FORM 10-Q

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2010

Or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-32417

Education Realty Trust, Inc.

(Exact name of registrant as specified in its charter)

Maryland

(State or other jurisdiction of incorporation or
organization)

20-1352180

(I.R.S. Employer Identification No.)

530 Oak Court Drive, Suite 300, Memphis,
Tennessee

38117

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: (901) 259-2500

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐

Smaller reporting company ☐

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

As of August 5, 2010, the latest practicable date, the Registrant had outstanding 57,463,792 shares of common stock, \$.01 par value per share.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data)

(Unaudited)

1. Organization and description of business

Education Realty Trust, Inc. (the “Trust”) was organized in the state of Maryland on July 12, 2004 and commenced operations as a real estate investment trust (“REIT”) effective with the initial public offering (the “Offering”) that was completed on January 31, 2005. Under the Trust’s Articles of Incorporation, as amended, the Trust is authorized to issue up to 200 million shares of common stock and 50 million shares of preferred stock, each having a par value of \$0.01 per share.

The Trust operates primarily through a majority-owned Delaware limited partnership, Education Realty Operating Partnership, LP (the “Operating Partnership”). The Operating Partnership owns, directly or indirectly, interests in collegiate student housing communities located near major universities in the United States.

The Trust also provides real estate facility management, development and other advisory services through the following subsidiaries of the Operating Partnership:

- Allen & O’Hara Education Services, Inc. (“AOES”), a Delaware corporation performing collegiate student housing management activities.

- Allen & O’Hara Development Company, LLC (“AODC”), a Delaware limited liability company providing development consulting services for third party collegiate student housing communities.

The Trust is subject to the risks involved with the ownership and operation of residential real estate near major universities throughout the United States. The risks include, among others, those normally associated with changes in the demand for housing by students at the related universities, competition for tenants, creditworthiness of tenants, changes in tax laws, interest rate levels, the availability of financing, and potential liability under environmental and other laws.

2. Summary of significant accounting policies

Basis of presentation and principles of consolidation

The accompanying condensed consolidated financial statements have been prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States (“GAAP”). The accompanying condensed consolidated financial statements of the Trust represent the assets and liabilities and operating results of the Trust and its majority owned subsidiaries.

The Trust, as the sole general partner of the Operating Partnership, has the responsibility and discretion in the management and control of the Operating Partnership, and the limited partners of the Operating Partnership, in such capacity, have no authority to transact business for, or participate in the management activities of the Operating Partnership. Accordingly, the Trust accounts for the Operating Partnership using the consolidation method.

All intercompany balances and transactions have been eliminated in the accompanying condensed consolidated financial statements.

Interim financial information

The accompanying unaudited interim financial statements include all adjustments, consisting only of normal recurring adjustments, that in the opinion of management are necessary for a fair presentation of the Trust's financial position, results of operations and cash flows for such periods. Because of the seasonal nature of the business, the operating results and cash flows are not necessarily indicative of results that may be expected for any other interim periods or for the full fiscal year. These financial statements should be read in conjunction with the Trust's consolidated financial statements and related notes, included in the Trust's Annual Report on Form 10-K for the year ended December 31, 2009, filed with the Securities and Exchange Commission (the "SEC").

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates and assumptions are used by management in determining the recognition of third-party development consulting services revenue under the percentage of completion method, useful lives of student housing assets, the valuation of goodwill, the initial valuations and underlying allocations of purchase price in connection with student property acquisitions, the determination of fair value for impairment assessments, and in the recording of the allowance for doubtful accounts. Actual results could differ from those estimates.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation. In the condensed consolidated statements of operations, food service revenue had previously been presented separately from student housing leasing revenue. The reclassification of food service revenue to student housing leasing revenue was not material to our condensed consolidated financial statements and had no impact on our previously reported net income, changes in equity, financial position or net cash flows from operations.

Cash and cash equivalents

All highly-liquid investments with a maturity of three months or less when purchased are considered cash equivalents. Restricted cash is excluded from cash for the purpose of preparing the condensed consolidated statements of cash flows. The Trust maintains cash balances in various banks. At times, the amounts of cash may exceed the amount the Federal Deposit Insurance Corporation ("FDIC") insures. As of June 30, 2010, the Trust had \$16,692 of cash on deposit that was uninsured by the FDIC or in excess of the FDIC limits.

Restricted cash

Restricted cash includes escrow accounts held by lenders for the purposes of paying taxes, insurance, principal and interest and funding capital improvements.

Distributions

The Trust pays regular quarterly cash distributions to stockholders. These distributions are determined quarterly by the Board of Directors ("Board") based on the operating results, economic conditions, capital expenditure requirements, the REIT annual distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"), leverage covenants imposed by our revolving credit facility and other debt documents, and any other matters the Board deems relevant.

Student housing properties

Land, land improvements, buildings and improvements, and furniture, fixtures and equipment are recorded at cost. Buildings and improvements are depreciated over 15 to 40 years, land improvements are depreciated over 15 years and furniture, fixtures, and equipment are depreciated over 3 to 7 years. Depreciation is computed using the straight-line method for financial reporting purposes over the estimated useful life.

Acquired student housing communities' results of operations are included in the Trust's results of operations from the respective dates of acquisition. Appraisals, estimates of cash flows and valuation techniques are used to allocate the purchase price of acquired property between land, land improvements, buildings and improvements, furniture, fixtures and equipment and identifiable intangibles such as amounts related to in-place leases. On January 1, 2009, the Trust adopted the authoritative guidance issued by the Financial Accounting Standards Board ("FASB"), which prospectively changed the requirements for how an acquirer recognizes and measures the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. The guidance also enhanced the disclosures to enable the evaluation of the nature and financial effects of the business combination and requires that pre-acquisition costs be expensed as incurred. Pre-acquisition costs, which include legal and professional fees and other third-party costs related directly to the acquisition of a community, were accounted for as part of the purchase price prior to the adoption of the guidance issued by the FASB.

Management assesses impairment of long-lived assets to be held and used whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Management uses an estimate of future undiscounted cash flows of the related asset based on its intended use to determine whether the carrying value is recoverable. If the Trust determines that the carrying value of an asset is not recoverable, the fair value of the asset is estimated and an impairment loss is recorded to the extent the carrying value exceeds estimated fair value.

When a student housing community has met the criteria to be classified as held for sale, the fair value less cost to sell such asset is estimated. If the fair value less cost to sell the asset is less than the carrying amount of the asset, an impairment charge is recorded for the estimated loss. Depreciation expense is no longer recorded once a student housing community has met the held for sale criteria. Operations of student housing communities that are sold or classified as held for sale are recorded as part of discontinued operations for all periods presented.

Repairs, maintenance and major improvements

The costs of ordinary repairs and maintenance are charged to operations when incurred. Major improvements that extend the life of an asset are capitalized and depreciated over the remaining useful life of the asset. Planned major repair, maintenance and improvement projects are capitalized when performed. In some circumstances, the lenders require the Trust to maintain a reserve account for future repairs and capital expenditures. These amounts are classified as restricted cash as the funds are not available for current use.

Investment in unconsolidated entities

The Operating Partnership accounts for its investments in unconsolidated joint ventures, limited liability companies and limited partnerships using the equity method whereby the cost of an investment is adjusted for the Trust's share of earnings of the respective investment reduced by distributions received. The earnings and distributions of the unconsolidated joint ventures, limited liability companies and limited partnerships are allocated based on each owner's respective ownership interests. These investments are classified as other assets in the accompanying condensed consolidated balance sheets.

Deferred financing costs

Deferred financing costs represent costs incurred in connection with acquiring debt facilities. These costs are amortized over the terms of the related debt using a method that approximates the effective interest method. Deferred financing costs, net of amortization, are included in other assets in the accompanying condensed consolidated balance sheets.

Common stock issuances and offering costs

Specific incremental costs directly attributable to the issuance of common stock are charged against the gross proceeds of the related issuance. Accordingly, underwriting commissions and other stock issuance costs are reflected as a reduction of additional paid-in capital in the accompanying condensed consolidated statement of changes in equity.

On June 2, 2010, the Trust entered into two equity distribution agreements. Pursuant to the terms and conditions of the agreements, the Trust may issue and sell shares of its common stock having an aggregate offering amount of up to \$50,000. Sales of the common stock will depend upon market conditions and other factors to be determined by the Trust and may be made in transactions that are deemed to be “at-the-market” offerings as defined in Rule 415 under the Securities Act of 1933, as amended. The Trust has no obligation to sell any of the common stock, and may at any time suspend offers under the agreements or terminate the agreements. As of June 30, 2010, the Trust had incurred \$122 in offering costs and sold no common stock under these agreements.

On May 19, 2010, the Trust's stockholders approved the Education Realty Trust, Inc. Employee Stock Purchase Plan (the "ESPP"). Pursuant to the ESPP, all employees of the Trust are eligible to make periodic purchases of common stock through payroll deductions. Subject to the discretion of the compensation committee of the board of directors, the purchase price per share of common stock purchased by employees under the ESPP will be 85% of the fair market value on the applicable purchase date. The Trust has reserved 300,000 shares of common stock for sale under the ESPP, and the compensation committee will serve as the administrator of the ESPP. The ESPP will become effective as of July 1, 2010.

On July 28, 2009, the Trust completed a follow-on common stock offering, selling 28,175,000 shares of the Trust's common stock, including 3,675,000 shares issued as a result of the exercise of the underwriters' overallotment option in full at closing, at a price of \$4.35 per share to the public. The offering generated gross proceeds of \$122,561. The net proceeds to the Trust, after the underwriting discount and other expenses of the offering were approximately \$116,133.

Debt premiums/discounts

Differences between the estimated fair value of debt and the principal value of debt assumed in connection with student housing property acquisitions are amortized over the term of the related debt as an offset to interest expense using the effective interest method.

Income taxes

The Trust qualifies as a REIT under the Code. The Trust is generally not subject to federal, state and local income taxes to the extent that it distributes at least 90% of its taxable income for each tax year to its stockholders. REITs are subject to a number of organizational and operational requirements. If the Trust fails to qualify as a REIT in any taxable year, the Trust will be subject to federal, state and local income taxes (including any applicable alternative minimum tax) on its taxable income and property and to federal income and excise taxes on its undistributed income.

The Trust has elected to treat its management company, AOES, as a taxable REIT subsidiary ("TRS"). The TRS is subject to federal, state and local income taxes. AOES manages the Trust's non-REIT activities which include management services and development services, which are provided through AODC. Deferred tax assets and liabilities are recognized based on the difference between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates in effect in the years in which those temporary differences are expected to reverse.

The Trust had no unrecognized tax benefits as of June 30, 2010 and 2009. As of June 30, 2010, the Trust did not expect to record any unrecognized tax benefits. The Trust, and its subsidiaries, file federal and state income tax returns. As of June 30, 2010, open tax years generally include tax years for 2006, 2007, 2008 and 2009. The Trust's policy is to include interest and penalties related to unrecognized tax benefits in general and administrative expenses. At June 30, 2010 and 2009, the Trust had no interest or penalties recorded related to unrecognized tax benefits.

Noncontrolling interests

On January 1, 2009, the Trust adopted the authoritative guidance issued by the FASB that changed the accounting and reporting for noncontrolling interests. The guidance established the accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interests, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The guidance also established disclosure requirements to clearly distinguish between the interests of the parent and the interests of the noncontrolling owners.

The units of limited partnership of the Operating Partnership (“Operating Partnership Units”), units of limited partnership of University Towers Operating Partnership, LP (“University Towers Operating Partnership Units”) and profits interest units (“PIU”) (see Note 9) are now referred to as noncontrolling interests (formerly minority interests).

In connection with the adoption, the Trust also considered the guidance issued by the FASB regarding the classification and measurement of redeemable securities. The Operating Partnership Units and the University Towers Operating Partnership Units are redeemable at the option of the holder and essentially have the same characteristics as common stock as they participate in net income and distributions. Accordingly, the Trust determined that the Operating Partnership Units and the University Towers Operating Partnership Units met the requirements to be classified outside of permanent equity and are therefore classified as redeemable noncontrolling interests in the accompanying condensed consolidated balance sheets and net income attributable to noncontrolling interests in the accompanying condensed consolidated statement of operations. The value of redeemable noncontrolling interests is reported at the greater of fair value or historical cost at the end of each reporting period.

The PIUs were determined to be noncontrolling interests that were not redeemable and accordingly these amounts were reclassified to equity in the accompanying condensed consolidated balance sheets and statements of changes in equity. The PIU holder's share of income or loss is reported in the accompanying condensed consolidated statements of operations as net income attributable to noncontrolling interests. During the three months ended June 30, 2010, all of the outstanding PIUs were redeemed by the Trust for \$167 of cash and 50,826 shares of common stock (see Note 9).

Earnings per share

Basic earnings per share is calculated by dividing net earnings available to shares of common stock by weighted average shares of common stock outstanding. Diluted earnings per share is calculated similarly, except that it includes the dilutive effect of the assumed exercise of potentially dilutive securities. Beginning January 1, 2009, the Trust adopted the authoritative guidance regarding the determination of whether certain instruments are participating securities. All unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are to be included in the computation of earnings per share under the two-class method. This resulted in shares of unvested restricted stock being included in the computation of basic earnings per share for all periods presented. The adoption did not have a material impact on the condensed consolidated financial statements.

As of June 30, 2010, the following potentially dilutive securities were outstanding but were not included in the computation of diluted earnings per share because the effects of their inclusion would be anti-dilutive:

	2010
Operating Partnership units	903,738
University Towers Operating Partnership units	207,257
Total potentially dilutive securities	1,110,995

A reconciliation of the numerators and denominators for the basic and diluted earnings per share computation is not presented, as the Trust reported a loss from continuing operations for the three and six months ended June 30, 2010, and therefore the effect of the inclusion of all potentially dilutive securities would be anti-dilutive when computing diluted earnings per share; thus, the computation for both basic and diluted earnings per share is the same.

The following reconciles the basic and diluted weighted average shares for the three and six months ended June 30, 2009:

	Three months ended June 30, 2009	Six months ended June 30, 2009
Basic weighted average common shares outstanding	28,520,344	28,518,430
Operating Partnership units	913,738	913,738

University Towers Operating Partnership units	207,257	207,257
Diluted weighted average common shares outstanding	29,641,339	29,639,425

Goodwill and other intangible assets

Goodwill is tested annually for impairment as of December 31, and is tested for impairment more frequently if events and circumstances indicate that the assets might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset's fair value. The accumulated impairment loss recorded by the Trust as of December 31, 2008 is \$388. No additional impairment has been recorded through June 30, 2010. The carrying value of goodwill was \$3,070 at June 30, 2010 and December 31, 2009, of which \$2,149 was recorded on the management services segment and \$921 was recorded on the development consulting services segment. Goodwill is not subject to amortization. Other intangible assets generally include in-place leases and management contracts acquired in connection with acquisitions and are amortized over the estimated life of the lease/contract term. There were no other intangible assets at June 30, 2010 and \$3 at December 31, 2009.

Comprehensive income

The Trust follows the authoritative guidance issued by the FASB relating to the reporting and display of comprehensive income and its components. For all periods presented, comprehensive income is equal to net income.

Revenue recognition

The Trust recognizes revenue related to leasing activities at the student housing communities owned by the Trust, management fees related to managing third-party student housing communities, development consulting fees related to the general oversight of third-party student housing development and operating expense reimbursements for payroll and related expenses incurred for third-party student housing communities managed by the Trust.

Student housing leasing revenue — Student housing leasing revenue is comprised of all activities related to leasing and operating the student housing communities and includes revenues from leasing apartments by the bed, food services, parking lot rentals and providing certain ancillary services. This revenue is reflected in student housing leasing revenue in the accompanying condensed consolidated statements of operations. Students are required to execute lease contracts with payment schedules that vary from annual to monthly payments. Generally, the Trust requires each executed leasing contract to be accompanied by a signed parental guarantee. Receivables are recorded when billed. Revenues and related lease incentives and nonrefundable application and service fees are recognized on a straight-line basis over the term of the contracts. At certain student housing facilities, the Trust offers parking lot rentals to the tenants. The related revenues are recognized on a straight-line basis over the term of the related agreement.

Third-party development services revenue — The Trust provides development consulting services in an agency capacity with third parties whereby the fee is determined based upon the total construction costs. Total fees vary from 3-5% of the total estimated costs, and the Trust typically receives a portion of the fees up front. These fees, including the up-front fee, are recognized using the percentage of completion method in proportion to the contract costs incurred by the owner over the course of construction of the respective projects. Occasionally, the development consulting contracts include a provision whereby the Trust can participate in project savings resulting from successful cost management efforts. These revenues are recognized once all contractual terms have been satisfied and no future performance requirements exist. This typically occurs after construction is complete. For the six months ended June 30, 2010 and 2009, there was no revenue recognized related to cost savings agreements on development projects.

Third-party management services revenue — The Trust enters into management contracts to manage third-party student housing facilities. Management revenues are recognized when earned in accordance with each management contract. Incentive management fees are recognized when the incentive criteria have been met.

Operating expense reimbursements — The Trust pays certain payroll and related costs to operate third-party student housing communities that are managed by the Trust. Under the terms of the related management agreements, the third-party property owners reimburse these costs. The amounts billed to the third-party owners are recognized as revenue.

Costs related to third party development consulting services

Costs associated with the pursuit of development consulting contracts are expensed as incurred, until such time that management has been notified of a contract award. At such time, the reimbursable costs are recorded as receivables and are reflected as other assets in the accompanying condensed consolidated balance sheets.

Recent accounting pronouncements

In May 2009, the FASB issued new authoritative guidance on subsequent events. The new guidance is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, this standard sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This guidance is effective for financial statements issued for fiscal years and interim periods beginning after June 15, 2009 and is applied prospectively. The Trust adopted this authoritative guidance during the three months ended September 30, 2009. In February 2010, the FASB amended the authoritative guidance on subsequent events to remove the requirement for SEC filers to disclose the date through which an entity has evaluated subsequent events. The new guidance is effective upon issuance and had no impact on the Trust's consolidated financial statements.

In June 2009, the FASB issued guidance to establish only two levels of GAAP, authoritative and nonauthoritative. The FASB Accounting Standards Codification (the "Codification") is the source of authoritative, nongovernmental GAAP, except for rules and interpretive releases of the SEC, which are sources of authoritative GAAP for SEC registrants. All other nongrandfathered, non-SEC accounting literature not included in the Codification is nonauthoritative. This standard is effective for financial statements issued for fiscal years and interim periods ending after September 15, 2009. As the Codification was not intended to change or alter existing GAAP, it did not have any impact on the consolidated financial statements.

In June 2009, the FASB issued authoritative guidance to improve financial reporting by enterprises involved with variable interest entities. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2009, with early adoption prohibited. The adoption had no impact on the Trust's consolidated financial statements.

In January 2010, the FASB updated the authoritative guidance for accounting and reporting for decreases in ownership of a subsidiary. The updated guidance clarifies the scope of the guidance related to a decrease in ownership provisions and expands the disclosures related to the deconsolidation of a subsidiary or group of assets. The updated guidance is effective for financial statements issued for fiscal years and interim periods beginning after December 15, 2009. The adoption had no impact on the Trust's consolidated financial statements.

3. Investments in unconsolidated entities

As of June 30, 2010, the Trust had investments, directly or indirectly, in the following active unconsolidated joint ventures, limited liability companies and limited partnerships that are accounted for under the equity method:

- ◆ University Village-Greensboro LLC, a Delaware limited liability company, 25% owned by the Operating Partnership
- ◆ WEDR Riverside Investors V, LLC, a Delaware limited liability company, 10% owned by the Operating Partnership
 - APF EDR, LP, a Delaware limited partnership, 10% owned by the Operating Partnership
 - APF EDR Food Services, LP, a Delaware limited partnership, 10% owned by the Operating Partnership
- ◆ WEDR Stinson Investors V, LLC, a Delaware limited liability company, 10% owned by the Operating Partnership

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

The following is a summary of financial information for the Trust's unconsolidated joint ventures, limited liability companies and limited partnerships for the six months ended June 30, 2010 and 2009:

	2010	2009
Results of Operations:		
Revenues	\$ 8,005	\$ 8,672
Net income	230	626
Equity in earnings of unconsolidated entities	\$ 86	\$ 146

These entities primarily own collegiate student housing communities which are managed by the Trust. As of June 30, 2010 and December 31, 2009, the Trust's investment in unconsolidated entities totaled \$1,348 and \$1,450, respectively.

4. Debt

Revolving credit facility

On November 20, 2009, the Operating Partnership entered into a Second Amended and Restated Credit Agreement (the "Second Amended Revolver"). The Second Amended Revolver amended and restated the existing secured revolving credit facility dated March 30, 2006 (the "Amended Revolver"). The previous facility had a maximum availability of \$100,000 and was scheduled to mature on March 30, 2010. The Second Amended Revolver has a maximum availability of \$95,000 and within the first two years of the agreement may be expanded to a total of \$150,000 upon satisfaction of certain conditions.

Availability under the Second Amended Revolver is limited to a "borrowing base availability" equal to the lesser of (i) 60% of the property asset value (as defined in the agreement) of the properties securing the Second Amended Revolver and (ii) the loan amount which would produce a debt service coverage ratio of no less than 1.40. As of June 30, 2010, our borrowing base was \$43,364, we had no amounts outstanding under the Second Amended Revolver and we had a letter of credit outstanding of \$1,500 (see Note 6); thus, our remaining borrowing base availability was \$41,864.

The Trust serves as the guarantor for any funds borrowed by the Operating Partnership under the Second Amended Revolver. Additionally, the Second Amended Revolver is secured by a cross-collateralized, first mortgage lien on five otherwise unmortgaged properties. The Second Amended Revolver matures on November 20, 2012, provided that the Operating Partnership may extend the maturity date for one year subject to certain conditions. The interest rate per annum applicable to the Second Amended Revolver is, at the Operating Partnership's option, equal to a base rate or London InterBank Offered Rate ("LIBOR") plus an applicable margin based upon our leverage.

The Second Amended Revolver contains customary affirmative and negative covenants and contains financial covenants that, among other things, require the Trust and its subsidiaries to maintain certain minimum ratios of "EBITDA" (earnings before payment or charges of interest, taxes, depreciation, amortization or extraordinary items) as compared to interest expense and total fixed charges. The financial covenants also include consolidated net worth and leverage ratio tests. As of June 30, 2010, the Trust was in compliance with all debt covenants.

The Trust is prohibited from making distributions unless either of the following conditions is met: (a) after giving effect to the distribution, the total leverage ratio is less than or equal to 65% prior to November 20, 2012, and less than or equal to 60% thereafter; or (b) the distribution, when considered along with all other distributions for the last 3 quarters, does not exceed 90% of funds from operations for the applicable period.

During the year ended December 31, 2009, the Trust used \$30,600 of the proceeds received in connection with the follow-on common stock offering that was conducted in July 2009 (see Note 2) to repay the outstanding balance of the Amended Revolver.

Mortgage and construction debt

At June 30, 2010, the Trust had outstanding mortgage and construction indebtedness of \$398,645 (excluding unamortized debt premium of \$598). \$23,895 relates to construction debt that is disclosed below and \$132,295 pertains to outstanding mortgage debt that is secured by the underlying student housing properties or leaseholds

bearing interest at fixed rates ranging from 4.92% to 6.97%. The remaining \$242,455 of the outstanding mortgage indebtedness relates to the Fannie Mae master secured credit facility that the Trust entered into on December 31, 2008 and expanded on December 2, 2009 (the "Master Secured Credit Facility"). \$48,975 of the outstanding amount under the Master Secured Credit Facility bears interest at variable rates based on the 30-day LIBOR plus an applicable margin (3.67%). The remaining outstanding balance of \$193,480 bears interest at a weighted average fixed rate of 5.88%.

In order to hedge the interest rate risk associated with the variable rate loans under the Master Secured Credit Facility, the Operating Partnership purchased an interest rate cap from the Royal Bank of Canada on December 22, 2008 for \$120. The notional amount of the cap is \$49,874, the cap will terminate on December 31, 2013 and the cap rate is 7.0% per annum. The Operating Partnership has chosen not to designate the cap as a hedge and will recognize all gains or losses associated with this derivative instrument in earnings. At June 30, 2010 and December 31, 2009, the cap had a value of \$55 and \$286, respectively, and is classified in other assets in the accompanying condensed consolidated balance sheets.

At June 30, 2010, we had borrowed \$10,759 and \$4,310 on construction loans with availability of \$11,000 and \$12,285, respectively, related to the development of a wholly owned student apartment community near Southern Illinois University (Carbondale) (see Note 7). The loans bear interest equal to LIBOR plus 110 and 200 basis point margins, respectively, and were interest only through June 14, 2010. On June 14, 2010, the Trust paid down \$5,013 of the outstanding construction debt and extended the maturity date until June 28, 2012. Going forward, annually, a debt service coverage ratio calculated on a rolling 12 months basis, of not less than 1.25 to 1, must be maintained with principal and interest being repaid on a monthly basis.

At June 30, 2010, the Trust had \$8,826 outstanding on a \$14,300 construction loan related to the development of a wholly-owned student apartment community at Syracuse University (see Note 7). The loan bears interest equal to LIBOR plus a 110 basis point margin and is interest only through September 29, 2011. Commencing with the quarter ended June 30, 2011, and annually thereafter, a debt service coverage ratio calculated on a rolling 12 month basis, of not less than 1.25 to 1, must be maintained in order to extend the loan until September 29, 2013, with principal and interest being repaid on a monthly basis.

The scheduled maturities of outstanding mortgage and construction indebtedness at June 30, 2010 are as follows:

Fiscal Year Ending	
2010 (6 months ending December 31, 2010)	\$ 2,166
2011	13,357
2012	83,080
2013	33,028
2014	100,115
Thereafter	166,899
Total	398,645
Unamortized debt premium/discounts	598
Outstanding at June 30, 2010, net of unamortized premiums	\$ 399,243

At June 30, 2010, the outstanding mortgage and construction debt had a weighted average interest rate of 5.38% and carried a weighted average term to maturity of 4.71 years.

5. Segments

The Trust defines business segments by their distinct customer base and service provided. The Trust has identified three reportable segments: student housing leasing, development-consulting services and management services. Management evaluates each segment's performance based on pretax income and on net operating income, which is defined as income before depreciation, amortization, impairment losses, interest expense (income), gains (losses) on extinguishment of debt, equity in earnings of unconsolidated entities, and noncontrolling interests. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. Intercompany fees are reflected at the contractually stipulated amounts. Discontinued operations are not included in segment reporting as management addresses these items on a corporate level. The following table

represents segment information for the six months ended June 30, 2010 and 2009:

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

	Six Months Ended June 30, 2010					Six Months Ended June 30, 2009				
	Student Housing Leasing	Development Consulting Services	Management Service	Eliminations	Total	Student Housing Leasing	Development Consulting Services	Management Service	Eliminations	Total

Total segment
assets, as of
June 30, 2010
and December

31, 2009 (3)	\$ 759,134	\$ 5,362	\$ 4,371	\$ —	\$ 768,867	\$ 766,655	\$ 3,742	\$ 5,535	\$ —	\$ 775,932
--------------	------------	----------	----------	------	------------	------------	----------	----------	------	------------

(1) Nonoperating expenses include interest expense, interest income, gains (losses) on the extinguishment of debt, amortization of deferred financing costs, depreciation, amortization of intangibles and impairment losses on assets. Certain expenses, which are classified as operating expenses in the condensed consolidated financial statements, are classified as nonoperating expenses for presentation purposes above based on how management evaluates segment operating performance.

(2) The following is a reconciliation of the reportable segments' income before income taxes and discontinued operations to the Trust's consolidated income (loss) before income taxes and discontinued operations for the six months ended June 30:

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

	2010	2009
Income before income taxes and discontinued operations for reportable segments	\$ 2,955	\$ 4,842
Other unallocated corporate expenses	(3,352)	(3,313)
Income (loss) before income taxes and discontinued operations	\$ (397)	\$ 1,529

(3) The decrease in segment assets related to student housing leasing is primarily related to depreciation. The increase in segment assets related to development consulting services is primarily due to increases in the receivables for reimbursable project costs of \$1,693 related to the developments at East Stroudsburg University, Mansfield University of Pennsylvania and Johns Hopkins University. These increases were offset by collections of reimbursable project costs of \$869 related to the developments at Colorado State University- Pueblo and SUNY College of Environmental Science and Forestry. Additionally, development fee receivables increased \$634 related to the developments at Indiana University of Pennsylvania and Colorado State University- Pueblo.

The following table represents segment information for the three months ended June 30, 2010 and 2009:

	Three Months Ended June 30, 2010					Three Months Ended June 30, 2009

Income (loss) before income taxes and discontinued operations	\$ (704)	682

6. Commitments and contingencies

In connection with the acquisition of certain of the Trust's properties, the previous owner disclosed to the Trust in 2004 that, in June 2001, the United States Department of Justice ("DOJ") had notified the previous owner of an on-going investigation regarding possible violations of the Americans with Disabilities Act of 1990 ("ADA") and the Fair Housing Amendments Act of 1988 ("FHAA"). The previous owner disclosed to us in 2004 that DOJ had reviewed the property plans for certain of its properties, that DOJ had not issued a report regarding its review, that in October 2002, DOJ had indicated to the previous owner that the investigation was being delayed for an undetermined period of time, and that DOJ had not contacted the previous owner between 2002 and August 2004. In February 2010, DOJ served a subpoena on the Trust seeking access to one of the purchased properties in connection with a complaint filed by DOJ in March 2009 against the previous owner. On April 12, 2010, the DOJ inspected the property and found violations in the construction and design of the property as shown in the DOJ's subsequent report filed with the court on May 12, 2010. At this stage, the DOJ has represented that no EDR entity is a target of its investigation and that its action is limited to design and construction defects created by the previous owner in the original construction of the property. The investigation has not been resolved and, at this point, no conclusion can be reached regarding what will be required to conclude it or whether it will result in a dispute or legal proceedings between the Trust and DOJ or the previous owner. Noncompliance with the ADA and the FHAA could result in the imposition of injunctive relief, fines, awards of damages to private litigants or additional capital expenditures to remedy such noncompliance. The Trust is unable to predict the outcome of the DOJ's investigation.

The Operating Partnership entered into a letter of credit agreement in conjunction with the closing of the acquisition of a student housing community at the University of Florida. The letter of credit remains outstanding in the amount of \$1,500 at June 30, 2010 and is secured by the Second Amended Revolver.

On May 10, 2006, the Operating Partnership guaranteed \$23,200 of construction debt held by University Village-Greensboro LLC ("LLC") in order to receive a 25% ownership stake in the venture with College Park Apartments. Construction was completed, and the student housing community was occupied in August 2007. The construction loan was refinanced in June of 2010 and the Operating Partnership no longer guarantees the debt. In October of 2007, the Operating Partnership entered into a note receivable with the LLC in the amount of \$845. On October 30, 2008, the LLC borrowed an additional \$1,200, which was also guaranteed by the Operating Partnership that was repaid on November 10, 2009. The Operating Partnership loaned the LLC an additional \$1,200 in order to repay this loan by increasing the note receivable due to the Operating Partnership to \$2,021 and amending the maturity date to December 31, 2019. At December 31, 2009, the note had an outstanding balance of \$2,021, is

reflected in other assets in the accompanying condensed consolidated balance sheet and was subordinated to the construction debt held by the LLC. In June of 2010, the note receivable was repaid in full when the construction loan held by the LLC was refinanced as discussed above.

As owners and operators of real estate, environmental laws impose ongoing compliance requirements on the Trust. The Trust is not aware of any environmental matters or liabilities with respect to the student housing communities that would have a material adverse effect on the Trust's consolidated financial condition or results of operations.

In the normal course of business, the Trust is subject to claims, lawsuits and legal proceedings. While it is not possible to ascertain the ultimate outcome of such matters, in management's opinion, the liabilities, if any, in excess of amounts provided or covered by insurance, are not expected to have a material adverse effect on our financial position, results of operations or liquidity.

Under the terms of the limited partnership agreement of University Towers Operating Partnership, LP, so long as the contributing owners of such property hold at least 25% of the University Towers Partnership Units, the Trust has agreed to maintain certain minimum amounts of debt on the property to avoid triggering gain to the contributing owners. If the Trust fails to do this, the Trust must repay the contributing owners the amount of taxes they incur.

Under the terms of the purchase agreement with Place Properties, L.P., the Trust remains a party to a tax indemnification agreement whereby a payment could be required to be made to the former owner if any of the Place-communities are sold within five years of the purchase date. The contingency expires in January 2011.

After being awarded a development consulting contract, the Trust will enter into predevelopment consulting contracts with educational institutions to develop student housing communities on their behalf. The Trust will enter into reimbursement agreements that provide for the Trust to be reimbursed for the predevelopment costs incurred prior to the institution's governing body formally approving the final development contract. At June 30, 2010 and December 31, 2009, the Trust had reimbursable predevelopment costs of \$2,905 and \$1,563, respectively, which are reflected in other assets in the accompanying condensed consolidated balance sheets.

7. Acquisition and development of real estate investments

On June 28, 2007, the Trust acquired land in Carbondale, Illinois for \$1,099 in order to develop a wholly owned student apartment community near Southern Illinois University. After the acquisition, the Trust incurred an additional \$20,580 and \$11,797 in costs to develop the first and second phases of the development which opened in August of 2008 and 2009, respectively.

During 2008, the Trust also began development of a wholly-owned student apartment community located on the campus of Syracuse University. The Trust incurred \$25,792 in costs to develop the community which opened in August of 2009. In addition, the Trust owns and manages the community under a long-term ground lease from Syracuse University.

All costs related to the completed developments discussed above are classified in student housing properties, net in the accompanying condensed consolidated balance sheets.

8. Disposition of real estate investments and discontinued operations

On April 7, 2009, the Trust sold the College Station student housing community for a purchase price of \$2,550. The Trust received proceeds of \$250 and a note receivable of \$2,300. The note was interest only and accrued interest at a rate of 3% per annum through August 31, 2009 and matures on December 31, 2010 (the option to extend from December 31, 2009 to December 31, 2010 was exercised in September 2009). Beginning on September 1, 2009, the note accrues interest at a rate of 6% per annum and is payable in monthly installments through maturity. All unpaid principal and interest is due at maturity. However, if no default exists at the maturity date, the note may be extended to June 30, 2011. The note would remain interest only at a rate of 6% per annum payable in monthly installments

through December 31, 2010; thereafter, payments of principal and interest (at a rate of 6% per annum) would be made on a monthly basis. Any unpaid principal and interest would be due in full on June 30, 2011. The resulting net gain on disposition of approximately \$374 has been deferred against the note receivable.

The results of operations of College Station are reflected as discontinued operations in the accompanying condensed consolidated statement of operations for the three and six months ended June 30, 2009. The following table summarizes income/(loss) from discontinued operations, net of noncontrolling interests, for the three and six months ended June 30, 2009:

	Three months Ended June 30, 2009	Six months Ended June 30, 2009
Student housing leasing revenue	\$ 10	\$ 131
Student housing leasing operating expenses	12	124
Depreciation and amortization	—	25
Loss from discontinued operations attributable to Education Realty Trust, Inc.	\$ (2)	\$ (18)

9. Incentive plan

The Trust adopted the Education Realty Trust, Inc. 2004 Incentive Plan (the “Plan”) effective January 31, 2005. The Plan provides for the grant of stock options, restricted stock, restricted stock units, stock appreciation rights, other stock-based incentive awards and PIUs to employees, directors and other key persons providing services to the Trust. As of June 30, 2010, the Trust had 648,000 of its common stock reserved for issuance pursuant to the Plan, subject to adjustments for changes in the Trust’s capital structure, including share splits, dividends and recapitalizations. The number of shares reserved under the Plan is also subject to an annual adjustment, beginning on January 1, 2006, so that the total number of shares reserved under the Plan is equal to 4% of the aggregate number of shares outstanding on the last day of the preceding fiscal year; provided that such annual increase generally may not exceed 80,000 shares.

A restricted stock award is an award of the Trust’s common stock that is subject to restrictions on transferability and other restrictions as the Trust’s compensation committee determines in its sole discretion on the date of grant. The restrictions may lapse over a specified period of employment or the satisfaction of pre-established criteria as our compensation committee may determine. Except to the extent restricted under the award agreement, a participant awarded restricted shares will have all of the rights of a stockholder as to those shares, including, without limitation, the right to vote and the right to receive dividends or distributions on the shares. Restricted stock is generally taxed at the time of vesting. At June 30, 2010 and December 31, 2009, unearned compensation related to restricted stock totaled \$1,042 and \$40, respectively, and will be recorded as expense over the applicable vesting period. The value is determined based on the market value of the Trust’s common stock on the grant date. During each of the six months ended June 30, 2010 and 2009, compensation expense of \$212 and \$302, respectively, was recognized in the accompanying condensed consolidated statements of operations, related to the vesting of restricted stock.

On January 11, 2010, the Trust issued 50,000 shares of restricted common stock to an executive as an inducement to enter into an employment agreement with the Trust. The restricted stock will lapse ratably over five years as long as the executive remains employed with the Trust. The award was granted outside of the Plan described above pursuant to Section 303A.08 of the New York Stock Exchange Listed Company Manual. Additionally, on April 13, 2010, the Trust issued 30,000 shares of restricted common stock to an executive pursuant to the Plan discussed above. The restrictions on the shares will lapse ratably over 5 years as long as the executive remains employed by the Trust.

On March 11, 2010, the Trust adopted the 2010 Long-Term Incentive Plan (the “LTIP”). The purpose of the LTIP is to attract, retain and motivate the executive officers and certain key employees of the Trust and to promote the long-term growth and profitability of the Trust. On April 13, 2010, the Trust issued 136,000 shares of time vested restricted stock and 204,000 performance vested restricted stock units (“RSUs”) to executives and key employees under the LTIP pursuant to the Plan described above. The restricted stock will vest ratably over three years as long as the participants

remain employed with the Trust. The RSUs will vest based upon the Trust's achievement of total stockholder returns at specified levels as compared to the average total stockholder returns of a peer group of companies over the period of time beginning January 1, 2010 to January 1, 2013 (the "Performance Period"). At the end of the Performance Period, the compensation committee of the Board will determine the level and the extent to which the performance goal was achieved. RSUs that satisfy the performance goal will be converted into fully-vested shares of the Trust's common stock and taxed at the time of vesting. Prior to vesting, the participants are not eligible to vote or receive dividends or distributions on the RSUs. At June 30, 2010, unearned compensation related to RSUs totaled \$586 and will be recorded as expense over the applicable vesting period. The value was determined using a Monte Carlo simulation technique. During the six months ended June 30, 2010, compensation expense of \$117 was recognized in the accompanying condensed consolidated statement of operations, related to the vesting of RSUs.

PIUs were units in a limited liability company controlled by the Trust that held a special class of partnership interests in the Operating Partnership. On June 3, 2010, the Trust redeemed all of the outstanding PIUs for \$167 cash and 50,826 shares of the Trust's common stock. For purposes of the Plan, each PIU was deemed equivalent to an award of one share of the Trust's common stock and entitled the owner of such unit to receive the same quarterly per unit distributions as one common unit of the Operating Partnership. PIUs did not have full parity with Operating Partnership Units with respect to liquidating distributions; therefore, the value of PIUs was less than the value of the Trust's common stock. The grant or vesting of PIUs was not a taxable transaction to recipients. Conversely, we did not receive any tax deductions for compensation expense from the granting of PIUs. PIUs are treated as noncontrolling interests in the accompanying condensed consolidated financial statements at an amount equal to the holders' ownership percentage of the net equity of the Operating Partnership.

Total noncash compensation cost recognized in general and administrative expense in the accompanying condensed consolidated statements of operations for the six months ended June 30, 2010 and 2009, was \$382 and \$353, respectively. Additionally during each of the six months ended June 30, 2010 and 2009, the Trust issued 4,000 shares of common stock to an executive officer pursuant to the Plan and 30,000 shares to its independent directors pursuant to the Plan.

A summary of the stock-based incentive plan activity as of and for the six months ended June 30, 2010 is as follows:

	RSUs	PIU's	Stock Awards (1)	Total
Outstanding at December 31, 2009	—	275,000	216,000	491,000
Granted	—	—	54,000	54,000
Forfeited	—	(62,500)	—	(62,500)
Outstanding at March 31, 2010	—	212,500	270,000	482,500
Granted	204,000	—	246,826	450,826
Redeemed	—	(192,500)	—	(192,500)
Forfeited	—	(20,000)	—	(20,000)
Outstanding at June 30, 2010	204,000	—	516,826	720,826
Vested at June 30, 2010	—	—	276,496	276,496

(1) Includes restricted stock awards.

10. Subsequent events

Our board of directors declared a distribution of \$0.05 per share of common stock for the quarter ended on June 30, 2010. The distribution is payable on August 16, 2010 to stockholders of record at the close of business on July 30, 2010.

On July 14, 2010, the Trust entered into definitive agreements for the development, financing and management of a \$60,000, 20-story, 572-bed graduate student housing complex at the Science + Technology Park at Johns Hopkins Medical Institute. The Trust extended an \$18,000 second mortgage loan to the owner. This second mortgage loan has a thirty- year amortization and its debt service is subordinated to that of the construction loan. In addition the Trust has committed to provide a guarantee of repayment of a \$42,000 third-party construction loan for a fee if such is ultimately obtained. The Trust has also committed to fund the \$42,000 construction loan if such financing cannot be obtained from a third-party lender. Accordingly, in the event that the construction financing is not obtained from a third-party lender, the Trust would provide the entire \$60,000 necessary to finance the project. The project will have a \$2,500 annual reserve to fund any operating shortfalls. The second mortgage loan and related debt service are the first at risk if such reserve is not adequate to cover operating expenses and debt service on the construction loan.

In July 2010, the University of Texas Board of Regents selected the Trust to be the ground tenant to develop, own and manage a new high-rise apartment community near the core of the University of Texas at Austin campus. This will be the Trust's third wholly owned development and second project under the ONE Plan. As opposed to our third-party development services, all exposure to risks and capital requirements for these developments remain with the Trust.

On August 1, 2010, the Trust leased the student housing community known as Collegiate Village located in Macon, Georgia to Macon State College ("MSC") for monthly rent of \$30 for a period of one year. MSC will operate and manage the property while the lease is in place. MSC has the option to renew the lease for one additional year or has the option to purchase the property for \$7,500 plus the cost of capital improvements made at the request of MSC. The purchase option can be exercised at any time between February 28, 2011 and July 31, 2011.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(Dollars in thousands, except selected property information and share data)

The following discussion should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this Quarterly Report on Form 10-Q ("Report") and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2009. Certain statements contained in this Report are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to statements related to plans for future acquisitions, our business and investment strategy, market trends and projected capital expenditures. When used in this Report, the words "expect," "anticipate," "intend," "plan," "believe," "se," "estimate," "would," "could," "should," and similar expressions are generally intended to identify forward-looking statements. You should not place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this Report. We assume no obligation to update or supplement forward-looking statements that become untrue because of subsequent events. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. For further information about these and other factors that could affect our future results, please see the "Item 1A. — Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2009 and "Part II, Item 1A.-Risk Factors" below. Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements.

All references to "we," "our," "us," "EDR," "Trust" and the "Company" in this Report mean Education Realty Trust, Inc. and its consolidated subsidiaries, except where it is made clear that the term means only Education Realty Trust, Inc.

Overview

We are a self-managed and self-advised real estate investment trust ("REIT") engaged in the ownership, acquisition and management of high-quality collegiate student housing communities. We also provide student housing development consulting services to universities, charitable foundations and other third parties. We believe that we are one of the largest private owners, developers and managers of high-quality collegiate student housing communities in the United States in terms of both total beds owned and under management.

We earn income from rental payments we receive as a result of our ownership of student housing communities. We also earn income by performing property management services and development consulting services for third parties through Allen & O'Hara Education Services, Inc. ("AOES") and Allen & O'Hara Development Company, LLC ("AODC"), respectively. While we manage 100% of the communities we own, we do not recognize any fee income from their management on a consolidated basis. Furthermore, we do not recognize development fee income on a consolidated basis for communities that are being developed for ownership by the Trust.

We have elected to be taxed as a REIT for federal income tax purposes.

Our Business Segments

We define business segments by their distinct customer base and service provided. Management has identified three reportable segments: student housing leasing, management services and development consulting services. We evaluate each segment's performance based on pre-tax income and on net operating income, which is defined as income before depreciation, amortization, impairment losses, interest expense (income), gains (losses) on extinguishment of debt, equity in earnings of unconsolidated entities, noncontrolling interests and discontinued operations. The accounting

policies of the reportable segments are described in more detail in the summary of significant accounting policies in the footnotes to the accompanying condensed consolidated financial statements. Inter-company fees are reflected at the contractually stipulated amounts.

Student housing leasing

Student housing leasing revenue represented approximately 91.9% of our revenue, excluding operating expense reimbursements, for the six months ended June 30, 2010.

Unlike multi-family housing where apartments are leased by the unit, student-housing communities are typically leased by the bed on an individual lease liability basis. Individual lease liability limits each resident's liability to his or her own rent without liability for a roommate's rent. The number of lease contracts that we administer is therefore equivalent to the number of beds occupied instead of the number of apartment units occupied. A parent or guardian is required to execute each lease as a guarantor unless the resident provides adequate proof of income and/or pays a deposit, which is usually equal to two months rent.

Due to our predominantly private bedroom accommodations, the high level of student-oriented amenities, the fact that units are furnished and in most cases rent includes utilities, cable television and internet service and because of the individual lease liability, we believe our communities can typically command higher per-unit and per-square foot rental rates than most multi-family communities in the same geographic markets. We are also typically able to command higher rental rates than on-campus student housing, which tends to offer fewer amenities.

The majority of our leases commence mid-August and terminate the last day of July. These dates generally coincide with the commencement of the universities' fall academic term and the completion of the subsequent summer school session. As such, we are required to re-lease each community in its entirety each year, resulting in significant turnover in our tenant population from year to year. In 2009 and 2008, approximately 70.0% and 69.3%, respectively, of our leased beds were to students who were first-time residents at our communities. As a result, we are highly dependent upon the effectiveness of our marketing and leasing efforts during the annual leasing season that typically begins in November and ends in August of each year. Our communities' occupancy rates are therefore typically stable during the August to July academic year but are susceptible to fluctuation at the commencement of each new academic year.

Prior to the commencement of each new lease period, mostly during the first two weeks of August but also during September at some communities, we prepare the units for new incoming tenants. Other than revenue generated by in-place leases for returning tenants, we do not generally recognize lease revenue during this period referred to as "Turn" as we have no leases in place. In addition, we incur significant expenses during Turn to make our units ready for occupancy. These expenses are recognized when incurred. This Turn period results in seasonality in our operating results during the third quarter of each year.

Management services

For the six months ended June 30, 2010, revenue from our management services segment represented approximately 6.0% of our revenue, excluding operating expense reimbursements. We provide management services for collegiate student housing communities owned by educational institutions, charitable foundations, the Trust and others. Our management services typically cover all aspects of community operations, including residence life and student development, marketing, leasing administration, strategic relationships, information systems and accounting services. We provide these services pursuant to multi-year management agreements under which management fees are typically 3-5% of leasing revenue. These agreements usually have an initial term of two to five years with renewal options of like terms. As part of the management agreements, there are certain payroll and related expenses we pay on behalf of the property owners. These costs are included in reimbursable operating expenses and are required to be reimbursed to us by the property owners. We recognize the expense and revenue related to these reimbursements when incurred. These operating expenses are wholly reimbursable and therefore not considered by management when analyzing the operating performance of our management services business.

Development consulting services

For the six months ended June 30, 2010, revenue from our development consulting services represented approximately 2.1% of our revenue, excluding operating expense reimbursements. We provide development consulting services primarily to colleges and universities seeking to modernize their on-campus student housing communities but also to the Trust and other third-party investors.

Our development consulting services typically include the following:

- market analysis and evaluation of student housing needs and options;
- cooperation with college or university in architectural design;
- negotiation of ground lease, development agreement, construction contract, architectural contract and bond documents;
- oversight of architectural design process;
- coordination of governmental and university plan approvals;
- oversight of construction process;
- design, purchase and installation of furniture;
- pre-opening marketing to students; and
- obtaining final approvals of construction.

Fees for these services are typically 3-5% of the total cost of a project and are payable over the life of the construction period, which in most cases is one to two years in length. Occasionally, the development consulting contracts include a provision whereby the Trust can participate in project savings resulting from successful cost management efforts. These revenues are recognized once all contractual terms have been satisfied and no future performance requirements exist. This typically occurs after construction is complete.

In 2007, we began developing projects for our ownership and we plan to increase self-development activity going forward. We opened the first of these self-developed projects in 2008 in Carbondale, Illinois (Reserve at Saluki Point). In August of 2009, we opened a second phase at Carbondale and also completed the development of a wholly-owned self-developed community in Syracuse, New York. In July 2010, the University of Texas Board of Regents selected the Trust to be the ground tenant to develop, own and manage a new high-rise apartment community near the campus of the University of Texas at Austin. This will be the second project under the Trust's ONE Plan and its third wholly owned development.

Trends and Outlook

Rents and occupancy

We manage our communities to maximize revenues, which are primarily driven by two components: rental rates and occupancy rates. We customarily adjust rental rates in order to maximize revenues, which in some cases results in a lower occupancy rate, but in most cases results in stable or increasing revenue from the community. As a result, a decrease in occupancy may be offset by an increase in rental rates and may not be material to our operations. Periodically, certain of our markets experience increases in new on-campus student housing being provided by colleges and universities and off-campus student housing being provided by developers. This additional student housing both on and off campus can create competitive pressure on rental rates and occupancy.

For the six months ended June 30, 2010, same-community revenue per available bed decreased to \$377 and same-community physical occupancy increased to 88.5% compared to revenue per available bed of \$383 and physical

occupancy of 87.4% for the six months ended June 30, 2009. The results represent averages for the Trust's portfolio which are not necessarily indicative of every community in the portfolio. As would be expected, individual communities can and do perform both above and below these averages, and, at times, an individual community may experience a decline in total revenue due to local university and economic conditions. Our management focus is to assess these situations and address them as quickly as possible in an effort to minimize the Trust's exposure and reverse any negative trend.

The average physical and economic occupancies on a Legacy-community basis (which are the same-communities, excluding the Place-communities) for the second quarter of 2010 were 88.2% and 86.6%, respectively, compared to 87.7% and 86.3%, respectively, for the same quarter in 2009. The Place-communities had average physical and economic occupancies of 81.9% and 78.8%, respectively, for the second quarter of 2010 compared to 79.0% and 76.7% in the second quarter of 2009. The occupancies achieved for the 2009-2010 lease term were at rental rates approximately 2.0% below the prior lease term due to more rental discounting and a higher level of concessions than in the past.

As of July 19th, leasing for the 2010-2011 lease term on a same-community basis reflects approximately 82.9% of beds preleased compared to 79.8% at this time last year, with net rental rates up approximately 1.9% over the prior year. The Legacy-communities and the Place-communities have approximately 83.4% and 80.7%, respectively, of the beds preleased compared to 82.9% and 73.7%, respectively, at this time last year.

Development consulting services

Third-party development consulting services revenue experienced considerable growth from 2007 to 2009. However, third-party development revenue declined 50.6% to \$1,341 for the six months ended June 30, 2010 as credit market conditions in 2009 delayed the financing and commencement of construction on previously awarded projects. Our development team is seeing an increase in interest from colleges and universities that are considering new housing and continues to receive requests for proposals on new development projects. This is evidenced by third-party development awards made in March 2010 for a 634 bed on-campus community at Mansfield University of Pennsylvania and July 2010 for a 572 bed graduate student housing complex at the Science + Technology Park at Johns Hopkins Medical Institute. These new development awards increased our third-party development fee backlog to \$7,581 at June 30, 2010. However, due to the delays experienced through June 30, 2010 and until the credit markets return to more historical norms, we expect a lower level of third-party development revenue throughout 2010.

The Johns Hopkins project is scheduled to open in the summer of 2012. The Trust will develop and manage the building which will be constructed on land owned by Johns Hopkins University and leased to a subsidiary of East Baltimore Development, Inc., a nonprofit partnership of private and public entities dedicated to Baltimore's urban revitalization. Under terms of the agreements, Education Realty Trust will (a) receive development and construction oversight fees and reimbursement of pre-development expenses, (b) invest in the form of an \$18,000 second mortgage, (c) provide a repayment guarantee of the construction first mortgage, and (d) receive a 10-year management contract. The Trust will recognize the development services revenue and interest income earned on the second mortgage when the second mortgage is repaid.

The amount and timing of future revenues from development consulting services will be contingent upon our ability to successfully compete in public colleges and universities' competitive procurement processes, our ability to successfully structure financing of these projects and our ability to ensure completion of construction within agreed construction timelines and budgets. To date, we have completed construction on all of our development projects in time for their targeted occupancy dates.

Student housing operating costs

Cost reduction initiatives put in place in the fourth quarter of 2008 helped drive a reduction in same community operating expenses for the year ended December 31, 2009. For the six months ended June 30, 2010, same community operating expenses remained relatively flat when compared to the same period in 2009 due to the reduction of expenses achieved in the prior year that were maintained during the first and second quarters of 2010. Although we do not expect significant reductions in same community operating expenses going forward, we will continue to maintain our focus to operate our properties as efficiently as possible.

General and administrative costs

For the year-ended December 31, 2009, general and administrative costs, before development pursuit costs, remained relatively flat when compared to 2008. Starting in 2010, we began a reorganization program and as a result have seen a reduction in general and administrative expenses, before severance and development pursuit costs, when compared to the same period in 2009. We expect this trend to continue through out 2010 and will continue to focus on operating efficiencies where appropriate.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (“GAAP”) requires management to make estimates and assumptions in certain circumstances that affect amounts reported in our financial statements and related notes. In preparing these financial statements, management has utilized all available information, including its past history, industry standards and the current economic environment, among other factors, in forming its estimates and judgments of certain amounts included in the financial statements, giving due consideration to materiality. The ultimate outcome anticipated by management in formulating its estimates may not be realized. Application of the critical accounting policies below involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. In addition, other companies in similar businesses may utilize different estimation policies and methodologies, which may impact the comparability of our results of operations and financial condition to those companies.

Student housing leasing revenue recognition

Student housing leasing revenue is comprised of all revenue related to the leasing activities at our student housing communities and includes revenues from leasing apartments by the bed, food services, parking space rentals and certain ancillary services.

Students are required to execute lease contracts with payment schedules that vary from per semester to monthly. Generally, a parental guarantee must accompany each executed contract. Receivables are recorded when due, while leasing revenue and related lease incentives/concessions and nonrefundable application and service fees are recognized on a straight-line basis over the term of the contracts. Balances are considered past due when payment is not received on the contractual due date. Allowances for doubtful accounts are established by management when it is determined that collection is doubtful.

Revenue and cost recognition of development consulting services

Costs associated with the pursuit of third-party development consulting contracts are expensed as incurred until such time as we have been notified of a contract award or reimbursement has been otherwise guaranteed by the customer. At such time, the reimbursable portion of such costs is recorded as a receivable. Development consulting revenues are recognized using the percentage of completion method as determined by construction costs incurred relative to the total estimated construction costs. Occasionally, our development consulting contracts include a provision whereby we can participate in project savings resulting from our successful cost management efforts. We recognize these revenues once all contractual terms have been satisfied and we have no future performance requirements. This typically occurs after construction is complete. Costs associated with development consulting services are expensed as incurred. We generally receive a significant percentage of our fees for development consulting services upon closing of the project financing, a portion of the fee over the construction period and the balance upon substantial completion of construction. Because revenue from these services is recognized for financial reporting purposes utilizing the percentage of completion method, differences occur between amounts received and revenues recognized. Differences also occur between amounts recognized for tax purposes and those recognized for financial reporting purposes. Because REITs are required to distribute 90% of their taxable income, our distribution requirement with respect to our income from third-party services may exceed that reflected as net income for financial reporting purposes from such activities.

We also periodically enter into joint venture arrangements whereby we provide development consulting services to third-party student housing owners in an agency capacity. We recognize our portion of the earnings in each joint venture based on our ownership interest, which is reflected after net operating income in our condensed consolidated statement of operations as equity in earnings of unconsolidated entities. Our revenue and operating expenses could

fluctuate from period to period based on the extent to which we utilize joint venture arrangements to provide third-party development consulting services.

Student housing property acquisitions and dispositions

Land, land improvements, buildings and improvements and furniture, fixtures and equipment are recorded at cost. Buildings and improvements are depreciated over 15 to 40 years, land improvements are depreciated over 15 years and furniture, fixtures, and equipment are depreciated over 3 to 7 years. Depreciation is computed using the straight-line method for financial reporting purposes.

Acquired student housing communities' results of operations are included in the Trust's results of operations from the respective dates of acquisition. Appraisals, estimates of cash flows and valuation techniques are used to allocate the purchase price of acquired property between land, land improvements, buildings and improvements, furniture, fixtures and equipment and identifiable intangibles such as amounts related to in-place leases. On January 1, 2009, the Trust adopted the authoritative guidance issued by the FASB, which prospectively changed the requirements for how an acquirer recognizes and measures the identifiable assets acquired, the liabilities assumed, any noncontrolling interests in the acquiree and the goodwill acquired. The guidance also enhanced the disclosures to enable the evaluation of the nature and financial effects of the business combination and requires that pre-acquisition costs be expensed as incurred. Pre-acquisition costs, which include legal and professional fees and other third-party costs related directly to the acquisition of a community, were accounted for as part of the purchase price prior to the adoption of the guidance issued by the FASB.

When a student housing community has met the criteria to be classified as held for sale, the fair value less cost to sell such asset is estimated. If fair value less cost to sell the asset is less than the carrying amount of the asset, an impairment charge is recorded for the estimated loss. Depreciation expense is no longer recorded once a student housing community has met the held for sale criteria. The related carrying value of the community is recorded as held for sale in the consolidated balance sheet and operations of student housing communities that are sold or classified as held for sale are recorded as part of discontinued operations for all periods presented.

Repairs and maintenance

The costs of ordinary repairs and maintenance are charged to operations when incurred. Major improvements that extend the life of an asset beyond one year are capitalized and depreciated over the remaining useful life of the asset. Planned major repair, maintenance and improvement projects are capitalized when performed. In some circumstances, the lenders require us to maintain a reserve account for future repairs and capital expenditures. These amounts are not available for current use and are recorded as restricted cash on our condensed consolidated balance sheet.

Long lived assets — impairment

Management is required to assess whether there are any indicators that our real estate assets may be impaired. A community's value is considered impaired if management's estimate of the aggregate future cash flows (undiscounted and without interest charges) to be generated by the community, based on its intended use, is less than the carrying value of the community. These estimates of cash flows are based on factors such as future intended use of the asset, expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. To the extent impairment has occurred, the loss will be measured as the excess of the carrying amount of the community over the fair value of the community, thereby reducing our net income.

Use of estimates

Significant estimates and assumptions are used by management in determining the recognition of third-party development consulting revenue under the percentage of completion method, useful lives of student housing assets, the valuation of goodwill, the initial valuations and underlying allocations of purchase price in connection with

student housing property acquisitions, the determination of fair value for impairment assessments, and in recording the allowance for doubtful accounts. Actual results could differ from those estimates.

We review our assets, including our student housing communities, communities under development, and goodwill for potential impairment indicators whenever events or circumstances indicate that the carrying value might not be recoverable. Impairment indicators include, but are not limited to, declines in our market capitalization, overall market factors, changes in cash flows, significant decreases in net operating income and occupancies at our operating properties, changes in projected completion dates of our development projects, and sustainability of development projects. Our tests for impairment are based on the most current information available and if conditions change or if our plans regarding our assets change, it could result in additional impairment charges in the future. However, based on our plans with respect to our operating properties and those under development, we believe the carrying amounts are recoverable.

Recently Adopted Accounting Pronouncements

On January 1, 2009, the Trust adopted the authoritative guidance issued by the FASB on business combinations. The guidance establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. The guidance also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination and requires that pre-acquisition costs be expensed as incurred. The adoption did not have a material impact on the consolidated financial statements.

On January 1, 2009, the Trust adopted the authoritative guidance issued by the FASB that changes the accounting and reporting for noncontrolling interests. The guidance establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The guidance also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. As a result of the adoption, the Trust has reported nonredeemable noncontrolling interests as a component of equity in the consolidated balance sheets. The prior periods presented have also been reclassified to conform to the current classification.

In May 2009, the FASB issued new authoritative guidance on subsequent events. The new guidance is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, this standard sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This guidance is effective for financial statements issued for fiscal years and interim periods beginning after June 15, 2009 and is applied prospectively. The Trust adopted this authoritative guidance during the three months ended September 30, 2009. In February 2010, the FASB amended the authoritative guidance on subsequent events to remove the requirement for SEC filers to disclose the date through which an entity has evaluated subsequent events. The new guidance is effective upon issuance and had no impact on the Trust's consolidated financial statements.

In June 2009, the FASB issued guidance to establish only two levels of GAAP, authoritative and nonauthoritative. The FASB Accounting Standards Codification (the "Codification") is the source of authoritative, nongovernmental GAAP, except for rules and interpretive releases of the SEC, which are sources of authoritative GAAP for SEC registrants. All other non-grandfathered, non-SEC accounting literature not included in the Codification is nonauthoritative. This standard is effective for financial statements issued for fiscal years and interim periods ending after September 15, 2009. As the Codification was not intended to change or alter existing GAAP, it did not have any impact on the consolidated financial statements.

In June 2009, the FASB issued authoritative guidance to improve financial reporting by enterprises involved with variable interest entities. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2009, with early adoption prohibited. The adoption did not have a material impact on the consolidated financial statements.

In January 2010, the FASB updated the authoritative guidance for accounting and reporting for decreases in ownership of a subsidiary. The updated guidance clarifies the scope of the guidance related to a decrease in ownership provisions and expands the disclosures related to the deconsolidation of a subsidiary or group of assets. The updated guidance is effective for financial statements issued for fiscal years and interim periods beginning after December 15, 2009. The adoption did not have a material impact on the consolidated financial statements.

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

Results of Operations for the Six Months Ended June 30, 2010 and 2009

The following table presents the results of operations for Education Realty Trust, Inc. for the six months ended June 30, 2010 and 2009:

- (1) Physical occupancy represents a weighted average of the month-end occupancies for the respective period.

- (2) Economic occupancy represents the effective occupancy calculated by taking net apartment rent accounted for on a GAAP basis for the respective period divided by market rent for the respective period.
- (3) NarPAB represents GAAP net apartment rent for the respective period divided by the sum of the design beds in the portfolio for each of the included months.
- (4) Represents other GAAP-based income for the respective period divided by the sum of the design beds in the portfolio for each of the included months. Other income includes service/application fees, late fees, termination fees, parking fees, transfer fees, damage recovery, utility recovery, and other miscellaneous fees.
- (5) Represents total revenue (net apartment rent plus other income) for the respective period divided by the sum of the design beds in the portfolio for each of the included months.
- (6) Represents property-level operating expense excluding management fees, depreciation and amortization divided by the sum of the design beds for each of the included months.
- (7) Represents the sum of the monthly design beds in the portfolio during the period.
- (8) This information excludes property information related to College Station (discontinued operations).
- (9) Represents operating income divided by revenue.

Total revenue in the student housing leasing segment was \$58,045 for the six months ended June 30, 2010. This represents an increase of \$765, or 1.3%, from the same period in 2009. This increase included \$1,668 related to the new communities, University Village on Colvin (Syracuse) and The Reserve at Saluki Pointe (Carbondale), that opened in the third quarter of 2009. Revenue at the Place-communities increased 4.2%, or \$440, on a 4.2% improvement in occupancies, a decline in rental rates of approximately 0.4% and a 0.3% increase in other rental revenue. These increases were offset by a 3.0%, or \$1,342, decline in Legacy-community revenue, which was the result of a 2.5% decline in rental rates, a 0.7% decline in other rental revenue and a 0.2% improvement in occupancies.

Operating expenses in the student housing leasing segment increased \$557, or 2.0%, to \$28,842 for the six months ended June 30, 2010 as compared to the same period in 2009. The new communities that opened in the third quarter of 2009 contributed \$475 of the increase from the prior year. The Place-community operating expenses increased \$149, or 2.7% due to higher utilities and maintenance costs. These increases were offset by a decline in Legacy-community operating expenses of \$76, or 0.4% which was primarily attributable to a decline in real estate taxes, insurance and bad debt expense offset by higher utilities.

Development consulting services

The following table represents the development consulting projects that were active during the six months ended June 30, 2010 and 2009:

Project	Beds	Fee Type	Recognized Earnings		
			2010	2009	Difference
University of Michigan	896	Development fee	\$ 1	\$ 155	\$ (154)
Fontainebleu Renovation Project	435	Development fee	—	50	(50)
West Chester— Phase I	1,197	Development fee	—	987	(987)
Indiana University of Pennsylvania — Phase III	1,084	Development fee	—	739	(739)
Indiana University of Pennsylvania — Phase IV	596	Development fee	535	53	482
Colorado State University — Pueblo I	253	Development fee	—	354	(354)
Colorado State University — Pueblo II	500	Development fee	513	196	317
Auraria Higher Education System	685	Development fee	—	182	(182)
SUNY College of Environmental Science and Forestry	454	Development fee	67	—	67
Miscellaneous consulting fees	—	Consulting fee	225	—	225
Third-party development consulting services			1,341	2,716	(1,375)
Southern Illinois University— Carbondale	768	Construction oversight fee	—	86	(86)
Syracuse University	432	Development fee	—	962	(962)
Intersegment development services			—	1,048	(1,048)
Development consulting services			\$ 1,341	\$ 3,764	\$ (2,423)

Development consulting services revenue decreased \$2,423, or 64.4%, to \$1,341 for the six months ended June 30, 2010 as compared to the same period in 2009. Third-party development consulting revenue declined \$1,375 from the prior year as credit market conditions in 2009 delayed the financing and the commencement of construction on previously awarded projects, resulting in only three active third-party development jobs so far this year. However, the decrease in active third-party development consulting revenue was offset by \$225 in revenue related to consulting

services that were unrelated to an active development project. The intersegment revenue decline relates to two internal developments that were completed in the third quarter of 2009. As these fees relate to development services performed on projects owned by the Trust, they are eliminated in the accompanying condensed consolidated financial statements.

General and administrative expenses increased \$139, or 9.4%, for the six months ended June 30, 2010. This increase is primarily due to an increase in third-party development pursuit costs of \$289 offset by a decrease in payroll and benefits.

Management services

Total management services revenue decreased by \$49, or 1.3%, to \$3,769 for the six months ended June 30, 2010 compared to the same period in 2009. This decline was mainly driven by lower third-party management fee revenue as a result of the 2009 cancellation of a contract for one community in Alabama. Revenue for existing contracts and intersegment revenue related to our owned portfolio remained essentially flat when compared to the same period in 2009.

General and administrative costs increased \$238 as compared to the same period in 2009 due to \$519 of severance costs incurred in 2010. Excluding the severance costs, general and administrative costs in the management services segment have been reduced by 8% from the prior year.

Unallocated corporate expenses

Unallocated corporate expenses represent general and administrative expenses that are not allocated to any of our business segments. For the six months ended June 30, 2010, unallocated corporate expenses remained relatively flat when compared to the prior year at approximately \$3,352.

Nonoperating expenses

Nonoperating expenses increased \$153, or 0.6%, for the six months ended June 30, 2010, compared to the same period in 2009. This increase includes an \$830 gain on extinguishment of debt in the prior year related to the reduction in mortgage debt on certain Place-communities and \$716 in additional depreciation and amortization related to the new communities that opened in the third quarter of 2009. These increases were offset by a \$1,433 decline in interest expense as a result of the July 2009 repayment of the Amended Revolver and a reduction in mortgage debt.

Equity in earnings of unconsolidated entities

Equity in earnings of unconsolidated entities represents our share of the net income or loss related to four investments in unconsolidated entities that own student housing communities. For the six months ended June 30, 2010, equity in earnings was \$86 compared to \$146 in the prior year. The main drivers of the decrease were a decline in occupancy and an increase in interest expense at our joint venture property in Greensboro, North Carolina and a decline in occupancy at our joint venture property in Isla Vista, California.

- (5) Represents total revenue (net apartment rent plus other income) for the respective period divided by the sum of the design beds in the portfolio for each of the included months.
- (6) Represents property-level operating expense excluding management fees, depreciation and amortization divided by the sum of the design beds for each of the included months.

(7) Represents the sum of the monthly design beds in the portfolio during the period.

(8) This information excludes property information related to College Station (discontinued operations).

(9) Represents operating income divided by revenue.

Total revenue in the student housing leasing segment was \$28,394 for the three months ended June 30, 2010. This represents an increase of \$427, or 1.5%, from the same period in 2009. The increase in student housing leasing revenue included \$716 related to the new communities, University Village on Colvin (Syracuse) and The Reserve at Saluki Pointe (Carbondale). In addition revenue at Place-communities increased 3.7%, or \$194, on a 3.3% improvement in occupancies, a decline in rental rates of approximately 0.1% and a 0.5% increase in other rental revenue. These increases were offset by a \$483, or 2.2%, decline in Legacy-community revenue, which was the result of a 2.1% decline in rental rates, a 0.5% decline in other rental revenue and a 0.4% increase in occupancy.

Operating expenses in the student housing leasing segment increased \$283, or 2.0%, to \$14,273 for the three months ended June 30, 2010 as compared to the same period in 2009. The growth in operating expenses was the result of an increase of \$236 related to the new communities, University Village on Colvin and The Reserve at Saluki Pointe, while operating expenses at the Place-communities increased \$59 primarily due to higher utilities. Operating expenses at the Legacy-communities were relatively flat.

Development consulting services

The following table represents the development consulting projects that were active during the three months ended June 30, 2010 and 2009:

Project	Beds	Fee Type	Recognized Earnings		
			2010	2009	Difference
University of Michigan	896	Development fee	\$ —	\$ 121	\$ (121)
SUNY College of Environmental Science & Forestry	454	Development Fee	67	—	67
Fontainebleu Renovation Project	435	Development fee	—	4	(4)
West Chester— Phase I	1,197	Development fee	—	469	(469)
Indiana University of Pennsylvania — Phase III	1,084	Development fee	—	266	(266)
Indiana University of Pennsylvania — Phase IV	596	Development fee	202	53	149
Colorado State University — Pueblo I	253	Development fee	—	159	(159)
Colorado State University — Pueblo II	500	Development fee	154	187	(33)
Miscellaneous consulting fees	—	Consulting fee	225	—	225
Third-party development consulting services			648	1,259	(611)
Southern Illinois University— Carbondale	768	Construction oversight fee	—	51	(51)
Syracuse University	432	Development fee	—	523	(523)
Intersegment development services			—	574	(574)
Development consulting services			\$ 648	\$ 1,833	\$ (1,185)

Development consulting services revenue decreased \$1,185, or 64.6%, to \$648 for the three months ended June 30, 2010 as compared to the same period in 2009. Third-party development consulting revenue declined \$611 from the prior year as credit market conditions in 2009 delayed the financing and the commencement of construction on previously awarded projects, resulting in only three active third-party development jobs so far this year. However, the decrease in active third-party development consulting revenue was offset by \$225 in revenue related to consulting services that were unrelated to an active development project. The intersegment revenue decline relates to two internal developments that were completed in the third quarter of 2009. As these fees relate to development services performed on projects owned by the Trust, they are eliminated in the accompanying condensed consolidated financial statements.

General and administrative expenses increased \$93 or 12.4% for the quarter. This increase is primarily due to an increase in third-party development pursuit costs of \$120 offset by a decrease in payroll and benefits.

Management services

Total management services revenue remained essentially flat for the three months ended June 30, 2010 when compared to the same period in 2009 due to a consistent number of management contracts each period and relatively flat revenue at those projects.

General and administrative costs for our third-party management services segment increased \$100 as compared to the same period in 2009 due to \$227 of severance costs incurred in the second quarter of 2010. Excluding these costs general and administrative expenses were reduced 7.4% from the prior year.

Unallocated corporate expenses

Unallocated corporate expenses represent general and administrative expenses that are not allocated to any of our business segments. For the three months ended June 30, 2010, unallocated corporate expenses remained essentially flat at \$1,661 for the quarter.

Nonoperating expenses

Nonoperating expenses increased \$602 or 4.9% for the three months ended June 30, 2010, compared to the same period in 2009. This increase includes an \$830 gain on extinguishment of debt in the prior year related to the reduction in mortgage debt on certain Place-communities and \$416 in additional depreciation and amortization related to the two new communities. Offsetting these increases was a decline in interest expense as a result of the July 2009 repayment of the Amended Revolver and a reduction in mortgage debt.

Equity in earnings of unconsolidated entities

Equity in earnings of unconsolidated entities represents our share of the net income or loss related to four investments in unconsolidated entities that own student housing communities. For the three months ended June 30, 2010, equity in earnings was \$7 compared to \$46 in the prior year. The main drivers of the decrease were a decline in occupancy and an increase in interest expense at our joint venture property in Greensboro, North Carolina.

Funds from Operations (FFO)

As defined by the National Association of Real Estate Investment Trusts ("NAREIT"), Funds from Operations, FFO, represents net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of property, plus real estate related depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures. Adjustments for unconsolidated partnerships and joint ventures will be calculated to reflect funds from operations on the same basis. We present FFO available to all stockholders and unitholders because we consider it to be an important supplemental measure of our operating performance and believe it is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. As such, we also exclude the impact of noncontrolling interest in our calculation. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. Because FFO excludes depreciation and amortization unique to real estate, gains and losses from property dispositions and extraordinary items, it provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities and interest costs, providing perspective not immediately apparent from net income.

We compute FFO in accordance with standards established by the Board of Governors of NAREIT in its March 1995 White Paper (as amended in November 1999 and April 2002), which may differ from the methodology for calculating FFO utilized by other equity REITs and, accordingly, may not be comparable to such other REITs. Further, FFO does not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments and uncertainties. We believe that net income is the most directly comparable GAAP measure to FFO available to stockholders and unitholders. FFO should not be considered as an alternative to net income (loss) (computed in accordance with GAAP) as an indicator of our financial performance or to cash flow from operating activities (computed in accordance with GAAP) as an indicator of our liquidity, nor is it indicative of funds available to fund our cash needs, including our ability to make distributions.

The following table presents a reconciliation of FFO available to our stockholders and unitholders to net income for the three and six months ended June 30, 2010 and 2009:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Net income (loss) attributable to Education Realty Trust, Inc.	\$ (590)	\$ 231	\$ (420)	\$ 664
Student housing property depreciation and amortization of lease intangibles	7,373	6,954	14,683	13,959
Equity portion of real estate depreciation and amortization on equity investees	124	122	248	244
Depreciation and amortization of discontinued operations	—	—	—	25
Noncontrolling interests	(12)	(53)	199	157
Funds from operations	\$ 6,895	\$ 7,254	\$ 14,710	\$ 15,049

Liquidity and Capital Resources

Second Amended Revolver, Master Secured Credit Facility and other indebtedness

On November 20, 2009, the Operating Partnership entered into a Second Amended and Restated Credit Agreement (the “Second Amended Revolver”). The Second Amended Revolver amended and restated the existing secured revolving credit facility agreement dated March 30, 2006 (the “Amended Revolver”). The previous facility had a maximum availability of \$100,000 and was scheduled to mature on March 30, 2010. The Second Amended Revolver has a maximum availability of \$95,000 and within the first two years of the date of execution of the agreement may be, upon satisfaction of certain conditions, expanded to a total of \$150,000.

Availability under the Second Amended Revolver is limited to a “borrowing base availability” equal to the lesser of (i) 60% of the property asset value (as defined in the agreement) of the properties securing the facility and (ii) the loan amount which would produce a debt service coverage ratio of no less than 1.40. As of June 30, 2010, our borrowing base was \$43,364, we had no amounts outstanding under the Second Amended Revolver and we had letters of credit outstanding of \$1,500 (see Note 6 to our accompanying condensed consolidated financial statements); thus, our remaining borrowing base availability was \$41,864. The Trust has five communities unencumbered by debt of which two are eligible to be included in the pool of properties pledged as collateral against borrowings under the Second Amended Revolver. The Trust estimates that the borrowing base availability would increase by approximately \$10,100 if these two communities were included.

At June 30, 2010, the Trust had ten properties unencumbered by mortgage debt. Five of the ten properties have, however, been pledged as collateral against any borrowings under our Second Amended Revolver.

The Trust serves as the guarantor for any funds borrowed by the Operating Partnership under the Second Amended Revolver. Additionally, the Second Amended Revolver is secured by a cross-collateralized, first mortgage lien on five otherwise unmortgaged properties. The Second Amended Revolver matures on November 20, 2012, provided that the Operating Partnership may extend the maturity date for one year subject to certain conditions. The interest rate per annum applicable to the Second Amended Revolver is, at the Operating Partnership’s option, equal to a base rate or London InterBank Offered Rate (“LIBOR”) plus an applicable margin based upon our leverage.

The Second Amended Revolver contains customary affirmative and negative covenants and contains financial covenants that, among other things, require the Trust and its subsidiaries to maintain certain minimum ratios of “EBITDA” (earnings before payment or charges of interest, taxes, depreciation, amortization or extraordinary items) as compared to interest expense and total fixed charges. The financial covenants also include consolidated net worth and leverage ratio tests.

The Trust is prohibited from making distributions unless either of the following conditions is met: (a) after giving effect to the distribution, the total leverage ratio is less than or equal to 65% prior to November 20, 2012, and less than or equal to 60% thereafter; or (b) the distribution, when considered along with all other distributions for the last 3 quarters, does not exceed 90% of funds from operations for the applicable period.

At June 30, 2010, the Trust had outstanding mortgage and construction indebtedness of \$398,645 (excluding unamortized debt premium of \$598). \$23,895 relates to construction debt that is disclosed below and \$325,775 pertains to outstanding mortgage debt that is secured by the underlying student housing properties or leaseholds and bears interest at fixed rates ranging from 4.92% to 6.97%. The remaining \$48,975 bears interest at variable rates based on the 30-day LIBOR plus an applicable margin (3.67%).

At June 30, 2010, we had borrowed \$10,759 and \$4,310 on construction loans with availability of \$11,000 and \$12,285, respectively, related to the development of a wholly owned student apartment community near Southern Illinois University (Carbondale) (see Note 7). The loans bear interest equal to LIBOR plus 110 and 200 basis point margins, respectively, and were interest only through June 14, 2010. On June 14, 2010, the Trust paid down \$5,013 of the outstanding construction debt and extended the maturity date until June 28, 2012. Going forward, annually, a debt service coverage ratio calculated on a rolling 12 months basis, of not less than 1.25 to 1, must be maintained with principal and interest being repaid on a monthly basis.

At June 30, 2010, the Trust had \$8,826 outstanding on a \$14,300 construction loan related to the development of a wholly-owned student apartment community at Syracuse University (see Note 7 to our accompanying condensed consolidated financial statements). The loan bears interest equal to LIBOR plus a 110 basis point margin and is interest only through September 29, 2011. Commencing with the quarter ended June 30, 2011, and annually thereafter, a debt service coverage ratio calculated on a rolling 12 month basis, of not less than 1.25 to 1, must be maintained in order to extend the loan until September 29, 2013, with principal and interest being repaid on a monthly basis.

Liquidity outlook and capital requirements

During the six months ended June 30, 2010, we generated \$12,503 of cash from operations, received proceeds of \$2,078 related to notes receivable, and when combined with \$31,169 of existing cash, we were able to invest \$8,275 of capital into existing communities, distribute \$6,250 to our stockholders and unitholders, repay \$5,013 in construction debt and end the quarter with \$23,348 of cash.

Our current liquidity needs include funds for distributions to our stockholders and unitholders, including those required to maintain our REIT status and satisfy our current annual distribution target of \$0.20 per share/unit, funds for capital expenditures, funds for debt repayment and, potentially, funds for new property acquisition and development. We generally expect to meet our short-term liquidity requirements through cash provided by operations, debt refinancing, existing cash, recycling capital by way of potential asset sales and raising additional equity capital.

Distributions for the six months ended June 30, 2010 totaled \$6,250 or \$0.10 per weighted average share/unit, compared to cash provided by operations of \$12,503, or \$0.22 per weighted average share/unit. Our current targeted annual dividend rate is \$0.20 per share/unit.

Based on our closing share price of \$6.03 on June 30, 2010, our total enterprise value was \$725,759. With net debt (total debt less cash) of \$375,297 at June 30, 2010, our debt to enterprise value was 51.7% compared to 57.2% at December 31, 2009. With gross assets of \$947,083, which excludes accumulated depreciation of \$156,028, our debt to gross assets was 42.1% at June 30, 2010 as compared to 42.9% at December 31, 2009.

Management believes that it has strengthened the Company's balance sheet through its follow-on equity offering in July 2009 and the successful pay down and refinancing of the debt related to the Place-communities in December 2009. These steps have relieved near-term pressure on our balance sheet and, coupled with our current annual dividend rate of \$0.20 as established by our Board of Directors in 2009, the Company is positioned to take advantage of growth opportunities by way of acquisition and development, both on and off campus.

As discussed in Note 2 to the condensed consolidated financial statements, the Trust implemented an at-the-market equity distribution program during the second quarter. The Trust may sell shares of its common stock having an aggregate offering amount of up to \$50,000. During the quarter ended June 30, 2010, the Trust sold no shares of common stock pursuant to the equity distribution program. Sales of common stock will depend upon market conditions and other factors to be determined by the Trust.

An additional source of capital, subject to appropriate market conditions, is the targeted disposition of non-strategic properties. We continually assess all of our properties, the markets in which they are located and the colleges and universities they serve, to determine if any dispositions are necessary or appropriate. The net proceeds from the sale of any asset would provide additional capital which would most likely be used to pay down debt and possibly finance acquisition/development growth or other operational needs.

We intend to invest in additional communities only as suitable opportunities arise. We also plan to develop communities for our ownership and management. In the short term, we intend to fund any acquisitions or developments with working capital, borrowings under first mortgage property secured debt, construction loans or our Second Amended Revolver. We intend to finance property acquisitions and development projects over the longer term with cash from operations, the proceeds from potential asset sales, additional issuances of common or preferred stock, private capital in the form of joint ventures, debt financing and issuances of units in our Operating Partnership. There can be no assurance, however, that such funding will be obtained on reasonable terms, or at all, particularly in light of current capital market conditions.

Our existing universal shelf registration statement permits us to issue up to \$250,000 in securities, including equity or debt securities, from time to time in one or more transactions depending on market conditions and terms. As of June 30, 2010, \$200,000 of securities registered remains available for issuance.

Predevelopment expenditures

Our third-party development consulting activities have historically required us to fund predevelopment expenditures such as architectural fees, permits and deposits. Because the closing of a development project's financing is often subject to third-party delay, we cannot always predict accurately the liquidity needs of these activities. We frequently incur these predevelopment expenditures before a financing commitment has been obtained and, accordingly, bear the risk of the loss of these predevelopment expenditures if financing cannot ultimately be arranged on acceptable terms. However, we typically obtain a guarantee of repayment of these predevelopment expenditures from the project owner, but no assurance can be given that we would be successful in collecting the amount guaranteed in the event that project financing is not obtained.

In 2007, we began developing projects for the Trust's ownership. In 2009 we established the ONE Plan, under which the Company uses its equity and financial stability to fund and own projects on university land. We plan to utilize both to increase self-development activity going forward. We opened two wholly-owned, self-developed communities in August of 2008 and 2009 which serve Southern Illinois University and Syracuse University, respectively. In July 2010, the University of Texas Board of Regents selected the Trust to be the ground tenant to develop, own and manage a new high-rise apartment community near the core of the University of Texas at Austin campus. This will be the Trust's third wholly owned development and second project under the ONE Plan. As opposed to our third-party development services, all exposure to risks and capital requirements for these developments remain with the Trust.

Long-term liquidity requirements

Our long-term liquidity requirements consist primarily of funds necessary for scheduled debt maturities, renovations and other non-recurring capital expenditures that are needed periodically for our communities as well as potential community acquisitions and developments. We expect to meet these needs through existing working capital, cash provided by operations, additional borrowings under our Second Amended Revolver, net proceeds from potential asset sales, the issuance of equity instruments, including common or preferred stock, Operating Partnership units or additional debt, if market conditions permit. We believe these sources of capital will be sufficient to provide for our long-term capital needs. Current market conditions (or a continuing deterioration in such conditions), however, may make additional capital more expensive for us. There can be no assurance that we will be able to obtain additional

financing under satisfactory conditions, or at all, or that we will make any investments in additional communities. Our Second Amended Revolver is a material source to satisfy our long-term liquidity requirements. As such, compliance with the financial and operating debt covenants is material to our liquidity.

Commitments

The following table summarizes our contractual obligations as of June 30, 2010:

	Payment due by Period				
	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
Commitments and Contractual Obligations:					
Long-Term Debt Obligations(1)	\$ 2,166	\$ 96,437	\$ 133,143	\$ 166,899	\$ 398,645
Contractual Interest Obligations(2)	10,946	39,539	26,546	24,746	101,777
Operating Lease and Future Purchase Obligations (3)	3,661	9,260	3,353	203	16,477
Capital Reserve Obligations(4)	898	3,523	2,861	3,052	10,334
Total	\$ 17,671	\$ 148,759	\$ 165,903	\$ 194,900	\$ 527,233

(1) Includes required monthly principal amortization and amounts due at maturity on first mortgage debt secured by student housing properties and amounts due under the Second Amended Revolver and construction loan agreements. The first mortgage debt does not include \$598 of unamortized debt premium.

(2) Includes contractual fixed-rate interest payments as well as estimates of variable rate interest payments based on variable interest rates effective as of June 30, 2010. The Trust has \$72,870 of variable rate debt as of June 30, 2010.

(3) Includes future minimum lease commitments under operating lease obligations and future purchase obligations for advertising.

(4) Includes future annual contributions to the capital reserve as required by certain mortgage debt.

Distributions

We are required to distribute 90% of our REIT taxable income (excluding the deduction for dividends paid and capital gains) on an annual basis in order to qualify as a REIT for federal income tax purposes. Accordingly, we intend to make, but are not contractually bound to make, regular quarterly distributions to holders of our common stock and Operating Partnership units. All such distributions are authorized at the discretion of our board of directors. We may be required to use borrowings under our Second Amended Revolver, if necessary, to meet REIT distribution requirements and maintain our REIT status. Additionally, we may make certain distributions consisting of both cash and shares to meet REIT distribution requirements. We consider market factors and our performance in addition to REIT requirements in determining distribution levels.

In conjunction with our follow-on common stock offering in July of 2009, the board of directors lowered the annual dividend target from \$0.41 to \$0.20 per share/unit effective with the November 16, 2009 dividend.

Our board of directors declared a second quarter distribution of \$0.05 per share of common stock for the quarter ending on June 30, 2010. The distribution is payable on August 16, 2010 to stockholders of record at the close of business on July 30, 2010.

Off-Balance Sheet Arrangements

Edgar Filing: Education Realty Trust, Inc. - Form 10-Q

On May 10, 2006, the Operating Partnership guaranteed \$23,200 of construction debt held by University Village-Greensboro LLC in order to receive a 25% ownership stake in the joint venture with College Park Apartments. Construction was completed and the student housing community was occupied in August 2007. In June of 2010 the construction loan was refinanced and the Operating Partnership no longer guarantees the debt.

As of June 30, 2010, we hold investments in four unconsolidated entities that have third-party mortgage and construction indebtedness totaling \$110,549 at June 30, 2010. The Trust does not guarantee this debt.

On July 14, 2010, the Trust entered into definitive agreements for the development, financing and management of a \$60,000, 20-story, 572-bed graduate student housing complex at the Science + Technology Park at Johns Hopkins Medical Institute ("Johns Hopkins"). The Trust extended an \$18,000 second mortgage loan to the owner. In addition the Trust has committed to provide a guarantee of repayment of a \$42,000 third-party construction loan if such is ultimately obtained. The Company has also committed to fund the \$42,000 construction loan if such financing cannot be obtained from a third-party lender. Accordingly, in the event that the construction financing is not obtained from a third-party lender, the Company would provide the entire \$60,000 necessary to finance the Project.

Inflation

Our student housing leases typically do not have terms that extend beyond twelve months. Accordingly, although on a short-term basis we would be required to bear the impact of rising costs resulting from inflation, we have the opportunity to raise rental rates at least annually to offset such rising costs. However, our ability to raise rental rates may be limited by a weak economic environment, increased competition from new student housing in our primary markets and/or a reduction in student enrollment at our principal colleges and universities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevailing market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. The Trust's interest rate risk objective is to limit the impact of interest rate fluctuations on earnings and cash flows and to lower its overall borrowing costs. To achieve this objective, the Trust manages its exposure to fluctuations in market interest rates for its borrowings through the use of fixed rate debt instruments to the extent that reasonably favorable rates are obtainable.

For fixed rate debt, interest rate changes affect the fair market value but do not impact net income to common stockholders or cash flows. Conversely, for floating rate debt, interest changes generally do not affect the fair market value but do impact net income to common stockholders and cash flows, assuming other factors are held constant. At June 30, 2010, we had fixed rate debt of \$325,775. Holding other variables constant a 100 basis point increase in interest rates would cause a \$13,499 decline in the fair value for our fixed rate debt. Conversely, a 100 basis point decrease in interest rates would cause a \$14,404 increase in the fair value of our fixed rate debt. At June 30, 2010, 81.7% of the outstanding principal amounts of our mortgage notes payable on the properties we own have fixed interest rates with a weighted average rate of 5.91% and an average term to maturity of 5.11 years.

At June 30, 2010, we had borrowed \$10,759 and \$4,310 on construction loans with availability of \$11,000 and \$12,285, respectively, related to the development of a wholly owned student apartment community near Southern Illinois University (Carbondale). The loans bear interest equal to LIBOR plus 110 and 200 basis point margins, respectively, and were interest only through June 14, 2010. On June 14, 2010, the Trust paid down \$5,013 of the outstanding construction debt and extended the maturity date until June 28, 2012. Going forward, annually, a debt service coverage ratio calculated on a rolling 12 months basis, of not less than 1.25 to 1, must be maintained with principal and interest being repaid on a monthly basis.

At June 30, 2010, the Trust had \$8,826 outstanding on a \$14,300 construction loan related to the development of a wholly-owned student apartment community at Syracuse University. The loan bears interest equal to LIBOR plus a 110 basis point margin and is interest only through September 29, 2011. Commencing with the quarter ended June 30, 2011, and annually thereafter, a debt service coverage ratio calculated on a rolling 12 month basis, of not less than 1.25 to 1, must be maintained in order to extend the loan until September 29, 2013, with principal and interest being repaid on a monthly basis.

Additionally, in 2008, we borrowed \$49,874 to refinance mortgage debt. The loans bear interest at 30-day LIBOR plus an applicable margin and mature on January 1, 2014. At June 30, 2010, \$48,975 remained outstanding on this variable rate debt. In order to hedge the interest rate risk associated with these loans, the Operating Partnership purchased an interest rate cap from the Royal Bank of Canada on December 22, 2008 for \$120. The interest rate cap effectively limits the interest rate on \$49,874 of the refinanced mortgage debt at 7.0% per annum through December 31, 2013. The Operating Partnership has chosen not to designate the cap as a hedge and will recognize all gain or loss associated with this derivative instrument in earnings.

We do not, and do not expect to, use derivatives for trading or speculative purposes, and we expect to enter into contracts only with major financial institutions.

Item 4. Controls and Procedures.

Management's Evaluation of Disclosure Controls and Procedures

The Trust maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Trust's filings under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and to ensure that such information is accumulated and communicated to the Trust's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Trust also has investments in unconsolidated entities which are not under its control. Consequently, the Trust's disclosure controls and procedures with respect to these entities are necessarily more limited than those it maintains with respect to its consolidated subsidiaries.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Trust's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on their evaluation as of June 30, 2010, our Chief Executive Officer and Chief Financial Officer have concluded that the Trust's disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

During the three months ended June 30, 2010, the Trust continued with the implementation of a financial reporting analyses package. There were no other changes in the Trust's internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Trust's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act).

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of business, we are subject to claims, lawsuits and legal proceedings. While it is not possible to ascertain the ultimate outcome of such matters, in management's opinion, the liabilities, if any, in excess of amounts provided or covered by insurance, are not expected to have a material adverse effect on our financial position, results of operations or liquidity.

Item 1A. Risk factors

The discussion of the Trust's business and operations should be read together with the risk factors contained in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009 and in Part II, Item 1A of our Quarterly Report on Form 10-Q for the quarter ended March 31, 2010 which describe various risks and uncertainties to which we are or may be subject. These risks and uncertainties have the potential to affect the Trust's business, financial condition, results of operations, cash flows and prospects in a material adverse manner.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

During the three months ended June 30, 2010, in connection with our Amended and Restated Dividend Reinvestment and Stock Purchase Plan (“DRSPP”) for our common stockholders, we directed the plan administrator to purchase 352 shares of our common stock for approximately \$2 in the open market pursuant to the dividend reinvestment component of the plan with respect to our dividend for the second quarter of 2010. We also directed the plan administrator to purchase 1,651 shares of our common stock for approximately \$11 in the open market for investors pursuant to the direct stock purchase component of the plan. The following chart summarizes these purchases of our common stock for the three months ended June 30, 2010.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
April 1-30, 2010	357	\$ 6.71		
May 1-31, 2010	827	6.94		
June 1-30, 2010	819	6.65		
Total	2,003	\$ 6.78		

(1) All shares purchased in the open market pursuant to the terms of our DRSPP. Our board of directors authorized the issuance or purchase of 4,000,000 shares of common stock under the DRSPP.

Item 3. Defaults upon Senior Securities.

None.

Item 4. [Removed and Reserved.]

Item 5. Other Information.

As previously announced in the Trust's Current Report on Form 8-K which was filed with the SEC on July 19, 2010, the Trust will file the construction loan and guaranty, as applicable, relating to the Johns Hopkins project when such agreements have been finalized and executed. See "Trends and Outlooks – Development consulting services" and "Off-Balance Sheet Arrangements."

Item 6. Exhibits.

The exhibits listed on the accompanying Exhibit Index are filed, furnished or incorporated by reference (as stated therein) as part of this Report.
