Vale obtains operating permit for railway terminal at the Ponta da Madeira

Rio de Janeiro, April 29, 2013 Vale S.A. (Vale) informs that it has been granted the operating license (LO) for the railway terminal at Ponta da Madeira (PDM) in the state of Maranhão, Brazil, issued by the state environmental authority. The railway terminal is part of the CLN 150 project.

The LO issued allows the operation of the new infrastructure, which encompasses loading yards, access line to car dumpers 5 and 6, passenger train rail loop and new facility buildings.

Vale had already been granted the LO for Pier IV of CLN 150, including onshore and offshore areas. The CLN 150 enables the expansion of the logistic capacity of Carajás to 150 million metric tons per year. Besides the construction of the railway terminal and Pier IV, CLN 150 also involves expansion of part of the Carajás railway (EFC).

This press release may include statements that present Vale's expectations about future events or results. All statements, when based upon expectations about the future and not on historical facts, involve various risks and uncertainties. Vale cannot guarantee that such statements will prove correct. These risks and uncertainties include factors related to the following: (a) the countries where we operate, especially Brazil and Canada; (b) the global economy; (c) the capital markets; (d) the mining and metals prices and their dependence on global industrial production, which is cyclical by nature; and (e) global competition in the markets in which Vale operates. To obtain further information on factors that may lead to results different from those forecast by Vale, please consult the reports Vale files with the U.S. Securities and Exchange Commission (SEC), the Brazilian Comissão de Valores Mobiliários (CVM), the French Autorité des Marchés Financiers (AMF), and The Stock Exchange of Hong Kong Limited, and in particular the factors discussed under "Forward-Looking Statements" and "Risk Factors" in Vale's annual report on Form 20-F.
