 - ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 8.01 Other Events

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) was enacted. Section 1503 of the Act contains new reporting requirements regarding mine safety, including disclosing on a Current Report on Form 8-K the receipt of an imminent danger order under section 107(a) of the Federal Mine Safety and Health Act of 1977 (an Order) issued by the federal Mine Safety and Health Administration (MSHA).

On March 31, 2011, PCS Phosphate Company, Inc. (PCS Phosphate), an indirect wholly-owned subsidiary of Potash Corporation of Saskatchewan Inc., received an Order by MSHA stating that, among other things, a miner at the Company's Lee Creek mine in Aurora, North Carolina was observed walking on the flat bed of a boom truck and that railings were not provided nor was fall protection/fall prevention being utilized. Posts with two sets of chains were installed and secured on the flat bed of the boom truck, which caused termination of the Order.

In addition, on April 2, 2011, the Company received an Order by MSHA stating that, among other things, an excavator at the Company's Lee Creek mine was observed loading haul trucks from the top of an approximate 18-foot high rock stock pile without a berm or guard rail. The operator made a plan to remove the excavator from the top of the rock pile, and the Order was modified to allow the operator to safely remove the excavator from the stock pile. The excavator was removed from the rock stock pile, which caused termination of the Order.

The conditions cited in the Orders referred to above did not result in an accident or injury and had no material adverse impact on the Company's operations at the Lee Creek mine.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, hereunto duly authorized.
