- (k) *Variable rate coupon, rate shown as of June 30, 2010.*
- (l) *This position or a portion of this position represents an unsettled loan purchase. At June 30, 2010, the market value and unrealized gain of these unsettled loan purchases amounted to \$1,242,450 and \$17,450, respectively. The coupon rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate ( LIBOR ) plus a premium which was determined at the time of purchase.*
- (m) *Non-income producing security.*
- (n) *One contract relates to 100 shares.*

- (o) Investment in affiliated money market mutual fund. The rate shown represents the 7-day yield as of period end.
- (p) As of June 30, 2010, the cost basis of investment securities owned was substantially identical for both book and tax purposes. Gross unrealized appreciation of investments was \$125,836,401 and gross unrealized depreciation of investments was \$(61,662,703), resulting in net unrealized appreciation of \$64,173,698.

The fund currently owns investments collateralized by subprime mortgage loans. Subprime loans are offered to homeowners who do not have a history of debt or who have had problems meeting their debt obligations. Because repayment is less certain, subprime borrowers pay a higher rate of interest than prime borrowers. As of June 30, 2010, the fund's total exposure to subprime investments was 2.21% of net assets. These investments are valued in accordance with the fund's Valuation Policies.

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The U.S GAAP disclosure requirements establish a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of June 30, 2010:
