

AUDIOCODES LTD
Form 20-F
June 27, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 20 F

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report _____

For the transition period from _____ to _____

Commission file number 0-30070

AUDIOCODES LTD.

(Exact name of Registrant as specified in its charter
and translation of Registrant's name into English)

ISRAEL

(Jurisdiction of incorporation or organization)

1 Hayarden Street, Airport City Lod 70151, Israel

Date of event requiring this shell company report _____

Edgar Filing: AUDIOCODES LTD - Form 20-F

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Ordinary Shares, nominal value NIS 0.01 per share	Nasdaq Global Market

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

As of December 31, 2006, the Registrant had outstanding 46,051,867 Ordinary Shares, nominal value NIS 0.01 per share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act:

Yes No

Date of event requiring this shell company report _____

Edgar Filing: AUDIOCODES LTD - Form 20-F

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934:

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):

Yes No

PART I

Unless the context otherwise requires, "AudioCodes," "us," "we" and "our" refer to AudioCodes Ltd. and its subsidiaries.

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

A. SELECTED FINANCIAL DATA

We derived the consolidated statements of operations data for the years ended December 31, 2004, 2005 and 2006 and consolidated balance sheets data as of December 31, 2005 and 2006 from the audited consolidated financial statements set forth elsewhere in this Annual Report. We derived the consolidated statements of operations data for the years ended December 31, 2002 and 2003 and the consolidated balance sheets data as of December 31, 2002, 2003 and 2004 from audited consolidated financial statements that are not included in this Annual Report.

Edgar Filing: AUDIOCODES LTD - Form 20-F

(In thousands, except per share data)

	Year Ended December 31,				
	2002	2003	2004	2005	2006(*)

C. REASONS FOR THE OFFER AND USE OF PROCEEDS

Not applicable.

D. RISK FACTORS

We are subject to various risks and uncertainties relating to or arising out of the nature of our business and general business, economic, financing, legal and other factors or conditions that may affect us. We believe that the occurrence of any one or some combination of the following factors could have a material adverse effect on our business, financial condition, cash flows and results of operations.

Risks Related to Our Business and Industry

We reported a loss for the first quarter of 2007. We may experience additional losses in the remainder of 2007.

We experienced lower than expected revenues in the first quarter of 2007 and reported a loss in that period after reported profits in the previous eleven quarters. We may continue to report losses in 2007. Our first quarter results were impacted by weakness in our sales in Israel and the Asia Pacific region and weaker than expected performance by our recent acquisitions and our sales of our boards business line. Based on market trends in the boards business line, we do not anticipate recovery of revenues of the boards business line in 2007 to the level experienced in 2006. We will need to increase sales in these regions, improve performance at our acquired companies and reduce expenses if we are to be able to return to profitability.

We are dependent on the development of the VoIP market to increase our sales.

We are dependent on the development of the Voice over Internet Protocol, or VoIP, market to increase our sales. Most existing networks are still not based on Voice over Packet technology which we use in our products designed for the VoIP market. We cannot be sure that the delivery of telephone and other communications services over packet networks will expand at significant rates, or that there will be a need to interconnect to other networks utilizing the type of technology contained in our products. For example, the need for our Media Gateway products depends on the need to inter connect VoIP networks with traditional non-packet based networks. Our session border control products depend on growth in the need to inter connect Voice over Packet networks with each other. The adaptation process of connecting packet networks and telephone networks can be time consuming and costly. Sales of our VoIP products will depend on the development of packet networks and the commercialization of VoIP services. If this market develops more slowly than we expect, we may not be able to sell our products in a significant enough volume to be profitable.

We intend to expand our business through acquisitions that could result in diversion of resources and extra expenses. This could disrupt our business and adversely affect our financial condition.

Part of our strategy is to pursue acquisitions of, or investments in, businesses and technologies or to establish joint ventures to expand our business. For example, in April 2003, we purchased a product group from Nortel Networks and in May 2004 we purchased Ai-Logix Inc., now known as AudioCodes USA Inc. In 2005, we invested in two Israeli-based companies, MailVision Ltd. and CTI Squared Ltd., and increased our investment in Natural Speech Communication Ltd. We have recognized losses from the investment in Natural Speech Communication in our results of operations in each of the past three years.

In July 2006, we acquired Nuera Communications, Inc. (now called AudioCodes San Diego Inc.), in August 2006, we acquired Netrake Corporation (now called AudioCodes Texas Inc.), and in April 2007, we completed our acquisition of CTI Squared Ltd.

The negotiation of acquisitions, investments or joint ventures, as well as the integration of acquired or jointly developed businesses or technologies, could divert our management's time and resources. Nuera is significantly larger than any other acquisition we have made. As a result, we have experienced a diversion of our management's time and resources in connection with the integration and operation of Nuera's business. In addition, the performance of this acquisition contributed to our reported net loss in the first quarter of 2007.

Acquired businesses, technologies or joint ventures may not be successfully integrated with our products and operations. The markets for the products produced by the companies we acquire may take longer than we anticipated to develop and to result in increased sales and profits for us. We may not realize the intended benefits of any acquisition, investment or joint venture and we may incur losses from any acquisition, investment or joint venture.

In addition, acquisitions could result in:

- substantial cash expenditures;
- potentially dilutive issuances of equity securities;
- the incurrence of debt and contingent liabilities;
- a decrease in our profit margins;
- amortization of intangibles and potential impairment of goodwill;
- write-offs of in-process research and development;
- reduction of management attention to other parts of the business;
- failure to invest in different areas or alternative investments;
- failure to generate expected financial results or reach business goals; and
- increased expenditures on human resources and related costs.

If acquisitions disrupt our sales or marketing efforts or operations, our business may suffer.

We may not be able to raise additional financing for our capital needs on favorable terms, or at all, which could limit our ability to grow and to continue our longer term expansion plans.

We may need to raise additional capital to continue our longer term expansion plans. To the extent that we cannot fund our activities and acquisition program through our existing cash resources and any cash we generate from operations, we may need to raise equity or debt funds through additional public or private financings. In addition, we may be required to repay all or a portion of our outstanding senior convertible notes in November 2009. We cannot be certain that we will be able to obtain additional financing on commercially reasonable terms, or at all. This could inhibit our growth, increase our financing costs or, if we are unable to repay our senior convertible notes, cause us severe financial difficulties.

The slowdown in capital expenditures by telecommunications service providers in prior years had a material adverse effect on our results of operations. Another down turn in technology spending could have a material adverse effect on our results of operations.

A deterioration of economies around the world and economic uncertainty in the telecommunications market began in 2000 and continued through 2003. There was a curtailment of capital investment by telecommunications carriers and service providers as well as by businesses that use our products, referred to as the enterprise market. It also reduced our ability to forecast orders, also referred to as "low visibility". We cannot be sure whether recent increased expenditures in the telecommunications industry in general or in the voice over packet portion of the market will continue. Since a substantial portion of our operating expenses consist of salaries, we may not be able to reduce our operating expenses in line with any reduction in revenues or may elect not to do so for business reasons. As a result of this downturn and our relatively stable operating expenses, we incurred a net loss of \$13.3 million in 2001, \$14.2 million in 2002 and \$8.4 million in 2003. Any future industry downturn may increase our inventories, decrease our revenues, result in additional pressure on the price of our products and prolong the time until we are paid, all of which would have a material adverse effect on the results of our operations and on our cash flow from operations.

If new products we recently introduced or expect to introduce in the future fail to generate the level of demand we originally anticipated, we will realize a lower than expected return from our investment in research and development with respect to those products, and our results of operations may suffer.

Our success is dependent, in part, on the willingness of our customers to transition or migrate to new products, such as our expanded offering of Mediant and IPmedia products, the session border controller products that we now offer as a result of our acquisition of Netrake, or expected future products. We are involved in a continuous process of evaluating changing market demands and customer requirements in order to develop and introduce new products, features and applications to meet changing demands and requirements. We need to be able to interpret market trends and the advancement of technology in order to successfully develop and introduce new products, features and applications. If potential customers defer transition or migration to new products, our return on our investment in research and development with respect to products recently introduced or expected to be introduced in the near future will be lower than we originally anticipated and our results of our operations may suffer.

Our industry is rapidly evolving and we may not be able to keep pace with technological changes, which could adversely affect our business.

The transmission of multimedia over data networks is rapidly evolving. Short product life cycles place a premium on our ability to manage the transition from current products to new products. Our future success in generating revenues will depend on our ability to enhance our existing products and to develop and introduce new products and product features. These products and features must keep pace with technological developments and address the increasingly sophisticated needs of our customers. The development of new technologies and products is increasingly complex and uncertain. This increases the difficulty in coordinating the planning and production process and can result in delay in the introduction of new technologies and products.

New industry standards, the modification of our products to meet additional existing standards or the addition of features to our products may delay the introduction of our products or increase our costs.

The industry standards that apply to our products are continually evolving. In addition, since our products are integrated into networks consisting of elements manufactured by various companies, they must comply with a number of industry standards and practices established by various international bodies and industry forums. Should new standards gain broad acceptance, we will be required to adopt those standards in our products. We may also decide to modify our products to meet additional existing standards or add features to our products. Standards may be adopted by various industry interest groups or may be proprietary and nonetheless accepted broadly in the industry. It may take us a significant amount of time to develop and design products incorporating these new standards. We may also have to pay additional fees to the developers of the technologies which constitute the newly adopted standards.

Our OEM customers or potential customers may develop or prefer to develop their own technical solutions, and as a result, would not buy our products.

Our products are sold also as components or building blocks to large original equipment manufacturers, or OEM s, or network equipment providers, or NEP s. These customers incorporate our products into their product offerings, usually in conjunction with value-added services of their own or of third parties. OEM or NEP customers or potential customers may prefer to develop their own technology or purchase third party technology. They could also manufacture their own components or building blocks that are similar to the ones we offer. Large customers have already committed significant resources in developing integrated product offerings. Customers may decide that this gives them better profitability and/or greater control over supplies, specifications and performance. Customers may therefore not buy components or products from an external manufacturer such as us. This could have an adverse impact on our ability to sell our products and our revenues.

We have depended, and expect to continue to depend, on a small number of large customers. The loss of one of these customers or the reduction in purchases by a significant customer could have a material adverse effect on our revenue.

Historically, a substantial portion of our revenue has been derived from large purchases by a small number of OEMs and network equipment providers, systems integrators and distributors. For example, our top three customers accounted for approximately 29.0% of our revenues in 2004, 24.8% of our revenues in 2005 and 24.9% of our revenues in 2006. Sales to Nortel Networks, our largest customer, accounted for 15.2% of our revenues in 2006, compared to 16.3% of our revenues in 2005 and 18.6% of our revenues in 2004. We do not enter into sales agreements in which the customer is obligated to purchase a set quantity of our products. Based on our experience, we expect that our customer base may change from period to period. If we lose a large customer and fail to add new customers there could be a material adverse effect on our results of operations.

We have a limited order backlog. If revenue levels for any quarter fall below our expectations, our results of operations will be adversely affected.

We have a limited order backlog, which makes revenues in any quarter substantially dependent on orders received and delivered in that quarter. A delay in the recognition of revenue, even from one customer, may have a significant negative impact on our results of operations for a given period. We base our decisions regarding our operating expenses on anticipated revenue trends, and our expense levels are relatively fixed, or require some time for adjustment. Because only a small portion of our expenses varies with our revenues, if revenue levels fall below our expectations, our results of operations will be adversely affected.

Generally, we sell to original equipment manufacturers, or OEMs, network equipment providers or system integrator customers, as well as to distributors. As a result, we have less information with respect to the actual requirements of end users and their utilization of equipment. We also have less influence over the choice of equipment by these end users.

We typically sell to OEM customers, network equipment providers, and system integrators, as well as to distributors. Our customers usually purchase equipment from several suppliers and may be trying to fulfill one of their customers' specific technical specifications. We rely heavily on our customers for sales of our products and to inform us about market trends and the needs of their customers. We cannot be certain that this information is accurate. If the information we receive is not accurate, we may be manufacturing products that do not have a customer or fail to manufacture products that end users want. Because we are selling products to OEMs, system integrators and distributors rather than directly to end users, we have less control over the ultimate selection of products by end users.

The markets we serve are highly competitive and many of our competitors have much greater resources, which may make it difficult for us to maintain profitability.

Competition in our industry is intense and we expect competition to increase in the future. Our competitors currently sell products that provide similar benefits to those that we sell. There has been a significant amount of merger and acquisition activity and strategic alliances frequently involving major telecommunications equipment manufacturers acquiring smaller companies, and we expect that this will result in an increasing concentration of market share among these companies, many of whom are our customers.

Our principal competitors in the sale of signal processing chips are Texas Instruments, Broadcom, Infineon, Centillium and Mindspeed. Several large manufacturers of generic signal processors, such as Motorola, Agere Systems, which merged with LSI Corporation in April 2007, and Intel have begun, or are expected to begin marketing competing processors. Our principal competitors in the communications board market are NMS Communications, Intel, Motorola, Cantata Technology, Aculab and PIKA Technologies, Inc.

Our principal competitors in the area of analog media gateways (2 to 24 ports) for access and enterprise are Cisco Systems Inc., Mediatix Telecom, Inc., Vega Stream Limited, Samsung, Innovaphone AG, Quintum Technologies, Tainet Communication System Corp., Welltech, Ascii Corp., D-Link Systems, Inc., Multitech Inc., Inomedia, OKI and LG. In addition we face competition in low, mid and high density gateways from internal development at companies such as Nortel, Alcatel-Lucent, Nokia-Siemens, Huawei, Ericsson, UTstarcom, ZTE and from Cisco Systems, Inc., Veraz Networks, Sonus Networks, General Bandwidth, and Commatch (Telrad).

Our principal competitors in the media server market segment are Cantata Technology, NMS Communications, Convedia/Radisy, IP Unity Glenayre, Cognitronics and Aculab. In addition, we face competition in software-based and hardware-based media servers from internal development at companies such as Hewlett-Packard, Comverse-NetCentrex, Nortel, Alcatel Lucent, Nokia Siemens and Ericsson.

With respect to session border controllers, we compete against Acme Packets, Nextone, Juniper and Sonus Networks. In the security gateway market, we compete against private companies such as Reefpoint and Azaire.

We also face significant and increasing competition in the market for products utilized in the VoIP market. Our competitors in the market for VoIP products include telecommunications companies, data communication companies and companies specializing in voice over IP products, some of which have greater name recognition, larger installed customer bases and significantly greater financial, technical, sales and marketing resources than we do.

Many of our competitors have the ability to offer complete network solutions and vendor-sponsored financing programs to prospective customers. Some of our competitors with broad product portfolios may also be able to offer lower prices on products that compete with ours because of their ability to recoup a loss of margin through sales of other products or services. Additionally, voice, audio and other communications alternatives that compete with our products are being continually introduced.

In the future, we may also develop and introduce other products with new or additional telecommunications capabilities or services. As a result, we may compete directly with our customers with respect to sales to telephone companies and other telecommunications infrastructure providers. Additional competitors may include companies that currently provide computer software products and services, such as telephone, media, publishing and cable television. The ability of some of our competitors to bundle other enhanced services or complete solutions with VoIP products could give these competitors an advantage over us.

Offering to sell system level products that compete with the products manufactured by our customers could negatively affect our business.

Our product offerings range from media gateway building blocks, such as chips and boards, to media gateways, media servers and session border control products (systems). These products could compete with products offered by our customers. These customers could decide to decrease purchases from us because of this competition. This could result in a material adverse effect on our results of operations.

Offering to sell directly to carriers or service providers may expose us to requirements for service which we may not be able to meet.

We also sell our products directly to telecommunications carriers, service providers or other end-users. We have traditionally relied on third party distributors and OEMs to test and or sell our products and inform us about the requirements of end-users. We have limited experience selling our products directly to end-user customers. Telecommunications carriers and other service providers have great bargaining power in negotiating contracts. Generally, contracts with end-users tend to be more complex and impose more obligations on us than contracts with third party distributors. Contracts with end-users may also require extensive support teams in the country where the end-user is deploying its network. We may be unable to meet the requirements of these contracts. If we are unable to meet the conditions of a contract with an end-user customer, we may be subject to liquidated damages or liabilities that could result in a material adverse effect on our results of operations.

Selling directly to end-users may adversely affect our relationship with our current third party distributors upon whom we will continue to rely for a significant portion of our sales. Loss of third party distributors and OEMs, or a decreased commitment by them to sell our products as a result of direct sales by us, could adversely affect our sales and results of operations.

We rely on third-party subcontractors to assemble our products and therefore do not directly control manufacturing costs, product delivery schedules or manufacturing quality.

Our products are assembled and tested by third-party subcontractors. As a result of our reliance on third-party subcontractors, we cannot directly control product delivery schedules. We have in the past experienced delays in delivery schedules. Any problems that occur and persist in connection with the delivery, quality or cost of the assembly and testing of our products could have a material adverse effect on our business, financial condition and results of operations. This reliance could also lead to product shortages or quality assurance problems, which, in turn, could lead to an increase in the costs of manufacturing or assembling our products.

We may not be able to deliver our products to our customers, and substantial reengineering costs may be incurred if a small number of third-party suppliers do not provide us with key components on a timely basis.

Texas Instruments Incorporated supplies all of the chips for our signal processor product line. Our signal processor line is used both as a product line in its own right and as a key component in our other product lines. Motorola manufactures all of the communications processors currently used on our communications boards. These suppliers also supply many of our competitors.

We have not entered into any long-term supply agreements or alternate source agreements with our suppliers and, while we maintain an inventory of critical components, our inventory of chips would likely not be sufficient in the event that we had to engage an alternate supplier for these components.

Texas Instruments is also one of our major competitors in providing signal processing solutions. An unexpected termination of the supply of the chips provided by Texas Instruments or Motorola or disruption in their timely delivery, would require us to make a large investment in capital and manpower resources to shift to using signal processors manufactured by other companies and may cause a delay in introducing replacement products. Customers may not accept an alternative product design. Supporting old products or redesigning products may make it more difficult for us to support our products.

We utilize other sole source suppliers upon whom we depend without having long term supply agreements.

Some of our sole source suppliers custom produce components for us based upon our specifications and designs while other of our sole source suppliers are the only manufacturers of certain components required by our products. We have not entered into any long-term supply agreements or alternative source agreements with our suppliers and while we maintain an inventory of components from single source providers, our inventory would likely not be sufficient in the event that we had to engage an alternate supplier of these single source components. In the event of any interruption in the supply of components from any of our sole source suppliers, we may have to expend significant time, effort and other resources in order to locate a suitable alternative manufacturer and secure replacement components. If no replacement components are available, we may be forced to redesign certain of our products. Any such new design may not be accepted by our customers. A prolonged disruption in supply may force us to redesign and retest our products. Any interruption in supply from any of these sources or an unexpected technical failure or termination of the manufacture of components could disrupt production, thereby adversely affecting our ability to deliver products and to support products previously sold to our customers.

In addition, if demand for telecommunications equipment increases, we may face a shortage of components from our suppliers. This could result in longer lead times, increases in the price of components and a reduction in our margins, all of which could adversely affect the results of our operations.

Our customers may require us to produce products or systems to hold in inventory in order to meet their just in time , or short lead time, delivery requirements. If we are unable to sell this inventory on a timely basis, we could incur charges for excess and obsolete inventory which would adversely affect our results of operations.

Our customers expect us to maintain an inventory of products available for purchase off the shelf subsequent to the initial sales cycle for these products. This may require us to incur the costs of manufacturing inventory without having a purchase order for the products. The VoP industry is subject to rapid technological change and volatile customer demands, which result in a short product commercial life before a product becomes obsolete. If we are unable to sell products that are produced to hold in inventory, we may incur write offs and write downs as a result of slow moving items, technological obsolescence, excess inventories, discontinued products and products with market prices lower than cost. Write offs and write downs could adversely affect our operating results and financial condition. We wrote off and wrote down inventory in the amount of \$1.2 million in 2004, \$1.2 million in 2005 and \$1.0 million in 2006.

We are also facing pressure to deliver through customer hubs and to deliver locally from warehouses in the U.S.

Some of our U.S. customers have requested us to maintain an inventory of products in the U.S. Some of these products held in inventory may be produced only for a specific customer. Maintaining additional inventory in the U.S. requires us to incur additional manufacturing costs and increases the risk that we will incur inventory write offs. Holding in inventory products manufactured for a specific customer results in additional warehouse and carrying costs and could result in additional write-offs if that customer does not purchase inventory manufactured specifically for it. If we are unable to sell inventory held in the U.S. that was not manufactured for a specific customer, we may need to incur additional shipping costs in order to sell the inventory in another country.

Our products generally have long sales cycles and implementation periods, which increase our costs in obtaining orders and reduce the predictability of our revenues.

Our products are technologically complex and are typically intended for use in applications that may be critical to the business of our customers. Prospective customers generally must make a significant commitment of resources to test and evaluate our products and to integrate them into larger systems. As a result, our sales process is often subject to delays associated with lengthy approval processes that typically accompany the design and testing of new communications equipment. The sales cycles of our products to new customers are approximately six to twelve months after a design win, depending on the type of customer and complexity of the product. This time may be further extended because of internal testing, field trials and requests for the addition or customization of features. This delays the time until we realize revenue and results in our investing significant resources in attempting to make sales.

Long sales cycles also subject us to risks not usually encountered in a short sales span, including customers' budgetary constraints, internal acceptance reviews and cancellation. In addition, orders expected in one quarter could shift to another because of the timing of customers' procurement decisions. The time required to implement our products can vary significantly with the needs of our customers and generally exceeds several months; larger implementations can take multiple calendar quarters. This complicates our planning processes and reduces the predictability of our revenues.

Our proprietary technology is difficult to protect, and our products may infringe on the intellectual property rights of third parties. Our business may suffer if we are unable to protect our intellectual property or if we are sued for infringing the intellectual property rights of third parties.

Our success and ability to compete depend in part upon protecting our proprietary technology. We rely on a combination of patent, trade secret, copyright and trademark laws, nondisclosure and other contractual agreements and technical measures to protect our proprietary rights. These agreements and measures may not be sufficient to protect our technology from third-party infringement, or to protect us from the claims of others.

Enforcement of intellectual property rights may be expensive and may divert attention of management and of research and development personnel away from our business. Intellectual property litigation could also call into question the ownership or scope of rights owned by us. We believe that at least one of our patents may cover technology related to the ITU G.723.1 standard. Because of our involvement in the standard setting process, we may be required to license certain of our patents on a reasonable and non-discriminatory basis to a current or future competitor, to the extent required to carry out the G.723.1 standard. Additionally, our products may be manufactured, sold, or used in countries that provide less protection to intellectual property than that provided under U.S. or Israeli laws or where we do not hold relevant intellectual property rights.

We believe that the frequency of third party intellectual claims is increasing, as patent holders, including entities that are not in our industry and that purchase patents as an investment or to monetize such rights by obtaining royalties, use infringement assertions as a competitive tactic and a source of additional revenue. Any intellectual property claims against us, even without merit, could cost us a significant amount of money to defend and divert management's attention away from our business. We may not be able to secure a license for technology that is used in our products and we may face injunctive proceedings that prevent distribution and sale of our products even prior to any dispute being concluded. These proceedings may also have a deterrent effect on purchases by customers, who may be unsure about our ability to continue to supply their requirements. We may be forced to repurchase our products and compensate customers that have purchased such infringing products. We may be forced to redesign the product so that it becomes non-infringing, which may have an adverse impact on the results of our operations.

In addition, claims alleging that the development, use, or sale of our products infringe third parties' intellectual property rights may be directed either at us or at our direct or indirect customers. We may be required to indemnify such customers against claims made against them. We may be required to indemnify them even if we believe that the claim of infringement is without merit.

Multiple patent holders in our industry may result in increased licensing costs.

There are a number of companies besides us that hold patents for various aspects of the technology incorporated in our industry's standards and our products. We expect that patent enforcement will be given high priority by companies seeking to gain competitive advantages or additional revenues. The holders of patents from which we have not obtained licenses may take the position that we are required to obtain a license from them. We cannot be certain that we would be able to negotiate a license agreement at an acceptable price or at all. Our results of operations could be adversely affected by the payment of any additional licensing costs or if we are prevented from manufacturing or selling a product.

Changes in governmental regulations in the United States or other countries could slow the growth of the VoIP telephony market and reduce the demand for our customers' products, which, in turn, could reduce the demand for our products.

In the United States, changes in governmental regulation are being considered that may negatively impact the VoIP telephony market. For example, the Federal Communications Commission (FCC) has to date treated providers of telephone services over the public Internet as enhanced service providers. Enhanced service providers are currently exempt from federal and state regulations governing common carriers, including the obligation to pay access charges. The FCC is examining the enactment of new regulations governing Internet telephony and the question of whether certain forms of telephone services over the Internet should be subject to the same FCC regulations as telecommunications services.

VoIP equipment can be used as a way to provide telecommunication services while bypassing the local service operator, in what is sometime referred to as toll bypass. Telecommunications traffic is diverted from traditional telephone lines to the public Internet, thus avoiding long distance call charges. As the use of VoIP to provide telecommunication services increases, phone companies are seeking the adoption of regulations that would require providers or users of such diverted calls to pay a charge to local service providers.

In March, 2004, the FCC released a Notice of Proposed Rule Making that seeks to establish a regulatory framework for Internet Protocol-Enabled Services, including VoIP services. The Notice of Proposed Rule Making seeks comments on how various IP-enabled services, including VoIP, should be differentiated for regulatory purposes, and whether there are technical or other characteristics of particular VoIP services that warrant differential regulatory treatment. When the FCC enacts new regulations governing VoIP, or if it determines that certain telephony providers over the public Internet, or the services they provide, are subject to current FCC regulations governing common carriers, then some of the service providers that buy equipment from our customers may be forced to pay access charges and make universal service contributions, or may be subject to other taxes, fees or restrictions under any such new regulations. The required payment of additional taxes, fees or charges for VoIP services may impact the profitability of these services and the use of VoIP services or technology.

In May, 2005, the FCC issued an order that requires interconnected VoIP service providers to be able to deliver all 911 calls to the customer's local emergency operator. Interconnected providers are those companies that enable VoIP customers to receive calls from and make calls to the traditional public switched telephone network. The FCC also indicated that it would adopt rules in the future that would require a method for determining the location of a VoIP customer making a 911 call without the customer having to report this information. VoIP service providers may have difficulties complying with this order in the required time frame, as well as any future orders issued by the FCC. Equipment and software manufacturers may have difficulty in complying with new technical requirements.

Edgar Filing: AUDIOCODES LTD - Form 20-F

In May, 2006, the FCC issued an order that requires interconnected VoIP service providers to be prepared to accommodate law enforcement wiretaps. The FCC found that VoIP services are covered by the Communications Assistance for Law Enforcement Act, or CALEA, which requires the FCC to preserve the ability of law enforcement agencies to conduct court-ordered wiretaps in the face of technological change. The FCC established a deadline of May 14, 2007 by which covered VoIP service providers had to be in full compliance with all relevant CALEA requirements. VoIP service providers may have difficulties complying with this order in the required time frame, as well as any future orders issued by the FCC. Equipment and software manufacturers may have difficulty in complying with new technical requirements. This could adversely affect our business.

In June, 2006, the FCC adopted a rule that requires VoIP service providers to help subsidize services in rural and low-income areas. The FCC rule requires contribution of 10.5% of a VoIP service provider's long-distance revenue to the universal service fund if such long-distance calls pass through traditional phone networks.

The cost of providing Internet phone service could increase as a result of these actions by the FCC which could result in slower growth and decreased profitability for this industry. The increase in regulation of VoIP services and the increase in the cost of these services could adversely affect sales of our products and adversely affect our results of operations.

The enactment of any additional regulation or taxation of communications over the public Internet in the United States or elsewhere in the world could have a material adverse effect on our customers' (and their customers') businesses and could therefore adversely affect sales of our products. We do not know what effect, if any, possible legislation or regulatory actions in the United States or elsewhere in the world may have on private telecommunication networks, the provision of VoIP services and purchases of our products.

Use of encryption technology in our products is regulated by governmental authorities and may require special development, export or import licenses. Delays in the issuance of required licenses, or the inability to secure these licenses, could adversely affect our revenues and results of operations.

Growth in the demand for security features may increase the use of encryption technology in our products. The use of encryption technology is generally regulated by governmental authorities and may require specific development, export or import licenses. Encryption standards may be based on proprietary technologies. We may be unable to incorporate encryption standards into our products in a manner that will insure interoperability. We also may be unable to secure licenses for proprietary technology on reasonable terms. If we cannot meet encryption standards, or secure required licenses for proprietary encryption technology, our revenues and results of operations could be adversely affected.

We are subject to regulations that will require us to use components based on environmentally friendly materials. Compliance with these regulations may increase our costs and adversely affect our results of operations.

We are subject to telecommunications industry regulations requiring the use of environmentally-friendly materials in telecommunications equipment. For example, pursuant to a European Community directive, telecom equipment suppliers were required to stop using specified materials that are not environmentally friendly by July 1, 2006. In addition, telecom equipment suppliers that take advantage of an exemption with respect to the use of lead in solders are required by this directive to eliminate the lead in solders from their products by 2010. Some of our customers may also require products that meet higher standards than those required by the directive, such as complete removal of additional harmful substances from our products. We will be dependent on our suppliers for components and sub-system modules, such as semiconductors and purchased assemblies and goods, to comply with these requirements. This may harm our ability to sell our products in regions or to customers that may adopt such directives.

Compliance with these directives, especially with respect to the requirement that products eliminate lead solders, will require us to undertake significant expenses with respect to the re-design of our products. In addition, we may be required to pay higher prices for components that comply with this directive. We may not be able to pass these higher component costs on to our customers. We cannot at this point estimate the expense that will be required to redesign our products in order to include environmentally friendly components. We cannot be sure that we will be able to timely comply with these regulations, that we will be able to comply on a cost effective basis or that a sufficient supply of compliant components will be available to us. Compliance with these regulations could increase our product design costs. New designs may also require qualification testing with both customers and government certification boards. We cannot be certain of the reliability of any new designs that utilize non-lead components, in part, due to the lack of experience with the replacement materials and assembly technologies. In addition, the incorporation of new components may adversely affect equipment reliability and durability.

Our inability or failure to comply with these regulations could have a material adverse effect on our results of operations. In addition, manufacturers of components that use lead solders may decide to stop manufacturing those components prior to the 2010 compliance date. These actions by manufacturers of components could result in a shortage of components that could adversely affect our business and results of operations.

A significant portion of our revenues is generated outside of the U.S. and Israel. We intend to continue to expand our operations internationally and, as a result, our results of operations could suffer if we are unable to manage our international operations effectively.

We generated 28% of our revenues in 2004, 32% of our revenues in 2005 and 35% of our revenues in 2006 outside of the United States and Israel. Part of our strategy is to expand our penetration in existing foreign markets and to enter new foreign markets. Our ability to penetrate some international markets may be limited due to different technical standards, protocols or product requirements in different markets. Expansion of our international business will require significant management attention and financial resources. Our international sales and operations are subject to numerous risks inherent in international business activities, including:

- economic and political instability in foreign countries;
- compliance with foreign laws and regulations;
- different technical standards or product requirements;
- staffing and managing foreign operations;
- foreign currency fluctuations;
- export control issues;
- governmental controls;
- import or currency control restrictions;
- local taxation;
- increased risk of collection; and
- burdens that may be imposed by tariffs and other trade barriers.

If we are unable to address these risks, our foreign operations may be unprofitable or the value of our investment in our foreign operations may decrease.

Currently, our international sales are denominated primarily in dollars. Therefore, any devaluation in the local currencies of our customers relative to the dollar could cause customers to decrease or cancel orders or default on payment.

The prices of our products may become less competitive due to foreign exchange fluctuations.

Foreign currency fluctuations may affect the prices of our products. Our prices in all countries are denominated primarily in dollars. If there is a significant devaluation in a specific country, the prices of our products will increase relative to the local currency and may be less competitive. We cannot be sure that our international customers will continue to place orders denominated in dollars. Our sales to European customers denominated in Euros are increasing. Sales denominated in Euros could make our revenues subject to fluctuation in the Euro/dollar exchange rate.

We may be unable to attract sales representatives who will market our products effectively.

A significant portion of our marketing and sales involves the aid of independent sales representatives that are not under our direct control. We cannot be certain that our current independent sales representatives will continue to distribute our products or that, even if they continue to distribute our products, they will do so successfully. These representatives are not subject to any minimum purchase requirements and can discontinue marketing our products at any time. In addition, these representatives often market products of our competitors. Accordingly, we must compete for the attention and sales efforts of our independent sales representatives.

Our products could contain defects, which would reduce sales of those products or result in claims against us.

We develop complex and evolving products. Despite testing by us and our customers, undetected errors or defects may be found in existing or new products. The introduction of products with reliability, quality or compatibility problems could result in reduced revenues, additional costs, increased product returns and difficulty or delays in collecting accounts receivable. The risk is higher with products still in the development stage, where full testing or certification is not yet completed. This could result in, among other things, a delay in recognition or loss of revenues, loss of market share or failure to achieve market acceptance. We could also be subject to material claims by customers that are not covered by our insurance.

Obtaining certification of our products by national regulators may be time-consuming and expensive. We may be unable to sell our products in markets in which we are unable to obtain certification.

Our customers may expect us to obtain certificates of compliance with safety and technical standards set by national regulators, especially standards set by U.S. or European regulators. There is no uniform set of standards, and each national regulator may impose and change its own standards. National regulators may also prohibit us from importing products that do not conform to their standards. If we make any change in the design of a product, we are usually required to obtain recertification of the product. The process of certification may be time-consuming and expensive and may affect the length of the sales cycle for a product. If we are unable to obtain certification of a product in a market, we may be unable to sell the product in that market.

We depend on a limited number of key personnel who would be difficult to replace.

Because our products are complex and our market is evolving, the success of our business depends in large part upon the continuing contributions of our management and key personnel. Specifically, we rely heavily on the services of Shabtai Adlersberg, our Chief Executive Officer and Chairman of our Board of Directors. If Shabtai Adlersberg is unable or unwilling to continue with us, our results of operations could be materially and adversely affected. We do not carry key person insurance for Mr. Adlersberg.

The success of our business also depends upon our continuing ability to attract and retain other highly-qualified management, technical, sales and marketing personnel. We need highly-qualified technical personnel who are capable of developing technologies and products and providing the technical support required by our customers. We are experiencing increasing competitive pressure with respect to retaining and hiring employees in the high technology sector in Israel. If we fail to hire and retain skilled employees, our business may be adversely affected.

If we do not manage our anticipated growth effectively, our results of operations could be adversely affected.

We have actively expanded our operations in the past and may continue to expand them in the future. This expansion has required, and may continue to require, the application of managerial, operational and financial resources. We cannot be sure that we will continue to expand, or that we will be able to expand our operations successfully. In particular, our business requires us to focus on multiple markets, including the VoIP, wireline, cable and wireless markets. In addition, we work simultaneously with a number of large OEMs and network equipment providers each of which may have different requirements for the products that we sell to them. We may not have sufficient manpower, or may be unable to devote this manpower when needed, to address the requirements of these markets and customers. If we are unable to manage our expanding operations effectively, our revenues may not increase, our cost of operations may rise and our results of operations may be adversely affected.

As we grow we may need new or enhanced systems, procedures or controls. The transition to such systems, procedures or controls, as well as any delay in transitioning to new or enhanced systems, procedures or controls, may seriously harm our ability to accurately forecast sales demand, manage our product inventory and record and report financial and management information on a timely and accurate basis.

We extend credit to customers for purchases of our products. We could incur charges in our statement of operations if we are unable to collect these accounts receivable.

A portion of our receivables result from credit extended to customers for purchases of our products. We cannot be sure that we will be able to collect all of these accounts receivable. The failure to collect accounts receivable could adversely affect our cash flow position and results of operations.

Our gross profit percentage could be negatively impacted by increased manufacturing costs and other factors. This could adversely affect our results of operations.

Our gross profit percentage increased in 2004 and 2005, but decreased in 2006. The decrease in our gross profit percentage in 2006 was primarily attributable to amortization expenses related to the acquisitions of Nuera and Netrake during the third quarter of 2006 and expenses related to equity-based compensation resulting from the adoption of SFAS 123(R). Our gross profit percentage could also be negatively affected by an increase in manufacturing costs, a shift in our sales mix towards our less profitable products, increased customer demand for longer product warranties and increased cost pressures as a result of increased competition. Acquisitions of new businesses could also negatively affect our gross profit percentage, which could cause an adverse effect on our results of operations.

The growth in our product portfolio means that we have to service and support more products. This may result in an increase in our expenses and an adverse effect on our results of operations.

The size of our product portfolio has increased and continues to increase. As a result, we are required to provide to our customers sales support. Customers have requested that we provide a contractual commitment to support a product for a specified period of time. This period of time may exceed the working life of the product or extend past the period of time that we may intend to manufacture or support a product. We are dependent on our suppliers for the components (hardware and software) needed to provide support and may be unable to secure the components necessary to satisfy our service commitments. We do not have long term contracts with our suppliers, and they may not be obligated to provide us with products or services for any specified period of time. We may need to purchase an inventory of replacement components and parts in advance in order to try to provide for their availability when needed. This could result in increased risk of write offs with respect to our replacement component inventory to the extent that we cannot accurately predict our future requirements under our customer service contracts. If any of our component suppliers cease production, cease operations or refuse or fail to make timely delivery of orders, we may not be able to meet our contractual commitments for product support. We may be required to supply upgraded components or parts as substitutes if the original versions are no longer available. Product support may be costly and any extra service revenues may not cover the hardware and software costs associated with providing long-term support.

We are subject to additional costs and risks associated with complying with new and increasing regulation of corporate governance and disclosure standards.

As a public company, we spend an increased amount of management time and resources to comply with changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new Securities and Exchange Commission regulations and NASDAQ Global Market rules. In connection with our compliance with Section 404 and the other applicable provisions of the Sarbanes-Oxley Act, our management and other personnel devote a substantial amount of time, and may need to hire additional accounting and financial staff, to assure that we comply with these requirements. Compliance may also make some of our activities more time-consuming and costly. For example, we expect these rules and regulations to make it more difficult and more expensive for us to obtain director and other liability insurance, and we may be required to incur substantial costs to maintain current levels of coverage. The additional management attention and costs relating to compliance with the Sarbanes-Oxley Act could materially and adversely affect our growth and financial results.

Risks Relating to Operations in Israel

Conditions in Israel affect our operations and may limit our ability to produce and sell our products.

We are incorporated under the laws of the State of Israel, and our principal executive offices and principal research and development facilities are located in the State of Israel. Political, economic and military conditions in Israel directly affect our operations. There has been an increase in unrest and terrorist activity in Israel, which began in September 2000 and which has continued with varying levels of severity through the current period of time. This has led to ongoing hostilities between Israel, the Palestinian Authority and other groups in the West Bank and Gaza Strip. The future effect of this deterioration and violence on the Israeli economy and our operations is unclear. In January 2006, Hamas, an Islamic movement responsible for many attacks against Israelis, won the majority of the seats in the Parliament of the Palestinian Authority. Further, in the summer of 2006, extensive hostilities began along Israel's northern border with Lebanon and, to a lesser extent, in the Gaza Strip, which involved rocket attacks on populated areas in the northern and central parts of Israel. In June 2007, there was an escalation of violence in the Gaza Strip, resulting in Hamas effectively controlling the Gaza Strip. Ongoing violence between Israel and the Palestinians, as well as tension between Israel and the neighboring Syria and Lebanon, may have a material adverse effect on our business, financial conditions and results of operations.

We cannot predict the effect on us of an increase in these hostilities or any future armed conflict, political instability or violence in the region. Additionally, some of our officers and employees in Israel are obligated to perform annual military reserve duty and are subject to being called for additional active duty under emergency circumstances. We cannot predict the full impact of these conditions on us in the future, particularly if emergency circumstances or an escalation in the political situation occur. If many of our employees are called for active duty, our operations in Israel and our business may be adversely affected. Additionally, a number of countries continue to restrict or ban business with Israel or Israeli companies, which may limit our ability to make sales in those countries.

The Israeli rate of inflation may negatively impact our costs if it exceeds the rate of devaluation of the New Israeli Shekel against the U.S. dollar. This could adversely affect our results of operations.

A substantial portion of the cost of our Israeli operations, mainly personnel and facility-related, is incurred in New Israeli Shekels (NIS). In 2006, approximately 36% of our costs were incurred in NIS. Our NIS related costs, as expressed in US dollars, are influenced by the exchange rate between the dollar and the NIS. As a result, we bear the risk that the rate of inflation in Israel will exceed the rate of devaluation of the New Israeli Shekel in relation to the dollar or that the timing of such devaluations were to lag considerably behind inflation, which will increase our costs as expressed in dollars. In recent times, there has been a significant fluctuation including depreciation in the value of the dollar compared to the NIS. If this continues, we could experience an increase in the cost of our operations, which are based in dollars in our financial statements, which could adversely affect our results of operations.

To protect against the changes in value of forecasted foreign currency cash flows resulting from payments in NIS, we maintain a foreign currency cash flow hedging program. We hedge portions of our forecasted expenses denominated in foreign currencies with forward contracts. These measures may not adequately protect us from material adverse effects due to the impact of inflation in Israel.

The Israeli government programs and tax benefits that we currently participate in, or receive, require us to meet several conditions and may be terminated or reduced in the future, which would increase our costs.

We benefit from certain government programs and tax benefits, particularly as a result of exemptions and reductions resulting from the approved enterprise status of our existing production facilities and programs in Israel. Until recently, the designation required advance approval from the Investment Center of the Israel Ministry of Industry, Trade and Labor (the Investment Center). To be eligible for these programs and tax benefits, we must continue to meet conditions relating principally to adherence to the approved programs and to periodic reporting obligations. We believe that we are currently in compliance with these requirements. However, if we fail to meet these conditions, we will be subject to corporate tax at the rate then in effect under Israeli law for such tax year.

In April, 2005, an amendment to the law came into effect (the Amendment) which significantly changed the provisions of the law. The Amendment limited the scope of enterprises which may be approved by the Investment Center by setting criteria for the approval of a facility as a Privileged Enterprise, such as provisions generally requiring that at least 25% of the Beneficiary Enterprise's income be derived from export. Additionally, the Amendment enacted major changes in the manner in which tax benefits are awarded under the law so that companies no longer require Investment Center approval in order to qualify for tax benefits.

In addition, the law provides that terms and benefits included in any certificate of approval granted prior to December 31, 2004 will remain subject to the provisions of the law as they were on the date of such approval. Therefore, our existing Approved Enterprises will generally not be subject to the provisions of the Amendment. As a result of the Amendment, tax-exempt income generated under the provisions of the law as amended, will subject us to taxes upon distribution or liquidation and we may be required to record a deferred tax liability with respect to such tax-exempt income.

In 2006, we recognized a grant of \$1,111,000 from the Government of Israel, through the Office of the Chief Scientist, or the OCS, for the financing of a portion of our research and development expenditures in Israel. The OCS budget has been subject to reductions, which may affect the availability of funds for these prospective grants and other grants in the future. As a result, we cannot be certain that we will continue to receive grants at the same rate, or at all. In addition, the terms of any future OCS grants may be less favorable than our past grant.

The government grants we have received for research and development expenditures limit our ability to manufacture products and transfer technologies outside of Israel and require us to satisfy specified conditions. If we fail to satisfy these conditions, we may be required to refund grants previously received together with interest and penalties.

In connection with research and development grants received from the OCS, we must pay royalties to the OCS on the revenue derived from the sale of products, technologies and services developed with the grants from the OCS. The terms of the OCS grants and the law pursuant to which grants are made restrict our ability to manufacture products or transfer technologies developed outside of Israel if OCS grants funded the development of the products or technology. An amendment to the relevant law may facilitate the transfer of technology or know-how developed with the funding of the OCS to third parties outside of Israel, but any future transfer would still require the approval of the OCS, which may not be granted, and is likely to involve a material payment to the OCS. This restriction may limit our ability to enter into agreements for those products or technologies without OCS approval. We cannot be certain that any approval of the OCS will be obtained on terms that are acceptable to us, or at all.

In order to meet specified conditions in connection with the grants and programs of the OCS, we have made representations to the Government of Israel about our Israeli operations. From time to time the conduct of our Israeli operations has deviated from our representations. If we fail to meet the conditions related to the grants, including the maintenance of a material presence in Israel, or if there is any material deviation from the representations made by us to the Israeli government, we could be required to refund the grants previously received (together with an adjustment based on the Israeli consumer price index and an interest factor) and would likely be ineligible to receive OCS grants in the future. The inability to receive these grants would result in an increase in our research and development expenses.

It may be difficult to enforce a U.S. judgment against us, our officers and directors, assert U.S. securities law claims in Israel or serve process on substantially all of our officers and directors.

We are incorporated in Israel. Substantially all of our executive officers and directors are nonresidents of the United States, and a majority of our assets functional currency and the assets of these persons are located outside the United States. Therefore, it may be difficult to enforce a judgment obtained in the United States against us or any such persons or to effect service of process upon these persons in the United States. Israeli courts may refuse to hear a claim based on a violation of U.S. securities laws because Israel is not the most appropriate forum to bring such a claim. In addition, even if an Israeli court agrees to hear a claim, it may determine that Israeli law and not U.S. law is applicable to the claim. If U.S. law is found to be applicable, the content of applicable U.S. law must be proved as a fact which can be a time-consuming and costly process. Certain matters of procedure will also be governed by Israeli law. There is little binding case law in Israel addressing these matters. Additionally, there is doubt as to the enforceability of civil liabilities under the Securities Act and the Securities Exchange Act in original actions instituted in Israel.

Israeli law may delay, prevent or make difficult a merger with or an acquisition of us, which could prevent a change of control and therefore depress the price of our shares.

Provisions of Israeli law may delay, prevent or make undesirable a merger or an acquisition of all or a significant portion of our shares or assets. Israeli corporate law regulates acquisitions of shares through tender offers and mergers, requires special approvals for transactions involving significant shareholders and regulates other matters that may be relevant to these types of transactions. These provisions of Israeli law could have the effect of delaying or preventing a change in control and may make it more difficult for a third party to acquire us, even if doing so would be beneficial to our shareholders. These provisions may limit the price that investors may be willing to pay in the future for our ordinary shares. In addition, our articles of association contain certain provisions that may make it more difficult to acquire us, such as a staggered board and the ability of our board of directors to issue preferred stock. Furthermore, Israel tax considerations may make potential transactions undesirable to us or to some of our shareholders. See Description of Share Capital Possible Anti-Takeover Effects.

Risks Relating to the Ownership of our Ordinary Shares and our Notes

The price of our ordinary shares may fluctuate significantly.

The market price for our ordinary shares, as well as the prices of shares of other technology companies, has been volatile. Between January 1, 2005 and June 15, 2007, our share price has fluctuated from a low of \$5.01 to a high of \$17.00. The following factors may cause significant fluctuations in the market price of our ordinary shares:

- fluctuations in our quarterly revenues and earnings or those of our competitors;
- shortfalls in our operating results compared to levels forecast by securities analysts;
- announcements concerning us, our competitors or telephone companies;
- announcements of technological innovations;
- the introduction of new products;
- changes in product price policies involving us or our competitors;
- market conditions in the industry;
- integration of acquired businesses, technologies or joint ventures with our products and operations;
- the conditions of the securities markets, particularly in the technology and Israeli sectors; and
- political, economic and other developments in the State of Israel and worldwide.

In addition, stock prices of many technology companies fluctuate significantly for reasons that may be unrelated or disproportionate to operating results. The factors discussed above may depress or cause volatility of our share price, regardless of our actual operating results.

Our quarterly results of operations have fluctuated in the past and we expect these fluctuations to continue. Fluctuations in our results of operations may disappoint investors and result in a decline in our share price.

We have experienced and expect to continue to experience significant fluctuations in our quarterly results of operations. In some periods, our operating results may be below public expectations or below revenue levels and operating results reached in prior quarters or in the corresponding quarters of the previous year. If this occurs, the market price of our ordinary shares could decline. We lowered our forecast for the first quarter of 2007 which resulted in a decrease in the price of our ordinary shares.

Edgar Filing: AUDIOCODES LTD - Form 20-F

The following factors have affected our quarterly results of operations in the past and are likely to affect our quarterly results of operations in the future:

- size, timing and pricing of orders, including order deferrals and delayed shipments;
- launching of new product generations;
- length of approval processes or market testing;
- technological changes in the telecommunications industry;
- competitive pricing pressures;
- the timing and approval of government research and development grants;
- accuracy of telecommunication company, distributor and original equipment manufacturer forecasts of their customers' demands;
- changes in our operating expenses;
- disruption in our sources of supply; and
- general economic conditions.

Therefore, the results of any past periods may not be relied upon as an indication of our future performance.

Our actual financial results might vary from our publicly disclosed financial forecasts.

From time to time, we publicly disclose financial forecasts. Our forecasts reflect numerous assumptions concerning our expected performance, as well as other factors which are beyond our control and which might not turn out to be correct. As a result, variations from our forecasts could be material. Our financial results are subject to numerous risks and uncertainties, including those identified throughout this Risk Factors section and elsewhere in this Annual Report. If our actual financial results are worse than our financial forecasts, the price of our ordinary shares may decline. For example, during the first quarter of 2007 we lowered our forecast for the quarter which resulted in a decrease in the price of our ordinary shares.

We have recently announced that we will not be providing quarterly forecasts of the results of our operations. This change could affect the willingness of analysts to provide research with respect to our ordinary shares which could affect the trading market for our ordinary shares.

We recently announced that we will not be providing quarterly forecasts of the results of our operations. This could result in the reduction of research analysts who cover our ordinary shares. Any reduction in research coverage could affect the willingness of investors, particularly institutional investors, to invest in our shares which could affect the trading market for our ordinary shares and the price at which our ordinary shares are traded.

Our ordinary shares are listed for trading in more than one market and this may result in price variations.

Our ordinary shares are listed for trading on the Nasdaq Global Market, or Nasdaq, and on The Tel-Aviv Stock Exchange, or TASE. Trading in our ordinary shares on these markets is made in different currencies (U.S. dollars on Nasdaq and New Israeli Shekels on TASE), and at different times (resulting from different time zones, different trading days and different public holidays in the United States and Israel). Actual trading volume on the TASE is generally lower than trading volume on Nasdaq, and as such could be subject to higher volatility. The trading prices of our ordinary shares on these two markets often differ resulting from the factors described above, as well as differences in exchange rates. Any decrease in the trading price of our ordinary shares on one of these markets could cause a decrease in the trading price of our ordinary shares on the other market.

We do not anticipate declaring any cash dividends on our ordinary shares.

We have never declared or paid cash dividends on our ordinary shares and do not plan to pay any cash dividends in the near future. Our current policy is to retain all funds and earnings for use in the operation and expansion of our business.

U.S. shareholders face certain income tax risks. In any tax year, we could be deemed a passive foreign investment company, which could result in adverse U.S. federal income tax consequences for U.S. shareholders.

Based on the composition of our gross income and the composition and value of our gross assets during 2004, 2005 and 2006, we do not believe that we were a passive foreign investment company, or PFIC, for U.S. federal income tax purposes during any of such tax years. It is likely, however, that we would be deemed to have been a PFIC in 2001, 2002 and 2003. In addition, there can be no assurance that we will not be deemed a PFIC for any future tax year in which, for example, the value of our assets, as measured by the public market valuation of our ordinary shares, declines in relation to the value of our passive assets (generally, cash, cash equivalents and marketable securities). If we are a PFIC for any tax year, U.S. shareholders who owned our ordinary shares during such year may be subject to increased U.S. federal income tax liabilities and reporting requirements for such year and succeeding years, even if we are no longer a PFIC in such succeeding years.

We urge U.S. holders of our ordinary shares to carefully review Item 10E. Taxation United States Tax Considerations United States Federal Income Taxes in this Annual Report and to consult their own tax advisors with respect to the U.S. federal income tax risks related to owning and disposing of our ordinary shares and the consequences of PFIC status.

The trading prices of our notes could be significantly affected by the market price of our ordinary shares.

We believe that the trading price of our notes is significantly affected by the market price of our ordinary shares, which may be affected by a variety of factors as set forth in these risk factors. This relationship may result in greater volatility in the trading prices of our notes than would be expected for non-convertible debt securities.

Our notes are effectively subordinated to our existing and future secured indebtedness and structurally subordinated to existing and future indebtedness and other liabilities of our subsidiaries.

Our notes are general, unsecured obligations and are effectively subordinated to any existing and future secured indebtedness we may have. In addition, our notes are not guaranteed by our subsidiaries or any future subsidiaries and, accordingly, our notes are effectively subordinated to the existing and future indebtedness and other liabilities of our subsidiaries. These liabilities may include indebtedness, trade payables, guarantees, lease obligations and letter of credit obligations. Therefore, our rights and the rights of our creditors, including the holders of the notes, to participate in the assets of any subsidiary upon that subsidiary's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors, except to the extent that we may ourselves be a creditor with recognized claims against the subsidiary. However, even if we are a creditor of one of our subsidiaries, our claims would still be effectively subordinated to any security interests in, or mortgages or other liens on, the assets of that subsidiary and would be subordinate to any indebtedness of the subsidiary senior to that held by us. As of June 15, 2007, our existing subsidiaries had no outstanding indebtedness (excluding intercompany debt and other liabilities).

There are no restrictive covenants in the indenture for the notes relating to our ability to incur future indebtedness or complete other transactions.

The indenture governing our notes does not contain any financial covenants or restrictions on the payment of dividends. The indenture does not restrict the issuance or repurchase of securities by us or our subsidiaries. The indenture contains no covenants or other provisions to afford holders of our notes protection in the event of a highly leveraged transaction, such as a leveraged recapitalization, that would increase the level of our indebtedness, or a change in control except for the ability of the holders to require us to redeem the notes under certain circumstances. The indenture governing our notes does not restrict us from incurring senior secured debt in the future or from guaranteeing our indebtedness, nor does it limit the amount of indebtedness that we can issue that is equal to our notes in right of payment. If we or our subsidiaries were to incur additional debt or liabilities, our ability to pay our obligations on the notes could be adversely affected.

Our indebtedness and debt service obligations increased upon the issuance of our notes, which may adversely affect our cash flow, cash position and stock price.

We intend to fulfill our debt service obligations with respect to our notes from our existing cash, investments and operations. In the future, if we are unable to generate cash or raise additional cash financings sufficient to meet these obligations and need to use existing cash or liquidate investments in order to fund these obligations, we may have to delay or curtail research, development and commercialization programs.

Our indebtedness could have significant additional negative consequences, including, without limitation:

requiring the dedication of a portion of our expected cash flow to service our indebtedness, thereby reducing the amount of our expected cash flow available for other purposes, including funding our research and development programs and other capital expenditures;

increasing our vulnerability to general adverse economic conditions;

limiting our ability to obtain additional financing; and

placing us at a possible competitive disadvantage to less leveraged competitors and competitors that have better access to capital resources.

Holders of our notes are not entitled to any rights with respect to our ordinary shares, but they are subject to all changes made with respect to our ordinary shares.

Holders of our notes are not entitled to any rights with respect to our ordinary shares (including, without limitation, voting rights and rights to receive dividends, if any, or other distributions on our ordinary shares), but such holders are subject to all changes affecting our ordinary shares. Holders of our notes are entitled to rights on the ordinary shares if and when we deliver ordinary shares to such holders in exchange for their notes. For example, in the event that an amendment is proposed to our articles of association requiring shareholder approval and the record date for determining the shareholders of record entitled to vote on the amendment occurs prior to delivery to a converting holder of our notes of our ordinary shares, such holders will not be entitled to vote on the amendment, although that holder will nevertheless be subject to any changes in the powers, preferences or special rights of our ordinary shares.

Our ability to fulfill our obligations under our notes is dependent upon our future financial and operating performance.

Our ability to make interest and principal payments on our notes when due depends in part upon our future financial performance and upon our ability to refinance this debt obligation or to raise additional equity capital. We may be required to pay all or a portion of our notes in November 2009. Prevailing economic conditions and financial, business and other factors, many of which are beyond our control, will affect our ability to make these payments.

If we are unable to generate sufficient cash flow to meet our debt services obligations or to repay the principal of our notes, we will have to pursue one or more alternatives, such as:

reducing our operating expenses;

reducing or delaying capital expenditures;

selling assets; or

raising additional debt or equity capital.

We cannot be sure that any of these alternatives could be accomplished on satisfactory terms, if at all, or that those actions would provide sufficient funds to retire our notes.

We may not have the ability to purchase our notes for cash if required to do so by holders on November 9, 2009, November 9, 2014 or November 9, 2019, or upon the occurrence of a fundamental change.

On November 9, 2009, November 9, 2014 or November 9, 2019, or upon specified fundamental changes relating to us, each holder of the notes may require us to purchase for cash all or a portion of such holder's notes at a price equal to 100% of the principal amount, plus accrued and unpaid interest, if any, on such notes to but excluding the date of purchase. In addition, in the case of certain fundamental changes occurring before November 9, 2009, we may be required to pay a make-whole premium to holders of the notes. We cannot be sure that we will have sufficient financial resources to purchase the notes for cash, or will be able to raise debt financing if we are required to purchase the notes at the option of the holders of such notes or upon the occurrence of a fundamental change. This repurchase requirement may also delay or make it harder for others to obtain control of us.

ITEM 4. INFORMATION ON THE COMPANY

A. HISTORY AND DEVELOPMENT OF THE COMPANY

AudioCodes Ltd. was incorporated in 1992 under the laws of the State of Israel. Our principal executive offices are located at 1 Hayarden Street, Airport City, Lod, 70151 Israel. Our telephone number is 972-3-976-4000. Our agent in the United States is AudioCodes Inc., 2099 Gateway Plaza, San Jose, California 95134.

Major Developments since January 1, 2006

Acquisition of Nuera Communications, Inc.

In July, 2006, we completed the acquisition of Nuera Communications, Inc. Nuera was acquired for a purchase price of \$82.5 million in cash, subject to reduction for certain expenses, plus an earn out arrangement under which we have agreed to pay up to an additional \$5 million if Nuera achieves certain revenue milestones during the first twelve months after consummation of the transaction. Nuera designs, manufactures and sells packet voice gateways to communication service providers worldwide. These products can be transmitted over cable, wireless, copper and fiber networks. Nuera's Open Reliable Communications Architecture, product portfolio of VoIP gateways, softswitches and management systems provide telephony solutions for cable and DSL networks, international long distance networks and enterprise networks.

Acquisition of Netrake Corporation

In August, 2006, we completed the acquisition of Netrake Corporation. Netrake was acquired for a purchase price of \$13.8 million in cash. Netrake is a provider of session border controllers and security gateways to fixed and mobile service providers for real-time delivery of voice and multimedia solutions across IP networks. Utilizing Netrake's session border controllers and security gateways, service providers can leverage market leading security capabilities, reliability, scalability, and feature richness to interconnect and secure networks and users.

Acquisition of CTI Squared Ltd.

In April 2007, we completed our acquisition of CTI Squared Ltd. We exercised an option to acquire the remaining shares of CTI Squared for a purchase price of \$10 million, with \$5 million paid in cash at the closing and \$5 million payable in cash by February 28, 2008. CTI Squared is a provider of enhanced messaging and communications platforms to service providers and enterprises. CTI Squared Ltd.'s platforms integrate data and voice messaging services over internet, intranet, PSTN, cellular, cable and enterprise networks.

Investment in Other Companies

Through December 31, 2006, we had invested an aggregate of \$3.3 million in Natural Speech Communication Ltd., a privately-held company engaged in speech recognition. In addition, during 2005 and 2006, we made convertible loans in the aggregate amount of \$902,000 to this company. Assuming a full conversion of all outstanding convertible securities to ordinary shares, we currently own approximately 40.9% of the equity in this company.

In July, 2005, we invested \$707,000 in MailVision Ltd., a privately-held company engaged in developing and marketing enhanced services platforms for Wireless service providers. As of December 31, 2006, we owned 19.5% of its ordinary shares. In November 2006, we made a convertible loan in the amount of \$44,000 to this company. The loan bears interest at the rate of 9% per annum and is convertible into shares of this company.

In December 2006, we made a convertible loan in the amount of \$1,000,000 to Kayote Networks Inc. , a privately-held company engaged in VoIP interconnectivity and interoperability services. This loan bears interest at the rate of LIBOR+2% per annum and is due and payable in December 2007 unless converted into shares of this company.

Other Recent Developments

Acquisition of AudioCodes USA Inc (formerly called Ai-Logix Inc.)

In May, 2004, we acquired all of the outstanding shares of capital stock of Ai-Logix Inc., now known as AudioCodes USA, a leading provider of advanced voice recording hardware technology located in Somerset, New Jersey.

AudioCodes USA is a strategic provider of voice and data hardware integration cards for the call recording and voice/data logging industry. AudioCodes USA provides a wide variety of voice processing cards to its customers, which include contact centers, public safety agencies, financial institutions, air traffic control and other government agencies. Its products include proprietary public exchange integration products as well the SmartWORKS family of products that are designed for all segments of the call recording industry. AudioCodes USA offers voice processing cards that support all three product segments in the call recording industry, including passive analog trunk interface cards, passive digital trunk interface cards and passive digital PBX telephone set integration cards.

Recent trends evidence a growing momentum in the use of VoIP technology in new network deployments and an expected shift of communications budgets in the enterprise market towards IP-based architectures. The call recording industry is experiencing similar trends. According to Datamonitor, the contact center market and the call logging and recording industries are rapidly adopting IP-based networking solutions. A significant portion of future voice recording and call logging revenues are expected to be generated from deployments of VoIP architectures. We believe that our acquisition of AudioCodes USA will enhance our board line business and provide an entry into the call recording market and computer telephony integration (CTI) market by leveraging our VoIP expertise with AudioCodes USA's technology, strategic partnerships and customer base.

Acquisition of UAS

In April 2003, we purchased from Nortel Networks Limited selected assets of its Universal Audio Server business, or UAS. As part of the transaction, Nortel Networks granted to us a license to use its UAS technology. We undertook to act as an exclusive supplier to Nortel Networks for its UAS products over a period of three years that ended in April 2006.

The UAS products provide enhanced conferencing, multi-language announcement functionality, and other regulatory media server applications for voice over packet networks.

Sale of Our 2.00% Senior Convertible Notes Due 2024

In November 2004, we raised net proceeds of approximately \$120.2 million in a private placement of \$125.0 million aggregate principal amount of our 2.00% Senior Convertible Notes due 2024. These notes were issued pursuant to Rule 144A under the Securities Act of 1933. Holders of the notes are entitled to convert the notes into our ordinary shares at a conversion rate of 53.4474 ordinary shares per \$1,000 principal amount of notes, which is the equivalent to a conversion price of approximately \$18.71 per share. The conversion rate is subject to adjustment in certain circumstances, such as changes in our capital structure or upon the issuance by us of share dividends or certain cash distributions. The notes may be redeemed by us, in whole or in part at any time on or after November 9, 2009. The holders may require us to redeem the notes on November 9, 2009, November 9, 2014 or November 9, 2019, or upon certain fundamental changes.

B. BUSINESS OVERVIEW

Introduction

We design, develop and market enabling technologies and system products for the transmission of voice, data, fax and multimedia communications over packet networks, which we refer to as the new voice infrastructure. Our products enable our customers to build high-quality packet networking equipment and network solutions and provide the building blocks to connect traditional telephone networks to the new voice infrastructure, as well as connecting and securing multimedia communication between different packet-based networks. Our products are sold primarily to leading original equipment manufacturers, or OEMs, system integrators and network equipment providers in the telecommunications and networking industries.

Packet networks are data communications networks that transport information, that is usually compressed and segmented into packets, over IP infrastructure shared simultaneously by several users. Equipment based on advanced voice communications standards enables packet networks to carry voice and data more efficiently than the traditional telephone networks, which were designed principally to transmit high quality voice calls.

Our voice compression technology permits the high quality transmission of voice over packet networks using substantially less network capacity than used in traditional telephone networks. Our products enable our customers to build highly-efficient, high capacity gateways and access equipment that are used to connect traditional telephone networks to packet networks. In addition, our gateway product offering provides our customers with a substantial building block for voice over packet carrier-based solutions, as an alternative to our customers developing or building their own gateways.

Our products consist of:

Signal processor chips, which process voice, data and fax signals and compress this information into packets so that it can be sent between traditional telephone networks and packet networks.

Communications boards and modules for communication system products that are deployed on both access networks and enterprise networks. The carrier network applications for these boards and modules include media gateways, which terminate calls from the Public Switched Telephone Network (PSTN), packetize and compress the call and then switch the call to the packet network, and vice-versa. The enterprise applications for these products include Computer Telephony Integration (CTI) deployments for contact centers, providing call logging and recording utilizing either industry standard or proprietary protocols.

System products, including media servers and media gateways, for access networks, trunking applications in carrier networks, and enterprise networks. These systems enable voice, data and fax to be transmitted over Internet and other protocols, and interface with third party equipment to facilitate the introduction of enhanced voice and data services. Media servers provide enhanced conferencing, multi-language announcement functionality, and other media server applications for voice over packet networks. Our media gateway products include low density analog media gateways and low, mid and high density digital media gateways.

Session border controllers that enable connectivity, policies and security for real-time sessions such as VoIP and video when traversing IP to IP networks. In addition, security gateways that enable secure real-time sessions across WIFI, broadband and wireless networks in fixed mobile convergence deployments.

Our products are based upon voice compression and fax detection and processing technologies, which transform voice and fax transmissions into small digital packets. We were involved in the development of the voice coding standard that was adopted for use in packet networks by the Voice over IP Forum, an industry group founded to ensure the interoperability and high quality of telephone service over packet networks. We have also developed advanced technologies for processing compressed voice transmissions and have significant voice communication system design expertise.

We sell our products to leading original equipment manufacturers, system integrators and distributors in the telecommunications and networking industries for use in markets providing:

telephony over packet networks based on Internet protocols;

telephony over the wireless or cable television infrastructure; and

telephone service over high speed modems operating over wireless links or data modems, known as digital subscriber line, or DSL, modems.

Customers for our products consist of primarily OEMs, network equipment providers and systems integrators. In addition, our proprietary voice compression technology is licensed to a broad group of companies that manufacture equipment for a variety of markets. As one of the original developers of the standards for voice compression technology used in packet networks, we are positioned to take advantage of the rapidly growing demand for advanced communications components enabling high quality converged voice and data services.

Industry Background

Market Trends

The networking and telecommunications industries have experienced rapid change over the last few years. The primary factors driving this change include the following:

Growth in data communications traffic. The growth of the Internet has led to a surge in data communications traffic. This growth has been fueled by the increasing number of users of the Internet, as well as by the increased use of electronic mail and multimedia content and the increased volume of information retrieved from the World Wide Web or transmitted or received over the network. In addition, organizations are increasingly turning to the use of intranets and private networks to increase productivity and create competitive advantages. This proliferation of intranets and private networks has further contributed to the surge in data traffic.

Emergence of packet networks and advances in networking technologies. Traditional voice communications networks were not designed to handle the dramatic increase in data traffic, the need for high-speed data communication and the need to serve a much larger number of users. As data traffic becomes the dominant factor in communications and as service providers begin to build and maintain converged networks for integrated voice and data services, a new generation of data-centric networks is being developed. This development has been enabled by a new generation of packet networking technologies. The capabilities to effectively carry voice, data and fax and preserve the quality of communications over these new networks have been made possible by the recent rapid advances in voice compression technologies, the advent of digital signal processing chips and packet voice, fax and data networking technologies and protocols. The surge in data traffic has led to the need for new packet-based infrastructures. As a result, service providers are seeking to exploit the advances in high speed and packet voice networking technologies to build networks that are more cost effective than the traditional circuit-switched telephone networks.

Competition in the telecommunications industry. Competitive local exchange carriers and alternative carriers are trying to penetrate the local telecommunications market with varying degrees of success by bypassing the incumbent local telephone company network through the use of emerging packet technologies in new functions like telephony transmission over cable networks and digital subscriber line networks. In addition, there is a growth of toll bypass service providers, who seek to use public or private networks in order to bypass incumbent networks. Although these new and traditional service providers are not our direct customers, they are creating market demand for equipment manufactured by our customers. The surge in data traffic and the growth in overall volume and capacity of infrastructures have also created a need for new infrastructure equipment that is capable of more efficient utilization of the available networks.

New technologies. The introduction of broadband access technologies alongside related technologies, such as new voice compression algorithms, quality of service mechanisms and security and encryption algorithms and protocols, have enabled delivery of voice over packet to residential and enterprise customers with more reliability, higher quality and greater security. Examples of such broadband access technologies include: third generation cellular, WiMax, WiFi, data over cable, digital subscriber line technologies and fiber networks (FTTx). Packet technologies enable delivery of real time and non real time services by different service providers that do not necessarily own the access network or the part of the network through which the subscriber accesses the network.. This allows for the growth of alternative or virtual service providers that do not own an access network. Competition by alternative service providers with incumbent and traditional service providers is causing incumbents to deploy advanced broadband access technologies and increase their competitiveness by offering bundled services to their subscribers, such as voice, video and data, and online gaming. In addition, the emergence of wide band vocoders that use a higher sampling rate than used in legacy TDM networks allows service providers to offer higher quality voice and music over their newly established IP network.

New services enabled by broadband access. Changes in the regulatory environment affecting service providers and the availability of new technologies or standards allow service providers to compete with one another in the provision of additional services over and above the traditional telephony service of voice, fax and dial-up modem internet connectivity. New services that could be offered include internet connectivity over broadband access or access to rich multimedia content such as music, video and games.

Increasing need for peering between VoIP networks. Service providers and enterprises are increasingly building out VoIP networks. As a result, there is an increasing need to connect between two VoIP networks. In order to interconnect between two VoIP networks, service providers and enterprises need session border controllers to provide connectivity and security.

Circuit-Switched versus Packet Networks

Traditionally, voice, data and fax communications have been transmitted and managed on separate networks, each with its own distinct industry standards and protocols. Voice, data and fax have been transmitted primarily over the traditional telephone network that is based on circuit-switched technology. When a call is placed on a circuit-switched network, a dedicated circuit is established between the two callers and is maintained for the duration of the call. This dedicated channel, which requires bandwidth of 64 kilobits per second, is unavailable for use by other callers on the network until the call is terminated.

Packet networks differ fundamentally from circuit-switched networks in that the packet network's resources and infrastructure can be shared simultaneously by several users and bandwidth can be flexibly allocated. Packet-based communications systems format the information to be transmitted, such as e-mail, voice, fax and data, into a series of smaller digital packages of information called packets. Each of these packets is then transmitted over the network and is reassembled as a complete communication at the receiving end. The various packet networks employ different network protocols for different applications, priority schemes and addressing formats to ensure reliable communication.

Packet networks offer a number of advantages over circuit-switched networks. Rather than requiring a dedicated circuit for each individual call, packet networks commingle packets of voice, fax and data from several communications sources on a single physical link. This provides superior utilization of network resources, especially in dealing with information sources with bursts of information followed by periods of silence. This superior utilization means that the same amount of traffic can be carried using fewer network resources. Additionally, the integration of voice and data communications makes possible an enrichment of services and an entire range of new, value-added applications, such as unified messaging and voice enabled web sites. In addition, voice traffic over packet networks is usually compressed to provide a further reduction in the use of or demand for bandwidth. For example, the rate at which information is transmitted over packet networks is generally between 6.3 and 8 kilobits per second as compared to 64 kilobits per second over circuit-switched telephone networks.

Convergence of Voice and Data

The proliferation of data-centric networks since the mid-1990s has made the transmission of voice and fax over these networks a cost-effective alternative to existing circuit-switched telephone networks. Most of the recent growth in packet networks has taken place over networks based on Internet protocols, and, to a lesser extent, on packet networks based on other protocols. Voice over IP, or VoIP, is the industry terminology used to describe the transmission of voice over Internet protocol-based networks.

The need to re-route voice and fax traffic from the traditional circuit-switched networks onto the new packet networks has led to the development of interface equipment between the two networks, generally referred to as gateways or access equipment, depending on the type of network. The processing of the voice and fax signals in gateway and access equipment is done according to industry-wide standards. These standards are needed to ensure that all traditional telephony traffic is seamlessly switched and routed over the packet network and vice versa.

Gateway equipment for Internet protocol-based packet networks has continued to experience significant development and growth. The gateway equipment can be generally divided into two key categories: open telecommunications architecture systems, built around industry-standard (e.g., personal computers, compact PCI, ATCA, and IBM BladeCenter) and workstation platforms for which components are available from a number of suppliers, and proprietary architecture-based gateways which are built around a custom design of a telecommunications equipment manufacturer. Voice over IP gateway equipment can be generally segmented into three classes: carrier class gateways for use in central office facilities; enterprise gateways for use by corporations and in small offices; and residential gateways for use at homes.

The Challenges

Despite the inherent advantages and the economic attractiveness of packet voice networking, the transmission of packet voice and fax poses a variety of technological challenges. These challenges relate to quality of service, reliability of equipment, functionality and features, and ability to provide a good return on investment.

Quality of Service. The most critical issues leading to poor quality of service in the transmission of voice and fax over packet networks are packet loss, packet delay and packet delay jitter. For real time signals like voice, the slightest delay in the arrival of a packet may render that packet unusable and, in a voice transmission, the delayed packet is considered a lost packet. Delay is usually caused by traffic hitting congestion or a bottleneck in the network. The ability to address delay is compounded by the varying arrival times of packets, called packet-jitter, which results from the different routes taken by different packets. This jitter can be eliminated by holding the faster arriving packets until the slower arriving packets can catch up, but this introduces further delay. These idiosyncrasies of packet networks do not noticeably detract from the quality of data transmission since data delivery is relatively insensitive to time delay. However, even the slightest delay or packet loss in voice and fax transmission can have severe ramifications such as voice quality degradation or, in the case of a fax transmission, call interruption. Therefore, the need to compensate for lost or delayed packets without degradation of voice and fax quality is a critical issue.

Gateway Reliability. In order for a packet network to be efficient for voice or fax transmission, the VoIP gateway equipment that is installed in core networks must be able to deliver a higher level of performance than existing switching equipment located at central offices. The telecommunications providers' central offices contain circuit-switching equipment that typically handles tens of thousands of lines and is built to meet severe performance criteria relating to reliability, capacity, size, power consumption and cost.

Connectivity and Security. In contrast with legacy circuit switched voice and video communications, Internet Protocol based communications are more susceptible to attacks, interceptions and fraud by unauthorized entities. In addition, the complexity and relative immaturity of IP networks and protocols pose significant quality of service and connectivity challenges when sessions cross between separate IP networks.

Functionality. In order to effectively replace legacy circuit-switching equipment, packet network equipment must be able to deliver equivalent and improved functionality and features for the service providers and network users.

Return on Investment. With the reduction in profitability of service providers there is an even greater need for them to achieve better returns on investment from capital expenditures on new equipment. Given the evolving nature of packet technologies and capabilities, there is greater pressure to provide cost effective technological solutions.

In order to maximize the benefits of using packet networks for the transmission of voice, data and fax, products must be able to address and solve these inherent problems and challenges. These products must also be standards-based to support interoperability among different equipment manufacturers and to allow operation over various networks.

AudioCodes Solution

Using our proprietary voice compression algorithms and industry standards, advanced digital signal processing techniques and voice communications system design expertise, our products address the quality of service problems posed by packet delay, packet delay jitter and packet loss. As a result, we enable our customers to build packet networking equipment that provides communication quality comparable to the traditional telephone networks. In addition, our communications boards and modules improve gateway efficiency and provide the building blocks for high performance, large capacity, open telecommunications platform-based gateways. We work closely with our customers, tailor our products to meet their specific needs, assist them in integrating our products within their systems and help them bring their systems to market on a timely basis. We also work with our customers in deploying their systems in various network environments.

We believe that the following strengths have enabled us to develop our products and provide services to our customers:

Leadership in voice compression technology. We are a leader in voice compression technology. Voice compression exploits redundancies within a voice signal to reduce the bit rate of data required to digitally represent the voice signal while still maintaining acceptable voice quality. Our key development personnel have significant experience in developing voice compression technology. We were involved in the development of the ITU G.723.1 voice coding standard that was adopted by the Voice over IP Forum and the International Telecommunications Union as the recommended standard for use in voice over IP gateways. We implement industry voice compression standards and work directly with our customers to design state-of-the-art proprietary voice compression algorithms that satisfy specific network requirements. We believe that our significant knowledge of the basic technology permits us to optimize its key elements and positions us to address further technological advances in the industry. We also believe that our technological expertise has resulted in us being sought out by leading equipment manufacturers to work with them in designing their systems and provision of solutions to their customers.

Digital signal processing design expertise. Our extensive experience and expertise in designing advanced digital signal processing algorithms enables us to implement them efficiently in real time systems. Digital signal algorithms are computerized methods used to extract information out of signals. In designing our signal processors, we use minimal digital signal processing memory and processing power resources. This allows us to develop higher density solutions than our competitors. Our expertise is comprehensive and extends to all of the functions required to perform voice compression, fax and modem transmission over packet networks and telephone signaling processing.

Compressed voice communications systems design expertise. We have the expertise to design and develop the various building blocks and the complete gateways and media servers required for complete voice over packet systems. In building these systems, we develop hardware architectures, voice packetization software and signaling software, and integrate them with our signal processors to develop a complete, high performance compressed voice communications system. We assist our customers in integrating our signal processors into their hardware and software systems to ensure high voice quality, high completion rate of fax and data transmissions and telephone signaling processing accuracy. Further, we are able to customize our off-the-shelf products to meet our customers' specific needs, thereby providing them with a complete, integrated solution and enabling them to market their products with a reduced time to market.

We believe that our products possess the following advantages:

Voice over Packet signal processors. Our multi-channel signal processors enable our customers and us to create products that meet the reliability, capacity, size, power consumption and cost requirements needed for building high capacity gateways.

Multiple and comprehensive product lines. We address both the standards-based open telecommunications architecture market or the proprietary system market, we are able to address both segments. We can do this because we enable our customers to offer multiple applications and address different market segments. For example, our voice over IP communications boards target the open telecommunications architecture market, while our signal processors, modules and voice packetization software target the proprietary system market. Our analog and digital media gateways target access, trunking and enterprise applications and our digital media gateways target wireless, wire line and cable networks. Our session border controllers target access and peering networks.

Extensive feature set. Our products incorporate an extensive set of signal processing functions and features (such as coders, fax processing and echo cancellation), functionalities (such as H.323, media gateway control protocol, or MGCP, trunking gateway control protocol, or TGCP, media gateway control, or Megaco, and session initiated protocol, or SIP) and implement a complete system. We offer the ability to manage multiple channels of communications working independently of each other, with each channel capable of performing all of the functions required for voice compression, fax and modem transmission, telephone signaling processing and other functions. These functions include voice, fax or data detection, echo cancellation, telephone tone signal detection and generation and other telephony signaling processing.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Cost effective solutions. We are able to address different market segments and applications with the same hardware platforms thus providing our customers with efficient and cost effective solutions.

Open architecture. Our voice over packet communications boards target the open architecture gateway market segment, which enables our customers to use hardware and software products widely available for standards-based open telecommunications platforms. We believe that this provides our customers with an improved time to market and the benefits of scalability, upgradeability and enhanced functionality without the need to completely redesign their systems for evolving applications.

Various entry level products. Our wide product range (chips to media gateways, session border controllers and media servers) provides our customers with a range of entry level products. We believe that these building blocks enable our customers to significantly shorten their time to market by adding their value added solution.

VoIPerfect™ architecture. Our VoIPerfect architecture serves as the underlying technology platform common to all of our products since 1998. VoIPerfect™ is regularly updated and upgraded with features and functionalities required to comply with evolving standards and protocols. VoIPerfect™ architecture comprises VoP digital signal processing, or DSP, software and media streaming embedded software, integrated public telephone switched network, or PTSN, signaling protocols and VoIP standard control protocols, provisioning and management engines. Additional features enable carrier-grade quality and high availability. VoIPerfect™ architecture components are available in AudioCodes products at various levels of integration from the chip level, through peripheral component interconnect mezzanine card, or PMC, modules and PCI/compact PCI (cPCI) blades, to high-availability and non-high-availability analog and digital media gateway platforms.

Business Strategy

Our goal is to be the leading provider of enabling technologies and products for the transmission of voice, data and fax over packet networks. The following are key elements of our strategy:

Maintain and extend technological leadership. We intend to capitalize on our expertise in voice compression technology and proficiency in designing voice communications systems. In 1995, we co-authored the ITU G.723.1 voice coding standard that was adopted by the Voice over IP Forum as the recommended standard for use in voice over IP gateways. In 1998, we introduced NetCoder®, a new voice coder that was designed specifically for IP networks. In 2001, we introduced TrunkPack®1610, a cPCI Telephony board supporting PSTN, signaling, MGCP and MEGACO call controls. In 2002, we introduced the Mediant™ Media Gateways as part of our initiative to provide complete media gateways to our network equipment provider. In 2002, we also launched our media server product family to support IP-based local access and enhanced services for wireless, cable, voice virtual private network and IP centrex markets. In 2006, we launched our nCite session border controller product line as a result of our acquisition of Netrake. In 2007, we have acquired CTI Squared, which will add application software to our product portfolio. We continually upgrade our product lines with additional functionalities, interfaces and densities. We have invested heavily and are committed to continued investment in developing technologies that are key to providing high performance voice, data and fax transmission over packet networks and to be at the forefront of technological evolution in our industry.

Strengthen and expand strategic relationships with key customers. Our strategy has been to sell our products to leading equipment manufacturers in the telecommunications and networking industries and to establish and maintain long-term working relationships with them. We work closely with our customers to engineer products and subsystems that meet each customer's particular needs. The long development cycles usually required to build equipment incorporating our products frequently results in close working relationships with our customers. By focusing on leading equipment manufacturers with large volume potential, we believe that we reach a substantial segment of our potential customer base while minimizing the cost and complexity of our marketing efforts.

Expand and enhance the development of highly-integrated products. We plan to continue designing, developing and introducing new product lines and product features that address the increasingly sophisticated needs of our customers. We believe that our knowledge of core technologies and system design expertise enables us to offer better solutions that are more complete and contain more features than competitive alternatives. We believe that the best opportunities for our growth and profitability will come from offering broad range of highly-integrated network product lines and product features, such as our continuously updated analog and digital media gateways and products from our recently acquired companies including session boarder controllers, security gateways, messaging platforms and cable telephony gateways.

Build upon existing technologies to penetrate new markets. The technology we developed in connection with the IP telephony market can be used to serve similar product requirements in multiple emerging markets utilizing similar packet networking technologies. These markets include those providing telephony over digital subscriber lines, wireless networks and the cable television infrastructure.

Develop a network of strategic partners. Part of our strategy has been to sell our products through customers that can offer our products as part of a full-service solution to their customers. We expect to further develop our strategic partner relationships with system integrators and other service providers in order to increase our customer base.

Acquire complementary businesses and technologies. We expect to pursue the acquisition of complementary businesses and technologies or the establishment of joint ventures to broaden our product offerings, enhance the features and functionality of our systems, increase our penetration in targeted markets and expand our marketing and distribution capabilities. As part of this strategy, we acquired the UAS business from Nortel in April 2003 and AudioCodes USA, formerly known as Ai-Logix, in May 2004. We also acquired Nuera in July 2006, Netrake in August 2006 and CTI Squared in April 2007.

Products

Our products facilitate the transmission of voice, data and fax over packet networks. To date, we have incorporated our algorithms, technologies and systems design expertise in product lines:

voice over packet processors;

VoIP communication boards (TrunkPack®);

media processing boards for enhanced services and functionalities such as conferencing and messaging (IPmedia™);

voice and data logging hardware integration board products;

analog media gateways for toll bypass access and enterprise applications;

digital media gateways with various capacities for wireless, wireline (Mediant™) and cable (Mediant™ Cable);

media server for enhanced services and functionalities such as conferencing and messaging (IPmedia(TM) Media Servers);

session border controllers, or SBCs, that enable connectivity, contain protocol and connectivity policies, and provide security for real-time sessions such as VoIP and video when traversing from a public to a private network. In addition, security gateways enable secure real-time sessions across wifi, broadband and wireless networks in fixed mobile convergence deployments; and

element management system, or EMS.

In addition, we continue to offer customers our professional services, which usually involve customization and development projects for customers.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Our products are designed to build on our core technology and competence extending them both vertically (chips inserted into boards, boards inserted into digital media gateways) and horizontally into different applications for different market segments, such as enterprise, wireline, cable and wireless.

Voice Over Packet Processors

Our signal processor chips compress and decompress voice, data and fax communications. This enables these communications to be sent from circuit-switched telephone networks to packet networks. Our chips are digital signal processors on which we have embedded our algorithms. These signal processor chips are the basic building blocks used by our customers and us to enable their products to transmit voice, fax and data over packet networks. These chips may be incorporated into our communications boards, media gateway modules and analog media gateways for access and enterprise applications or they may be purchased separately and incorporated into other boards or customer products.

Our signal processor chips implement a complete signal processing system, supporting voice compression, echo cancellation, fax and modem processing and telephony signaling processing. The signal processor chips also enhance gateway efficiency by supporting multiple independently processed channels of communication.

We provide a range of voice over packet processors of voice communications over different types of packet networks, such as IP and ATM. Our processors are used by original equipment manufacturers, known as OEMs, in their products enabling simple development and a significant reduction in time-to-market. Each processor constitutes a full voice band subsystem that includes standards-based low bit rate voice compression, echo cancellation, in-band signaling detection and generation fax transmission and other signaling tones handling.

VoIP Communication Boards

Our communications boards are designed to operate in gateways connecting the circuit-switched telephone network to packet networks based on Internet protocols. Our boards comply with voice over IP industry standards and allow for interoperability with other gateways. The boards also enable high capacity operations while fitting into a single PCI or compact PCI platform. Just as our signal processor chips can handle multiple channels on a single processor, our communications boards can support multiple telephony trunk processing and differing modes of operations to provide manufacturers with greater system flexibility.

Our boards support standards-based open telecommunications architecture systems and combine our signal processor chips with communications software, signaling software and proprietary hardware architecture to provide a cost efficient interoperable solution for high capacity gateways. We believe that using open architecture permits our customers to bring their systems to market quickly and to integrate our products more easily within their systems.

Our boards represent a combined functionality of both media streaming processing (voice fax and modem) and on-board telephony interfaces, along with their associated signaling protocols.

Analog Media Gateways for Toll Bypass Access and Enterprise Applications

MediaPack™, our analog and BRI media gateways for toll bypass access and enterprise applications, empower the next-generation network by providing cost-effective, cutting-edge technology solutions that deliver voice and fax services to the corporate market, small businesses and home offices. Our analog media gateways for access and enterprise applications provide media streaming functionality while being either controlled by a centralized call agent or use on box VoIP control protocols (H.323, MGCP and SIP). Convergence of data, voice and fax is achieved by a combination of the media gateway with any IP access technology, eliminating the cost of multiple access circuits. This product family utilizes our experience and digital signal processing, or DSP, technology for echo cancellation, voice compression, silence suppression and comfort noise generation.

The MediaPack™ family represents a feature rich product for streaming voice quality with a powerful analog interface supporting all major control protocols such as H323, SIP, MGCP and MEGACO.

Digital Media Gateways with Various Capacities for Wireless, Wireline and Cable (Mediant™)

Mediant™ is our family of converged media gateways for wireline, cable, wireless (GSM and CDMA), fixed-mobile-convergence and enterprise networks. The Mediant™ product family offers scalability and functionality, providing a full suite of standards compliant control protocols and public switched telephone network, or PSTN, signaling interfaces for a variety of enterprise, wireline, cable and wireless media gateway applications in most softswitch controlled environments. This product family is compatible with popular wireline, cable and wireless voice coders and protocols including code-division multiple access (CDMA), global system for mobile communications (GSM), CDMA2000 and universal mobile telecommunications service (UMTS) It builds on our TrunkPack® architecture, which is installed in millions of lines worldwide. The Mediant™ family provides carriers with a comprehensive line of different sized gateways. Small or medium-sized gateways enable cost-effective solutions for enterprise or small points of presence, as well as entry into fast growing new and emerging markets. The large gateway scales to central office capacities and is designed to meet carriers' operational requirements. The entire Mediant™ gateway family shares our same VoIP media gateway boards, assuring mature, field-proven solutions.

For the cable market, the Mediant™ gateway family complies with packet telephony standards and is designed for either hybrid or all IP cable network architecture. The Mediant gateway enables deployment of advanced packet-based cable telephony at multiple service operators own pace, without costly hardware changes. The Mediant™ gateway can be initially deployed as a V5.2 IP access terminal and then easily migrated by software upgrade to a cable telephony media gateway with external call management provided by a softswitch and an SS7 interface to the PSTN.

Edgar Filing: AUDIOCODES LTD - Form 20-F

IPmedia™ Boards and Servers for Enhanced Services and Functionalities such as Conferencing and Messaging (IPmedia™ Platforms)

The IPmedia™ product family is designed to allow OEMs and application partners to provide sophisticated content and services that create revenue streams and customer loyalty through the ability to provide additional services. The IPmedia™ platforms interface both packet and switched-circuit telephony modules, while saving space. The IPmedia™ platform provides voice and fax processing capabilities to enable, together with our partners, an architecture for development and deployment of enhanced services.

IPmedia™ platforms are designed to answer the growing market demand for enhanced voice services over packet networks, particularly network-based applications like unified communications, call recording, and conferencing by carriers and application service providers. IPmedia™ enables our customers to develop and market applications such as: unified communications, interactive voice response, call-centers, conferencing and voice-activated personal assistant. IPmedia™ products are currently offered on our PCI and cCPI boards and on the 2000, 3000, 5000 and 8000 series (IPmedia™ 2000, IPmedia™ 3000, IPmedia™ 5000 and IPmedia™ 8000).

Session Border Controllers and Security Gateways

We provide the nCite session border controller, or SBC, and security gateway products that help service providers and network equipment providers to enable connectivity between different VoIP networks and to provide security to deployments of fixed mobile convergence, or FMC networks, for integrating wireline and wireless networks.

nCite session border controllers provide secure VoIP and multimedia traversal of firewall, or FW, and network address translation, or NAT, systems, as well as denial of service, or DoS, attack prevention at both the signaling and media layers. NAT and FW traversal are necessary to allow VoIP and multimedia session to pass from the Service Provider (SP) network to the residential or enterprise networks. DoS attack prevention protects the SP network from attacks that load the network until it crashes. The nCite SBCs also provide comprehensive Quality of Service, or QoS, mechanisms and protocol interworking (translation from one VoIP protocol to another, or between two variants of same VoIP protocol to enable two softswitches to communicate with each other). AudioCodes nCite solutions offer proven interoperability with major softswitches, SIP servers, application servers, IP PBXs and a large number of IP-based voice and video endpoints.

The nCite security gateway enables secure (authenticated and encrypted) real-time sessions across Wi-Fi, broadband and wireless networks in FMC deployments. The nCite security gateway, or nCite SG, provides secure termination and aggregation for IP phones, dual-mode Wi-Fi and cellular-capable VoIP handsets that are used in converged wireline and wireless networks.

Element Management System

Our element management system, or EMS, is an advanced solution for centralized, standards-based management of our VoP gateways, covering all areas vital to the efficient operations, administration, management and provisioning of our Mediant™ and MediaPack™ VoP gateways.

Our EMS offers network equipment providers and system integrators fast setup of medium and large VoP networks with the advantage of a single centralized management system that configures, provisions and monitors all of AudioCodes gateways deployed, either as customer premises equipment, access or core network platforms.

Voice and Data Logging Hardware Integration Board Products

The SmartWORKS™ family of products is our voice and data logging hardware integration board product line. SmartWORKS™ boards for the call recording and voice voice/data logging industry are compatible with a multitude of private branch exchange, or PBX, telephone system integrations.

Core Technologies

We believe that one of our key competitive advantages is our broad base of core technologies ranging from advanced voice compression algorithms to complex architecture system design. We have developed and continue to build on a number of key technology areas.

Low Bit Rate Voice Compression Algorithms

Voice compression techniques are essential for the transmission of voice over packet networks. Voice compression exploits redundancies within a voice signal to reduce the bit rate required to digitally represent the voice signal, from 64 kilobits per second, or kbps, down to low bit rates ranging from 5.3 kbps to 8 kbps, while still maintaining acceptable voice quality. A bit is a unit of data. Different voice compression algorithms, or coders, make certain tradeoffs between voice quality, bit rate, delay and complexity to satisfy various network requirements. Use of voice activity detection techniques and silence removal techniques further reduce the transmission rate by detecting the silence periods embedded in the voice flow and discarding the information packets which do not contribute to voice intelligibility.

We are one of the innovators in developing low bit rate voice compression technologies. Our patented MP-MLQ™ coder was adopted in 1995 by the ITU as the basis for the G.723.1 voice coding standard for audio/visual applications over the circuit-switched telephone networks. By adhering to this standard, system manufacturers guarantee the interoperability of their equipment with the equipment of other vendors.

Advanced Digital Signal Processing Algorithms

To provide a complete voice over packet communications solution, we have developed a library of digital signal processing functions designed to complement voice compression coders with additional functionality, including: echo cancellation; voice activity detection; facsimile and data modem processing; and telephony signaling processing. Our extensive experience and expertise in designing advanced digital signal processing solutions allows us to implement algorithms using minimal processing memory and power resources. Our algorithms include:

Echo cancellation. Low bit rate voice compression techniques introduce considerable delay, necessitating the use of echo cancellation algorithms. The key performance criterion of an echo canceller is its ability to deal with large echo reflections, long echo delays, fast changing echo characteristics, diverse telecommunications equipment and network effects. Our technology achieves low residual echo and fast response time to render echo effects virtually unnoticeable.

Fax transmission. There are two widely used techniques for real time transmission of fax over networks based on Internet protocols: fax relay and fax spoofing. Fax relay takes place when a fax is sent from a fax machine through a gateway over networks based on Internet protocols in real time to a fax machine at the other end of the network. At the gateway, the analog fax signals are demodulated back into digital data, converted into packets, routed over the packet network and reassembled at the receiving end. Fax relay is used when the round trip network delay is small (typically below one second). When the round trip network delay increases, one of the fax machines may time out while waiting for a response from the other fax machine to arrive.

Data modem technology. We have developed data modem technologies that facilitate data relay over packet networks. Our data modem relay software algorithms support all existing data modem standards up to a bit rate of 14.4 kbps.

Telephony signaling processing. Various telephony signaling standards and protocols are employed to route calls over the traditional telephone network, some of which use in-band methods, which means that the signaling tones are sent over the telephone line just like the voice signal. As a result, in-band signaling tones may have to undergo the compression process just like the voice signal. Most low bit-rate voice coders, however, are optimized for speech signals and exhibit poor tone transfer performance. To overcome this, our processors are equipped with tone detection and tone generation algorithms. To provide seamless transparency between the traditional telephone network and packet networks for signaling, we employ various digital signal processing techniques for efficient tone processing.

Voice Communications Software

To transmit the compressed voice and fax over packet networks, voice packetization processes are required to construct and deconstruct each packet of data for transmission. The processing involves breaking up information into packets and adding address and control fields information according to the specifications of the appropriate packet network protocol. In addition, our software provides the interface with the signal processors and addresses packet delay and packet loss issues.

Media Processing

Our media processing products provide the enabling technology and platforms for developing enhanced service applications for legacy and next generation networks. We have developed media processing technologies such as message recording/playback, announcements, voice coding and mixing and call progress tone detection that enable our customers to develop and offer advanced revenue generating services such as conferencing, network announcements, voice mail and interactive voice response. Our media processing technology and products offer PSTN and packet interfaces to enable flexible deployment options.

Digital Cellular Communications Technology

Convergence of wireline and wireless networks is becoming a key driver for deployment of voice over packet networks, enabling operators to use common equipment for both networks, thus lowering capital expenditures and operating expenses, while offering enriched services.

Our voice over packet products provide a cost effective solution for these convergence needs, complying with 2G and 3G cellular standards, for GSM/UMTS, UMA and CDMA/CDMA2000 networks. These include support for cellular vocoders (concurrently with wireline vocoders), interfaces and protocols. These interfaces and protocols are being defined by special standardization groups (e.g., 3GPP and 3GPP2) and include capabilities such as mediation (mobile to mobile calls with no transcoding), support for handoff and lawful intercept and various other cellular-specific capabilities.

VoIP for Telephony over Cable Networks

Telephony over cable networks is characterized by technical challenges due to the intrinsic nature of the cable system which broadcasts across the subscriber network. The cable telephony market is divided into two main standards: softswitch solutions and IP access terminal, or IPAT, V5.2 solutions utilizing Class 5 switches. We have developed media gateway technology that is capable of supporting both standards while migration from IPAT solutions to softswitch solutions may be done by a software only upgrade, thus protecting the end customer's investment. Our technology complies with PacketCable standards including security/encryption technology, support for quality of service, call control and signaling.

Hardware Architectures for High Density Multi-Trunk Voice over Packet Systems

Our voice over packet product offerings include high density, multi-trunk voice over packet systems for standards-based open telecommunications platforms in access equipment. Multi-trunk processing is centered around a design encompassing two key processing elements, signal processors performing voice, fax and data processing and a communications processor. Overall system performance, reliability, capacity, size, cost and power consumption are optimized, based on our hardware architecture, which supports high throughput rates for multi-trunk processing. On-board efficient network and system interfaces relieve the system controller from extensive real time data transfer and processing of data streams.

Carrier Grade System Expertise

To provide state of the art carrier grade media gateways, we have developed a wide expertise in a number of fields essential to such a product line. We have developed or integrated the various components required to implement a full digital media gateway solution that behaves as a unified entity to the external world. This required a major investment in adapting standard cPCI platforms to our needs. Such adaptation included optimizing power supply and cooling requirements, adding centralized shelf controllers, fabric switches and alarm cards to the chassis. Another aspect of the expertise we developed relates to high availability software and hardware design. High availability is a required feature in any carrier grade media gateway platform. We have also developed a sophisticated EMS to complete our offering. Our EMS enables the user to provision and monitor a number of media gateways from a centralized location.

Customers

Our customers consist of OEMs, network equipment providers and systems integrators, carriers and distributors. Historically, we have derived the majority of our revenues from sales to a small number of customers. The identities of our principal customers have changed and we expect that they will continue to change, from year to year. We expect that a small number of customers will continue to account for a large percentage of our sales. Sales to Nortel Networks accounted for 18.6% of our revenues in 2004, 16.3% of our revenues in 2005 and 15.2% of our revenues in 2006. No other customer accounted for more than 10.0% of our revenues in 2004, 2005 or 2006.

Sales and Marketing

Our sales and marketing strategy is to achieve design wins with industry leaders in our targeted markets. Prospective customers generally must make a significant commitment of resources to test and evaluate our products and to integrate them into larger systems. As a result, our sales process is often subject to delays associated with lengthy approval processes that typically accompany the design and testing of new communications equipment. For these reasons, the sales cycles of our products to new customers are often lengthy, averaging approximately six to twelve months after achieving a design win. This time may be further extended because of internal testing, field trials and requests for the addition or customization of features.

We also provide our customers with reference platform designs, which enable them to achieve easier and faster transitions from the initial prototype designs we use in the test trials through final production releases. We believe this significantly enhances our customers' confidence that our products will meet their market requirements and product introduction schedules.

We market our products in the United States, Europe, Asia, Latin America and Israel primarily through a direct sales force. Marketing managers are dedicated to principal customers to promote close cooperation and communication. Additionally, we market our products in these areas through independent sales representatives and system integrators. We select these independent entities based on their ability to provide effective field sales, marketing communications and technical support to our customers. We have generally entered into a combination of exclusive and non-exclusive sales representation agreements with these representatives in each of the major countries in which we do business. These agreements are typically for renewable 12-month terms, are terminable at will by us upon 90 days notice, and do not commit the sales representative to any minimum sales of our products to third parties. Some of our representatives have the ability to return some of the products they have previously purchased and purchase more up to date models.

Manufacturing

Texas Instruments Incorporated supplies all of the signal processor chips used for our signal processors. The communications processor currently used on our communications boards is manufactured by Motorola. We believe that similar communications processors are available from other suppliers. Other components are generic in nature and we believe they can be obtained from multiple suppliers.

We have not entered into any long-term supply agreements. To date, we have been able to obtain sufficient amounts of these components to meet our needs and do not foresee any supply difficulty in obtaining timely delivery of any parts or components. However, an interruption in supply from any of these sources, especially with regard to signal processors from Texas Instruments Incorporated, or an unexpected termination of the manufacture of certain electronic components could disrupt production, thereby adversely affecting our results. We generally maintain an inventory of critical components used in the manufacture and assembly of our products although our inventory of signal processor chips would likely not be sufficient in the event that we had to engage an alternate supplier for these components.

We utilize contract manufacturing for substantially all of our manufacturing processes. Much of our manufacturing is carried out by third-party subcontractors in Israel. We have extended our manufacturing capabilities through third party subcontractors in the United States, Mexico and China. Our internal manufacturing activities consist primarily of the production of prototypes, test engineering, materials purchasing and inspection, final product configuration and quality control and assurance.

Industry Standards and Government Regulations

Our products must comply with industry standards relating to telecommunications equipment. Before completing sales in a country, our products must comply with local telecommunications standards, recommendations of quasi-regulatory authorities and recommendations of standards-setting committees. In addition, public carriers require that equipment connected to their networks comply with their own standards. Telecommunication-related policies and regulations are continuously reviewed by governmental and industry standards-setting organizations and are always subject to amendment or change. Although we believe that our products currently meet applicable industry and government standards, we cannot be sure that our products will comply with future standards.

We are subject to telecom industry regulations and requirements set by telecommunication carriers that address a wide range of areas including quality, final testing, safety, packaging and use of environmentally friendly components. We comply with the European Union's Restriction of Hazardous Substances Directive (under certain exemptions) that requires telecom equipment suppliers to stop the usage of some materials that are not environmentally friendly by July 1, 2006. These materials include cadmium, hexavalent chromium, lead, mercury, polybrominated biphenyls and polybrominated diphenyl ethers. Under the directive, an extension for compliance through 2010 was granted with respect to the usage of lead in solders in Network Infrastructure equipment. We expect that other countries, including countries we operate in, will adopt similar directives or other additional regulations in the near future.

Competition

Competition in our industry is intense and we expect competition to increase in the future. Our competitors currently sell products that provide similar benefits to those that we sell. There has been a significant amount of merger and acquisition activity and strategic alliances frequently involving major telecommunications equipment manufacturers acquiring smaller companies, and we expect that this will result in an increasing concentration of market share among these companies, many of whom are our customers.

Our principal competitors in the sale of signal processing chips are Texas Instruments, Broadcom, Infineon, Centillium and Mindspeed. Several large manufacturers of generic signal processors, such as Motorola, Agere Systems, which merged with LSI Corporation in April 2007, and Intel have begun, or are expected to begin marketing competing processors. Our principal competitors in the communications board market are NMS Communications, Intel, Motorola, Cantata Technology, Acculab and PIKA Technologies, Inc.

Our principal competitors in the area of analog media gateways (2 to 24 ports) for access and enterprise are Cisco Systems Inc., Mediatrix Telecom, Inc., Vega Stream Limited, Samsung, Innovaphone AG, Quintum Technologies, Tainet Communication System Corp., Welltech, Ascii Corp., D-Link Systems, Inc., Multitech Inc., Inomedia, OKI and LG. In addition we face competition in low, mid and high density gateways from internal development at companies such as Nortel, Lucent, Alcatel, Siemens, Huawei, Ericsson, UTstarcom, ZTE and from Cisco Systems, Veraz Networks, Sonus Networks, General Bandwidth, and Commatch (Telrad).

Our principal competitors in the media server market segment are Cantata Technology, NMS Communications, Convedia/Radisys, IP Unity/Glenayre, Cognitronics and Aculab. In addition, we face competition in software-based and hardware-based media servers from internal development at companies such as Hewlett-Packard, Comverse-NetCentrex, Nortel, Alcatel Lucent, Nokia-Siemens and Ericsson.

With respect to session border controllers, we compete against Acme Packets, Nextone, Juniper and Sonus. In the security gateway market, we compete against private companies such as Reefpoint and Azaire.

We also face significant and increasing competition in the market for products utilized in the VoIP market. Our competitors in the market for VoIP products include telecommunications companies, data communication companies and companies specializing in voice over IP products, some of which have greater name recognition, larger installed customer bases and significantly greater financial, technical, sales and marketing resources than we do.

Many of our competitors have the ability to offer vendor-sponsored financing programs to prospective customers. Some of our competitors with broad product portfolios may also be able to offer lower prices on products that compete with ours because of their ability to recoup a loss of margin through sales of other products or services. Additionally, voice, audio and other communications alternatives that compete with our products are being continually introduced.

In the future, we may also develop and introduce other products with new or additional telecommunications capabilities or services. As a result, we may compete directly with telephone companies and other telecommunications infrastructure providers. Additional competitors may include companies that currently provide computer software products and services, such as telephone, media, publishing and cable television. The ability of some of our competitors to bundle other enhanced services or complete solutions with VoIP products could give these competitors an advantage over us.

Intellectual Property and Proprietary Rights

Our success is dependent in part upon proprietary technology. We rely primarily on a combination of patent, copyright and trade secret laws, as well as confidentiality procedures and contractual provisions, to protect our proprietary rights. We also rely on trademark protection concerning various names and marks that serve to identify it and our products. While our ability to compete may be affected by our ability to protect our intellectual property, we believe that, because of the rapid pace of technological change in our industry, maintaining our technological leadership and our comprehensive familiarity with all aspects of the technology contained in our signal processors and communication boards is also of primary importance.

We own U.S. patents that relate to our voice compression and session border control technologies. We also actively pursue patent protection in selected other countries of interest to us. In addition to patent protection, we seek to protect our proprietary rights through copyright protection and through restrictions on access to our trade secrets and other proprietary information which we impose through confidentiality agreements with our customers, suppliers, employees and consultants.

There are a number of companies besides us who hold or may acquire patents for various aspects of the technology incorporated in the ITU's standards or other industry standards or proprietary standards, for example, in the fields of wireless and cable. While we have obtained cross-licenses from some of the holders of these other patents, we have not obtained a license from all of the holders. The holders of these other patents from whom we have not obtained licenses may take the position that we are required to obtain a license from them. Companies that have submitted their technology to the ITU (and generally other industry standards making bodies) for adoption as an industry standard are required by the ITU to undertake to agree to provide licenses to that technology on reasonable terms. Accordingly, we believe that even if we were required to negotiate a license for the use of such technology, we would be able to do so at an acceptable price. Similarly, however, third parties who also participate with respect to the same standards-setting organizations as do we may be able to negotiate a license for use of our proprietary technology at a price acceptable to them, but which may be lower than the price we would otherwise prefer to demand.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Under a pooling agreement dated March 3, 1995, as amended, between AudioCodes and DSP Group, Inc., on the one hand, and France Telecom, Université de Sherbrooke and their agent, Sipro Lab Telecom, on the other hand, we and DSP Group, Inc. granted to France Telecom and Université de Sherbrooke the right to use certain of our specified patents, and any other of our and DSP Group, Inc. intellectual property rights incorporated in the ITU G.723.1 standard. Likewise France Telecom and Université de Sherbrooke granted AudioCodes and DSP Group, Inc. the right to use certain of their patents and any other intellectual property rights incorporated in the G.723.1 standard. In each case, the rights granted are to design, make and use products developed or manufactured for joint contribution to the G.723.1 standard without any payment by any party to the other parties.

In addition, each of the parties to the agreement granted to the other parties the right to license to third parties the patents of any party included in the intellectual property required to meet the G.723.1 standard, in accordance with each licensing party's standard patent licensing agreement. The agreement provides for the fee structure for licensing to third parties. The agreement provides that certain technical information be shared among the parties, and each of the groups agreed not to assert any patent rights against the other with respect of the authorized use of voice compression products based upon the technical information transferred. Licensing by any of the parties of the parties' intellectual property incorporated in the G.723.1 standard to third parties is subject to royalties that are specified under the agreement.

Each of the parties to the agreement is free to develop and sell products embodying the intellectual property incorporated into the G.723.1 standard without payment of royalties to other parties, so long as the G.723.1 standard is implemented as is, without modification. The agreement expires upon the last expiration date of any of the AudioCodes, DSP Group, Inc., France Telecom or Université de Sherbrooke patents incorporated in the G.723.1 standard. The parties to the agreement are not the only claimants to technology underlying the G.723.1 standard.

We are aware of parties who may be infringing our technology that is part of the G.723.1 standard. We evaluate these matters on a case by case basis, directly or through our licensing partner. Although we have not yet determined whether to pursue legal action, we may do so in the future. There can be no assurance that any legal action will be successful.

Third parties have claimed, and from time to time in the future may claim, that our past, current or future products infringe their intellectual property rights. Intellectual property litigation is complex and there can be no assurance of a favorable outcome of any litigation. Any future intellectual property litigation, regardless of outcome, could result in substantial expense to us and significant diversion of the efforts of our technical and management personnel. Litigation could also disrupt or otherwise severely impact our relationships with current and potential customers as well as our manufacturing, distribution and sales operations in countries where relevant third party rights are held and where we may be subject to jurisdiction. An adverse determination in any proceeding could subject us to significant liabilities to third parties, require disputed rights to be licensed from such parties, assuming licenses to such rights could be obtained, or require us to cease using such technology and expend significant resources to develop non-infringing technology. We may not be able to obtain a license at an acceptable price.

Edgar Filing: AUDIOCODES LTD - Form 20-F

We have entered into technology licensing fee agreements with third parties. We expect that in the ordinary course of business we may be required to enter into additional licensing agreements. Under one agreement, we agreed to pay a third party royalty fees until 2008, based on 0.3% - 0.9% of our revenues.

Legal Proceedings

We are not a party to any material legal proceedings, except for the proceedings referred to below related to our Nuera subsidiary.

Prior to the acquisition of Nuera by us, one of Nuera's customers had been named as a defendant in a patent infringement suit involving technology the customer purchased from Nuera. In the suit, the plaintiff alleged that the customer used devices to offer services that infringe upon a patent the plaintiff owns. The customer has sought indemnification from Nuera pursuant to the terms of a purchase agreement between Nuera and the customer relating to the allegedly infringing technology at issue. We believe that Nuera has provided a sufficient allowance with respect to this claim.

Prior to the acquisition of Nuera by us, eight former employees of a French subsidiary of Nuera filed a labor grievance against the subsidiary claiming they were unfairly terminated. The French subsidiary filed for bankruptcy in 2004 and, in 2005, the court appointed liquidator sought to hold Nuera liable for the obligations of its French subsidiary. In June 2006, the court ruled in favor of Nuera that it was not liable for the obligations of its French subsidiary. In March 2007, the liquidator decided to appeal the judgment. We believe that Nuera has provided a sufficient allowance with respect to this claim.

C. ORGANIZATIONAL STRUCTURE

List of Significant Subsidiaries

AudioCodes Inc., our wholly-owned subsidiary, is a Delaware corporation.

AudioCodes National Inc., a wholly-owned subsidiary of AudioCodes Inc., is a Delaware corporation.

AudioCodes USA Inc., formerly known as Ai-Logix, a wholly owned subsidiary of AudioCodes Inc., is a Delaware corporation.

AudioCodes San Diego Inc., formerly known as Nuera Communications, Inc. a wholly owned subsidiary of AudioCodes Inc., is a Delaware corporation.

AudioCodes Texas Inc., formerly known as Netrake Corporation, a wholly owned subsidiary of AudioCodes Inc., is a Delaware corporation.

AudioCodes Europe Limited, our wholly-owned subsidiary, is incorporated in England.

CTI Squared Ltd., our wholly-owned subsidiary, is organized under the laws of Israel.

D. PROPERTY, PLANTS AND EQUIPMENT

We lease our main facilities, located in Airport City, Lod, Israel, which currently occupy approximately 128,000 square feet for annual lease payments (including management fees) of approximately \$2.0 million. We have entered into an agreement to increase the size of the property we lease by approximately an additional 74,000 square feet for annual lease payments (including management fees) of approximately \$2.1 million. In addition, we have entered into an agreement regarding the neighboring property by which a building of approximately 145,000 square feet will be erected and leased to us for period of eleven years. This new building is expected to be completed in 2010. We estimate the annual lease payments (including management fees) to be in the range of \$2.0 million and \$3.2 million depending the amount expended by the lessor on the fittings.

Our U.S. subsidiary, AudioCodes Inc., leases a 7,000 square foot facility in San Jose, California. Our subsidiary has additional offices total of 20,000 square foot in Raleigh, Chicago, Boston and Dallas. Our U.S. subsidiary, AudioCodes USA, Inc., leases a 29,000 square foot facility in Somerset, New Jersey. Our U.S. subsidiary, AudioCodes San Diego, Inc., leases a 20,000 square foot facility in San Diego, California. Our U.S. subsidiary, AudioCodes Texas, Inc., leases a 20,000 square foot facility in Plano, Texas. The annual lease payments (including management fees) for all our offices in the United States is approximately \$1.5 million.

We believe that these properties are adequate to meet our current needs. We may need to increase the size of our current facilities, seek new facilities, close certain facilities or sublease portions of our existing facilities in order to address our needs in the future.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS.

Statements in this Annual Report concerning our business outlook or future economic performance; anticipated revenues, expenses or other financial items; product introductions and plans and objectives related thereto; and statements concerning assumptions made or expectations as to any future events, conditions, performance or other matters, are forward-looking statements as that term is defined under the United States Federal securities laws. Forward-looking statements are subject to various risks, uncertainties and other factors that could cause actual results to differ materially from those stated in such statements. Factors that could cause or contribute to such differences include, but are not limited to, those set forth under Risk Factors in this Annual Report, as well as those discussed elsewhere in this Annual Report and in our other filings with the Securities and Exchange Commission.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles, or US GAAP. These accounting principles require management to make certain estimates, judgments and assumptions based upon information available at the time that they are made, historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenues and expenses during the periods presented.

On an on-going basis, management evaluates its estimates and judgments, including those related to revenue recognition and allowance for sales returns, allowance for doubtful accounts, inventories, investment in an affiliated companies, goodwill and income taxes and valuation allowance. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Our management has reviewed these critical accounting policies and related disclosures with our Audit Committee. See Note 2 to the Consolidated Financial Statements, which contain additional information regarding our accounting policies and other disclosures required by US GAAP.

Management believes the significant accounting policies that affect its more significant judgments and estimates used in the preparation of its consolidated financial statements and are the most critical to aid in fully understanding and evaluating AudioCodes' reported financial results include the following:

Revenue recognition and allowance for sales returns;

Allowance for doubtful accounts;

Inventories;

Investment in affiliated companies;

Goodwill and intangible assets;

Income taxes and valuation allowance; and

Stock-based compensation.

Revenue Recognition and Allowance for Sales Returns

We generate our revenues primarily from the sale of products. We sell our products through a direct sales force and sales representatives. Our customers include original equipment manufacturers (OEMs), network equipment providers, systems integrators and distributors in the telecommunications and networking industries, all of whom are considered end users.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Revenues from products are recognized in accordance with Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition in Financial Statements when the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) delivery of the product has occurred, (iii) the fee is fixed or determinable and (iv) collectability is probable. We have no obligation to customers after the date on which products are delivered, other than pursuant to warranty obligations and any applicable right of return. We generally grant our customers the right of return or the ability to exchange a specific percentage of the total price paid for products they have purchased over a period of three months for other products.

We maintain a provision for product returns and exchanges. This provision is based on historical sales returns, analysis of credit memo data and other known factors. This provision amounted to \$619,000 in 2004, \$545,000 in 2005 and \$636,000 in 2006.

Revenues from the sale of products which were not yet determined to be final sales due to market acceptance or technological compatibility were deferred and included in deferred revenues.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts. Management exercises its judgment as to our ability to collect outstanding receivables. Provisions are made based upon a specific review of all significant outstanding invoices. For those invoices not specifically reviewed, provisions are made based upon the age of the receivable. In determining the provision, we analyze our historical collection experience and current economic trends. If the historical data used to calculate the allowance provided for doubtful accounts does not reflect the future ability to collect outstanding receivables, additional provisions for doubtful accounts may be needed and the future results of operations could be materially affected.

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined using the moving average cost method for raw materials and on the basis of direct manufacturing costs for finished products. We periodically evaluate the quantities on hand relative to current and historical selling prices and historical and projected sales volume and technological obsolescence. Based on these evaluations, inventory write-offs and write-down provisions are provided to cover risks arising from slow moving items, technological obsolescence, excess inventories, discontinued products and for market prices lower than cost. We wrote-off and wrote-down inventory in a total amount of \$1.2 million in 2004, \$1.2 million in 2005 and \$1.0 million in 2006.

Investment in Affiliated Companies

Through December 31, 2006, we had invested an aggregate of \$3.3 million in Natural Speech Communication Ltd., a privately-held company engaged in speech recognition. In addition, during 2005 and 2006, we made convertible loans in the aggregate amount of \$902,000 to this company. Assuming a full conversion of all interests (and those of the other shareholders and ourselves) to ordinary shares, we currently own approximately 40.9% of the equity in this company. This investment is accounted for by the equity method and is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable. As of December 31, 2006, based on management's most recent analyses, no impairment losses have been identified in connection with this investment.

Edgar Filing: AUDIOCODES LTD - Form 20-F

In July, 2005, we invested \$707,000 in MailVision Ltd., a privately-held company. As of December 31, 2006, we owned 19.5% of its ordinary shares. This investment is accounted for by the equity method and is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable. In November 2006, we made a convertible loan in the amount of \$ 44,000 to this company. The loan bears interest at the rate of 9% per annum and is convertible into shares of this company. As of December 31, 2006, based on management's most recent analyses, no impairment losses have been identified in connection with this investment.

In February, 2006, we entered into a share purchase agreement with CTI Squared Ltd. to acquire 10% of its ordinary shares for a total purchase price in the amount of \$1,000,000. In October 2006, we received a call option to invest an additional \$10,000,000 for the remaining 90% of this company's share capital. As of December 31, 2006, based on management's most recent analyses, no impairment losses have been identified in connection with this investment. In April 2007, we exercised the option to acquire the remaining shares of CTI Squared for a purchase price of \$10 million, with \$5 million paid in cash at the closing and \$5 million payable in cash by February 28, 2008.

In December 2006, we made a convertible loan in the amount of \$1,000,000 to another privately-held company. This loan bears interest at the rate of LIBOR+2% per annum and is due and payable in December 2007 unless converted into shares of this company. As of December 31, 2006, based on management's most recent analyses, no impairment losses have been identified in connection with this investment.

Goodwill and Intangible Assets

SFAS No.142 requires goodwill to be tested for impairment at least annually or between annual tests in certain circumstances, and written down when impaired. Goodwill is tested for impairment at the reporting unit level by comparing the fair value of the reporting unit with its carrying value. The process of evaluating the potential impairment of goodwill is subjective and requires significant judgment during the analysis. We operate in one operating segment, and this segment comprises our only reporting unit. Fair value is generally determined using discounted cash flows, market multiples and market capitalization. Significant estimates used in the fair value methodologies include estimates of future cash flows, future short-term and long-term growth rates, weighted average cost of capital and estimates of market multiples of the reportable unit. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for our goodwill and intangible assets with an indefinite life.

The process of evaluating the potential impairment of goodwill is subjective and requires significant judgment at many points during the analysis. In estimating the fair value of a reporting unit for the purposes of our annual or periodic analyses, we make estimates and judgments about the future cash flows of that reporting unit. Although our cash flow forecasts are based on assumptions that are consistent with our plans and estimates we are using to manage the underlying businesses, there is significant exercise of judgment involved in determining the cash flows attributable to a reporting unit over its estimated remaining useful life. In addition, we make certain judgments about allocating shared assets to the estimated balance sheets of our reporting units. We also consider our and our competitor's market capitalization on the date we perform the analysis. Changes in judgment on these assumptions and estimates could result in a goodwill impairment charge.

Edgar Filing: AUDIOCODES LTD - Form 20-F

We allocated the purchase price of the companies we acquired to the tangible and intangible assets acquired and liabilities assumed, based on their estimated fair values. These valuations require management to make significant estimations and assumptions, especially with respect to intangible assets. Critical estimates in valuing intangible assets include future expected cash flows from the business acquired, technology, trade names and customer relations. In addition, other factors considered are the brand awareness and market position of the products sold by the acquired companies and assumptions about the period of time the technology will continue to be used in the combined company's product portfolio. Management's estimates of fair value are based on assumptions believed to be reasonable, but which are inherently uncertain and unpredictable.

If we did not appropriately allocate these components or we incorrectly estimate the useful lives of these components, our computation of depreciation and amortization expense may not appropriately reflect the actual impact of these costs over future periods, which will affect our net income.

As of December 31, 2006, the amortized cost of intangible assets in our balance sheet was \$21.2 million. In accordance with SFAS No. 144, the value of those assets as of December 31, 2006, has been reviewed and it was determined that no indicators for impairment existed.

In connection with our acquisition of selected assets of UAS, we recorded \$4.3 million of goodwill in 2003 and \$1.0 million of goodwill in 2004. We recorded \$3.8 million of goodwill in 2004 in connection with our acquisition of AudioCodes USA, formerly Ai-Logix. We paid an additional \$10 million in March 2005 based on the achievement of revenue milestones and additional terms by AudioCodes USA during 2004 and 2005. This contingent payment was recorded as part of the acquisition cost as additional goodwill during 2005. Goodwill in connection with the acquisition of AudioCodes USA was reduced in the amount of \$456,000 upon utilization of pre-acquisition carry forward tax losses in accordance with SFAS No. 141. In 2006, we recorded \$80 million of goodwill in connection with our acquisition of AudioCodes San Diego, formerly Nuera, and \$10.4 million of goodwill in connection with our acquisition of AudioCodes Texas, formerly Netrake.

Goodwill in connection with the UAS, AudioCodes USA (formerly Ai-Logix), AudioCodes San Diego (formerly Nuera) and AudioCodes Texas (formerly Netrake) acquisitions was reviewed for impairment during the fourth quarter of 2006. No impairment losses have been identified in connection with these acquisitions.

Income Taxes and Valuation Allowance

As part of the process of preparing our consolidated financial statements, we are required to estimate our income tax expense in each of the jurisdictions in which we operate. This process involves us estimating our actual current tax exposure, which is accrued as taxes payable, together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets, which are included within our consolidated balance sheet. We may record a valuation allowance to reduce our deferred tax assets to the amount of future tax benefit that is more likely than not to be realized.

Although we believe that our estimates are reasonable, there is no assurance that the final tax outcome and the valuation allowance will not be different than those which are reflected in our historical income tax provisions and accruals.

We have filed or are in the process of filing federal, state and foreign tax returns that are subject to audit by the respective tax authorities. Although the ultimate outcome is unknown, we believe that adequate amounts have been provided for and any adjustments that may result from tax return audits are not likely to materially adversely affect our consolidated results of operations, financial condition or cash flows.

Stock-based Compensation

Effective January 1, 2006, we began accounting for stock-based compensation in accordance with Statement of Financial Accounting Standards No. 123R- Share-Based Payments . We utilize the Black-Scholes option pricing model to estimate the fair value of stock-based compensation at the date of grant. The Black-Scholes model requires subjective assumptions regarding dividend yields, expected volatility, expected life of options and risk-free interest rates. These assumptions reflect management's best estimates. Changes in these inputs and assumptions can materially affect the estimate of fair value and the amount of our stock-based compensation expenses. We recognized \$8.7 million of stock-based compensation expense in 2006. As of December 31, 2006, there was approximately \$12.4 million of total unrecognized stock-based compensation expense related to non-vested stock-based compensation arrangements granted by us. That expense is expected to be recognized over a weighted-average period of 1.6 years.

A. *OPERATING RESULTS*

You should read this discussion with the consolidated financial statements and other financial information included in this Annual Report.

Overview

We design, develop and market enabling technologies and system products for the transmission of voice, data, fax and multimedia communications over packet networks, which we refer to as the new voice infrastructure. Our products enable our customers to build high-quality packet networking equipment and network solutions and provide the building blocks to connect traditional telephone networks to the new voice infrastructure, as well as connecting and securing multimedia communication between different packet-based networks. Our products are sold primarily to leading original equipment manufacturers, or OEMs, system integrators and network equipment providers in the telecommunications and networking industries. We have continued to broaden our offerings, both from internal development and through acquisitions, as we have expanded in the last few years from selling chips to boards, subsystems, media gateway systems, media servers, session border controllers and messaging platforms.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Our headquarters and R&D facilities are located in Israel with R&D extensions in the U.S. and in the U.K. We have other offices located in Europe, the Far East, and Latin America.

Effective January 1, 2006, we account for stock-based compensation in accordance with Statement of Financial Accounting Standards Standards No. 123R- Share-Based Payments . SFAS No. 123(R) requires the fair value of all equity-based awards granted to employees to be recognized in financial statements beginning in the first quarter of 2006. The result is that we are required to record an expense with respect to stock option grants, even if the exercise price of the stock options is equal to the market price of the underlying shares on the date of grant. The adoption of SFAS No. 123(R) had a material adverse affect on our results of operations in 2006 as we recognized \$8.7 million of stock-based compensation expense in 2006.

Nortel Networks accounted for 18.6% of our total revenues in 2004, 16.3% of our revenues in 2005 and 15.2% of our revenues in 2006. Our top five customers accounted for 35.7% of our revenues in 2004, 31.1% of our revenues in 2005 and 29.1% of our revenues in 2006. Based on our experience, we expect that our largest customers may change from period to period. If we lose a large customer and fail to add new customers to replace lost revenue our operating results may be materially adversely affected.

Revenues based on the location of our customers for the last three fiscal years are as follows:

	<u>2004</u>	<u>2005</u>	<u>2006</u>
Americas	62.3%	57.5%	56.6%
Far East	14.3	12.5	12.8
Europe	13.3	19.4	22.2
Israel	10.1	10.6	8.4
Total	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

The increase in the percentage of our revenues in 2006 from customers located in Europe was due to demand in Europe increasing at a higher pace compared to the other locations.

Part of our strategy involves the acquisition of complementary businesses and technologies. Our first strategic acquisition involved the purchase of the UAS product group from Nortel Networks in April 2003. This acquisition added new media server technology and products that we could offer to our customers and provided us with research and development capability in the United States. As a result of our supply agreement with Nortel in connection with this transaction, we significantly increased our sales to Nortel. Our sales to Nortel accounting for 15.2% of our revenues in 2006 compared to 16.3% of our revenues in 2005 and 18.6% of our revenues in 2004. We expect that sales to Nortel will continue to account for a high percentage of our revenues in 2007.

Edgar Filing: AUDIOCODES LTD - Form 20-F

We completed a second acquisition in May 2004, acquiring AudioCodes USA formerly Ai-Logix, a leading provider of advanced voice recording hardware technology. We believe that this acquisition has enhanced our board line business and provides an entry into the call recording market and the computer telephony integration, or CTI, market by leveraging our VoP expertise with the technology, strategic partnerships and customer base of AudioCodes USA. We paid \$10.0 million in cash at the closing of the transaction. We paid an additional \$10.0 million in March 2005 based on the achievement of revenue milestones and additional terms by the AudioCodes USA during 2004 and 2005. The payment was recorded as part of the acquisition cost as additional goodwill in accordance with the provisions of SFAS No. 141 in 2005.

In July, 2006, we completed the acquisition of Nuera (renamed AudioCodes San Diego Inc. in 2007). Nuera was acquired for a purchase price of \$82.5 million in cash, including acquisition costs, plus an earn out arrangement under which we have agreed to pay up to an additional \$5 million if Nuera achieves certain revenue milestones during the first twelve months after consummation of the transaction. Nuera provides Voice over Internet Protocol infrastructure solutions for broadband and long distance networks. This transaction is significantly larger than our other acquisitions and investments to date. Nuera became a wholly-owned subsidiary of AudioCodes Inc. and, accordingly, its results of operations have been included in our consolidated financial statements since the acquisition date. This acquisition was accounted for under the purchase method of accounting in accordance with SFAS No. 141. We cannot be sure that we will be successful in integrating Nuera's products, employees and operations into our organization or that we will be able to operate Nuera's business in a profitable manner.

In August 2006, we acquired Netrake (renamed AudioCodes Texas Inc. in 2007), a provider of session border controller, or SBC, and security gateway solutions. SBCs enable connectivity, policies and security for real-time media sessions, such as VoIP, video or fax, between public or private IP networks. Security gateways enable secure real-time sessions across wifi, broadband and wireless networks in field mobile convergence deployments. We paid \$13.8 million in cash, including acquisition costs, to acquire Netrake. Netrake became a wholly-owned subsidiary of AudioCodes Inc. and, accordingly, its results of operations have been included in our consolidated financial statements since the acquisition date. This acquisition was accounted for under the purchase method of accounting in accordance with SFAS No. 141.

In April 2007, we completed the acquisition of CTI Squared. We exercised an option to acquire the remaining shares of CTI Squared for a purchase price of \$10 million, with \$5 million paid in cash at the closing and \$5 million payable in cash by February 28, 2008. CTI Squared is a provider of enhanced messaging and communications platforms deployed globally by service providers and enterprises. CTI Squared's platforms integrate data and voice messaging services over internet, intranet, PSTN, cellular, cable and enterprise networks.

We experienced lower than expected revenues in the first quarter of 2007 and reported a loss in that period. We may continue to report losses in 2007. Our first quarter results were impacted by weakness in our sales in Israel and the Asia Pacific region and weaker than expected performance by our recent acquisitions and sales of our boards business line. We have begun to implement corrective measures to strengthen our sales in the Asia Pacific region and to increase sales in the session border controller business line that exhibited weaker than expected performance. However, based on market trends in the boards business line, we do not anticipate recovery of revenues of the boards business line in 2007 to the level experienced in 2006. In addition, we have taken steps to bring our expenses in line with the anticipated revenues for 2007. Our goal is to increase sales and reduce expenses to allow us to return to profitability.

We believe that prospective customers generally are required to make a significant commitment of resources to test and evaluate our products and to integrate them into their larger systems. As a result, our sales process is often subject to delays associated with lengthy approval processes that typically accompany the design and testing of new communications equipment. For these reasons, the sales cycles of our products to new customers are often lengthy, averaging approximately six to twelve months. As a result, we may incur significant selling and product development expenses prior to generating revenues from sales.

The currency of the primary economic environment in which our operations are conducted is the U.S. dollar, and as such, we use the dollar as our functional currency. Transactions and balances originally denominated in dollars are presented at their original amounts. All transaction gains and losses from the remeasurement of monetary balance sheet items denominated in non-dollar currencies are reflected in the statement of operations as financial income or expenses, as appropriate.

The increase in demand for Voice over IP, or VoIP, technology has impacted our business during the last three years. In recent years, the shift from traditional circuit-switched networks to next generation packet-switched networks continued to gain momentum. As data traffic becomes the dominant factor in communications, service providers are building and maintaining converged networks for integrated voice and data services. In developed countries, traditional and alternative service providers adopt bundled triple play (voice, video and data) and quadruple play (voice, video, data and mobile) offerings. This trend, enabled by voice and multimedia over IP, has fueled competition among cable, wireline, ISP and mobile operators, increasing the pressure for adopting and deploying VoIP networks. In addition, underdeveloped markets without basic wire line service in countries such as China and India and certain countries in Eastern Europe are adopting the use of VoIP technology to deliver voice and data services that were previously unavailable.

Results of Operations

The following table sets forth the percentage relationships of certain items from our consolidated statements of operations, as a percentage of total revenues for the periods indicated:

	Year Ended December 31,		
	2004	2005	2006
Statement of Operations Data:			
Revenues	100.0%	100.0%	100.0%
Cost of revenues	41.5	40.6	41.6
Gross profit	58.5	59.4	58.4
Operating expenses:			
Research and development, net	24.2	21.1	24.0
Selling and marketing	24.0	22.4	25.6
General and administrative	5.9	5.2	5.9
Total operating expenses	54.1	48.7	55.5
Operating income	4.4	10.7	2.9
Financial income, net	2.6	2.1	2.6
Equity in losses of affiliated companies, net	0.6	0.6	0.6
Income before taxes on income	6.4	12.2	4.9
Taxes on income	0.3	0.7	0.2
Net income	6.1%	11.5%	4.7%

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Revenues. Revenues increased 27.2% to \$147.4 million in 2006 from \$115.8 million in 2005. The increase in revenues was primarily due to an increase of \$16.7 million in sales in the United States and an increase of \$10.7 million in sales in Europe. Our results of operation include Nuera beginning in July 2006 and Netrake beginning in August 2006. Our increase in revenues in 2006 also reflected the increased interest and activity in the market for packet-based VoIP products.

Gross Profit. Cost of revenues includes the manufacturing cost of hardware, quality assurance, overhead related to manufacturing activity and technology licensing fees payable to third parties. Gross profit increased to \$86.1 million in 2006 from \$68.8 million in 2005. Gross profit as a percentage of revenues decreased to 58.4% in 2006 from 59.4% in 2005. The decrease in our gross profit percentage was primarily attributable to amortization expenses in 2006 related to the acquisitions of Nuera and Netrake during the third quarter of 2006. Amortization expense allocated to cost of revenues amounted to \$1.2 million in 2006. The decrease in our gross margin was also due to expenses related to equity-based compensation resulting from the adoption of SFAS 123(R). Equity-based compensation expenses allocated to cost of revenues amounted to \$620,000 in 2006. The decrease in gross profit percentage was partially offset by the higher sales volume that allowed us to leverage our manufacturing overhead over a larger sales base. The decrease in gross profit percentage was also offset by a reduction in manufacturing costs which was primarily due to a reduction in our raw material costs.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Research and Development Expenses. Research and development expenses consist primarily of compensation and related costs of employees engaged in ongoing research and development activities, development-related raw materials and the cost of subcontractors. Research and development expenses increased 45.1% to \$35.4 million in 2006, from \$24.4 million in 2005 and increased as a percentage of revenues to 24.0% in 2006 from 21.1% in 2005. The increase in net research and development expenses, both on an absolute and a percentage basis, was primarily due to expenses related to equity-based compensation resulting from the adoption of SFAS 123(R). Equity-based compensation expenses allocated to research and development expenses amounted to \$3.1 million in 2006. The increase in research and development expenses was also due to additions to our research and development personnel resulting from the acquisitions of Nuera and Netrake during the third quarter of 2006. We expect that research and development expenses will continue to increase in absolute dollar terms in 2007 as a result of our continued development of new products, as well as the inclusion of Nuera and Netrake for a full year and the inclusion of CTI Squared beginning in April 2007.

Selling and Marketing Expenses. Selling and marketing expenses consist primarily of compensation for selling and marketing personnel, as well as exhibition, travel and related expenses. Selling and marketing expenses increased 45.2% in 2006 to \$37.7 million from \$25.9 million in 2005. As a percentage of revenues, selling and marketing expenses increased to 25.6% in 2006 from 22.4% in 2005. The increase in selling and marketing expenses, on an absolute and a percentage basis, was primarily due to expenses related to equity-based compensation resulting from the adoption of SFAS 123(R). Equity-based compensation expenses allocated to selling and marketing expenses amounted to \$3.6 million in 2006. The increase in selling and marketing expenses was also due to an increase in selling and marketing personnel and amortization expenses as a result of the acquisitions of Nuera and Netrake. Amortization expense allocated to sales and marketing amounted to \$ 522 thousands in 2006. We expect that selling and marketing expenses will continue to increase in absolute dollar terms as a result of an expected increase in our sales force and marketing activities, as well as the inclusion of Nuera and Netrake for a full year and the inclusion of CTI Squared beginning in April 2007.

General and Administrative Expenses. General and administrative expenses consist primarily of compensation for finance, human resources, general management, rent, network and bad debt reserve, as well as insurance and professional services expenses. General and administrative expenses increased 46.0% to \$8.8 million in 2006 from \$6.0 million in 2005. As a percentage of revenues, general and administrative expenses increased to 5.9% in 2006 from 5.2% in 2005. The increase in general and administrative expenses, both on an absolute and a percentage basis, in 2006 was primarily the result of expenses related to equity-based compensation resulting from the adoption of SFAS 123(R). Equity-based compensation expenses allocated to general and administrative expenses amounted to \$1.4 million in 2006. The increase in general and administrative expenses was also due to consolidating the expenses of our Nuera and Netrake subsidiaries, which were acquired in July 2006 and August 2006. We expect that general and administrative expenses will increase in absolute dollar terms to support our expected growth, as well as the inclusion of Nuera and Netrake for a full year and the inclusion of CTI Squared beginning in April 2007.

Equity in Losses of Affiliated Companies, Net. Equity in losses of affiliated companies, net were \$916,000 in 2006 compared to \$693,000 in 2005. We believe that the products being developed by affiliated companies may enable us to enter new markets and to offer new products.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Financial Income, Net. Financial income consists primarily of interest derived on cash and cash equivalents, short-term and long-term marketable securities, short-term and long-term bank deposits and structured notes, net of interest accrued in connection with our senior convertible notes and bank charges. Financial income, net, in 2006 was \$3.8 million compared to \$2.5 million in 2005. The increase in financial income, net in 2006 was primarily due to higher interest rates and interest income, net, on the remaining net proceeds from our sale of senior convertible notes in November 2004.

Taxes on Income Our effective tax rate was 4.0% in 2006 and 5.6% in 2005. These relatively low tax rates were mainly the result of the utilization of net operating losses and the Approved Enterprise status granted to our production facilities in Israel.

Year Ended December 31, 2005 Compared to Year Ended December 31, 2004

Revenues. Revenues increased 40.0% to \$115.8 million in 2005 from \$82.8 million in 2004. The increase in revenues was primarily due to an increase of \$15.0 million in sales in the United States derived mainly from the inclusion of the results of AudioCodes USA for all of 2005. In 2004, the results of AudioCodes USA were included only beginning with its acquisition in May 2004. Sales in Europe increased by \$11.5 million primarily as a result of higher demand in Eastern Europe for our products. Our increase in revenues in 2005 also reflected the increased interest and activity in the market for packet-based VoIP products.

Gross Profit. Cost of revenues includes the manufacturing cost of hardware, quality assurance, overhead related to manufacturing activity and technology licensing fees payable to third parties. Gross profit increased to \$68.8 million in 2005 from \$48.4 million in 2004. Gross profit as a percentage of revenues increased to 59.4% in 2005 from 58.5% in 2004. The increase in our gross profit percentage was primarily a result of higher sales volume that allowed us to leverage our operations as our manufacturing overhead was spread over a larger sales base. In addition, the improvement in gross margin was due to favorable product mix in 2005. The increase in gross profit percentage was also due to our ability to offset the continued decline in average selling prices of our products with a reduction in manufacturing costs. The reduction in manufacturing costs was primarily due to a reduction in our raw material costs.

Research and Development Expenses. Research and development expenses consist primarily of compensation and related costs of employees engaged in ongoing research and development activities, development-related raw materials and the cost of subcontractors. Research and development expenses increased 22.0% to \$24.4 million in 2005, from \$20.0 million in 2004 and decreased as a percentage of revenues to 21.1% in 2005 from 24.2% in 2004. The increase in net research and development expenses was primarily due to additions to our research and development personnel resulting from the acquisition of AudioCodes USA during the second quarter of 2004.

Selling and Marketing Expenses. Selling and marketing expenses consist primarily of compensation for selling and marketing personnel, as well as exhibition, travel and related expenses. Selling and marketing expenses increased 30.4% in 2005 to \$25.9 million from \$19.9 million in 2004. As a percentage of revenues, selling and marketing expenses decreased to 22.4% in 2005 from 24.0% in 2004. The increase in selling and marketing expenses was primarily due to an increase in selling and marketing personnel and associated expenses, as well as additional personnel as a result of the acquisition of AudioCodes USA.

Edgar Filing: AUDIOCODES LTD - Form 20-F

General and Administrative Expenses. General and administrative expenses consist primarily of compensation for finance, human resources, general management, rent, network and bad debt reserve, as well as insurance and professional services expenses. General and administrative expenses increased 23.8% to \$6.0 million in 2005 from \$4.9 million in 2004. As a percentage of revenues, general and administrative expenses decreased to 5.2% in 2005 from 5.9% in 2004. The increase in general and administrative expenses in 2005 was primarily the result of consolidating the expenses of our AudioCodes USA subsidiary, which was acquired in May 2004.

Equity in Losses of Affiliated Companies, Net. Equity in losses of affiliated companies, net were \$693,000 in 2005 compared to \$516,000 in 2004.

Financial Income, Net. Financial income consists primarily of interest derived on cash and cash equivalents, short-term and long-term marketable securities, short-term and long-term bank deposits and structured notes, net of interest accrued in connection with our senior convertible notes and bank charges. Financial income, net, in 2005 was \$2.5 million compared with financial income of \$2.2 million in 2004. The increase in financial income during 2005 was primarily due to higher interest rates and interest income, net, on the \$120.2 million of net proceeds from our sale of senior convertible notes in November 2004.

Taxes on Income Our effective tax rate was 5.2% in 2004 and 5.6% in 2005. These relatively low tax rates were mainly achieved as a result of the Approved Enterprise status granted to our production facilities in Israel.

Impact of Inflation, Devaluation and Fluctuation of Currencies on Results of Operations, Liabilities and Assets

Since the majority of our revenues are paid in or linked to the dollar, we believe that inflation and fluctuations in the NIS/dollar exchange rate have no material effect on our revenues. However, a portion of the cost of our Israeli operations, mainly personnel and facility-related, is incurred in NIS. Inflation in Israel and dollar exchange rate fluctuations, however, have some influence on our expenses and, as a result, on our net income. Our NIS costs, as expressed in dollars, are influenced by the extent to which any increase in the rate of inflation in Israel is not offset (or is offset on a lagging basis) by a devaluation of the NIS in relation to the dollar.

To protect against the changes in value of forecasted foreign currency cash flows resulting from payments in NIS, we maintain a foreign currency cash flow hedging program. We hedge portions of our forecasted expenses denominated in foreign currencies with forward contracts. These measures may not adequately protect us from material adverse effects due to the impact of inflation in Israel.

Edgar Filing: AUDIOCODES LTD - Form 20-F

The following table presents information about the rate of inflation in Israel, the rate of devaluation of the NIS against the dollar, and the rate of inflation in Israel adjusted for the devaluation:

Year ended December 31,	Israeli inflation rate %	NIS Devaluation Rate %	Israeli inflation adjusted for devaluation %
2004	1.2	(1.6)	2.8
2005	2.4	6.8	(4.4)
2006	(0.1)	(8.2)	8.1

Recent Accounting Pronouncements

In July 2006, the FASB issued FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 utilizes a two-step approach for evaluating tax positions. Recognition (step one) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) is only addressed if step one has been satisfied (i.e., the position is more-likely-than-not to be sustained). Under step two, the tax benefit is measured as the largest amount of benefit, determined on a cumulative probability basis that is more- likely-than-not to be realized upon ultimate settlement.

FIN 48 applies to all tax positions related to income taxes subject to the Financial Accounting Standard Board Statement No. 109, Accounting for income taxes (FAS 109). This includes tax positions considered to be routine as well as those with a high degree of uncertainty. FIN 48 has expanded disclosure requirements, which include a tabular roll forward of the beginning and ending aggregate unrecognized tax benefits as well as specific detail related to tax uncertainties for which it is reasonably possible the amount of unrecognized tax benefit will significantly increase or decrease within twelve months. These disclosures are required at each annual reporting period unless a significant change occurs in an interim period. FIN 48 is effective for fiscal years beginning after December 15, 2006. The cumulative effect of applying FIN 48 will be reported as an adjustment to the opening balance of retained earnings. We are currently evaluating the effect of the adoption of FIN 48 on our financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS No. 157). This statement provides a single definition of fair value, a framework for measuring fair value, and expanded disclosures concerning fair value. Previously, different definitions of fair value were contained in various accounting pronouncements creating inconsistencies in measurement and disclosures. SFAS No. 157 applies under those previously issued pronouncements that prescribe fair value as the relevant measure of value, except SFAS No. 123(R) and related interpretations. The statements does not apply to accounting standard that require or permit measurement similar to fair value but are not intended to measure fair value. This pronouncement is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the impact of adopting SFAS 157.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS No. 159). SFAS No. 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, although earlier adoption is permitted. We are currently evaluating the impact that SFAS No. 159 will have on its consolidated financial statements.

B. LIQUIDITY AND CAPITAL RESOURCES

We have financed our operations for the last three years, from our sale of convertible notes, as well as with cash from operations in those three years. In November 2004, we raised net proceeds of approximately \$120.2 million in a private placement of \$125.0 million aggregate principal amount of our 2.00% Senior Convertible Notes due 2024.

As of December 31, 2006, we had \$133.6 million in cash and cash equivalents, short-term and long-term marketable securities, short-term and long-term bank deposits and structured notes, a decrease of approximately \$86.7 million from \$220.3 million at December 31, 2005. During 2006, we used \$82.5 million of cash in connection with our acquisition of Nuera and \$13.8 million of our cash in connection with our acquisition of Netrake. We may be required to use an additional \$5.0 million of cash in 2007 in connection with the earnout related to our acquisition of Nuera. We also used \$1.0 million of cash in 2006 and \$5.0 million of cash in February 2007 in connection with our acquisition of CTI and expect to use another \$5.0 million of cash in February 2008 in connection with this acquisition.

Our operating activities provided cash in the amount of \$6.6 million in 2006, primarily due to our net income which was partially offset by an increase of \$9.8 million in trade receivables and a decrease of \$4.7 million in trade and other payables. Our receivables increased primarily as a result of higher sales volume as well as longer payment terms granted by us to our customers. Our payables decreased due to repayment of payable balances after the acquisitions of Nuera and Netrake. Our operating activities provided cash in the amount of \$13.3 million in 2005, primarily due to our net income which was partially offset by an increase of \$3.5 million in trade receivables and \$2.0 million in deferred tax assets. Our receivables increased as a result of higher sales volume and our deferred tax assets increased due to the utilization of net operating losses. Our operating activities provided cash in the amount of \$3.5 million in 2004, primarily due to our net income and an increase of \$4.8 million in trade payables and other payables and accrued expenses, which were partially offset by an increase of \$4.9 million in trade receivables, \$3.7 million in inventories and \$1.2 million in other receivables and prepaid expenses. The increase in accounts receivable was primarily a result of higher sales volume which also caused us to increase our purchases and result in higher accounts payable. Similarly, our higher sales and sales forecasts resulted in our maintaining higher inventory levels to support growth while keeping lead-times steady or decreasing.

Edgar Filing: AUDIOCODES LTD - Form 20-F

In 2006, our investing activities used cash in the amount of \$61.6 million, primarily due to our investment in Nuera and Netrake, offset in part by the net proceeds from the maturity of bank deposits. In 2005, our investing activities used cash in the amount of \$113.0 million, primarily due to our investment of a significant portion of the proceeds from our sale of convertible notes in short-term and long-term marketable securities, short-term and long-term bank deposits and structured notes and payments in connection with the acquisition of AudioCodes USA. In 2004, our investing activities used cash in the amount of \$15.9 million, primarily due to the acquisition of AudioCodes USA and UAS and the purchase of property and equipment. Our capital expenditures were \$3.1 million in 2006, \$2.4 million in 2005 and \$4.3 million in 2004. The majority of our capital investment has been for testing equipment, an enterprise resources planning system, computers, peripheral equipment, software, office furniture and leasehold improvements. We used our working capital to finance these expenditures.

In 2006, financing activities provided \$9.2 million due to proceeds from issuance of our shares upon exercise of options and from purchases of our shares under our Employee Stock Purchase Plans. In 2005, financing activities provided \$3.8 million due to proceeds from issuance of our shares upon exercise of options and from purchases of our shares under our Employee Stock Purchase Plans. In 2004, financing activities provided \$130.4 million, due to the net proceeds of \$120.2 million from our private placement of \$125.0 million aggregate principal amount of our 2.00% Senior Convertible Notes due 2024 and \$10.2 million from the issuance of our shares upon exercise of options and from purchases of our shares under our Employee Stock Purchase Plans.

We anticipate that our operating expenses and acquisitions will be a material use of our cash resources for the foreseeable future. We believe that our current working capital is sufficient to meet our present operating cash requirements for at least the next twelve months. Part of our strategy is to pursue acquisition opportunities. If we do not have available sufficient cash to finance our operations and the completion of additional acquisitions, we may be required to obtain additional debt or equity financing. We cannot be certain that we will be able to obtain, if required, additional financing on acceptable terms or at all.

C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

Research and Development

In order to accommodate the rapidly changing needs of our markets, we place considerable emphasis on research and development projects designed to improve our existing products and to develop new ones. We are developing more advanced communications boards, analog and digital media gateways for carrier and enterprise applications, media servers and session border controllers. Our platforms will feature increased trunk capacity, new functionalities, enhanced signaling software and compliance with new control protocols. As of December 31, 2006, 312 of our employees were engaged primarily in research and development on a full-time basis. We also employed 10 employees on a part-time basis.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Our research and development expenses were \$35.4 million in 2006 compared to \$24.4 million in 2005 and \$20.0 million in 2004. From time to time we have received royalty-bearing grants from the Office of the Chief Scientist of the Israeli Ministry of Industry, Trade and Labor, or the OCS. As a recipient of grants from the OCS, we are obligated to perform all manufacturing activities for projects subject to the grants in Israel unless we receive an exemption. Know-how from the research and development which is used to produce products may not be transferred to third parties without the approval of the OCS and may further require material payments. The OCS approval is not required for the export of any products resulting from such research or development. Through December 31, 2006, we had obtained grants from the OCS aggregating \$2.6 million for certain of our research and development projects. We are obligated to pay royalties to the OCS, amounting to 3%-4.5% of the sales of the products and other related revenues generated from such projects, up to 100% of the grants received, linked to the U.S. dollar and bearing interest at the rate of LIBOR at the time of grant. The obligation to pay these royalties is contingent on actual sales of the products and in the absence of such sales no payment is required.

D. TREND INFORMATION

The accelerated demand for VoIP technology has impacted our business during the last few years. Over the past few years, the shift from traditional circuit-switched networks to next generation packet-switched networks continued to gain momentum. As data traffic becomes the dominant factor in communications, service providers are building and maintaining converged networks for integrated voice and data services. In addition, underdeveloped markets without basic wire line service in countries such as China and India and certain countries in Eastern Europe are beginning to use VoP technology to deliver voice and data services that were previously unavailable. In addition, the growth in broadband access and related technologies has driven the emergence of alternative service providers. This in turn stimulates competition with incumbent providers, encouraging them to adopt voice over packet technologies. The entry of new industry players and the demand for new equipment have impacted our business in the last few years.

In 2006, we continued to experience pressure to shorten our lead times in supplying products to customers. Some of our customers are implementing demand pull programs by which they only purchase our product very close to the time, if not simultaneously with the time, they plan to sell their product. We are increasing our sales efforts in new markets, such as Latin America, Eastern Europe and Far East. We have introduced new system level products, and applications in our product lines. We are still experiencing low visibility into customer demand for our products and our ability to predict our level of sales.

E. OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements as this term is defined in Item 5E of Form 20-F.

F. *TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS*

As of December 31, 2006, our contractual obligations were as follows (in thousands):

	TOTAL	PAYMENTS DUE BY PERIOD			MORE THAN 5 YEARS
		LESS THAN 1 YEAR	1-3 YEARS	3-5 YEARS	
Senior convertible notes	\$ 125,000				\$ 125,000
Rental and lease commitments	20,641	3,686	6,871	6,212	3,872
Other commitments	3,734	2,726	1,008	-	-
Total cash obligations	\$ 149,375	\$ 6,412	\$ 7,791	\$ 6,212	\$ 128,872

Our obligation for accrued severance pay under Israel's Severance Pay Law as of December 31, 2006 was \$7.9 million, of which \$7.2 million was funded through deposits into severance pay funds, leaving a net obligation of approximately \$684,000.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEESA. *DIRECTORS AND SENIOR MANAGEMENT*

The following table sets forth certain information with respect to our directors, senior executive officers and key employees at June 15, 2007:

Name	Age	Position
Shabtai Adlersberg	54	Chairman of the Board, President and Chief Executive Officer
Nachum Falek	36	Vice President, and Chief Financial Officer
Hanan Maoz	43	Vice President, Business Operations
Eyal Frishberg	48	Vice President, Operations
Eli Nir	40	Vice President, Research and Development
Lior Aldema	41	Vice President, Marketing and Product Management
Ben Rabinowitz	40	Vice President, Marketing and Sales, North America
Yehuda Hershkovits	40	Vice President, Systems
Tal Dor	38	Vice President, Human Resources
Gary Drutin	46	Vice President, Sales for Europe, Middle East and Latin America
Moshe Tal	53	President and Chief Executive Officer, AudioCodes USA Inc.
David E. Perez	45	Vice President, Sales, Asia Pacific
Joseph Tenne	51	Director
Dr. Eyal Kishon	47	Director
Doron Nevo	51	Director
Karen Sarid	56	Director

Edgar Filing: AUDIOCODES LTD - Form 20-F

Shabtai Adlersberg co-founded AudioCodes in 1993, and has served as our Chairman of the Board and Chief Executive Officer since inception. Mr. Adlersberg co-founded DSP Group, a semiconductor company, in 1987. From 1987 to 1990, Mr. Adlersberg served as the Vice President of Engineering of DSP Group, and from 1990 to 1992, he served as Vice President of Advanced Technology. As Vice President of Engineering, Mr. Adlersberg established a research and development team for digital cellular communication which was spun-off in 1992 as DSP Communications. Mr. Adlersberg also serves as Chairman of the Board of Directors of Natural Speech Communication Ltd. and as a director of MailVision Ltd and CTI Squared Ltd. Mr. Adlersberg holds an M.Sc. in Electronics and Computer Engineering from Tel Aviv University and a B.Sc. in Electrical Engineering from the Technion-Israel Institute of Technology, or the Technion.

Nachum Falek joined AudioCodes in April 2000 and became our Vice President, and Chief Financial Officer in November 2003. From 2000 to 2003, he served as Director of Finance. Prior to joining AudioCodes, Mr. Falek served as Controller at ScanVec-Amiable Ltd. From 1998 to 1999, he was a Manager at Ernst & Young in Israel. Mr. Falek holds a B.A. in Accounting and Economics from Haifa University, an M.B.A. from Tel Aviv University, and is a licensed CPA in Israel.

Hanan Maoz joined AudioCodes in February 2007 as Vice President of Business Operations. Mr. Maoz has over 17 years of experience in enterprise software sales and operations. From August 2003 until joining AudioCodes in 2007, Mr. Maoz was a Managing Director and Co-Founder of PerformanceSoft Israel, a privately held consulting firm providing corporate performance planning and business monitoring. From June 1996 to June 2003, Mr. Maoz worked for Oracle Corp. (Israel) in a variety of executive sales, alliances and business development positions. Mr. Maoz has an MBA in Finance and a MSc. in Information Technologies, both from the Tel-Aviv University, and is expecting his PhD in Industrial Engineering and Management from Ben-Gurion University.

Eyal Frishberg has served as our Vice President, Operations since October 2000. From 1997 to 2000, Mr. Frishberg served as Associate Vice President, SDH Operations in ECI Telecom Ltd., a major telecommunication company. From 1987 to 1997, Mr. Frishberg worked in various operational positions in ECI Telecom including as manager of ECI production facility and production control. Mr. Frishberg worked from 1994 until 1997 for ELTA company, part of Israeli Aircraft Industries in the planning and control department. Mr. Frishberg holds a B.Sc. in Industrial Engineering from Tel Aviv University and an M.B.A. from Ben-Gurion University of the Negev.

Eli Nir has served as our Vice President, Research and Development since April 2001. He has been employed by us since 1996, when he founded and headed our System Software Group in our research and development department. Prior to 1996, Mr. Nir served as an officer in the Technical Unit of the Intelligence Corps of the Israeli Defense Forces (Major), heading both operational units and large development groups mostly related to digital processing. Mr. Nir holds an M.B.A. and an M.Sc. from Tel Aviv University in Digital Speech Processing and a B.Sc. from the Technion.

Lior Aldema has served as our Vice President, Product Management since January 2002. Mr. Aldema has also served as our Vice President Marketing since February 2003. He has been employed by us since 1998, when he was team leader and later headed our System Software Group in our research and development department. Prior to 1998, Mr. Aldema served as an officer in the Technical Unit of the Intelligence Corps of the Israeli Defense Forces (Major), heading both operational units and large development groups related to various technologies and headed one of the largest projects conducted in the IDF and executed by the Israeli Defense industry corporations. Mr. Aldema holds an M.B.A. from Tel Aviv University and a B.Sc. from the Technion.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Ben Rabinowitz joined us in December, 1999 and became our Vice President of Marketing and Sales for North America in October 2004. Previously, Mr. Rabinowitz served as Vice President of our Systems Group. From 1998 to 1999, Mr. Rabinowitz served as Director for Product Marketing at Westell Inc., a broadband access company. From 1997 to 1998, Mr. Rabinowitz served as Senior Director within the strategy practice of Technology Solutions Company, a technology consulting firm. Mr. Rabinowitz also previously served in Ernst & Young's consulting practice from 1994 to 1997, and provided consulting services to telecommunications companies. Mr. Rabinowitz holds an M.B.A. from Georgetown University.

Yehuda HersHKovits has served as our Vice President, Systems Group since 2003. From 2001 to 2003, Mr. HersHKovits served as our Vice President, Advanced Products. From 2000 to 2001, Mr. HersHKovits served as our Director of Advanced Technologies. From 1994 to 1998 and during 1999, Mr. HersHKovits held a variety of research and development positions at Advanced Recognition Technologies, Ltd., a voice and handwriting recognition company, heading its research and development from 1999 to 2000 as Vice President, Research and Development. From 1998 to 1999, Mr. HersHKovits developed various wireless communication algorithms at Comsys, a telecommunications company. Mr. HersHKovits holds an M.Sc. and a B.Sc., from the Technion both in the area of telecommunications.

Tal Dor has served as our Vice President of Human Resources since March 2000. For more than three years prior to March 2000, Ms. Dor acted as a consultant in Israel to, among others, telephone and cable businesses, as well as health and social service organizations. Ms. Dor holds a B.A. in psychology, from Ben-Gurion University of the Negev and an M.A. in psychology from Tel Aviv University.

Gary Drutin has served as our Vice President Sales for Europe, Middle East and Latin America since 2005 and previously held the position of Vice President of Channel Operations and Marketing from 2004 until 2005. From 2001 until 2004, Mr. Drutin was Country Manager and General Manager for Cisco Israel, Cyprus and Malta and from 1997 until 2001 served as regional sales manager for service providers and enterprises for Cisco Israel. From 1990 until 1997, he served in sales management roles at Digital Equipment Corporation Israel. Mr. Drutin holds an M.B.A degree from Tel-Aviv University in Information Systems and Marketing and a B.Sc. degree in Computer Engineering from the Technion.

Moshe Tal joined us in May 2004 in connection with our acquisition of Ai-Logix, now known as AudioCodes USA, Inc. and serves as the President and CEO of our AudioCodes USA subsidiary. Mr. Tal co-founded Ai-Logix in 1991, and has served as its President and CEO since 1998. Mr. Tal has more than twenty-five years of product design and engineering experience, principally associated with analog and digital signal processing technologies. Mr. Tal holds a B.Sc. in Electronic Engineering from Tel Aviv University

Edgar Filing: AUDIOCODES LTD - Form 20-F

David E. Perez joined us in February 2002, and became our Vice President of the Asia Pacific region in January 2006. Mr. Perez served as our Vice President of Sales for Latin America, Iberia and the Mediterranean area from 2003 until January 2006. Between 1998 and 2002, Mr. Perez served as Director of the Consulting Division and member of the management team for Oracle in Israel. From 1988 to 1998 Mr. Perez led the implementation group for New Applicom, a member of the Matrix group. Mr. Perez holds a B.S.c in Industrial Engineering and Information Systems from the Technion.

Joseph Tenne has served as one of our directors since June 2003. Mr. Tenne is currently the Chief Financial Officer of Ormat Technologies, Inc., a company listed on the New York Stock Exchange, which is engaged in the geothermal and recovered energy business. From 2003 to 2004 Mr. Tenne was the Chief Financial Officer of Treofan Germany GmbH & Co. KG, a German company, which is engaged in the development, production and marketing of oriented polypropylene films, which are mainly used in the food packaging industry. From 1997 until 2003, Mr. Tenne was a partner in Kesselman & Kesselman, Certified Public Accountants in Israel and a member of PricewaterhouseCoopers International Limited. Mr. Tenne holds a B.A. in Accounting and Economics and an M.B.A. from Tel Aviv University. Mr. Tenne is also a Certified Public Accountant in Israel.

Dr. Eyal Kishon has served as one of our directors since 1997. Since 1996, Dr. Kishon has been Managing Partner of Genesis Partners, an Israel-based venture capital fund. From 1993 to 1996, Dr. Kishon served as Associate Director of Dovrat-Shrem/Yozma-Polaris Fund Limited Partnership. Prior to that, Dr. Kishon served as Chief Technology Officer at Yozma Venture Capital from 1992 to 1993. Dr. Kishon serves as a director of Allot Communications Ltd and Celtro Inc. From 1991 to 1992, Dr. Kishon was a Research Fellow in the Multimedia Department of IBM Science & Technology. From 1987 to 1989, Dr. Kishon worked in the Robotics Research Department of AT&T Bell Laboratories. Dr. Kishon holds a B.A. in Computer Science from the Technion Israel Institute of Technology and an M.Sc. and a Ph.D. in Computer Science from New York University.

Doron Nevo has served as one of our directors since 2000. Mr. Nevo is President and CEO of KiloLambda Technologies Ltd., an optical subsystems company, which he co-founded in 2001. From 1999 to 2001, Mr. Nevo was involved in fund raising activities for Israeli-based startup companies. From 1996 to 1999, Mr. Nevo served as President and CEO of NKO, Inc. Mr. Nevo established NKO in early 1995 as a startup subsidiary of Clalcom, Ltd. NKO designed and developed a full scale, carrier grade, IP telephony system platform and established its own IP network. From 1992 to 1996, Mr. Nevo was President and CEO of Clalcom Ltd. Mr. Nevo established Clalcom in 1992 as a telecom service provider in Israel. He also serves on the board of a number of companies, including Utility Wireless Corp. (a manufacturer of radio frequency sub-systems), Elcom Technologies (manufacturer of Satcom and digital radio synthesizers), Notox, Ltd. (a biotech company), BioCancell, Inc. and Bank Adanim. Mr. Nevo holds a B.Sc. in Electrical Engineering from the Technion Israel Institute of Technology and an M.Sc. in Telecommunications Management from Brooklyn Polytechnic.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Karen Sarid has served as one of our directors since December 2006. She is the General Manager, Chief Financial Officer and Chief Operations Officer of Galil Medical Israel, a medical device company, that develops, manufactures and markets an innovative cryotherapy platform a position she has held since April 2007. Prior to that, Ms. Sarid was the General Manager of Orex Computed Radiography Ltd., a company owned by Eastman Kodak Co. that focuses on radiography systems for the digital x-ray market, a position she held starting in September 2000. Prior to this, she held the position of Chief Operating Officer and Chief Financial Officer at Orex. From September 1999 until September 2000, she was Chief Financial Officer and a member of the Board of Directors of Forsoft Ltd., a software solutions provider and a subsidiary of the Formula Group. From 1996 until August 1999, Ms. Sarid was Chief Financial Officer and a member of the Board of Directors of ESC Medical Systems Ltd., a medical laser manufacturer which at the time was traded on the Nasdaq Stock Market. She was the Chief Financial Officer of LanOptics Ltd. from 1993 through 1996. Ms. Sarid currently serves as a director of Gilat Satellite Networks Ltd., LanOptics Ltd. and Oridion Systems Ltd. Ms. Sarid received a B.A. in Economics and Accounting from Haifa University.

B. COMPENSATION

The aggregate direct remuneration paid to the 15 persons who served in the capacity of director or senior executive officer during the year ended December 31, 2006 was approximately \$2.2 million, including approximately \$223,000 which was set aside for pension and retirement benefits. This does not include amounts expended by us for automobiles made available to our officers, expenses (including business, travel, professional and business association dues and expenses) reimbursed to officers and other fringe benefits commonly reimbursed or paid by companies in Israel.

Stock options to purchase our ordinary shares granted to persons who served in the capacity of director or executive officer under our 1997 and 1999 Stock Option Plans are generally exercisable at the fair market value at the date of grant, and expire ten years (under the 1997 Plan) and seven years (under the 1999 Plan), respectively, from the date of grant. The options are generally exercisable in four or five equal annual payments, commencing one year from the date of grant.

A summary of our stock option activity and related information for the years ended December 31, 2004, 2005 and 2006 for the 15 persons who served in the capacity of director or senior executive officer during the year ended December 31, 2006 is as follows:

	2004		2005		2006	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price	Number Of Options	Weighted Average Exercise Price
Outstanding at the beginning of the year	1,526,702	\$ 7.48	1,909,435	\$ 9.01	2,006,685	\$ 9.06
Adjustments to opening balance	(39,600)		42,500		(44,000)	
Granted	531,250	\$ 11.77	60,000	\$ 10.17	220,000	\$ 10.33
Cancelled	-		-		(20,000)	
Exercised	(108,917)	\$ 5.16	(5,250)	\$ 3.77	(90,850)	\$ 5.02
Outstanding at the end of the year	1,909,435	\$ 9.11	2,006,685	\$ 9.06	2,071,835	\$ 9.42

Edgar Filing: AUDIOCODES LTD - Form 20-F

As of December 31, 2006, options to purchase 1,451,335 ordinary shares were exercisable by the 15 persons who served as an officer or director during 2006 at an average exercise price of \$8.99 per share.

Under the Israeli Companies Law, the compensation arrangements for officers who are not directors require the approval of the board of directors, unless the articles of association provide otherwise. Arrangements regarding the compensation of directors require the approval of the audit committee, the board and the shareholders, in that order.

C. BOARD PRACTICES

Independent Directors; Audit Committee; Internal Auditor

Under the Israeli Companies Law, Israeli companies that have offered securities to the public in or outside of Israel are required to appoint at least two outside directors. Doron Nevo, Dr. Eyal Kishon and Karen Sarid are our outside directors. Under the requirements for listing on the Nasdaq Global Market, we are required to have a majority of our directors be independent as defined by Nasdaq rules. Doron Nevo, Dr. Eyal Kishon, Karen Sarid and Joseph Tenne are independent directors for purposes of the Nasdaq rules.

To qualify as an outside director under Israeli law, an individual or his affiliates may not have, and may not have had at any time during the previous two years, any affiliation with the company or its affiliates, as such terms are defined in the Companies Law. In addition, no individual may serve as an outside director if the individual's position or other activities create or may create a conflict of interest with his or her role as an outside director or are likely to interfere with his or her ability to serve as a director. For a period of two years from termination from office, a former outside director may not serve as a director or employee of the company or provide professional services to the company for consideration. Pursuant to the Israeli Companies Law, at least one of the outside directors appointed by a publicly-traded company must have financial and accounting expertise. The other outside directors should possess financial and accounting expertise or professional expertise, as these terms are defined in regulations promulgated under the Companies Law. This requirement does not apply to outside directors elected prior to January 2006. All of the outside directors must serve on the company's statutory audit committee.

The outside directors must be elected by the shareholders, including at least one-third of the shares of non-controlling shareholders voted on the matter. However, the outside directors can be elected by shareholders without this one-third approval if the total shares of non-controlling shareholders voted against the election do not represent more than one percent of the voting rights in the company. The term of an outside director is three years and may be extended for one additional three-year term. An outside director can be removed from office only under very limited circumstances. Each committee of a company's board of directors is required to include at least one outside director. If, at the time outside directors are elected, all current members of the board of directors are of the same gender, then at least one outside director must be of the other gender.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Under the Companies Law and the requirements for listing on the Nasdaq Global Market, our board of directors is required to appoint an audit committee. Our audit committee must be comprised of at least three directors, including all of the outside directors. The audit committee consists of: Dr. Eyal Kishon, Doron Nevo, Joseph Tenne and Karen Sarid. Our Board of Directors has determined that Joseph Tenne is an audit committee financial expert and that all members of the Audit Committee are independent under the applicable Securities and Exchange Commission and Nasdaq Global Market rules.

The audit committee may not include the chairman of the board, a controlling shareholder and the members of his immediate family, or any director who is employed by the company or provides services to the company on a regular basis. Under Israeli law, the role of the audit committee is to examine flaws in our business management, in consultation with the internal auditor and the independent accountants, and to propose remedial measures to the board. The audit committee also reviews for approval transactions between the company and office holders or interested parties, as described below.

We have adopted an audit committee charter as required by the Nasdaq rules. Our audit committee assists the board of directors in fulfilling its responsibility for oversight of the quality and integrity of our accounting, auditing and financial reporting practices and financial statements and the independence qualifications and performance of our independent auditors. The audit committee also has the authority and responsibility to oversee our independent auditors, to recommend for shareholder approval the appointment and, where appropriate, replacement of our independent auditors and to pre-approve audit fees and all permitted non-audit services and fees.

Under the Companies Law, our board of directors is also required to appoint an internal auditor proposed by the audit committee. The internal auditor may be our employee, but may not be an interested party or office holder, or a relative of any interested party or office holder, and may not be a member of our independent accounting firm. The role of the internal auditor is to examine, among other things, whether our activities comply with the law and orderly business procedure. Eitan Hashachar CPA has been our internal auditor since January 2001.

Nasdaq rules require that director nominees be selected or recommended for the board's selection either by a committee composed solely of independent directors or by a majority of independent directors. Our Nominating Committee assists the board of directors in its selection of individuals as nominees for election to the board of directors and/or to fill any vacancies or newly created directorships on the board of directors. The Nominating Committee consists of four members: Dr. Eyal Kishon, Doron Nevo, Joseph Tenne and Karen Sarid. All members of the Nominating Committee are independent under the applicable Securities and Exchange Commission and Nasdaq Global Market rules.

Nasdaq rules also provide that the compensation of a company's chief executive officer and other executive officers is required to be approved either by a majority of the independent directors on the board or a committee comprised solely of independent directors. Our board of directors has appointed Dr. Eyal Kishon and Joseph Tenne to serve on the compensation committee of the board of directors.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Pursuant to our articles of association, our directors, other than our outside directors, are classified into three classes (classes I, II and III). The members of each class of directors and the expiration of the term of office is as follows:

Vacant	Class I	2007
Joseph Tenne	Class II	2008
Shabtai Adlersberg	Class III	2009

We currently do not have a Class I director.

Our outside directors under the Companies Law, Doron Nevo, Dr. Eyal Kishon and Karen Sarid, are not members of any class and serve in accordance with the provisions of the Companies Law. Mr. Nevo's and Ms. Sarid's terms end in 2009 and Dr. Kishon's term ends in 2008.

D. EMPLOYEES

We had the following number of employees as of December 31, 2004, 2005 and 2006 in the areas set forth in the table below:

	As of December 31,		
	2004	2005	2006
Research and development	213	233	312
Sales & marketing, technical service & support	144	186	240
Operations	63	73	102
Management and administration	25	30	47
	445	522	701

Our employees were located in the following areas as of December 31, 2004, 2005 and 2006.

	As of December 31,		
	2004	2005	2006
Israel	320	373	416
United States	105	124	234
Europe	3	5	25
Far East	15	17	22
Latin America	2	3	4
	445	522	701

Edgar Filing: AUDIOCODES LTD - Form 20-F

The growth in the number of our employees in 2005 was primarily attributable to an increase in research and development personnel, increased sales and marketing efforts and in 2006 was primarily attributable to our acquisitions of Nuera, now known as AudioCodes San Diego, and Netrake, now known as AudioCodes Texas.

Israeli labor laws and regulations are applicable to our employees in Israel. These laws principally concern matters such as paid annual vacation, paid sick days, length of the workday, pay for overtime, insurance for work-related accidents, severance pay and other conditions of employment. Israeli law generally requires severance pay, which may be funded by Manager's Insurance, described below, upon the retirement or death of an employee or termination of employment without cause (as defined under Israeli law). Furthermore, Israeli employees and employers are required to pay predetermined sums to the National Insurance Institute, which include payments for national health insurance. The payments to the National Insurance Institute are approximately 14.8% of wages, of which the employee contributes approximately 65% and the employer contributes approximately 35%.

Although not legally required, we regularly contribute to a Manager's Insurance fund or to a privately managed pension fund on behalf of our employees located in Israel. These funds provide employees with a lump sum payment upon retirement (or a pension, in case of a pension fund) and severance pay, if legally entitled thereto, upon termination of employment. We provide for payments to a Manager's Insurance Fund and pension fund contributions in the amount of 13.3% of an employee's salary on account of severance pay and provident payment or pension, with the employee contributing 5.0% of his salary. We also pay an additional amount of up to 2.5% of certain of our employees' salaries in connection with disability payments. In addition, we administer an Education Fund for our Israeli employees and pay 7.5% of these employees' salaries thereto, with the employees contributing 2.5% of their salary.

Furthermore, our employees are subject to certain provisions of the collective bargaining agreements between the Histadrut (General Federation of Labor in Israel) and the Coordination Bureau of Economic Organizations (including the Industrialists Associations) by order of the Israeli Ministry of Labor and Welfare. These provisions principally concern cost of living increases, recreation pay and other conditions of employment. We generally provide our employees with benefits and working conditions above the required minimums. Our employees, as a group, are not currently represented by a labor union. To date, we have not experienced any work stoppages.

E. SHARE OWNERSHIP

The following table sets forth the share ownership and outstanding number of options of our directors and officers as of June 15, 2007

Name	Total Shares Beneficially Owned	Percentage of Ordinary Shares	Number of Options
Shabtai Adlersberg	5,120,302	13.4	533,718
Nachum Falek	*		*
Hanan Maoz	*		*
Eyal Frishberg	*		*
Eli Nir	*		*

David E. Perez	*		*
Joseph Tenne	*		*
Dr. Eyal Kishon	*		*
Doron Nevo	*		*
Karen Sarid	*		*

*Less than one percent.

Our officers and directors have the same voting rights as our other shareholders.

The following table sets forth information with respect to the options to purchase our ordinary shares held by Mr. Adlersberg as of June 15, 2007. Shabtai Adlersberg

Number of Options	Grant Date	Exercise Price	Exercised	Cancelled	Vesting	Expiration Date
96,000	July 1, 1996	\$ 0.61	(96,000)	-	4 years	July 1, 2006
96,000	July 1, 1998	\$ 1.10	(72,000)	-	4 years	July 1, 2008
100,000	May 23, 2000	\$ 29.16	-	(100,000)	4 years	May 23, 2007
225,000	December 19, 2001	\$ 4.18	-	-	4 years	December 19, 2008
9,718	August 9, 2002	\$ 2.04	-	-	2 years	August 9, 2009
275,000	September 23, 2004	\$ 12.84	-	-	4 years	September 23, 2011

Employee Share Plans

We have Employee Share Purchase Plans and Employee Share Option Plans for the granting of options to our employees, officers, directors and consultants. Most of these plans are pursuant to the Israeli Income Tax Ordinance, entitling the beneficiaries who are our employees to tax benefits under Israeli law. There are various conditions that must be met in order to qualify for these benefits, including registration of the options in the name of a trustee for each of the beneficiaries who is granted options. Each option, and any ordinary shares acquired upon the exercise of the option, must be held by the trustee at least for a period commencing on the date of grant and ending no later than 30 months after the date of grant, in accordance with the period of time specified by Section 102 of Israel's Income Tax Ordinance, and deposited in trust with the trustee. There are similar plans for our U.S. employees, which are designed to comply with the corresponding provisions of the Internal Revenue Code of 1986, as amended.

Employee Share Purchase Plans

We implemented two Employee Share Purchase Plans in May 2001. One plan is for our Israeli employees and the other for all our U.S. and other non-Israeli employees. Under these Plans an aggregate of 2,000,000 of our ordinary shares were reserved for sale to our employees at a price equal to 85% of the lesser of fair market value on the first day or last day of each offering period under the Plans. As of December 31, 2006, we had issued 1,290,013 of our ordinary shares pursuant to purchases under these plans.

Employee Share Option Plans

In 1999, our board restated three 1997 Employee Share Option Plans for our Israeli employees, officers, directors and consultants and two 1997 Share Option Plans for our U.S. employees, officers, directors and consultants. Additionally, in 1999 our board adopted an Employee Share Option Plan for our Israeli employees, officers, directors and consultants, and an Employee Share Option Plan for our U.S. employees, officers, directors and consultants. The terms of the 1999 Plans are substantially the same as those of the 1997 Plans, but have reduced the exercise period from 10 to 7 years. The board has the ability to grant options with longer or shorter terms. The terms of the 1999 Plans have been modified slightly since they were adopted and in 2003, the Israeli Plan was changed to conform to amendments to the Israeli Income Tax law.

As of December 31, 2006, options to purchase a total of 6,009,621 shares are outstanding under the 1997 and 1999 Israeli Plans and options to purchase a total of 2,006,205 shares are outstanding under the 1997 U.S. Plan. In addition, a reserve of 1,016,000 shares has been made available for grant under the 1999 Israeli Plan and a reserve of 327,000 shares has been made available for grant under the 1999 U.S. Plan. However, subject to our board deciding otherwise, each year on July 1, starting with July 1999, the number of shares that will be made available for grant under both of the 1999 Plans, will be automatically increased to that number of shares that is equal to 5% of our outstanding share capital on such a date.

The holders of options under all of the plans are responsible for all personal tax consequences relating to the options. The exercise prices of the options are based on the fair value of the ordinary shares at the time of grant as determined by our board of directors. The current practice of our board of directors is to grant options with exercise prices that equal 100% of the closing price of our ordinary shares on the applicable date of grant.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**A. MAJOR SHAREHOLDERS**

To our knowledge, (A) we are not directly or indirectly owned or controlled (i) by another corporation or (ii) by any foreign government and (B) there are no arrangements, the operation of which may at a subsequent date result in a change in control of AudioCodes. The following table sets forth, as of December 31, 2006, the number of our ordinary shares, which constitute our only voting securities, beneficially owned by (i) all shareholders known to us to own more than 5% of our outstanding ordinary shares, and (ii) all of our directors and senior executive officers as a group.

Identity of Person or Group	Amount Owned	Percent of Class
Shabtai Adlersberg ⁽¹⁾	5,615,051	13.3%
Leon Bialik ⁽²⁾	4,030,882	9.6%
Soros Fund Management LLC ⁽³⁾	2,781,937	6.6%
FMR Corp. ⁽⁴⁾	2,678,264	6.4%
Kern Capital ⁽⁵⁾	2,300,600	5.5%
All directors and senior executive officers as a group (16 persons) ⁽⁶⁾	6,675,768	15.9%

- (1) Includes options to purchase 496,218 shares, exercisable within sixty days of December 31, 2006.
- (2) The information is derived from a statement on Schedule 13G/A, dated February 12, 2007 of Leon Bialik filed with the Securities and Exchange Commission.
- (3) The information is derived from a statement on Schedule 13G, dated March 26, 2007, of Soros Fund Management LLC, George Soros, Robert Soros and Jonathan Soros filed with the Securities and Exchange Commission. All of the shares beneficially owned are issuable upon conversion of our senior convertible notes held by Soros Fund Management. These convertible notes were acquired subsequent to December 31, 2006.
- (4) The information is derived from the joint statement on Schedule 13G/A, dated January 10, 2007, of FMR Corp., Edward C. Johnson 3d, Fidelity Management & Research Company and Fid Blue Chip Growth Fund filed with the Securities and Exchange Commission. The address of FMR Corp. is 82 Devonshire Street, Boston, Massachusetts 02109. The shares beneficially owned include 534,474 shares issuable upon conversion of our senior convertible notes held by FMR.
- (5) The information is derived from a statement on Schedule 13G, dated February 14, 2007 of Kern Capital Management, Robert E. Kern Jr. and David G. Kern filed with the Securities and Exchange Commission.
- (6) Includes 1,451,335 ordinary shares, which may be purchased pursuant to options exercisable within sixty days following December 31, 2006.

Mr. Adlersberg held 13.1% of our ordinary shares as of December 31, 2006, as compared to 13.3% of our ordinary shares as of December 31, 2005 and 13.4% of our ordinary shares as of December 31, 2004.

Mr. Bialik held 9.6% of our ordinary shares as of December 31, 2006 as compared to 9.9% of our ordinary shares as of December 31, 2005 and December 31, 2004.

FMR Corp. held 6.4% of our ordinary shares as of December 31, 2006 (including shares issuable upon conversion of our senior convertible notes), as compared to 14.2% of our ordinary shares as of December 31, 2005 and 8.2% of our ordinary shares as of December 31, 2004.

Kern Capital held 5.5% of our ordinary shares as of December 31, 2006 as compared to 6.9% of our ordinary shares as of December 31, 2005 and 6.7% of our ordinary shares as of December 31, 2004.

Edgar Filing: AUDIOCODES LTD - Form 20-F

As of June 15, 2007, there were approximately 24 holders of record of our ordinary shares in the United States, although we believe that the number of beneficial owners of the ordinary shares is significantly greater. The number of record holders in the United States is not representative of the number of beneficial holders nor is it representative of where such beneficial holders are resident since many of these ordinary shares were held of record by brokers or other nominees.

The major shareholders have the same voting rights as the other shareholders.

B. RELATED PARTY TRANSACTIONS

None

INTERESTS OF EXPERTS AND COUNSEL

Not applicable.

ITEM 8. FINANCIAL INFORMATION

See Item 18.

ITEM 9. THE OFFER AND LISTING

A. OFFER AND LISTING DETAILS

Our ordinary shares are listed on the Nasdaq Global Market and The Tel Aviv Stock Exchange under the symbol AUDC.

In accordance with Rule 4350(a)(1) of the Rules of Corporate Governance of Nasdaq, we have received an exemption from the requirement to distribute an annual report to our shareholders prior to our annual meeting of shareholders. The basis for the exemption is that the generally accepted business practice in Israel, where we are incorporated, is not to distribute an annual report to shareholders. We post our Annual Report on Form 20-F on our web site (www.audiocodes.com) as soon as practical following the filing of the Annual Report on Form 20-F with the Securities and Exchange Commission.

The following table sets forth, for the periods indicated, the high and low sales prices of our ordinary shares as reported by the Nasdaq Global Market (which was called Nasdaq National Market until June 30, 2006 when it changed its name to Nasdaq Global Market).

F. *EXPENSES OF THE ISSUE*

Not applicable.

ITEM 10. ADDITIONAL INFORMATION

A. *SHARE CAPITAL*

Not applicable.

B. *MEMORANDUM AND ARTICLES OF ASSOCIATION*

Objects and Purposes

Our registration number with the Israeli Registrar of Companies is 520044132. Our objects and purposes, set forth in Section 2 of our memorandum of association, are:

to plan, develop and market voice signal systems;

to purchase, import, market and wholesale and retail distribute, in Israel and abroad, consumption goods and accompanying products;

to serve as representatives of bodies, entrepreneurs and companies from Israel and abroad with respect to their activities in Israel and abroad; and

to carry out any activity as determined by the lawful management.

Borrowing Powers

The board of directors has the power to cause us to borrow money and to secure the payment of borrowed money. The board of directors specifically has the power to issue bonds or debentures, and to impose mortgages or other security interests on all or any part of our property.

Amendment of Articles of Association

Shareholders may amend our articles of association by a resolution adopted at a shareholders meeting by the holders of 50% of voting power represented at the meeting in person or by proxy and voting thereon.

Dividends

Under the Israeli Companies Law, we may pay dividends only out of our profits. The amount of any dividend to be distributed among shareholders is based on the nominal value of their shares. Our board of directors has determined that we will not distribute any amounts of our undistributed tax exempt income as dividend. We intend to reinvest our tax-exempt income and not to distribute such income as a dividend. Accordingly, no deferred income taxes have been provided on income attributable to our Approved Enterprise program as the undistributed tax exempt income is essentially permanent in duration.

Voting Rights and Powers

Unless any shares have special rights as to voting, every shareholder has one vote for each share held of record. A shareholder is not entitled to vote at any shareholders meeting unless all calls then payable by him in respect of his shares have been paid (this does not apply to separate meetings of the holders of a particular class of shares with respect to the modification or abrogation of their rights).

Under our articles of association, we may issue preferred shares from time to time, in one or more series. However, in connection with our listing on The Tel-Aviv Stock Exchange in 2001, we agreed that for such time as our ordinary shares are traded on The Tel-Aviv Stock Exchange, we will not issue any of the 2,500,000 preferred shares, nominal value NIS 0.01, authorized in our articles of association. Notwithstanding the foregoing, we may issue preferred shares if the preference of those shares is limited to a preference in the distribution of dividends and such preferred shares have no voting rights.

Business Combinations

Our articles of association impose restrictions on our ability to engage in any merger, asset or share sale or other similar transaction with a shareholder holding 15% or more of our voting shares.

Winding Up

Upon our liquidation, our assets available for distribution to shareholders will be distributed to them in proportion to the nominal value of their shares.

Redeemable Shares

We may issue and redeem redeemable shares.

Modification of Rights

Subject to the provisions of our memorandum of association, and without prejudice to any special rights previously conferred upon the holders of our existing shares, we may, from time to time, by a resolution approved by the holders of 75% voting power represented at the meeting in person or by proxy and voting thereon, provide for shares with such preferred or deferred rights or rights of redemption, or other special rights and/or such restrictions, whether in regard to dividends, voting repayment of share capital or otherwise, as may be stipulated in such resolution.

If at any time our share capital is divided into different classes of shares, we may modify or abrogate the rights attached to any class, unless otherwise provided by the articles of association, by a resolution approved by the holders of 75% voting power represented at the meeting in person or by proxy and voting thereon, subject to the consent in writing of the holders of 75% of the issued shares of that class.

The provisions of our articles of association relating to general meetings also apply to any separate general meeting of the holders of the shares of a particular class, except that two or more members holding not less than 75% of the issued shares of that class must be present in person or by proxy at that separate general meeting for a quorum to exist.

Unless otherwise provided by our articles of association, the increase of an authorized class of shares, or the issuance of additional shares thereof out of the authorized and unissued share capital, shall not be deemed to modify or abrogate the rights attached to previously issued shares of that class or of any other class.

Shareholders Meetings

An annual meeting of shareholders is to be held once a year, within 15 months after the previous annual meeting. The annual meeting may be held in Israel or outside of Israel, as determined by the board of directors.

The board of directors may, whenever it thinks fit, convene a special shareholders meeting. The board must convene a special shareholders meeting at the request of:

at least two directors;

at least one-quarter of the directors in office; or

shareholders who hold at least 5% of the outstanding equity and at least 1% of the voting rights, or at least 5% of the outstanding voting rights.

A special shareholders meeting may be held in Israel or outside of Israel, as determined by the board of directors.

Notice of General Meetings; Omission to Give Notice

The provisions of the Companies Law and the related regulations override the provisions of our articles of association, and provide for notice of a meeting of shareholders to be sent to each registered shareholder at least 21 days or 35 days in advance of the meeting. Notice of a meeting of shareholders must also be published in two Israeli newspapers prior to the record date for the meeting.

Notice of a meeting of shareholders must specify the type of meeting, the place and time of the meeting, the agenda, a summary of the proposed resolutions, the majority required to adopt the proposed resolutions, and the record date for the meeting. The notice must also include the address and telephone number of our registered office, and a list of times at which the full text of the proposed resolutions may be examined at the registered office.

The accidental omission to give notice of a meeting to any shareholder, or the non-receipt of notice sent to such shareholder, does not invalidate the proceedings at the meeting.

Limitations on Foreign Shareholders to Hold or Exercise Voting Rights

There are no limitations on foreign shareholders in our articles of association. Israeli law restricts the ability of citizens of countries that are in a state of war with Israel to hold shares of Israeli companies.

Approval of Transactions under Israeli Law

The Companies Law imposes fiduciary duties that office holders, including directors and executive officers, owe to their company. An office holder's fiduciary duties consist of a duty of care and a duty of loyalty.

The duty of care generally requires an office holder to act with the level of care which a reasonable office holder in the same position would have acted under the same circumstances. This includes the duty to use reasonable means to obtain information regarding the advisability of a given action submitted for his or her approval or performed by virtue of his or her position and all other relevant information material to these actions. The duty of loyalty generally requires an office holder to act in good faith and for the good of the company. Specifically, an office holder must avoid any conflict of interest between the office holder's position in the company and his or her other positions or personal affairs. In addition, an office holder must avoid competing against the company or exploiting any business opportunity of the company for his or her own benefit or the benefit of others. An office holder must also disclose to the company any information or documents relating to the company's affairs that the office holder has received due to his or her position in the company. The term office holder includes any person who, either formally or in substance, serves as a director, general manager or chief executive officer, or who reports directly to the general manager or chief executive officer. Each person listed in the table under Item 6. Directors, Senior Management and Employees A. Directors and Senior Management above is an office holder of AudioCodes.

Under the Companies Law, all arrangements as to compensation of office holders who are not directors require approval of the board of directors and, in certain cases, the prior approval of the audit committee. Arrangements as to compensation of directors also require audit committee and shareholder approval.

The Companies Law requires that an office holder promptly disclose any personal interest that he or she may have, and all related material information known to him or her, in connection with any existing or proposed transaction by the company. A personal interest of an office holder includes a personal interest of the office holder's relative or a corporation in which the office holder or the office holder's relative is a 5% or greater shareholder, director or general manager or has the right to appoint at least one director or the general manager. Personal interest does not apply to a personal interest stemming merely from holding shares in the company.

The office holder must make the disclosure of his personal interest no later than the first meeting of the company's board of directors that discusses the particular transaction. The office holder's duty to disclose shall not apply in the event that the personal interest only results from a personal interest of the office holder's relative in a transaction that is not an extraordinary transaction. An extraordinary transaction is a transaction not in the ordinary course of business, not on market terms, or likely to have a material impact on the company's profitability, assets or liabilities.

For a transaction that is not an extraordinary transaction, under the Companies Law, once the office holder complies with the above disclosure requirement, the board of directors is authorized to approve the transaction, unless the articles of association provide otherwise. Our articles of association do not provide otherwise. Such approval must determine that the transaction is not adverse to the company's interest. If the transaction is an extraordinary transaction, or if it concerns exculpation, indemnification or insurance of an office holder, then it also must be approved by the company's audit committee and board of directors, and, under certain circumstances, by the shareholders of the company. An office holder who has a personal interest in a matter that is considered at a meeting of the board of directors or the audit committee generally may not be present at this meeting or vote on this matter unless a majority of the board of directors or the audit committee has a personal interest in the matter. If a majority of the board of directors or the audit committee has a personal interest in the transaction, shareholder approval also would be required.

Duties of Shareholders

Under the Companies Law, the disclosure requirements that apply to an office holder also apply to a controlling shareholder of a public company. A controlling shareholder is a shareholder who has the ability to direct the activities of a company, including a shareholder that owns 25% or more of the voting rights if no other shareholder owns more than 50% of the voting rights, but excluding a shareholder whose power derives solely from his or her position on the board of directors or any other position with the company. Two or more shareholders with a personal interest in the approval of the same transaction are deemed to be one shareholder for the purpose of being a controlling shareholder. Extraordinary transactions, including a private placement, with a controlling shareholder or in which a controlling shareholder has a personal interest, and the engagement of a controlling shareholder as an office holder or employee, generally require the approval of the audit committee, the board of directors and the shareholders. The shareholder approval must include at least one-third of the shares of non-interested shareholders voted on the matter. However, the transaction can be approved by shareholders without this one-third approval if the total shares of non-interested shareholders voted against the transaction do not represent more than one percent of the voting rights in the company.

In addition, under the Companies Law, each shareholder has a duty to act in good faith toward the company and other shareholders and to refrain from abusing his or her power in the company, such as in shareholder votes. In addition, specified shareholders have a duty of fairness toward the company. These shareholders include any controlling shareholder, any shareholder who knows that it possesses the power to determine the outcome of a shareholder vote and any shareholder who, pursuant to the provisions of the articles of association, has the power to appoint an office holder or any other power with respect to the company. A recent amendment to the Companies Law provides that a breach of the duty of fairness will be governed by the laws governing breach of contract, *mutatis mutandis*. However, the Companies Law does not define the substance of this duty of fairness.

Insurance, Indemnification and Exculpation of Directors and Officers; Limitations on Liability

Insurance of Office Holders

The Companies Law permits a company, if permitted by its articles of association, to insure an office holder in respect of liabilities incurred by the office holder as a result of:

the breach of his or her duty of care to the company or to another person, or

the breach of his or her duty of loyalty to the company,

to the extent that the office holder acted in good faith and had reasonable cause to believe that the act would not prejudice the company. A company can also insure an office holder against monetary liabilities imposed on the office holder in favor of a third party as a result of an act or omission that the office holder committed in connection with his or her serving as an office holder.

Indemnification of Office Holders

Under the Companies Law, a company can, if permitted by its articles of association, indemnify an office holder for any of the following obligations or expenses incurred in connection with his or her acts or omissions as an office holder:

monetary liability imposed upon the office holder in favor of other persons pursuant to a court judgment, including a compromise judgment or an arbitrator's decision approved by a court;

reasonable litigation expenses, including attorney's fees, incurred by the office holder as a result of an investigation or proceeding instituted against the office holder by a competent authority, provided that such investigation or proceeding concluded without the filing of an indictment against the office holder or the imposition of any financial liability in lieu of criminal proceedings, or concluded without the filing of an indictment against the office holder and a financial liability was imposed on the office holder in lieu of criminal proceedings with respect to a criminal offense that does not require proof of criminal intent; and

reasonable litigation expenses, including attorneys' fees, actually incurred by the office holder or imposed upon the office holder by a court, in an action, suit or proceeding brought against the office holder by or on behalf of the company or other persons; in a criminal action in which the office holder was acquitted; or in a criminal action which does not require criminal intent in which the office holder was convicted. A company may also exculpate an office holder in advance, in whole or in part, from liability for damages sustained by a breach of duty of care to the company.

A company may indemnify an office holder in respect of these liabilities either in advance of an event or following an event. If a company undertakes to indemnify an office holder in advance of an event, the indemnification, other than legal costs, must be limited to foreseeable events in light of the company's actual activities when the company undertook such indemnification, and reasonable amounts or standards, as determined by the board of directors.

Exculpation of Office Holders

Under the Companies Law, a company may, if permitted by its articles of association, also exculpate an office holder in advance, in whole or in part, from liability for damages sustained by a breach of duty of care to the company.

Furthermore, a company can, with one limited exception, exculpate an office holder in advance, in whole or in part, from liability for damages sustained by a breach of duty of care to the company.

Limitations on Exculpation, Insurance and Indemnification

Under the Companies Law, a company may indemnify or insure an office holder against a breach of duty of loyalty only to the extent that the office holder acted in good faith and had reasonable grounds to assume that the action would not prejudice the company. In addition, a company may not indemnify, insure or exculpate an office holder against a breach of duty of care if committed intentionally or recklessly (excluding mere negligence), or committed with the intent to derive an unlawful personal gain, or for a fine or forfeit levied against the office holder in connection with a criminal offense.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Our articles of association allow us to insure, indemnify and exculpate office holders to the fullest extent permitted by law, provided such insurance or indemnification is approved in accordance with law. Pursuant to the Companies Law, exculpation of, procurement of insurance coverage for, and an undertaking to indemnify or indemnification of, our office holders must be approved by our audit committee and our board of directors and, if the office holder is a director, also by our shareholders.

We have entered into agreements with each of our directors and senior officers to insure, indemnify and exculpate them against some types of claims, subject to dollar limits and other limitations. These agreements provide, subject to Israeli law, for us to indemnify each of these directors and senior officers for any of the following obligations or expenses that they may incur:

- ⁿ monetary liability imposed on the director or senior officer in favor of a third party in a judgment, including a settlement or an arbitral award confirmed by a court, for an act that the director or senior officer performed by virtue of being our director or senior officer,
- ⁿ reasonable legal costs, including attorneys' fees, expended by a director or senior officer as a result of an investigation or proceeding instituted against the director or senior officer by a competent authority, provided that such investigation or proceeding concludes without the filing of an indictment against the director or senior officer and either:
 - no financial liability was imposed on the director or senior officer in lieu of criminal proceedings, or
 - financial liability was imposed on the director or senior officer in lieu of criminal proceedings but the alleged criminal offense does not require proof of criminal intent, and
- ⁿ reasonable legal costs, including attorneys' fees, expended by the director or senior officer or for which the director or senior officer is charged by a court:
 - in an action brought against the director or senior officer by us, on our behalf or on behalf of a third party,
 - in a criminal action in which the director or senior officer is found innocent, or
 - in a criminal action in which the director or senior officer is convicted but in which proof of criminal intent is not required.

We have entered into agreements with each of our directors and senior officers to insure, indemnify and exculpate them to the full extent permitted by law against some types of claims, subject to dollar limits and other limitations. These agreements have been ratified by our audit committee, board of directors and shareholders. We have acquired directors' and officers' liability insurance covering our officers and directors and the officers and directors of our subsidiaries against certain claims.

C. MATERIAL CONTRACTS

On July 6, 2006, we completed the acquisition of Nuera, which became our wholly-owned subsidiary. Under the acquisition agreement, Nuera was acquired for a purchase price of \$82.5 million in cash, subject to reduction for certain expenses, plus an earn out arrangement under which we have agreed to pay up to an additional \$5 million if Nuera achieves certain revenue milestones during the first twelve months after consummation of the transaction.

On August 14, 2006, we completed the acquisition of Netrake, which became our wholly-owned subsidiary. Under the definitive agreement, Netrake was acquired for a purchase price of \$13.8 million in cash.

In April 2007, we completed the acquisition of CTI Squared Ltd. We exercised an option to acquire the remaining shares of CTI Squared Ltd. for a purchase price of \$10 million, with \$5 million paid in cash at the closing and \$5 million payable in cash by February 28, 2008.

D. EXCHANGE CONTROLS

Since January 1, 2003, all exchange control restrictions imposed by the State of Israel have been removed, although there are still reporting requirements for foreign currency transactions. However, legislation remains in effect pursuant to which currency controls can be imposed by administrative action at any time. Nonresidents of Israel who purchase our ordinary shares are able to receive any dividends thereon (and any amounts payable upon the dissolution, liquidation and winding up of our affairs) freely repatriable in non-Israeli currency, provided that Israeli income tax has been paid or withheld on such amounts (see Item 10. Additional Information E. Taxation Israeli Tax Considerations Tax on Dividends).

Non-residents of Israel may freely hold and trade our ordinary shares, and the proceeds of sale thereof are not subject to Israeli currency control restrictions. Our memorandum of association and articles of association do not restrict in any way the ownership of ordinary shares by non-residents of Israel and neither our memorandum of association and articles of association nor Israeli law restricts the voting rights of non-residents, except with respect to citizens of countries that are in a state of war with Israel.

E. TAXATION

The following is a summary of the material Israeli and United States federal tax consequences, Israeli foreign exchange regulations and certain Israeli government programs affecting us. To the extent that the discussion is based on new tax or other legislation that has not been subject to judicial or administrative interpretation, there can be no assurance that the views expressed in the discussion will be accepted by the tax or other authorities in question. The discussion is not intended, and should not be construed, as legal or professional tax advice, is not exhaustive of all possible tax considerations and should not be relied upon for tax planning purposes. Potential investors are urged to consult their own tax advisors as to the Israeli tax, United States federal income tax and other tax consequences of the purchase, ownership and disposition of ordinary shares, including, in particular, the effect of any foreign, state or local taxes.

Israeli Tax Considerations

General Corporate Tax Structure

Israeli companies were generally subject to corporate tax at the rate of 31% of their taxable income in 2006. Pursuant to tax reform legislation that came into effect in 2005, the corporate tax rate is to undergo further staged reductions to 25% by the year 2010. In order to implement these reductions, the corporate tax rate in Israel is scheduled to decline to 29% in 2007, 27% in 2008 and 26% in 2009. However, the effective tax rate payable by a company that derives income from an approved enterprise (as discussed below) may be considerably less.

Tax Benefits Under the Law for the Encouragement of Capital Investments, 1959

Our facilities have been granted approved enterprise status pursuant to the Law for the Encouragement of Capital Investments, 1959 or the Investment Law, which provides certain tax and financial benefits to investment programs that have been granted such status.

The Investment Law provides that a proposed capital investment in eligible facilities may be designated as an approved enterprise. Until recently, the designation required advance approval from the Investment Center of the Israel Ministry of Industry, Trade and Labor (the Investment Center). Each certificate of approval for an approved enterprise relates to a specific investment program delineated both by its financial scope, including its capital sources, and by its physical characteristics, such as the equipment to be purchased and utilized pursuant to the program. The tax benefits under the Investment Law are not available for income derived from products manufactured outside of Israel.

A company owning an approved enterprise may elect to receive either governmental grants or an alternative package of tax benefits. Under the alternative package, a company's undistributed income derived from an approved enterprise will be exempt from corporate tax for a period of two to ten years (depending on the geographic location of the approved enterprise within Israel). The exemption commences in the first year of taxable income, and the company is taxed at a reduced corporate rate of 10% to 25% for the following five to eight years, depending on the extent of foreign shareholders' ownership of the company's ordinary shares. The benefits period is limited to twelve years from completion of the investment under the approved plan or fourteen years from the date of approval, whichever is earlier. A Foreign Investors Company, or FIC, defined in the Investment Law as a company of which more than 25% of its shareholders are non-Israeli residents, may enjoy benefits for a period of up to ten years, or twelve years if it complies with certain export criteria stipulated in the Investment Law (the actual length of the benefits period is graduated based on the percentage of foreign ownership).

Edgar Filing: AUDIOCODES LTD - Form 20-F

We have elected the alternative package of tax exemptions and reduced tax rates for our production facilities that have received Approved Enterprise status. Accordingly, income derived from these facilities is generally entitled to a tax-exemption period of two to four years and a reduced corporate tax rate of 10% to 25% for an additional period of six to eight years, based on our percentage of foreign investment. The tax benefits for our existing Approved Enterprise programs are scheduled to gradually expire by 2013. The period of tax benefits for each capital investment plan expires upon the earlier of: (1) twelve years from completion of the investment under the approved plan, or (2) fourteen years from receipt of approval.

Out of our retained earnings as of December 31, 2006, approximately \$540,000 are tax-exempt. If we were to distribute this tax-exempt income before our complete liquidation, it would be taxed at the reduced corporate tax rate applicable to these profits (10% to 25%), and an income tax liability of up to approximately \$135,000 would be incurred. Our board of directors has determined that we will not distribute any amounts of our undistributed tax exempt income as dividend. We intend to reinvest our tax-exempt income and not to distribute such income as a dividend. Accordingly, no deferred income taxes have been provided on income attributable to our Approved Enterprise.

If we fail to meet the requirements of an Approved Enterprise we would be subject to corporate tax in Israel at the regular statutory rate. We could also be required to refund tax benefits, with interest and adjustments for inflation based on the Israeli consumer price index.

The tax benefits derived from any certificate of approval relate only to taxable income attributable to the specific approved enterprise. If a company has more than one approval or only a portion of its capital investments are approved, its effective tax rate is the result of a weighted combination of the applicable rates.

Our production facilities have been granted the status of approved enterprise. Income arising from our approved enterprise facilities is tax-free under the alternative package of benefits described above and entitled to reduced tax rates based on the level of foreign ownership for specified periods. We have derived, and expect to continue to derive, a substantial portion of our operating income from our approved enterprise facilities. The tax benefits attributable to our current approved enterprises are scheduled to expire gradually from 2007 to 2013.

Distribution of earnings derived from approved enterprise which were previously taxed at reduced tax rates, would not result in additional tax consequences to us. However, if retained tax-exempt income is distributed in a manner, we would be taxed at the reduced corporate tax rate applicable to such profits (between 10%-25%). We are not obliged to distribute exempt retained earnings under the alternative package of benefits, and may generally decide from which source of income to declare dividends. We currently intend to reinvest the amount of our tax-exempt income and not to distribute such income as a dividend. Dividends from approved enterprises are generally taxed at a rate of 15% (which is withheld and paid by the company paying the dividend) if such dividend is distributed during the benefits period or within twelve years thereafter. The twelve-year limitation does not apply to an FIC.

Future approved enterprises will be reviewed separately, and the decisions whether to approve or reject a designation as an approved enterprise will be based, among other things, on the criteria set forth in the Investment Law and related regulations, the then prevailing policy of the Investment Center, and the specific objectives and financial criteria of the company. Accordingly, there can be no assurance that any new investment programs will be approved as approved enterprises. In addition, the benefits available to an approved enterprise are conditional upon the fulfillment of conditions stipulated in the Investment Law and related regulations and the criteria set forth in the specific certificate of approval. In the event that a company does not meet these conditions, it will be subject to corporate tax at the rate then in effect under Israeli law for such tax year. As of December 31, 2006, management believes that we meet all of the aforementioned conditions.

On April 1, 2005, an amendment to the law came into effect (the Amendment) and has significantly changed the provisions of the law. The Amendment limits the scope of enterprises which may be approved by the Investment Center by setting criteria for the approval of a facility as a Beneficiary Enterprise, such as provisions generally requiring that at least 25% of the Beneficiary Enterprise's income will be derived from export. Additionally, the Amendment enacted major changes in the manner in which tax benefits are awarded under the law so that companies no longer require Investment Center approval in order to qualify for tax benefits.

In addition, the law provides that terms and benefits included in any certificate of approval granted prior to December 31, 2004 will remain subject to the provisions of the law as they were on the date of such approval. Therefore, our existing Approved Enterprises will generally not be subject to the provisions of the Amendment. As a result of the Amendment, tax-exempt income generated under the provisions of the law as amended, will subject us to taxes upon distribution or liquidation and we may be required to record a deferred tax liability with respect to such tax-exempt income.

Law for the Encouragement of Industrial Research and Development, 1984

Under the Law for the Encouragement of Industrial Research and Development, 1984 and the related regulations, or the Research Law, research, development and pre-manufacturing programs that meet specified criteria and are approved by a governmental committee (the Research Committee) of the Office of Chief Scientist (OCS) are eligible for grants of up to 50% of the expenditures on the program. Each application to the OCS is reviewed separately, and grants are based on the program approved by the Research Committee. Expenditures supported under other incentive programs of the State of Israel are not eligible for OCS grants. As a result, we cannot be sure that applications to the OCS will be approved or, if approved, that we will receive the amounts for which we apply.

Recipients of these grants are required to pay royalties on the revenues derived from the sale of product developed in accordance with the program. The royalties are payable at the rate of 3% of revenues during the first three years, 4% of revenues during the following three years, and 5% of revenues in the seventh year and thereafter, with the total royalties not to exceed 100% of the dollar value of the OCS grant.

The terms of the Israeli government participation require that products developed with OCS grants must generally be manufactured in Israel. If we receive OCS approval for any portion of this manufacturing to be performed outside of Israel, the royalty rate would be increased and the repayment schedule would be accelerated, based on the extent of the manufacturing conducted outside of Israel. Depending upon the extent of the manufacturing volume that is performed outside of Israel, the ceiling on royalties would increase to 120%, 150% or 300% of the grant. Under an amendment to the Research Law effective June 7, 2005, the authority of the Research Committee to approve the transfer of manufacture outside of Israel was expanded.

The technology developed pursuant to the terms of these grants may not be transferred to third parties without the prior approval of the Research Committee. This approval is required only for the export of the technology, and not for the export of any products that incorporate the sponsored technology. Approval of the transfer of technology may be granted only if the recipient agrees to abide by all the provisions of the Research Law, including the restrictions on the transfer of know-how and the obligation to pay royalties in an amount that may be increased. The amendment to the Research Law effective June 7, 2005 granted authority to the Research Committee to approve the transfer of sponsored technology outside of Israel, subject to various conditions.

We have received grants from the OCS, and therefore we are subject to various restrictions under the Research Law on the transfer of technology or manufacturing. These restrictions do not terminate upon the full payment of royalties.

In order to meet specified conditions in connection with the grants and programs of the OCS, we have made representations to the Government of Israel about our Israeli operations. From time to time the conduct of our Israeli operations has deviated from our representations. If we fail to meet the conditions to grants, including the maintenance of a material presence in Israel, or if there is any material deviation from the representations made by us to the Israeli government, we could be required to refund the grants previously received (together with an adjustment based on the Israeli consumer price index and an interest factor) and would likely be ineligible to receive OCS grants in the future.

Tax Benefits Under the Law for the Encouragement of Industry (Taxation), 1969

According to the Law for the Encouragement of Industry (Taxation), 1969, or the Industry Encouragement Law, an industrial company is a company resident in Israel, that at least 90% of its income, in any tax year (determined in Israeli currency, exclusive of income from certain government loans, capital gains, interest and dividends) is derived from an industrial enterprise owned by it. An industrial enterprise is defined as an enterprise whose major activity in a given tax year is industrial production activity. We currently believe that we qualify as an industrial company within the definition of the Industry Encouragement Law. Under the Industry Encouragement Law, industrial companies are entitled to the following preferred corporate tax benefits:

deduction of purchases of know-how and patents over an eight-year period for tax purposes;

the right to elect, under specified conditions, to file a consolidated tax return with related Israeli industrial companies; and

accelerated depreciation rates on equipment and buildings.

Eligibility for the benefits under the Industry Encouragement Law is not subject to receipt of prior approval from any governmental authority. The Israeli tax authorities may determine that we do not qualify as an industrial company, which would entail our loss of the benefits that relate to this status. In addition, no assurance can be given that we will continue to qualify as an industrial company, in which case the benefits described above will not be available in the future.

Special Provisions Relating to Measurement of Taxable Income

We elected to measure our taxable income and file our tax return under the Israeli Income Tax Regulations (Principles Regarding the Management of Books of Account of Foreign Invested Companies and Certain Partnerships and the Determination of Their Taxable Income), 1986. Accordingly, commencing taxable year 2003, results for tax purposes are measured in terms of earnings in dollars.

Capital Gains Tax

Israeli law generally imposes a capital gains tax on the sale of publicly traded securities. Pursuant to changes made to the Israeli Income Tax Ordinance in January 2006, capital gains on the sale of our ordinary shares will be subject to Israeli capital gains tax, generally at a rate of 20% unless the holder holds 10% or more of our voting power during the 12 months preceding the sale, in which case it will be subject to a 25% capital gains tax.

However, as of January 1, 2003, non-Israeli residents are exempt from Israeli capital gains tax on any gains derived from the sale of shares publicly traded on the TASE, provided such gains do not derive from a permanent establishment of such shareholders in Israel. Non-Israeli residents are also exempt from Israeli capital gains tax on any gains derived from the sale of shares of Israeli companies publicly traded on a recognized stock exchange or regulated market outside of Israel, provided that such capital gains are not derived from a permanent establishment in Israel and that such shareholders did not acquire their shares prior to the issuer's initial public offering. However, non-Israeli corporations will not be entitled to the exemption with respect to gains derived from the sale of shares of Israeli companies publicly traded on the TASE, if an Israeli resident (i) has a controlling interest of 25% or more in such non-Israeli corporation, or (ii) is the beneficiary or is entitled to 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

In some instances where our shareholders may be subject to Israeli tax on the sale of their ordinary shares, the payment of the consideration may be subject to the withholding of Israeli tax at the source.

United States-Israel Tax Treaty

Pursuant to the Convention Between the Government of the United States of America and the Government of Israel with respect to Taxes on Income, as amended, or the United States-Israel Tax Treaty, the sale, exchange or disposition of ordinary shares by a person who holds the ordinary shares as a capital asset and who qualifies as a resident of the United States within the meaning of the United States- Israel Tax Treaty and who is entitled to claim the benefits afforded to such person by the United States-Israel Tax Treaty, or a Treaty United States Resident, generally will not be subject to the Israeli capital gains tax unless such Treaty United States Resident holds, directly or indirectly, shares representing 10% or more of the voting power of our company during any part of the twelve-month period preceding such sale, exchange or disposition, subject to certain conditions. A sale, exchange or disposition of shares by a Treaty United States Resident who holds, directly or indirectly, shares representing 10% or more of the voting power of our company at any time during such preceding twelve-month period would be subject to such Israeli tax, to the extent applicable; however, under the United States-Israel Tax Treaty, such Treaty United States Resident would be permitted to claim a credit for such taxes against the United States federal income tax imposed with respect to such sale, exchange or disposition, subject to the limitations in United States laws applicable to foreign tax credits. The United States-Israel Tax Treaty does not relate to state or local taxes.

Tax on Dividends

Non-residents of Israel are subject to Israeli income tax on income accrued or derived from sources in Israel or received in Israel. These sources of income include passive income such as dividends, royalties and interest, as well as non-passive income from services rendered in Israel. On distributions of dividends, other than bonus shares and stock dividends, income tax at the rate of 25% is withheld at the source, unless a different rate is provided in a treaty between Israel and the shareholder's country of residence. If the dividends are distributed out of approved enterprise earnings, the applicable tax rate would be 15%. Under the U.S.-Israel Tax Treaty, the maximum tax on dividends paid to a holder of ordinary shares who is a Treaty United States Resident will be 25%, however that tax rate is reduced to 12.5% for dividends not generated by an approved enterprise to a corporation which holds 10% or more of the voting power of our company during a certain period preceding distribution of the dividend. Dividends derived from an approved enterprise will still be subject to 15% tax withholding.

Foreign Exchange Regulations

Dividends, if any, paid to the holders of the ordinary shares, and any amounts payable upon dissolution, liquidation or winding up, as well as the proceeds of any sale in Israel of the ordinary shares to an Israeli resident, may be paid in non-Israeli currency or, if paid in Israeli currency, may be converted into freely repatriable dollars at the rate of exchange prevailing at the time of conversion, provided that Israeli income tax has been paid or withheld on such amounts.

United States Tax Considerations

United States Federal Income Taxes

The following summary describes the material U.S. federal income tax consequences to U.S. Holders (as defined below) arising from the acquisition, ownership and disposition of our ordinary shares. This summary is based on the Internal Revenue Code of 1986, as amended, or the Code, the final, temporary and proposed U.S. Treasury Regulations promulgated thereunder and administrative and judicial interpretations thereof, all as of the date hereof and all of which are subject to change (possibly with retroactive effect) or different interpretations. For purposes of this summary, a U.S. Holder will be deemed to refer only to any of the following holders of our ordinary shares:

Edgar Filing: AUDIOCODES LTD - Form 20-F

an individual who is either a U.S. citizen or a resident of the U.S. for U.S. federal income tax purposes;

a corporation or other entity taxable as a corporation for U.S. federal income tax purposes created or organized in or under the laws of the U.S. or any political subdivision thereof;

an estate the income of which is subject to U.S. federal income tax regardless of the source of its income; and

a trust, if (a) a U.S. court is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect under applicable U.S. Treasury Regulations to be treated as a U.S. person.

This summary does not consider all aspects of U.S. federal income taxation that may be relevant to particular U.S. Holders by reason of their particular circumstances, including potential application of the U.S. federal alternative minimum tax, or any aspect of state, local or non-U.S. federal tax laws or U.S. federal tax laws other than U.S. federal income tax laws. In addition, this summary is directed only to U.S. Holders that hold our ordinary shares as capital assets within the meaning of Section 1221 of the Code and does not address the considerations that may be applicable to particular classes of U.S. Holders, including financial institutions, regulated investment companies, real estate investment trusts, pension funds, insurance companies, broker-dealers, tax-exempt organizations, grantor trusts, partnerships or other pass-through entities, holders whose functional currency is not the U.S. dollar, holders who have elected mark-to-market accounting, holders who acquired our ordinary shares through the exercise of options or otherwise as compensation, holders who hold our ordinary shares as part of a straddle, hedge or conversion transaction, holders selling our ordinary shares short, holders deemed to have sold our ordinary shares in a constructive sale, and holders, directly, indirectly or through attribution, of 10% or more (by vote or value) of our outstanding ordinary shares. If a partnership (including for this purpose any entity, domestic or foreign, treated as a partnership for U.S. federal income tax purposes) is a beneficial owner of our ordinary shares, the U.S. federal income tax treatment of a partner in such partnership generally will depend upon the status of the partner and the activities of the partnership. A partnership that is a beneficial owner of our ordinary shares, and partners in such partnership, are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of the acquisition, ownership and disposition of our ordinary shares.

Each U.S. Holder should consult with its own tax advisor as to the particular tax consequences to it of the acquisition, ownership and disposition of our ordinary shares, including the effects of applicable tax treaties, state, local, foreign or other tax laws and possible changes in the tax laws.

- 101 -

Distributions With Respect to Our Ordinary Shares

For U.S. federal income tax purposes, the amount of a distribution with respect to our ordinary shares will equal the amount of cash distributed, the fair market value of any property distributed and the amount of any Israeli taxes withheld on such distribution as described below under Israeli Tax Considerations Tax on Dividends. Other than distributions in liquidation or in redemption of our ordinary shares that are treated as exchanges, a distribution with respect to our ordinary shares to a U.S. Holder generally will be treated as a dividend to the extent that the distribution does not exceed our current and accumulated earnings and profits, as determined for U.S. federal income tax purposes. The amount of any distribution that exceeds these earnings and profits will be treated first as a non-taxable return of capital, reducing the U.S. Holder's tax basis in its ordinary shares (but not below zero), and then generally as capital gain from a deemed sale or exchange of such ordinary shares. Corporate U.S. Holders generally will not be allowed a deduction under Section 243 of the Code for dividends received on our ordinary shares and thus will be subject to tax at the rate applicable to their taxable income. Currently, a noncorporate U.S. Holder's qualified dividend income generally is subject to tax at a rate of 15%. For this purpose, qualified dividend income generally includes dividends paid by a foreign corporation if, among other things, the noncorporate U.S. Holder meets certain minimum holding period requirements and either (a) the stock of such corporation is readily tradable on an established securities market in the U.S., including the Nasdaq National Market, or (b) such corporation is eligible for the benefits of a comprehensive income tax treaty with the U.S. which includes an information exchange program and is determined to be satisfactory by the U.S. Secretary of the Treasury. The U.S. Secretary of the Treasury has indicated that the income tax treaty between the U.S. and Israel is satisfactory for this purpose. Dividends paid by us will not qualify for the 15% U.S. federal income tax rate, however, if we are treated, for the tax year in which the dividends are paid or the preceding tax year, as a passive foreign investment company for U.S. federal income tax purposes. See the discussion below under the heading Passive Foreign Investment Company Status. U.S. Holders are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of their receipt of any distributions with respect to our ordinary shares.

A dividend paid by us in NIS will be included in the income of U.S. Holders at the U.S. dollar amount of the dividend, based on the spot rate of exchange in effect on the date of receipt or deemed receipt of the dividend, regardless of whether the payment is in fact converted into U.S. dollars. U.S. Holders will have a tax basis in the NIS for U.S. federal income tax purposes equal to that U.S. dollar value. Any gain or loss upon the subsequent conversion of the NIS into U.S. dollars or other disposition of the NIS will constitute foreign currency gain or loss taxable as ordinary income or loss and will be treated as U.S.-source income or loss for U.S. foreign tax credit purposes.

Dividends received with respect to our ordinary shares will constitute portfolio income for purposes of the limitation on the use of passive activity losses and, therefore, generally may not be offset by passive activity losses. Dividends received with respect to our ordinary shares also generally will be treated as investment income for purposes of the investment interest deduction limitation contained in Section 163(d) of the Code, and as foreign-source passive income for U.S. foreign tax credit purposes or, in the case of a U.S. Holder that is a financial services entity, financial services income. Subject to certain limitations, U.S. Holders may elect to claim as a foreign tax credit against their U.S. federal income tax liability any Israeli income tax withheld from distributions with respect to our ordinary shares which constitute dividends under U.S. income tax law. A U.S. Holder that does not elect to claim a foreign tax credit may instead claim a deduction for Israeli income tax withheld, but only if the U.S. Holder elects to do so with respect to all foreign income taxes in such year. In addition, special rules may apply to the computation of foreign tax credits relating to qualified dividend income, as defined above. The calculation of foreign tax credits and, in the case of a U.S. Holder that elects to deduct foreign income taxes, the availability of deductions are complex and involve the application of rules that depend on a U.S. Holder's particular circumstances. U.S. Holders are urged to consult their own tax advisors regarding the availability to them of foreign tax credits or deductions in respect of any Israeli tax withheld or paid with respect to any dividends which may be paid with respect to our ordinary shares.

Disposition of Our Ordinary Shares

Subject to the discussion below under Passive Foreign Investment Company Status, a U.S. Holder's sale, exchange or other taxable disposition of our ordinary shares generally will result in the recognition by such U.S. Holder of capital gain or loss in an amount equal to the difference between the U.S. dollar value of the amount realized and the U.S. Holder's tax basis in the ordinary shares disposed of (determined in U.S. dollars). This gain or loss will be long-term capital gain or loss if such ordinary shares have been held or are deemed to have been held for more than one year at the time of the disposition. Individual U.S. Holders currently are subject to a maximum tax rate of 15% on long-term capital gains recognized during tax years beginning on or before December 31, 2010. If the U.S. Holder's holding period on the date of the taxable disposition is one year or less, such gain or loss will be a short-term capital gain or loss. Short-term capital gains generally are taxed at the same rates applicable to ordinary income. See Israeli Tax Considerations Capital Gains Tax Applicable to Resident and Non-Resident Shareholders for a discussion of taxation by Israel of capital gains realized on sales of our ordinary shares. Any capital loss realized upon the taxable disposition of our ordinary shares generally will be deductible only against capital gains and not against ordinary income, except that noncorporate U.S. Holders generally may deduct annually from ordinary income up to \$3,000 of net capital losses. In general, any capital gain or loss recognized by a U.S. Holder upon the taxable disposition of our ordinary shares will be treated as U.S.-source income or loss for U.S. foreign tax credit purposes. However, under the tax treaty between the United States and Israel, gain derived from the taxable disposition of ordinary shares by a U.S. Holder who is a resident of the U.S. for purposes of the treaty and who sells the ordinary shares within Israel may be treated as foreign-source income for U.S. foreign tax credit purposes.

A U.S. Holder's tax basis in its ordinary shares generally will be the U.S. dollar purchase price paid by such U.S. Holder to acquire such ordinary shares. The U.S. dollar cost of ordinary shares purchased with foreign currency generally will be the U.S. dollar value of the purchase price on the date of purchase or, in the case of our ordinary shares that are purchased by a cash basis U.S. Holder (or an accrual basis U.S. Holder that so elects), on the settlement date for the purchase. Such an election by an accrual basis U.S. Holder must be applied consistently from year to year and cannot be revoked without the consent of the U.S. Internal Revenue Service. The holding period of each ordinary share owned by a U.S. Holder will commence on the day following the date of the U.S. Holder's purchase of such ordinary share and will include the day on which the ordinary share is sold by such U.S. Holder.

In the case of a U.S. Holder who uses the cash basis method of accounting and who receives NIS in connection with a taxable disposition of our ordinary shares, the amount realized will be based on the spot rate of exchange on the settlement date of such taxable disposition. If such U.S. Holder subsequently converts NIS into U.S. dollars at a conversion rate other than the spot rate in effect on the settlement date, such U.S. Holder may have a foreign currency exchange gain or loss treated as ordinary income or loss for U.S. federal income tax purposes. A U.S. Holder who uses the accrual method of accounting may elect the same treatment required of cash method taxpayers with respect to a taxable disposition of ordinary shares, provided that the election is applied consistently from year to year. Such election may not be changed without the consent of the U.S. Internal Revenue Service. If an accrual method U.S. Holder does not elect to be treated as a cash method taxpayer (pursuant to U.S. Treasury Regulations applicable to foreign currency transactions), such U.S. Holder may be deemed to have realized an immediate foreign currency gain or loss for U.S. federal income tax purposes in the event of any difference between the U.S. dollar value of the NIS on the date of the taxable disposition and the settlement date. Any such currency gain or loss generally would be treated as U.S.-source ordinary income or loss and would be subject to tax in addition to any gain or loss recognized by such U.S. Holder on the taxable disposition of ordinary shares.

Passive Foreign Investment Company Status

Generally, a foreign corporation is treated as a passive foreign investment company (PFIC) for U.S. federal income tax purposes for any tax year if, in such tax year, either (i) 75% or more of its gross income (including its pro rata share of the gross income of any company in which it is considered to own 25% or more of the shares by value) is passive in nature (the Income Test), or (ii) the average percentage of its assets during such tax year (including its pro rata share of the assets of any company in which it is considered to own 25% or more of the shares by value) which produce, or are held for the production of, passive income (determined by averaging the percentage of the fair market value of its total assets which are passive assets as of the end of each quarter of such year) is 50% or more (the Asset Test). Passive income for this purpose generally includes dividends, interest, rents, royalties and gains from securities and commodities transactions.

There is no definitive method prescribed in the Code, U.S. Treasury Regulations or relevant administrative or judicial interpretations for determining the value of a foreign corporation s assets for purposes of the Asset Test. While the legislative history of the U.S. Taxpayer Relief Act of 1997 (the 1997 Act) indicates that for purposes of the Asset Test, the total value of a publicly-traded foreign corporation s assets generally will be treated as equal to the sum of the aggregate value of its outstanding stock plus its liabilities, it is unclear whether other valuation methods could be employed to determine the value of a publicly-traded foreign corporation s assets for purposes of the Asset Test.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Based on the composition of our gross income and the composition and value of our gross assets during 2004, 2005 and 2006, we do not believe that we were a PFIC during any of such tax years. It is likely, however, that under the asset valuation method described in the legislative history of the 1997 Act, we would have been classified as a PFIC in 2001, 2002 and 2003 primarily because (a) a significant portion of our assets consisted of the remaining proceeds of our two public offerings of ordinary shares in 1999, and (b) the public market valuation of our ordinary shares during such years was relatively low. There can be no assurance that we will not be deemed a PFIC in any future tax year.

U.S. Holders are urged to consult their own tax advisors for guidance as to our status as a PFIC in any tax year. For those U.S. Holders who determine that we are a PFIC in any tax year and notify us in writing of their request for the information required in order to effectuate the QEF Election described below, we will promptly make such information available to them.

If we are treated as a PFIC for U.S. federal income tax purposes for any year during a U.S. Holder's holding period of our ordinary shares and the U.S. Holder does not make a QEF Election or a mark-to-market election (both as described below):

Excess distributions by us to a U.S. Holder would be taxed in a special way. Excess distributions with respect to any U.S. Holder are amounts received by such U.S. Holder with respect to our ordinary shares in any tax year that exceed 125% of the average distributions received by such U.S. Holder from us during the shorter of (i) the three previous years, or (ii) such U.S. Holder's holding period of our ordinary shares before the then-current tax year. Excess distributions must be allocated ratably to each day that a U.S. Holder has held our ordinary shares. A U.S. Holder must include in its gross income amounts allocated to the current tax year as ordinary income for that year, pay tax on amounts allocated to each prior tax year in which we were a PFIC at the highest rate on ordinary income in effect for such prior year and pay an interest charge on the resulting tax at the rate applicable to deficiencies of U.S. federal income tax.

The entire amount of any gain realized by a U.S. Holder upon the sale or other disposition of our ordinary shares also would be treated as an excess distribution subject to tax as described above.

The tax basis in ordinary shares acquired from a decedent who was a U.S. Holder would not receive a step-up to fair market value as of the date of the decedent's death, but instead would be equal to the decedent's basis, if lower.

Although we generally will be treated as a PFIC as to any U.S. Holder if we are a PFIC for any year during the U.S. Holder's holding period, if we cease to be a PFIC, the U.S. Holder may avoid the consequences of PFIC classification for subsequent years by electing to recognize gain based on the unrealized appreciation in its ordinary shares through the close of the tax year in which we cease to be a PFIC.

Edgar Filing: AUDIOCODES LTD - Form 20-F

A U.S. Holder who beneficially owns shares of a PFIC must file U.S. Internal Revenue Service Form 8621 (Return by a Shareholder of a Passive Foreign Investment Company or Qualified Electing Fund) with the U.S. Internal Revenue Service for each tax year in which such U.S. Holder holds shares in a PFIC. This form describes any distributions received with respect to these shares and any gain realized upon the disposition of these shares.

For any tax year in which we are treated as a PFIC, a U.S. Holder may elect to treat its ordinary shares as an interest in a qualified electing fund (a QEF Election), in which case the U.S. Holder would be required to include in income currently its proportionate share of our earnings and profits in years in which we are a PFIC regardless of whether distributions of our earnings and profits are actually made to the U.S. Holder. Any gain subsequently recognized by the U.S. Holder upon the sale or other disposition of its ordinary shares, however, generally would be taxed as capital gain and the denial of the basis step-up at death described above would not apply.

A U.S. Holder may make a QEF Election with respect to a PFIC for any tax year of the U.S. Holder. A QEF Election is effective for the tax year in which the election is made and all subsequent tax years of the U.S. Holder. Procedures exist for both retroactive elections and the filing of protective statements. A U.S. Holder making the QEF Election must make the election on or before the due date, as extended, for the filing of its U.S. federal income tax return for the first tax year to which the election will apply. A U.S. Holder must make a QEF Election by completing U.S. Internal Revenue Service Form 8621 and attaching it to its U.S. federal income tax return, and must satisfy additional filing requirements each year the election remains in effect. Upon a U.S. Holder's request, we will provide to such U.S. Holder the information required to make a QEF Election and to make subsequent annual filings.

As an alternative to a QEF Election, a U.S. Holder generally may elect to mark its ordinary shares to market annually, recognizing ordinary income or loss (subject to certain limitations) equal to the difference, as of the close of the tax year, between the fair market value of its ordinary shares and the adjusted tax basis of such shares. If a mark-to-market election with respect to ordinary shares is in effect on the date of a U.S. Holder's death, the normally available step-up in tax basis to fair market value will not be available. Rather, the tax basis of the ordinary shares in the hands of a U.S. Holder who acquired them from a decedent will be the lesser of the decedent's tax basis or the fair market value of the ordinary shares. Once made, a mark-to-market election generally continues unless revoked with the consent of the U.S. Internal Revenue Service.

The implementation of many aspects of the Code's PFIC rules requires the issuance of Treasury Regulations which in many instances have yet to be promulgated and which may have retroactive effect when promulgated. We cannot be sure that any of these regulations will be promulgated or, if so, what form they will take or what effect they will have on the foregoing discussion. **Accordingly, and due to the complexity of the PFIC rules, U.S. Holders should consult their own tax advisors regarding our status as a PFIC and the eligibility, manner and advisability of making a QEF Election or a mark-to-market election if we are treated as a PFIC.**

Information Reporting And Backup Withholding

Payments in respect of our ordinary shares that are made in the U.S. or by certain U.S.-related financial intermediaries may be subject to information reporting requirements and U.S. backup withholding tax at rates equal to 28% through 2010 and 31% after 2010. The information reporting requirements will not apply, however, to payments to certain U.S. Holders, including corporations and tax-exempt organizations. In addition, the backup withholding tax will not apply to a U.S. Holder that furnishes a correct taxpayer identification number on U.S. Internal Revenue Service Form W-9 (or substitute form). The backup withholding tax is not an additional tax. Amounts withheld under the backup withholding tax rules may be credited against a U.S. Holder's U.S. federal income tax liability, and a U.S. Holder may obtain a refund of any excess amounts withheld under the backup withholding tax rules by filing the appropriate claim for refund with the U.S. Internal Revenue Service. U.S. Holders should consult their own tax advisors regarding their qualification for an exemption from the backup withholding tax and the procedures for obtaining such an exemption, if applicable.

The foregoing discussion of certain U.S. federal income tax considerations is a general summary only and should not be considered as income tax advice or relied upon for tax planning purposes. Accordingly, each U.S. Holder should consult with its own tax adviser regarding U.S. federal, state, local and non-U.S. income and other tax consequences of the acquisition, ownership and disposition of our ordinary shares.

H. DOCUMENTS ON DISPLAY

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended, applicable to foreign private issuers and fulfill the obligations with respect to such requirements by filing reports with the Securities and Exchange Commission, or SEC. You may read and copy any document we file, including any exhibits, with the SEC without charge at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Copies of such material may be obtained by mail from the Public Reference Branch of the SEC at such address, at prescribed rates. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. Certain of our SEC filings are also available to the public at the SEC's website at <http://www.sec.gov>.

As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements, and our officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we are not required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as United States companies whose securities are registered under the Exchange Act. We have obtained an exemption from Nasdaq's requirement to send an annual report to shareholders prior to our annual general meetings. We file annual reports on Form 20-F electronically with the SEC and post a copy on our website, www.audiocodes.com.

I. *SUBSIDIARY INFORMATION*

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk for changes in interest rates relates primarily to our investment in marketable securities. Our marketable securities portfolio includes U.S. government debt instruments and corporate debt instruments. The fair value of our long and short-term securities is based upon their market values as of December 31, 2006. In addition, we have contracted several structured note deals that are sensitive to changes in interest rates. Due to the nature of our investments, we do not believe that there is any material market risk exposure. Therefore, no quantitative tabular disclosures are required. However, we may in the future undertake hedging or other similar transactions or invest in market risk sensitive instruments if management determines that it is necessary to offset these risks. See Item 3. Key Information D. Risk Factors Risks Relating to Operations in Israel.

To protect against the changes in value of forecasted foreign currency cash flows resulting from salary payments, we have instituted a foreign currency cash flow hedging program. We hedge portions of our forecasted expenses denominated in foreign currencies with forward contracts.

During 2004, we entered into forward contracts to hedge a portion of the anticipated NIS payroll payments for periods of one to six months. These forward contracts are designated as cash flows hedges, as defined by SFAS No. 133, as amended, and are all highly effective as hedges of these expenses when the salary is recorded. The effective portion of the hedged instruments is included in payroll expenses in the statement of operations. During the year ended December 31, 2004, we recognized a net income of \$87,000 related to the forward contracts hedging salary payments. At December 31, 2004, we expected to reclassify \$353,000 of net profit on derivative instruments from accumulated other comprehensive income to earnings during the next twelve months.

During the year ended December 31, 2005, we recognized a net loss of \$151,000 related to the forward contracts hedging salary payments. At December 31, 2005, we expected to reclassify \$84,000 of net profit on derivative instruments from accumulated other comprehensive income to earnings during the next twelve months.

During the year ended December 31, 2006, we recognized a net income of \$1,105,000 related to the forward contracts hedging salary payments. At December 31, 2006, we expected to reclassify \$122,000 of net profit on derivative instruments from accumulated other comprehensive income to earnings during the next twelve months.

ITEM 15T. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this report, we performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rule 15d-15(e) under the Exchange Act). The evaluation was performed with the participation of our key corporate senior management and under the supervision and with the participation of our chief executive officer and chief financial officer. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms and (ii) accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting

Our management, including our chief executive officer and chief financial officer, is responsible for establishing and maintaining adequate internal control over our financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act. Our internal control system was designed to provide reasonable assurance to our management and our board of directors regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements for external purposes in accordance with generally accepted accounting principles. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurances with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may decline.

Our management (with the participation of our chief executive officer and chief financial officer) conducted an evaluation, pursuant to Rule 13a-15(c) under the Exchange Act, of the effectiveness, as of the end of the period covered by this Annual Report, of our internal control over financial reporting based on the criteria set forth in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the results of this evaluation, management assessed the effectiveness of our internal control over financial reporting as at December 31, 2006 and concluded that our internal control over financial reporting was effective as of December 31, 2006.

This Annual Report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the SEC that permit us to provide only management's report in this Annual Report.

Changes in Internal Control over Financial Reporting

In addition, no changes in our internal control over financial reporting have occurred during the period covered by this Annual Report that have materially affected our internal controls over financial reporting.

ITEM 16. [RESERVED]

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our Board of Directors has determined that Joseph Tenne is an audit committee financial expert as defined in Item 16A of Form 20-F and is independent as defined in the applicable regulations.

ITEM 16B. CODE OF ETHICS

In 2004, we adopted a Code of Conduct and Business Ethics that applies to our chief executive officer, chief financial officer and other senior financial officers. This Code has been posted on our website, www.audiocodes.com.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Kost Forer Gabbay & Kasierer, a member of Ernst & Young Global, has served as our independent public accountants for each of the years in the three-year period ended December 31, 2006. The following table presents the aggregate fees for professional audit services and other services rendered by Kost Forer Gabbay & Kasierer in 2005 and 2006.

	Year ended December 31, (Amounts in thousands)	
	2005	2006
Audit Fees	\$ 115	\$ 191
Audit Related Fees	51	314
Tax Fees	65	129
All Other Fees	4	1
	_____	_____
Total	\$ 235	\$ 635
	_____	_____

Audit Fees consist of fees billed for the annual audit of the company's consolidated financial statements and the statutory financial statements of the company. They also include fees billed for other audit services, which are those services that only the external auditor reasonably can provide, and include the provision of consents and the review of documents filed with the SEC.

Audit Related Fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of the company's financial statements and include operational effectiveness of systems. They also include fees billed for other services in connection with merger and acquisition due diligence, as well as our filing of a registration statement on Form F-3 with respect to our convertible notes.

Tax Fees include fees billed for tax compliance services, including the preparation of tax returns and claims for refund; tax consultations, such as assistance and representation in connection with tax audits and appeals, transfer pricing, and requests for rulings or technical advice from taxing authorities; tax planning services; and expatriate tax compliance, consultation and planning services.

Audit Committee Pre-approval Policies and Procedures

The Audit Committee of AudioCodes Board of Directors is responsible, among other matters, for the oversight of the external auditor subject to the requirements of Israeli law. The Audit Committee has adopted a policy regarding pre-approval of audit and permissible non-audit services provided by our independent auditors (the Policy).

Under the Policy, proposed services either (i) may be pre-approved by the Audit Committee without consideration of specific case-by-case services as general pre-approval; or (ii) require the specific pre-approval of the Audit Committee as specific pre-approval. The Audit Committee may delegate either type of pre-approval authority to one or more of its members. The appendices to the Policy set out the audit, audit-related, tax and other services that have received the general pre-approval of the Audit Committee, including those described in the footnotes to the table, above; these services are subject to annual review by the Audit Committee. All other audit, audit-related, tax and other services must receive a specific pre-approval from the Audit Committee.

Edgar Filing: AUDIOCODES LTD - Form 20-F

The Audit Committee establishes budgeted fee levels annually for each of the four categories of audit and non-audit services that are pre-approved under the Policy, namely, audit, audit-related, tax and other services. Requests or applications to provide services that require specific approval by the Audit Committee are submitted to the Audit Committee by both the external auditor and the chief financial officer. At each regular meeting of the Audit Committee, the external auditor provides a report in order for the Audit Committee to review the services that the external auditor is providing, as well as the status and cost of those services.

During 2006, no services provided to AudioCodes by Kost Forer Gabbay & Kasierer were approved by the Audit Committee pursuant to the de minimis exception to the pre-approval requirement provided by paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

[LETTERHEAD]

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of:
Nuera Communications, Inc.

We have audited the consolidated balance sheet of Nuera Communications, Inc. as of December 31, 2006, and the related consolidated statements of operations, stockholders' deficit and cash flows for the period July 6, 2006 through December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

Edgar Filing: AUDIOCODES LTD - Form 20-F

We conducted our audit in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Nuera Communications, Inc. as of December 31, 2006 and the results of its operations and its cash flows for the period July 6, 2006 through December 31, 2006 in conformity with accounting principles generally accepted in the United States of America.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the board of directors and Shareholders of

AudioCodes LTD.

We have audited the accompanying consolidated balance sheets of AudioCodes Ltd. (the Company) and its subsidiaries as of December 31, 2005 and 2006, and the related consolidated statements of operations, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of a wholly-owned subsidiary, which statements reflect total assets of 2% as of December 31, 2006, and total revenues of 5% for the period from July 6, 2006 through December 31, 2006. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for this subsidiary, is based solely on the report of the other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries at December 31, 2005 and 2006, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 2 v to the consolidated financial statement, in 2006 the company adopted Statement Financial Accounting Standards Board No. 123(Revised 2004) Share Base Payment .

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data**NOTE 1: GENERAL**

a. Business overview:

AudioCodes Ltd. (the Company) and its subsidiaries (together the Group) designs, develops and markets Voice over Packet (VOP) technology, voice network products, and applications to original equipment manufacturers, network equipment providers, service providers and system integrators worldwide.

The Company operates through its wholly-owned subsidiaries in the United States, United Kingdom, France, Germany, Argentina, Brazil, India, Japan and Korea.

b. Acquisition of AudioCodes USA Inc. (Formerly known as AI-Logix Inc.)

On May 12, 2004, the Group acquired all of the outstanding common stock of AudioCodes USA Inc., a provider of advanced voice and data recording hardware integration cards for the call recording and voice or data logging industry.

The Group paid \$10,000 in cash at the closing of the transaction. An additional payment of \$10,000 in cash was made in March 2005 based on the achievement of revenue milestones and additional terms by the AudioCodes USA Inc. business during 2004 and 2005. This payment was recorded as part of the acquisition cost as additional goodwill in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 141 Business Combination .

The results of AudioCodes USA Inc. have been included in the consolidated financial statements of the Group since the acquisition date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 1: GENERAL (Cont.)

Based upon an independent valuation of tangible and intangible assets acquired, the Group has allocated the total acquisition cost of AudioCodes USA Inc. s assets and liabilities, as follows:

	<u>May 12, 2004</u>
Trade receivables	\$ 1,846
Inventories	1,680
Prepaid expenses	180
Property and equipment	329
	<u>4,035</u>
Technology (five years useful life)	3,100
Goodwill	13,815
	<u>16,915</u>
Total tangible and intangible assets acquired	<u>20,950</u>
Trade payables	(1,015)
Accrued expenses	(1,045)
Other current liabilities	(206)
	<u>(2,266)</u>
Total liabilities assumed	<u>(2,266)</u>
Net assets acquired	<u>\$ 18,684</u>

Goodwill includes, but is not limited to, the synergistic value and potential competitive benefits that could be realized by the Company from the acquisition. Goodwill is not deductible for tax purposes. In accordance with SFAS No. 142, goodwill arising from this acquisition will not be amortized (see also Note 2n).

The value assigned to tangible assets, intangible assets and liabilities has been determined as follows:

Current assets and liabilities are recorded at their carrying amounts. The carrying amounts of current assets and liabilities were reasonable proxies for their market value due to their short-term maturity. Property and equipment are presented at current replacement cost. The fair value of technology was determined using the income approach.

The following unaudited pro forma information does not purport to represent what the Group s results of operations would have been had the acquisition of AudioCodes USA Inc. been consummated on January 1, 2004, nor does it purport to represent the results of operations of the Group for any future period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: GENERAL (Cont.)

	Year ended December 31, 2004
	Unaudited
Revenues	\$ 88,125
Net income	\$ 4,831
Basic net earnings per share	\$ 0.13
Diluted net earnings per share	\$ 0.11

c. Acquisition of Nuera Communication Inc.:

On July 6, 2006, the Group acquired all of the outstanding common stock of Nuera Communication Inc, a leading provider of Voice over Internet Protocol (VoIP) infrastructure solutions for broadband and long distance with an extensive client base in North America as well as in Asia and Europe.

The Group paid \$ 82,520 in cash at the closing of the transaction including acquisition costs in the amount of \$2,376.

Nuera Communication Inc. became a wholly-owned subsidiary of AudioCodes Inc. and accordingly, its results of operations have been included in the consolidated financial statements of the Group since the acquisition date.

This acquisition was accounted for under the purchase method of accounting in accordance with SFAS No. 141.

Based upon an independent valuation of tangible and intangible assets acquired, the Group has allocated the total acquisition cost of Nuera Communication Inc. s assets and liabilities, as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 1: GENERAL (Cont.)

	<u>July 6, 2006</u>

Diluted net earnings (loss) per share	\$ 0.28	\$ (0.14)

d. Acquisition of Netrake Corporation Inc.:

On August 14, 2006, the Group acquired all of the outstanding common stock of Netrake Corporation Inc, a leading provider of Session Border Controller (SBC) and Security Gateway solutions. SBC's enable connectivity, policies and security for real-time applications such as VoIP and video when traversing IP to IP networks. Security Gateways enable secure real-time session across wifi, broadband and wireless networks in Field Mobile Convergence (FMC) deployments.

The Group paid \$13,836 in cash at the closing of the transaction including acquisition costs in the amount of \$649.

Netrake Corporation Inc. became a wholly-owned subsidiary of AudioCodes Inc. and accordingly, its results of operations have been included in the consolidated financial statements of the Group since the acquisition date.

This acquisition was accounted for under the purchase method of accounting in accordance with SFAS No. 141.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Goodwill is not deductible for tax purposes. In accordance with SFAS No. 142, goodwill arising from this acquisition will not be amortized (see also Note 2n).

The value assigned to tangible assets, intangible assets and liabilities has been determined as follows:

Deferred tax liabilities in the amount of \$2,310 were recorded for the difference between the assigned values and the tax bases of the intangible assets acquired in the acquisition.

Edgar Filing: AUDIOCODES LTD - Form 20-F

Current assets and liabilities are recorded at their carrying amounts. The carrying amounts of current assets and liabilities were reasonable proxies for their market value due to their short-term maturity. Property and equipment are presented at current replacement cost. The fair value of intangible assets was determined using the income approach.

F - 14

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 1: GENERAL (Cont.)

The following unaudited pro forma information does not purport to represent what the Group's results of operations would have been had the acquisition of Netrake Corporation Inc. been consummated on January 1, 2005, nor does it purport to represent the results of operations of the Group for any future period.

	Year ended December 31,	
	2005	2006
	Unaudited	Unaudited
Revenues	\$ 121,201	\$ 151,690
Net loss	\$ (1,274)	\$ (8,311)
Basic net loss per share	\$ (0.03)	\$ (0.20)
Diluted net loss per share	\$ (0.03)	\$ (0.20)

- e. The Group is dependent upon sole source suppliers for certain key components used in its products, including certain digital signal processing chips. Although there is a limited number of manufacturers of these particular components, management believes that other suppliers could provide similar components at comparable terms. A change in suppliers, however, could cause a delay in manufacturing and a possible loss of sales, which could adversely affect the operating results of the Group and its financial position.
- f. As to a major customer data, see Note 16b.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States ("U.S. GAAP").

- a. Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

- b. Financial statements in U.S. dollars:

A majority of the revenues of the Group is generated in U.S. dollars (dollar). In addition, a substantial portion of the Group's costs is incurred in dollars. The Group's management believes that the dollar is the primary currency of the economic environment in which all the Group's entities operate. Thus, the functional and reporting currency of each of the Group's entities is the dollar.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

Accordingly, monetary accounts maintained in currencies other than the dollar are remeasured into U.S. dollars in accordance with SFAS No. 52, Foreign Currency Translation . All transaction gains and losses of the remeasured monetary balance sheet items are reflected in the statements of operations as financial income or expenses, as appropriate.

c. Principles of consolidation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Intercompany transactions and balances have been eliminated upon consolidation.

d. Cash equivalents:

Cash equivalents are short-term highly liquid investments that are readily convertible into cash with maturities of three months or less, at the date acquired.

e. Short-term bank deposits:

Short-term bank deposits are deposits with maturities of more than three months but less than one year. The deposits are in U.S. dollars and bear interest at an average rate of 5.18%. The short-term deposits are presented at their cost. The accrued interest is included in other receivables and prepaid expenses.

f. Marketable securities:

The Company accounts for investments in debt securities in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities .

Management determines the appropriate classification of its investments in marketable debt securities at the time of purchase and evaluates such determinations at each balance sheet date. Debt securities are classified as held-to-maturity since the Company has the intent and ability to hold the securities to maturity and, accordingly, debt securities are stated at amortized cost.

The amortized cost of held-to-maturity securities is adjusted for amortization of premiums and accretion of discounts to maturity. Such amortization and interest are included in the consolidated statement of income as financial income or expenses, as appropriate. The accrued interest on short-term and long-term marketable securities is included in the balance of short-term marketable securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

g. Inventories:

Inventories are stated at the lower of cost or market value. Cost is determined as follows:

Raw materials using the average cost method.

Finished products using the average cost method with the addition of direct manufacturing costs.

The Group periodically evaluates the quantities on hand relative to current and historical selling prices and historical and projected sales volume and technological obsolescence. Based on these evaluations, inventory write-offs and write-down provisions are provided due to slow moving items, technological obsolescence, excess inventories, discontinued products and for market prices lower than cost.

h. Long-term bank deposits:

Bank deposits with maturities of more than one year are included in long-term investments and presented at their cost including accrued interest. The deposits are in U.S. dollars and bear interest at an average rate of 5.10%. The Long-term deposits are presented at their cost. The accrued interest is included in other receivables and prepaid expenses.

i. Structured notes:

The Group accounts for investments in structured notes in accordance with SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities and Emerging Issues Task Force (EITF) Issue No. 96-12, Recognition of Interest Income and Balance Sheet Classification of Structure Notes . Management determines the appropriate classification of its investments in debt securities at the time of purchase and reevaluates such determinations at each balance sheet date. Debt securities are classified as held-to-maturity when the Group has the intent and ability to hold these securities to maturity and are stated at amortized cost. As of December 31, 2005 and 2006, investments in structured notes approximate their market value.

j. Investment in companies:

The Company accounts for its investments in companies in which it has the ability to exercise significant influence over the operating and financial policies, using the equity method of accounting in accordance with the requirements of Accounting Principle Board (APB) No. 18, The Equity Method of Accounting for Investments in Common Stock . If the Company does not have the ability to exercise significant influence over operating and financial policies of these companies, the investment in these companies is stated at cost.

Investment in companies represents investments in Ordinary shares, Preferred shares and convertible loans. The Company applies EITF No. 99-10, Percentage Used to Determine the Amount of Equity Method Losses . Accordingly, losses of such companies are recognized based on the ownership level of the particular security held by the investor.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company's investments are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable, in accordance with APB No. 18. As of December 31, 2006, based on management's most recent analyses, no impairment losses have been identified.

k. Property and equipment:

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated by the straight-line method over the estimated useful lives of the assets, at the following annual rates:

	%
Computers and peripheral equipment	33
Office furniture and equipment	6 - 20
Motor vehicles	15
Leasehold improvements	Over the shorter of the term of the lease or the life of the asset

l. Intangible assets and deferred charges:

Intangible assets are amortized over their useful life using a method of amortization that reflects the pattern in which the economic benefits of the intangible assets are consumed or otherwise used up, in accordance with SFAS No. 142 Goodwill and Other Intangible Assets. Amortization is calculated by the straight-line method over the estimated useful lives of the assets as follows:

	Years
Acquired technology	5-10
Customer relationship	9
Backlog	1-2
Trade name	3
Existing contracts for maintenance	3

Cost incurred in respect of issuance of senior convertible notes are deferred and amortized using the effective interest method and classified as a component of interest expense, over the period from issuance to maturity, which is 20 years, in accordance with APB No. 21 Interest on Receivables and Payables.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

m. Impairment of long-lived assets:

The Group's long-lived assets and certain identifiable intangibles are reviewed for impairment in accordance with SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets, whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the undiscounted future cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. As of December 31, 2006, no impairment losses have been identified.

Under SFAS No. 144, a long-lived group of assets that is to be abandoned is considered disposed of when it ceases to be used. Thus, an entity that intends to abandon a group of long-lived assets in operations should evaluate that group of assets as held and used and should determine whether it should revise its depreciation estimates to reflect a useful life that is shorter than initially expected and a salvage value consistent with the intention to abandon.

n. Goodwill:

Goodwill represents an excess of costs over the fair value of the net assets of businesses acquired under SFAS No. 142.

SFAS No. 142 requires goodwill to be tested for impairment at least annually or between annual tests in certain circumstances, and written down when impaired, rather than being amortized as previous accounting standards required. Goodwill is tested for impairment at the reporting unit level by comparing the fair value of the reporting unit with its carrying value.

Fair value is determined using market capitalizations. The Company elected to perform its analysis of goodwill impairment during the fourth quarter of 2006. The test was based on the Group's single operating segment and reporting unit structure. As of December 31, 2006, no impairment losses had been identified.

o. Revenue recognition:

The Group generates its revenues primarily from the sale of products, through a direct sales force and sales representatives. The Group's products are delivered to its customers, which include original equipment manufacturers, network equipment providers, systems integrators and distributors in the telecommunications and networking industries, all of whom are considered end-users.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

Revenues from products are recognized in accordance with Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition in Financial Statements , when the following criteria are met: persuasive evidence of an arrangement exists, delivery of the product has occurred, the fee is fixed or determinable, and collectibility is probable. The Group has no obligation to customers after the date in which products are delivered other than pursuant to warranty obligations and right of return.

The Group generally grants to its customers a right of return or the ability to exchange a specific percentage of the total price paid for products they have purchased over a period of three months for other products. The Group maintains a provision for product returns and exchanges based on its experience with historical sales returns, analysis of credit memo data and other known factors, in accordance with SFAS No. 48, Revenue Recognition When Right of Return Exists . The provision was deducted from revenues and amounted to \$619, \$545 and \$636 as of December 31, 2004, 2005 and 2006, respectively.

Revenues from the sale of products which were not yet determined to be final sales due to market acceptance or technological compatibility were deferred and included in deferred revenues.

p. Warranty costs:

The Group generally provides a warranty period of 12 months, at no extra charge. The Group estimates the costs that may be incurred under its basic limited warranty and records a liability in the amount of such costs at the time product revenue is recognized. Factors that affect the Group's warranty liability include the number of installed units, historical and anticipated rates of warranty claims, and cost per claim. The Group periodically assesses the adequacy of its recorded warranty liability and adjusts the amount as necessary. A tabular reconciliation of the changes in the Company's aggregate product warranty liability was not provided due to immateriality.

q. Research and development costs:

Research and development costs, net of grants received, are charged to the statement of income as incurred.

r. Income taxes:

The Group accounts for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes . This Statement prescribes the use of the asset and liability method whereby account balances of deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Group provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

s. Concentrations of credit risk:

Financial instruments that potentially subject the Group to concentrations of credit risk consist principally of cash and cash equivalents, bank deposits, structured notes, marketable securities and trade receivables.

The majority of the Group's cash and cash equivalents, bank deposits and structured notes are invested in U.S. dollar instruments with major banks in Israel and the United States. Such investments in the United States may be in excess of insured limits and are not insured in other jurisdictions. Management believes that the financial institutions that hold the Group's investments are financially sound and, accordingly, minimal credit risk exists with respect to these financial investments.

Marketable securities include investments in debentures of corporations, U.S. government and agencies. Management believes that those corporations and agencies are financially sound, the portfolio is well diversified, and accordingly, minimal credit risk exists with respect to these marketable debt securities.

The trade receivables of the Group are derived from sales to customers located primarily in the Americas, the Far East, Israel and Europe. The Group performs ongoing credit evaluations of its customers and to date has not experienced any material losses. An allowance for doubtful accounts is determined with respect to those amounts that the Group has determined to be doubtful of collection. The Group usually does not require collateral on trade receivables because most of its sales are to large and well-established companies.

t. Senior convertible notes:

The Company presents the outstanding principal amount of its senior convertible notes as a long-term liability, in accordance with APB No. 14 Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants. The debt is classified as a long-term liability until the date of conversion on which it would be reclassified to equity, or at the first contractual redemption date, on which it would be reclassified as a short-term liability. Accrued interest on the senior convertible notes is included in other payables and accrued expenses.

The Initial Purchasers discount is recorded as a discount to the debt and amortized according to the interest method over the term of the senior convertible notes in accordance with EITF Issue No. 00-27 Application of Issue No. 98-5 to Certain Convertible Industries, which is 20 years.

u. Basic and diluted net earnings per share:

Basic net earnings per share are computed based on the weighted average number of Ordinary shares outstanding during each year. Diluted net earnings per share are computed based on the weighted average number of Ordinary shares outstanding during each year, plus potential dilutive Ordinary shares considered outstanding during the year, in accordance with SFAS No. 128, Earnings Per Share.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data**NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

Senior convertible notes and certain outstanding stock options and warrants have been excluded from the calculation of the diluted net earnings per Ordinary share since such securities are anti-dilutive for all years presented. The total weighted average number of shares related to the senior convertible notes and outstanding options and warrants that have been excluded from the calculations of diluted net earnings per share was 4,972,991, 8,598,556 and 9,924,624 for the years ended December 31, 2004, 2005 and 2006, respectively.

v. Equity-based compensation expenses:

On January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123(R)) which requires the measurement and recognition of compensation expense based on estimated fair values for all share-based payment awards made to employees and directors. SFAS No. 123(R) supersedes APB No. 25, Accounting for Stock Issued to Employees , for periods beginning in fiscal year 2006. In March 2005, the Securities and Exchange Commission issued SAB No. 107 relating to SFAS No. 123(R). The Company has applied the provisions of SAB No. 107 in its adoption of SFAS No. 123(R).

SFAS No. 123(R) requires companies to estimate the fair value of equity-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense in the Company s consolidated income statements over the requisite service periods.

Prior to the adoption of SFAS No. 123(R), the Company accounted for equity-based awards to employees and directors using the intrinsic value method in accordance with APB No. 25 as allowed under SFAS No. 123, Accounting for Stock-Based Compensation. The Company recognized compensation expenses, which had graded vesting, based on the accelerated attribution method over the requisite service period of each of the awards. Forfeitures were accounted for as occurred. During 2004 and 2005 the Company recorded compensation expenses in the amount of \$66 and \$36, respectively.

The Company adopted SFAS No. 123(R) using the modified prospective transition method, which requires the application of the accounting standard starting from January 1, 2006, the first day of the Company s fiscal year 2006. Under that transition method, compensation cost recognized in the year ended December 31, 2006, includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123(R). Results for prior periods have not been restated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company recognizes compensation expenses for the value of its awards based on the accelerated method over the requisite service period of each of the awards, net of estimated forfeitures. SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Estimated forfeitures are based on actual historical pre-vesting forfeitures.

The effect of adopting SFAS No. 123(R) on January 1, 2006, was a decrease in the Company's income before taxes on income and net income for the year ended December 31, 2006, of \$8,707 with a corresponding decrease in the basic and diluted net earnings per share of \$0.21 and \$0.19 respectively.

Pro forma information regarding the Group's net income (loss) and net earnings (loss) per share is required by SFAS No. 123 and has been determined as if the Group had accounted for its employee stock options under the fair value method prescribed by SFAS No. 123.

The fair value for these options was estimated at the date of grant using the Black and Scholes option pricing model and amortized over the vesting period. Fair values were estimated using the following weighted-average assumptions:

	2004	2005
Dividend yield	0%	0%
Expected volatility	87%	75%
Risk-free interest	3%	4%
Expected life	4 years	4.5 years

The Black-Scholes pricing-model was used to estimate the fair value of the Employee Stock Purchase Plan (ESPP) compensation. Assumptions are not provided due to immateriality.

Pro forma information under SFAS No. 123 is as follows:

	Year ended December 31,	
	2004	2005
Net income as reported	\$ 5,006	\$ 13,436
Add: stock-based compensation expenses determined under the intrinsic value based method included in the reported net income	66	36
Deduct: stock-based compensation expenses determined under the fair value based method for all awards	(8,509)	(8,869)
Pro forma net income (loss)	\$ (3,437)	\$ 4,603
Basic net earnings per share as reported	\$ 0.13	\$ 0.33
Diluted net earnings per share as reported	\$ 0.12	\$ 0.31

Edgar Filing: AUDIOCODES LTD - Form 20-F

	<u>Year ended December 31,</u>	
Pro forma basic net earning (loss) per share	\$ (0.09)	\$ 0.11
Pro forma diluted net earning (loss) per share	\$ (0.09)	\$ 0.11

F - 23

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

As of December 31, 2006, the total unrecognized estimated compensation cost related to non-vested stock options granted prior to that date was \$12,381, which is expected to be recognized over a weighted-average period of 1.6 years. The total intrinsic value of stock options exercised during 2006 was \$4,790. The Company recorded cash received from the exercise of stock options of \$6,515 during the year ended December 31, 2006.

The weighted-average estimated fair value of employee stock options and Employee Stock Purchase Plan granted during the 12 months ended December 31, 2006, was \$ 5.81, per share using the Black-Scholes option pricing formula with the following weighted-average assumptions (annualized percentages):

	Year ended December 31, 2006
Dividend yield	0%
Expected volatility	61.9%
Risk-free interest	4.6%
Expected life	4.8 years

The Company is required to assume a dividend yield as an input in the Black-Scholes model. The dividend yield assumption is based on the Company's historical experience and expectation of future dividend payouts and may be subject to substantial change in the future. The dividend yield used for the twelve months ended December 31, 2006 was 0%.

The computation of volatility uses historical volatility derived from the company's exchange traded shares. As a result of the above-mentioned calculations, the weighted-average volatility used for the twelve months ended December 31, 2006 was 61.9%.

The risk-free interest rate assumption is the implied yield currently available on United States treasury zero-coupon issues with a remaining term equal to the expected life term of the Company's options. Weighted average interest rate used for the twelve months ended December 31, 2006 was 4.6%.

The Company determined the expected life of the options according to the simplified method, average of vesting and the contractual term of the Company's stock options. Expected life used for the twelve months ended December 31, 2006 was 4.8 years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company's aggregate compensation cost for the twelve months ended December 31, 2006 totaled \$8,707 thousand. The total income tax benefit recognized in the income statement for the twelve months ended December 31, 2006 was \$0, for the Company's equity-based compensation arrangements.

The total equity-based compensation expense related to all of the Company's equity-based awards, recognized for twelve months ended December 31, 2006, was comprised as follows:

	Year ended December 31, 2006
Cost of goods sold	\$ 620
Research and development	3,053
Selling and Marketing	3,628
General and administrative	1,406
	<hr/>
Total equity-based compensation expense before taxes	\$ 8,707

The Group applies SFAS No. 123 and EITF No. 96-18 "Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services", with respect to options and warrants issued to non-employees. SFAS No. 123 requires the use of option valuation models to measure the fair value of the options and warrants at the measurement date.

w. Severance pay:

The Group's liability for severance pay for Israeli employees is calculated pursuant to Israel's Severance Pay Law, based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. Employees are entitled to one month's salary for each year of employment, or a portion thereof. The Group's liability for all of its Israeli employees is fully provided for by monthly deposits with severance pay funds, insurance policies and by an accrual.

The deposited funds include profits accumulated up to the balance sheet date. The deposited funds may be withdrawn only upon the fulfillment of the obligation pursuant to Israel's Severance Pay Law or labor agreements. The value of the deposited funds is based on the cash surrender value of these policies and includes immaterial profits.

Severance pay expenses for the years ended December 31, 2004, 2005 and 2006, amounted to approximately \$1,182, \$1,514 and \$1,766, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data**NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)**

x. Employees benefit plan

The Company has four 401(K) defined contribution plans covering certain employees in the U.S. All eligible employees may elect to contribute up to 100%, but generally not greater than \$ 15 per year (\$20 including catch-up contributions for eligible participants over the age of 50), of their annual compensation to the plan through salary deferrals, subject to IRS limits. Effective from January 1, 2006 the Company matches employees contributions to the plan up to limit of 3.75% of their eligible compensation, subject to IRS limits. In 2006 the Company matched contributions in the amount of \$ 271.

y. Advertising expenses:

Advertising expenses are charged to the statements of operations as incurred. Advertising expenses for the years ended December 31, 2004, 2005 and 2006, amounted to \$359, \$371 and \$402, respectively.

z. Fair value of financial instruments:

The following methods and assumptions were used by the Group in estimating its fair value disclosures for financial instruments:

The carrying amounts of cash and cash equivalents, trade receivables and trade payables approximate their fair value due to the short-term maturity of such instruments.

The carrying amounts of bank deposits and structured notes are estimated by discounting the future cash flows using current interest rates for deposits of similar terms and maturities. The carrying amount of long-term deposits approximates their fair value.

The fair value of marketable securities is based on quoted prices and do not differ significantly from the carrying amount (see Note 4).

The fair value of senior convertible notes is based on quoted market values and prevailing market rates, and approximates their carrying amount.

The fair value of foreign currency contracts (used for hedging purposes) is estimated by obtaining current quotes from banks.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

aa. Derivative instruments:

SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires a company to recognize all of its derivative instruments as either assets or liabilities in the statement of financial position at fair value. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and also on the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments, a company must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, cash flow hedge or a hedge of a net investment in a foreign operation.

The Group uses derivative instruments to manage exposures to foreign currency related to salary payments denominated in New Israeli Shekel (NIS). The Group's objectives for holding derivatives are to minimize risks.

For those derivative instruments that are designated and qualify as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same line item associated with the forecasted transaction in the same period or periods during which the hedged transaction affects earnings.

Since the amounts of forward transactions do not exceed salary payments, those transactions are all highly effective and the results are recorded as payroll expenses at the time that the hedge against the risk of overall changes in cash flows resulting from forecasted foreign currency salary payments during the year. The Company has instituted a foreign currency cash flow hedging program. The Company hedges portions of its forecasted expenses denominated in NIS with forward and put and call options (zero cost collar). These option contracts are designated as cash flow hedges, as defined by SFAS No. 133 and Derivative Implementation Group No. G20. Cash Flow Hedges Assessing and Measuring the Effectiveness of a Purchased option Used in a Cash Flow Hedge. (DIG 20) and are all effective.

At December 31, 2006, the Group expects to reclassify \$122 of net gains on derivative instruments from accumulated other comprehensive income to income during the next nine months due to actual payment of variable interest associated with the floating rate debt.

ab. Impact of recently issued accounting standards:

1. FIN No 48

In July 2006, the FASB issued FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (FIN No 48). FIN No 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 utilizes a two-step approach for evaluating tax positions. Recognition (step one) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) is only addressed if step one has been satisfied (i.e., the position is more-likely-than-not to be sustained). Under step two, the tax benefit is measured as the largest amount of benefit, determined on a cumulative probability basis that is more-likely-than-not to be realized upon ultimate settlement.

FIN No 48 applies to all tax positions related to income taxes subject to the FASB No. 109, Accounting for income taxes . This includes tax positions considered to be routine as well as those with a high degree of uncertainty.

FIN No 48 has expanded disclosure requirements which include a tabular roll forward of the beginning and ending aggregate unrecognized tax benefits as well as specific detail related to tax uncertainties for which it is reasonably possible the amount of unrecognized tax benefit will significantly increase or decrease within twelve months. These disclosures are required at each annual reporting period unless a significant change occurs in an interim period.

FIN No 48 is effective for fiscal years beginning after December 15, 2006. The cumulative effect of applying FIN No 48 will be reported as an adjustment to the opening balance of retained earnings.

The Company is currently evaluating the effect of the adoption of FIN 48 on its financial statements.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES (Cont.)

2. SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements . This statement provides a single definition of fair value, a framework for measuring fair value, and expanded disclosures concerning fair value. Previously, different definitions of fair value were contained in various accounting pronouncements creating inconsistencies in measurement and disclosures. SFAS No. 157 applies under those previously issued pronouncements that prescribe fair value as the relevant measure of value, except SFAS No. 123(R) and related interpretations. The statement does not apply to accounting standards that require or permit measurement similar to fair value but are not intended to measure fair value. This pronouncement is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact of adopting SFAS No 157.

3. SFAS No. 159

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities . SFAS No. 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, although earlier adoption is permitted. The Company is currently evaluating the impact that SFAS No. 159 will have on its consolidated financial statements.

NOTE 3: BANK DEPOSITS AND STRUCTURED NOTES

Bank deposits and structured notes are composed as follows:

	December 31,			
	2005	2006	2005	2006
	Weighted average interest			
Short-term bank deposits (in U.S. dollars)	3.42%	5.18%	\$ 55,000	\$ 10,700
Structured notes (1)	-	-	6,929	17,958
			61,929	28,658
Long-term bank deposits (in U.S. dollars)	-	5.10%	-	20,287

NOTE 3: BANK DEPOSITS AND STRUCTURED NOTES (Cont.)

- (1) As of December 31, 2006, the Group has callable structured notes at par value totaling \$ 18,000 for settlement during 2007 from several banks. Under the arrangements with the banks, whether or not the structured notes bear interest depends upon the rate of the three months to one year LIBOR.

For each day in which the relevant LIBOR rate is below an agreed annual fixed rate, which ranges from 2.5% to 4.5% the structured notes bear interest at the rate of 3.2% to 4.5% per annum. On all other days, the structured notes do not bear any interest. As of December 31, 2006, investments in structured notes securities approximate their market value.

- (2) As of December 31, 2006, the Group has callable structured notes at par value totaling \$10,000 for settlement during 2010. Under the arrangements with the bank, whether or not the structured notes bear interest depends upon the six month LIBOR rate.

For each day in which the relevant LIBOR rate is below an agreed annual fixed rate, which ranges from 5.25% to 6% the structured notes bear interest at the rate of 5.75% per annum. On all other days, the structured notes bear interest at the rate of 2.5%. As of December 31, 2006, investments in structured notes securities approximate their market value.

NOTE 4: MARKETABLE SECURITIES AND ACCRUED INTEREST

The following is a summary of held to maturity marketable securities.

	December 31,					
	2005			2006		
	Amortized cost	Net unrealized losses	Market Value	Amortized cost	Net unrealized losses	Market Value
Corporate debentures:

	<u>\$ 59,654</u>	<u>\$ 452</u>	<u>\$ 59,202</u>	<u>\$ 49,364</u>	<u>\$ 307</u>	<u>\$ 49,057</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 4: MARKETABLE SECURITIES AND ACCRUED INTEREST (Cont.)

The unrealized losses on the Company's investments in all types of securities are due to interest rate increases. The contractual cash flows of these investments are either guaranteed by the U.S. government or an agency of the U.S. government or were issued by highly rated corporations. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost of the Company's investment. Since the Company has the ability and intent to hold these investments until a recovery of fair value, which may be until maturity, the Company does not consider these investments to be other-than-temporarily impaired as of December 31, 2006.

Out of the unrecognized loss as of December 31, 2006, \$174 is outstanding more than twelve months and \$133 are less than twelve months.

The Company sold held-to-maturity marketable securities during the year ended December 31, 2006 in the amount of \$ 979. The marketable securities were sold before their maturity, due to deterioration in their credit rating. As a result of the sale, the Company recorded an immaterial loss during the period.

NOTE 5: INVENTORIES

	December 31,	
	2005	2006
Raw materials	\$ 4,598	\$ 5,431
Finished products	6,964	10,662
	<u>\$ 11,562</u>	<u>\$ 16,093</u>

In the years ended December 31, 2004, 2005 and 2006, the Group increased its reserve for obsolete inventory in a total amount of \$1,237 \$1,168 and \$981 respectively. These amounts are included in cost of revenues.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6: INVESTMENT IN COMPANIES

- a. In December 2000, the Company signed an agreement to invest in an unrelated privately-held company (investee). During 2005 and 2006, the Company granted convertible loans in the amount of \$902 to the investee. The loans bear no interest and are convertible into shares. The date of conversion, the type of the shares and the number of shares granted will be determined by the board of directors of the investee. As of December 31, 2006, the Company holds 40.9% of the investee s share capital.

	December 31,	
	2005	2006
Equity, net (1)	\$ (232)	\$ (311)
Convertible loans	611	902
Total investments	\$ 379	\$ 591

- (1) Net equity as follows:

Net equity as of purchase date	\$ 93	\$ 93
Unamortized goodwill	2,389	3,167
Accumulated net losses	(2,714)	(3,571)
	\$ (232)	\$ (311)

- b. In July, 2005, the Company signed a share purchase agreement with another unrelated privately-held company and certain of its shareholders to acquire 19.5% of its Ordinary shares for a total purchase price in the amount of \$ 707. In November 2006, the Company granted convertible loan in the amount of \$ 44. The loan bears interest at the rate of 9% per annum and is convertible into shares.

	December 31,	
	2005	2006
Net equity as of purchase date	\$ (106)	\$ (106)
Unamortized goodwill	813	985
Accumulated net income (loss)	26	(33)
Total investment	\$ 733	\$ 846

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6: INVESTMENT IN COMPANIES (Cont.)

- c. In February, 2006, the Company signed a share purchase agreement with another unrelated privately-held company to acquire 10% of its Ordinary shares for a total purchase price in the amount of \$1,000. The Company received in October 2006 a call option to invest an additional \$10,000 for the remaining 90% of the unrelated privately-held company's share capital. The option is valid until January 31, 2007. In November, 2006 the Company granted the unrelated privately-held company a credit line of \$500 payable within 18 months. The loan bears interest at the rate of 180 day LIBOR plus 3.0% per annum. In the event that the Company consummates an equity investment in the unrelated privately-held company the principal amount of the loan would automatically be applied to pay a portion of the purchase price for the equity investment.
- d. In December 2006, the Company granted convertible loan in the amount of \$ 1,000 to another unrelated privately-held company. The loan bears LIBOR+2% per annum interest and shall be due and payable in December 2007 unless converted into shares. Upon affiliated company consummating a single or series of equity financial transactions no later than the repayment date, the Company shall be entitled to convert the loan amount for the lowest price per share paid by the investors participating in the financing. In addition, the Company received warrants valid until the consummation of an exit transaction to purchase in consideration for 40% of the principle amount (\$400), in consideration of \$941.91 per share unless the investee consummated the financing by the repayment date, then the price would be equal to the price per share paid by the Company.

NOTE 7: PROPERTY AND EQUIPMENT

	December 31,	
	2005	2006
Cost:		
Computers and peripheral equipment	\$ 11,767	\$ 14,022

NOTE 10: SENIOR CONVERTIBLE NOTES

In November 2004, the Company issued an aggregate of \$125,000 (including the exercise of the option as described below) of 2% Senior Convertible Notes due November 9, 2024 (the Notes). The Company is obligated to pay interest on the Notes semi-annually on May 9 and November 9 of each year.

The Notes are convertible, at the option of the holders at any time before the maturity date, into Ordinary shares of the Company at a conversion rate of 53.4474 Ordinary shares per \$1 principal amount of Notes, representing a conversion price of approximately \$18.71 per share. The Notes are subject to redemption at any time on or after November 9, 2009, in whole or in part, at the option of the Company, at a redemption price of 100% of the principal amount plus accrued and unpaid interest. The Notes are subject to repurchase, at the holders' option, on November 9, 2009, November 9, 2014 or November 9, 2019, at a repurchase price equal to 100% of the principal amount plus accrued and unpaid interest, if any, on such repurchase date. The Company can choose to pay the repurchase price in cash, Ordinary shares or a combination of cash and Ordinary shares. As of December 31, 2006, the Notes are presented as a long-term liability.

The Notes also contain a provision for a make-whole premium to be paid by the Company to holders of the Notes in the event of certain changes in control that could occur during the life of the Notes. The premium is payable in the form of cash, the Company's Ordinary shares, or the same form of consideration used to pay for the shares of the Company's Ordinary shares in connection with the transaction constituting the change in control. The premium declines over time and is based upon the price of the Company's Ordinary shares as of the effective date of the change in control. Due to immateriality, the Company did not record separate derivative in the financial statements.

The Notes were issued with a conversion price equal to \$18.71 per share, which reflected the closing share price on the Nasdaq on the date of the offering, which was \$14.12, plus a premium of 32.5%. In accordance with EITF No. 00-27, no beneficial conversion feature was recognized or recorded.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 10: SENIOR CONVERTIBLE NOTES (Cont.)

The additional amount that the Company can be required to pay in respect of the withholding taxes was recorded as a liability.

As part of the offering, the Company granted the Initial Purchasers an option to purchase at any time during 30 days from the date of the offering, up to an additional \$25,000 principal amount of senior convertible notes. The option, in accordance with SFAS No. 133, is not embedded and therefore should be measured on a stand-alone basis. On November 16, 2004, the option was exercised in full. Due to immateriality, the Company did not record this option and its exercise in the financial statements.

NOTE 11: COMMITMENTS AND CONTINGENT LIABILITIES

a. Lease commitments:

The Group's facilities are rented under several lease agreements in Israel and the U.S. for periods ending in 2013.

Future minimum rental commitments under non-cancelable operating leases for the years ended December 31, are as follows:

2007	\$	3,686
2008		3,447
2009		3,424
2010		3,201
2011		3,011
2012 and thereafter		3,872
		<u>20,641</u>
	\$	<u>20,641</u>

Rent expenses for the years ended December 31, 2004, 2005 and 2006, were approximately \$2,927, \$2,938 and \$3,087, respectively.

b. Other commitments:

The Company is obligated under certain agreements with its suppliers to purchase goods and under an agreement with its manufacturing subcontractor to purchase excess inventory. Non Cancelable obligations as of December 31, 2006, were approximately as follows:

2007	\$	2,726
2008		1,008
		<u>3,734</u>
	\$	<u>3,734</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 11: COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

- c. Royalty commitment to the Office of the Chief Scientist of Israel (OCS):

Under the research and development agreements of the Company with the OCS and pursuant to applicable laws, the Company is required to pay royalties at the rate of 3%-4.5% of sales of products developed with funds provided by the OCS, up to an amount equal to 100% of the OCS research and development grants received, linked to the U.S. dollar plus interest on the unpaid amount received based on the 12-month LIBOR rate applicable to dollar deposits. The Company is obligated to repay the Israeli Government for the grants received only to the extent that there are sales of the funded products.

As of December 31, 2006, the Company has a contingent obligation to pay royalties in the amount of approximately \$ 2,728.

- d. Royalty commitments to third parties:

The Group entered into technology licensing fee agreements with third parties. Under the agreements, the Group agreed to pay the third parties royalties until 2008, based on 0.3%-0.9% of the Group's total consolidated revenues.

From time to time, the Group may be subject to patent infringement claims that arise in the ordinary course of its business activities. The Group estimates and records liabilities for those contingent claims for which it believes future expenditures will be required and for which such expenditures can be reasonably estimated.

- e. Legal proceedings

1. Prior to the acquisition of Nuera by the Group, one of Nuera's customers had been named as a defendant in a patent infringement suit involving technology the customer purchased from Nuera. In the suit, the plaintiff alleged that the customer uses devices to offer services that infringe upon a patent the plaintiff owns. The customer has sought indemnification from Nuera pursuant to the terms of a purchase agreement between Nuera and the Company relating to the allegedly infringing technology at issue. According to the estimate of the management, Nuera has provided an allowance in respect of the above claim.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data**NOTE 11: COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)**

2. Prior to the acquisition of Nuera by the Group, eight former employees of a French subsidiary of Nuera filed a labor grievance against the subsidiary claiming they were unfairly terminated. The French subsidiary filed for bankruptcy in 2004 and, in 2005, the court appointed liquidator sought to hold Nuera liable for the obligations of its French subsidiary. In June 2006, the court ruled in favor of Nuera that it was not liable for the obligations of its French subsidiary. In March 2006, the liquidator decided to appeal the judgement. According to the estimate of the management, Nuera has provided an allowance in respect of the above claim.

NOTE 12: SHAREHOLDERS EQUITY

- a. Treasury stock:

On January 10, 2001 and on April 28, 2002, the Company's Board of Directors approved a share repurchase program pursuant to which the Company is authorized to purchase up to an aggregate amount of 4,000,000 of its outstanding Ordinary shares. As of December 31, 2006, the Company had purchased 3,942,139 of its outstanding Ordinary shares, at a weighted average price per share of \$2.87.

- b. Warrants issued to consultants:

Between 1999 and 2001, the Company issued warrants to consultants to purchase 4,000 and 50,000 Ordinary shares of NIS 0.01 par value at an exercise price of \$9.82 per share and \$ 18.82 per share, respectively, expiring seven years from the date of grant. Warrants to purchase 24,000 Ordinary shares at an exercise price of \$18.82 per share were exercisable immediately, and warrants to purchase 30,000 Ordinary shares are exercisable in four equal annual installments from the date of grant. During 2001, warrants to purchase 10,000 Ordinary shares at an exercise price of \$18.82 were exercised.

As of December 31, 2006, 34,000 warrants are outstanding and exercisable at a weighted average exercise price of \$18.82

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 12: SHAREHOLDERS EQUITY (Cont.)

c. Employee Stock Purchase Plan:

In May 2001, the Company's Board of Directors adopted the Employee Stock Purchase Plan (the Purchase Plan), which provides for the issuance of a maximum of 2,000,000 Ordinary shares. As of December 31, 2006, 709,987 shares are still available for future issuance. Eligible employees can have up to 15% of their wages, up to certain maximums, used to purchase Ordinary shares. The Purchase Plan is implemented with purchases every six months occurring on January 31 and July 31 of each year. The price of the Ordinary shares purchased under the Purchase Plan is equal to 85% of the lower of the fair market value of the Ordinary shares on the commencement date of each offering period or on the semi-annual purchase date. The Purchase Plan is considered as a compensatory plan. Therefore the Company recorded compensation expense in accordance to SFAS 123R (Note 12 d.).

During the years ended December 31, 2004, 2005 and 2006, 208,952, 257,746 and 323,303 shares, respectively, were issued under the Purchase Plan for aggregate considerations of \$1,332, \$2,134 and \$2,665, respectively.

d. Employee Stock Option Plans:

Under the Company's 1997 and 1999 Stock Option Plans (the Plans), options to purchase Ordinary shares may be granted to officers, directors, employees and consultants of the Group.

The total number of shares authorized for grant of options under the Plans is 15,945,828. As of December 31, 2006, 1,497,740 shares are still available for future option grants.

Stock options granted under the Plans are exercisable usually at the fair market value of the Ordinary shares at the date of grant and usually expire seven or ten years from the date of grant. The options generally vest over four or five years, from the date of grant. Any options, which are forfeited or cancelled before expiration, become available for future grants.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 12: SHAREHOLDERS EQUITY (Cont.)

A summary of the Group's stock option activity and related information for the years ended December 31, 2006, is as follows:

	Number of options	Weighted-average exercise price	Weighted- average remaining contractual term (in years)	Aggregate intrinsic value
Outstanding at December 31, 2005	7,890,372	\$ 9.38		
Granted	1,789,000	\$ 10.51		
Exercised	(1,198,621)	\$ 5.44		
Forfeited	(498,925)	\$ 14.31		
Outstanding at December 31, 2006	7,981,826	\$ 9.92	3.8	\$ 22,353
Exercisable at December 31, 2006	4,535,767	\$ 9.76	2.4	\$ 18,396
Vested and expected to vest	7,607,019	\$ 9.92	3.8	\$ 21,213

The weighted-average grant-date fair value of options granted during the twelve months ended December 31, 2006 was \$5.81. The aggregate intrinsic value in the table above represents the total intrinsic value (the difference between the Company's closing stock price on the last trading day of fiscal 2006 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on December 31, 2006. This amount changes based on the fair market value of the Company's shares. Total intrinsic value of options exercised for the twelve months ended December 31, 2006 was \$4,790. As of December 31, 2006, there was \$12,381 of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the Company's stock option plans. That cost is expected to be recognized over a weighted-average period of 1.6 years. Total fair value of options vested for the twelve months ended December 31, 2006 was \$5,866.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 12: SHAREHOLDERS EQUITY (Cont.)

The options outstanding as of December 31, 2006, have been separated into ranges of exercise prices, as follows:

Range of exercise price	Options outstanding as of December 31, 2006	Weighted average remaining contractual life (Years)	Weighted average exercise price	Options exercisable as of December 31, 2006	Weighted average exercise price of exercisable options
\$ 0.61	101,000	1.27	\$ 0.61	101,000	\$ 0.61
\$ 1.1	146,400	1.51	\$ 1.10	146,400	\$ 1.10
\$ 1.73-2.51	548,693	2.81	\$ 2.29	504,193	\$ 2.29
\$ 2.67-4	487,701	2.33	\$ 3.13	417,567	\$ 3.11
\$ 4.1-6.04	936,004	2.58	\$ 4.43	812,004	\$ 4.39
\$ 6.51-9.24	840,828	2.55	\$ 7.79	716,453	\$ 7.76
\$ 9.32-14.76	4,247,700	5.35	\$ 10.86	1,190,900	\$ 11.14
\$ 15.94-20.38	52,500	5.00	\$ 15.94	26,250	\$ 15.94
\$ 25.5-36.53	597,000	0.30	\$ 28.96	597,000	\$ 28.96
\$ 50.50	24,000	0.49	\$ 50.50	24,000	\$ 50.50
	7,981,826		\$ 9.92	4,535,767	\$ 9.76

The weighted average fair values of the options granted during 2004, 2005 and 2006, were \$7.63, \$6.27 and \$5.81, respectively.

e. Dividends:

In the event that cash dividends are declared in the future, such dividends will be paid in NIS. The Company does not intend to pay cash dividends in the foreseeable future. (See also Note 13a.)

NOTE 13: TAXES ON INCOME

a. Israeli taxation:

1. Measurement of taxable income:

Commencing in taxable year 2003, the Company has elected to measure its taxable income and file its tax return under the Israeli Income Tax Regulations (Principles Regarding the Management of Books of Account of Foreign Invested Companies and Certain Partnerships and the Determination of Their Taxable Income), 1986. Such an elective obligates the Company for three years. Accordingly, commencing taxable year 2003, results for tax purposes are measured in terms of earnings in dollars. The

Company has elected to extend the term of the above mentioned tax measurement by another year.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 13: TAXES ON INCOME (Cont.)

2. Tax benefits under the Law for the Encouragement of Capital Investments, 1959 (the Investment Law):

The Company's production facilities have been granted the status of an Approved Enterprise in accordance with the Investment Law under four separate investment programs. According to the provisions of such Israeli Investment Law, the Company has been granted the Alternative Benefit Plan, under which the main benefits are tax exemption and reduced tax rate.

Therefore, the Company's income derived from Approved Enterprise will be entitled to a tax exemption for a period of two to four years and to an additional period of six to eight years of reduced tax rates of 10% - 25% (based on the percentage of foreign ownership). The duration of tax benefits of reduced tax rates is subject to a limitation of the earlier of 12 years from commencement of production, or 14 years from the approval date. The Company utilized tax benefits from the first program in 1998 and is eligible for benefits through 2007. Tax benefits from the remaining programs are scheduled to gradually expire through 2013.

As of December 31, 2006, retained earnings included approximately \$540 in tax-exempt income earned by the Company's Approved Enterprise. The Company's Board of Directors has decided not to declare dividends out of such tax-exempt income. Accordingly, no deferred income taxes have been provided on income attributable to the Company's Approved Enterprise.

Tax-exempt income attributable to the Approved Enterprise cannot be distributed to shareholders without subjecting the Company to taxes except upon complete liquidation of the Company. If such retained tax-exempt income is distributed in a manner other than upon the complete liquidation of the Company, it would be taxed at the corporate tax rate applicable to such profits as if the Company had not elected the alternative tax benefits (currently between 10% - 25%) and an income tax liability of approximately up to \$ 135 would be incurred by the Company.

The entitlement to the above benefits is conditional upon the Company fulfilling the conditions stipulated by the Investment Law, regulations published thereunder and the certificate of approval for the specific investments in Approved Enterprises. In the event of failure to comply with these conditions, the benefits may be canceled and the Company may be required to refund the amount of the benefits, in whole or in part, including interest. As of December 31, 2006, management believes that the Company is in compliance with all of the aforementioned conditions.

Income from sources other than the Approved Enterprise during the benefit period will be subject to tax at the regular tax rate prevailing at that time.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands, except share and per share data

NOTE 13: TAXES ON INCOME (Cont.)

On April 1, 2005, an amendment to the Investment Law came into effect (the Amendment) that has significantly changed the provisions of the Investment Law. The Amendment limits the scope of enterprises that may be approved by the Investment Center by setting criteria for the approval of a facility as a Privileged Enterprise including a provision generally requiring that at least 25% of the Privileged Enterprise's income will be derived from export. Additionally, the Amendment enacted major changes in the manner in which tax benefits are awarded under the Investment Law so that companies no longer require Investment Center approval in order to qualify for tax benefits.

However, the Investment Law provides that terms and benefits included in any certificate of approval already granted will remain subject to the provisions of the Investment Law as they were on the date of such approval. Therefore, the Company's existing Approved Enterprises will generally not be subject to the provisions of the Amendment. As a result of the Amendment, tax-exempt income generated under the provisions of the Investment Law has amended, will subject the Company to taxes upon distribution or liquidation and the Company may be required to record a deferred tax liability with respect to such tax-exempt income. As of December 31, 2006 there were no taxable income attributable to the Privileged Enterprise.

3. Net operating losses carry forward:

As of December 31, 2006, the Company has accumulated losses for tax purposes in the amount of approximately \$68,000, which can be carried forward and offset most of against taxable income in the future for an indefinite period.

4. Tax benefits under the Law for the Encouragement of Industry (Taxation), 1969:

The Company currently qualifies as an Industrial Company under the above law and as such is entitled to certain tax benefits, including accelerated depreciation and the deduction of public offering expenses in three equal annual payments.

5. Tax rates:

Under an amendment to the Israeli Income Tax Ordinance enacted on July 25, 2005, a gradual decrease in the corporate tax rate in Israel will be in effect as follows: in 2006 31%, in 2007 29%, in 2008 27%, in 2009 26% and in 2010 and thereafter 25%.

*) Including \$638 of the total deferred tax assets upon utilization of pre-acquisition carry forward tax losses derived from acquisition of AudioCodes USA Inc. in accordance with SFAS No. 141.

The Company's U.S. subsidiaries have estimated total available carry forward tax losses of approximately \$ 60,000 to offset against future taxable income between 2015 and 2024. As of December 31, 2006, the Company recorded a deferred tax asset of \$ 3,742 relating to the available net carry forward tax losses.

Utilization of U.S. net operating losses may be subject to substantial annual limitations due to the change in ownership provisions of the Internal Revenue Code of 1986 and similar state provisions. The annual limitation may result in the expiration of net operating losses before utilization.
