Notes to the Consolidated Financial Statements
(Stated in U.S. dollars unless otherwise noted; tabular amounts in thousands)

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of preparation

These unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The accounting policies followed in preparing these consolidated financial statements are those used by Ivanhoe Mines Ltd. (the Company) as set out in the audited consolidated financial statements for the year ended December 31, 2010.

Certain information and note disclosures normally included for annual consolidated financial statements prepared in accordance with U.S. GAAP have been omitted. These interim consolidated financial statements should be read together with the audited consolidated financial statements of the Company for the year ended December 31, 2010.

In the opinion of management, all adjustments considered necessary (including reclassifications and normal recurring adjustments) to present fairly the financial position, results of operations and cash flows at September 30, 2011 and for all periods presented, have been included in these financial statements. The interim results are not necessarily indicative of results for the full year ending December 31, 2011, or future operating periods. For further information, see the Company s annual consolidated financial statements, including the accounting policies and notes thereto.

The Company has three operating segments, its development division located in Mongolia, its coal division located in Mongolia, and its exploration division with projects located primarily in Australia and Mongolia.

References to Cdn$ refer to Canadian currency, Aud$ to Australian currency, and $ to United States currency.

(b) Basis of presentation

For purposes of these consolidated financial statements, the Company, subsidiaries of the Company, and variable interest entities for which the Company is the primary beneficiary, are collectively referred to as Ivanhoe Mines .

(c) Comparative figures

In February 2011, the Company completed a rights offering which was open to all shareholders on a dilution free, equal participation basis at a subscription price less than the fair value of a common share of the Company (Note 13 (c)). In accordance with the Financial Accounting Standards Board Accounting Standards Codification (ASC) guidance for earnings per share, basic and diluted loss per share for all periods prior to the rights offering have been adjusted retroactively for a bonus element contained in the rights offering. Specifically, the weighted average number of common shares outstanding used to compute basic and diluted loss per share for the three and nine months ended September 30, 2010 has been multiplied by a factor of 1.06.

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(d) Accounting changes

In January 2010, the ASC guidance for fair value measurements and disclosures was updated to require additional disclosures related to transfers in and out of level 1 and 2 fair value measurements and enhanced detail in the level 3 reconciliation. The updated guidance clarified the level of disaggregation required for assets and liabilities and the disclosures required for inputs and valuation techniques to be used to measure the fair value of assets and liabilities that fall in either level 2 or level 3. The updated guidance was effective for the Company s fiscal year beginning January 1, 2010, except for the level 3 disaggregation which is effective for the Company s fiscal year beginning January 1, 2011. The adoption of the updated guidance had no impact on the Company s consolidated financial position, results of operations or cash flows.

In December 2010, the ASC guidance for business combinations was updated to clarify existing guidance requiring a public entity to disclose pro forma revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual period only. The update also expands the supplemental pro forma disclosures required to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The updated guidance was effective for the Company s fiscal year beginning January 1, 2011. The adoption of the updated guidance had no impact on the Company s consolidated financial position, results of operations or cash flows.

(e) Recent Accounting Pronouncements

In May 2011, the ASC guidance for fair value measurement and disclosure was updated to clarify the Financial Accounting Standards Board s intent on current guidance, modify and change certain guidance and principles, and expand disclosures concerning Level 3 fair value measurements in the fair value hierarchy (including quantitative information about significant unobservable inputs within Level 3 of the fair value hierarchy). In addition, the updated guidance requires disclosure of the fair value hierarchy for assets and liabilities not measured at fair value in the statement of financial position, but whose fair value is required to be disclosed. The updated guidance is effective for the Company s fiscal year beginning January 1, 2012. The Company does not expect the updated guidance to have a material impact on its financial position or results of operations.

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(e) Recent Accounting Pronouncements (continued)

In June 2011, the ASC guidance on presentation of comprehensive income was updated to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The updated guidance requires an entity to present the components of net income and other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This update eliminates the option to present the components of other comprehensive income as part of the statement of equity, but does not change the items that must be reported in other comprehensive income. The updated guidance is effective for the Company s fiscal year beginning January 1, 2012. The Company is in the process of assessing which presentation choice it will adopt.

(f) Earnings (loss) per share

The following table reconciles the numerators and the denominators of the basic and diluted earnings (loss) per share computations for net income from continuing operations:

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(f) Earnings (loss) per share (continued)

The following table lists securities that could potentially dilute basic earnings (loss) per share in the future that were not included in the computation of diluted earnings (loss) per share because to do so would have been antidilutive for the periods presented:

	Three Months Ended September 30,		Nine Months Ended September 30,

2. EXPLORATION EXPENSES

Generally, exploration costs are charged to operations in the period incurred until it has been determined that a property has economically recoverable reserves, at which time subsequent exploration costs and the costs incurred to develop a property are capitalized.

Summary of exploration expenditures by location:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	**2011**	2010

(1) Until March 31, 2010, exploration costs charged to operations included development costs associated with the Oyu Tolgoi Project in Mongolia. On April 1, 2010, Ivanhoe Mines commenced capitalizing Oyu Tolgoi Project development costs. As of this date, reserve estimates for the Oyu Tolgoi Project had been announced and the procedural and administrative conditions contained in the Investment Agreement were satisfied. During the nine months ended September 30, 2011, additions to property, plant and equipment for the Oyu Tolgoi Project totalled $1,931.5 million, which included development costs.

3. DISCONTINUED OPERATIONS

In February 2005, Ivanhoe Mines sold the Savage River Iron Ore Project in Tasmania, Australia for two initial payments totalling $21.5 million, plus a series of five contingent, annual payments that commenced on March 31, 2006. The annual payments are based on annual iron ore pellet tonnes sold and an escalating price formula based on the prevailing annual Nibrasco/JSM pellet price.

In 2010, Ivanhoe Mines received two payments totalling $6.4 million in relation to the fifth annual contingent payment. The original purchaser of the Savage River Project disputed the estimated $22.1 million remaining balance of the fifth annual contingent payment. In 2010, Ivanhoe Mines initiated arbitration proceedings by filing a Request for Arbitration with the ICC International Court of Arbitration. The arbitration hearing was scheduled to occur in December 2011. Subsequent to September 30, 2011, the parties reached an out-of-court settlement whereby the original purchaser will pay Ivanhoe Mines a reduced balance of $13.0 million by March 31, 2012. Accordingly, Ivanhoe Mines has reduced the carrying value of the contingent receivable as at September 30, 2011 to $13.0 million. The resulting $9.1 million write-down is recognized as a loss from discontinued operations.

To date, Ivanhoe Mines has received $144.4 million in proceeds from the sale.

4. CASH AND CASH EQUIVALENTS

Cash and cash equivalents at September 30, 2011 included SouthGobi Resources Ltd. s (Canada) (57.6% owned) (SouthGobi) balance of $205.8 million (December 31, 2010 $492.0 million) and Ivanhoe Australia Limited s (Australia) (53.6% owned) (Ivanhoe Australia) balance of $111.8 million (December 31, 2010 $59.3 million), which were not available for Ivanhoe Mines general corporate purposes.

5. SHORT-TERM INVESTMENTS

Short-term investments at September 30, 2011 included SouthGobi s balance of $10.0 million (December 31, 2010 $17.5 million) and Ivanhoe Australia s balance of $nil (December 31, 2010 $80.8 million), which were not available for Ivanhoe Mines general corporate purposes.

	$ 294,873	$ 191,816

(a) Long-Term Notes

As at September 30, 2011, the Company held $61.1 million (December 31, 2010 $65.0 million) principal amount of Long-Term Notes (received in 2009 upon completion of the Asset-Backed Commercial Paper restructuring) which was recorded at a fair value of $30.7 million. The decrease from December 2010 in principal of $3.9 million was due to the weakening of the Canadian dollar ($2.6 million) and principal redemptions ($1.3 million). The Company has designated the Long-Term Notes as held-for-trading. Accordingly, the Long-Term Notes are recorded at fair value with unrealized holding gains and losses included in earnings.

There is a significant amount of uncertainty in estimating the amount and timing of cash flows associated with the Long-Term Notes. The Company has estimated the fair value of the Long-Term Notes considering information provided on the restructuring, the best available public information regarding market conditions and other factors that a market participant would consider for such investments.

The Company is aware of a limited number of trades in the Long-Term Notes that occurred prior to September 30, 2011, but does not consider them to be of sufficient volume or value to constitute an active market. Accordingly, the Company has not used these trades to determine the fair value of its notes.

The Company has used a discounted cash flow approach to value the Long-Term Notes at September 30, 2011 incorporating the following assumptions:

Bankers Acceptance Rate:	1.12%
Discount Rates:	9% to 25%
Maturity Dates:	5.2 years
Expected Return of Principal:	
A-1 Notes	100%
A-2 Notes	100%

TA Notes	100%

8. OTHER LONG-TERM INVESTMENTS (Continued)

(a) Long-Term Notes (continued)

Based on the discounted cash flow model as at September 30, 2011, the fair value of the Long-Term Notes was estimated at $30.7 million. As a result of this valuation, the Company recorded an unrealized trading gain of $2.4 million for the nine month period ended September 30, 2011.

Continuing uncertainties regarding the value of the assets that underlie the Long-Term Notes, the amount and timing of cash flows and changes in general economic conditions could give rise to a further change in the fair value of the Company s investment in the Long-Term Notes, which would impact the Company s results from operations. A 1.0% increase, representing 100 basis points, in the discount rate will decrease the fair value of the Long-Term Notes by approximately $1.4 million.

(b) Government of Mongolia Treasury Bill and Tax Prepayments

On October 6, 2009, Ivanhoe Mines agreed to purchase three Treasury Bills (T-Bills) from the Mongolian Government, having an aggregate face value of $287.5 million, for the aggregate sum of $250.0 million. The annual rate of interest on the T-Bills was set at 3.0%. The initial T-Bill, with a face-value of $115.0 million, was purchased by Ivanhoe Mines on October 20, 2009 for $100.0 million and will mature on October 20, 2014.

However, on March 31, 2010 Ivanhoe Mines agreed to an alternative arrangement for the advancement of funds that would not involve the purchase of the remaining two T-Bills. Specifically, rather than purchasing the second and third remaining T-Bills, with face values of $57.5 million and $115.0 million respectively, Ivanhoe Mines agreed to make two tax prepayments. Tax prepayments of $50.0 million and $100.0 million were made on April 7, 2010 and June 7, 2011 respectively.

The after tax rate of interest on the tax prepayments is 1.59% compounding annually. Unless already off-set fully against Mongolian taxes, the Mongolian Government must repay any remaining tax prepayment balance, including accrued interest, on the fifth anniversary of the date the tax prepayment was made.

The Company has designated the T-Bill and tax prepayments as available-for-sale investments because they were not purchased with the intent of selling them in the near term and the Company s intention to hold them to maturity is uncertain. The fair values of the T-Bill and tax prepayments are estimated based on available public information regarding what market participants would consider for such investments. Changes in the fair value of available-for-sale investments are recognized in accumulated other comprehensive income.

8. OTHER LONG-TERM INVESTMENTS (Continued)

(b) Government of Mongolia Treasury Bill and Tax Prepayments (continued)

The Company has used a discounted cash flow approach to value the T-Bill and tax prepayments at September 30, 2011 incorporating the following weighted average assumptions:

	T-Bill	Tax Prepayments
Purchased Amount	$ 100,000,000	$ 150,000,000
Discount Rate	9.9%	9.9%
Term	3.1 years	1.8 years

Based on the discounted cash flow models as at September 30, 2011, the fair values of the T-Bill and tax prepayments were estimated at $86.2 million and $132.9 million respectively. As a result of these valuations, Ivanhoe Mines recorded an unrealized gain of $3.7 million on the T-Bill and an unrealized loss of $4.8 million on the tax prepayments in accumulated other comprehensive income for the nine month period ended September 30, 2011.

(c) Money Market Investments

As at September 30, 2011, Ivanhoe Mines held $45.0 million of money market investments with remaining maturities in excess of one year.

9. NOTE RECEIVABLE

In early August 2011, Ivanhoe Mines received $103.0 million as payment for a promissory note from the Monywa Trust.

Ivanhoe Mines transferred the ownership of its former 50% interest in the Monywa Project that was held through its Monywa subsidiary to the independent, third-party Monywa Trust in February 2007. In exchange for the interest, the Monywa Trust issued an unsecured, non-interest-bearing promissory note to a subsidiary of the Company. The sole purpose of the Monywa Trust was to sell the shares of the Monywa subsidiary to one or more arm s-length third parties.

Ivanhoe Mines has held no interest in the Monywa Project, and has had no involvement with the administration and operation of the Monywa Project, since February 2007.

After acquiring Ivanhoe Mines former interest in the Monywa Project, the independent trustee engaged an independent service provider to help the Monywa Trust identify potential buyers. Ivanhoe Mines had no involvement in discussions between the Monywa Trust and its service provider or with potential purchasers or with the ultimate sale of the interest in July 2011.

The receipt of the $103.0 million has been recorded as a gain on settlement of note receivable as the note receivable had a carrying value of $nil.

Net carrying amount of convertible debenture	**$ 159,154**	$ 251,796

On November 19, 2009, SouthGobi issued a convertible debenture to a wholly-owned subsidiary of China Investment Corporation (CIC) for $500.0 million. The convertible debenture is secured, bears interest at 8.0% (6.4% payable semi-annually in cash and 1.6% payable annually in shares of SouthGobi) and has a term of 30 years. The financing primarily will support an accelerated investment program in Mongolia and up to $120.0 million of the financing may also be used for working capital, repayment of debt due on funding, general and administrative expense and other general corporate purposes.

Pursuant to the convertible debentures terms, SouthGobi had the right to call for the conversion of up to $250.0 million of the convertible debenture upon SouthGobi achieving a public float of 25.0% of its common shares under certain agreed circumstances. On March 29, 2010, SouthGobi exercised this right and completed the conversion of $250.0 million of the convertible debenture into 21.5 million shares at a conversion price of $11.64 (Cdn$11.88). Also on March 29, 2010, SouthGobi settled the $1.4 million accrued interest payable in shares on the $250.0 million converted by issuing 0.1 million shares at the 50-day VWAP conversion price of $15.97 (Cdn$16.29). On April 1, 2010, SouthGobi settled the outstanding accrued interest payable in cash on the $250.0 million converted with a cash payment of $5.7 million.

As at March 29, 2010, the fair value of the embedded derivative liability associated with the $250.0 million converted was $102.8 million, a decrease of $9.4 million compared to its fair value at December 31, 2009. The $347.6 million fair value of the SouthGobi shares issued upon conversion exceeded the $193.3 million aggregate carrying value of the debt host contract, embedded derivative liability and deferred charges. The difference of $154.3 million was recorded as a loss on conversion of the convertible debenture.

As at September 30, 2011, the fair value of the embedded derivative liability associated with the remaining $250.0 million principal outstanding was determined to be $59.2 million.

12. CONVERTIBLE CREDIT FACILITY (Continued)

The embedded derivative liability was valued using a Monte Carlo simulation valuation model. A Monte Carlo simulation model is a valuation model that relies on random sampling and is often used when modeling systems with a large number of inputs and where there is significant uncertainty in the future value of inputs and where the movement in the inputs can be independent of each other. Some of the key inputs used by the Monte Carlo simulation include: floor and ceiling conversion prices, risk-free rate of return, expected volatility of SouthGobi s share price, forward Cdn$ exchange rate curves and spot Cdn$ exchange rates.

Assumptions used in the Monte Carlo valuation model are as follows:

	September 30, 2011		December 31, 2010	
Floor conversion price	**Cdn$**	**8.88**	**Cdn$**	8.88
Ceiling conversion price	**Cdn$**	**11.88**	**Cdn$**	11.88
Expected volatility		**72%**		73%
Risk-free rate of return		**2.68%**		3.48%
Spot Cdn$ exchange rate		**0.96**		1.01
Forward Cdn$ exchange rate curve		**0.91 - 0.95**		0.97 - 1.14

During the three and nine months ended September 30, 2011, Ivanhoe Mines capitalized $3.5 million and $6.8 million, respectively, of interest expense incurred on the convertible credit facility.

(i) During the nine months ended September 30, 2011, 2,164,215 options were exercised, 163,596 options were cancelled and 5,225,923 options were granted. These granted options have a weighted average exercise price of Cdn$18.83, lives of seven years, and vest over periods ranging from grant date to four years. The weighted average grant-date fair value of stock options granted during the nine months ended September 30, 2011 was Cdn$17.30. The fair value of these options was determined using the Black-Scholes option pricing model. The option valuation was based on a weighted average expected life of 3.0 years, risk-free interest rate of 2.09%, expected volatility of 66%, and dividend yield of nil%. During the nine months ended September 30, 2011, stock-based compensation of $26.9 million (2010 $3.2 million), relating to the development of the Oyu Tolgoi Project was capitalized as property, plant and equipment (Note 2).

(b) Rio Tinto Placements

In 2006, the Company and Rio Tinto formed a strategic partnership and entered into a private placement agreement whereby Rio Tinto would invest in Ivanhoe Mines. Since 2006 the parties have entered into a series of agreements pursuant to which Rio Tinto has provided equity and debt financing to Ivanhoe Mines. As a result of these transactions, Rio Tinto holds a significant investment interest in Ivanhoe Mines. These transactions are set out below:

13. SHARE CAPITAL (Continued)

(c) Rights Offering (continued)

Upon the closing of the rights offering, the Company issued a total of 84,867,671 common shares for gross proceeds of $1.18 billion. Expenses and fees relating to the rights offering totalled approximately $27.3 million.

Under the terms of the rights offering, the monetary amount to be received by the Company upon the exercise of rights was not fixed. Each holder of rights could elect either the $13.88 or Cdn$13.93 subscription price. Furthermore, the Cdn$13.93 subscription price is not denominated in the Company s U.S. dollar functional currency. Therefore, the pro rata distribution of rights to the Company s shareholders was accounted for as a derivative financial liability measured at fair value.

On December 23, 2010, rights to be issued under the rights offering began trading on a when issued basis. On this date, the Company recognized a derivative financial liability of $901.9 million associated with the Company s legal obligation to carry out the rights offering. Deficit was adjusted by a corresponding amount. Each reporting period the derivative financial liability was remeasured at fair value with changes being recognized in earnings. During the three month period ended March 31, 2011, Ivanhoe Mines recognized a derivative loss of $432.5 million.

During the three months ended March 31, 2011, the derivative financial liability was settled as rights were exercised or expired unexercised. A total of $1.19 billion was reclassified from the derivative financial liability to share capital, representing the fair value of rights exercised. At expiry, a total of $5.7 million was reclassified from derivative financial liability to additional paid-in capital, representing the fair value of rights which expired unexercised.

The fair value of the derivative financial liability was determined by reference to published market quotations for the rights.
