(1) The number of shares of common stock offered hereby includes shares of common stock into which the notes are convertible. The number of shares of common stock offered hereby is based on a conversion rate of 15.7904 (as adjusted for the stock split described below) shares of common stock per \$1,000 principal amount of maturity of the notes. Information concerning other Selling Securityholders will be set forth in prospectus supplements from time to time, if required. The number of shares of common stock owned by the other Selling Securityholders or any future transferee from any such holder assumes that they do not beneficially own any common stock other than common stock into which the notes are convertible at a conversion rate of 15.7904 shares of common stock per \$1,000 principal amount of maturity of the notes.
