paraná Environmental Institute) and by another civil association called AMAR that have already been contested by the Company. Awaiting initiation of the expert investigation to quantify the amount. The maximum exposure including monetary restatement for Petrobras as of December 31, 2008, is US\$47. The court determined that the suits brought by AMAR and the Federal and State Prosecutors be tried as one. Based on its legal counsels' advice, the Company's Administration has assessed risk of loss to be possible.

Araucária-Paranaguá pipeline rupture

On February 16, 2001, the Company's Araucária-Paranaguá pipeline ruptured and as a result fuel oil was spilled into the Sagrado, Meio, Neves and Nhundiaquara Rivers located in the state of Paraná. As a result of the accident, the Company was fined approximately US\$80 by the Instituto Ambiental do Paraná (Paraná Environmental Institute), which was contested by the Company through administrative proceeding but the appeal was rejected. The court determined that the suits brought by AMAR and the Federal and State Prosecutors be tried as one. The maximum exposure including monetary restatement for Petrobras as of

December 31, 2008, is US\$48. Based on its legal counsels' advice, the Company's Administration has assessed risk of loss to be possible.

Oil spill related to the sinking of P-36 Platform

On March 15, 2001, a spill resulting from the accident involving the P-36 platform occurred, causing a release of diesel fuel and crude oil. According to that published on May 23, 2007, the claim was considered to have grounds, in part, to sentence Petrobras to pay the amount of US\$56 (R\$100 million) in damages for the damage caused to the environment, to be restated monthly and with 1% per month interest on arrears as counted from the date on which the event took place. Petrobras filed a motion for clarification, which is pending judgment. The maximum exposure including monetary restatement for Petrobras as of December 31, 2008, is US\$91. Based on its legal counsels' advice, the Company has assessed risk of loss to be possible.

(e) Minimum operating lease payments

The Company is committed to make the following minimum payments related to operating leases as of December 31, 2008:

2010	4,271
2011	3,705
2012	3,460
2013	2,794
2014	1,654
2015 and thereafter	3,012
Minimum operating lease payment commitments	18,896

The Company incurred US\$2,983, US\$2,683 and US\$2,016, in rental expense on operating leases at December 31, 2008, 2007 and 2006, respectively.

20. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from its normal course of business. Such market risks principally involve the possibility that changes in interest rates, foreign currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings. The

Company maintains a corporate risk management policy that is executed under the direction of the Company's executive officers.

In 2004, the Executive Committee of Petrobras set up the Risk Management Committee composed of executive managers from all the business departments and from a number of corporate departments. This committee, as well as having the objective of assuring integrated management of exposures to risks and formalizing the main guidelines for the company's operation, aims at concentrating information and discussing actions for risk management, facilitating communication with the executive offices and the board of directors in aspects related to best corporate governance practices.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

20. Derivative Instruments, Hedging and Risk Management Activities (Continued)

The risk management policy of the Petrobras System aims at contributing towards an appropriate balance between its objectives for growth and return and its level of risk exposure, whether inherent to the exercise of its activities or arising from the context within which it operates, so that, through effective allocation of its physical, financial and human resources the company may attain its strategic goals.

The Company may use derivative and non-derivative instruments to implement its corporate risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the possible adverse effect on the value of an asset or liability, including financial instruments that results from changes in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue financial instruments for trading purposes.

(a) Commodity price risk management

The Company is exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. The Company's commodity risk management activities are primarily undertaken through the uses of future contracts traded on stock exchanges; and options and swaps entered into with major financial institutions. The Company does not use derivatives contracts for speculative purposes.

The Company does not usually use derivatives to manage overall commodity price risk exposure, taking into consideration that the Company's business plan uses conservative price assumptions associated to the fact that, under normal market conditions, price fluctuations of commodities do not represent a substantial risk to achieving strategic objectives.

The decision to do hedging or non-hedging derivatives are reviewed periodically and recommended, or not, to the Risk Management Committee. If entering into derivative is indicated, in scenarios with a significant probability of adverse events, and approved by the board of directors, the derivative transactions should be carried out with the aim of protecting the company's solvency, liquidity and execution of the corporate investment plan, considering an integrated analysis of all the company's risk exposures.

Outstanding derivatives contracts were entered into in order to mitigate price risk exposures from specific transactions, in which positive or negative results in the derivative transactions are totally or partially offset by the opposite result in the physical positions. The transactions covered by commodity derivatives are: certain cargoes traded from import and export operations and transactions between different geographical markets.

As a result of the Company's current price risk management, the derivatives are contracted as short term operations, in order to accompany the time frames corresponding to the risk exposure. The operations are carried out on the New York Mercantile Exchange (NYMEX) and the Intercontinental Exchange (ICE), as well as on the international over-the-counter market.

The Company's exposure from these contracts is limited to the difference between the contract value and market value on the volumes contracted. Crude oil future contracts are marked-to-market and related gains and losses are recognized in currently period earnings, irrespective of when the physical crude sales occur. For the years ended December 31, 2008, 2007 and 2006, the Company entered into commodity non-hedging derivative transactions for 66.64%, 56.59% and 26.42%, respectively, of its total import and export trade volumes.

F-81

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Expressed in Millions of United States Dollars

(except when specifically indicated)

20. Derivative Instruments, Hedging and Risk Management Activities (Continued)**(a) Commodity price risk management (Continued)**

The main parameters used in risk management for variations of Petrobras oil and oil product prices are the cash flow at risk (CFAR) for medium-term assessments, Value at Risk (VAR) for short-term assessments, and Stop Loss. Corporate limits are defined for VAR and Stop Loss.

The main counterparts of operations for derivatives for oil and oil products are the New York Stock Exchange (NYMEX), Intercontinental Exchange and JP Morgan.

The commodity derivatives contracts are reflected at fair value as either assets or liabilities on the Company's consolidated balance sheets recognizing gain or losses in earnings, using market to market accounting, in the period of change.

As of December 31, 2008, the Company had the following outstanding commodity derivative contracts that were entered into:

Commodity Contracts	Notional amount	
	in thousands of bbl*	
Maturity 2009	As of December 31,	
	2008	2007
<u>Futures and Forwards contracts</u>	5,647	7,329
<u>Options contracts</u>	-	8,090

* A negative notional amount represents a short position

** The negative fair values were stated in liabilities and the positive fair values in assets. The amounts for 2007 are presented only for comparative purposes.

At December 31, 2008, the portfolio for commercial operations carried out abroad, as well as the derivatives for their protection through derivatives for oil and oil products, presented a maximum estimated loss per day (VAR - Value at Risk), calculated at a reliability level of 95%, of approximately US\$12.

(b) Foreign currency risk management

Exchange risk is one of the financial risks that the company is exposed to and it originates from changes in the levels or volatility of the exchange rate. With respect to the management of these risks, the Company seeks to identify and handle them in an integrated manner, seeking to assure efficient allocation of the resources earmarked for the

derivative.

Taking advantage of operating in an integrated manner in the energy segment, the company seeks, primarily, to identify or create natural risk mitigation, benefiting from the correlation between its income and expenses. In the specific case of exchange variation inherent to the contracts with the cost and remuneration involved in different currencies, this natural risk mitigation is carried out through allocating the cash investments between the real and the US dollar or another currency.

The management of risks is done for the net exposure. Periodical analyses of the exchange risk are prepared, assisting the decisions of the executive committee. The exchange risk management strategy involves the use of derivative instruments to minimize the exchange exposure of certain Company's obligations.

(except when specifically indicated)

20. Derivative Instruments, Hedging and Risk Management Activities (Continued)**(b) Foreign currency risk management (Continued)**

The Company entered into an over the counter contract, not designated as hedge accounting, for covering the trading margins inherent to exports (aviation segment) for foreign clients. The objective of the operation, contracted contemporaneously with the definition of the cost of the products exported, is to lock the trading margins agreed with the foreign clients. Internal policy limits the volume of derivative contracts to the volume of products exported.

The over the counter contract is reflected at fair value as either assets or liabilities on the Company's consolidated balance sheets recognizing gain or losses in earnings, using market to market accounting, in the period of change.

As of December 31, 2008, the Company had the following foreign currency derivative contracts, not designated as hedging accounting, that were entered into:

	Foreign Currency Maturing in 2009	%	Notional Amount
Forwards			
Sell USD / Pay BRL			117
Average Contractual Exchange rate		1.8	117

At December 31, 2008, the forward derivative contract presented a maximum estimated loss per day (VAR - Value at Risk), calculated at a reliability level of 95%, of approximately US\$2.

Cash flow hedge

In September 2006, the Company contracted a hedge known as a cross currency swap for coverage of the bonds issued in Yens in order to fix the Company's costs in this operation in dollars. In a cross currency swap there is an exchange of interest rates in different currencies. The exchange rate of the Yen for the US dollar is fixed at the beginning of the transaction and remains fixed during its existence. The Company does not intend to settle these contracts before the end of the term.

The Company has elected to designate its cross currency swap as cash flow hedges. Both at the inception of a hedge and on an ongoing basis, a cash flow hedge must be expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk during the term of the hedge. Derivative instruments designated as cash flow hedges are reflected as either assets or liabilities on the Company's consolidated balance sheets. Change in fair value, to the

extend the hedge is effective, is reported in accumulated other comprehensive income until the cash flows of the hedged item occurs.

Effectiveness tests are conducted quarterly in order to measure how the changes in the fair value or the cash flow of the hedged items are being absorbed by the hedge mechanisms. The effectiveness calculation indicated that the cross currency swap is highly effective in offsetting the variation in the cash flows of the bonds issued in Yens.

20. Derivative Instruments, Hedging and Risk Management Activities (Continued)**(b) Foreign currency risk management (Continued)**

As of December 31, 2008, the Company had the following cross currency swap, which was entered into:

Cross Currency Swaps Maturing in 2016	%	Notional Amount (MM JPY)
Fixed to fixed		35,000
Average Pay Rate (USD)	5.69	
Average Receive Rate (JPY)	2.15	
		35,000

At December 31, 2008, the cross currency swap presented a maximum estimated loss per day (VAR - Value at Risk), calculated at a reliability level of 95%, of approximately US\$26.

(c) Interest rate risk management

The Company's interest rate risk is a function of the Company's long-term debt and to a lesser extent, its short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the Company's floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP) as fixed by the National Monetary Counsel. The Company currently does not utilize derivative financial instruments to manage its exposure to fluctuations in interest rates.

21. Financial Instruments

In the normal course of its business activities, the Company acquires various types of financial instruments.

(a) Concentrations of credit risk

Substantial portions of the Company's assets including financial instruments are located in Brazil while substantially all of the Company's revenues and net income are generated in Brazil. The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of its cash and cash equivalents, the Petroleum and Alcohol account, trade receivables and futures contracts.

The Company takes several measures to reduce its credit risk to acceptable levels. All cash and cash equivalents in Brazil are maintained with major banks. Time deposits in U.S. dollars are placed with creditworthy institutions in the United States. Additionally, all of the Company's available-for-sale securities

(except when specifically indicated)

21. Financial Instruments (Continued)**(a) Concentrations of credit risk (Continued)**

and derivative contracts are either exchange traded or maintained with creditworthy financial institutions. The Company monitors its credit risk associated with trade receivables by routinely assessing the creditworthiness of its customers. At December 31, 2008 and December 31, 2007, the Company's trade receivables were primarily maintained with large distributors.

(b) Fair value

Fair values are derived either from quoted market prices where available, or, in their absence, the present value of expected cash flows. Fair values reflect the cash that would have been either received or paid if the instruments were settled at year end in an arms length transaction between willing parties. Fair values of cash and cash equivalents, trade receivables, the Petroleum and Alcohol account, short-term debt and trade payables approximate their carrying values.

The fair values of other long-term receivables and payables do not differ materially from their carrying values.

The Company's debt including project financing obligations, resulting from FIN 46(R) consolidation amounted to US\$21,046 at December 31, 2008, and US\$16,734 at December 31, 2007, and had estimated fair values of US\$20,032 and US\$17,845, respectively.

The fair value hierarchy for the Company's financial assets and liabilities accounted for at fair value on a recurring basis at December 31, 2008, was:

	As of December 31, 2008			Total
	Level 1	Level 2	Level 3	
Assets				
Marketable securities	1,665	-	-	1,665

22. Segment Information

The following segment information has been prepared in accordance with SFAS No. 131 - Disclosure about Segments of an Enterprise and Related information (SFAS 131). The Company operates under the following segments, which are described as follows:

Exploration and Production - This segment includes the Company's exploration, production development and production activities of oil, liquefied natural gas and natural gas in Brazil, for the purpose of supplying

F-88

Table of Contents

22. Segment Information (Continued)

refineries in Brazil as well as selling surplus Brazilian production in domestic and foreign markets and limited oil trading activities and transfers of natural gas to the Company's Gas and Energy segment.

Supply - This segment includes the Company's refining, logistic, transportation, exportation and the purchase of crude oil, as well as the purchase and commercialization activities for oil, oil products and fuel alcohol. Additionally, this segment includes petrochemical and fertilizers division, which includes investments in domestic petrochemical companies and the Company's two domestic fertilizer plants.

Distribution - This segment represents the oil product and fuel alcohol distribution activities conducted by the Company's majority owned subsidiary, Petrobras Distribuidora S.A. - BR in Brazil.

Gas and Energy - This segment currently encompasses the purchase, sale, transportation and distribution of natural gas produced in or imported into Brazil. Additionally, this segment includes the Company's participation in domestic electricity production, including investments in domestic natural gas transportation companies, state owned natural gas distributors and thermoelectric companies.

International - This segment represents the Company's international Exploration and Production, Supply, Distribution and Gas and Energy activities conducted in 23 countries outside Brazil.

The items that cannot be attributed to the other areas are allocated to the group of corporate entities, especially those linked with corporate financial management, overhead related with central administration and other expenses, including actuarial expenses related with the pension and health-care plans for non-active participants.

The accounting information by business area was prepared based on the assumption of controllability, for the purpose of attribution to the business areas only items over which these areas have effective control.

The main criteria used to record the results and assets by business segments are summarized as follows:

Net operating revenues: these were considered to be the revenues from sales to third parties, plus revenues between the business segments, based on the internal transfer prices established by the areas;

Costs and expenses includes the costs of products and services sold, calculated per business segment, based on the internal transfer price and the other operating costs of each segment, as well as operating expenses, based on the expenses actually incurred in each segment;

Financial results are allocated to the corporate group;

Assets: covers the assets relating to each segment.

Distribution	309	327	351
Corporate	874	628	726
	29,874	20,978	14,643

The Company's gross sales, classified by geographic destination, are as follows:

	Year ended December 31,		
	2008	2007	2006
Brazil	106,350	83,022	70,733
International	40,179	29,403	23,160
	146,529	112,425	93,893

The total amounts sold of products and services to the two major customers in 2008 were US\$8,176 and US\$5,260 (US\$9,029 and US\$6,567 in 2007; and US\$7,978 and US\$5,689 in 2006).

23. Related Party Transactions

The Company is controlled by the Federal Government and has numerous transactions with other state-owned companies in the ordinary course of its business.

24. Accounting for Suspended Exploratory Wells

The Company's accounting for exploratory drilling costs is governed by Statement of Financial Accounting Standards No. 19, Financial Accounting and Reporting by Oil and Gas Producing Companies (SFAS No. 19). On April 4, 2005, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP FAS 19-1) that amended SFAS No. 19 with respect to the deferral of exploratory drilling costs. The Company adopted FASB Staff Position FAS 19-1 Accounting for Suspended Wells Costs effective from January 1, 2005. There was no material impact at adoption.

Costs the Company has incurred to drill exploratory wells that find commercial quantities of oil and gas are carried as assets on its balance sheet under the classification Property, plant and equipment as unproved oil and gas properties. Each year, the Company writes-off the costs of these wells that have not found sufficient proved reserves to justify completion as a producing well, unless: (1) the well is in an area requiring major capital expenditure before production can begin; and (2) additional exploratory drilling is under way or firmly planned to determine whether the capital expenditure is justified.

As of December 31, 2008, the total amount of unproved oil and gas properties was US\$3,558, and of that amount US\$876 (US\$749 of which related to projects in Brazil) represented costs that had been capitalized for more than one year, which generally are a result of: (1) extended exploratory activities associated with offshore production; and (2) the transitory effects of deregulation in the Brazilian oil and gas industry, as described below.

In 1998, the Company's government-granted monopoly ended and the Company signed concession contracts with the Agência Nacional de Petróleo (National Petroleum Agency, or ANP) for all of the areas the Company had been

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES**

Expressed in Millions of United States Dollars

(except when specifically indicated)

24. Accounting for Suspended Exploratory Wells (Continued)

exploring and developing prior to 1998, which consisted of 397 concession blocks. Since 1998, the ANP has conducted competitive bidding rounds for exploration rights, which has allowed the Company to acquire additional concession blocks. After a concession block is found to contain a successful exploratory well, the Company must submit an Evaluation Plan to the ANP for approval. This Evaluation Plan details the drilling plans for additional exploratory wells. An Evaluation Plan is only submitted for those concession areas where technical and economic feasibility analyses on existing exploration wells evidence justification for completion of such wells. Until the ANP approves the Evaluation Plan, the drilling of additional exploratory wells cannot commence. If companies do not find commercial quantities of oil and gas within a specific time period, generally 4-6 years depending on the characteristics of the exploration area, then the concession block must be relinquished and returned to the ANP. Because the Company was required to assess a large volume of concession blocks in a limited time frame even when an exploratory well has found sufficient reserves to justify completion and additional wells are firmly planned, finite resources and expiring time frames in other concession blocks have dictated the timing of the planned additional drilling.

The following table shows the net changes in capitalized exploratory drilling costs during the years ended December 31, 2008 and 2007:

	Unproved oil and gas properties (*)	
	Year ended December, 31	
	2008	2007
Beginning balance at January 1	2,627	2,054
Additions to capitalized costs pending determination of proved reserves	3,309	1,885
Capitalized exploratory costs charged to expense	(808)	(548)
Transfers to property, plant and equipment based on the determination of the proved reserves	(1,310)	(975)
Cumulative translation adjustment	(260)	211
Ending balance at December 31,	3,558	2,627

(*) Amounts capitalized and subsequently expensed in the same period have been excluded from the above table.

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES**

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

24. Accounting for Suspended Exploratory Wells (Continued)

The following table provides an aging of capitalized exploratory well costs based on the date the drilling was completed and the number of projects for which exploratory well costs have been capitalized for a period greater than one year since the completion of the drilling:

Aging of capitalized exploratory well costs

	Year ended December 31,	
	2008	2007
Capitalized exploratory well costs that have been capitalized for a period of one year or less	2,682	1,186
Capitalized exploratory well costs that have been capitalized for a period greater than one year	876	1,441
Ending balance	3,558	2,627
Number of projects that have exploratory well costs that have been capitalized for a period greater than one year	83	195

Of the US\$876 for 83 projects that include wells suspended for more than one year since the completion of drilling, approximately US\$173 are related to wells in areas for which drilling was under way or firmly planned for the near future and that the Company has submitted an Evaluation Plan to the ANP for approval and approximately US\$478 incurred in costs for activities necessary to assess the reserves and their potential development.

The US\$876 of suspended wells cost capitalized for a period greater than one year as of December 31, 2008, represents 88 exploratory wells and the table below contains the aging of these costs on a well basis:

Aging based on drilling completion date of individual wells:

	Million of dollars	Number of wells
2007	281	50
2006	411	16
2005	95	15
2004	40	3

25. Subsequent Events

a. Creation of companies of the Rio de Janeiro petrochemical complex (COMPERJ)

On February 5, 2009, Petrobras, in continuation of the implementation of the Rio de Janeiro petrochemical complex (COMPERJ), formed six (6) joint stock companies in Rio de Janeiro, as follows:

Comperj Participações S.A.: A specific purpose entity that will hold the interests of Petrobras in the producing companies of COMPERJ;

Comperj Petroquímicos Básicos S.A.: A company producing basic petrochemicals;

Comperj PET S.A.: A company producing PTA/PET;

Comperj Estirênicos S.A.: A company producing styrene;

Comperj MEG S.A.: A company producing glycol ethylene and ethylene oxide; and

Comperj Poliolefinas S.A.: A company producing polyolefines (PP/PE);

At first, Petrobras will hold 100% of the total and voting capital of these companies, when the implementation of the integration and relationship model of the companies of COMPERJ will be made. This model seeks to capture the synergies arising from locating a number of companies in the same production site. The assets, obligations and rights related to COMPERJ will be transferred to these companies by Petrobras at an opportune moment.

With the forming of these companies, Petrobras is initiating the preparation stage of the project for the entry of potential partners.

(b) Petrobras International Finance Company - PifCo

On February 11, 2009, Petrobras International Finance Company - PifCo, a wholly owned subsidiary of Petrobras, completed the issue of US\$1,500 Global Notes on the international capitals market, with maturity on March 15, 2019, an interest rate of 7.875% p.a. and half-yearly payment of interest as from September 15, 2009. The funds raised are being used for general corporate purposes, including financing the Petrobras Business Plan 2009-2013.

This financing had issuing costs estimated at US\$6, a premium of US\$26 and an effective interest rate of 8.187% p.a. Global Notes constitute unsecured and unsubordinated obligations for PifCo and have the complete, unconditional guarantee of Petrobras.

On March 24, 2009, the PifCo drewdown US\$1,000 in a line of credit due in March 2011. The Line bear interest at a initial rate of 3 Month Libor + 2.65% per annum, payable quarterly. The proceeds will be used to

finance the purchase of oil imports to Petrobras from PifCo.

PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES

SUPPLEMENTARY INFORMATION ON OIL AND GAS EXPLORATION AND PRODUCTION (UNAUDITED)

Expressed in Millions of United States Dollars
(except when specifically indicated)

(i) Capitalized costs relating to oil and gas producing activities

In accordance with SFAS 69 - Disclosures About Oil and Gas Producing Activities (SFAS 69), this section provides supplemental information on oil and gas exploration and producing activities of the Company. The information included in items (i) through (iii) provides historical cost information pertaining to costs incurred in exploration, property acquisitions and development, capitalized costs and results of operations. The information included in items (iv) and (v) present information on Petrobras' estimated net proved reserve quantities, standardized measure of estimated discounted future net cash flows related to proved reserves, and changes in estimated discounted future net cash flows.

Beginning in 1995, the Federal Government of Brazil undertook a comprehensive reform of the country's oil and gas regulatory system. On November 9, 1995, the Brazilian Constitution was amended to authorize the Federal Government to contract with any state or privately-owned company to carry out the activities related to the upstream and downstream segments of the Brazilian oil and gas sector. This amendment eliminated Petrobras' effective monopoly. The amendment was implemented by the Petroleum Law, which liberated the fuel market in Brazil beginning January 1, 2002.

The Petroleum Law established a regulatory framework ending Petrobras' exclusive agency and enabling competition in all aspects of the oil and gas industry in Brazil. As provided in the Petroleum Law, Petrobras was granted the exclusive right for a period of 27 years to exploit the petroleum reserves in all fields where the Company had previously commenced production. However, the Petroleum Law established a procedural framework for Petrobras to claim exclusive exploratory (and, in case of success, development) rights for a period of up to three years with respect to areas where the Company could demonstrate that it had established prospects. To perfect its claim to explore and develop these areas, the Company had to demonstrate that it had the requisite financial capacity to carry out these activities, alone or through financing or partnering arrangements.

The International geographic area includes activities in Angola, Argentina, Bolivia, Colombia, Ecuador, India, Iran, Lybia, Mexico, Mozambique, Nigeria, Pakistan, Peru, Portugal, Senegal, Tanzânia, Turkey, United States of America and Venezuela. The Company has immaterial non-consolidated companies involved in exploration and production activities; the amounts related to such are in the line item titled Investments in non-consolidated companies and other investments.

(Continued)Expressed in Millions of United States Dollars
(except when specifically indicated)**(iii) Results of operations for oil and gas producing activities**

The Company's results of operations from oil and gas producing activities for the years ending December 31, 2008, 2007 and 2006 are shown in the following table. The Company transfers substantially all of its Brazilian crude oil and gas production to the Supply segment in Brazil. The prices calculated by the Company's model may not be indicative of the price the Company would have realized had this production been sold in an unregulated spot market. Additionally, the prices calculated by the Company's model may not be indicative of the future prices to be realized by the Company. Gas prices used are contracted prices to third parties.

Production costs are lifting costs incurred to operate and maintain productive wells and related equipment and facilities, including such costs as operating labor, materials, supplies, fuel consumed in operations and the costs of operating natural liquid gas plants. Production costs also include administrative expenses and depreciation and amortization of equipment associated with production activities.

Exploration expenses include the costs of geological and geophysical activities and non-productive exploratory wells. Depreciation and amortization expenses relate to assets employed in exploration and development activities. In accordance with SFAS 69, income taxes are based on statutory tax rates, reflecting allowable deductions. Interest income and expense are excluded from the results reported in this table.

(1) Does not consider US\$3,067 (US\$2,213 for 2007 and US\$1,216 for 2006) related to field processing activities, for which Petrobras has no attributable quantity of reserve. The amount, which relates principally to dry gas volumes, is considered in Petrobras net operating revenues of US\$59,024 (US\$41,991 for 2007 and US\$35,738 for 2006) for the segment of E&P Brazil (see Note 22).

(2) Does not consider US\$3,111 (US\$2,149 for 2007 and US\$1,873 for 2006) related to field processing activities, for which Petrobras has no attributable quantity of reserve. The amount, which relates principally to dry gas volumes, is considered in Petrobras cost of sales of US\$21,130 (US\$15,147 for 2007 and US\$13,634 for 2006) for the segment of E&P Brazil (see Note 22).

(iv) Reserve quantities information

The Company's estimated net proved oil and gas reserves and changes thereto for the years 2008, 2007 and 2006 are shown in the following table. Proved reserves are estimated by the Company's reservoir engineers in accordance with

the reserve definitions prescribed by the Securities and Exchange Commission.

Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Proved reserves do not include additional quantities recoverable beyond the term of the concession or contract, or that may result from extensions of currently proved areas, or from application of secondary or tertiary recovery processes not yet tested and determined to be economic.

F-112

Table of Contents**PETRÓLEO BRASILEIRO S.A. - PETROBRAS AND SUBSIDIARIES****SUPPLEMENTARY INFORMATION ON OIL AND GAS EXPLORATION AND PRODUCTION (UNAUDITED)**
(Continued)Expressed in Millions of United States Dollars
(except when specifically indicated)**(iv) Reserve quantities information** (Continued)

Proved developed reserves are the quantities expected to be recovered from existing wells with existing equipment and operating methods. Proved undeveloped reserves are those volumes which are expected to be recovered as a result of future investments in drilling, re-equipping existing wells and installing facilities necessary to deliver the production from these reserves.

In some cases, substantial new investments in additional wells and related facilities will be required to recover these proved reserves. Due to the inherent uncertainties and the limited nature of reservoir data, estimates of reserves are subject to change as additional information becomes available.

A summary of the annual changes in the proved reserves of crude oil and natural gas follows:

	Oil (millions of barrels)			Gas (billions of cubic feet)			Combined Global Proved Reserves (MMboe)
	Brazil	International	Worldwide	Brazil	International	Worldwide	
Worldwide net proved developed and undeveloped reserves

At December 31, 2007	-	33.4	33.4	-	44.2	44.2	40.8
At December 31, 2008	-	27.5	27.5	-	47.3	47.3	35.4

(1) Includes reserves of 48.7 million barrels of oil and 429.2 billions of cubic feet of gas in 2008 (110.0 million barrels of oil and 533.0 billions of cubic feet of gas in 2007; and 134.0 million barrels of oil and 504.8 billions of cubic feet of gas in 2006) attributable to 41.38% minority interest in PEPSA, which is consolidated by Petrobras.

During 2006, the decrease in reserves is related to revisions of previous estimates due to Bolivia and Venezuela new nationalization measures. The new regulation in Venezuela reduced our reserves as PDVSA became the main controller of the companies created to operate the fields with private companies. In Bolivia, due to new government regulations, occurred a decrease in the reserves. In Nigeria, the consortium in charge of Akpo field was constituted by Total, Petrobras and a Nigerian private company called Sapetro. The agreement underwritten by these companies established that Total and Petrobras carried the investment cost of the third part and it would be compensated in the

future with Sapetro's production/reserves.

In 2006, Sapetro sold its participation to a Chinese oil company and, as part of this agreement, Petrobras and Total were reimbursed for their past carrying investments.

On December 31, 2008, the SEC issued its final rule, Modernization of Oil and Gas Reporting (Release Nos. 33-8995; 34-59192; FR-78). The final rule changes a number of oil and gas reserve definitions and disclosures requirements under SEC Regulations S-K and S-X.

The requirements introduced by its final rule are effective for the year ending December 31, 2009. The Company is currently evaluating the final rules and has not yet determined the overall impact to the Company proved reserve determinations.

SUPPLEMENTARY INFORMATION ON OIL AND GAS EXPLORATION AND PRODUCTION (UNAUDITED)
(Continued)

Expressed in Millions of United States Dollars
(except when specifically indicated)

(v) Standardized measure of discounted future net cash flows relating to proved oil and gas quantities and changes therein

The standardized measure of discounted future net cash flows, related to the above proved oil and gas reserves, is calculated in accordance with the requirements of SFAS 69. Estimated future cash inflows from production in Brazil are computed by applying year-end prices based upon the Company's internal pricing methodology for oil and gas to year-end quantities of estimated net proved reserves. Estimated future cash inflows from production related to the Company's International segment are computed by applying year-end prices for oil and gas to year-end quantities of estimated net proved reserves. Future price changes are limited to those provided by contractual arrangements in existence at the end of each reporting year. Future development and production costs are those estimated future expenditures necessary to develop and produce year-end estimated proved reserves based on year-end cost indicators, assuming continuation of year-end economic conditions. Estimated future income taxes are calculated by applying appropriate year-end statutory tax rates. These rates reflect allowable deductions and are applied to estimated future pre-tax net cash flows, less the tax basis of related assets. Discounted future net cash flows are calculated using 10% midperiod discount factors. This discounting requires a year-by-year estimate of when the future expenditures will be incurred and when the reserves will be produced.

The information provided does not represent management's estimate of Petrobras' expected future cash flows or value of proved oil and gas reserves. Estimates of proved reserve quantities involves uncertainty and change over time as new information becomes available. Moreover, probable and possible reserves, which may become proved in the future, are excluded from the calculations.

The arbitrary valuation prescribed under SFAS 69 requires assumptions as to the timing and amount of future development and production costs. The calculations are made as of December 31 each year and should not be relied upon as an indication of Petrobras' future cash flows or the value of its oil and gas reserves.

Report of Independent Registered Public Accounting Firm

The Executive Board and Stockholder of
Petrobras International Finance Company

We have audited the accompanying consolidated balance sheets of Petrobras International Finance Company and subsidiaries (the Company) as of December 31, 2008 and 2007, and the related consolidated statements of operations, changes in stockholder s deficit, and cash flows for each of the years in the three-year period ended December 31, 2008. We also have audited the Company s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statements presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Petrobras International Finance Company (and subsidiaries) as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31,

2008, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, Petrobras International Finance Company (and subsidiaries) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by COSO.

Petrobras International Finance Company and Subsidiaries

(A wholly-owned subsidiary of Petr leo Brasileiro S.A. - Petrobras)

Notes to the Consolidated Financial Statements
(In thousand of U.S. dollars)

==

1. The Company and its Operations

Petrobras International Finance Company - (PifCo or the Company) was incorporated in the Cayman Islands on September 24, 1997 and operates as a wholly-owned subsidiary of Petrobras.

PifCo purchases crude oil and oil products from third parties and sells them at a premium to Petrobras on a deferred payment basis. PifCo also purchases crude oil and oil products from Petrobras and sells them outside Brazil. Accordingly, intercompany activities and transactions, and therefore the Company s financial position and results of operations, are affected by decisions made by Petrobras. Additionally, the Company sells oil and oil products to and from third parties and related parties mainly outside Brazil. Commercial operations are carried out under normal market conditions and at commercial prices. PifCo also engages in international capital market borrowings as a part of the Petrobras financial and operating strategy.

The following is a brief description of each of the Company s wholly-owned subsidiaries:

Petrobras Singapore Private Limited

Petrobras Singapore Private Limited (PSPL), based in Singapore, was incorporated in April 2006 to trade crude oil and oil products in connection with the trading activities in Asia.

PSPL has taken a 50% participation in PM Bio Trading Private Limited, a joint venture with Mitsui & Co. LTD established in Singapore to trade ethanol and to perform other related activities with a main focus in the Japanese market. PM Bio Trading Private Limited is scheduled to commence its operations in 2010.

Petrobras Finance Limited

Petrobras Finance Limited (PFL), based in the Cayman Islands, in connection with the Company s structured finance export prepayment program, whereby PFL purchases fuel oil from Petrobras and sells this product in the international market, including sales to designated customers, in order to generate receivables to cover the sale of future receivables debt. Until June 1, 2006, PFL also used to purchase bunker fuel from Petrobras. Certain sales were through subsidiaries of Petrobras.

Petrobras Europe Limited

Petrobras Europe Limited (PEL), based in the United Kingdom, consolidates Petrobras European trade and finance activities. These activities consist of advising on and negotiating the terms and conditions for crude oil and oil products supplied to PifCo, PSPL, Petrobras Paraguay, Petrobras International Braspetro B.V. - PIB BV and Petrobras, as well as marketing Brazilian crude oil and other derivative products exported to the geographic areas in which the Company operates. PEL plays an advisory role in connection with these activities and undertakes no commercial or financial risk.

Bear Insurance Company Limited

Bear Insurance Company Limited (BEAR), based in Bermuda, contracts insurance for Petrobras and its subsidiaries.

2. Basis of Financial Statement Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP). The preparation of these consolidated financial

2. Basis of Financial Statement Presentation (Continued)

statements requires the use of estimates and assumptions that affect the assets, liabilities, revenues and expenses reported in the consolidated financial statements, as well as amounts included in the notes thereto.

(a) Foreign currency translation

The Company's functional currency is the U.S. dollar. All monetary assets and liabilities denominated in a currency other than the U.S. dollar are remeasured into the U.S. dollar using the current exchange rates. The effect of variations in the foreign currencies is recorded in the statement of operations as financial expense or income.

(b) Cash and cash equivalents

Cash equivalents consist of highly liquid investments that are readily convertible into cash and have an original maturity of three months or less at their date of acquisition.

(c) Marketable securities

Marketable securities are accounted for under SFAS No. 115 - Accounting for Certain Investments in Debt and Equity Securities (SFAS 115) and have been classified by the Company as available for sale or trading based upon intended strategies with respect to such securities. The marketable securities classified as trading are short-term in nature as the investments are expected to be liquidated, sold, or used for current cash requirements. The marketable securities classified as available for sale are long-term in nature as the investments are not expected to be sold or otherwise liquidated in the next twelve months.

Trading securities are marked to market through current period earnings, available for sale securities are marked to market through other comprehensive income, and held to maturity securities are recorded at historical cost. There are no transfers between categories of investments.

(d) Trade accounts receivable

Accounts receivable is stated at estimated realizable values. An allowance for doubtful accounts is provided in an amount considered by management to be sufficient to meet probable future losses related to uncollectible accounts.

(e) Notes receivable

Notes receivable bears interest rates and is stated at estimated realizable values. Relate to loans executed between the Company and subsidiaries of Petrobras.

(f) Inventories

Inventories are stated at the lower of weighted average cost or market value.

(g) Restricted deposit and guarantees

Restricted Deposit and guarantees represent amounts placed in escrow as required by contractual commitments of the Company. Deposits are made in cash and recorded at funded amount.

Table of Contents

Petrobras International Finance Company and Subsidiaries

(A wholly-owned subsidiary of Petr leo Brasileiro S.A. - Petrobras)

Notes to the Consolidated Financial Statements (Continued)
(In thousand of U.S. dollars)

2. Basis of Financial Statement Presentation (Continued)

(h) Prepaid expenses

Prepaid expenses are exclusively comprised of deferred financing costs associated with the Company's debt issuance and are being amortized over the terms of the related debt. The unamortized balance of deferred financing costs was US\$40,608 and US\$60,486 as of December 31, 2008 and 2007, respectively.

(i) Property and equipment

Property and equipment are stated at cost and are depreciated according to their estimated useful lives.

(j) Current and long-term liabilities

These are stated at known or estimated amounts including, when applicable, accrued interest.

(k) Unearned income

Unearned income represents the unearned premium charged by the Company to Petrobras and Alberto Pasqualini -Refap S.A. (Refap) to compensate for its financing costs. The premium is billed to Petrobras and Refap at the same time the related product is sold, and is deferred and recognized into earnings as a component of financial income on a straight-line basis over the collection period, which ranges from 120 to 330 days, in order to match the premium billed with the Company's financial expense. The unearned income was reclassified to accounts receivable.

(l) Revenues, costs, income and expenses

For all third party and related party transactions, revenues are recognized in accordance with the U.S. SEC's Staff Accounting Bulletin 104 - Revenue Recognition. Crude oil and oil products revenues are recognized on an accrual basis when persuasive evidence of an arrangement exists in the form of a valid contract, delivery has occurred or title has transferred, the price is fixed or determinable and collectability is reasonably assured. Costs are recognized when incurred. Income and expenses include financial interest and charges, at official rates or indexes, relating current and non-current assets and liabilities and, when applicable, the effects arising from the adjustment of assets to market or realizable value.

The principle commercial transactions of the Company consist of:

Imports - the Company buys from suppliers outside Brazil (mainly from third-parties) and sells to Petrobras and its Brazilian subsidiaries.

Exports - the Company buys from Petrobras and sells to customers outside Brazil.

Off-shore - the Company buys and sells mainly outside of Brazil, in transactions with third-parties and related parties.

(m) Income taxes

The Company accounts for income taxes using an asset and liability approach, which requires the recognition of taxes payable or refundable for the current year and deferred tax liabilities and assets representing the future tax consequences of events that have been recognized in the Company's financial

(m) Income taxes (Continued)

statements or tax return. The measurement of current and deferred tax liabilities and assets is based on the provisions of the tax laws in the countries in which the Company and its subsidiaries operate (the United Kingdom, Bermuda, Singapore and the Cayman Islands in 2008, 2007 and 2006). Deferred tax assets are reduced by the amount of any tax benefits when, based on the available evidence, such benefit may not be realized. The Cayman Islands and Bermuda have no corporate tax requirements, therefore the Company has no tax provision from these locations and operations in the United Kingdom or Singapore generated no deferred tax provisions for 2008 and 2007.

(n) Accounting for derivatives and hedging activities

The Company applies SFAS No. 133 - Accounting for Derivative Instruments and Hedging Activities, together with its amendments and interpretations, referred to collectively herein as SFAS 133. SFAS 133 requires that all derivative instruments be recorded in the balance sheet of the Company as either an asset or a liability and measured at fair value. SFAS 133 requires that changes in the derivative's fair value be recognized in the income statement unless specific hedge accounting criteria are met and the Company designates. For derivatives designated as accounting hedges, fair value adjustments are recorded either in the income statements or Accumulated Other Comprehensive Income, a component of shareholders' equity, depending upon the type of accounting hedge and the degree of hedge effectiveness.

The Company uses non-hedging derivatives to mitigate the risk of unfavorable price movements for crude oil and oil products purchases. These instruments are marked-to-market with the associated gains or losses recognized as financial income or financial expense.

The Company may also use derivative financial instruments for non-hedging purposes to mitigate the risk of unfavorable exchange-rate movements on other currency-denominated funding. Gains and losses from changes in the fair value of these contracts are recognized as financial income or financial expense.

The Company may also use derivatives to protect exchange of interest rates in different currencies. These hedging derivatives used as well as the risk being hedged are accounted for a cash flow model. Under this model, the gains and losses associated with the derivative instruments are deferred and recorded in Accumulated Other Comprehensive Income until such time as the hedged transaction impacts earnings, with the exception of any hedge ineffectiveness; which is recorded directly in earnings.

(o) Recently issued accounting pronouncements

EITF No. 08-6, equity method investment accounting considerations (EITF No. 08-6)

In November 2008, the FASB reached a consensus on Emerging Issues Task Force Issue No. 08-6, Equity Method Investment Accounting Considerations (EITF 08-6), which was issued to clarify how the application of equity method accounting will be affected by SFAS No. 141(R) and SFAS 160. EITF 08-6, among other requirements, determines that an equity method investor shall account for a share issuance by an investee as if the investor had sold a proportionate share of its investment. Any gain or loss to the investor resulting from an investee's share issuance shall be recognized in earnings. This issue is effective January 1, 2009, and will be applied prospectively.

FASB Statement No. 157, fair value measurements (SFAS 157)

Effective January 1, 2008, the Company adopted the SFAS 157, which was amended in February 2008 by FASB Staff Position (FSP) SFAS No. 157-1, Application of SFAS 157 to SFAS 13 and Its Related Interpretive Accounting Pronouncements That Address Leasing Transactions, and by FSP SFAS 157-2, Effective Date of SFAS 157, which delayed the Company's application of SFAS 157 for nonrecurring nonfinancial assets and liabilities until January 1, 2009. SFAS 157 was further amended in October 2008 by FSP SFAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, which clarifies the application of SFAS 157 to assets participating in inactive markets.

SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements, however does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards.

The implementation of SFAS 157 did not have material impacts on the Company's consolidated financial statements other than additional disclosures that have been incorporated into Note 12 of these financial statements.

FASB Statement 159 The fair value option for financial assets and financial liabilities. (SFAS 159)

In February 2007, the FASB issued SFAS 159, which permits the measurement of certain financial instruments at fair value. Entities may choose to measure eligible items at fair value at specified election dates, reporting unrealized gains and losses on such items in earnings at each subsequent reporting period. The Company adopted this Statement effective January 1, 2008, but did not make a fair value election at that time or during the remainder of 2008 for any financial instruments not already carried at fair value in accordance with other accounting standards. Accordingly, the adoption of SFAS 159 did not impact the Company's consolidated financial statements.

FASB Statement No. 161, disclosures about derivative instruments and hedging activities - an amendment of FASB No. 133 (SFAS 161)

In March 2008, the FASB issued SFAS 161, that expands disclosure requirements of FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133) and related interpretations. This statement requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This statement is effective for interim and annual financial statements beginning with the first quarter of 2009. The Company early adopted SFAS 161, and its implementation did not have material impact on the Company's consolidated financial statements other than additional disclosures that have been incorporated into Note 12.

Commercial operations between PifCo and its subsidiaries and affiliated companies are carried out under normal market conditions and at commercial prices, except for the sales of oil and oil products to Petrobras, which have an extended settlement period consistent with PifCo's formation as a financing entity, and include finance charges accrued during the extended payment period.

Certain affiliates of PifCo and PFL, which are subsidiaries of Petrobras, serve as agents in connection with export sales to certain customers under the export prepayment program. Those transactions have been classified as related party transactions for purposes of these financial statements.

The transactions were realized to support the financial and operational strategy of the Company's Parent Company, Petróleo Brasileiro S.A. - Petrobras.

- (i) Accounts receivable from related parties relate principally to crude oil sales made by the Company to Petrobras, with extended payment terms of up to 330 days.
- (ii) Current Liabilities - Notes payable relate to loans executed between the Company and Petrobras. The annual interest is 5.86%.
- (iii) Purchases from related parties are presented in the cost of sales section of the statement of operations.
- (iv) See Note (4).
- (v) PifCo has authorized, in January 2008, to transfer to Braspetro Oil Services Company - Brasoil its notes receivable contracts in the total amount of US\$8,203,289 in which Petrobras International Braspetro B.V. - PIB BV, Petrobras Netherlands B.V. - PNBV and Agri Development B.V. - AGRI B.V. are counterparts. Accordingly, it was recommended to Brasoil the assumption of obligations in the exact amount of the notes receivable contracts payment that PifCo holds with Petrobras. In July 2008, PifCo has authorized to transfer to Braspetro Oil Services Company - Brasoil its notes receivable contracts in the total amount of US\$28,010 in which Petrobras Netherlands B.V. - PNBV is counterpart. Accordingly, it was recommended to Brasoil the assumption of obligations in the exact amount of the notes receivable contracts payment that PifCo holds with Petrobras.
- (vi) Unearned income in connection with finance charges accrued during the extended payment period on commercial operations granted by PifCo to related parties are presented as assets under accounts receivable - related parties.

Table of Contents**Petrobras International Finance Company and Subsidiaries****(A wholly-owned subsidiary of Petr leo Brasileiro S.A. - Petrobras)**Notes to the Consolidated Financial Statements (Continued)
(In thousand of U.S. dollars)**6. Inventories**

	2008	2007
Crude oil	733,161	816,127
Oil products	331,827	408,508
LNG	72,191	-
	1,137,179	1,224,635

Inventory is stated at the lower of cost or market. At December 31, 2008 the inventory was reduced in US\$144,866 (see Note 9), due to the recently declines in the oil international market prices, which was classified as other operating expenses in the statement of operations. The Company adopted the realizable value for inventory impairment purposes.

7. Restricted Deposits and Guarantees

PifCo has restricted deposits with financial institutions that are required as a result of contractual obligations in financing arrangements. The amount classified in non-current assets is comprised of deposits: (i) US\$38,250 related to issuances of senior notes in the total amount of US\$600,000. The guarantees related to the financings will be maintained through maturity of such financings, and are required per the related debt agreement; and (ii) in accordance with the Deposit, Pledge and Indemnity Agreement of April 29, 2005, PifCo has guaranteed the debt of SFE - Sociedade Fluminense de Energia Ltda., a subsidiary of Petrobras. In accordance with the terms of this guarantee, PifCo has deposited US\$95,949 in an escrow account, such amount to be used to satisfy Sociedade Fluminense de Energia debts in the event of default.

(A wholly-owned subsidiary of Petr leo Brasileiro S.A. - Petrobras)

Notes to the Consolidated Financial Statements (Continued)

(In thousand of U.S. dollars)

8. Financings (Continued)

- (i) The Company's financings in U.S. dollars are derived mainly from commercial banks and include trade lines of credit, which are primarily intended for the purchase of crude oil and oil products, and with interest rates ranging from 3.03% to 5.60% at December 31, 2008. The weighted average borrowing for short-term debt at December 31, 2008 and 2007 was 3.59% and 5.59%, respectively.

At December 31, 2008 and 2007, the Company had fully utilized all available lines of credit specifically designated for purchase of imported crude oil and oil products.

- (ii) As of December 31, 2007 and 2006, the outstanding balance of net premiums on reissuances amounted to US\$2,082 and US\$10,273, respectively, and there is no outstanding balance at December 31, 2008. PifCo incurred expenses in the total amount of US\$160,048 on extinguishment of debt during the period ended December 31, 2006 (see Note 8(v)). In connection with the Exchange Offer (see Note 8(viii)) PifCo paid US\$54,812 related to the amount above the face amount of the old Notes exchanged. This amount was associated to the new Notes and has been amortized in accordance with the effective interest method.
- (iii) In May 2004, PFL and the PF Export Trust (the Trust) executed an amendment to the Trust Agreement allowing the Junior Trust Certificates to be set-off against the related Notes, rather than paid in full, after fulfillment of all obligations pursuant to the Senior Trust Certificates. The effect of this amendment is that amounts related to the Junior Trust Certificates have been presented net, rather than gross in these consolidated financial statements, and thus US\$150,000 has been reduced from the long term debt financing respective to sales of right to future receivables.
- (iv) On September 27, 2006, the Company concluded a private placement of securities in the Japanese capital market (Shibosai) for a total of ¥35 billion (US\$374,346) due September 2016. The issue was a private placement in Japanese market with a partial guarantee of Japan Bank for International Cooperation (JBIC) and bears interest at the rate of 2.15% per annum, payable semiannually. In the same date, PifCo entered into a swap agreement with Citibank, swapping the total amount of this debt to a U.S. dollar denominated debt (see Note 12). PifCo used the proceeds principally to finance PNBV, an affiliate, for construction of lines interconnecting the P-51, P-52 and P-53 production platforms to the PRA-1 autonomous repumping unit.
- (v) As a result of the settlement of the Exchange Offer that occurred on February 7, 2007, PifCo received and accepted a tender amount of US\$399,053 (face value of the Notes). All the Notes received were cancelled in the same day and as consequence, PifCo issued US\$399,053 of Global Notes due 2016 that bear interest at the rate of 6.125% per annum, payable semi-annually. The new Notes constitute a single fungible series with the US\$500,000 Global Notes due 2016 issued in October 2006. In total, there are US\$899,053 in outstanding bonds due 2016. PifCo also paid to the investors a cash amount equivalent to US\$56,056 as result of the Exchange (see Note 8 (ii)).

- (vi) On June 15, 2007, the Nova Transportadora Nordeste-NTN and Nova Transportadora Sudeste-NTS Companies (two Special Purpose Companies of Petrobras related to Malhas Project) transferred to PifCo a Loan Agreement with M-GIC (a Facility Agent of JBIC -Japan Bank for International Cooperation). The outstanding amount of the loan is US\$394,000 and it bears interest of Libor plus 0.8% per annum, payable semi-annually. The principal amount will also be paid semi-annually starting on December 15, 2009 up to December 15, 2014. As a consequence of this transfer, the NTN and NTS issued some Notes to PifCo with the same characteristics of the Loan (principal amount, interest rate and amortization schedule) (see Note 4 (iv)).

8. Financings (Continued)

- (vii) On November 1, 2007, the Company issued Global Notes of US\$1,000,000 in the international capital market, due March 2018. The Notes bear interest at the rate of 5.875% per annum, payable semi-annually, beginning on March 1, 2008. The purpose of this issuance was to access long-term debt capital markets, refinance prepayments of maturing debt and reduce the cost of capital.
- (viii) On January 11, 2008, PifCo issued Senior Global Notes of US\$750,000, that constitute a single issue fungible with the US\$1,000,000 launched on November 1, 2007, amounting to US\$1,750,000 in issued bonds due on March 1, 2018. The Notes bear interest at the rate of 5.875% per annum, payable semiannually, beginning on March 1, 2008. The purpose of this issue was to access long-term debt capital markets, refinance prepayments of maturing debt and to reduce the cost of capital.

9. Other Operating Expenses

The Company recognized a loss of US\$577,128 due to inventory impairment for the year ended December 31, 2008, as a result of the recently declines in the oil international market prices.

10. Stockholder s Deficit**Capital**

The subscribed capital at December 31, 2008 and 2007 is US\$300,050 divided into 300,050,000 shares of US\$1.00 each.

Capital Contribution

In March 2008, the capital contribution increased US\$212,468 as a result of a gain due to acquisition from Braspetro Oil Services Company - Brasoil and sale to Petrobras Netherlands B.V. - PNBV, an affiliated, of the platform P-37.

11. Commitments and Contingencies**(a) Oil purchase contract**

In an effort to ensure procurement of oil products for the Company s customers, the Company currently has several short and long-term normal purchase contracts with maturity date up to 2017, which collectively obligate it to

purchase a minimum of approximately 202,955 barrels of crude oil and oil products per day at market prices.

(b) Purchase option - Platforms

The Company has maintained the right to exercise the call option on the existing Subchartered Asset Option Agreement granted by PNBV and has maintained the obligation to purchase the vessels in case PNBV exercises the Put Option, upon the occurrence of an event of default, under the same Option Agreement, for the Platforms P-8, P-15, P-32. PifCo also has an obligation to purchase the platforms after the expiration of the Charter terms.

11. Commitments and Contingencies (Continued)

(b) Purchase option - Platforms (Continued)

In relation to Platform P-47, PifCo has maintained the right to exercise the call option on the existing Subchartered Asset Option Agreement granted by PNBV and has maintained the obligation to purchase the vessel in case PNBV exercises the Put Option, upon the occurrence of an event of default or of the expiration of the Charter.

PifCo may designate any affiliate or subsidiary to perform its obligations under this agreement.

(c) Loans agreement

The Company's outstanding position at December 31, 2008 in irrevocable letters of credit was US\$627,946, as compared to US\$730,045 at December 31, 2007, supporting crude oil and oil products imports and services.

Additionally, the Company had standby committed facilities available in the amount of US\$546,270 (US\$327,000 at December 31, 2007), which are not committed to any specific use. PifCo has no drawn down amounts related to these facilities and does not have a scheduled date for the drawdown.

In June 2008, PifCo issued a corporate guarantee to International Finance Corporation - IFC in the amount of US\$40,000 to back a loan contracted by affiliate company Quattor Petroqu mica in connection with Petrobras strategy to consolidate petrochemical assets in the southeast region of Brazil. Accordingly, Quattor Petroqu mica assumed the obligation to pay interest annually, in Reais, at a rate of 1% p. a. over the amount guaranteed by PifCo up to the maturity date of the loan in 2017, or until certain contractual conditions are reached, whichever comes first. In the event of financial execution of this guarantee, PifCo has been granted the right to recourse.

12. Financial Instruments and Risk Management

PifCo's policy for the risk management of the price of oil and oil products consists basically in protecting the margins in some specific short-term positions. Future contracts, swaps and options are the instruments used in these economic hedge operations which are tied to actual physical transactions. Positive and negative results are offset by the reverse results of the actual physical market transaction and they are recorded in the statement of operations as financial income and financial expense. The Company's derivative instruments are recorded in the consolidated balance sheet at their fair value.

For exchange-traded contracts, fair value is based on quoted market prices. For non-exchange traded contracts, fair value is based on dealer quotes, pricing models or quoted prices for instruments with similar characteristics. The transaction price is used as the initial fair value of the contracts.

The commodity derivatives contracts are reflected at fair value as either assets or liabilities on the Company's consolidated balance sheets recognizing gain or losses in earnings, using market to market accounting, in the period of change.

F-138

(In thousand of U.S. dollars)**12. Financial Instruments and Risk Management (Continued)**

As of December 31, 2008, the Company had the following outstanding commodity derivative contracts that were entered into:

Commodity Contracts Maturity 2009 Futures and Forwards contracts	Notional amount in thousands of bbl*	
	2008	2007
Crude oil and oil Products	(2,704)	(7,275)

* A negative notional amount represents a short position

Cash Flow Hedge

In September 2006, the Company contracted a hedge known as a cross currency swap for coverage of the bonds issued in Yens in order to fix the Company's costs in this operation in dollars. In a cross currency swap there is an exchange of interest rates in different currencies. The exchange rate of the Yen for the US dollar is fixed at the beginning of the transaction and remains fixed during its existence. The Company does not intend to settle these contracts before the end of the term.

The Company has elected to designate its cross currency swap as cash flow hedges. Both at the inception of a hedge and on an ongoing basis, a cash flow hedge must be expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk during the term of the hedge. Derivative instruments designated as cash flow hedges are reflected as either assets or liabilities on the Company's consolidated balance sheets. Change in fair value, to the extent the hedge is effective, are reported in accumulated other comprehensive income until the forecasted transaction occurs.

Effectiveness tests are conducted quarterly in order to measure how the changes in the fair value or the cash flow of the hedge items are being absorbed by the hedge mechanisms. The effectiveness calculation indicated that the cross currency swap is highly effective in offsetting the variation in the cash flow of the bonds issued in Yens.

As of December 31, 2008, the Company had the following cross currency swap, which was entered into:

Cross Currency Swaps**Notional Amount in**

Maturing in 2016	%	thousand (JPY)
Fixed to fixed		35,000,000
Average Pay Rate (USD)	5.69	
Average Receive Rate (JPY)	2.15	

At December 31, 2008, the over the counter foreign exchange derivative contract, presented a maximum estimated loss per day (VAR - Value at Risk), calculated at a reliability level of 95%, of approximately US\$25,526.

PifCo designates at inception whether the derivative contract will be considered hedging or non-hedging for SFAS 133 accounting purposes. Non-hedging derivatives that are considered economic hedges, but not designated in a hedging relationship for accounting purposes, are recorded as other current assets or liabilities, with changes in fair value recorded as financial income or financial expense.

Total		85,933	(83,504)

PifCo had written put options in the past that allows the holder of the options to sell a floating number of heavy fuel oil volumes at a minimum price of US\$14/barrel. Such option had served as an economic hedge on related future sales of receivables under the structured finance export prepayment program; the intent of which was to ensure that physical barrels delivered under the structured finance export prepayment program generate sufficient cash proceeds to repay related financial obligations. Given the low strike price relative to the market the fair value of these options is immaterial at December 31, 2008 and 2007.

Fair Value

Fair values are derived either from quoted market prices available, or, in their absence, the present value of expected cash flows. The fair values reflect the cash that would have been received or paid if the instruments were settled at year end. Fair values of cash and cash equivalents, trade receivables, short-term debt and trade payables approximate their carrying values.

12. Financial Instruments and Risk Management (Continued)**Fair Value (Continued)**

At December 31, 2008 and December 31, 2007 the Company's long-term debt was US\$5,883,376 and US\$5,186,789 respectively, and had estimated fair values of approximately US\$5,915,000 and US\$5,625,000, respectively.

The Company's long-term asset related to the export prepayment program was US\$331,450 and US\$710,925 at December 31, 2008 and December 31, 2007, and had fair values of US\$335,100 and US\$714,400, respectively.

The disclosure requirements of SFAS No. 157 and FSP FAS 157-2 were applied to the Company's derivative instruments and certain marketable securities recognized in accordance with SFAS-115.

The Company's commodities derivatives and marketable securities fair values were recognized in accordance with exchanged quoted prices as the balance sheet date for identical assets and liabilities in active markets, and, therefore, were classified as level 1.

The fair values of cross currency swaps were calculated using observable interest rates in JPY and USD for the full term of the contracts, and, therefore, were classified as level 2.

The fair value hierarchy for our financial assets and liability accounted for at fair value on a recurring basis at December 31, 2008, was:

	Level 1	Level 2	December 31, 2008
Assets			
Marketable securities - available for sale	1,017,365	-	1,017,365
Derivatives	38,513	47,278	85,791
Liability			
Derivatives	1,101	-	1,101

13. Insurance

Petrobras is responsible for contracting and maintaining cargo and civil liability insurance. On December 31, 2008 and 2007 PifCo had insurance coverage for assets physical loss or damage pursuant to Petrobras insurance policy and in accordance to its activities.

The assumptions of risk adopted, given their nature, are not part of the scope of an audit of financial statements and, accordingly, they were not examined by our independent auditors.

14. Subsequent Events

Financings

On February 11, 2009, the Company issued Global Notes of US\$1,500,000 due March 2019 in the international capital market. The Notes bear interest at the rate of 7.875% per annum, payable semiannually, beginning on September 15, 2009. The funds will be used for general corporate purposes, including the financing of the Petrobras Business Plan 2009-2013.
