NEWS RELEASE

Enbridge to Further Expand Athabasca Pipeline Capacity

CALGARY, Alberta, December 16, 2010 Enbridge Inc. (TSX, NYSE: ENB) announced today a further expansion of its Athabasca Pipeline to its maximum capacity of approximately 570,000 bpd. The expansion is required to accommodate additional contractual commitments beyond those reflected in the initial expansion announced in September. The estimated incremental cost of the additional expansion is approximately \$200 million with a targeted completion date of early 2014, at which time it is now anticipated that the combined expansions will both be fully completed.

The low cost of incremental capacity on the Athabasca Pipeline is one of the strengths of our Regional Oil Sands System, said Stephen J. Wuori, President, Liquids Pipelines, Enbridge Inc. Given recent announcements of continued growth and investment in the oil sands, this is an opportune time to capture construction economies by undertaking a single large expansion project. The resulting capacity will position us well to meet our current contractual commitments as well as to accommodate anticipated additional requirements from existing or new shippers. Enbridge currently has a total of \$2.4 billion of commercial secured expansions of or additions to its Regional Oil Sands System which will go into service between 2011 to 2014, as well as a significant portfolio of additional projects which are under development to meet oil sands growth.

Enbridge's Regional Oil Sands System At-a-Glance:

Enbridge is the leading pipeline operator in the Fort McMurray to Edmonton/Hardisty corridor and well positioned to tie-in new oil sand developments to mainline pipelines and increase capacity for current customers. Enbridge's Regional Oil Sands Infrastructure includes the Athabasca and Waupisoo pipeline systems, connecting six producing oil sands projects. A map is available at www.enbridge.com

Athabasca Pipeline:

540-kilometre (335-mile) pipeline in operation since March 1999

Annual capacity of up to 570,000 barrels per day of crude oil (depending on crude viscosity) from the Athabasca and Cold Lake regions of Alberta, south to Hardisty, Alberta

Waupisoo Pipeline:

380-kilometre (mile) pipeline system in operation since June 2008

Annual capacity of up to 600,000 bpd of crude oil (depending on crude viscosity) from Enbridge's Cheecham Terminal to Edmonton

Tankage:

Largest operator of contract storage facilities at the Hardisty hub with the 3.1 million barrel Hardisty Caverns storage facility, plus the 7.5 million barrel Hardisty Contract Terminal surface storage facility

More than 4.4 million barrels of operational storage associated with the Waupisoo and Athabasca pipelines and laterals

Enbridge Inc., a Canadian company, is a North American leader in delivering energy and one of the Global 100 Most Sustainable Corporations. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses, and is expanding its interests in renewable and green energy technologies including wind and solar energy, hybrid fuel cells and carbon dioxide sequestration. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 6,500 people, primarily in Canada and the U.S. and is ranked as one of Canada's Greenest Employers, and one of the Top 100 Companies to Work for in Canada. Enbridge's common shares trade on the Toronto and New York stock exchanges under the symbol ENB. For more information, visit enbridge.com
