NEWS RELEASE

For Immediate Release

Xyratex Ltd Appoints Todd Gresham EVP of Storage and Network Systems

Havant, UK March 27, 2006 Xyratex Ltd (Nasdaq: XRTX), a leading provider of modular enterprise class data storage subsystems and storage process technology, today announced the appointment of Todd Gresham to the position of Executive Vice President, Storage and Network Systems Business. In his new role, Todd will be responsible for all World Wide functions for the Storage and Network Systems Business division including Product Development, Sales, Marketing, Operations and the Office of Technology.

Gresham joined Xyratex in September 2005 through the acquisition of nStor Technologies where he served as Chief Executive Officer and President. Prior to his appointment as EVP, Gresham served as Senior Vice President responsible for all Sales, Marketing, and Support in the Storage and Network Systems Business. Gresham, with over 25 years of executive management experience in the storage industry, has established himself as a results oriented individual and has a proven track record in leading innovative technology companies.

Todd is an exceptionally strong leader and will be instrumental in accelerating the company's growth. His extensive background and knowledge of the Storage industry, coupled with his relationships with existing and new customer prospects for Xyratex, will serve our business and operational strategic plan very well, said Steve Barber, Chief Executive Officer, Xyratex. I am excited to have an executive of Todd's caliber lead our storage system business.

About Todd Gresham

Prior to Xyratex, Todd served as Chief Executive Officer and President of nStor Technologies where he was successful in demonstrating revenue growth quarter on quarter from the time he joined nStor in April, 2004 until it was acquired by Xyratex in September of 2005. Prior to nStor, Todd guided over 100 firms, including several Fortune 500 companies, via Meritage Associates, which he founded. Mr. Gresham also served as Vice President of Global OEM and Reseller Sales at EMC, and General Manager of Asia/Pacific Operations, as well as Vice President of Worldwide Sales at CLARiiON. Prior to CLARiiON, Mr. Gresham held various executive positions with both Philips Laser Magnetics (LMSI), a division of Philips NV, and StorageTek.

About Xyratex

Xyratex is a leading provider of modular enterprise class data storage subsystems and storage process technology. The company designs and manufactures enabling technology that provides OEM and disk drive manufacturer customers with data storage products to

support high-performance storage and data communication networks. Xyratex has over 20 years of experience in research and development relating to disk drives, storage systems and high-speed communication protocols.

Founded in 1994 in a management buy-out from IBM, and with its headquarters in the UK, Xyratex has an established global base with R&D and operational facilities in Europe, the United States and South East Asia. For more information, visit www.xyratex.com.

**FIRST FINANCIAL BANCORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2008
(Unaudited)**

The consolidated financial statements for interim periods are unaudited; however, in the opinion of the management of First Financial Bancorp. (First Financial), all material adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation have been included.

NOTE 1: BASIS OF PRESENTATION

The consolidated financial statements of First Financial, a bank holding company, include the accounts of First Financial and its wholly-owned subsidiaries First Financial Bank, N.A. and First Financial Capital Advisors LLC, a registered investment advisor. All intercompany transactions and accounts have been eliminated in consolidation. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual realized amounts could differ materially from those estimates. These interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and serve to update the First Financial Bancorp. Annual Report on Form 10-K (Form 10-K) for the year ended December 31, 2007. These financial statements may not include all information and notes necessary to constitute a complete set of financial statements under U.S. generally accepted accounting principles applicable to annual periods and accordingly should be read in conjunction with the financial information contained in the Form 10-K. Management believes these unaudited consolidated financial statements reflect all adjustments of a normal recurring nature which are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year or any other interim period. The Consolidated Balance Sheet as of December 31, 2007, has been derived from the audited financial statements in the company's 2007 Form 10-K.

NOTE 2: RECENTLY ADOPTED AND ISSUED ACCOUNTING STANDARDS

Effective January 1, 2008, First Financial adopted FASB Statement No. 157 (SFAS No. 157), Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles, and expands disclosures about fair value measurements. Fair value is defined under SFAS No. 157, from the point of view of the transferor, as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability at the measurement date. For further detail on SFAS No. 157, see Note 10 Fair Value Disclosures.

Effective January 1, 2008, First Financial adopted FASB Statement No. 159 (SFAS No. 159), The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. This statement permits the measurement of many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument, irrevocable basis. First Financial applied the fair value option to its equity securities of government sponsored entities, specifically Federal Home Loan Mortgage Corporation perpetual preferred series V shares, and these securities are classified as trading investment securities at March 31, 2008, in the Consolidated Balance Sheets. In connection with First Financial's adoption of SFAS No. 159 effective January 1, 2008, a \$0.8 million unrealized loss, net of related deferred taxes, was reclassified from accumulated other comprehensive income (loss) to beginning retained earnings as part of a cumulative-effect adjustment. There was no impact on total shareholders' equity upon adoption. For further detail on SFAS No. 159, see Note 10 Fair Value Disclosures.

Table of Contents

Effective January 1, 2008, First Financial adopted EITF Issue No 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Split-Dollar Life Insurance Arrangements. EITF Issue No. 06-4 applies to split-dollar life insurance arrangements whose benefits continue into the employees' retirement. First Financial recorded the \$2.5 million transition impact of this EITF as a reduction of opening retained earnings as part of a cumulative-effect adjustment and an increase in accrued interest and other liabilities in the Consolidated Balance Sheets, reflective of the ongoing cost of insurance for the pool of retirees.

Effective January 1, 2008, First Financial adopted EITF Issue No. 06-11, Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards. EITF Issue No. 06-11 requires companies to recognize in shareholders' equity the tax benefit of dividends paid on unvested share-based payments, consistent with First Financial's historical accounting. When the related award is forfeited or is no longer expected to vest (i.e. due to a performance condition not anticipated to be met), Issue No. 06-11 requires companies to record the dividend payment as salary and benefits expense and the related tax impact as a tax benefit in the income statement. The adoption of EITF Issue No. 06-11 did not have a material impact on First Financial.

Effective January 1, 2008, First Financial adopted FSP 39-1, Amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts. FSP 39-1 permits entities to offset fair value amounts recognized for multiple derivative instruments executed with the same counterparty under a master netting agreement. FSP 39-1 clarifies that the fair value amounts recognized for the right to reclaim cash collateral, or the obligation to return cash collateral, arising from the same master netting arrangement, should also be offset against the fair value of the related derivative instruments. First Financial adopted a net presentation for derivative positions and related collateral entered into under master netting agreements pursuant to the guidance in FSP 39-1. The adoption of FSP 39-1 resulted in balance sheet reclassifications of certain cash collateral-based short-term investments against the related derivative liabilities. The effects of these reclassifications will fluctuate in the future based on the fair values of the derivative contracts, but overall are not expected to have a material impact on either total assets or total liabilities.

In December of 2007, the FASB issued SFAS No. 141(R), Business Combinations. This statement will significantly change how business acquisitions are accounted for, continuing the transition to fair value measurement, and will impact financial statements both on the acquisition date and in subsequent periods. This statement requires the acquirer to recognize assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree at their respective fair values as of the acquisition date. SFAS No. 141(R) changes the treatment of acquisition-related costs, restructuring costs related to an acquisition that the acquirer expects but is not obligated to incur, contingent consideration associated with the purchase price, and preacquisition contingencies associated with acquired assets and liabilities. In addition, SFAS No. 141(R) requires enhanced disclosures to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS No. 141(R) is effective for years beginning after December 15, 2008, and is required to be applied prospectively to future business combinations. Early adoption is not permitted.

In December of 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Financial Statements. This statement will change the accounting and reporting for minority interests, which will be recharacterized as noncontrolling interests and classified as a component of shareholders' equity. SFAS No. 160 is effective for years beginning after December 15, 2008, and requires retroactive adoption of the presentation and disclosure requirements for existing consolidated minority interests. All other requirements of SFAS No. 160 are required to be applied prospectively, with early adoption not permitted. First Financial has no existing consolidated minority interests and management does not anticipate this will occur in the future; therefore, SFAS No. 160 is not anticipated to have an impact on First Financial.

Table of Contents

In March of 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. The new standard is intended to help investors better understand how derivative instruments and hedging activities impact an entity's financial condition, financial performance, and cash flows through enhanced disclosure requirements. SFAS No. 161 is effective for financial statements issued for years and interim periods beginning after November 15, 2008, with early application encouraged. First Financial is currently evaluating the enhanced disclosure requirements and their impact on the Consolidated Financial Statements.

NOTE 3: FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

In the normal course of business, First Financial offers a variety of financial instruments with off-balance-sheet risk to its clients to aid them in meeting their requirements for liquidity and credit enhancement. These financial instruments include standby letters of credit and commitments outstanding to extend credit. U.S. generally accepted accounting principles do not require these financial instruments to be recorded in the Consolidated Balance Sheets, Consolidated Statements of Earnings, Consolidated Statements of Changes in Shareholders' Equity, and Consolidated Statements of Cash Flows. Following is a discussion of these transactions.

First Financial's exposure to credit loss from commitments outstanding to extend credit, and in the event of nonperformance by the other party to the financial instrument for standby letters of credit, is represented by the contractual amounts of those instruments. First Financial uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Loan commitments Commitments to extend credit are agreements to lend to a client as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. First Financial evaluates each client's creditworthiness on an individual basis. The amount of collateral obtained, if deemed necessary by First Financial upon extension of credit, is based on management's credit evaluation of the counterparty. The collateral held varies, but may include securities, real estate, inventory, plant, or equipment. First Financial had commitments outstanding to extend credit totaling \$742,285 and \$728,472 at March 31, 2008, and December 31, 2007, respectively. Management does not anticipate any material losses as a result of these commitments.

Standby letters of credit These transactions are conditional commitments issued by First Financial to guarantee the performance of a client to a third party. First Financial's portfolio of standby letters of credit consists primarily of performance assurances made on behalf of clients who have a contractual commitment to produce or deliver goods or services. The risk to First Financial arises from its obligation to make payment in the event of the client's contractual default to produce the contracted good or service to a third party. First Financial has issued standby letters of credit aggregating \$22,514 and \$25,227 at March 31, 2008, and December 31, 2007, respectively.

Management conducts regular reviews of these instruments on an individual client basis. Management does not anticipate any material losses as a result of these letters of credit.

Table of Contents**NOTE 4: INVESTMENTS**

The following is a summary of held-to-maturity and available-for-sale investment securities as of March 31, 2008 (dollars in \$000 s):

	Held-to-Maturity				Available-for-Sale			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Market Value	Amortized Cost	Unrealized Gains	Unrealized Losses	Market Value
Securities of U.S. government agencies and corporations	\$ 0	\$ 0	\$ 0	\$ 0	\$ 85,126	\$ 2,310	\$ 0	\$ 87,436
Mortgage-backed securities	241	1	(1)	241	196,799	2,636	(229)	199,206
Obligations of state and other political subdivisions	5,173	254	(2)	5,425	52,767	954	(35)	53,686
Other securities	0	0	0	0	4,826	180	(189)	4,817
Total	\$5,414	\$255	\$ (3)	\$5,666	\$339,518	\$6,080	\$ (453)	\$345,145

The following is a summary of held-to-maturity and available-for-sale investment securities as of December 31, 2007 (dollars in \$000 s):

	Held-to-Maturity				Available-for-Sale			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Market Value	Amortized Cost	Unrealized Gains	Unrealized Losses	Market Value
Securities of U.S. government agencies and corporations	\$ 0	\$ 0	\$ 0	\$ 0	\$ 85,124	\$ 705	\$ (39)	\$ 85,790
Mortgage-backed securities	274	2	(1)	275	151,753	1,219	(1,198)	151,774
Obligations of state and other political subdivisions	5,365	183	(9)	5,539	59,475	925	(39)	60,361
Other securities	0	0	0	0	10,060	222	(1,279)	9,003
Total	\$5,639	\$185	\$ (10)	\$5,814	\$306,412	\$3,071	\$ (2,555)	\$306,928

Unrealized losses on debt securities are generally due to higher current market yields relative to the yields of the debt securities at their amortized cost. Unrealized losses due to credit risk of the underlying collateral of the debt security, if any, are not material. First Financial has the intent and ability to hold all debt security issues temporarily impaired until maturity or recovery of book value. All securities with unrealized losses are reviewed quarterly to determine if any impairment is other than temporary, requiring a write-down to fair market value.

First Financial had trading securities with a fair value of \$3.8 million at March 31, 2008, and \$0 at December 31, 2007, and March 31, 2007. For further detail on the fair value of investment securities, see Note 10 Fair Value Disclosures.

NOTE 5: DERIVATIVES

The use of derivative instruments allows First Financial to meet the needs of its clients while managing the interest-rate risk associated with certain transactions. First Financial's board of directors has authorized the use of certain derivative products, including interest rate caps, floors, and swaps. Currently, First Financial utilizes interest rate swaps as a means to offer commercial borrowers products that meet their needs, but are also designed to achieve First Financial's desired interest rate risk profile at the time.

Table of Contents

The net interest receivable or payable on the interest rate swaps is accrued and recognized as an adjustment to the interest income or interest expense of the hedged item. The fair value of the interest rate swaps is included within accrued interest and other assets on the Consolidated Balance Sheets. The corresponding fair-value adjustment is also included on the Consolidated Balance Sheets in the carrying value of the hedged item. Derivative gains and losses not considered effective in hedging the change in fair value of the hedged item are recognized immediately in income. The following table summarizes the derivative financial instruments utilized by First Financial and their balances (dollars in \$000 s):

	March 31, 2008			December 31, 2007			March 31, 2007		
	Notional Amount	Estimated Fair Value Gain	(Loss)	Notional Amount	Estimated Fair Value Gain	(Loss)	Notional Amount	Estimated Fair Value Gain	(Loss)
Fair Value Hedges Pay fixed interest rate swaps	\$ 27,800	\$ 1	\$(1,941)	\$ 28,903	\$ 79	\$(866)	\$30,568	\$ 460	\$(230)
Matched Client Hedges Client interest rate swaps with bank	61,384	5,029	0	51,480	2,702	0	24,673	699	0
Bank interest rate swaps with counterparty	61,384	0	(5,029)	51,840	0	(2,702)	24,673	0	(699)
Total	\$150,568	\$5,030	\$(6,970)	\$131,863	\$2,781	\$(3,568)	\$79,914	\$1,159	\$(929)

In connection with its use of derivative instruments, First Financial from time to time is required to post cash collateral with its counterparties to offset its market position. Derivative collateral balances were \$3,710, \$936, and \$0 at March 31, 2008, December 31, 2007, and March 31, 2007, respectively. First Financial classifies the derivative cash collateral outstanding with its counterparties as an adjustment to the fair value of the derivative contracts within accrued interest and other liabilities in the Consolidated Balance Sheets.

NOTE 6: OTHER LONG-TERM DEBT

Other long-term debt on the Consolidated Balance Sheets consists of junior subordinated debentures owed to unconsolidated subsidiary trusts. Capital securities were issued in the third quarter of 2003 by a statutory business trust, First Financial (OH) Statutory Trust II (Trust II), and in the third quarter of 2002 by First Financial (OH) Statutory Trust I (Trust I).

The debentures issued in 2002 were eligible for early redemption by First Financial in September of 2007, with a final maturity in 2032. In September of 2007, First Financial redeemed all the underlying capital securities relating to Trust I. The total outstanding capital securities redeemed were \$10.0 million. The debentures issued in 2003 are eligible for early redemption by First Financial in September of 2008, with a final maturity in 2033.

First Financial owns 100% of the common equity of the remaining trust, Trust II. The trust was formed with the sole purpose of issuing the capital securities and investing the proceeds from the sale of such capital securities in the debentures. The debentures held by the trust are the sole assets of the trust. Distributions on the capital securities are

payable quarterly at a variable rate of interest, which is equal to the interest rate being earned by the trust on the debentures and are recorded as interest expense of First Financial. The interest rate is subject to change every three months, indexed to the three-month LIBOR. First Financial has the option to defer interest for up to five years on the debentures. However, the covenants prevent the payment of dividends on First Financial's common stock if the interest is deferred. The capital securities are subject to mandatory redemption, in whole or in part, upon repayment of the debentures. First Financial has entered into agreements which, taken collectively, fully

Table of Contents

or unconditionally guarantee the capital securities subject to the terms of the guarantees. The debentures qualify as Tier I capital under Federal Reserve Board guidelines, but are limited to 25% of qualifying Tier I capital.

(dollars in \$000 s)	Amount	Rate	Maturity Date	Call Date
First Financial (OH) Statutory Trust II	\$20,000	5.80%	9/30/33	9/30/08

NOTE 7: ALLOWANCE FOR LOAN AND LEASE LOSSES

Changes in the allowance for loan and lease losses for the previous five quarters are presented in the table that follows (dollars in \$000 s):

	Three Months Ended				
	2008 Mar. 31	Dec. 31	2007 Sep. 30	June 30	Mar. 31
Balance at beginning of period	\$ 29,057	\$ 29,136	\$ 28,060	\$ 27,407	\$ 27,386
Provision for loan losses	3,223	1,640	2,558	2,098	1,356
Loans charged off	(3,103)	(3,042)	(2,097)	(2,130)	(2,153)
Recoveries	541	1,323	615	685	818
Balance at end of period	\$ 29,718	\$ 29,057	\$ 29,136	\$ 28,060	\$ 27,407

Allowance for loan and lease losses to total ending loans	1.14%	1.12%	1.12%	1.10%	1.10%
---	-------	-------	-------	-------	-------

The allowance for loan and lease losses related to loans that are identified as impaired is based on discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans.

First Financial's investment in impaired loans is as follows (dollars in \$000 s):

	As of and for the Quarter Ended				
	2008 Mar. 31	Dec. 31	2007 Sep. 30	June 30	Mar. 31
Impaired loans requiring a valuation	\$ 4,721	\$ 4,822	\$ 5,325	\$ 7,309	\$ 2,911
Valuation allowance	\$ 2,125	\$ 2,705	\$ 2,756	\$ 3,477	\$ 1,219
Average impaired loans for the period	\$ 6,137	\$ 9,755	\$ 8,921	\$ 8,435	\$ 3,894

For all periods presented above, there were no impaired loans that did not require a valuation allowance. First Financial recognized interest income on impaired loans for the quarter ended March 31, 2008 of \$0.1 million compared to \$0 for the same period in 2007. Interest income is recorded on a cash basis during the period the loan is considered impaired after recovery of principal is reasonably assured.

NOTE 8: INCOME TAXES

First Financial's effective tax rate in the first quarter of 2008 was 32.6%, compared to 33.0% in the first quarter of 2007.

First Financial adopted the provisions of FIN 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109, effective January 1, 2007. The adoption of FIN 48 had no impact on First Financial's

financial statements. At March 31, 2008, and December 31, 2007, First Financial had no FIN 48 unrecognized tax benefits recorded. First Financial does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months.

Table of Contents

First Financial recognizes interest and penalties on income tax assessments or income tax refunds in the Consolidated Financial Statements as a component of noninterest expense.

First Financial and its subsidiaries are subject to U.S. federal income tax as well as income tax of the state of Indiana. First Financial's income tax returns are subject to review and examination by federal, state, and local government authorities. The calendar years through 2004 have been reviewed and closed by the Internal Revenue Service. The years open to examination by state and local government authorities vary by jurisdiction and First Financial is not aware of any material outstanding examination matters.

NOTE 9: EMPLOYEE BENEFIT PLANS

First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees. First Financial uses a December 31 measurement date for its defined benefit pension plan. Effective in the third quarter of 2007, First Financial amended the defined benefit pension plan formula to change the determination of participant benefits from a final average earnings plan to a cash balance plan. Pension plan participants prior to July 1, 2007, transitioned to the amended plan on January 1, 2008. After July 1, 2007, newly eligible participants entered the amended plan upon their eligibility date. Due to the funded status of the pension plan, First Financial does not expect to make any contributions to its pension plan in 2008.

The following table sets forth information concerning amounts recognized in First Financial's Consolidated Balance Sheets and Consolidated Statements of Earnings (dollars in \$000's).

	Three months ended March 31,	
	2008	2007
Service cost	\$ 590	\$ 851
Interest cost	643	743
Expected return on plan assets	(1,024)	(1,122)
Amortization of transition asset	(9)	(12)
Amortization of prior service cost	(106)	12
Amortization of actuarial loss	242	227
Net periodic benefit cost	\$ 336	\$ 699

Amounts recognized in accumulated other comprehensive income (loss):

	Three months ended March 31,	
	2008	2007
Net actuarial loss	\$ 242	\$ 227
Net prior service (credit) cost	(106)	12
Net transition asset	(9)	(12)
Deferred tax assets	(46)	(83)
Net amount recognized	\$ 81	\$ 144

NOTE 10: FAIR VALUE DISCLOSURES

First Financial adopted SFAS No. 157 effective January 1, 2008. This statement defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles, and expands disclosures about fair value measurements.

Table of Contents

First Financial also adopted SFAS No. 159 effective January 1, 2008. This statement permits the initial and subsequent measurement of many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument, irrevocable basis.

Fair Value Option

The following table summarizes the impact on First Financial's Consolidated Balance Sheets of adopting the fair value option (FVO) for equity securities of government sponsored entities, specifically Federal Home Loan Mortgage Corporation perpetual preferred series V shares with a cost basis of \$5.0 million. Amounts shown represent the carrying value of the affected investment security categories before and after the change in accounting resulting from the adoption of SFAS No. 159 (dollars in \$000's).

	Jan. 1, 2008 Balance Sheet Prior to Adoption	Adoption Impact	Jan. 1, 2008 Balance Sheet After Adoption
Trading investment securities	\$ 0	\$ 3,799	\$ 3,799
Available-for-sale investment securities	306,928	(3,799)	303,129
Accumulated comprehensive income (loss)	(7,127)	750	(6,377)
Cumulative effect of adoption of the FVO charge to retained earnings ⁽¹⁾		\$ 750	
Retained earnings	\$ 82,093	(\$750)	\$ 81,343

⁽¹⁾ The adoption of SFAS No. 159 had no overall tax impact due to the transfer of the unrealized loss from accumulated other comprehensive income (loss) to retained earnings, within shareholders equity.

Prior to the election of the FVO effective January 1, 2008, First Financial's equity securities of government sponsored entities totaled \$3.8 million and were classified as investment securities available-for-sale. An unrealized loss of \$0.8 million, net of taxes of \$0.4 million, as of December 31, 2007, was included as a component of accumulated other comprehensive income (loss). In connection with First Financial's adoption of SFAS No. 159 effective January 1, 2008, the \$0.8 million unrealized loss was reclassified from accumulated other comprehensive income (loss) to beginning retained earnings as part of a cumulative-effect adjustment. There was no impact on total shareholders equity upon adoption. The equity securities of government sponsored entities are included as trading investment

securities on First Financial's Consolidated Balance Sheets effective January 1, 2008.

At March 31, 2008, the fair value of the equity securities of government sponsored entities for which the FVO was elected was \$3.8 million, consistent with fair value of the equity securities at December 31, 2007, included as investment securities available-for-sale. Since January 1, 2008, changes in market value for the equity securities of government sponsored entities for which the FVO was elected have been recorded in other noninterest income. Future changes will be recorded similarly. Dividends received on these securities are included in tax-exempt investment security interest income. There were no purchases or sales of similar investment securities in the first quarter of 2008.

Fair Value Measurement

The SFAS No. 157 fair value framework includes a hierarchy which focuses on prioritizing the inputs used in valuation techniques. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), a lower priority to observable inputs other than quoted prices in active markets for identical assets and liabilities (Level 2), and the lowest priority to unobservable inputs (Level 3). When determining the fair value measurements for assets and liabilities, First Financial looks to active markets to price identical assets or liabilities whenever possible and classifies such items in Level 1. When identical assets and liabilities are not traded in active markets, First Financial looks to market observable data for similar assets and liabilities and classifies such items as Level 2. Certain assets and liabilities are not actively traded in observable markets and First Financial must use alternative techniques, based on unobservable inputs, to determine the fair value and classifies

Table of Contents

such items as Level 3. The level within the fair value hierarchy is based on the lowest level of input that is significant in the fair value measurement.

The following describes the valuation techniques used by First Financial to measure different financial assets and liabilities at fair value in the financial statements.

Investment securities - Investment securities classified as trading and available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar investment securities. Third party vendors compile prices from various sources and may apply such techniques as matrix pricing to determine the value of identical or similar investment securities (Level 2). Matrix pricing is a mathematical technique widely used in the banking industry to value investment securities without relying exclusively on quoted prices for the specific investment securities but rather relying on the investment securities' relationship to other benchmark quoted investment securities. Any investment securities not valued based upon the methods above are considered Level 3.

Loans held for sale Loans held for sale are carried at the lower of cost or market value. These loans currently consist of one-to-four family residential real estate loans originated for sale to a strategic partner. Fair value is based on the contractual price to be received from our strategic partner, which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, First Financial records any fair value adjustments on a nonrecurring basis. Gains and losses on the sale of loans are recorded as net gains from sales of loans within noninterest income in the Consolidated Statements of Income.

Derivatives First Financial utilizes interest rate swaps as a means to offer commercial borrowers products that meet their needs, but are also designed to achieve First Financial's desired interest rate risk profile at the time. The net interest receivable or payable is accrued and recognized as an adjustment to the interest income or interest expense of the hedged item. First Financial utilizes third-party vendors for derivative valuation purposes. These vendors determine the appropriate fair value based on a net present value calculation of the cash flows related to the interest rate swaps using primarily observable market inputs such as interest rate yield curves. The discounted net present value calculated represents the cost to terminate the swap if First Financial should choose to do so on the applicable measurement date (Level 2).

Allowance for loan and lease losses Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. Impaired loans are valued at the lower of cost or market for purposes of determining the appropriate amount of impairment to be allocated to the allowance for loan and lease losses. Market value is measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the company (Level 2). The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable borrower financial statements if not considered significant. Likewise, values for inventory and accounts receivable collateral are based on borrower financial statement balances or aging reports (Level 3). Impaired loans allocated to the allowance for loan and lease losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan and lease losses on the Consolidated Statements of Income.

Table of Contents

The following table summarizes the financial assets and liabilities measured at fair value on a recurring basis at March 31, 2008 (dollars in \$000 s):

	Fair Value Measurements Using			Netting Adjustments (1)	Assets/Liabilities at Fair Value
	Level 1	Level 2	Level 3		
Assets					
Trading investment securities (2)	\$ 3,820	\$ 0	\$ 0	\$ 0	\$ 3,820
Derivatives	0	5,030	0	(5,029)	1
Available-for-sale investment securities	228	344,917	0	0	345,145
Total	\$ 4,048	\$ 349,947	\$ 0	\$ (5,029)	\$ 348,966
Liabilities Derivatives	\$ 0	\$ 6,970	\$ 0	\$ (5,029)	\$ 1,941

(1) Amounts represent the impact of legally enforceable master netting arrangements that allow First Financial to settle positive and negative positions and also cash collateral held with the same counterparties.

(2) Amount represents an item for which First Financial elected the fair value option under SFAS No. 159.

Certain financial assets and liabilities are measured at fair value on a nonrecurring basis. Adjustments to the fair market value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets. The following table summarizes financial assets and liabilities measured at fair value on a nonrecurring basis at March 31, 2008 (dollars in \$000 s):

	Fair Value Measurements Using			Year-to-Date Gains (Losses)
	Level 1	Level 2	Level 3	

Assets

Loans held for sale	\$0	\$4,108	\$ 0	\$ 0
Impaired loans ⁽¹⁾	0	2,515	80	0

(1) Amounts represent the fair value of collateral for impaired loans allocated to the allowance for loan and lease losses.

**ITEM 2-MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS
FIRST FINANCIAL BANCORP. AND SUBSIDIARIES
(Unaudited)**

SUMMARY

MARKET STRATEGY

First Financial serves a combination of metropolitan and non-metropolitan markets in Ohio, Indiana, and Kentucky through its full-service banking centers. Market selection is based upon a number of factors, but markets are primarily chosen for their potential for growth and long-term profitability. First Financial's goal is to develop a competitive advantage through a local market focus; building long-term relationships with clients and helping them reach greater levels of success in their financial life. To help achieve its goals of superior service to an increasing number of clients, First Financial opened two new banking centers in its metropolitan markets in 2007. First Financial has future expansion opportunities in Ohio, Indiana, and Kentucky, including expansion opportunities with properties previously acquired. First Financial announced in December of 2007 its plans to open a new market headquarters in the third quarter of 2008 for its Dayton-Middletown metropolitan market. First Financial intends to concentrate future growth plans and capital investments in its metropolitan markets. Smaller markets have historically provided stable, low-cost funding sources to First Financial and they remain an important part of First Financial's funding base. First Financial believes its historical strength in these markets should enable it to retain or improve its market share.

As a key component to executing its market strategy, in the first quarter of 2008, First Financial's corporate headquarters was relocated to its existing Cincinnati market offices in Cincinnati, Ohio. The bank subsidiary remains headquartered in Hamilton, Ohio.

First Financial continues to focus on the execution of its strategic initiatives, including the identification of core businesses. Some examples of these efforts include the fourth quarter of 2007 formation of a long-term exclusive marketing agreement and the sale of the merchant payment processing portfolio, as well as the first quarter of 2007 consolidation of seven banking centers and sale of mortgage servicing rights and problem loans.

First Financial has 80 offices serving eight distinct markets with an average banking center deposit size of approximately \$35 million. The operating model employed to execute its strategic plan includes a structure where market presidents manage these distinct markets, with the authority to make decisions at the point of client contact.

OVERVIEW OF OPERATIONS

Net income for the first quarter of 2008 was \$7.3 million or \$0.20 in diluted earnings per share versus \$8.4 million or \$0.22 in diluted earnings per share for the first quarter of 2007. The \$1.1 million decrease in net income was due to lower net interest income of \$2.2 million and increased provision expense for loan and lease losses of \$1.8 million, partially offset by increased noninterest income of \$0.1 million, decreased noninterest expense of \$2.2 million, and decreased income tax expense of \$0.6 million. Compared to the fourth quarter of 2007 net income of \$10.7 million or \$0.29 in diluted earnings per share, first quarter of 2008 net income decreased \$3.4 million due to the \$5.5 million fourth quarter of 2007 sale of the merchant payment processing portfolio, lower net interest income of \$0.9 million, and increased provision for loan and lease losses of \$1.5 million, partially offset by decreased noninterest expense of \$2.4 million and decreased income tax expense of \$2.1 million.

Return on average assets for the first quarter of 2008 was 0.89% compared to 1.04% for the comparable period in 2007 and 1.27% for the linked-quarter (first quarter of 2008 compared to the fourth quarter of 2007). Return on average shareholders' equity for the first quarter of 2008 was 10.63% compared to 11.94% for the comparable period in 2007 and 15.37% for the linked-quarter.

A detailed discussion of the first quarter of 2008 results of operations follows.

Table of Contents**NET INTEREST INCOME**

Net interest income, First Financial's principal source of income, is the excess of interest received from earning assets over interest paid on interest-bearing liabilities. For analytical purposes, net interest income is also presented in the table that follows, adjusted to a tax equivalent basis assuming a 35% marginal tax rate for interest earned on tax-exempt assets such as municipal loans and investments. This is to recognize the income tax savings that facilitates a comparison between taxable and tax-exempt assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully tax equivalent basis. Therefore, management believes these measures provide useful information for both management and investors by allowing them to make peer comparisons.

(dollars in \$000 s)	Three Months Ended March 31,	
	2008	2007
Net interest income	\$ 28,249	\$ 30,403
Tax equivalent adjustment	514	576
Net interest income tax equivalent	\$ 28,763	\$ 30,979
Average earning assets	\$ 3,005,835	\$ 2,992,294
Net interest margin *	3.78%	4.12%
Net interest margin (fully tax equivalent) *	3.85%	4.20%

* Margins are calculated using net interest income annualized divided by average earning assets.

Net interest income in the first quarter of 2008 was \$28.2 million compared to \$30.4 million in the first quarter of 2007, a decrease of \$2.2 million or 7.1%. First quarter of 2008 net interest margin of 3.78% decreased 34 basis points from 4.12% for the first quarter of 2007. This decline in net interest income and margin is primarily a result of actions by the Federal Reserve to address the weakening economy, including the consumer mortgage crisis, by lowering the federal funds rate by 300 basis points over the past seven months, and the resulting impact on our asset sensitive balance sheet. Earning asset growth, specifically growth in the commercial, commercial real estate, and construction loan portfolios, partially offset the decline in market interest rates.

On a tax equivalent basis, the first quarter of 2008 net interest margin of 3.85% decreased 35 basis points from 4.20% for the first quarter of 2007.

Net interest income on a linked-quarter basis decreased from \$29.1 million in the fourth quarter of 2007 to \$28.2 million in the first quarter of 2008, a \$0.9 million or 11.4% annualized decrease. The decrease in net interest income is primarily due to a decline in market interest rates, including a 200 basis point reduction in the federal funds rate during the first quarter, partially offset by the continued mix shift in earning assets. Linked-quarter net interest margin remained relatively flat, decreasing 1 basis point from 3.79% to 3.78%. On a tax-equivalent basis, the first quarter of 2008 net interest margin was 3.85% as compared to 3.86% for the fourth quarter of 2007.

Table of Contents

The Consolidated Average Balance Sheets and Net Interest Income Analysis that follows are presented on a GAAP basis (dollars in \$000 s).

QUARTERLY CONSOLIDATED AVERAGE BALANCE SHEETS AND NET INTEREST INCOME ANALYSIS

	March 31, 2008			December 31, 2007			March 31, 2007

(1) Loans held for sale and nonaccrual loans are both included in gross loans.

(2) Not tax equivalent.

NONINTEREST INCOME

First quarter of 2008 noninterest income of \$14.9 million remained relatively flat compared to the first quarter of 2007. Noninterest income in the first quarter of 2008 included a \$1.6 million gain associated with the partial redemption of Visa Inc. common shares comprised of a \$1.1 million gain on the share redemption and the reversal of the \$0.5 million litigation reserve established in the fourth quarter of 2007. The first quarter of 2007 included a \$1.1 million gain on the sale of the servicing rights for First Financial's residential real estate loans serviced for others. Excluding these items, first quarter of 2008 noninterest income decreased \$0.4 million or 2.9% from the first quarter of 2007 primarily due to lower earnings from bank-owned life insurance offset by higher trust and wealth management fees.

On a linked-quarter basis, total noninterest income decreased \$5.4 million or 26.6%. First quarter of 2008 noninterest income included the previously mentioned \$1.6 million Visa Inc. gain, and the fourth quarter of 2007 included a

\$5.5 million gain on the sale of First Financial's merchant payment processing portfolio. Excluding these items, first quarter of 2008 noninterest income decreased \$1.5 million or 10.0% from the fourth quarter of 2007 primarily due to a seasonal decline in service charges on deposit accounts and lower trust and wealth management fees, offset by higher bankcard income.

NONINTEREST EXPENSE

Total noninterest expense decreased \$2.2 million or 7.0% during the first quarter of 2008 as compared to the first quarter of 2007 primarily due to the following:

- decreases in salaries and employee benefits of \$1.9 million primarily due to a \$0.9 million reduction in severance costs, \$0.5 million reduction in salaries and incentive-based compensation as a result of an overall reduction in staffing levels, and \$0.2 million reduction in pension and other retirement-related expenses

- decreases in marketing related costs of \$0.4 million primarily due to the costs associated with the branding initiative in 2007

Table of Contents

On a linked-quarter basis, noninterest expense decreased \$2.4 million or 7.5% from the fourth quarter of 2007. This decrease in noninterest expense was primarily due to the \$2.2 million pension settlement charge which occurred in the fourth quarter of 2007. The prior period pension settlement charge was an acceleration of costs that were previously deferred under pension accounting rules and would have been recognized in future periods.

INCOME TAXES

Income tax expense was \$3.5 million and \$4.1 million for the first quarters of 2008 and 2007, respectively. The effective taxes rates for the first quarters of 2008 and 2007 were 32.6% and 33.0%, respectively.

ASSETS

Loan growth continues to be driven by First Financial's efforts to deepen its market presence, primarily in its metropolitan markets, resulting in the mix shift from lower yielding consumer lending to higher yielding commercial loans. Average total loans during the first quarter of 2008 increased \$109.9 million or 4.4% from the comparable period a year ago. Average commercial, commercial real estate, and construction loans increased \$228.7 million or 16.1% from the first quarter of 2007.

During late 2005 and early 2006, management made a number of strategic decisions to realign its balance sheet and change its lending focus. These decisions included exiting indirect installment lending and no longer holding its residential real estate loan originations on the balance sheet. This has resulted in the cumulative reduction in indirect installment and residential real estate loan balances of \$206 million and \$194 million, respectively, since that time. Average total loans for the first quarter of 2008 remained relatively flat, increasing \$8.1 million or 1.2% on an annualized basis from the fourth quarter of 2007; however, average commercial, commercial real estate, and construction loans increased \$28.6 million or 7.0% on an annualized basis from the fourth quarter of 2007.

Securities available-for-sale were \$345.1 million at March 31, 2008, compared to \$325.8 million at March 31, 2007, and \$306.9 million at December 31, 2007. The combined investment portfolio was 11.7% and 11.0% of total assets at March 31, 2008, and 2007, respectively, and 10.3% of total assets at December 31, 2007. The investment portfolio, as a percentage of total assets, remains low relative to our peers; however, First Financial is reviewing various portfolio strategies and expects to increase this percentage as opportunities present themselves. At March 31, 2008, First Financial held approximately 58% of its available-for-sale securities in mortgage related instruments, substantially all of which are held in highly rated agency pass-through residential mortgage instruments. Among other factors, portfolio selection criteria avoid securities backed by sub-prime assets and also those containing assets that would give rise to material geographic concentrations.

First Financial adopted SFAS No. 159 effective January 1, 2008. This statement permits the initial and subsequent measurement of many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument, irrevocable basis. First Financial applied the fair value option to its equity securities of government sponsored entities, specifically Federal Home Loan Mortgage Corporation perpetual preferred series V shares, and these securities are classified as trading investment securities at March 31, 2008, in First Financial's Consolidated Balance Sheets.

DEPOSITS

Total deposit balances, both average and period-end, were up slightly on a year-over-year basis and declined on a linked-quarter basis. The seasonal fluctuation from a large commercial noninterest-bearing account was the primary reason for the linked-quarter decline. Transaction account balances, both average and period-end, have grown over these comparative periods but this growth has been offset by the runoff of time and wholesale deposits as a result of our decision to maintain rational deposit pricing in a very competitive landscape. The consumer's preference for higher-yielding money market accounts and

Table of Contents

time deposits, rather than more traditional transaction accounts, continues to result in shifts in deposit mix and behavior-based margin compression.

Average deposits for the first quarter of 2008 increased \$23.7 million or 0.8% from the comparable period a year ago. Average total interest-bearing deposits for the first quarter of 2008 increased \$46.1 million or 1.9%, and average noninterest-bearing deposits decreased \$22.5 million or 5.6%, both from the first quarter of 2007. Average transaction account balances increased approximately \$41 million or 3.4% from the first quarter of 2007.

Average deposits for the first quarter of 2008 decreased \$28.5 million or 4.0% on an annualized basis from the fourth quarter of 2007. Average total interest-bearing deposits decreased \$8.4 million or 1.4%, and average noninterest-bearing deposits decreased \$20.1 million or 20.1%, both on an annualized basis from the fourth quarter of 2007. Average transaction account balances increased approximately \$22 million or 7.3%, offset by the runoff of time and wholesale account balances of approximately \$31 million or 9.9%, both on an annualized basis from the fourth quarter of 2007. Period-end noninterest-bearing deposits decreased \$60.7 million from the fourth quarter of 2007 primarily due to the seasonal deposit activity of large commercial clients.

ALLOWANCE FOR LOAN AND LEASE LOSSES

Management maintains the allowance at a level that is considered sufficient to absorb inherent risks in the loan portfolio. Management's evaluation in establishing the adequacy of the allowance includes evaluation of the loan and lease portfolios, past loan and lease loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, and other pertinent factors, such as periodic internal and external evaluations of delinquent, nonaccrual, and classified loans. The evaluation is inherently subjective as it requires utilizing material estimates, including the amounts and timing of future cash flows expected to be received on impaired loans. The evaluation of these factors is the responsibility of the Allowance for Loan and Lease Losses Committee, which is comprised of senior officers from the risk management, credit administration, finance, and lending areas.

While most indications point to a continued decline in the performance of certain real estate and consumer-based lending products as a result of the broad economic downturn, First Financial's overall credit quality remains stable. First Financial's total loan portfolio has, and continues to shift away from most consumer-based lending. As such, the expected effects on First Financial from such economic conditions, relative to the industry, should be less severe. Additionally, the mix of the total loan portfolio has shifted not only in product type, but in the risk profile of the borrowers due to the improvements in both underwriting and in the resolution strategies used for problem credits. However, there always remains the possibility of an unexpected event which could result in higher credit costs. Total nonperforming asset levels have remained relatively consistent over the past four quarters, fluctuating less than 5% since the second quarter of 2007. At the end of the first quarter of 2008, total nonperforming assets were \$17.6 million, an increase of \$0.3 million from the end of the fourth quarter of 2007. Compared to the end of the fourth quarter of 2007, the ratio of nonperforming loans to total loans increased 2 basis points to 58 basis points at the end of the first quarter of 2008, and the ratio of nonperforming assets to period-end loans, plus other real estate owned, remained consistent at 67 basis points at the end of the first quarter of 2008.

First Financial's March 31, 2008, allowance for loan and lease losses to period-end loans ratio was 1.14% as compared to the March 31, 2007, and December 31, 2007, allowance for loan and lease losses to period-end loans ratios of 1.10% and 1.12%, respectively. The increase in the allowance for loan and lease losses to period-end loans ratio is based on our estimate of potential losses inherent in the loan portfolio, primarily driven by changes in consumer-based credit. First Financial's allowance for loan and lease losses to nonaccrual and nonperforming loan ratios has been steadily increasing since the second quarter of 2007, and at March 31, 2008, were 202.29% and 194.83%, respectively. A large percentage of

Table of Contents

nonperforming assets are secured by real estate, and this collateral has been appropriately considered in establishing the allowance for loan and lease losses.

At March 31, 2008, the commercial real estate and real estate construction loan portfolio totaled \$899.1 million, or 34.4% of total loans, including \$130.2 million or 5.0% of total loans for commercial real estate construction, and \$42.5 million or 1.6% of total loans, for residential construction, land acquisition, and development. First Financial believes its internal lending policies and extensive underwriting standards are key to managing credit exposure from both the residential construction and land acquisition and development segments in any particular project.

First Financial continually evaluates the commercial real estate and real estate construction portfolio for geographic and borrower concentrations, as well as loan-to-value coverage, and believes its credit underwriting processes are producing a prudent and acceptable level of credit exposure.

Since the first quarter of 2007, First Financial has experienced nearly 10% growth in its home equity loan portfolio average balances. First Financial believes its underwriting criteria coupled with the monitoring of a number of metrics including credit scores, loan-to-value ratios, line size, and usage, provides adequate oversight for the growth. First Financial maintains a strong pricing discipline for its home equity loan product and does not sacrifice loan quality for growth.

In the second quarter of 2005, First Financial made the strategic decision to discontinue the origination of residential real estate loans for retention on its balance sheet. As a result, the residential real estate portfolio has declined \$194 million, excluding the impact of the loan sales, since that time. In the first quarter of 2007, First Financial sold the servicing of its remaining residential real estate portfolio and established an agreement to sell future originations to a strategic partner. Prior to this decision, First Financial was not a sub-prime lender, and the company does not originate sub-prime residential real estate loans in the current originate-and-sell model.

First quarter of 2008 net charge-offs were \$2.6 million, an annualized 40 basis points of average loans, compared to first quarter of 2007 net charge-offs of \$1.3 million, an annualized 22 basis points of average loans, and fourth quarter of 2007 net charge-offs of \$1.7 million, an annualized 26 basis points of average loans. Approximately \$0.5 million or 8 basis points of the increase is due to the impact of four large home equity loan charge-offs. From an industry perspective, home equity lending may continue to experience stress, as borrowers come under continued pressure in the current economic environment. First Financial's overall credit quality metrics for its home equity loan portfolio continue to remain stable, as over the past eight quarters both the home equity net charge-off ratio and ratio of nonaccrual home equity loans to total home equity loans have consistently been below 50 basis points, when the previously mentioned first quarter of 2008 home equity loan charge-offs are excluded. First Financial continues to actively monitor its home equity loan portfolio but may experience similar volatility in upcoming quarters.

The provision for loan and lease losses for the first quarter of 2008 was \$3.2 million compared to \$1.4 million for the same period in 2007 and \$1.6 million for the linked-quarter. The increase in provision expense from these periods is primarily due to our current estimate of potential losses inherent in the loan portfolio, primarily driven by changes in consumer-based credit.

It is management's belief that the \$29.7 million allowance for loan and lease losses at March 31, 2008, is adequate to absorb probable credit losses inherent in the portfolio, and the changes in the allowance and the resultant provision are consistent with the internal assessment of the risk in the loan portfolios.

Table of Contents

The table that follows indicates the activity in the allowance for loan losses for the quarterly and year-to-date periods presented (dollars in \$000 s).

	Three Months Ended				
	2008 Mar. 31	Dec. 31	2007 Sep. 30	Jun. 30	Mar. 31

Total net charge-offs	0.40%	0.26%	0.23%	0.23%	0.22%

NONPERFORMING/UNDERPERFORMING ASSETS

Total nonperforming assets at the end of the first quarter of 2008 were \$17.6 million, an increase of \$3.6 million from the end of the first quarter of 2007 primarily due to a higher level of nonaccrual residential real estate loans consistent with the industry and weakness in the consumer sector. As a result, the ratio of nonperforming loans to total loans increased from 45 basis points at the end of the first quarter of 2007 to 58 basis points at the end of the first quarter of 2008. This 13 basis point increase in the ratio of nonperforming loans to total loans, combined with the recent developments in the overall consumer credit environment, have been the primary drivers for the increase in the allowance for loan and lease losses to total loans ratio from 1.10% to 1.14%. The ratio of nonperforming assets to period-end loans, plus other real estate owned, increased from 56 basis points at the end of the first quarter of 2007 to 67 basis points at the end of the first quarter of 2008.

Table of Contents

Total nonperforming assets on a linked-quarter basis increased \$0.3 million from the end of the fourth quarter of 2007. The ratio of nonperforming loans to total loans increased from 56 basis points at the end of the fourth quarter of 2007 to 58 basis points at the end of the first quarter of 2008, and the ratio of nonperforming assets to period-end loans, plus other real estate owned, remained consistent at 67 basis points at the end of the first quarter of 2008 as compared to the end of the fourth quarter of 2007.

Accruing loans, including impaired loans, are transferred to nonaccrual status when, in the opinion of management, the collection of principal or interest is doubtful. This generally occurs when a loan becomes 90 days past due as to principal or interest unless the loan is both well secured and in the process of collection.

The table that follows shows the categories that are included in nonperforming and underperforming assets as of March 31, 2008, and the four previous quarters, as well as related credit quality ratios (dollars in \$000 s).

	Three Months Ended				
	2008 Mar. 31	Dec. 31	2007 Sep. 30	Jun. 30	Mar. 31

LIQUIDITY AND CAPITAL RESOURCES

Liquidity management is the process by which First Financial manages the continuing flow of funds necessary to meet its financial commitments on a timely basis and at a reasonable cost. These funding commitments include withdrawals by depositors, credit commitments to borrowers, shareholder dividends, expenses of its operations, and capital

expenditures. Liquidity is closely monitored and managed by First Financial's Asset and Liability Committee (ALCO), a group of senior officers from the lending, deposit gathering, finance, risk management, and treasury areas. It is ALCO's responsibility to ensure First Financial has the necessary level of funds available for normal operations as well as maintain a contingency funding policy to ensure that liquidity stress events are quickly identified, and management plans are in place to respond. This is accomplished through the use of policies which establish limits and require measurements to monitor liquidity trends, including management reporting that identifies the amounts and costs of all available funding sources.

Table of Contents

Liquidity is derived primarily from deposit growth, principal and interest payments on loans and investment securities, maturing loans and investment securities, access to wholesale funding sources, and collateralized borrowings. First Financial's most stable source of liability-funded liquidity for both the long and short-term needs is deposit growth and retention of the core deposit base. The deposit base is diversified among individuals, partnerships, corporations, public entities, and geographic markets. This diversification helps First Financial minimize dependence on large concentrations of funding sources.

Capital expenditures, such as banking center expansions and technology investments, were \$1.4 million and \$1.5 million for the first three months of 2008 and 2007, respectively. Management believes that First Financial has sufficient liquidity to fund its future capital expenditure commitments.

In addition, from time to time, First Financial utilizes advances from the Federal Home Loan Bank (FHLB) as a funding source. At March 31, 2008, and December 31, 2007, total long-term borrowings from the FHLB were \$42.4 million and \$45.9 million, respectively. The total available remaining borrowing capacity from the FHLB at March 31, 2008, was \$384.7 million.

As of March 31, 2008, First Financial has pledged certain residential real estate loans totaling \$546.5 million as collateral for borrowings to the FHLB. For ease of borrowing execution, First Financial utilizes a blanket collateral agreement with the FHLB.

The principal source of asset-funded liquidity is marketable investment securities, particularly those of shorter maturities. The market value of investment securities classified as available-for-sale totaled \$345.1 million at March 31, 2008. Securities classified as held-to-maturity that are maturing within a short period of time are also a source of liquidity. Securities classified as held-to-maturity that are maturing in one year or less totaled \$0.5 million at March 31, 2008. The market value of securities classified as trading totaled \$3.8 million at March 31, 2008. In addition, other types of assets such as cash and due from banks, federal funds sold and securities purchased under agreements to resell, as well as loans and interest-bearing deposits with other banks maturing within one year, are sources of liquidity. Overnight federal funds sold totaled \$2.9 million at March 31, 2008.

Certain restrictions exist regarding the ability of First Financial's subsidiaries to transfer funds to First Financial in the form of cash dividends, loans, or advances. The approval of the subsidiaries' respective primary federal regulators is required for First Financial's subsidiaries to pay dividends in excess of regulatory limitations. Dividends paid to First Financial from its subsidiaries totaled \$7.4 million for first quarter of 2008. As of March 31, 2008, First Financial's subsidiaries had retained earnings of \$133.8 million of which \$0.4 million was available for distribution to First Financial without prior regulatory approval. Management is not aware of any other events or regulatory requirements that, if implemented, are likely to have a material effect on First Financial's liquidity.

First Financial Bancorp maintains a short-term revolving credit facility with an unaffiliated bank. This facility provides First Financial additional liquidity for various corporate activities, including the repurchase of First Financial shares and the payment of dividends to shareholders. As of March 31, 2008, the outstanding balance was \$53.0 million compared to an outstanding balance of \$72.0 million at December 31, 2007. The outstanding balance of this line varies throughout the year depending on First Financial's cash needs. First Financial renewed the \$75.0 million credit facility during the first quarter of 2008 for a period of one year. The credit agreement requires First Financial to maintain certain covenants including those related to asset quality and capital levels. First Financial was in full compliance with all covenants as of March 31, 2008, and December 31, 2007.

First Financial Bancorp makes quarterly interest payments on its junior subordinated debentures owed to unconsolidated subsidiary trusts. Interest expense related to this other long-term debt totaled \$0.4 million and \$0.7 million for the three months ending March 31, 2008, and 2007, respectively. In September of 2007, First Financial redeemed all the underlying capital securities relating to First Financial (OH) Statutory Trust I. The total outstanding capital securities redeemed were \$10 million. Therefore, there will be no future interest payments on that debenture. The \$20 million of debentures issued in 2003 remain outstanding.

Table of Contents

First Financial had no share repurchase activity under publicly announced plans in the first quarter of 2008, and at this time, First Financial does not plan to repurchase any of its shares the remainder of 2008. In the first quarter of 2007, First Financial repurchased 244,000 common shares at a cost of \$3.9 million and a weighted average share repurchase price of \$16.11.

In connection with First Financial's adoption of SFAS No. 159 effective January 1, 2008, a \$0.8 million unrealized loss was reclassified from accumulated other comprehensive income (loss) to beginning retained earnings as part of a cumulative-effect adjustment. There was no impact on total shareholders' equity upon adoption.

First Financial also adopted EITF Issue No. 06-4 effective January 1, 2008. Issue No. 06-4 applies to split-dollar life insurance arrangements whose benefits continue into the employees' retirement. First Financial recorded a transition adjustment in the amount of \$2.5 million for the impact of this EITF effective January 1, 2008, as a reduction of opening retained earnings and an increase in accrued interest and other liabilities in the Consolidated Balance Sheets.

CAPITAL ADEQUACY

First Financial and its subsidiary, First Financial Bank, are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate regulatory action.

Quantitative measures established by regulation to ensure capital adequacy require First Financial to maintain minimum amounts and ratios (set forth in the following table) of Total and Tier 1 capital (as defined by the regulations) to risk-weighted assets and of Tier 1 capital to average assets. Management believes, as of March 31, 2008, that First Financial met all capital adequacy requirements to which it was subject. At March 31, 2008, and December 31, 2007, the most recent regulatory notifications categorized First Financial as well-capitalized under the regulatory framework for prompt corrective action.

To be categorized as well-capitalized, First Financial must maintain minimum Total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. There have been no conditions or events since those notifications that management believes has changed the institution's category.

First Financial's Tier I capital is comprised of total shareholders' equity plus junior subordinated debentures, less unrealized gains and losses and any amounts resulting from the application of SFAS No. 158 Employers' Accounting for Defined Benefit Pension and other Postretirement Plans, that is recorded within accumulated other comprehensive income (loss), intangible assets, and any valuation related to mortgage servicing rights. Total risk-based capital consists of Tier I capital plus qualifying allowance for loan and lease losses and gross unrealized gains on equity securities.

For purposes of calculating the leverage ratio, average assets represents quarterly average assets less assets not qualifying for Total risk-based capital including intangibles and non-qualifying mortgage servicing rights and allowance for loan and lease losses.

Table of Contents

The following table illustrates the actual and required capital amounts and ratios as of March 31, 2008, and the year ended December 31, 2007 (dollars in \$000 s).

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2008						
Total capital to risk-weighted assets						
Consolidated	\$ 302,332	11.31%	\$ 213,779	8.00%	N/A	10.00%
First Financial Bank	340,943	12.82%	212,763	8.00%	\$ 265,954	10.00%
Tier 1 capital to risk-weighted assets						
Consolidated	272,614	10.20%	106,890	4.00%	N/A	6.00%

First Financial Bank	305,394	9.30%	131,121	4.00%	163,901	5.00%

CRITICAL ACCOUNTING POLICIES

The accounting and financial reporting policies of First Financial comply with U.S. generally accepted accounting principles and conform to general practices within the banking industry. These policies require estimates and assumptions. Changes in underlying factors, assumptions, or estimates in any of these areas could have a material impact on First Financial's future financial condition and results of operations.

In management's opinion, some of these areas have a more significant impact than others on First Financial's financial reporting. For First Financial, these areas currently include accounting for the allowance for loan and lease losses, pension costs, goodwill, and income taxes.

Allowance for loan and lease losses The level of the allowance for loan and lease losses (allowance) is based upon management's evaluation of the loan and lease portfolios, past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, and other pertinent factors. This evaluation is inherently subjective, as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Loans are charged off when management believes that ultimate collectibility of the loan is unlikely. Allocation of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, is deemed to be uncollectible.

Table of Contents

Management's determination of the adequacy of the allowance is based on an assessment of the inherent loss given the conditions at the time. The allowance is increased by provisions charged to expense and decreased by charge-offs, net of recoveries of amounts previously charged-off. The allowance for commercial loans, including time and demand notes, tax-exempt loans, commercial real estate, and commercial capital leases begins with a process of estimating the probable losses inherent in the portfolio. The estimates for these commercial loans are established by category and based on First Financial's internal system of credit risk ratings and historical loss data.

The estimate of losses inherent in the commercial portfolio may then be adjusted for management's estimate of probable losses on specific exposures as well as trends in delinquent and nonaccrual loans and other factors such as prevailing economic conditions, lending strategies, and other influencing factors. In the commercial portfolio, certain loans, typically larger-balance non-homogeneous exposures, may have a specific allowance established based on the borrower's overall financial condition, resources and payment record, support from guarantors, and the realizable value of any collateral.

The allowance for consumer loans which includes residential real estate, installment, home equity, credit card, consumer leasing, and overdrafts is established for each of the categories by estimating losses inherent in that particular category of consumer loans. The estimate of losses is primarily based on historical loss rates. Consumer loans are evaluated as an asset type within a category (i.e., residential real estate, installment, etc.), as these loans are smaller and more homogeneous.

Larger balance commercial and commercial real estate loans are impaired when, based on current information and events, it is probable that First Financial will be unable to collect all principal and interest amounts due according to the contractual terms of the loan agreement.

Loans that are impaired are recorded at the present value of expected future cash flows discounted at the loan's effective interest rate or if the loan is collateral dependent, impairment measurement is based on the fair value of the collateral. Income on impaired loans is recorded on the cash basis.

Pension First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees. The measurement of the accrued benefit liability and the annual pension expense involves actuarial and economic assumptions. The assumptions used in pension accounting relate to the discount rates, the expected return on plan assets, and the rate of compensation increase.

Goodwill and other intangible assets Goodwill and intangible assets deemed to have indefinite lives, if any, are not amortized, but are subject to annual impairment tests. Core deposit intangibles were amortized on a straight-line basis over their useful lives, none of which exceeded 10 years. Core deposit intangibles were fully amortized by the end of the first quarter of 2008.

Income taxes The calculation of First Financial's income tax provision is complex and requires the use of estimates and judgments in its determination. First Financial estimates income tax expense based on amounts expected to be owed to various tax jurisdictions. Accrued taxes represent the net estimated amount due or to be received from taxing jurisdictions either currently or in the future and are reported as a component of other assets or other liabilities in the Consolidated Balance Sheets. In estimating accrued taxes, First Financial assesses the appropriate tax treatment considering statutory, judicial, and regulatory guidance, including consideration of any reserve required for potential examination issues. Changes in the estimate of accrued taxes occur periodically due to changes in tax rates, interpretations of tax laws, the status of examinations being conducted by taxing authorities, and newly enacted statutory, judicial, and regulatory guidance. These changes, when they occur, affect accrued taxes and can be significant to the operating results of First Financial. The potential impact to First Financial's operating results for any of the changes cannot be reasonably estimated. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Table of Contents

First Financial and its subsidiaries file a consolidated federal income tax return. Each subsidiary provides for income taxes on a separate return basis, and remits to First Financial amounts determined to be currently payable.

ACCOUNTING AND REGULATORY MATTERS

Note 2 to the Consolidated Financial Statements discusses new accounting standards adopted by First Financial during 2008 and the expected impact of accounting standards recently issued but not yet required to be adopted. To the extent the adoption of new accounting standards materially affects financial condition, results of operations, or liquidity, the impacts are discussed in the applicable section(s) the Management's Discussion and Analysis and Notes to the Consolidated Financial Statements.

FORWARD LOOKING INFORMATION

Certain statements contained in this report that are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act (the Act). In addition, certain statements in future filings by First Financial with the Securities and Exchange Commission, in press releases, and in oral and written statements made by or with the approval of First Financial which are not statements of historical fact constitute forward-looking statements within the meaning of the Act.

Examples of forward-looking statements include, but are not limited to, projections of revenues, income or loss, earnings or loss per share, the payment or non-payment of dividends, capital structure and other financial items, statements of plans and objectives of First Financial or its management or board of directors, and statements of future economic performances and statements of assumptions underlying such statements. Words such as believes, anticipates, intends, and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those in such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to, management's ability to effectively execute its business plan; the risk that the strength of the United States economy in general and the strength of the local economies in which First Financial conducts operations may be different from expected, resulting in, among other things, a deterioration in credit quality or a reduced demand for credit, including the resultant effect on First Financial's loan portfolio and allowance for loan and lease losses; the effects of and changes in policies and laws of regulatory agencies; inflation, interest rates, market and monetary fluctuations; technological changes; mergers and acquisitions; the ability to increase market share and control expenses; the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as the Financial Accounting Standards Board and the Securities and Exchange Commission; the costs and effects of litigation and of unexpected or adverse outcomes in such litigation; and the success of First Financial at managing the risks involved in the foregoing.

In addition, please refer to our Annual Report on Form 10-K for the year ended December 31, 2007, as well as our other filings with the Commission, for a more detailed discussion of these risks and uncertainties and other factors. Such forward-looking statements speak only as of the date on which such statements are made, and First Financial undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, foreign exchange rates, and equity prices. The primary source of market risk for First Financial is interest rate risk. Interest rate risk arises in the normal course of business to the extent that there is a divergence between the amount of First Financial's interest earning assets and the amount of interest earning liabilities that are prepaid/withdrawn, re-price, or mature in specified periods. First Financial seeks to achieve consistent growth in net interest income and capital while managing volatility arising from shifts in market interest rates. The Asset and Liability Committee (ALCO) oversees market risk management, establishing risk measures, limits, and policy guidelines for managing the amount of interest-rate risk and its effect on net interest income and capital.

Interest-rate risk for First Financial's Consolidated Balance Sheets consists of repricing, option, and basis risks. Repricing risk results from differences in the maturity, or repricing, of interest-bearing assets and liabilities. Option risk in financial instruments arises from embedded options such as loan prepayments, early withdrawal of Certificates of Deposits, and calls on investments and debt instruments that are primarily driven by third party or client behavior. Basis risk refers to the potential for changes in the underlying relationship between market rates or indices, which subsequently result in a narrowing of the net interest margin. Basis risk is also present in managed rate liabilities, such as interest-bearing checking accounts and savings accounts, where historical pricing relationships to market rates may change due to the level or directional change in market interest rates, or competitive pressures.

The interest rate risk position is measured and monitored using income simulation models and economic value of equity sensitivity analysis that capture both short-term and long-term interest rate risk exposure. Income simulation involves forecasting net interest income under a variety of interest rate scenarios including instantaneous shocks. Presented below is the estimated impact on First Financial's net interest income as of March 31, 2008, assuming immediate, parallel shifts in interest rates:

	-200 basis points	-100 basis points	+100 basis points	+200 basis points
March 31, 2008	(10.39%)	(3.73%)	2.23%	4.47%

Modeling the sensitivity of net interest income to changes in market interest rates is highly dependent on numerous assumptions incorporated into the modeling process. Market based prepayment speeds are factored into the analysis for loan and securities portfolios. Rate sensitivity for transactional deposit accounts is modeled based on both historical experience and external industry studies.

Additional interest rate scenarios are modeled utilizing most-likely interest rates over the next twelve months. Based on this scenario, First Financial has a relatively neutral rate risk position of a negative 0.04% when compared to a base-case scenario with interest rates held constant.

First Financial uses economic value of equity sensitivity analysis to understand the impact of long-term cash flows, income, and capital. Economic value of equity is based on discounting the cash flows for all balance sheet instruments under different interest-rate scenarios. Deposit premiums are based on external industry studies and utilizing historical experience. Presented below is the change in First Financial's economic value of equity position as of March 31, 2008, assuming immediate, parallel shifts in interest rates:

	-200 basis points	-100 basis points	+100 basis points	+200 basis points
March 31, 2008	(23.27%)	(9.03%)	2.52%	2.99%

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rule 13a-15 of the Securities Exchange Act of 1934, that are designed to cause the material information required to be disclosed by First Financial in the reports it files or submits under the Securities Exchange Act of 1934 to be recorded, processed, summarized, and reported to the extent applicable within the time periods required by the Securities and Exchange Commission's rules and forms. In designing and evaluating the disclosure controls and procedures, management recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

As of the end of the period covered by this report, First Financial performed an evaluation under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

No changes were made to the Corporation's internal control over financial reporting (as defined in Rule 13a-15 under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Table of Contents**PART II-OTHER INFORMATION**

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table shows the total number of shares repurchased in the first quarter of 2008.

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans (2)	(d) Maximum Number of Shares that may yet be purchased Under the Plans
January 1 through January 31, 2008	3,160	\$ 10.33	0	4,969,105
February 1 through February 29, 2008	0	0	0	4,969,105
March 1 through March 31, 2008	0	0	0	4,969,105
Total	3,160	\$ 10.33	0	4,969,105

(1) The number of shares purchased in column (a) and the average price paid per share in column (b) include the purchase of shares other than through publicly announced plans. The shares purchased other than through publicly announced plans were purchased pursuant to First Financial's Thrift Plan, Director Fee Stock Plan, 1999 Stock Option Plan for

Non-Employee
Directors and
1999 Stock
Incentive Plan
for Officers and
Employees.

(The last two
plans are
referred to
hereafter as the
Stock Option
Plans.) The
following tables
show the
number of
shares
purchased
pursuant to
those plans and
the average
price paid per
share. The
purchases for
the Thrift Plan
and the Director
Fee Stock Plan
were made in
open-market
transactions.
Under the Stock
Option Plans,
shares were
purchased from
plan participants
at the then
current market
value in
satisfaction of
stock option
exercise prices.

Table of Contents

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share
First Financial Bancorp Thrift Plan		
January 1 through January 31, 2008	0	\$ 0.00
February 1 through February 29, 2008	0	0.00
March 1 through March 31, 2008	0	0.00
Total	0	\$ 0.00
Director Fee Stock Plan		
January 1 through January 31, 2008	3,160	\$ 10.33
February 1 through February 29, 2008	0	0.00
March 1 through March 31, 2008	0	0.00
Total	3,160	\$ 10.33
Stock Option Plans		
January 1 through January 31, 2008	0	\$ 0.00
February 1 through February 29, 2008	0	0.00
March 1 through March 31, 2008	0	0.00
Total	0	\$ 0.00

(2) First Financial has two publicly announced stock repurchase plans under which it is currently authorized to purchase shares of its common stock. Neither of the plans expired during this quarter. However, as of March 31, 2008, all shares under

the 2003 plan have been repurchased. The table that follows provides additional information regarding those plans.

Announcement Date	Total Shares Approved for Repurchase	Total Shares Repurchased Under the Plan	Expiration Date
1/25/2000	7,507,500	2,538,395	None
2/25/2003	2,243,715	2,243,715	Complete

Item 5. Other items

On April 28, 2008, the Compensation Committee approved the Long-Term Incentive Plan Grant Design and the Short-Term Incentive Plan Design. Copies of these designs are included as exhibits to this Form 10-Q. Awards were previously reported on a Form 8-K filed with the SEC on February 28, 2008.
