HELEN OF TROY LIMITED AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
May 31, 2007

Note 1 - Basis of Presentation

In our opinion, the accompanying consolidated condensed financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly our consolidated financial position as of May 31, 2007 and February 28, 2007, and the results of our consolidated operations for the three month periods ended May 31, 2007 and 2006. The same accounting policies are followed in preparing quarterly financial data as are followed in preparing annual data.

Due to the seasonal nature of our business, quarterly revenues, expenses, earnings and cash flows are not necessarily indicative of the results that may be expected for the full fiscal year. While we believe that the disclosures presented are adequate and the consolidated condensed financial statements are not misleading, these statements should be read in conjunction with the consolidated financial statements and the notes included in our latest annual report on Form 10-K, and our other reports on file with the Securities and Exchange Commission ("SEC").

We have reclassified certain prior-period amounts, and in some cases provided additional information in our consolidated condensed financial statements and accompanying footnotes to conform to the current period's presentation. These reclassifications have no impact on previously reported net earnings.

In these consolidated condensed financial statements, accompanying footnotes, and elsewhere in this report, amounts shown are in thousands of U.S. Dollars, except as otherwise indicated.

Note 2 - New Accounting Pronouncements

New Accounting Standards Currently Adopted

Effects of Misstatements - In September 2006, the SEC issued Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" ("SAB 108"). SAB 108 provides guidance on how prior year misstatements should be taken into consideration when quantifying misstatements in current year financial statements for purposes of determining whether the current year's financial statements are materially misstated. SAB 108 permits registrants to record the cumulative effect of initial adoption by recording the necessary "correcting" adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings, only if material under the dual method. We were not required to record any adjustments upon the application of SAB 108.

Uncertainty in Income Taxes - In July 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation 48, "Accounting for Uncertainty in Income Taxes—An Interpretation of Statement of Financial Accounting Standards No. 109" ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements, and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. We adopted the provisions of FIN 48 at the beginning of the first quarter of fiscal 2008, and the details of our adoption of FIN 48 are described in Note 12.

New Accounting Standards Subject to Future Adoption

Liability Recognition on Endorsement Split-Dollar Life Insurance Arrangements - In June 2006, the EITF reached a consensus on EITF Issue No. 06-4 ("EITF 06-4"), "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements," which requires the application of the provisions of SFAS No. 106 ("SFAS 106"), "Employers' Accounting for Postretirement Benefits Other Than Pensions" to endorsement split-dollar life insurance arrangements. SFAS 106 would require us to recognize a liability for the discounted future benefit obligation that we will have to pay upon the death of the underlying insured employee. An endorsement-type arrangement generally exists when the Company owns and controls all incidents of ownership of the underlying policies. EITF 06-4 is currently effective for fiscal years beginning after December 15, 2007. We have certain life insurance policies which may be subject to the provisions of this new pronouncement and are currently determining the effect, if any, the adoption of EITF 06-4 will have on our financial statements.

Fair Value Measurements - In September 2006, the FASB issued SFAS 157 "Fair Value Measurements." This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this Statement does not require any new fair value measurements, but will potentially require additional disclosures regarding existing fair value measurements we currently report. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently determining the effect, if any, this pronouncement will have on our financial statements.

Fair Value Option for Financial Assets and Financial Liabilities - In February 2007, the FASB issued Statement of Financial Accounting Standards No.159 "The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115" ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 also established presentation and disclosure requirements designed to facilitate comparisons that choose different measurement attributes for similar types of assets and liabilities. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently determining the effect, if any, this pronouncement will have on our financial statements.

Liability Recognition on Collateral Assignment Split-Dollar Life Insurance Arrangements - In March 2007, the EITF reached a consensus on EITF Issue No. 06-10 ("EITF 06-10"), "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements," which provides guidance to help companies determine whether a liability for the postretirement benefit associated with a collateral assignment split-dollar life insurance arrangement should be recorded in accordance with either SFAS 106 (if, in substance, a postretirement benefit plan exists), or Accounting Principles Board Opinion No. 12 (if the arrangement is, in substance, an individual deferred compensation contract). EITF 06-10 also provides guidance on how a company should recognize and measure the asset in a collateral assignment split-dollar life insurance contract. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. We have certain life insurance policies which may be subject to the provisions of this new pronouncement and are currently determining the effect, if any, the adoption of EITF 06-10 will have on our financial statements.

From time to time, new accounting pronouncements are issued by the FASB or other standards setting bodies that we adopt as of the specified effective date. Unless otherwise discussed, we believe that the impact of recently issued standards that are not yet effective are either not applicable to the Company at this time, or will not have a material impact on our consolidated condensed financial statements upon adoption.

Note 3 - Litigation

Securities Class Action Litigation - Class action lawsuits have been filed and consolidated into one action against the Company, Gerald J. Rubin, the Company's Chairman of the Board, President and Chief Executive Officer, and Thomas J. Benson, the Company's Chief Financial Officer, on behalf of purchasers of publicly traded securities of the Company. The Company understands that the plaintiffs allege violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 as amended (the "Exchange Act"), and Rule 10b-5 thereunder, on the grounds that the Company and the two officers engaged in a scheme to defraud the Company's shareholders through the issuance of positive earnings guidance intended to artificially inflate the Company's share price so that Mr. Rubin could sell almost 400,000 of the Company's common shares at an inflated price. The plaintiffs are seeking unspecified damages, interest, fees, costs, an accounting of any alleged insider trading proceeds, and injunctive relief, including an accounting of and the imposition of a constructive trust and/or asset freeze on the defendants' alleged insider trading proceeds. The class period stated in the complaint was October 12, 2004 through October 10, 2005.

The lawsuit was brought in the United States District Court for the Western District of Texas. The Company intends to defend the foregoing lawsuit vigorously, but, because the lawsuit is still in the preliminary stages, the Company cannot predict the outcome and is not currently able to evaluate the likelihood of success or the range of potential loss, if any, that might be incurred in connection with the action. However, if the Company were to lose on any issues connected with the lawsuit or if the lawsuit is not settled on favorable terms, the judgement or settlement may have a material adverse effect on the Company's consolidated financial position, results of operations and cash flows. There is a risk that such litigation could result in substantial costs and divert management's attention and resources from its business, which could adversely affect the Company's business. The Company carries insurance that provides an aggregate coverage of \$20 million after a self-insured retention of \$500 thousand for the period during which the claims were filed, but cannot evaluate at this time whether such coverage will be adequate to cover losses, if any, arising out of the lawsuit.

On May 15, 2006, the Company filed a motion to dismiss the aforementioned lawsuit citing numerous deficiencies with the claims asserted in the lawsuit. On May 24, 2007, the motion to dismiss was denied. The discovery phase of the litigation is now underway.

Other Matters - We are involved in various other legal claims and proceedings in the normal course of operations. We believe the outcome of these matters will not have a material adverse effect on our consolidated financial position, results of operations, or liquidity.

Note 4 - Earnings per Share

Basic earnings per share is computed based upon the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed based upon the weighted average number of shares of common stock plus the effects of dilutive securities. The number of dilutive securities was 1,740,309 and 1,437,418 for the three month periods ended May 31, 2007 and 2006, respectively. All dilutive securities during these periods consisted of stock options issued under our stock option plans. There were options to purchase common shares that were outstanding but not included in the computation of earnings per share because the exercise prices of such options were greater than the average market prices of our common shares. These options totaled 284,379 and 908,580 at May 31, 2007 and 2006, respectively.

Note 5 - Segment Information

In the tables that follow, we present two segments: Personal Care and Housewares. Our Personal Care segment's products include hair dryers, straighteners, curling irons, hairsetters, women's shavers, mirrors, hot air brushes, home hair clippers and trimmers, paraffin baths, massage cushions, footbaths, body massagers, brushes, combs, hair accessories, liquid hair styling products, men's fragrances, men's deodorants, foot powder, body powder, and skin care products. Our Housewares segment reports the operations of OXO International ("OXO") whose products include kitchen tools, cutlery, bar and wine accessories, household cleaning tools, tea kettles, trash cans, storage and organization products, hand tools, gardening tools, kitchen mitts and trivets, barbeque tools, and rechargeable lighting products. We use outside manufacturers to produce our goods. Both our Personal Care and Housewares segments sell their products primarily through mass merchandisers, drug chains, warehouse clubs, catalogs, grocery stores and specialty stores. In addition, the Personal Care segment sells extensively through beauty supply retailers and wholesalers.

The accounting policies of our segments are the same as those described in the summary of significant accounting policies in Note 1 to the consolidated financial statements in our 2007 Annual Report on Form 10-K.

The following tables contain segment information for the periods covered by our consolidated condensed statements of income:

THREE MONTHS ENDED MAY 31, 2007 AND 2006*(in thousands)*

	Personal Care	Housewares	Total
May 31, 2007			
Net sales	\$ 106,812	\$ 33,358	\$ 140,170
Operating income	8,872	5,429	14,301
Capital, license, trademark and other intangible expenditures	314	797	1,111
Depreciation and amortization	2,368	1,156	3,524

	Personal Care	Housewares	Total
May 31, 2006			
Net sales	\$ 105,324	\$ 25,117	\$ 130,441
Operating income	6,192	4,724	10,916
Capital, license, trademark and other intangible expenditures	1,182	518	1,700
Depreciation and amortization	2,619	1,261	3,880

The following tables contain net assets allocable to each segment for the periods covered by our consolidated condensed balance sheets:

IDENTIFIABLE NET ASSETS AT MAY 31, 2007 AND FEBRUARY 28, 2007*(in thousands)*

	Personal Care	Housewares	Total
May 31, 2007	\$ 560,374	\$ 342,576	\$ 902,950
February 28, 2007	554,295	351,977	906,272

Operating income for each operating segment is computed based on net sales, less cost of goods sold and any selling, general, and administrative expenses ("SG&A") associated with the segment. The selling, general, and administrative

expenses used to compute each segment's operating income are comprised of SG&A directly associated with the segment, plus overhead expenses that are allocable to the operating segment.

-10-

During the first quarter of fiscal 2007, we completed the transition of our Housewares segment's operations to our internal operating systems and our new distribution facility in Southaven, Mississippi. In the last quarter of fiscal 2007, we completed the consolidation of our domestic appliance inventories into the same facility.

Throughout fiscal 2007, we conducted an evaluation of our shared cost allocation methodology given the structural and process changes that were taking place in our operations, and changed our methodology in the first quarter of fiscal 2008. We believe the new method better reflects the economics of our newly consolidated operations. The table below summarizes the expense allocations made to the Housewares segment for the three months ended May 31, 2007 compared to the same period in the previous year. Some of these expenses were previously absorbed by the Personal Care segment.

Housewares Segment Expense Allocation
(in thousands)

	Three Months Ended May 31,	
	2007	2006
Distribution and sourcing expense	\$ 2,854	\$ 1,427
Other operating and corporate overhead expense	1,326	998
Total allocated expenses	\$ 4,180	\$ 2,425
Expense allocation as a percentage of net sales:		
Distribution and sourcing expense	8.6%	5.7%
Other operating and corporate overhead expense	4.0%	4.0%
Total allocated expenses	12.5%	9.7%

Note 6 - Property and Equipment

A summary of property and equipment is as follows:

PROPERTY AND EQUIPMENT
(in thousands)

	Estimated Useful Lives (Years)	May 31, 2007	February 28, 2007
Land	-	\$ 9,537	\$ 9,537
Building and improvements	10 - 40	62,917	62,666
Computer and other equipment	3 - 10	41,388	41,265
Molds and tooling	1 - 3	7,281	6,538
Transportation equipment	3 - 5	3,957	3,912
Furniture and fixtures	5 - 15	8,005	7,815
Construction in process	-	211	261
		133,296	131,994
Less accumulated depreciation		(37,891)	(35,325)
Property and equipment, net		\$ 95,405	\$ 96,669

We recorded depreciation of \$2,566 and \$2,428 for the three month periods ended May 31, 2007 and 2006, respectively.

Note 7 - Intangible Assets

We do not record amortization expense on goodwill or other intangible assets that have indefinite useful lives. Amortization expense is recorded for intangible assets with definite useful lives. We also perform an annual impairment review of goodwill and other intangible assets. Any asset deemed to be impaired is to be written down to its fair value. We completed our annual impairment test during the first quarter of fiscal 2008, and have determined that none of our goodwill or other intangible assets were impaired at that time.

-11-

The following table discloses information regarding the carrying amounts and associated accumulated amortization for all intangible assets and indicates the operating segments to which they belong:

INTANGIBLE ASSETS*(in thousands)*

Type / Description	Segment	Estimated Life	May 31, 2007 Accumulated			February 28, 2007 Accumulated

February 2013	\$	2,190

NOTE 8 - Acquisitions And New Trademark License Agreements

Belson Products Acquisition - Effective May 1, 2007, we acquired certain assets and liabilities of Belson Products (“Belson”), the professional salon division of Applica Consumer Products, Inc. for a cash purchase price of \$36,500 plus the assumption of estimated liabilities. This transaction was accounted for as a purchase of a business and was paid for out of available cash on hand. Belson is a supplier of personal care products to the professional salon industry. Belson markets its professional products to major beauty suppliers and other major distributors under brand names including Belson®, Belson Pro®, Gold ‘N Hot®, Curlmaster®, Premiere®, Profiles®, Comare®, Mega Hot®, and Shear Technology®. Products include electrical hair care appliances, spa products and accessories, professional brushes and combs, and professional styling shears. Belson products are principally distributed throughout the United States, as well as Canada and the United Kingdom. We believe that Belson’s portfolio of professional salon products, in addition to our existing Helen of Troy professional products, will continue to strengthen our leadership position in the professional distribution channels.

Net assets acquired consist principally of accounts receivable, finished goods inventories, goodwill, patents, trademarks, tradenames, product design specifications, production know-how, certain fixed assets, distribution rights and customer lists, a covenant not-to-compete, less certain customer related operating accruals and liabilities. The following schedule presents the initial net assets of Belson acquired at closing:

Belson Products - Net Assets Acquired on May 1, 2007

(in thousands)

Accounts receivable, net	\$	7,449
Inventories		8,426
Fixed assets		139
Trademarks, goodwill and other intangible assets		22,381
Total assets acquired		38,395
Less: Current liabilities assumed		(1,895)
Net assets acquired	\$	36,500

We are in the process of completing our analysis of the economic lives of the assets acquired and appropriate allocation of the initial purchase price. Based on our preliminary analysis, we believe that a significant portion of the purchase price will be allocated to assets having indefinite economic lives. We expect to complete our analysis during fiscal 2008.

Bed Head® by TIGI and Toni&Guy® - On December 6, 2006, we entered into licensing arrangements with MBL/TIGI Products, L.P. and MBL/Toni&Guy Products L.P. for the use of the Bed Head® by TIGI and Toni&Guy® trademarks for personal care products in the Western Hemisphere. We plan on introducing a line of hair care appliance products under the Bed Head® by TIGI and Toni&Guy® brand names that eventually will include hair dryers, hair styling irons and straighteners, hot air brushes, hair setters, combs, brushes and hair care accessories, as well as a variety of other personal care products. We have begun marketing in the United States, and plan to market in the remainder of the Western Hemisphere. Initial domestic product shipments began during the first fiscal quarter of 2008.

Candela® Acquisition - On September 25, 2006, we acquired all rights to trademarks, certain patents, formulas, tooling and production processes to Vessel, Inc.'s rechargeable lighting products under various brand names, including Candela®. The products will be sold by our Housewares segment. We believe the acquired trademarks have indefinite economic lives. The following schedule presents the assets acquired at closing and management's purchase price allocation:

Assets Acquired from Vessel, Inc.

(in thousands)

Trademarks	\$	354
Patents		120
Fixed Assets		26
Total assets acquired	\$	500

Note 9 - Short Term Debt

We entered into a five year Revolving Credit Agreement ("Revolving Line of Credit Agreement"), dated as of June 1, 2004, with Bank of America, N.A. and other lenders. Borrowings under the Revolving Line of Credit Agreement accrue interest equal to the higher of the Federal Funds Rate plus 0.50 percent or Bank of America's prime rate. Alternatively, upon timely election by the Company, borrowings accrue interest based on the respective 1, 2, 3, or 6-month LIBOR rate plus a margin of 0.75 percent to 1.25 percent based upon the "Leverage Ratio" at the time of the borrowing. The "Leverage Ratio" is defined by the Revolving Line of Credit Agreement as the ratio of total consolidated indebtedness, including the subject funding on such date to consolidated earnings before interest, taxes, depreciation and amortization ("EBITDA") for the period of the four consecutive fiscal quarters most recently ended. The credit line allows for the issuance of letters of credit up to \$10,000. We incur loan commitment fees at a current rate of 0.30 percent per annum on the unused balance of the Revolving Line of Credit Agreement and letter of credit fees at a current rate of 1.125 percent per annum on the face value of the letter of credit. On June 7, 2007, we gave notice to permanently reduce our Revolving Line of Credit Agreement from \$75,000 to \$50,000. Outstanding letters of credit reduce the borrowing limit dollar for dollar. During fiscal 2007, we did not draw on the Revolving Line of Credit. As of May 31, 2007, there were no revolving loans and \$1,260 of open letters of credit outstanding against this facility.

The Revolving Line of Credit Agreement requires the maintenance of certain debt/EBITDA, fixed charge coverage ratios, and other customary covenants. Certain covenants, as of the latest balance sheet date, limit our total outstanding indebtedness from all sources to no more than 3.5 times the latest twelve months' trailing EBITDA. These covenants effectively limited our ability to incur no more than \$66,923 of additional debt from all sources, including draws on our Revolving Line of Credit Agreement. The agreement is unconditionally guaranteed, on a joint and several basis, by the parent company, Helen of Troy Limited, and certain subsidiaries. Any amounts outstanding under the Revolving Line of Credit Agreement will mature on June 1, 2009. As of May 31, 2007, we were in compliance with the terms of this agreement.

Note 10 - Accrued Expenses and Current Liabilities

A summary of accrued expenses was as follows:

ACCRUED EXPENSES AND CURRENT LIABILITIES

(in thousands)

	May 31, 2007	February 28, 2007
Accrued discounts and allowances	\$ 22,573	\$ 25,054
Accrued compensation	3,632	8,889

Edgar Filing: HELEN OF TROY LTD - Form 10-Q

Accrued advertising	9,145	9,269
Accrued interest	2,917	2,833
Accrued royalties	1,214	2,549
Accrued professional fees	1,430	1,218
Accrued benefits and payroll taxes	1,388	1,438
Accrued freight	1,297	1,390
Accrued property, sales and other taxes	1,351	831
Foreign currency contracts	789	616
Interest rate swaps	-	1,501
Other	7,204	6,796
Total Accrued Expenses and Current Liabilities	\$ 52,940	\$ 62,384

Note 11 - Product Warranties

The Company's products are under warranty against defects in material and workmanship for a maximum of two years. We have established accruals to cover future warranty costs of approximately \$5,856 and \$6,450 as of May 31, 2007 and February 28, 2007, respectively. We estimate our warranty accrual using historical trends, which we believe are the most reliable method by which we can estimate our warranty liability.

The following table summarizes the activity in the Company's accrual for the three month period ended May 31, 2007 and fiscal year ended February 28, 2007:

ACCRUAL FOR WARRANTY RETURNS

(in thousands)

	May 31, 2007 (Three Months)	February 28, 2007 (Year)
Balance at the beginning of the period	\$ 6,450	\$ 7,373
Additions to the accrual	5,607	18,080
Reductions of the accrual - payments and credits issued	(6,201)	(19,003)
Balance at the end of the period	\$ 5,856	\$ 6,450

Note 12 - Income Taxes

Hong Kong Income Taxes - On May 10, 2006, the Inland Revenue Department (the "IRD") of Hong Kong and the Company reached a settlement regarding tax liabilities for the fiscal years 1995 through 1997. This agreement was subsequently approved by the IRD's Board of Review. For those tax years, we agreed to an assessment of approximately \$4,019 including estimated penalties and interest. Our consolidated financial statements at May 31, 2006 and February 28, 2006 included adequate provisions for this liability. As a result of this tax settlement, in the first quarter of fiscal 2007, we reversed \$192 of tax provision previously established and recorded \$279 of associated interest. During the second quarter of fiscal 2007, the liability was paid with \$3,282 of tax reserve certificates and the balance in cash.

For the fiscal years 1998 through 2003, the IRD has assessed a total of \$25,461 (U.S.) in tax on certain profits of our foreign subsidiaries. Hong Kong is seeking to levy taxes on income earned from certain activities previously conducted in Hong Kong. Negotiations with the IRD regarding these issues and their settlement are ongoing, and it is unclear at this time when they will be resolved.

In connection with the IRD's tax assessment for the fiscal years 1998 through 2003, we have purchased tax reserve certificates in Hong Kong totaling \$25,144. Tax reserve certificates represent the prepayment by a taxpayer of potential tax liabilities. The amounts paid for tax reserve certificates are refundable in the event that the value of the tax reserve certificates exceeds the related tax liability. These certificates are denominated in Hong Kong dollars and are subject to the risks associated with foreign currency fluctuations.

If the IRD were to successfully assert the same position for fiscal years after fiscal year 2003, the resulting assessment could total \$18,673 (U.S.) in taxes for fiscal years 2004 and 2005. Although the final resolution of the proposed adjustments is uncertain and involves unsettled areas of the law, based on currently available information, we have provided for our best estimate of the total probable tax liability for this matter. While the resolution of the issue may result in tax liabilities that are significantly higher or lower than the reserves established for this matter, management currently believes that the resolution will not have a material effect on our consolidated financial position or liquidity. However, an unfavorable resolution could have a material effect on our consolidated results of operations or cash flows in the quarter in which an adjustment is recorded or the tax is due or paid.

Effective March 2005, we had concluded the conduct of all operating activities in Hong Kong that we believe were the basis of the IRD's assessments. Over the course of the prior year, the Company had moved these activities to China and Macao. The Company established a Macao offshore company ("MOC") and began operating from Macao in the third quarter of fiscal 2005. As a MOC, we have been granted an indefinite tax holiday and currently pay no taxes.

United States Income Taxes - The IRS is auditing our U.S. consolidated federal tax returns for fiscal years 2003 and 2004 and has provided notice of proposed adjustments of \$5,953 to taxes for the years under audit. The Company is vigorously contesting these adjustments. Although the ultimate outcome of the dispute with the IRS cannot be predicted with certainty, management is of the opinion that adequate provisions for taxes in those years have been made in our consolidated financial statements.

The IRS recently began an examination of the U.S. consolidated federal tax return for fiscal year 2005. The audit is in the preliminary stages and, to date, no adjustments have been proposed.

Income Tax Provisions - We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments must be used in the calculation of certain tax assets and liabilities because of differences in the timing of recognition of revenue and expense for tax and financial statement purposes. We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. As changes occur in our assessments regarding our ability to recover our deferred tax assets, our tax provision is increased in any period in which we determine that the recovery is not probable.

In 1994, we engaged in a corporate restructuring that, among other things, resulted in a greater portion of our income not being subject to taxation in the United States. If such income were subject to U.S. federal income taxes, our effective income tax rate would increase materially. The American Jobs Creation Act of 2004 (the "AJCA"), included an anti-inversion provision that denies certain tax benefits to companies that have reincorporated outside the United States after March 4, 2003. We completed our reincorporation in 1994; therefore, our transaction is grandfathered by the AJCA, and we expect to continue to benefit from our current structure.

In addition to future changes in tax laws, our position on various tax matters may be challenged. Our ability to maintain our position that the parent company is not a Controlled Foreign Corporation (as defined under the U.S. Internal Revenue Code) is critical to the tax treatment of our non-U.S. earnings. A Controlled Foreign Corporation is a non-U.S. corporation whose largest U.S. shareholders (i.e., those owning 10 percent or more of its shares) together own more than 50 percent of the shares in such corporation. If a change of ownership were to occur such that the parent company became a Controlled Foreign Corporation, such a change could have a material negative effect on the largest U.S. shareholders and, in turn, on our business.

Uncertainty in Income Taxes - The calculation of our tax liabilities involves dealing with uncertainties in the application of other complex tax regulations. We recognize liabilities for anticipated tax audit issues in the United States and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts are not probable, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer probable. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

Effective March 1, 2007, we adopted FIN 48, which provides guidance for the recognition, derecognition and measurement in financial statements of tax positions taken in previously filed tax returns or tax positions expected to be taken in tax returns. FIN 48 requires an entity to recognize the financial statement impact of a tax position when it is more likely than not that the position will be sustained upon examination. If the tax position meets the more-likely-than-not recognition threshold, the tax effect is recognized at the largest amount of the benefit that has greater than a fifty percent likelihood of being realized upon ultimate settlement. FIN 48 also provides guidance for classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 requires that a liability created for unrecognized tax benefits shall be presented as a liability and not combined with deferred tax liabilities or assets.

Upon adopting FIN 48, we recorded a \$12,055 increase in the liability for unrecognized tax benefits (including interest and penalties), and corresponding reductions to retained earnings and additional paid-in-capital in the amounts of \$5,911 and \$6,144, respectively. Amounts charged against additional paid-in-capital related to the tax effect of stock compensation expense that was originally recorded as an increase to paid-in-capital.

Upon adoption of FIN 48, we had approximately \$39,387 of total gross unrecognized tax benefits, of which \$32,913 would impact the effective tax rate, if recognized. With the adoption of FIN 48, we recognize interest and penalties accrued related to unrecognized tax benefits in the provision for income taxes. Included in our total gross unrecognized tax benefits we had approximately \$4,783 accrued for penalties and \$307 accrued for interest, net of tax benefits. We file income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. As of March 1, 2007, tax years under examination or still subject to examination by major tax jurisdictions, for our most significant subsidiaries were as follows:

Jurisdiction	Examinations in Process	Open Years
Hong Kong	1998- 2003	2004 - 2007
Mexico	- None -	2003 - 2007
United Kingdom	2005	2006 - 2007
United States	2003- 2005	2006 - 2007

We anticipate that it is reasonably possible that the total amount of unrecognized tax benefits may materially change by the end of fiscal 2008 due to issues pending settlement with the IRS. Depending on the outcome of the settlement negotiations, estimates including accrued penalties and interest, net of tax benefits where applicable, range from a \$7,600 decrease to a \$11,600 increase in unrecognized tax benefits.

Note 13 - Long Term-Debt

A summary of long-term debt was as follows:

LONG TERM DEBT

(in thousands)

	Range of Interest Rates						
	Original Date Borrowed	Quarter Ended May 31, 2007	Fiscal 2007	Latest Rate Payable	Matures	May 31, 2007	February 28, 2007
\$40,000 unsecured Senior Note Payable at a fixed interest rate of 7.01%. Interest payable quarterly, principal of \$10,000 payable annually beginning on January 2005.	01/96	7.01%	7.01%	7.01%	01/08	\$ 10,000	\$ 10,000
\$15,000 unsecured Senior Note Payable at a fixed interest rate of 7.24%. Interest payable quarterly, principal of \$3,000 payable annually beginning on July 2008.	07/97	7.24%	7.24%	7.24%	07/12	15,000	15,000
\$100,000 unsecured floating interest rate 5 Year Senior Notes. Interest set and payable quarterly at three-month LIBOR plus 85 basis points. Principal is due at maturity. Notes can be prepaid without penalty. (1)	06/04	5.89%	5.37% to 6.35%	5.89%	06/09	100,000	100,000
\$50,000 unsecured floating interest rate 7 Year Senior Notes. Interest set and payable quarterly at three-month LIBOR plus 85 basis points. Principal is due at maturity. Notes can be prepaid without penalty. (1)	06/04	5.89%	5.37% to 6.35%	5.89%	06/11	50,000	50,000

\$75,000 unsecured floating interest rate 10 Year Senior Notes. Interest set and payable quarterly at three-month LIBOR plus 90 basis points. Principal is due at maturity. Notes can be prepaid without penalty. (1)	06/04	6.01%	5.42% to 6.40%	6.01%	06/14	75,000	75,000
						250,000	250,000
Less current portion of long-term debt						(10,000)	(10,000)
Long-term debt, less current portion						\$ 240,000	\$ 240,000

(1) Floating interest rates have been hedged with interest rate swaps to effectively fix interest rates as discussed later in this note.

On September 28, 2006, we entered into interest rate hedge agreements in conjunction with our outstanding unsecured floating interest rate \$100,000, 5 year; \$50,000, 7 year; and \$75,000, 10 year Senior Notes (the “swaps”). The swaps are a hedge of the variable LIBOR rates used to reset the floating rates on the Senior Notes.

The swaps effectively fix the interest rates on the 5, 7 and 10 Year Senior Notes at 5.89, 5.89 and 6.01 percent, respectively, beginning September 29, 2006. Under our swaps, we agree with other parties to exchange quarterly the difference between fixed-rate and floating-rate interest amounts calculated by reference to notional amounts that perfectly match our underlying debt. Under these swap agreements, we pay the fixed rates and receive the floating rates. The swaps settle quarterly and terminate upon maturity of the related debt. The swaps are considered cash flow hedges because they are intended to hedge, and are effective as a hedge, against variable cash flows.

All of our long-term debt is unconditionally guaranteed by either the parent company, Helen of Troy Limited, and/or certain subsidiaries on a joint and several basis and has customary covenants covering Debt/EBITDA ratios, fixed charge coverage ratios, consolidated net worth levels, and other financial requirements. Certain covenants as of the latest balance sheet date, limit our total outstanding indebtedness from all sources to no more than 3.5 times the latest twelve months trailing EBITDA. These covenants effectively limited our ability to incur no more than \$66,923 of additional debt from all sources, including draws on our Revolving Line of Credit Agreement. Additionally, our debt agreements restrict us from incurring liens on any of our properties, except under certain conditions. As of May 31, 2007, we are in compliance with all the terms of these agreements.

The following table contains a summary of the components of our interest expense for the periods covered by our consolidated condensed statements of income:

INTEREST EXPENSE

(in thousands)

	Three Months Ended May 31,	
	2007	2006
Interest and commitment fees	\$ 4,098	\$ 4,317
Deferred finance costs	182	189
Interest rate swap settlements	(167)	-
Total interest expense	\$ 4,113	\$ 4,506

Note 14 - Contractual Obligations

Our contractual obligations and commercial commitments, as of May 31, 2007 were:

PAYMENTS DUE BY PERIOD - TWELVE MONTHS ENDED MAY 31:

(in thousands)

	Total	2008 1 year	2009 2 years	2010 3 years	2011 4 years	2012 5 years	After 5 years
Term debt - fixed rate	\$ 25,000	\$ 10,000	\$ 3,000	\$ 3,000	\$ 3,000	\$ 3,000	\$ 3,000
Term debt - floating rate (1) (2)	225,000	-	-	100,000	-	50,000	75,000
Long-term incentive plan payouts	2,614	1,611	843	160	-	-	-
Interest on floating rate debt (1)	56,226	13,343	13,343	7,943	7,453	4,753	9,391
Interest on fixed rate debt	3,861	1,553	896	679	462	244	27
Open purchase orders	80,096	80,096	-	-	-	-	-
Minimum royalty payments	69,713	2,636	6,840	8,393	8,110	7,800	35,934
Advertising and promotional	72,921	9,237	5,797	7,542	7,199	7,366	35,780
Operating leases	11,692	1,915	1,170	1,236	928	943	5,500
Open letters of credit pending settlement	1,063	1,063	-	-	-	-	-
Other	250	250	-	-	-	-	-
Total contractual obligations	\$ 548,436	\$ 121,704	\$ 31,889	\$ 128,953	\$ 27,152	\$ 74,106	\$ 164,632

(1) The future obligation for interest on our variable rate debt has historically been estimated assuming the rates in effect as of the end of the latest fiscal quarter on which we are reporting. As mentioned above in Note 13, on September 28, 2006, the Company entered into interest rate hedge agreements in conjunction with its outstanding unsecured floating interest rate \$100,000, 5 year; \$50,000, 7 year; and \$75,000, 10 year Senior Notes (the “swaps”). The swaps are a hedge of the variable LIBOR rates used to reset the floating rates on the Senior Notes. The swaps effectively fix the interest rates on the 5, 7 and 10 year Senior Notes at 5.89, 5.89 and 6.01 percent, respectively, beginning September 29, 2006. Accordingly, the future interest obligations related to this debt has been estimated using these rates. On June 8, 2007, we amended our interest rate swap agreement, concurrent with a notice to prepay \$25,000 of our \$100,000 5 year floating rate Senior notes, reducing the notional amount of the swap contracts from \$100,000 to \$75,000, and recording a gain of \$163 upon the liquidation of our position in \$25,000 of swaps. The gain will be recorded as a component of “Interest expense” for the fiscal quarter ending August 31, 2007. The remaining interest rate swaps are considered highly effective and will continue to be accounted for as cash flow hedges.

(2) On June 8, 2007, we gave notice to prepay \$25,000 of our \$100,000, 5 year floating rate Senior Notes without penalty. This prepayment was made on June 29, 2007. The amount prepaid will reduce the amount due in June 2009 from \$100,000 to \$75,000.

We lease certain facilities, equipment and vehicles under operating leases, which expire at various dates through fiscal 2017. Certain of the leases contain escalation clauses and renewal or purchase options.

Rent expense related to our operating leases was \$675 and \$1,073 for the three month periods ended May 31, 2007 and 2006, respectively.

Note 15 - Foreign Currency Contracts and Interest Rate Swaps

Our functional currency is the U.S. Dollar. By operating internationally, we are subject to foreign currency risk from transactions denominated in currencies other than the U.S. Dollar ("foreign currencies"). Such transactions include sales, certain inventory purchases and operating expenses. As a result of such transactions, portions of our cash, trade accounts receivable, and trade accounts payable are denominated in foreign currencies. During the three month periods ended May 31, 2007 and 2006, we transacted approximately 15 percent of our net sales in foreign currencies. These sales were primarily denominated in the British Pound, the Euro, the Canadian Dollar, the Brazilian Real and the Mexican Peso. We make most of our inventory purchases from the Far East and use the U.S. Dollar for such purchases.

We identify foreign currency risk by regularly monitoring our foreign currency-denominated transactions and balances. Where operating conditions permit, we reduce foreign currency risk by purchasing most of our inventory with U.S. Dollars and by converting cash balances denominated in foreign currencies to U.S. Dollars.

We also hedge against foreign currency exchange rate-risk by using a series of forward contracts designated as cash flow hedges to protect against the foreign currency exchange risk inherent in our forecasted transactions denominated in currencies other than the U.S. Dollar. In these transactions, we execute a forward currency contract that will settle at the end of a forecasted period. Because the size and terms of the forward contract are designed so that its fair market value will move in the opposite direction and approximate magnitude of the underlying foreign currency's forecasted exchange gain or loss during the forecasted period, a hedging relationship is created. To the extent we forecast the expected foreign currency cash flows from the period the forward contract is entered into until the date it will settle with reasonable accuracy, we significantly lower or materially eliminate a particular currency's exchange risk exposure over the life of the related forward contract.

For transactions designated as foreign currency cash flow hedges, the effective portion of the change in the fair value (arising from the change in the spot rates from period to period) is deferred in other comprehensive income. These amounts are subsequently recognized in "Selling, general, and administrative expense" in the consolidated statements of income in the same period as the forecasted transactions close out over the remaining balance of their terms. The ineffective portion of the change in fair value (arising from the change in the difference between the spot rate and the forward rate) is recognized in the period it occurred. These amounts are also recognized in "Selling, general, and administrative expense" in the consolidated statements of income. We do not enter into any forward exchange contracts or similar instruments for trading or other speculative purposes.

During the third quarter of fiscal 2007, we decided to manage our floating rate debt using interest rate swaps (the "swaps"). We entered into three interest rate swaps that converted an aggregate notional principal of \$225,000 from floating interest rate payments under our 5, 7 and 10 year Senior Notes to fixed interest rate payments ranging from 5.89 to 6.01 percent. In these transactions, we executed three contracts to pay fixed rates of interest on an aggregate notional principal amount of \$225,000 at rates ranging from 5.04 to 5.11 percent while simultaneously receiving floating rate interest payments set at 5.35 percent as of May 31, 2007 on the same notional amount. The fixed rate side

of the swap will not change over the life of the swap. The floating rate payments are reset quarterly based on three month LIBOR. The resets are concurrent with the interest payments made on the underlying debt. These swaps are used to reduce the Company's risk of the possibility of increased interest costs; however, should interest rates drop significantly, we could also lose the benefit that floating rate debt can provide in a declining interest rate environment.

-21-

The swaps are considered highly effective. Unrealized gains and losses related to the swaps, net of related tax effects are reported as a component of "Accumulated other comprehensive income" and will not be reclassified into earnings until the conclusion of the hedge. A partial net settlement occurs quarterly concurrent with interest payments made on the underlying debt. The settlement is the net difference between the fixed rates payable and the floating rates receivable over the quarter under the swap contracts. The settlement is recognized as a component of "Interest expense" in the consolidated statements of income.

The following table summarizes the various foreign currency contracts and interest rate swap contracts we designated as cash flow hedges that were open at May 31, 2007 and February 28, 2007:

CASH FLOW HEDGES**May 31, 2007**

The Company is exposed to credit risk in the event of non-performance by the other party (a large financial institution) to its current existing forward and swap contracts. However, the Company does not anticipate non-performance by the other party.

Note 16 - Repurchase of Helen of Troy Shares

During the quarter ended August 31, 2003, our Board of Directors approved a resolution authorizing the purchase, in open market or through private transactions, of up to 3,000,000 common shares over an initial period extending through May 31, 2006. On April 25, 2006, our Board of Directors approved a resolution to extend the existing plan to May 31, 2009. During the fiscal quarters ended May 31, 2007 and 2006, respectively, we did not repurchase any common shares. From September 1, 2003 through May 31, 2007, we have repurchased 1,563,836 shares at a total cost of \$45,612, or an average price per share of \$29.17. An additional 1,436,164 shares remain authorized for purchase under this plan.

Note 17 - *Share-Based Compensation Plans*

The Company has equity awards outstanding under four share-based compensation plans. The plans consist of two employee stock option and restricted stock plans, a non-employee director stock option plan, and an employee stock purchase plan. The plans are generally administered by the Compensation Committee of the Board of Directors, consisting of non-employee directors.

Under stock option and restricted stock plans adopted in 1994 and 1998, as amended (the "1994 Plan" and the "1998 Plan," respectively), we have reserved a total of 14,750,000 common shares for issuance to key officers and employees. Under these plans, we grant options to purchase our common shares at a price equal to or greater than the fair market value on the grant date. Both plans contain provisions for incentive stock options, non-qualified stock options and restricted share grants. Generally, options granted under the 1994 Plan and the 1998 Plan become exercisable immediately or over one-, four-, or five-year vesting periods and expire on dates ranging from seven to ten years from the date of grant. As of May 31, 2007, 238,786 shares remained available for issue under the 1998 plan and options for 6,685,808 common shares were outstanding under these plans. The 1998 Plan will terminate in August of 2008.

Under a stock option plan for non-employee directors (the "Directors' Plan") adopted in fiscal 1996, we reserved a total of 980,000 of our common shares for issuance to non-employee members of the Board of Directors. We granted options under the Directors' Plan at a price equal to the fair market value of our common shares at the date of grant. Options granted under the Directors' Plan vest one year from the date of issuance and expire ten years after issuance. The Directors' Plan expired by its terms on June 6, 2005. As of May 31, 2007, options for 260,000 common shares were outstanding under this plan.

Under an employee stock purchase plan (the "Stock Purchase Plan"), we have reserved a total of 500,000 common shares for issuance to our employees, nearly all of whom are eligible to participate. Under the terms of the Stock Purchase Plan, employees authorize the withholding of up to 15 percent of their wages or salaries to purchase our common shares. The purchase price for shares acquired under the Stock Purchase Plan is equal to the lower of 85 percent of the share's fair market value on either the first day of each option period or the last day of each period. No shares were issued during the fiscal quarter ended May 31, 2007, and as of that date, 307,386 shares remained available for future issue under the plan. The Stock Purchase Plan will terminate in July of 2008.

The Company recorded stock-based compensation expense in selling, general and administrative expense for the three months ended May 31, 2007 and 2006, respectively, as follows:

SHARE BASED PAYMENT EXPENSE

(in thousands, except per share data)

	Three Months Ended May 31,	
	2007	2006
Stock options	\$ 190	\$ 187
Employee stock purchase plan	-	-
Share-based payment expense	\$ 190	\$ 187
Share-based payment expense, net of income tax benefits of \$51 and \$40 for the three months ended May 31, 2007 and 2006, respectively.		
	\$ 139	\$ 147
Earnings per share impact of share based payment expense:		
Basic	\$ 0.00	\$ 0.00
Diluted	\$ 0.00	\$ 0.00

The fair value of all share-based payment awards are estimated using the Black-Scholes option pricing model with the following assumptions and weighted average fair values for the three month periods ended May 31, 2007 and 2006:

FAIR VALUE OF AWARDS AND ASSUMPTIONS USED

	Three Months Ended May 31,	
	2007	2006
Weighted average fair value of grants (in dollars)	\$ 9.23	\$ 8.22
Risk free interest rate	4.65%	4.32%
Dividend yield	0.00%	0.00%
Expected volatility	37.21%	40.21%
Weighted average expected life (in years)	3.89	4.32

The following describes how certain assumptions affecting the estimated fair value of options or discounted employee share purchases ("share based payments") are determined. The risk-free interest rate is based on U.S. Treasury securities with maturities equal to the expected life of the share based payments. The dividend yield is computed as zero because the Company has not historically paid dividends nor does it expect to at this time. Expected volatility is based on a weighted average of the market implied volatility and historical volatility over the expected life of the underlying share based payments. The Company uses its historical experience to estimate the expected life of each stock-option grant and also to estimate the impact of exercise, forfeitures, termination and holding period behavior for fair value expensing purposes.

Employee share purchases vest immediately at the time of purchase. Accordingly, the fair value award associated with their discounted purchase price is expensed at the time of purchase.

A summary of option activity as of May 31, 2007, and changes during the three months then ended is as follows:

SUMMARY OF STOCK OPTION ACTIVITY

(in thousands, except contractual term and per share data)

	Options	Weighted Average Exercise Price	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding at February 28, 2007	6,751	\$ 15.01	\$ 5.57	3.87	\$ 56,211
Granted	245	26.14			
Exercised	(42)	(18.23)			336
Forfeited / expired	(8)	(16.10)			
Outstanding at May 31, 2007	6,946	\$ 15.39	\$ 5.70	3.78	\$ 83,162
Exerciseable at May 31, 2007	6,378	\$ 14.75	\$ 5.47	3.41	\$ 80,439

A summary of non-vested option activity as of May 31, 2007, and changes during the three month period then ended is as follows:

NON-VESTED STOCK OPTION ACTIVITY

(in thousands, except per share data)

	Non-Vested Options	Weighted Average Grant Date Fair Value
Outstanding at February 28, 2007	344	\$ 7.41
Granted	245	9.23
Vested or forfeited	(21)	(5.04)
Outstanding at May 31, 2007	568	\$ 8.28

A summary of the Company's total unrecognized share-based compensation cost as of May 31, 2007 is as follows:

UNRECOGNIZED SHARE BASED COMPENSATION EXPENSE

(in thousands, except weighted average expense period data)

	Unearned Compensation	Weighted Average Remaining Period of Expense Recognition (in months)
Stock options	\$ 3,794	49.5

Note 18 - *Prepayment of Debt, Reduction of Revolving Line of Credit Commitment and Associated Transactions*

On June 8, 2007, we gave notice to prepay \$25,000 of our \$100,000, 5 year floating rate Senior Notes without penalty. This prepayment was made on June 29, 2007. On June 8, concurrent with the notice to prepay, we amended a related interest rate swap agreement, reducing the notional amount of the swap contracts from \$100,000 to \$75,000, and recording a gain of \$163 upon the liquidation of our position in \$25,000 of swaps. The gain will be recorded as a component of "Interest expense" for the fiscal quarter ending August 31, 2007. The remaining interest rate swaps are considered highly effective and will continue to be accounted for as cash flow hedges.

Also, on June 7, 2007, based upon a review of our expected cash flows, we gave notice to permanently reduce our Revolving Line of Credit Agreement commitment by \$25,000 to \$50,000. The reduction of the commitment will result in a proportionate decline in the future cost of associated commitment fees under the facility.

In connection with the prepayment of debt and the reduction of our Revolving Line of Credit, we will write off \$282 in associated unamortized deferred finance fees. This expense will be recorded as a component of "Interest expense" for the fiscal quarter ending August 31, 2007.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
2. OF OPERATIONS

This discussion contains a number of forward-looking statements, all of which are based on current expectations. Actual results may differ materially due to a number of factors, including those discussed in Part I, Item 3. "Quantitative and Qualitative Disclosures about Market Risk", "Information Regarding Forward Looking Statements", Part II, Item 1A, "Risk Factors" and in the Company's most recent Annual Report on Form 10-K. This discussion should be read in conjunction with our consolidated condensed financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q for the fiscal quarter ended May 31, 2007.

OVERVIEW OF THE QUARTER'S ACTIVITIES:

Our first fiscal quarter of each year is our seasonal low point in terms of overall activity, with sales tending to average approximately 20 percent of the year's total on a historical basis. Our second fiscal quarter is normally characterized by stable sales between June and the first half of July with increasing sales in the second half of July through August as we build towards a peak shipping season in the third quarter.

We evaluate opportunities to grow our business and brand portfolio by acquiring well-recognized brands from larger consumer products companies, as well as other brands from smaller private companies. Historically, the brands we have purchased from larger consumer products companies have a track record of support and brand development. We believe that at the time we acquired them they were considered "non-core" by their previous owners and did not benefit from focused management or strong marketing support. When we acquire brands from smaller private companies, we usually do so because we believe they have been constrained by the limited resources of their prior owners. After acquiring a brand, we seek to increase its sales, market share and distribution in both existing and new channels. We pursue this growth through increased spending on advertising and promotion, new marketing strategies, improved packaging and formulations, and innovative new products.

Effective May 1, 2007, we acquired certain assets and liabilities of Belson Products ("Belson"), the professional salon division of Applica Consumer Products, Inc. for a cash purchase price of \$36,500 plus the assumption of certain liabilities. This transaction was accounted for as a purchase of business and was paid for out of available cash on hand. Belson is a supplier of personal care products to the professional salon industry. Belson markets its professional products to major beauty suppliers and other major distributors under brand names, including Belson®, Belson Pro®, Gold 'N Hot®, Curlmaster®, Premiere®, Profiles®, Comare®, Mega Hot®, and Shear Technology®. Products include electrical hair care appliances, spa products and accessories, professional brushes and combs, and professional styling shears. Belson products are principally distributed throughout the United States, as well as Canada and the United Kingdom. We are currently integrating the Belson operation into our business structure and systems and expect to have the integration substantially completed by the end of the current fiscal year. We believe that Belson's portfolio of professional salon products, in addition to our existing Helen of Troy professional products, will continue to strengthen our leadership position in the professional distribution channels.

After a year of focus on our domestic distribution infrastructure, we believe we are now starting to see the benefits of our investment. Our overall distribution cost as a percentage of net sales was 5.2% for the fiscal quarter ended May 31, 2007 compared to 6.2% for the fiscal quarter ended May 31, 2006. Domestic distribution will continue to remain an area of focus in fiscal 2008 as we determine the best long-term strategy for managing the additional inventory we acquired through the Belson acquisition.

In the first fiscal quarter of 2008, we began efforts to streamline our supply chain and simplify new product development procedures, particularly in our Far East operations. In the Personal Care segment, we are evaluating the sourcing of certain fragrance and grooming products in China. In the Housewares segment, we are gradually transitioning some of our U.S. based sourcing infrastructure to our existing supply chain operations in the Far East.

Over the long term, we believe these efforts are opportunities to improve our cost structure while maintaining our commitment to offer high quality, affordability, and effective customer service with the products we ship. However, we do not expect to realize any material cost savings through these efforts during fiscal 2008.

-27-

Highlights of the three months ended May 31, 2007 follow:

- Consolidated net sales for the fiscal quarter ended May 31, 2007 increased 7.5 percent to \$140,170 compared to \$130,441 for the same period last year. Our Housewares segment contributed \$8,241 or 6.3 percentage points to net sales growth, while our Personal Care segment contributed \$1,488 or 1.2 percentage points of net sales growth. Our Housewares segment's first fiscal quarter performance compares to a weak first fiscal quarter in the prior fiscal year when distribution center shipping issues resulted in an estimated loss of between \$4.5 to \$5 million in net sales for the prior year fiscal quarter. A portion of these sales were subsequently shipped in the second fiscal quarter of the prior year.
- Consolidated gross profit margin as a percentage of net sales for the fiscal quarter ended May 31, 2007 decreased 1.6 percentage points to 42.8 percent compared to 44.4 percent for the same period last year. Gross margins in our core personal care appliance category were relatively flat when compared to the same period last year. Gross margins in grooming, skin care, and hair products, and brushes, combs, and accessories categories were lower when compared to the same period last year due to the impact of higher raw materials costs combined with pricing pressures, including increased customer incentives. Gross margins for the Housewares segment were lower due primarily to product mix shifts and higher cost of goods.
- Selling, general and administrative expense as a percentage of net sales for the fiscal quarter ended May 31, 2007 decreased 3.5 percentage points to 32.6 percent compared to 36.1 percent for the same period last year. The improvement for the three months ended May 31, 2007 compared to the same period last year is mostly due to an improved distribution cost structure, outbound freight cost improvements, and lower information technology outsourcing costs.
- Our financial position continues to strengthen when compared to our financial position at May 31, 2006. Total assets increased 4.0 percent, or \$34,456 to \$902,950 at May 31, 2007 when compared with May 31, 2006. Our working capital position improved \$28,179 to \$226,310 at May 31, 2007 compared with May 31, 2006. Total current and long-term debt outstanding at May 31, 2007 was \$250,000 compared to \$272,634 outstanding at May 31, 2006. Total stockholders' equity was \$528,387 at May 31, 2007 compared to \$481,515 at May 31, 2006.

RESULTS OF OPERATIONS**Comparison of fiscal quarter ended May 31, 2007 to the same period ended May 31, 2006.**

The following table sets forth, for the periods indicated, our selected operating data, in U.S. dollars, as a percentage of net sales, and as a year-over-year percentage change.

SELECTED OPERATING DATA

(dollars in thousands)

	Quarter Ended May 31,				% of Net Sales	
	2007	2006	\$ Change	% Change	2007	2006

Consolidated Sales

Consolidated net sales for the first fiscal quarter ending May 31, 2007 increased 7.5 percent to \$140,170 compared with \$130,441 for the same period last year. Core business growth (business owned and operated over the same fiscal period last year) contributed \$6,276, or 4.8 percent, to consolidated net sales growth while new product acquisitions contributed \$3,453, or 2.7 percent, to our consolidated net sales growth for the fiscal quarter ending May 31, 2007. New product acquisitions consisted of one month's net sales of Belson line of professional appliances, acquired as of May 1, 2007, and a small amount of royalty revenue from our Candela® line of portable cordless lighting products. The following table sets forth the impact acquisitions had on our net sales:

IMPACT OF ACQUISITION ON NET SALES

(in thousands)

	Three Months Ended May 31,	
	2007	2006
Prior year's net sales for the same period	\$ 130,441	\$ 127,392

Components of net sales change			
Core business net sales change		6,276	3,049
Net sales from acquisitions (non-core business net sales)		3,453	-
Change in net sales		9,729	3,049
Net sales	\$	140,170	\$ 130,441

Total net sales growth		7.5%	2.4%
Core business net sales change		4.8%	2.4%
Net sales change from acquisitions (non-core business net sales change)		2.7%	0.0%

-29-

During the three month periods ended May 31, 2007 and 2006, we transacted approximately 15 percent of our net sales in foreign currencies. These sales were primarily denominated in the British Pound, the Euro, the Canadian Dollar, the Brazilian Real and the Mexican Peso. The overall net impact of foreign currency changes was to provide approximately \$830 and \$188 of additional sales in U.S. dollars for the quarters ended May 31, 2007 and 2006, respectively.

Segment Net Sales:

Personal Care Segment - Net sales in the segment for the first fiscal quarter increased 1.4 percent to \$106,812 compared with \$105,324 for the same period last year. Appliances net sales were up, offset by declines in grooming, skin care, and hair products, and brushes, combs, and accessories.

Domestically, we operate in mature markets where we compete on product innovation, price, quality and customer service. We continuously adjust our product mix, pricing and marketing programs to try to maintain, and in some cases, acquire more retail shelf space. Changes in product mix are generally allowing us to realize higher average unit prices, which offset in some categories, unit volume decreases. Over the last year, the prices of raw materials such as copper, steel, plastics and alcohol have experienced significant increases. We continue to evaluate the need to raise prices with our customers and have already put certain increases into effect. In some cases, we have been successful raising prices to our customers, or passing cost increases on by moving customers to newer product models with enhancements that justify a higher price. In other cases, we have not been successful. Sales price increases and product enhancements can have long lead times before their impact is realized. We also continue to evaluate sourcing alternatives for our grooming, skin care, and hair products, but do not expect to experience any significant impact of any sourcing changes that may be made during this fiscal year. The extent to which we will be able to continue with price increases or achieve improved sourcing costs, and the timing and the ultimate impact of such changes on net sales and cost of sales is uncertain. Accordingly, we have experienced margin pressure in this segment, particularly within grooming, skin care, and hair products, and brushes, combs, and accessories categories.

- **Appliances.** Products in this group include hair dryers, straighteners, curling irons, hairsetters, women's shavers, mirrors, hot air brushes, home hair clippers and trimmers, paraffin baths, massage cushions, footbaths and body massagers. Net sales for the three month period ended May 31, 2007 increased approximately 5.4 percent over the same period in the prior year.

For the quarter, increases in unit sales volume contributed approximately 5.1 percent to net sales growth while increases in average selling prices contributed 0.3 percent to net sales growth. Average unit selling prices were lower than we would have expected primarily due to the impact of the newly acquired Belson appliance lines, which currently sell at lower retail price points overall than our existing professional appliances. A higher percentage of Belson's sales are on a direct import basis. Direct import sales have lower unit sales prices and lower gross margins, which are expected due to the lower selling, general, and administrative expense associated with this type of distribution.

Appliance sales during the first fiscal quarter were positively impacted by sales under both our Bed Head® and Fusion Tools™ appliance brands, which were not available for shipment during the fiscal quarter ended May 31, 2006. These professional grade appliances sold at significantly higher price points than our more traditional retail appliances and contributed to our higher average unit selling price. Sales of our Hot Tools® appliances, were also up significantly for the first fiscal quarter when compared to same period last year.

Revlon®, Vidal Sassoon®, Hot Tools®, Dr. Scholl's®, Bed Head®, Gold 'N Hot®, Fusion Tools™, Wigo®, Sunbeam®, and Health o Meter® were key selling brands in this line.

Grooming, Skin Care, and Hair Products. Products in this line include liquid hair styling products, men's fragrances, men's deodorants, foot powder, body powder, and skin care products. Our grooming, skin care, and hair care portfolio includes the Brut®, Sea Breeze®, Vitalis®, Condition® 3-in-1, Ammens®, Final Net® and Skin Milk® brand names. Net sales for the three month period ended May 31, 2007 decreased approximately 2.8 percent when compared against the same period in the prior year.

-30-

For the quarter, increases in unit sales volume contributed approximately 4.1 percent to net sales growth offset by a 6.9 percent decline in average unit selling prices. Most of the unit volume sales increase in this line for the first fiscal quarter came from our Latin American region. Unit growth continued to result from the performance of Brut® throughout the region. Average unit selling prices in Latin America have been decreasing due to the impact of promotional price allowances being granted as we seek to expand market share throughout the region. Domestic net sales for the quarter, while experiencing modest overall unit volume increases were negatively impacted by the discontinuance of the Sea Breeze® Naturals line with certain key customers and the associated sales returns and allowances granted to retailers as a result.

- **Brushes, Combs, and Accessories.** Net sales for the three month period ended May 31, 2007 decreased 21.8 percent when compared to the same period in the prior year. A combination of sluggish sales in the mass retail channel, the discontinuance of a private label program with a large drug retailer and the loss of placement with a key distributor were significant contributing factors to the decline. BED HEAD® by TIGI products began to ship during the fiscal quarter ended May 31, 2007. We believe BED HEAD® sales, while not yet significant, will provide opportunities for additional sales in this product category.

Vidal Sassoon®, Revlon® and Karina® were the key selling brands in this line.

Housewares Segment - Our Housewares segment reports the operations of OXO International (“OXO”) whose products include kitchen tools, cutlery, bar and wine accessories, household cleaning tools, tea kettles, trash cans, storage and organization products, hand tools, gardening tools, kitchen mitts and trivets, barbeque tools, and rechargeable lighting products.

Net sales in the segment for the first fiscal quarter increased 32.8 percent to \$33,358 compared with \$25,117 for the same period last year. Our Housewares segment’s first fiscal quarter performance compares to a weak first fiscal quarter in the prior fiscal year when distribution center shipping issues resulted in an estimated loss of between \$4.5 to \$5 million in net sales for prior year fiscal quarter. A portion of these sales were subsequently shipped in the second fiscal quarter of the prior year.

For the quarter, increases in unit sales volume contributed approximately 21.7 percent to net sales growth while increases in average selling prices contributed 11.1 percent to net sales growth. Unit prices increased during the quarter because the Houseware segment’s business has been expanding its product mix to include higher priced goods, such as trash cans, tea kettles, and hand tools. Unit volumes increased primarily due to improved distribution execution, growth with existing accounts, and our continued expansion of net sales in the United Kingdom and Japan. OXO Good Grips®, OXO SoftWorks® and OXO Steel® were the key selling sub-brands in this product group.

We expect shipments of our new Good Grips® POP modular line of food storage containers and a re-staged line of Candela® portable, cordless, rechargeable table and counter-top ambience lighting products to begin during the third quarter of fiscal 2008.

Consolidated Gross Profit Margins

Consolidated gross profit, as a percentage of sales for the three month period ended May 31, 2007, decreased 1.6 percentage points to 42.8 percent compared to 44.4 percent for the same period in the prior year. Margins in our core personal care appliance category were relatively flat when compared to the same period last year. Margins in grooming, skin care, and hair products, and brushes, combs, and accessories categories were lower when compared to the same period last year primarily due to the impact of higher raw materials costs combined with pricing pressures, including increased customer incentives. Margins for the Housewares segment were lower due to product mix shifts and higher cost of goods.

Selling, general, and administrative expense

Selling, general and administrative expense as a percentage of net sales for the fiscal quarter ended May 31, 2007 decreased 3.5 percentage points to 32.6 percent compared to 36.1 percent for the same period last year. The improvement for the three months ended May 31, 2007 when compared to the same period last year is mostly due to an improved distribution cost structure, outbound freight cost improvements, and lower information technology outsourcing costs.

Operating Income by Segment:

The following table sets forth, for the periods indicated, our operating income by segment, as a percentage of net sales, and as a year-over-year percentage change:

OPERATING INCOME BY SEGMENT*(dollars in thousands)*

	Quarter Ended May 31,				% of Segment Net Sales	
	2007	2006	\$ Change	% Change	2007	2006
Personal Care	\$ 8,872	\$ 6,192	\$ 2,680	43.3%	8.3%	5.9%
Housewares	5,429	4,724	705	14.9%	16.3%	18.8%
Total operating income	\$ 14,301	\$ 10,916	\$ 3,385	31.0%	10.2%	8.4%

Operating income for each operating segment is computed based on net sales, less cost of goods sold and any selling, general, and administrative expenses ("SG&A") associated with the segment. The SG&A used to compute each segment's operating income are comprised of SG&A directly associated with the segment, plus overhead expenses that are allocable to the operating segment.

During the first quarter of fiscal 2007, we completed the transition of our Housewares segment's operations to our internal operating systems and our new distribution facility in Southaven, Mississippi. In the last quarter of fiscal 2007, we completed the consolidation of our domestic appliance inventories into the same new facility.

Throughout fiscal 2007, we conducted an evaluation of our shared cost allocation methodology given the structural and process changes that were taking place in our operations, and changed our methodology in the first quarter of fiscal 2008. We believe the new method better reflects the economics of our newly consolidated operations. The table below summarizes the expense allocations made to the Housewares segment for the three months ended May 31, 2007 compared to the same period in the previous year. Some of these expenses were previously absorbed by the personal care segment.

Housewares Segment Expense Allocation*(in thousands)*

	Three Months Ended May 31,	
	2007	2006
Distribution and sourcing expense	\$ 2,854	\$ 1,427
Other operating and corporate overhead expense	1,326	998
Total allocated expenses	\$ 4,180	\$ 2,425

Expense allocation as a percentage of net sales:

Distribution and sourcing expense	8.6%	5.7%
Other operating and corporate overhead expense	4.0%	4.0%
Total allocated expenses	12.5%	9.7%

Interest expense and other income / expense

Interest expense for the three month period ended May 31, 2007 decreased to \$4,113 compared to \$4,506 for the same period in the prior year. The decrease in interest expense was principally the result of:

- Lower amounts of debt outstanding in the first quarter of fiscal 2008; and
- In the first quarter of fiscal 2007, we expensed \$279 of interest in connection with a Hong Kong tax settlement.

As discussed elsewhere in this report, at the end of the third quarter of fiscal 2007, we entered into interest rate swap agreements to effectively fix interest rates on most of our floating rate debt.

Other income, net for the three month period ended May 31, 2007 was \$1,254 compared to \$790 for the same period in the prior year. The following table sets forth, for the periods indicated, the key components of other income and expense, as a percentage of net sales, and as a year-over-year percentage change:

OTHER INCOME (EXPENSE)

(dollars in thousands)

	Quarter Ended May 31,				% of Net Sales	
	2007	2006	\$ Change	% Change	2007	2006
Interest income	\$ 1,082	\$ 289	\$ 793	*	0.8%	0.2%
Unrealized gains (losses on) securities	(55)	60	(115)	*	0.0%	0.0%
Miscellaneous other income	227	441	(214)	-48.4%	0.2%	0.3%
Total other income (expense)	\$ 1,254	\$ 790	\$ 464	58.7%	0.9%	0.6%

* Calculation is not meaningful

Interest income was higher for the three months ended May 31, 2007, when compared to the same period last year due to combined effects of higher levels of temporarily invested cash and higher interest rates earned.

Miscellaneous other income for the three month period ended May 31, 2006, included a \$422 gain from the sale of 3.9 acres of raw land adjacent to our El Paso, Texas office and distribution center.

Income tax expense

Income tax expense for the three month period ended May 31, 2007 was 11.6 percent of earnings before income taxes versus 7.2 percent of earnings before income taxes for the same period in the prior year. The difference in rates was due to the impact for the quarter ended May 31, 2006, of the reversal of a \$192 of tax provision previously established in connection with a Hong Kong tax settlement. This had the effect of lowering that quarter's tax expense by approximately 2.7 percent. Also, in the fiscal quarter ended May 31, 2007 we had more income in higher tax rate jurisdictions.

FINANCIAL CONDITION, LIQUIDITY, AND CAPITAL RESOURCES

Selected measures of our liquidity and capital resources as of May 31, 2007 and May 31, 2006 are shown below:

SELECTED MEASURES OF OUR LIQUIDITY AND CAPITAL RESOURCES

	Three Months Ended May 31,	
	2007	2006
Accounts Receivable Turnover (Days) (1)	71.0	75.1
Inventory Turnover (Times) (1)	2.3	1.8
Working Capital (<i>in thousands</i>)	\$ 226,310	\$ 198,131
Current Ratio	2.8 : 1	2.6 : 1
Ending Debt to Ending Equity Ratio (2)	47.3%	56.6%
Return on Average Equity (1)	10.5%	9.9%

(1) Accounts receivable turnover, inventory turnover, and return on average equity computations use 12-month trailing sales, cost of sales, or net income components as required by the particular measure. The current and four prior quarters' ending balances of accounts receivable, inventory, and equity are used for the purposes of computing the average balance component as required by the particular measure.

(2) Total debt is defined as all debt outstanding at the balance sheet date. This includes the sum of the following lines when they appear on our consolidated condensed balance sheets: "Revolving line of credit", "Current portion of long-term debt", and "Long-term debt, less current portion."

Operating Activities

Our combined balance of cash and temporary investments was \$59,419 at May 31, 2007, compared to \$91,205 at February 28, 2007. Operating activities provided \$4,910 of cash during the first three months of fiscal 2008, compared to \$943 of cash provided during the same period in fiscal 2006. The increase in operating cash flow was primarily due to the improved inventory and receivables management in our core business.

Accounts receivable decreased \$4,396 to \$111,500 as of May 31, 2007, compared to \$115,896 at the end of fiscal 2007. Accounts receivable turnover improved to 71.0 days at May 31, 2007 from 75.1 days at May 31, 2006. This calculation is based on a rolling five quarter accounts receivable balance. Accounts receivable turnover continued to improve due to our continued emphasis on aggressive management of collections and sales allowances, and operating efficiencies we have gained as a result of our Global Enterprise Resource Planning system.

Inventories increased \$12,144 to \$156,214 as of May 31, 2007, compared to \$144,070 at the end of fiscal 2007. We acquired \$8,426 of inventory in the acquisition of Belson, as discussed elsewhere in this report. Despite the Belson acquisition, inventory turnover improved to 2.3 at May 31, 2007 compared to 1.8 at May 31, 2006 due primarily to improved inventory management and higher inventories in the prior year quarter resulting from our warehouse transition.

Working capital increased to \$226,310 at May 31, 2007, compared to \$198,131 at May 31, 2006. Our current ratio increased to 2.8:1 at May 31, 2007 compared to 2.6:1 at May 31, 2006. The improvements in our working capital position over the past year is the result of the strength of our cash flow, improved receivables and inventory management, which allowed us over the latest twelve months to use \$43,205 of cash for business and trademark acquisitions, pay down \$22,634 of debt, and increase our cash and temporary investments by \$33,347.

Investing Activities

Investing activities used \$12,111 of cash during the three months ended May 31, 2007. Listed below are some significant highlights of our investing activities:

- We spent \$605 on molds and tooling, \$271 on information technology infrastructure, and \$136 for recurring additions and/or replacements of fixed assets in the normal and ordinary course of business.
- We spent \$36,500 in cash to acquire accounts receivable, inventory, trademarks, goodwill and intangible assets of the Belson business.
 - We spent \$99 on patent cost registrations for our Housewares segment.
- We liquidated \$25,500 of temporary cash investments, primarily for use in the acquisition of Belson.

Financing Activities

Financing activities provided \$915 of cash during the three months ended May 31, 2007. Highlights of those activities follow.

- Employees exercised 42,050 options for common shares providing \$767 of cash and \$97 in related tax benefits.
- We recorded \$51 of deferred tax benefits associated with the share-based compensation expense as cash flow from financing activities under the line entitled "Share-based compensation tax benefit" in our consolidated condensed statement of cash flow.

Our ability to access our Revolving Line of Credit facility is subject to our compliance with the terms and conditions of the credit facility and long-term debt agreements, including financial covenants. The financial covenants require us to maintain certain Debt/EBITDA ratios, fixed charge coverage ratios, consolidated net worth levels, and other financial requirements. Certain covenants as of May 31, 2007, limit our total outstanding indebtedness from all sources to no more than 3.5 times the latest twelve months trailing EBITDA. These covenants effectively limited our ability to incur no more than \$66,923 of additional debt from all sources, including draws on our Revolving Line of Credit Agreement. Additionally, our debt agreements restrict us from incurring liens on any of our properties, except under certain conditions. In the event we were to default on any of our other debt, it would constitute a default under our credit facilities as well. As of May 31, 2007, we are in compliance with the terms of the various credit agreements.

Contractual Obligations:

Our contractual obligations and commercial commitments, as of May 31, 2007 were:

PAYMENTS DUE BY PERIOD - TWELVE MONTHS ENDED MAY 31:

(in thousands)

	Total	2008 1 year	2009 2 years	2010 3 years	2011 4 years	2012 5 years	After 5 years

Total contractual obligations	\$ 548,436	\$ 121,704	\$ 31,889	\$ 128,953	\$ 27,152	\$ 74,106	\$ 164,632

(1) The future obligation for interest on our variable rate debt has historically been estimated assuming the rates in effect as of the end of the latest fiscal quarter on which we are reporting. As mentioned above in Note 13, on September 28, 2006, the Company entered into interest rate hedge agreements in conjunction with its outstanding unsecured floating interest rate \$100,000, 5 year; \$50,000, 7 year; and \$75,000, 10 year Senior Notes (the “swaps”). The swaps are a hedge of the variable LIBOR rates used to reset the floating rates on the Senior Notes. The swaps effectively fix the interest rates on the 5, 7 and 10 year Senior Notes at 5.89, 5.89 and 6.01 percent, respectively, beginning September 29, 2006. Accordingly, the future interest obligations related to this debt has been estimated using these rates. On June 8, 2007, we amended our interest rate swap agreement, concurrent with a notice to prepay \$25,000 of our \$100,000 5 year floating rate Senior notes, reducing the notional amount of the swap contracts from \$100,000 to \$75,000, and recording a gain of \$163 upon the liquidation of our position in \$25,000 of swaps. The gain will be recorded as a component of “Interest expense” for the fiscal quarter ending August 31, 2007. The remaining interest rate swaps are considered highly effective and will continue to be accounted for as cash flow hedges.

(2) On June 8, 2007, we gave notice to prepay \$25,000 of our \$100,000, 5 year floating rate Senior Notes without penalty. This prepayment was made on June 29, 2007. The amount prepaid will reduce the amount due in June 2009 from \$100,000 to \$75,000.

Off-Balance Sheet Arrangements:

We have no existing activities involving special purpose entities or off-balance sheet financing.

Current and Future Capital Needs:

As of May 31, 2007, we have no outstanding borrowings and \$1,260 of open letters of credit against our Revolving Line of Credit Facility, nor have we needed to draw on this facility thus far during the current fiscal year. As mentioned in Note 18 in the accompanying consolidated condensed financial statements, On June 8, 2007, we gave notice to prepay \$25,000 of our \$100,000, 5 year floating rate Senior Notes without penalty. This prepayment was made June 29, 2007. Also, on June 7, 2007, based upon a review of our expected cash flows, we gave notice to permanently reduce our five year \$75,000 Revolving Line of Credit Agreement commitment by \$25,000 to \$50,000. The reduction of the commitment will result in a proportionate decline in the future cost of associated commitment fees under the facility.

-36-

Based on our current financial condition and current operations, we believe that cash flows from operations and available financing sources will continue to provide sufficient capital resources to fund the Company's foreseeable short and long-term liquidity requirements. We expect our capital needs to stem primarily from the need to purchase sufficient levels of inventory, to carry normal levels of accounts receivable on our balance sheet, to fund normal levels of capital expenditure, to continue to enhance our North American distribution and logistics capabilities, and to continue to expand the scope of our operations in selected European, Asian and Latin American markets. Over the longer term, we expect we will have sufficient capability to repay maturities of our fixed and floating rate debt through a combination of cash generated from operations, the issuance of additional common shares, and the proceeds of associated new financings.

The Company may elect to repurchase additional shares of its common stock from time to time based upon its assessment of its liquidity position and market conditions at the time, and subject to limitations contained in its debt agreements.

We continue to evaluate acquisition opportunities on a regular basis and may augment our internal growth with acquisitions of complementary businesses or product lines. We may finance acquisition activity with available cash, the issuance of common shares, or with additional debt, depending upon the size and nature of any such transaction and the status of the capital markets at the time of such acquisition.

CRITICAL ACCOUNTING POLICIES

The SEC defines critical accounting policies as "those that are both most important to the portrayal of a company's financial condition and results, and require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain."

Other than the Company's adoption of FIN 48, as described below and in the Note 12 to the consolidated condensed financial statements, there have been no material changes to the Company's critical accounting policies from the information provided in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations", under the heading "Critical Accounting Policies" in our latest Annual Report on Form 10-K for the year ended February 28, 2007.

Income Taxes - Effective March 1, 2007, we adopted FIN 48. See "Note 12: Taxes" in the Notes to Consolidated Condensed Financial Statements of this Form 10-Q for further discussion.

We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments must be used in the calculation of certain tax assets and liabilities because of differences in the timing of recognition of revenue and expense for tax and financial statement purposes. We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. As changes occur in our assessments regarding our ability to recover our deferred tax assets, our tax provision is increased in any period in which we determine that the recovery is not probable.

In addition, the calculation of our tax liabilities requires us to account for uncertainties in the application of complex tax regulations. As a result of the implementation of FIN 48, we recognize liabilities for uncertain tax positions based on the two-step process prescribed within the interpretation. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit based upon its technical merits, including resolution of related appeals or litigation processes, if any. The second step requires us to estimate and measure the tax benefit as the largest amount that has greater than a 50% likelihood of being realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as this requires us to determine the probability of various possible outcomes. We reevaluate

these uncertain tax positions on a quarterly basis. This evaluation is based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, effectively settled issues under audit, historical experience with similar tax matters, guidance from our tax advisors, and new audit activity. A change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision in the period in which the change occurs.

-37-

For a more comprehensive list of our accounting policies, we encourage you to read Note 1 - Summary of Significant Accounting Policies, accompanying the consolidated financial statements included in our latest annual report on Form 10-K for the year ended February 28, 2007. Note 1 in the consolidated financial statements included with Form 10-K contains several other policies, including policies governing the timing of revenue recognition, that are important to the preparation of our consolidated financial statements, but do not meet the SEC's definition of critical accounting policies because they do not involve subjective or complex judgments.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 2 - New Accounting Pronouncements, in the accompanying consolidated condensed financial statements, for a discussion of the status and potential impact of new accounting pronouncements.

-38-

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Changes in interest rates and currency exchange rates are our primary financial market risks. Fluctuation in interest rates causes variation in the amount of interest that we can earn on our available cash and the amount of interest expense we incur on our short-term and long-term borrowings. Interest on our long-term debt outstanding as of May 31, 2007 is both floating and fixed. Fixed rates are in place on \$25,000 of senior notes at rates ranging from 7.01 percent to 7.24 percent.

Floating rates are in place on \$225,000 of debt. Interest rates on these notes are reset as described in Note 13 to our consolidated condensed financial statements. Interest rates during the latest fiscal quarter on these notes ranged from 6.20 to 6.26 percent. During the third quarter of fiscal 2007, the Company decided to actively manage most of its floating rate debt using interest rate swaps. The Company entered into three interest rate swaps that convert an aggregate notional principal of \$225,000 from floating interest rate payments under its 5, 7 and 10 year Senior Notes to fixed interest rate payments ranging from 5.89 to 6.01 percent. In these transactions, we executed three contracts to pay fixed rates of interest on an aggregate notional principal amount of \$225,000 at rates currently ranging from 5.04 to 5.11 percent while simultaneously receiving floating rate interest payments currently set at 5.35 percent as of May 31, 2007 on the same notional amount. The fixed rate side of the swap will not change over the life of the swap. The floating rate payments are reset quarterly based on three month LIBOR. The resets are concurrent with the interest payments made on the underlying debt. These swaps are used to reduce the Company's risk of the possibility of increased interest costs; however, should interest rates drop significantly, we could also lose the benefit that floating rate debt can provide in a declining interest rate environment.

These levels of debt, the future impact of any draws against our Revolving Line of Credit Agreement, whose interest rates can vary with the term of each draw, and the uncertainty regarding the level of future interest rates, increases our risk profile.

Because we purchase a majority of our inventory using U.S. Dollars, we are subject to minimal short-term foreign exchange rate risk in purchasing inventory. However, long-term declines in the value of the U.S. Dollar could subject us to higher inventory costs. Such an increase in inventory costs could occur if foreign vendors were to react to such a decline by raising prices. Sales in the United States are transacted in U.S. Dollars. The majority of our sales in the United Kingdom are transacted in British Pounds, in France and Germany is transacted in Euros, in Mexico is transacted in Pesos, in Brazil is transacted in Reals, and in Canada is transacted in Canadian Dollars. When the U.S. Dollar strengthens against other currencies in which we transact sales, we are exposed to foreign exchange losses on those sales because our foreign currency sales prices are not adjusted for currency fluctuations. When the U.S. Dollar weakens against those currencies, we realize foreign currency gains.

During the three month periods ended May 31, 2007 and 2006, we transacted approximately 15 percent, of our net sales in foreign currencies. For the three month periods ended May 31, 2007 and 2006, we incurred net foreign exchange gains of \$651 and \$316, respectively.

We hedge against foreign currency exchange rate risk by entering into a series of forward contracts designated as cash flow hedges to protect against the foreign currency exchange risk inherent in our forecasted transactions denominated in certain currencies other than the U.S. Dollar. In these transactions, we execute a forward currency contract that will settle at the end of a forecasted period. Because the size and terms of the forward contract are designed so that its fair market value will move in the opposite direction and approximate magnitude of the underlying foreign currency's forecasted exchange gain or loss during the forecasted period, a hedging relationship is created. To the extent we forecast the expected foreign currency cash flows from the period the forward contract is entered into until the date it will settle with reasonable accuracy, we significantly lower or materially eliminate a particular currency's exchange risk exposure over the life of the related forward contract.

For transactions designated as cash flow hedges, the effective portion of the change in the fair value (arising from the change in the spot rates from period to period) is deferred in Other Comprehensive Income. These amounts are subsequently recognized in "Selling, general, and administrative expense" in our consolidated statements of income in the same period as the forecasted transactions close out over the remaining balance of their terms. The ineffective portion of the change in fair value (arising from the change in the difference between the spot rate and the forward rate) is recognized in the period it occurred. These amounts are also recognized in "Selling, general, and administrative expense" in our consolidated statements of income. Our cash flow hedges, while executed in order to minimize our foreign currency exchange rate risk, do subject us to fair value fluctuations on the underlying contracts. We do not enter into any forward exchange contracts or similar instruments for trading or other speculative purposes.

The following table summarizes the various foreign currency contracts and interest rate swap contracts we designated as cash flow hedges that were open at May 31, 2007 and February 28, 2007:

CASH FLOW HEDGES**May 31, 2007**

						Weighted Market Average Value of the Contract in U.S. Dollars (Thousands)

We expect that as currency market conditions warrant, and our foreign denominated transaction exposure grows, we will continue to execute additional contracts in order to hedge against certain potential foreign exchange losses. The Company is exposed to credit risk in the event of non-performance by the other party (a large financial institution) to its current existing forward and swap contracts. However, the Company does not anticipate non-performance by the other party.

INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

Certain written and oral statements made by our Company and subsidiaries of our Company may constitute "forward-looking statements" as defined under the Private Securities Litigation Reform Act of 1995. This includes statements made in this report, in other filings with the SEC, in press releases, and in certain other oral and written presentations. Generally, the words "anticipates", "believes", "expects", "plans", "may", "will", "should", "seeks", "estimates", "project", "predict", "potential", "continue", "intends", and other similar words identify forward-looking statements. All statements that address operating results, events or developments that we expect or anticipate will occur in the future, including statements related to sales, earnings per share results, and statements expressing general expectations about future operating results, are forward-looking statements and are based upon the Company's current expectations and various assumptions. The Company believes there is a reasonable basis for its expectations and assumptions, but there can be no assurance that the Company will realize its expectations or that the Company's assumptions will prove correct. Forward-looking statements are subject to risks that could cause them to differ materially from actual results. Accordingly, the Company cautions readers not to place undue reliance on forward-looking statements. We believe that these risks include but are not limited to the risks described in Part 1, "Item 1A. Risk Factors" of our Annual Report on Form 10-K for the year ended February 28, 2007 and risks otherwise described from time to time in our SEC reports as filed. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our management, under the supervision and with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), has evaluated the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) promulgated under the Exchange Act as of the end of the period covered by this report. Management has concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure and is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Our management, including the CEO and CFO, does not expect that our disclosure controls or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

In the process of our evaluation, among other matters, we considered the existence of any "significant deficiencies" or "material weaknesses" in our internal control over financial reporting, and whether we had identified any acts of fraud involving personnel with a significant role in our internal control over financial reporting. In the professional auditing literature, "significant deficiencies" are referred to as "reportable conditions," which are deficiencies in the design or operation of controls that could adversely affect our ability to record, process, summarize and report financial data in the financial statements. Auditing literature defines "material weakness" as a particularly serious reportable condition in which the internal control does not reduce to a relatively low level the risk that misstatements caused by error or fraud may occur in amounts that would be material in relation to the financial statements and the risk that such misstatements would not be detected within a timely period by employees in the normal course of performing their assigned functions.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

In connection with the evaluation described above, we identified no change in our internal control over financial reporting that occurred during our fiscal quarter ended May 31, 2007, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Securities Class Action Litigation - Class action lawsuits have been filed and consolidated into one action against the Company, Gerald J. Rubin, the Company's Chairman of the Board, President and Chief Executive Officer, and Thomas J. Benson, the Company's Chief Financial Officer, on behalf of purchasers of publicly traded securities of the Company. The Company understands that the plaintiffs allege violations of Sections 10(b) and 20(a) of the Exchange Act, and Rule 10b-5 thereunder, on the grounds that the Company and the two officers engaged in a scheme to defraud the Company's shareholders through the issuance of positive earnings guidance intended to artificially inflate the Company's share price so that Mr. Rubin could sell almost 400,000 of the Company's common shares at an inflated price. The plaintiffs are seeking unspecified damages, interest, fees, costs, an accounting of any alleged insider trading proceeds, and injunctive relief, including an accounting of and the imposition of a constructive trust and/or asset freeze on the defendants' alleged insider trading proceeds. The class period stated in the complaint was October 12, 2004 through October 10, 2005.

The lawsuit was brought in the United States District Court for the Western District of Texas. The Company intends to defend the foregoing lawsuit vigorously, but, because the lawsuit is still in the preliminary stages, the Company cannot predict the outcome and is not currently able to evaluate the likelihood of success or the range of potential loss, if any, that might be incurred in connection with the action. However, if the Company were to lose on any issues connected with the lawsuit or if the lawsuit is not settled on favorable terms, the judgement or settlement may have a material adverse effect on the Company's consolidated financial position, results of operations and cash flows. There is a risk that such litigation could result in substantial costs and divert management's attention and resources from its business, which could adversely affect the Company's business. The Company carries insurance that provides an aggregate coverage of \$20 million after a self-insured retention of \$500 thousand for the period during which the claims were filed, but cannot evaluate at this time whether such coverage will be adequate to cover losses, if any, arising out of the lawsuit.

On May 15, 2006, the Company filed a motion to dismiss the aforementioned lawsuit citing numerous deficiencies with the claims asserted in the lawsuit. On May 24, 2007, the motion to dismiss was denied. The discovery phase of the litigation is now underway.

Hong Kong Income Taxes - On May 10, 2006, the IRD and the Company reached a settlement regarding tax liabilities for the fiscal years 1995 through 1997. This agreement was subsequently approved by the IRD's Board of Review. For those tax years, we agreed to an assessment of approximately \$4,019 including estimated penalties and interest. Our consolidated financial statements at May 31, 2006 and February 28, 2006 included adequate provisions for this liability. As a result of this tax settlement, in the first quarter of fiscal 2007, we reversed \$192 of tax provision previously established and recorded \$279 of associated interest. During the second quarter of fiscal 2007, the liability was paid with \$3,282 of tax reserve certificates and the balance in cash.

For the fiscal years 1998 through 2003, the IRD has assessed a total of \$25,461 (U.S.) in tax on certain profits of our foreign subsidiaries. Hong Kong is seeking to levy taxes on income earned from certain activities previously conducted in Hong Kong. Negotiations with the IRD regarding these issues and their settlement are ongoing, and it is unclear at this time when they will be resolved.

In connection with the IRD's tax assessment for the fiscal years 1998 through 2003, we have purchased tax reserve certificates in Hong Kong totaling \$25,144. Tax reserve certificates represent the prepayment by a taxpayer of potential tax liabilities. The amounts paid for tax reserve certificates are refundable in the event that the value of the tax reserve certificates exceeds the related tax liability. These certificates are denominated in Hong Kong dollars and are subject to the risks associated with foreign currency fluctuations.

If the IRD were to successfully assert the same position for fiscal years after fiscal year 2003, the resulting assessment could total \$18,673 (U.S.) in taxes for fiscal years 2004 and 2005. Although the final resolution of the proposed adjustments is uncertain and involves unsettled areas of the law, based on currently available information, we have provided for our best estimate of the total probable tax liability for this matter. While the resolution of the issue may result in tax liabilities that are significantly higher or lower than the reserves established for this matter, management currently believes that the resolution will not have a material effect on our consolidated financial position or liquidity. However, an unfavorable resolution could have a material effect on our consolidated results of operations or cash flows in the quarter in which an adjustment is recorded or the tax is due or paid.

Effective March 2005, we had concluded the conduct of all operating activities in Hong Kong that we believe were the basis of the IRD's assessments. Over the course of the prior year, the Company had moved these activities to China and Macao. The Company established a Macao offshore company ("MOC") and began operating from Macao in the third quarter of fiscal 2005. As a MOC, we have been granted an indefinite tax holiday and currently pay no taxes.

United States Income Taxes - The IRS is auditing our U.S. consolidated federal tax returns for fiscal years 2003 and 2004 and has provided notice of proposed adjustments of \$5,953 to taxes for the years under audit. The Company is vigorously contesting these adjustments. Although the ultimate outcome of the dispute with the IRS cannot be predicted with certainty, management is of the opinion that adequate provisions for taxes in those years have been made in our consolidated financial statements.

The IRS recently began an examination of the U.S. consolidated federal tax return for fiscal year 2005. The audit is in the preliminary stages and, to date, no adjustments have been proposed.

Other Matters - We are involved in various other legal claims and proceedings in the normal course of operations. We believe the outcome of these matters will not have a material adverse effect on our consolidated financial position, results of operations, or liquidity.

ITEM 1A. RISK FACTORS

The ownership of our common shares involves a number of risks and uncertainties. In evaluating the Company and our business before making an investment decision regarding our securities, potential investors should carefully consider the risk factors and uncertainties described in Part 1, "Item 1A. Risk Factors" of our latest Annual Report on Form 10-K for the year ended February 28, 2007. Since the publication of our Annual report on Form 10-K, there have been no material changes in our risk factors from those disclosed therein.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the quarter ended August 31, 2003, our Board of Directors authorized us to purchase, in the open market or through private transactions, up to 3,000,000 shares of our common stock over a period extending to May 31, 2006. On April 25, 2006, our Board of Directors approved a resolution to extend the existing plan to May 31, 2009. During the three month periods ended May 31, 2007 and 2006, respectively, we did not repurchase any common shares. From September 1, 2003 through May 31, 2007, we have repurchased 1,563,836 shares at a total cost of \$45,611,690 or an average share price of \$29.17. An additional 1,436,164 shares are authorized for purchase under this plan.

ITEM 6. EXHIBITS

(a)

Exhibits

31.1 Certification of the Chief Executive Officer required by Rule 13a-14(a) or Rule 15d-14(a) pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of the Chief Financial Officer required by Rule 13a-14(a) or Rule 15d-14(a) pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32 Joint certification of the Chief Executive Officer and the Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
