(b) Recent Accounting Pronouncements

In January 2017, the FASB issued ASU 2017-04: Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. To simplify the subsequent measurement of goodwill, the Board eliminated Step 2 from the goodwill impairment test. Under the amendments in this Update, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. An entity should apply the amendments in this Update on a prospective basis. An entity is required to disclose the nature of and reason for the change in accounting principle upon transition. A public business entity that is a U.S. Securities and Exchange Commission (SEC) filer should adopt the amendments in this Update for its annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The adoption of this guidance is not expected to have a material effect on the Company's consolidated financial statements.

In February 2017, the FASB issued ASU 2017-05: Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets. ASU 2017-05 is designed to provide guidance on how to recognize gain and losses on sales, including partial sales, of nonfinancial assets to noncustomers. ASU 2017-05 is effective beginning January 1, 2018. Early adoption is permitted but the standard is required to be adopted concurrently with ASU 2014-09. The adoption of this guidance is not expected to have a material effect on the Company's consolidated financial statements.

In May 2017, the FASB issued guidance within ASU 2017-09: Scope of Modification Accounting. The amendments in ASU 2017-09 to Topic 718, Compensation - Stock Compensation, provide guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. An entity should account for the effects of a modification unless all of the following conditions are met: the fair value of the modified award is the same as the fair value of the original award immediately before the original award is modified; the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; and the classification of the modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified. The amendments should be applied prospectively to an award modified on or after the adoption date. The amendments are effective for annual periods, and interim periods within those annual periods, beginning after December 31, 2017. Early adoption is permitted, including adoption in any interim period. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

The Black-Scholes option model requires management to make various estimates and assumptions, (2) including expected term, expected volatility, risk-free rate and dividend yield. The expected term represents the period of time that stock-based compensation awards granted are expected to be outstanding and is estimated based on considerations including the vesting period, contractual term and anticipated employee exercise patterns. Assumptions used to estimate the fair value of the stock options on the grant dates are as follows:

Issuance Date	Expected volatility	Risk-free rate	Expected term (years)	Dividend yield
December 2, 2016	134.8	% 1.84	% 5	0.00 %

27. Significant concentrations

A significant portion of the Company's business is conducted in China where the currency is the RMB. Regulations in China permit foreign owned entities to freely convert the RMB into foreign currency for transactions that fall under the "current account," which includes trade related receipts and payments, interest and dividends. Accordingly, the Company's Chinese subsidiaries may use RMB to purchase foreign exchange for settlement of such "current account" transactions without pre-approval. However, pursuant to applicable regulations, foreign-invested enterprises in China may pay dividends only out of their accumulated profits, if any, determined in accordance with the PRC law. In calculating accumulated profits, foreign investment enterprises in China are required to allocate at least 10% of their annual net income each year, if any, to fund certain reserve funds, including mandated employee benefits funds, unless these reserves have reached 50% of the registered capital of the enterprises.

Transactions other than those that fall under the "current account" and that involve conversion of RMB into foreign currency are classified as "capital account" transactions; examples of "capital account" transactions include repatriations of investment by or loans to foreign owners, or direct equity investments in a foreign entity by a China domiciled entity. "Capital account" transactions require prior approval from China's State Administration of Foreign Exchange, or SAFE, or its provincial branch to convert a remittance into a foreign currency, such as USD, and transmit the foreign currency outside of China.

This system could be changed at any time and any such change may affect the ability of the Company or its subsidiaries in China to repatriate capital or profits, if any, outside China. Furthermore, SAFE has a significant degree of administrative discretion in implementing the laws and has used this discretion to limit convertibility of current account payments out of China. Whether as a result of a deterioration in the Chinese balance of payments, a shift in the Chinese macroeconomic prospects or any number of other reasons, China could impose additional restrictions on capital remittances abroad. As a result of these and other restrictions under the laws and regulations of the PRC, the Company's PRC subsidiaries are restricted in their ability to transfer a portion of their net assets to the parent. The Company has no assurance that the relevant Chinese governmental authorities in the future will not limit further or eliminate the ability of the Company's PRC subsidiaries to purchase foreign currencies and transfer such funds to the Company to meet its liquidity or other business needs. Any inability to access funds in China, if and when needed for use by the Company outside of China, could have a material and adverse effect on the Company's liquidity and its business.

The Company grants credit to its customers including Xiamen Joylon, Xiamen Automotive Parts, Shanghai Fenglong and Jingzhou Yude, which are related parties of the Company. The Company's customers are mostly located in the PRC.

30. Off-balance sheet arrangements

As of June 30, 2017 and December 31, 2016, the Company did not have any significant transactions, obligations or relationships that could be considered off-balance sheet arrangements.

31. Segment reporting

The accounting policies of the product sectors are the same as those described in the summary of significant accounting policies except that the disaggregated financial results for the product sectors have been prepared using a management approach, which is consistent with the basis and manner in which management internally disaggregates financial information for the purposes of assisting them in making internal operating decisions. Generally, the Company evaluates performance based on stand-alone product sector operating income and accounts for inter segment sales and transfers as if the sales or transfers were to third parties, at current market prices.

As of June 30, 2017, the Company had 11 product sectors, five of which were principal profit makers and were reported as separate sectors and engaged in the production and sales of power steering (Henglong, Jiulong, Shenyang, Wuhu and Hubei Henglong), and one holding company (Genesis). The other six sectors were engaged in the production and sale of sensor modular (USAI), automobile steering columns (Jielong), provision of after sales and R&D services (HLUSA), production and sale of power steering (Chongqing Henglong), trade (Brazil Henglong), and manufacture and sales of automobile electronic systems and parts (Wuhan Chuguanjie). Since the revenues, net income and net assets of these six sectors collectively are less than 10% of consolidated revenues, net income and net assets, respectively, in the condensed unaudited consolidated financial statements, the Company incorporated these six sectors into “Other Sectors.”

As of June 30, 2016, the Company had 11 product sectors, five of which were principal profit makers and were reported as separate sectors and engaged in the production and sales of power steering (Henglong, Jiulong, Shenyang, Wuhu and Hubei Henglong), and one holding company (Genesis). Critical Accounting Estimates

The Company prepares its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amount of revenues and expenses during the reporting periods. Management periodically evaluates the estimates and judgments made. Management bases its estimates and judgments on historical experience and on various factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates as a result of different assumptions or conditions. The following critical accounting policies affect the more significant judgments and estimates used in the preparation of the Company's condensed consolidated financial statements.

The Company considers an accounting estimate to be critical if:

It requires the Company to make assumptions about matters that were uncertain at the time it was making the estimate, and

Changes in the estimate or different estimates that the Company could have selected would have had a material impact on the Company's financial condition or results of operations.

The table below presents information about the nature and rationale for the Company's critical accounting estimates:

Balance Sheet Caption	Critical Estimate Item	Nature of Estimates Required	Assumptions/Approaches Used	Key Factors
Accrued liabilities and other long-term liabilities	Warranty obligations	Estimating warranty requires the Company to forecast the resolution of existing claims and expected future claims on products sold. OEMs (Original Equipment Manufacturers) are increasingly seeking to hold suppliers responsible for product warranties, which may impact the Company's exposure to these costs.	The Company bases its estimate on historical trends of units sold and payment amounts, combined with its current understanding of the status of existing claims and discussions with its customers.	<ul style="list-style-type: none"> ·OEM sourcing ·OEM policy decisions regarding warranty claims
Property, plant and equipment, intangible assets and other long-term assets	Valuation of long-lived assets and investments	The Company is required from time to time to review the recoverability of certain of its assets based on projections of anticipated future cash flows, including future profitability assessments of various product lines.	The Company estimates cash flows using internal budgets based on recent sales data, independent automotive production volume estimates and customer commitments.	<ul style="list-style-type: none"> ·Future production estimates ·Customer preferences and decisions
Inventory	Write-down of inventory	The Company is required from time to time to review the cashability of inventory based on projections of anticipated future cash flows, including write-down of inventory for prices that are higher than market price and undesirable inventories.	The Company estimates cash flows using internal budgets based on recent sales data, independent automotive production volume estimates and customer commitments.	<ul style="list-style-type: none"> ·Future production estimates ·Customer preferences and decisions

Deferred income taxes	Recoverability of deferred tax assets	The Company is required to estimate whether recoverability of its deferred tax assets is more likely than not based on forecasts of taxable earnings in the related tax jurisdiction.	The Company uses historical and projected future operating results, based upon approved business plans, including a review of the eligible carry forward period, tax planning opportunities and other relevant considerations.	<ul style="list-style-type: none"> ·Tax law changes ·Variances in future projected profitability, including by taxing entity
Tax payable and deferred tax assets/liabilities	Uncertain tax positions	The Company is required to determine and assess all material positions, including all significant uncertain positions in all tax years that are still subject to assessment or challenge under relevant tax statutes.	The Company applies a more likely than not threshold and a two-step approach for tax position measurement and financial statement recognition. For the two-step approach, the first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon settlement.	<ul style="list-style-type: none"> ·An allocation or a shift of income between jurisdictions ·The characterization of income or a decision to exclude reporting taxable income in a tax return ·A decision to classify a transaction, entity, or other position in a tax return as tax exempt

In addition, there are other items within the Company’s financial statements that require estimation, but are not as critical as those discussed above, including provision of accounts and notes receivable. Although not significant in recent years, changes in estimates used in these and other items could have a significant effect on the Company’s consolidated financial statements.

Net sales of EPS were \$26.6 million for the three months ended June 30, 2017, compared to \$28.0 million for the same period in 2016, representing a decrease of \$1.4 million, or 5.0%. As a percentage of net sales, sales of EPS were 22.6 % for the three months ended June 30, 2017, compared to 29.0% for the same period in 2016. The increase in net product sales was mainly due to increased sales and the changes in the product mix in the three months ended June 30, 2017.

The depreciation of China's currency, the RMB, against the U.S. dollar in the second quarter of 2017 as compared to the second quarter of 2016 had a negative impact on net sales as more than 80% of the Company's business is conducted in China.

In summary, the Company had an increase in sales volume leading to a sales increase of \$36.9 million, a decrease in average selling price of steering gears leading to a sales decrease of \$13.2 million, and the effect of foreign currency translation of the RMB against the U.S. dollar, which led to a sales decrease of \$7.0 million.

Further analysis by segment (before elimination) is as follows:

Net product sales for Henglong were \$64.5 million for the three months ended June 30, 2017, compared with \$62.5 million for the three months ended June 30, 2016, representing an increase of \$2.0 million, or 3.2%. An increase in sales volume led to a sales increase of \$12.4 million, a decrease in average selling price led to a sales decrease of \$7.3 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$3.1 million.

Net product sales for Jiulong were \$27.2 million for the three months ended June 30, 2017, compared with \$20.4 million for the three months ended June 30, 2016, representing an increase of \$6.8 million, or 33.3%. Jiulong is gradually shifting its strategy from focusing on sales volume to focusing on high gross margin products and developing new markets such as exports. An increase in sales volume led to a sales increase of \$10.1 million, a decrease in average selling price led to a sales decrease of \$2.1 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$1.2 million.

Net product sales for Shenyang were \$10.7 million for the three months ended June 30, 2017, compared to \$9.4 million for the same period in 2016, representing an increase of \$1.3 million, or 13.8%. Shenyang's products are mainly sold to Shenyang Brilliance Jinbei Co., Ltd., "Brilliance Jinbei", one of China's largest commercial car manufacturers. The sales of Shenyang are mainly impacted by the demand of Brilliance Jinbei. An increase in sales volumes led to a sales increase of \$1.8 million, a decrease in average selling price led to a sales decrease of \$0.1 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.4 million.

Net product sales for Wuhu were \$5.6 million for the three months ended June 30, 2017, compared to \$5.4 million for the same period in 2016, representing an increase of \$0.2 million, or 3.7%. An increase in sales volumes led to a sales increase of \$1.2 million, a decrease in average selling price led to a sales decrease of \$0.7 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.3 million.

Net product sales for Hubei Henglong were \$23.9 million for the three months ended June 30, 2017, compared to \$14.5 million for the same period in 2016, representing an increase of \$9.4 million, or 64.8%. Hubei Henglong's products are mainly sold to Chrysler and Ford. The significant increase in the sales of Hubei Henglong was mainly due to the new products developed for Chrysler and Ford that began mass production at the end of 2016. An increase in sales volumes led to a sales increase of \$12.2 million, a decrease in average selling price led to a sales decrease of \$1.7 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$1.1 million.

Net product sales for Other Sectors were \$13.2 million for the three months ended June 30, 2017, compared to \$6.8 million for the same period in 2016, representing an increase of \$6.4 million, or 94.0%, primarily due to an increase in the sales volume of Jielong, which manufactures automobile steering columns for both HPS and EPS.

An increase in sales volumes led to a cost of products sold increase of \$9.3 million, a decrease in unit cost led to a cost of products sold decrease of \$2.3 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a cost of products sold decrease of \$1.5 million.

Privatization Proposal

On August 2, 2017, the Company issued a press release announcing the appointment by the special committee (the "Special Committee") of the Company's board of directors (the "Board") of Houlihan Lokey Capital, Inc. as its financial advisor and Kirkland & Ellis as its U.S. legal counsel in connection with its review and evaluation of the previously announced preliminary non-binding proposal letter that the Board received on May 14, 2017 from Mr.

Hanlin Chen, the Chairman of the Board of the Company, relating to a possible “going private” transaction, as well as in connection with its review and evaluation of any other sale, merger, business combination or other corporate transaction, with Mr. Chen or any other party, and any other strategic alternatives.

As previously announced, Mr. Chen has submitted a preliminary non-binding proposal to the Board to acquire all of the outstanding shares of common stock of the Company not already beneficially owned by Mr. Chen for US\$5.45 per share of common stock in cash. Mr. Chen and his affiliates currently beneficially own approximately 56.4% of the issued and outstanding shares of common stock of the Company on a fully diluted and as-converted basis. The proposal is expressly conditioned on approval by a special committee of the Board comprised of independent directors and is subject to a non-waivable condition requiring approval by a majority vote of the Company's unaffiliated stockholders. The Special Committee, consisting of Mr. Arthur Wong, Mr. Robert Tung and Mr. Guangxun Xu, is empowered to, and will be responsible for, among other things, investigating, evaluating, negotiating and making a recommendation to the Board with respect to the proposal. The Special Committee is also empowered to retain its own independent advisors to assist in the evaluation of the proposal and any alternative proposals.

There can be no assurance that any definitive offer will be made, that any agreement will be executed or that a transaction with Mr. Chen or any other transaction will be approved or consummated. The Company is not obligated to make, and does not at this time anticipate making, any further public statements about this matter or the activities of the special committee unless and until either the Company enters into a definitive agreement for a transaction or the special committee determines that no such transaction will be effected.

Liquidity and Capital Resources

Capital Resources and Use of Cash

The Company has historically financed its liquidity requirements from a variety of sources, including short-term borrowings under bank credit agreements, bankers' acceptances, issuances of capital stock and notes and internally generated cash. As of June 30, 2017, the Company had cash and cash equivalents and time deposits included in short-term investments of \$63.7 million, compared to \$61.6 million as of December 31, 2016, representing an increase of \$2.1 million, or 3.4%. Short-term investments included pledged short-term investments of \$6.5 million and \$5.7 million as of June 30, 2017 and December 31, 2016, respectively.

The Company had working capital (total current assets less total current liabilities) of \$170.6 million as of June 30, 2017, compared to \$161.0 million as of December 31, 2016, representing an increase of \$9.6 million, or 6.0%.

The Company intends to indefinitely reinvest the funds in subsidiaries established in the PRC.

The Company believes that, in view of its current cash position, the cash expected to be generated from the operations and funds available from bank borrowings as detailed in subsequent paragraphs will be sufficient to meet its working capital and capital expenditure requirements, including the repayment of bank loans, for at least twelve months commencing from the date of this report.

Capital Source

The Company's capital source is multifaceted, such as bank loans and banker's acceptance facilities. In financing activities and operating activities, the Company's banks require the Company to sign line of credit agreements and repay all existing borrowings under such facilities within one year. On the condition that the Company can provide adequate mortgage security and has not violated the terms of the line of credit agreement, such one year facilities can be extended for another year.

The Company had short-term loans of \$67.4 million (See Note 13) and bankers' acceptances of \$83.4 million (See Note 14) as of June 30, 2017.

The Company currently expects to be able to obtain similar bank loans, i.e., RMB loans, and bankers' acceptance facilities in the future if it can provide adequate mortgage security following the termination of the above-mentioned agreements, see the table under "Bank Arrangements" below for more information. If the Company is not able to do so, it will have to refinance such debt as it becomes due or repay that debt to the extent it has cash available from operations or from the proceeds of additional issuances of capital stock. Owing to depreciation, the value of the mortgages securing the above-mentioned bank loans and banker's acceptances will be reduced by approximately \$12.0 million over the next 12 months. If the Company wishes to obtain the same amount of bank loans and banker's acceptances, it will have to provide additional mortgages of \$12.0 million as of the maturity date of such line of credit agreements, see the table under "Bank Arrangements" below for more information. The Company can still obtain a reduced line of credit with a reduction of \$8.7 million, which is 72.3%, the mortgage rate, of \$12.0 million, if it cannot provide additional mortgages. The Company expects that the reduction in bank loans will not have a material adverse effect on its liquidity.
