**Table of Contents****Notes to Consolidated Financial Statements****1. Basis of Presentation:**

The foregoing unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements as disclosed in the annual report on Form 10-K for the year ended December 31, 2007. In the opinion of management, the unaudited interim consolidated financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim periods presented. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of Sterling Financial Corporation's consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of Sterling's consolidated financial position and results of operations.

In addition to other established accounting policies, the following is a discussion of recent accounting pronouncements:

In September 2006, the Emerging Issues Task Force (EITF) reached a consensus on Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. Under the provisions of EITF Issue No. 06-4, Sterling recognizes the amount that is owed current or former employees under split dollar BOLI. Sterling adopted the EITF 06-4 effective January 1, 2008, which resulted in a cumulative charge of \$2.1 million to retained earnings.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (FAS) No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. In February 2007, FASB issued FAS 159, The Fair Value Option for Financial Assets and Financial Liabilities (FAS 159). FAS 159 provides a fair value measurement election for many financial instruments, on an instrument by instrument basis. Both FAS 157 and 159 became effective for Sterling as of January 1, 2008. See Note 9 for a discussion of their impact. Sterling applied FAS 159 to its loans held for sale in order to match changes in the value of the loans with the value of their economic hedges without having to apply complex hedge accounting.

In November 2007, the SEC issued Staff Accounting Bulletin 109, Written Loan Commitments Recorded at Fair Value Through Earnings, (SAB 109) regarding the valuation of loan commitments. SAB 109 supersedes SAB 105, and states that in measuring the fair value of a derivative loan commitment, the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SAB 109 was effective for Sterling as of January 1, 2008.

In March 2008, the FASB issued FAS 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FAS 133. FAS 161 requires enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under FAS 133 and related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. FAS 161 is effective for Sterling as of December 31, 2008. Sterling is currently evaluating the impact of FAS 161.

**Table of Contents****2. Allowance for Credit Losses:**

The following is an analysis of the changes in the allowances for credit losses (in thousands):

	Six Months Ended June 30,	
	2008	2007
Allowance for credit losses		
Allowance loans, January 1	\$ 111,026	\$ 77,849
Allowance for losses on loans acquired	0	15,029
Provision	68,131	8,200
Amounts written off	(17,466)	(1,984)
Recoveries	639	481
Transfers	38	59
Allowance loans, June 30	162,368	99,634
Allowance unfunded commitments, January 1	6,306	5,840
Acquired	0	266
Provision	53	0
Transfers	(38)	(59)
Allowance unfunded commitments, June 30	6,321	6,047
Total credit allowance	\$ 168,689	\$ 105,681

Sterling recorded a provision for credit losses of \$68.1 million and \$8.2 million for the six months ended June 30, 2008 and 2007, respectively. The increase in the provision for credit losses was in response to an increase in the level of classified loans. Recently, Sterling, like many other financial institutions, has experienced deterioration in the credit quality of residential construction loans due to declining market values and weakness in housing sales in certain of its markets.

**3. Other Borrowings:**

The components of other borrowings are as follows (in thousands):

	June 30,	December
	2008	31, 2007
Junior subordinated debentures	\$ 245,274	\$ 270,015
Other	3,000	3,000
Total other borrowings	\$ 248,274	\$ 273,015

Sterling raises capital from time to time through the formation of trust subsidiaries ( Capital Trusts ), which issue capital securities ( Trust Preferred Securities ) to investors. The Capital Trusts are business trusts in which Sterling owns all of the common equity. The proceeds from the sale of the Trust Preferred Securities are used to purchase junior subordinated deferrable interest debentures ( Junior Subordinated Debentures ) issued by Sterling. Sterling's obligations under the Junior Subordinated Debentures and related documents, taken together, constitute a full and unconditional guarantee by Sterling of the Capital Trusts' obligations under the Trust Preferred Securities. The Trust Preferred Securities are treated as debt of Sterling. The Junior Subordinated Debentures and related Trust Preferred Securities generally mature 30 years after issuance and are redeemable at the option of Sterling under certain conditions, including, with respect to certain of the Trust Preferred Securities, payment of call premiums. Interest is

paid quarterly or semiannually.

**Table of Contents**

Details of the Trust Preferred Securities are as follows:

Subsidiary Issuer	Issue Date	Maturity Date	Call Date	Rate at June 30, 2008		Amount (in Thousands)
Sterling Capital Trust IX	July 2007	Oct 2037	N/A	Floating	4.10%	\$ 46,392
Sterling Capital Trust VIII	Sept 2006	Sept 2036	N/A	Floating	4.41	51,547
Sterling Capital Trust VII	June 2006	June 2036	N/A	Floating	4.30	56,702
Lynnwood Capital Trust II	June 2005	June 2035	June 2010	Floating	4.58	10,310
Sterling Capital Trust VI	June 2003	Sept 2033	Sept 2008	Floating	5.98	10,310
Sterling Capital Statutory Trust V	May 2003	May 2033	June 2008	Floating	6.06	20,619
Sterling Capital Trust IV	May 2003	May 2033	May 2008	Floating	5.83	10,310
Sterling Capital Trust III	April 2003	April 2033	April 2008	Floating	6.12	14,433
Lynnwood Capital Trust I	Mar 2003	Mar 2033	Mar 2007	Floating	5.96	9,472
Klamath First Capital Trust I	July 2001	July 2031	June 2006	Floating	6.94	15,179
					4.91%*	\$ 245,274

\* Weighted average rate

On January 25, 2008, Sterling redeemed \$24.0 million of Trust Preferred Securities that carried a 10.25% fixed-rate coupon. In April 2008, Sterling renewed its revolving credit agreement with Wells Fargo Bank, N.A. through April 30, 2009, in the amount of \$10.0 million. Amounts drawn on this line of credit bear interest at either 1.5% above LIBOR, or 1% below the prime rate, at Sterling's election, and are collateralized by the stock of Golf Savings Bank. As of June 30, 2008, no amounts were drawn on this line of credit.

**Table of Contents****4. Earnings Per Share:**

The following table presents the basic and diluted earnings per share computations.

**6. Segment Information:**

For purposes of measuring and reporting financial results, Sterling is divided into five business segments:

The Community Banking segment provides traditional bank services through the retail and commercial banking groups of Sterling's subsidiary, Sterling Savings Bank.

The Residential Construction Lending segment originates and services loans through the real estate division of Sterling's subsidiary, Sterling Savings Bank.

The Residential Mortgage Banking segment originates and sells servicing-retained and servicing-released residential loans through loan production offices of Sterling's subsidiary, Golf Savings Bank.

The Commercial Mortgage Banking segment originates, sells and services commercial real estate loans and participation interests in commercial real estate loans through offices in the western region primarily through Sterling Savings Bank's subsidiary INTERVEST-Mortgage Investment Company (INTERVEST).

The Other and Eliminations segment represents the parent company expenses and intercompany eliminations of revenue and expenses.

During 2008, the operations of Sterling Savings Bank's subsidiary, Action Mortgage Company, were realigned into the real estate division of Sterling Savings Bank, and the operations of Sterling Savings Bank's subsidiary, Harbor Financial Services, Inc., were moved into the private banking department of Sterling Savings Bank. The financial results for the real estate division are reflected in the Residential Construction Lending segment, while the private banking department's financial results are included in the Community Banking segment. For comparability purposes, prior period segment information has been restated to reflect this realignment.

**Table of Contents**

The following table presents certain financial information regarding Sterling's segments and provides a reconciliation to Sterling's consolidated totals for the periods presented:

	As of and for the Three Months Ended June 30, 2008					
	Community Banking	Residential Construction Lending	Residential Mortgage Banking	Commercial Mortgage Banking	Other and Eliminations	Total
	(Dollars in thousands)					
Interest income	\$ 139,452	\$ 28,084	\$ 8,023	\$ 4,890	\$ 193	\$ 180,642
Interest expense	(63,474)	(15,586)	(4,559)	0	(2,904)	(86,523)
Net interest income (expense)	75,978	12,498	3,464	4,890	(2,711)	94,119
Provision for loan losses	(15,709)	(13,641)	(1,637)	0	0	(30,987)
Noninterest income	18,625	1,173	7,155	905	(2,360)	25,498

**Table of Contents****7. Stock Based Compensation:**

The following is a summary of stock option and restricted stock activity during the six months ended June 30, 2008:

	Stock Options		Restricted Stock	
	Number	Weighted Average Exercise Price	Number	Weighted Average Grant Price
Balance, January 1, 2008	2,067,401	\$ 21.13	85,000	\$ 33.17
Granted	251,000	17.79	182,000	17.79
Exercised / vested	(224,973)	5.79	(21,250)	33.17
Cancelled / expired	(72,736)	22.45	0	0.00
Outstanding, June 30, 2008	2,020,692	\$ 22.40	245,750	\$ 21.78
Exercisable, June 30, 2008	1,525,942	\$ 21.52		

At June 30, 2008, the weighted average remaining contractual life and the aggregate intrinsic value of stock options outstanding was 4.8 years and (\$36.9) million, respectively, and exercisable was 4.5 years and (\$26.5) million, respectively, and at December 31, 2007, was 4.6 years and (\$9.0) million, respectively, and 4.3 years and (\$3.7) million, respectively. As of June 30, 2008, a total of 1,578,249 shares remained available for grant under Sterling's 2001, 2003 and 2007 Long-Term Incentive Plans. The stock options granted under these plans have terms of four, six, eight or ten years. The stock options and restricted shares granted during 2008 have four year vesting schedules. During the six months ended June 30, 2008 and 2007, the intrinsic value of options exercised were \$2.5 million and \$5.0 million, respectively, and fair value of options granted were \$1.1 million and \$3.2 million, respectively. The Black-Scholes option-pricing model was used in estimating the fair value of option grants. The weighted average assumptions used were:

	Six Months Ended June 30,	
	2008	2007
Expected volatility	30%	28% - 29%
Expected term (in years)	4.3	4.7 - 6.0
Expected dividend yield	2.14%	0.90% - 1.10%
Risk free interest rate	2.93%	4.65% - 4.81%

Stock based compensation expense recognized during the periods presented was as follows:

	Six Months Ended June 30,	
	2008	2007
	(Dollars in thousands)	
Stock based compensation expense:		
Stock options	\$ 570	\$ 334
Restricted stock	690	293
Total	\$ 1,260	\$ 627

As of June 30, 2008, unrecognized equity compensation expense totaled \$7.9 million, as the underlying outstanding awards had not yet been earned. This amount will be recognized over a weighted average period of 3.6 years.

---

**Table of Contents****8. Derivatives and Hedging:**

As part of its mortgage banking activities, Sterling issues interest rate lock commitments to prospective borrowers on residential mortgage loan applications. Pricing for the sale of these loans is fixed with various qualified investors under both non-binding ( best-efforts ) and binding ( mandatory ) delivery programs. For mandatory delivery programs, Sterling hedges interest rate risk by entering into offsetting forward sale agreements on MBS with third parties. Risks inherent in mandatory delivery programs include the risk that if Sterling does not close the loans subject to interest rate lock commitments, it is nevertheless obligated to deliver MBS to the counterparty under the forward sale agreement. Sterling could incur significant costs in acquiring replacement loans or MBS and such costs could have a material adverse effect on mortgage banking operations in future periods.

Interest rate lock commitments and loan delivery commitments to investors are off balance sheet commitments that are considered to be derivatives. As of June 30, 2008, Sterling had mandatory delivery commitments to sell mortgage loans to investors valued at \$35.1 million, and held offsetting forward sale agreements on MBS valued at \$28.4 million. As of December 31, 2007, Sterling did not have any loans subject to interest rate lock commitments under mandatory delivery programs. As of June 30, 2008 and December 31, 2007, Sterling had entered into best efforts forward commitments to sell \$113.6 million and \$41.3 million of mortgage loans, respectively.

Sterling enters into interest rate swap derivative contracts with customers. The interest rate risk on these contracts is offset by entering into comparable broker dealer swaps. These contracts are carried as an offsetting asset and liability at fair value, and as of June 30, 2008 and December 31, 2007, were \$2.3 million and \$1.6 million, respectively.

**9. Fair Value:**

On January 1, 2008, Sterling adopted FAS 159, which gives companies the option of carrying their financial assets and liabilities at fair value and can be implemented on all or individually selected financial instruments. Effective January 1, 2008, Sterling elected to apply FAS 159 on newly originated loans held for sale under mandatory delivery programs. After analyzing the effects of FAS 159 on held for sale loans, Sterling elected to apply FAS 159 to all newly originated held for sale loans effective April 1, 2008. The fair value election was made to match changes in the value of these loans with the value of their economic hedges. Loan origination fees, costs and servicing rights, which were previously deferred on these loans, are now recognized as part of the loan value at origination. There was no transition adjustment upon adoption.

On January 1, 2008, FAS 157 became effective for Sterling. This standard establishes a framework for defining and measuring fair value. The standard requires that one of three valuation methods be used to determine fair market value: the market approach, the income approach or the cost approach. To increase consistency and comparability in fair value measurements and related disclosures, the standard also creates a fair value hierarchy to prioritize the inputs to these valuation methods into the following three levels:

Level 1 inputs are a select class of observable inputs, based upon the quoted prices for identical instruments in active markets that are accessible as of the measurement date, and are to be used whenever available.

Level 2 inputs are other types of observable inputs, such as quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are inactive; or other inputs that are observable or can be derived from or supported by observable market data. Level 2 inputs are to be used whenever Level 1 inputs are not available.

Level 3 inputs are significantly unobservable, reflecting the reporting entity's own assumptions regarding what market participants would assume when pricing a financial instrument. Level 3 inputs are to only be used when Level 1 and Level 2 inputs are unavailable.

The following disclosure requirements under FAS 157 are applicable to financial assets and liabilities, and as of January 1, 2009, will be expanded to include nonfinancial assets and liabilities.

**Table of Contents**

**Assets and Liabilities Measured at Fair Value on a Recurring Basis.** The following presents Sterling's financial instruments that are measured at fair value on a recurring basis:

	June 30, 2008	Level 1	Level 2	Level 3
		(Dollars in thousands)		
Investment securities and mortgage-backed securities available for sale	\$ 2,023,306	\$ 0	\$ 2,023,306	\$ 0
Loans held for sale	73,859	0	73,859	0
Other assets derivatives	3,069	0	819	2,250
<b>Total assets</b>	<b>\$ 2,100,234</b>	<b>\$ 0</b>	<b>\$ 2,097,984</b>	<b>\$ 2,250</b>
Other liabilities derivatives	\$ 2,312	\$ 0	\$ 62	\$ 2,250

Changes in the fair value of available-for-sale securities are recorded on the balance sheet under accumulated-other-comprehensive income, while gains and losses from sales are recognized as income. The difference between the aggregate fair value and the aggregate unpaid principal balance of loans held for sale that are carried at fair value under FAS 159 was \$1.0 million as of June 30, 2008. Changes in fair value relating to these loans were included in earnings as follows:

	Six Months Ended June 30, 2008 (Dollars in thousands)
Mortgage banking operations	\$ 1,010

**Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis.** Sterling may be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis from application of lower of cost or market ( LOCOM ) accounting or write-downs of individual assets. For these financial assets for which a fair value adjustment was recorded during the period, the following table presents the adjustment and the carrying value at period end:

	Total Carrying Value	Level 1	Level 2	Level 3	Losses During the Six Months Ended June 30, 2008
		(Dollars in thousands)			
Loans	\$74,141	\$0	\$74,141	\$0	\$ (36,763)
Mortgage servicing rights	3,558	0	3,558	0	(503)
Real estate owned	12,898	0	12,898	0	(4,047)

The loan loss disclosed above represents the amount of the specific reserve that was allocated to impaired loans during the period, and is included in the provision for credit losses. Mortgage servicing rights were written down mainly due to an acceleration of mortgage prepayments. Sterling carries its mortgage servicing rights at LOCOM, and as such, they are measured at fair value on a nonrecurring basis. The real estate owned charge during the period represents the writedowns taken at foreclosure that were charged to the general loan loss allowance.

**Table of Contents****10. Cash Dividends:**

The following table presents the amount of dividends paid during the three and six months ended June 30, 2008 and 2007, respectively:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(Dollars in thousands, except per share amounts)			
Total amount	\$5,186	\$4,093	\$10,075	\$7,251
Per share amount	0.100	0.080	0.195	0.155
Payout ratio	45%	15%	69%	15%

On July 11, 2008, Sterling paid a quarterly cash dividend of \$0.10 per share of common stock to shareholders of record as of June 30, 2008.

**11. Goodwill Lawsuit:**

In April 2008, the U.S. Government appealed the U.S. Court of Federal Claims February 19, 2008 ruling that awarded damages to Sterling in the amount of \$1.05 million resulting from Sterling's lawsuit against the U.S. Government for breach of contract with respect to the loss of goodwill treatment and other matters relating to Sterling's past acquisitions of troubled thrift institutions. Sterling has filed a notice of cross appeal. The U.S. Government and Sterling have jointly requested that the court assign a mediator to resolve the dispute.

**PART I Financial Information (continued)**

**Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations**

**STERLING FINANCIAL CORPORATION**

**June 30, 2008**

*This report contains forward-looking statements. For a discussion about such statements, including the risks and uncertainties inherent therein, see Forward-Looking Statements. Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Consolidated Financial Statements and Notes presented elsewhere in this report and in Sterling's 2007 annual report on Form 10-K.*

**General**

Sterling Financial Corporation (Sterling) is a bank holding company, organized under the laws of Washington in 1992. The principal operating subsidiaries of Sterling are Sterling Savings Bank and Golf Savings Bank. The principal operating subsidiary of Sterling Savings Bank is INTERVEST-Mortgage Investment Company (INTERVEST). During 2008, the operations of Sterling Savings Bank's subsidiary, Action Mortgage Company, were realigned into the real estate division of Sterling Savings Bank, and the operations of Sterling Savings Bank's subsidiary, Harbor Financial Services, Inc., were moved into the wealth management department of Sterling Savings Bank. Sterling Savings Bank commenced operations in 1983 as a Washington State-chartered federally insured stock savings and loan association headquartered in Spokane, Washington. On July 8, 2005, Sterling Savings Bank converted to a commercial bank. The main focus of Golf Savings Bank, a Washington State-chartered savings bank acquired by Sterling in July 2006, is the origination and sale of residential mortgage loans.

Sterling provides personalized, quality financial services and Perfect Fit banking products to its customers consistent with its Hometown Helpful philosophy. Sterling believes that its dedication to personalized service has enabled it to grow both its retail deposit base and its lending portfolio in the western United States. With \$12.70 billion in total assets as of June 30, 2008, Sterling originates loans and attracts Federal Deposit Insurance Corporation (FDIC) insured deposits from the general public through 179 depository banking offices located in Washington, Oregon, California, Idaho and Montana. In addition, Sterling originates loans through Golf Savings Bank and Sterling Savings Bank residential loan production offices, and through INTERVEST commercial real estate lending offices throughout the western United States. Sterling also markets fixed income and equity products, mutual funds, fixed and variable annuities and other financial products through wealth management representatives located throughout Sterling's financial service center network.

Sterling continues to implement its strategy to become the leading community bank in the western United States by increasing its commercial and consumer customer relationships that can provide a wider variety of lending opportunities, as well as increasing its commercial and retail deposits, particularly transaction accounts. Such loans generally involve a higher degree of risk than financing residential real estate. Management believes that a community bank mix of assets and liabilities will enhance its net interest income (the difference between the interest earned on loans and investments and the interest paid on deposits and borrowings) and will increase other fee income, although there can be no assurance in this regard. Sterling's revenues are derived primarily from interest earned on loans and mortgage-backed securities (MBS), fees and service charges, and mortgage banking operations. The operations of Sterling, and banking institutions generally, are influenced significantly by general economic conditions and by policies of its primary regulatory authorities, the Board of Governors of the Federal Reserve System (the Federal Reserve), the FDIC and the Washington State Department of Financial Institutions.

**Table of Contents**

**Executive Summary and Highlights**

Sterling's earnings per share and performance ratios for 2008 were impacted by Sterling recording a credit provision that was higher than the provision recorded during 2007. During the first six months of 2008, Sterling has recorded a \$68.1 million provision for credit losses compared with \$8.2 million for the same period a year ago. This increase stems from higher levels of non-performing and classified assets, as disruptions in the financial and real estate markets have resulted in the exhaustion of liquidity reserves for some of Sterling's borrowers. As of June 30, 2008, non-performing assets were \$303.4 million versus \$135.2 million at December 31, 2007, and \$33.4 million at June 30, 2007. Sterling's capital and liquidity sources remain strong, as well as the performance of its retail and commercial banking groups. Net interest income for the first half of 2008 was \$186.2 million, versus \$169.7 million for the six months ended June 30, 2007.

Highlights at June 30, 2008 as compared to June 30, 2007 were as follows:

Capital ratios remain above well-capitalized levels.

Net interest income rose 6% to \$94.1 million.

Fees and service charge income grew 17% to \$16.0 million.

Total deposits gained 5% to a record \$7.99 billion.

Quarterly cash dividend was maintained at \$0.10 per share.

Tangible book value per share increased 9% to \$13.41.

**Company Growth**

Sterling intends to continue to pursue a long-term aggressive growth strategy to become the leading community bank in the western United States. In addition to continued organic growth, this strategy may include acquiring other financial businesses or branches thereof, or other substantial assets or deposit liabilities. There is no assurance that Sterling will be successful in completing any such acquisitions.

On February 28, 2007, Sterling completed its acquisition of Northern Empire Bancshares, a California corporation (Northern Empire) by issuing \$30.0 million in cash, and 8,914,815 shares of Sterling common stock valued at \$290.4 million in exchange for all outstanding Northern Empire shares. Northern Empire options totaling 646,018 were converted into 573,212 Sterling options, valued at \$12.3 million. The total value of the transaction was \$332.8 million. Northern Empire merged into Sterling, with Sterling being the surviving corporation in the merger. Northern Empire's financial institution subsidiary, Sonoma National Bank, merged with and into Sterling's subsidiary, Sterling Savings Bank, with Sterling Savings Bank being the surviving institution.

Sterling may not be successful in identifying further acquisition candidates, integrating acquisitions or preventing such acquisitions from having an adverse effect on Sterling. There is significant competition for acquisitions in Sterling's market area, and Sterling may not be able to acquire other businesses on attractive terms. Furthermore, the success of Sterling's growth strategy will depend on increasing and maintaining sufficient levels of regulatory capital, obtaining necessary regulatory approvals, generating appropriate growth and the existence of favorable economic and market conditions. There can be no assurance that Sterling will be successful in implementing its growth strategy.

**Table of Contents****Critical Accounting Policies**

The accounting and reporting policies of Sterling conform to accounting principles generally accepted in the United States of America ( GAAP ) and to general practices within the banking industry. The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Sterling s management has identified the accounting policies described below as those that, due to the judgments, estimates and assumptions inherent in those policies are critical to an understanding of Sterling s Consolidated Financial Statements and Management s Discussion and Analysis.

***Income Recognition.*** Sterling recognizes interest income by methods that conform to general accounting practices within the banking industry. In the event management believes collection of all or a portion of contractual interest on a loan has become doubtful, which generally occurs after the loan is 90 days past due, Sterling discontinues the accrual of interest and any previously accrued interest recognized in income deemed uncollectible is reversed. Interest received on nonperforming loans is included in income only if principal recovery is reasonably assured. A nonperforming loan is restored to accrual status when it is brought current, has performed in accordance with contractual terms for a reasonable period of time, and the collectability of the total contractual principal and interest is no longer in doubt.

***Allowance for Credit Losses.*** The allowance for credit losses is composed of the allowance for loan losses and the reserve for unfunded credit commitments. In general, determining the amount of the allowance requires significant judgment and the use of estimates by management. Sterling maintains an allowance for credit losses to absorb probable losses in the loan portfolio based on a quarterly analysis of the portfolio and expected future losses. This analysis is designed to determine an appropriate level and allocation of the allowance for losses among loan types by considering factors affecting loan losses, including specific losses, levels and trends in nonperforming loans, historical loan loss experience, current national and local economic conditions, volume, growth and composition of the portfolio, regulatory guidance and other relevant factors. Management monitors the loan portfolio to evaluate the adequacy of the allowance. The allowance can increase or decrease each quarter based upon the results of management s analysis.

The amount of the allowance for the various loan types represents management s estimate of expected losses from existing loans based upon specific allocations for individual lending relationships and historical loss experience for each category of homogeneous loans. The allowance for credit losses related to impaired loans is based on discounted cash flows using the loan s initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. This evaluation requires management to make estimates of the amounts and timing of future cash flows on nonperforming loans, which consist primarily of non-accrual and restructured loans.

Individual loan reviews are based upon specific quantitative and qualitative criteria, including the size of the loan, loan quality ratings, value of collateral, repayment ability of borrowers, and historical experience factors. The historical experience factors utilized and allowances for homogeneous loans (such as residential mortgage loans, consumer loans, etc.) are collectively evaluated based upon historical loss experience, trends in losses and delinquencies, growth of loans in particular markets, and known changes in economic conditions in each particular lending market.

While management uses available information to provide for loan losses, the ultimate collectability of a substantial portion of the loan portfolio and the need for future additions to the allowance will be influenced by changes in economic conditions and other relevant factors. While Sterling did not participate in the lending practices that led up to the credit crisis, the effects of the current economic slow down has resulted in an increase in delinquencies and nonperforming assets in Sterling s residential construction portfolio. A further slowdown in economic activity could have additional adverse affects on cash flows for both commercial and individual borrowers, which may result in further increases in nonperforming assets, delinquencies and losses on loans. There can be no assurance that the allowance for credit losses will be adequate to cover all losses, but management believes the allowance for credit losses was adequate at June 30, 2008.

**Table of Contents**

***Investment Securities and MBS.*** Assets in the investment securities and MBS portfolios are initially recorded at cost, which includes any premiums and discounts. Sterling amortizes premiums and discounts as an adjustment to interest income over the estimated life of the security. The cost of investment securities sold, and any resulting gain or loss, is based on the specific identification method.

The loans underlying Sterling's MBS are subject to the prepayment of principal. The rate at which prepayments are expected to occur in future periods impacts the amount of premium to be amortized in the current period. If prepayments in a future period are higher or lower than expected, then Sterling will need to amortize a larger or smaller amount of the premium to interest income in that future period.

Management determines the appropriate classification of investment securities at the time of purchase.

Held-to-maturity securities are those securities that Sterling has the positive intent and ability to hold to maturity and are recorded at amortized cost. Available-for-sale securities are those securities that would be available to be sold in the future in response to Sterling's liquidity needs, changes in market interest rates, and asset-liability management strategies, among other factors. Available-for-sale securities are reported at fair value, with unrealized holding gains and losses reported in shareholders' equity as a separate component of other comprehensive income, net of applicable deferred income taxes.

Management evaluates investment securities for other-than-temporary declines in fair value on a quarterly basis. If the fair value of investment securities falls below their amortized cost and the decline is deemed to be other-than-temporary, the securities will be written down to current market value, resulting in a loss recorded in the income statement and the establishment of a new basis. During the period ended June 30, 2008, there were no investment securities that management identified to be other-than-temporarily impaired, because the decline in fair value was attributable to changes in interest rates and not credit quality, and because Sterling has the ability and intent to hold these investments until a recovery in market price occurs, or until maturity. Realized losses could occur in future periods due to a change in management's intent to hold the investments to recovery, a change in management's assessment of credit risk, or a change in regulatory or accounting requirements.

***Goodwill and Other Intangible Assets.*** Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Sterling's goodwill relates to value inherent in the banking business and the value is dependent upon Sterling's ability to provide quality, cost effective services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is generated by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

Due to the impact of market volatility on Sterling's market capitalization as compared to its GAAP basis equity, Sterling is analyzing the value of goodwill related to its acquisitions to determine whether the value of goodwill has been impaired. Sterling anticipates that the analysis will be completed by the end of the third quarter. There are many assumptions and estimates underlying the determination of impairment. Future events could cause management to conclude that Sterling's goodwill or other intangible assets are impaired, which would result in Sterling recording an impairment loss. Any resulting impairment loss could have a material adverse impact on Sterling's financial condition and results of operations.

Other intangible assets consisting of core deposit intangibles with definite lives are amortized on a straight line basis over the estimated life of the acquired depositor relationships (generally eight to ten years).

***Real Estate Owned and Other Collateralized Assets.*** Property and other assets acquired through foreclosure of defaulted mortgage or other collateralized loans are carried at the lower of cost or fair value, less estimated costs to sell. Development and improvement costs relating to such property are capitalized to the extent they are deemed to be recoverable.

An allowance for losses on real estate and other assets owned includes amounts for estimated losses as a result of impairment in value of the property after repossession. Sterling reviews its real estate owned and other collateralized assets for impairment in value whenever events or circumstances indicate that the carrying value of

**Table of Contents**

the property or other assets may not be recoverable. In performing the review, if expected future undiscounted cash flow from the use of the property or other assets, or the fair value, less selling costs, from the disposition of the property or other assets is less than its carrying value, an impairment loss is recognized.

**Loans Held for Sale.** On January 1, 2008, Sterling adopted the fair value election available under FAS 159 for newly originated loans held for sale under mandatory delivery programs. Effective April 1, 2008 Sterling expanded its adoption of FAS 159 to all newly originated loans held for sale. The fair value election was made to match changes in the value of these loans with the value of their economic hedges without having to apply complex hedge accounting. Loan origination fees, costs and servicing rights are recognized as part of the loan value at origination. This value is based on quoted prices for similar instruments in both active and inactive markets, therefore, these loans are classified as level 2.

**Income Taxes.** Sterling estimates income taxes payable based on the amount it expects to owe various taxing authorities. Accrued income taxes represent the net estimated amount due to, or to be received from, taxing authorities. In estimating accrued income taxes, Sterling assesses the relative merits and risks of the appropriate tax treatment of transactions, taking into account the applicable statutory, judicial and regulatory guidance in the context of Sterling's tax position. Sterling also considers recent audits and examinations, as well as its historical experience in making such estimates. Although Sterling uses available information to record income taxes, underlying estimates and assumptions can change over time as a result of unanticipated events or circumstances. Penalties and interest associated with any potential estimate variances would be included in income tax expense on the Consolidated Statement of Income.

Sterling uses an estimate of future earnings to support its position that the benefit of its net deferred tax assets will be realized. If future taxable income should prove nonexistent or less than the amount of temporary differences giving rise to the net deferred tax assets within the tax years to which they may be applied, the assets will not be realized and Sterling's net income will be reduced.

**Results of Operations**

**Overview.** Sterling recorded net income of \$11.7 million, or \$0.23 per diluted share, for the three months ended June 30, 2008, compared with net income of \$27.0 million, or \$0.52 per diluted share, for the three months ended June 30, 2007. Net income for the six months ended June 30, 2008 was \$14.6 million, or \$0.28 per diluted share, compared to \$49.9 million, or \$1.02 for the same period in 2007. The annualized return on average assets was 0.37% and 0.94% for the three months ended June 30, 2008 and 2007, respectively. The annualized return on average equity was 3.9% and 9.6% for the three months ended June 30, 2008 and 2007, respectively. The year over year decrease in net income and performance ratios primarily reflected an increased credit provision in response to an increase in the level of classified loans, particularly in the residential construction portfolio.

**Net Interest Income.** The most significant component of earnings for a financial institution typically is net interest income, which is the difference between interest income, primarily from loan, MBS and investment securities portfolios, and interest expense, primarily on deposits and borrowings. During the three months ended June 30, 2008 and 2007, net interest income was \$94.1 million and \$89.0 million, respectively, an increase of 6%. Net interest income for the six months ended June 30, 2008 increased 10% to \$186.2 million from \$169.7 million for the six months ended June 30, 2007. The increase in net interest income from the growth in loan balances was partly offset by a decrease in net interest margin, which resulted from the yield on Sterling's earning assets declining faster than the cost of deposits and borrowings, and an increase in nonperforming loans.

Changes in Sterling's net interest income are a function of changes in both rates and volumes of interest-earning assets and interest-bearing liabilities. Net interest margin refers to net interest income divided by total average interest-earning assets and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities. The following table presents the composition of the change in net interest income, on a tax equivalent basis, for the periods presented. Municipal loan and bond interest income are presented gross of their applicable tax savings. For each category of interest-earning assets and interest-bearing liabilities, the following table provides information on changes attributable to:

**Table of Contents**

Volume changes in volume multiplied by comparative period rate;

	Three Months Ended June 30, 2008 vs. 2007				Six Months Ended June 30, 2008 vs. 2007			
	Increase (Decrease) Due to:							
	Volume	Rate	Rate/ Volume	Total	Volume	Rate	Rate/ Volume	Total
(Dollars in thousands)								
Rate/volume analysis:								
Interest income:								
Loans	\$ 15,572	\$ (32,631)	\$ (3,489)	\$ (20,548)	\$ 47,379	\$ (51,886)	\$ (6,660)	\$ (11,167)
MBS	5,069	961	200	6,230	8,178	1,637	446	10,261
Investments and cash equivalents	882	250	83	1,215	1,293	699	206	2,198
Total interest income	21,523	(31,420)	(3,206)	(13,103)	56,850	(49,550)	(6,008)	1,292
Interest expense:								
Deposits	6,071	(17,702)	(1,597)	(13,228)	14,123	(25,874)	(2,327)	(14,078)
Borrowings	9,804	(11,647)	(3,427)	(5,270)	22,765	(18,341)	(6,234)	(1,810)
Total interest expense	15,875	(29,349)	(5,024)	(18,498)	36,888	(44,215)	(8,561)	(15,888)
Changes in net interest income	\$ 5,648	\$ (2,071)	\$ 1,818	\$ 5,395	\$ 19,962	\$ (5,335)	\$ 2,553	\$ 17,180

Net interest margin for each of the last five quarters was as follows:

	Tax Equivalent Net Interest Margin
Three Months Ended	
June 30, 2008	3.23%
March 31, 2008	3.24%
December 31, 2007	3.34%
September 30, 2007	3.50%
June 30, 2007	3.41%

The growth in net interest income has slowed while net interest margin over the last few quarters has declined due to the increase in non-performing assets, and the decline in the prime rate. Sterling has been asset sensitive during recent periods, with a higher level of interest earning assets that were subject to re-pricing faster in the short term than deposits and borrowings. Additionally, when loans reach non-performing status, the reversal and cessation of accruing interest has an immediate negative impact on net interest margin.

**Provision for Credit Losses.** Management's policy is to establish valuation allowances for estimated losses by charging corresponding provisions against income. The evaluation of the adequacy of specific and general valuation allowances is an ongoing process. This process includes information derived from many factors, including historical loss trends and trends in classified assets, delinquency and nonaccrual loans, and portfolio volume, diversification as to type of loan, size of individual credit exposure, current and anticipated economic conditions, as well as loan policies, collection policies and effectiveness, quality of credit personnel, effectiveness of policies, procedures and

practices, and recent loss experience of peer banking institutions.

Sterling recorded provisions for losses on loans of \$31.0 million and \$4.0 million for the three months ended June 30, 2008 and 2007, respectively, and \$68.1 million and \$8.2 million for the six months ended June 30, 2008 and 2007, respectively. Sterling has increased its provision for credit losses in response to an increase in the level of classified loans, particularly in the residential construction portfolio, and an assessment of the other relevant factors mentioned in the preceding paragraph.

**Table of Contents**

The following table summarizes the allowance for credit losses for the periods indicated:

	Six Months Ended June 30,	
	2008	2007
	(Dollars in thousands)	
Allowance loans, January 1	\$ 111,026	\$ 77,849
Acquired	0	15,029

Charge offs, net of recoveries	(16,827)	(1,503)
Transfers	38	59
Allowance loans, June 30	162,368	99,634
Allowance unfunded commitments, January 1	6,306	5,840
Acquired	0	266
Provision	53	0
Transfers	(38)	(59)
Allowance unfunded commitments, June 30	6,321	6,047
Total credit allowance	\$ 168,689	\$ 105,681

During 2007, Sterling acquired an allowance for losses on loans as a result of the Northern Empire acquisition. These acquired loans were determined to not have exhibited a deterioration in credit quality since origination, and thus were not included within the scope of the American Institute of Certified Public Accountants' Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer.

At June 30, 2008, Sterling's total classified assets were 3.92% of total assets, compared with 0.83% of total assets at June 30, 2007. Nonperforming assets, a subset of classified assets, were 2.07% of total assets at June 30, 2008, compared with 0.27% of total assets at June 30, 2007. At June 30, 2008, the delinquency ratio for loans 60 days past due was 3.07% of total loans compared to 0.33% of total loans at June 30, 2007. Recently, Sterling, like many other financial institutions, has experienced deterioration in the credit quality of residential construction loans due to declining market values and weakness in housing sales in certain of its markets. Sterling's commercial banking and commercial real estate portfolios continue to perform in line with expectations. Sterling's consumer portfolio is stable although there has been an increase in auto loan delinquencies primarily with borrowers who are working in the construction industry.

The following table summarizes the principal balances of nonperforming assets at the dates indicated:

	June 30,	
	2008	2007
	(Dollars in thousands)	
Past due 90 days	\$ 0	\$ 803
Nonaccrual loans	280,260	28,565
Restructured loans	149	0
Total nonperforming loans	280,409	29,368
Real estate owned	22,998	4,012
Total nonperforming assets	303,407	33,380
Specific reserves	(40,597)	(2,947)

Net nonperforming assets	\$ 262,810	\$ 30,433
--------------------------	------------	-----------

**Table of Contents**

The following table describes non-performing assets by asset type at the dates indicated:

	June 30,	
	2008	2007
	(Dollars in thousands)	
Residential real estate	\$ 10,121	\$ 1,358
Multifamily real estate	2,197	8,765
Commercial real estate	4,838	6,152
Construction	253,170	9,401
Consumer direct	3,053	1,454
Consumer indirect	956	258
Commercial banking	29,072	5,992
<b>Total nonperforming assets</b>	<b>\$ 303,407</b>	<b>\$ 33,380</b>

Nonperforming assets presented above are gross of their applicable specific loan loss reserve. Residential construction loans continue to be the primary driver of non-performing assets, representing \$240.9 million, or 79% of all non-performing assets. The Puget Sound region is our largest market, representing 39% of residential construction loans commitments, which total approximately \$1 billion. The non-performing loans related to this market segment amount to \$31.0 million, or 3% of the outstanding commitments. Early in this cycle, three regions containing stressed residential construction assets were identified: Boise, Idaho, Southern California, and Bend, Oregon. During the three months ended June 30, 2008, Sterling's credit-quality trends in Boise and Bend appeared to be stabilizing. Southern California experienced a decline in credit quality reflecting one borrower with two acquisition and development loans entering non-accrual status. Last quarter, Portland, Oregon, and Utah were identified as additional regions with distressed assets. Both regions experienced a decline of credit quality during the quarter. The following table presents residential construction nonperforming assets by market over the past few quarters:

	June 30, 2008		March 31, 2008		December 31, 2007	
	(Dollars in thousands)					
Residential construction						
Portland, OR	\$ 46,101	15%	\$ 7,567	3%	\$ 501	0%
Southern California	40,085	13%	28,032	13%	23,614	17%
Utah	36,179	12%	15,372	7%	3,603	3%
Boise, ID	34,939	12%	37,338	17%	32,728	24%
Puget Sound	30,986	10%	23,356	10%	12,442	9%
Vancouver, WA	19,854	7%	19,943	9%	2,103	2%
Bend, OR	19,695	6%	20,927	9%	18,500	15%
Other	13,061	4%	15,985	8%	7,309	5%
<b>Total residential construction</b>	<b>240,900</b>	<b>79%</b>	<b>168,520</b>	<b>76%</b>	<b>100,800</b>	<b>75%</b>
Other loan categories	62,507	21%	54,564	24%	34,415	25%
<b>Total gross nonperforming assets</b>	<b>303,407</b>	<b>100%</b>	<b>223,084</b>	<b>100%</b>	<b>135,215</b>	<b>100%</b>
Specific reserves	(40,597)		(19,084)		(8,678)	
<b>Total net nonperforming assets</b>	<b>\$ 262,810</b>		<b>\$ 204,000</b>		<b>\$ 126,537</b>	

Sterling's credit administration team has taken a disciplined approach towards risk evaluation. Classified assets, which include non-performing assets, increased to \$497.5 million from \$402.8 million at March 31, 2008, \$234.3 million at December 31, 2007, and \$95.0 million at June 30, 2007. The increase in classified assets was heavily influenced by the stress in the residential construction portfolio.

**Table of Contents**

**Non-Interest Income.** Non-interest income was as follows for the periods presented:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(Dollars in thousands)			
Fees and service charges	\$ 16,012	\$ 13,694	\$ 30,163	\$ 25,886
Mortgage banking operations	8,227	9,807	14,425	18,665
Bank-owned life insurance	1,747	1,717	3,213	3,264
Loan servicing fees	697	410	549	1,093
Real estate owned operations	(238)	(93)	(344)	(138)
Other	(947)	(757)	(1,346)	(544)
Total	\$ 25,498	\$ 24,778	\$ 46,660	\$ 48,226

Fees and service charge income increased 17% for both the three and six months ended June 30, 2008, as compared to the comparable 2007 periods, reflecting increases in analyzed account fees, loan-related fees, transaction fees, financial services commissions, and fees from Sterling's Balance Shield program. The total number of transaction accounts for the second quarter of 2008 grew 3% over the second quarter of 2007 and was up 3%, on an annualized basis, from the first quarter of 2008. Income from mortgage banking for the three and six months ended June 30, 2008 as compared to 2007 was lower as a result of a decrease in brokered fee income and gains on loan sales.

The following table summarizes certain information regarding Sterling's residential and commercial mortgage banking activities for the periods indicated:

	As of and for the		As of and for the	
	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(Dollars in thousands)			
Originations of residential mortgage loans	\$ 376,122	\$ 454,921	\$ 787,238	\$ 799,539
Originations of commercial real estate loans	118,400	1,200	182,917	12,410
Sales of residential mortgage loans	376,952	359,903	712,462	732,211
Sales of commercial real estate loans	0	22,577	2,993	29,503
Principal balances of residential loans serviced for others	538,116	636,598	538,116	636,598
Principal balances of commercial real estate loans serviced for others	1,763,479	1,796,859	1,763,479	1,796,859

**Table of Contents**

**Non-Interest Expenses.** Non-interest expenses were as follows for the periods presented:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(Dollars in thousands)			
Employee compensation and benefits	\$ 41,133	\$ 39,163	\$ 82,023	\$ 77,234
Occupancy and equipment	10,693	11,681	22,225	22,148
Data processing	5,168	4,176	10,487	8,373
Depreciation	3,507	3,341	7,071	6,536
Advertising	3,019	3,279	5,817	5,956
Insurance	1,926	513	3,638	908
Travel and entertainment	1,781	2,133	3,446	3,641
Amortization of core deposit intangibles	1,226	1,226	2,452	2,267
Legal and accounting	723	547	1,536	1,223
Goodwill litigation costs	105	1,132	255	1,312
Merger and acquisition costs	157	413	182	844
Other	3,009	2,287	5,422	5,118
Total	\$ 72,447	\$ 69,891	\$ 144,554	\$ 135,560

The increase in non-interest expenses during 2008 compared with 2007 primarily reflects overall company growth.

**Income Tax Provision.** Sterling recorded federal and state income tax provisions of \$4.5 million and \$13.0 million for the three months ended June 30, 2008 and 2007, respectively, and \$5.6 million and \$24.2 million for the six months ended June 30, 2008 and 2007, respectively. The effective tax rate for the three months comparative period was 27.9% and 32.5%, respectively, and 27.9% and 32.7%, respectively, for the six month comparative period. The decrease in the effective tax rate primarily reflects the proportional increase in tax exempt income and tax credits as a percent of taxable income.

**Table of Contents****Financial Position**

**Assets.** At June 30, 2008, Sterling's assets were \$12.70 billion, up \$549.9 million from \$12.15 billion at December 31, 2007. This growth was mainly a result of increases in the loan portfolio through originations and increases in the investment and MBS portfolio through purchases.

**Investment Securities and MBS.** Sterling's investment and MBS portfolio at June 30, 2008 was \$2.20 billion, an increase of \$217.4 million from the December 31, 2007 balance of \$1.99 billion. The increase was due to purchases exceeding principal repayments and maturities. On June 30, 2008, the investment and MBS portfolio had an unrealized loss of \$51.1 million versus an unrealized loss of \$28.4 million at December 31, 2007, with the decline in market value due to fluctuations in interest rates and the yield curve.

**Loans Receivable.** At June 30, 2008, net loans receivable were \$9.22 billion, up \$271.6 million from \$8.95 billion at December 31, 2007. The increase was due to loan originations during the period.

The following table sets forth the composition of Sterling's loan portfolio as of the dates indicated. Loan balances exclude deferred loan origination costs and fees, and allowances for loan losses:

	June 30, 2008		December 31, 2007	
	Amount	%	Amount	%
	(Dollars in thousands)			
Residential real estate	\$ 798,408	8.5	\$ 703,826	7.8
Multifamily real estate	445,298	4.7	389,388	4.3
Commercial real estate	1,321,895	14.1	1,223,036	13.5
Construction	2,911,847	31.0	2,944,911	32.4
Consumer direct	842,713	9.0	798,519	8.8
Consumer indirect	398,219	4.2	376,937	4.1
Commercial banking	2,677,479	28.5	2,639,196	29.1
Gross loans receivable	9,395,859	100.0	9,075,813	100.0
Net deferred origination fees	(13,572)		(16,480)	
Allowance for losses on loans	(162,368)		(111,026)	
Loans receivable, net	\$ 9,219,919		\$ 8,948,307	

The following table sets forth Sterling's loan originations for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(Dollars in thousands)			
Residential real estate	\$ 376,122	\$ 454,921	\$ 787,238	\$ 799,539
Multifamily real estate	70,516	4,650	111,902	4,650
Commercial real estate	118,400	1,200	182,917	12,410
Construction	158,164	735,552	422,445	1,270,372
Consumer direct	124,032	113,321	205,635	176,889
Consumer indirect	43,742	57,013	115,423	121,925
Commercial banking	169,836	339,077	318,521	598,279
Total loans originated	\$ 1,060,812	\$ 1,705,734	\$ 2,144,081	\$ 2,984,064

**Table of Contents**

Sterling's bankers are focused on maintaining and developing high-quality commercial and consumer customer relationships to build a more diverse loan portfolio that mitigates the reduction in originations and runoff of residential construction loans.

**Deposits.** The following table sets forth the composition of Sterling's deposits at the dates indicated:

	June 30, 2008		December 31, 2007	
	Amount	%	Amount	%
	(Dollars in thousands)			
Interest-bearing checking	\$ 444,888	5.6	\$ 469,428	6.1
Noninterest-bearing checking	896,671	11.2	898,606	11.7
Savings and money market demand accounts	2,178,826	27.3	2,156,808	28.1
Time deposits	4,467,446	55.9	4,152,930	54.1
Total deposits	\$ 7,987,831	100.0	\$ 7,677,772	100.0

Deposit growth was primarily in time deposits, and savings and money market demand accounts, reflecting the shifting of funds by Sterling's customers from floating rate to fixed rate depository accounts, and the development of new customer relationships.

**Borrowings.** Deposit accounts are Sterling's primary source of funds. Sterling does, however, rely upon advances from the Federal Home Loan Bank ( FHLB ), reverse repurchase agreements and other borrowings to fund asset growth and meet deposit withdrawal requirements. During the six months ended June 30, 2008, these funding sources increased a total of \$236.0 million, with advances from the FHLB representing 82% of the increase, with the remaining increase in borrowings coming from reverse repurchase agreements and federal funds purchased.

**Asset and Liability Management**

The results of operations for financial institutions may be materially and adversely affected by changes in prevailing economic conditions, including rapid changes in interest rates, declines in real estate market values and the monetary and fiscal policies of the federal government. The mismatch between maturities, interest rate sensitivities and prepayment characteristics of assets and liabilities, and the changes in each of these attributes under different interest rate scenarios results in interest-rate risk.

Sterling, like most financial institutions, has material interest-rate risk exposure to changes in both short-term and long-term interest rates as well as variable interest rate indices. Sterling's results of operations are largely dependent upon its net interest income and its ability to manage its interest rate risk.

Sterling's Asset/Liability Committee ( ALCO ) manages Sterling's interest-rate risk based on interest rate expectations and other factors within policies and practices approved by the Board of Directors. The principal objective of Sterling's asset and liability management activities is to provide maximum levels of net interest income while maintaining acceptable levels of interest-rate risk and liquidity risk while facilitating Sterling's funding needs. ALCO manages this process at both the subsidiary and consolidated levels. ALCO measures interest rate risk exposure through three primary measurements: management of the relationship between its interest bearing assets and its interest bearing liabilities, interest rate shock simulations of net interest income, and economic value of equity ( EVE ) simulation. The difference between a financial institution's interest rate sensitive assets (i.e., assets that will mature or reprice within a specific time period) and interest rate sensitive liabilities (i.e. liabilities that will mature or reprice within the specific time period) is commonly referred to as its interest rate sensitivity gap. An institution having more interest rate sensitive assets than interest rate sensitive liabilities within a given time period is said to be asset sensitive, which generally means that if interest rates increase (other things being equal), a company's net interest income will increase and if interest rates decrease (other things being equal), its net interest income will decrease. The opposite is true for an institution that is liability sensitive. Sterling was asset sensitive during the second

**Table of Contents**

quarter of 2008, with a higher level of interest earning assets that were subject to re-pricing faster in the short term than deposits and borrowings.

ALCO uses interest rate shock simulations of net interest income to measure the effect of changes in interest rates on the net interest income for Sterling over a 12 month period. This simulation consists of measuring the change in net interest income over the next 12 months from a base case scenario when rates are shocked, in a parallel fashion, up 100 and 200 basis points and down 100 basis points. The base case uses the assumption of the existing balance sheet and existing interest rates to simulate the base line of net interest income over the next 12 months for the simulation. The simulation requires numerous assumptions, including relative levels of market interest rates, instantaneous and parallel shifts in the yield curve, loan prepayments and reactions of depositors to changes in interest rates, and should not be relied upon as being indicative of actual or future results. Further, the analysis does not contemplate actions Sterling may undertake in response to changes in interest rates and market conditions. The results of this simulation as of June 30, 2008 and December 31, 2007 are included in the following table:

	Change in Interest Rate in Basis Points (Rate Shock)	June 30, 2008 % Change In Net Interest Income	December 31, 2007 % Change in Net Interest Income
+200		1.2	(0.1)
+100		0.7	0.1
Static		0.0	0.0
-100		(0.9)	(1.5)

ALCO uses EVE simulation analysis to measure risk in the balance sheet that might not be taken into account in the net interest income simulation analysis. Whereas net interest income simulation highlights exposure over a relatively short time period of 12 months, EVE simulation analysis incorporates all cash flows over the estimated remaining life of all balance sheet positions. The EVE simulation analysis of the balance sheet, at a point in time, is defined as the discounted present value of asset cash flows minus the discounted value of liability cash flows. The discount rates that are used represent an assumption for the current market rates of each group of assets and liabilities. The difference between the present value of the asset and liability represents the EVE. As with net interest income, this is used as the base line to measure the change in EVE when interest rates are shocked, in a parallel fashion, up 100 and 200 basis points and down 100 basis points. As with the net interest income simulation model, EVE simulation analysis is based on key assumptions about the timing and variability of balance sheet cash flows. However, because the simulation represents much longer time periods, inaccuracy of assumptions may increase the variability of outcomes within the simulation. It also does not take into account actions management may undertake in response to anticipated changes in interest rates. The results of this simulation at June 30, 2008 and December 31, 2007 are included in the following table:

	Change in Interest Rate in Basis Points (Rate Shock)	At June 30, 2008 % Change in EVE	At December 31, 2007 % Change in EVE
+200		(5.3)	(4.9)
+100		0.4	(1.6)
Static		0.0	0.0
-100		(6.0)	(4.3)

**Table of Contents**

Sterling occasionally enters into customer-related financial derivative transactions primarily consisting of interest rate swaps. Risk exposure from customer positions is managed through transactions with other broker dealers. As of June 30, 2008, Sterling has not entered into asset/liability related derivative transactions as part of managing its interest rate risk. However, Sterling continues to consider derivatives, including interest rate swaps, caps and floors, as a viable alternative in the asset and liability management process.

**Liquidity and Capital Resources**

Sterling's primary sources of funds are borrowings in the form of customer deposits and wholesale funds from commercial banks, the FHLB, and the Federal Reserve Bank (FRB), the collection of principal and interest primarily from loans, as well as from mortgage backed securities, and the sale of loans into the secondary market primarily as a function of Sterling's mortgage banking activities.

Sterling Savings Bank and Golf Savings Bank actively manage their liquidity in an effort to maintain an adequate margin over the level necessary to support expected and potential loan fundings and deposit withdrawals. This is balanced with the need to maximize yield on alternative investments. The liquidity ratio may vary from time to time, depending on economic conditions, deposit fluctuations and loan funding needs.

Sterling uses wholesale funds to supplement deposit gathering for funding the origination of loans or purchasing assets such as MBS and investment securities. These borrowings include advances from the FHLB, reverse repurchase agreements, primary credits and term auction facilities from the FRB, and federal funds purchased. Sterling Savings Bank and Golf Savings Bank have credit lines with FHLB of Seattle that provide for borrowings up to a percentage of each of their total assets, subject to collateralization requirements. At June 30, 2008, these credit lines represented a total borrowing capacity of \$2.62 billion, of which \$879.4 million was available. At June 30, 2008, Sterling had \$1.16 billion in outstanding borrowings under reverse repurchase agreements and had securities available for additional secured borrowings of approximately \$372.6 million. The structure of reverse repurchase agreements is to sell investments (generally U.S. agency securities and MBS) under an agreement to buy them back at a specified price at a later date. These agreements to repurchase are deemed to be borrowings collateralized by the investments and MBS sold. The use of reverse repurchase agreements may expose Sterling to certain risks not associated with other borrowings, including interest rate risk and the possibility that additional collateral may have to be provided if the market value of the pledged collateral declines. At June 30, 2008, Sterling also had \$87.2 million of federal funds purchased, which are short term borrowings from correspondent banks and the Federal Reserve. As of June 30, 2008, Sterling had access to over \$2.3 billion of additional liquidity through commercial banks, the Federal Reserve and available securities. During the first quarter of 2008, in an effort to increase liquidity in the banking system, the Federal Reserve lowered the rate of borrowings from its discount window to 25 basis points above the federal funds target rate, lengthened the term of these borrowings, and broadened the range of collateral that it was willing to accept. Sterling has utilized this source of funds to the extent that these funds are more competitive than other sources. Sterling, on a parent company-only basis, had cash of approximately \$9.4 million and \$33.7 million at June 30, 2008 and December 31, 2007, respectively, with additional funds available on a line of credit from Wells Fargo Bank, N.A. As of June 30, 2008, no amount was drawn on this line. In April 2008, this line of credit was renewed for one year in the amount of \$10.0 million. At both June 30, 2008 and December 31, 2007, Sterling had an investment of \$175.1 million in the preferred stock of Sterling Savings Bank. At June 30, 2008 and December 31, 2007, Sterling had an investment in the common stock of Sterling Savings Bank of \$865.8 million, and in Golf Savings Bank of \$35.7 million and \$31.7 million, respectively. Sterling received cash dividends from Sterling Savings Bank of \$19.0 million and \$13.0 million during the six months ended June 30, 2008 and 2007, respectively. These resources contributed to Sterling's ability to meet its operating needs, including interest expense on its long-term debt and the payment of dividends. Sterling Savings Bank's ability to pay dividends is limited by its earnings, financial condition, capital requirements, and capital distribution regulations.

**Table of Contents**

**Off-Balance Sheet Arrangements and Aggregate Contractual Obligations**

Sterling, in the conduct of ordinary business operations routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for the early termination of the contracts. Sterling is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Management does not believe that these off-balance sheet arrangements have a material current effect on Sterling's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources but there is no assurance that such arrangements will not have a future effect.

As of both June 30, 2008 and December 31, 2007, the reserve for unfunded commitments was \$6.3 million. The adequacy of the reserve for unfunded commitments is evaluated on a quarterly basis.

As part of its mortgage banking activities, Sterling issues interest rate lock commitments to prospective borrowers on residential mortgage loan applications. Pricing for the sale of these loans is fixed with various qualified investors under both non-binding ( best-efforts ) and binding ( mandatory ) delivery programs. For mandatory delivery programs, Sterling hedges interest rate risk by entering into offsetting forward sale agreements on MBS with third parties. Risks inherent in mandatory delivery programs include the risk that if Sterling does not close the loans subject to interest rate lock commitments, it is nevertheless obligated to deliver MBS to the counterparty under the forward sale agreement. Sterling could incur significant costs in acquiring replacement loans or MBS and such costs could have a material adverse effect on mortgage banking operations in future periods.

Interest rate lock commitments and loan delivery commitments to investors are off balance sheet commitments that are considered to be derivatives. As of June 30, 2008, Sterling had mandatory delivery commitments to sell mortgage loans to investors valued at \$35.1 million, and held offsetting forward sale agreements on MBS valued at \$28.4 million. As of December 31, 2007, Sterling did not have any loans subject to interest rate lock commitments under mandatory delivery programs. As of June 30, 2008 and December 31, 2007, Sterling had entered into best efforts forward commitments to sell \$113.6 million and \$41.3 million of mortgage loans, respectively.

Sterling enters into interest rate swap derivative contracts with customers. The interest rate risk on these contracts is offset by entering into comparable broker dealer swaps. These contracts are carried as an offsetting asset and liability at fair value, and as of June 30, 2008 and December 31, 2007, were \$2.3 million and \$1.6 million, respectively.

**Table of Contents****Capital**

Sterling's total shareholders' equity decreased \$7.1 million during the six months ended June 30, 2008 from \$1.19 billion at December 31, 2007, as the increase in the holding loss on the mortgage backed securities portfolio outpaced additions to equity from earnings retention and the administration of certain employee benefits.

At June 30, 2008 and December 31, 2007, Sterling had an unrealized loss of \$51.1 million and \$28.4 million, respectively, on investment securities and MBS classified as available for sale. Fluctuations in prevailing interest rates continue to cause volatility in this component of accumulated comprehensive income or loss in shareholders' equity and may continue to do so in future periods. Shareholders' equity was 9.3% of total assets at June 30, 2008 compared with 9.8% at December 31, 2007.

Sterling has outstanding various series of capital securities ( Trust Preferred Securities ) issued to investors. The Trust Preferred Securities are treated as debt of Sterling, and can qualify as Tier 1 capital, subject to certain limitations. Sterling, Sterling Savings Bank and Golf Savings Bank are required by applicable regulations to maintain certain minimum capital levels. Sterling's management intends to enhance the capital resources and regulatory capital ratios of Sterling and its banking subsidiaries through the retention of an adequate amount of earnings and the management of the level and mix of assets, although there can be no assurance in this regard. At June 30, 2008, each of the companies exceeded all such regulatory capital requirements and were well capitalized pursuant to such regulations. The following table sets forth their respective capital positions at June 30, 2008:

	Minimum Capital Requirements		Well-Capitalized Requirements		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
			(Dollars in thousands)			
Tier 1 leverage (to average assets)						
Sterling	\$489,342	4.0%	\$ 611,677	5.0%	\$ 978,022	8.0%
Sterling Savings Bank	470,237	4.0%	587,797	5.0%	938,653	8.0%
Golf Savings Bank	18,729	4.0%	23,411	5.0%	33,364	7.1%
Tier 1 (to risk-weighted assets)						
Sterling	408,942	4.0%	613,414	6.0%	978,022	9.6%
Sterling Savings Bank	397,802	4.0%	596,702	6.0%	938,653	9.4%
Golf Savings Bank	12,045	4.0%	18,068	6.0%	33,364	11.1%
Total (to risk-weighted assets)						
Sterling	817,885	8.0%	1,022,356	10.0%	1,109,321	10.9%
Sterling Savings Bank	795,603	8.0%	994,504	10.0%	1,066,471	10.7%
Golf Savings Bank	24,090	8.0%	30,113	10.0%	36,813	12.2%

Sterling believes its current capital position is sufficient to meet its corporate needs at this time. Sterling may supplement its capital position from time to time as it deems appropriate, and continues to monitor the availability of capital in the capital markets. Sterling generally prefers to maintain its capital position with capital qualifying debt securities rather than equity securities. There can be no assurance, however, that capital will be available to Sterling in the capital markets or, if available, that such capital would be available on terms acceptable to Sterling.

**Goodwill Litigation**

The damages aspect of Sterling's lawsuit against the U.S. Government for breach of contract with respect to the loss of goodwill treatment and other matters relating to Sterling's past acquisitions of troubled thrift institutions (the Goodwill Litigation) was tried to a judge of the U.S. Court of Federal Claims (the Court) from June 25 to July 13, 2007. On February 19, 2008, the Court issued its decision awarding damages to Sterling in the amount of \$1.05 million.

Although the decision made an affirmative award of money damages in Sterling's favor, the amount of the award was lower than the amount of damages Sterling believes it actually suffered as a result of the breach.

## **Table of Contents**

In April 2008, the U.S. Government appealed the Court's ruling. Sterling has filed a notice of cross appeal. The U.S. Government and Sterling have jointly requested that the court assign a mediator to resolve the dispute.

### **New Accounting Pronouncements**

In September 2006, the Emerging Issues Task Force ( EITF ) reached a consensus on Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. Under the provisions of EITF Issue No. 06-4, Sterling recognizes the amount that is owed current or former employees under split dollar BOLI. Sterling adopted the EITF 06-4 effective January 1, 2008, which resulted in a cumulative charge of \$2.1 million to retained earnings.

In September 2006, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards ( FAS ) No. 157, Fair Value Measurements ( FAS 157 ). FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. In February 2007, FASB issued FAS 159, The Fair Value Option for Financial Assets and Financial Liabilities ( FAS 159 ). FAS 159 provides a fair value measurement election for many financial instruments, on an instrument by instrument basis. Both FAS 157 and 159 became effective for Sterling as of January 1, 2008. See Note 9 for a discussion of their impact. Sterling applied FAS 159 to its loans held for sale in order to match changes in the value of the loans with the value of their economic hedges without having to apply complex hedge accounting.

In November 2007, the SEC issued Staff Accounting Bulletin 109, Written Loan Commitments Recorded at Fair Value Through Earnings, ( SAB 109 ) regarding the valuation of loan commitments. SAB 109 supersedes SAB 105, and states that in measuring the fair value of a derivative loan commitment, the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SAB 109 was effective for Sterling as of January 1, 2008.

In March 2008, the FASB issued FAS 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FAS 133. FAS 161 requires enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under FAS 133 and related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. FAS 161 is effective for Sterling as of December 31, 2008. Sterling is currently evaluating the impact of FAS 161.

### **Regulation and Compliance**

Sterling is subject to many laws and regulations applicable to banking activities. As a bank holding company, Sterling is subject to comprehensive examination and regulation by the Federal Reserve. Sterling Savings Bank, as a Washington State-chartered bank, and Golf Savings Bank, as a Washington State-chartered savings bank, are subject to comprehensive regulation and examination by the Washington Supervisor and the FDIC. Sterling Savings Bank and Golf Savings Bank are further subject to Federal Reserve regulations related to deposit reserves and certain other matters.

### **Forward-Looking Statements**

From time to time, Sterling and its senior managers have made and will make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may be contained in this report and in other documents that Sterling files with the Securities and Exchange Commission. Such statements may also be made by Sterling and its senior managers in oral or written presentations to analysts, investors, the media and others. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. Also, forward-looking statements can generally be identified by words such as may, could, should, would, believe, anticipate, estimate, seek, expect, intend, plan and similar expressions.

Forward-looking statements provide management's expectations or predictions of future conditions, events or results. They are not guarantees of future performance. By their nature, forward-looking statements are subject to

**Table of Contents**

risks and uncertainties. These statements speak only as of the date they are made. Sterling does not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements were made. There are a number of factors, many of which are beyond Sterling's control that could cause actual conditions, events or results to differ significantly from those described in the forward-looking statements. These factors, some of which are discussed elsewhere in this report, include:

inflation, interest rate levels and market and monetary fluctuations;

trade, monetary and fiscal policies and laws, including interest rate policies of the federal government;

applicable laws and regulations and legislative or regulatory changes;

the timely development and acceptance of new products and services of Sterling;

the willingness of customers to substitute competitors' products and services for Sterling's products and services;

Sterling's success in gaining regulatory approvals, when required;

technological and management changes;

growth and acquisition strategies;

Sterling's critical accounting policies and the implementation of such policies;

lower-than-expected revenue or cost savings or other issues in connection with mergers and acquisitions;

changes in consumer spending and saving habits;

the strength of the United States economy in general and the strength of the local economies in which Sterling conducts its operations; and

Sterling's success at managing the risks involved in the foregoing.

**Item 3 Quantitative and Qualitative Disclosures About Market Risk**

For a discussion of Sterling's market risks, see Management's Discussion and Analysis - Asset and Liability Management.

**Item 4 Controls and Procedures**

**Disclosure Controls and Procedures**

Sterling's management, with the participation of Sterling's principal executive officer and principal financial officer, has evaluated the effectiveness of Sterling's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, Sterling's principal executive officer and principal financial officer have concluded that, as of the end of such period, Sterling's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by Sterling in the reports that it files or submits under the Exchange Act.

**Table of Contents**

**Changes in Internal Control Over Financial Reporting**

There were no changes in Sterling's internal control over financial reporting that occurred during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, Sterling's internal control over financial reporting.

**PART II Other Information**

**Item 1 Legal Proceedings**

There are no material pending legal proceedings to which Sterling is a party, or to which any of its property is subject, other than ordinary routine litigation incidental to the business of banking. No material loss is expected from any of such pending claims or lawsuits.

**Item 1a Risk Factors**

You should carefully consider the risks and uncertainties we describe both in this Report and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2007, before deciding to invest in, or retain, shares of our common stock. These are not the only risks and uncertainties that we face. Additional risks and uncertainties that we do not currently know about or that we currently believe are immaterial, or that we have not predicted, may also harm our business operations or adversely affect us. If any of these risks or uncertainties actually occurs, our business, financial condition, operating results or liquidity could be materially harmed.

**Item 4 Submission of Matters to a Vote of Security Holders**

Sterling's Annual Meeting of Shareholders (the Meeting) was held on April 22, 2008. The following matters were submitted to a vote of the security holders of Sterling at the Meeting:

(1) Election of two Directors to serve for terms expiring in the year 2011:

Donald N. Bauhofer	Votes for:	44,747,531	Withheld:	1,431,658
Harold B. Gilkey	Votes for:	43,374,910	Withheld:	2,804,279

Election of two Directors to serve for the term expiring in the year 2009:

Katherine K. Anderson	Votes for:	44,756,599	Withheld:	1,422,591
Ellen R.M. Boyer	Votes	44,767,923	Withheld:	1,411,267

for:

The following are the names of the other Directors whose terms continued after the meeting:

William L. Eisenhart	Robert D. Larrabee	Michael F. Reuling
James P. Fugate	Donald J. Lukes	William W. Zuppe
James. B. Keegan, Jr.		

(2) Amendment to Sterling's Articles of Incorporation to eliminate staggered terms for Directors and require the annual election of all Directors

Votes for:	44,477,664	Against:	1,636,594	Abstentions:	64,929
------------	------------	----------	-----------	--------------	--------

(3) Ratification of the appointment of BDO Seidman, LLP as the independent registered public accounting firm for the year ending December 31, 2008 and any interim periods. The proposal received the following votes:

Votes for:	45,721,950	Against:	379,287	Abstentions:	77,952
