PART I. FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors

Camden National Corporation

We have reviewed the accompanying interim consolidated financial information of Camden National Corporation and Subsidiaries as of September 30, 2007, and for the nine-month and three-month periods ended September 30, 2007 and 2006. These financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit in accordance with standards of the Public Company Accounting Oversight Board (United States), the objective of which is to express an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE 1 BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include all disclosures required by accounting principles generally accepted in the United States of America for complete presentation of financial statements. In the opinion of management, the consolidated financial statements contain all adjustments (consisting only of normal recurring accruals) necessary to present fairly the consolidated statements of condition of Camden National Corporation as of September 30, 2007 and December 31, 2006, the consolidated statements of income for the nine and three months ended September 30, 2007 and 2006, the consolidated statements of changes in shareholders' equity for the nine months ended September 30, 2007 and 2006, and the consolidated statements of cash flows for the nine months ended September 30, 2007 and 2006. All significant intercompany transactions and balances are eliminated in consolidation. Certain items from the prior year were reclassified to conform to the current year presentation. The income reported for the nine-month period ended September 30, 2007 is not necessarily indicative of the results that may be expected for the full year. The information in this report should be read in conjunction with the consolidated financial statements and accompanying notes included in the December 31, 2006 Annual Report on Form 10-K.

NOTE 2 EARNINGS PER SHARE

Basic earnings per share data is computed based on the weighted average number of common shares outstanding during each period. Potential common stock is considered in the calculation of weighted average shares outstanding for diluted earnings per share, and is determined using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share:

(Dollars in thousands, except number of shares and per share data)

	Nine Months Ended September 30,	
	2007	2006
Net income, as reported	\$ 14,723	\$ 15,332
Weighted average shares outstanding	6,571,836	7,021,808
Effect of dilutive potential common stock	14,060	6,328
Adjusted weighted average shares and assumed conversion	6,585,896	7,028,136
Basic earnings per share	\$ 2.24	\$ 2.18
Diluted earnings per share	\$ 2.24	\$ 2.18
	Three Months Ended September 30,	
	2007	2006
Net income, as reported	\$ 4,998	\$ 5,136
Weighted average shares outstanding	6,513,000	6,613,379
Effect of dilutive potential common stock	9,694	15,780
Adjusted weighted average shares and assumed conversion	6,522,694	6,629,159
Basic earnings per share	\$ 0.77	\$ 0.77
Diluted earnings per share	\$ 0.77	\$ 0.77

At September 30, 2007, the Company had 72,812 shares of potential common stock that were anti-dilutive, including 71,900 outstanding stock options as the exercise price was greater than the market price of the common stock. At September 30, 2006 all potential common stock was dilutive. At September 30, 2007, the Company had 83,800 non-vested stock option grants, of which 25,700 were in-the-money options. At September 30, 2006, the Company had 69,950 non-vested stock option grants, all of which were in-the-money options.

Table of Contents**NOTE 3 DERIVATIVE FINANCIAL INSTRUMENTS**

On July 14, 2005, the Company purchased interest rate protection agreements (floors) with notional amounts of \$50.0 million, a strike rate of 6.0% and a termination date of July 14, 2010. These floors were acquired to limit the Company's exposure to falling rates on Prime Rate loans. The cash flows on prime-based interest receipts for the first \$50.0 million of the Company's floating Prime rate based loans for which interest payments are received each quarter are being hedged with two 5-Year Term Floor Agreements with \$30 million and \$20 million notional value, respectively, and both with a Prime rate 6% strike price. The floor contract will reduce the variability of cash flows from the floating Prime rate based loan portfolio should the rate index of the loans fall below a predetermined level, in this case the 6% strike price. The floor contract was purchased to best match the characteristics of the underlying loans hedged and is tied to the H.15 Prime, while the loans being hedged are tied to WSJ Prime. Under these agreements, the Company paid up front premiums of \$410,000, which the Company has been amortizing based on the expense amortization schedule established at the inception of the hedge, with the corresponding adjustment to the income statement.

At inception, the hedging relationship was expected to be 100% effective in achieving offsetting cash flows attributable to the hedged risk during the term of the hedge as required by paragraph 28(b) of Statement of Financial Accounting Standards (SFAS) No. 133 Accounting for Derivative Instruments and Hedging Activities. The Company believes that the initial documentation clearly indicates the Company's intent and adequately identifies the forecasted transactions. However, the Company did not explicitly state within the original documentation the first-payments received methodology for describing with sufficient specificity the forecasted transaction in accordance with Implementation Issue No. G25, Cash Flow Hedges: Using the First-Payments-Received Technique in Hedging the Variable Interest Payments on a Group of Non-Benchmark-Rate-Based Loans. Accordingly, during the current period, the Company discontinued cash flow hedge accounting and recorded the derivative transactions as economic hedges with a reclassification of the derivative's losses from accumulated other comprehensive income to earnings. For future periods, changes in the fair value of the economic hedges will be recorded in earnings.

The Company evaluated the potential financial statement impact had the derivative instruments been recorded as economic hedges since inception and adjusted to fair value through earnings. Management determined that the financial statement impact was not material, both quantitatively and qualitatively, to the Company's financial statements taken as a whole in accordance with SEC Staff Accounting Bulletins No. 99 and No. 108. Quantitatively, in accordance with SEC Staff Accounting Bulletin No. 108, management assessed the materiality of the financial statement impact using both the rollover and iron curtain approaches. Under either approach, the financial statement impact for each interim and annual reporting period was immaterial. Qualitatively, management's intent was to record and report 100% effective cash flow hedges in accordance with SFAS 133 and related guidance. Management concluded, after considering the total mix of information, that the magnitude of this item would not change or influence the judgment of a reasonable person relying upon the financial reports.

As part of originating mortgage loans, the Company may enter into rate lock agreements with customers, which are considered interest rate lock commitments under SFAS No. 133. At September 30, 2007 and December 31, 2006, based upon the pipeline of mortgage loans with rate lock commitments and the change in fair value of those commitments due to changes in market interest rates, the Company determined the balance sheet impact was not material.

NOTE 4 INVESTMENTS

Management evaluates investments for other-than-temporary impairment based on the type of investment and the period of time the investment has been in an unrealized loss position. At September 30, 2007, the Company had a greater than 12 months unrealized loss of \$3.1 million, which represents 1.5% of the \$201.7 million fair value of the specific securities and 0.7% of the total investment portfolio. The greater than 12 months unrealized loss position was comprised of 66.1% mortgage-backed securities issued by either the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac), 18.6% municipal bonds, 6.8% U.S. government sponsored enterprises, and 8.5% collateralized mortgage obligations. Management believes that the unrealized loss positions are primarily due to the changes in the interest rate environment, there is little risk of loss or default from the counterparties, and the Company has the ability and intent to hold the securities for the foreseeable future, therefore, the securities are not considered other-than-temporarily impaired. Investments with unrealized losses at September 30, 2007 and December 31, 2006, and the length of time they have been in a continuous loss position, are as follows:

	Less than 12 months		September 30, 2007 12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
<i>(Dollars in thousands)</i>

NOTE 5 CORE DEPOSIT INTANGIBLE

The Company has a core deposit intangible asset related to the acquisition of bank branches between 1995 and 1998. The core deposit intangible is amortized on a straight-line basis over 10 years, and reviewed for possible impairment when it is determined that events or changed circumstances may affect the underlying basis of the asset. The carrying amount is as follows:

<i>(Dollars in thousands)</i>	September 30, 2007	December 31, 2006
Core deposit intangible, cost	\$ 9,424	\$ 9,424
Accumulated amortization	8,890	8,248
Core deposit intangible, net	\$ 534	\$ 1,176

Amortization expense related to the core deposit intangible for the nine- and three-month periods ended September 30, 2007 amounted to \$642,000 and \$214,000, respectively. Amortization expense related to the core deposit intangible for the nine- and three-month periods ended September 30, 2006 amounted to \$650,000 and \$213,000, respectively. The expected amortization expense for each year until the core deposit intangible is fully amortized in 2008 is estimated to be \$856,000 in 2007 and \$320,000 in 2008.

NOTE 6 GOODWILL

At September 30, 2007 and December 31, 2006, the value of the Company's goodwill, including the related impairment loss, is as follows:

<i>(Dollars in thousands)</i>	Financial		
	Banking	Services	Total
Goodwill, at cost	\$ 2,273	\$ 2,408	\$ 4,681
Transitional impairment loss		(690)	(690)
Goodwill, net	\$ 2,273	\$ 1,718	\$ 3,991

Table of Contents

As of June 30, 2007, in accordance with SFAS No. 142, the Company completed its annual review of the goodwill and determined that there had been no additional impairment.

NOTE 7 COMMON STOCK REPURCHASE

In June 2007, the Board of Directors of the Company approved the 2007 Common Stock Repurchase Program, which permits the Company to purchase up to 750,000 shares of its authorized and issued common stock for a one-year period, expiring July 1, 2008. The authority may be exercised from time to time and in such amounts as market conditions warrant. Any repurchases are intended to make appropriate adjustments to the Company's capital structure, including meeting share requirements related to employee benefit plans and for general corporate purposes. Through September 30, 2007, the Company has not repurchased any shares under the 2007 Program.

NOTE 8 SHAREHOLDERS EQUITY**Stock-Based Compensation**

On April 29, 2003, the shareholders of the Company approved the 2003 Stock Option and Incentive Plan (the current plan). The maximum number of shares of stock reserved and available for issuance under this Plan is 800,000 shares. Awards may be granted in the form of incentive stock options, non-qualified stock options, stock appreciation rights, restricted stock, deferred stock, unrestricted stock, performance share and dividend equivalent rights, or any combination of the preceding, and the exercise price shall not be less than 100% of the fair market value on the date of grant in the case of incentive stock options, or 85% of the fair market value on the date of grant in the case of non-qualified stock options. No stock options are exercisable more than ten years after the date the stock option is granted. Prior to April 29, 2003, the Company had three stock option plans. Under all three plans, the options were immediately vested when granted, and expire ten years from the date the option was granted. The exercise price of all options equaled the market price of the Company's stock on the date of grant.

On January 1, 2006, the Company adopted the provisions of SFAS No. 123 (revised 2004) *Share-Based Payment* (SFAS No. 123(R)), using a modified prospective application. The Company had previously adopted the expense provisions of SFAS No. 123, thus adoption of SFAS No. 123(R) did not have a material effect on the statements of condition or results of operations of the Company.

Restricted Stock Awards

In January 2005, under the current plan, the Company granted 4,687 shares of restricted stock, all of which vest over a three-year period. In March 2007, under the current plan, the Company granted 6,873 shares of restricted stock, all of which vest over a three-year period. As of September 30, 2007, 1,342 of the restricted stock awards have been forfeited. The Company recorded approximately \$74,800 of compensation expense and \$26,200 of related tax benefit during the first nine months of 2007, of which \$28,000 of expense and \$9,800 of tax benefit was recorded in the third quarter. The Company recorded approximately \$31,000 of compensation expense and \$11,000 of related tax benefit during the first nine months of 2006, of which \$12,000 of expense and \$4,000 of tax benefit was recorded in the third quarter.

A summary of the status of the Company's nonvested restricted stock awards as of September 30, 2007, and changes during the nine-month period ended on that date, is presented below.

	September 30, 2007	
	Weighted-average	
	Number of Shares	Grant Date Fair Value
Nonvested at beginning of period	2,201	\$ 36.69
Granted during the period	6,873	44.15
Vested during the period	1,100	36.69
Forfeited during the period	198	36.69
Nonvested at end of period	7,776	\$ 43.28

Table of Contents

At the closing price on September 30, 2007 of \$34.98, the total fair value of restricted stock awards vested during the period was \$38,500.

Management Stock Purchase Plan

The Management Stock Purchase Plan (MSPP), which is a component of the current plan, provides equity incentive compensation to selected management employees of the Company. Participants in the Plan who are senior executives of the Company are required to receive restricted shares in lieu of a portion of their annual incentive bonus, if any, while certain other officers may elect to receive restricted shares in lieu of a portion of their annual incentive bonus. Restricted shares are granted at a discount of one-third of the fair market value of the stock on the date of grant. Restricted shares will vest two years after the date of grant if the participant remains employed by the Company for such period. During the first quarter of 2007, under the MSPP, the Company granted 934 shares of restricted stock at a discounted price of \$29.67, of which 22 shares have been forfeited. During the first quarter of 2006, under the MSPP, the Company granted 4,792 shares of restricted stock at a discounted price of \$23.30, of which 532 shares have been forfeited. Related to the discount on the restricted stock, the Company recorded approximately \$17,400 of compensation expense and \$6,100 of related tax benefit during the first nine months of 2007, of which \$4,700 of expense and \$1,600 of tax benefit was recorded in the third quarter. The Company recorded approximately \$25,300 of compensation expense and \$8,800 of related tax benefit during the first nine months of 2006, of which \$9,900 of expense and \$3,500 of tax benefit was recorded in the third quarter. A summary of the status of the Company's nonvested restricted stock under the MSPP as of September 30, 2007, and changes during the nine-month period ended on that date, is presented below.

	September 30, 2007	
	Number of Shares	Weighted-average Grant Date Fair Value
Nonvested at beginning of period	7,558	\$ 11.95
Granted during the period	934	14.84
Vested during the period	2,854	12.45
Forfeited during the period	466	11.80
Nonvested at end of period	5,172	\$ 12.21

Long-term Performance Share Plan

The Long-term Performance Share Plan, which is a component of the current plan, is intended to create incentives for certain executive officers of the Company and to thus allow the Company to attract and retain in its employ persons who will contribute to the future success of the Company. It is further the intent of the Company that awards made under this plan will be used to achieve the twin goals of aligning executive incentive compensation with increases in shareholder value and using equity compensation as a tool to retain key employees. The long-term performance period is a period of three consecutive fiscal years beginning on January 1 of the first year and ending on December 31 of the third year. Awards are based upon the attainment of certain thresholds of tangible book value and return on average equity over the three-year period. The current aggregate amount of awards, based on actual and projected results of tangible book value and return on average equity for the three-year performance periods January 1, 2005 – December 31, 2007, January 1, 2006 – December 31, 2008, and January 1, 2007 – December 31, 2009 is not considered material and no related expense has been recognized.

Stock Option Awards

Through the first three quarters of 2007, the Company has granted, under the current plan, 38,750 incentive stock options to employees, all of which vest over a five-year period. During the first three quarters of 2006, the Company granted, under the current plan, 36,000 incentive stock options to employees, all of which vest over a five-year period. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions used for grants: in 2007, dividend yield of 2.1%, expected volatility of 26.66%, risk-free interest rate of 4.77%, and expected lives of 5.0 years; in 2006, dividend yield of 3.7%, expected volatility of 25.59%, risk-free interest rate of 4.56%, and expected lives of 7.8 years. Expected volatilities are based on the historical volatility of the Company's stock, and other factors. The risk-free rate for periods within the contractual life of the option is based on the US Treasury yield curve in effect at the time of the grant. The Company uses historical data, such as option exercise and employee termination rates, to calculate the expected option life.

Table of Contents

Related to the incentive stock option grants and in accordance with the provisions of SFAS No. 123(R), the Company recorded approximately \$108,000 of compensation expense during the first nine months of 2007, of which \$23,900 was in the third quarter. The Company recorded approximately \$75,000 of compensation expense during the first nine months of 2006, of which \$27,000 was in the third quarter. A summary of the status of the Company's stock option plans as of September 30, 2007, and changes during the nine-month period ended on that date is presented below.

	Number of Shares	September 30, 2007		Aggregate Intrinsic Value (\$000)
		Weighted-average Exercise Price	Weighted-average Remaining Contractual Term	
Outstanding at beginning of year	94,976	\$ 32.92		
Granted during the period	38,750	43.69		
Exercised during the period	7,854	25.49		
Forfeited during the period	8,800	38.72		
Outstanding at end of period	117,072	\$ 36.55	7.8	\$ 178
Exercisable at end of period	33,272	\$ 30.54	6.1	\$ 169

The weighted-average grant date fair value of options granted during the nine-month period ended September 30, 2007 was \$11.30. The total intrinsic value of options exercised during the nine-month period ended September 30, 2007 was \$139,000. A summary of the status of the Company's nonvested stock options as of September 30, 2007, and changes during the nine-month period ended on that date, is presented below.

	September 30, 2007	
	Number of Shares	Weighted-average Grant Date Fair Value
Nonvested at beginning of year	69,950	\$ 7.90
Granted during the period	38,750	11.30
Vested during the period	16,100	7.86
Forfeited during the period	8,800	9.45
Nonvested at end of period	83,800	\$ 9.29

At the closing price on September 30, 2007 of \$34.98, the total fair value of stock options vested during the period was \$563,000. The following table summarizes information related to options at September 30, 2007:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Remaining Contractual Life	Weighted-average Exercise Price	Number Exercisable	Weighted-average Exercise Price
\$10.00 - \$19.99	6,022	1.5	\$ 17.59	6,022	\$ 17.59
\$20.00 - \$29.99	4,500	5.3	23.08	4,500	23.08
\$30.00 - \$39.99	74,550	7.8	35.48	22,750	35.44
\$40.00 - \$49.99	32,000	9.4	44.51		
	117,072	7.8	\$ 36.55	33,272	\$ 30.54

As of September 30, 2007, there was \$810,700 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the current plan, which is expected to be recognized over a weighted-average period of 1.9 years.

NOTE 9 MORTGAGE SERVICING RIGHTS

Residential real estate mortgages are originated by the Company both for portfolio and for sale into the secondary market. The Company may sell its loans to institutional investors such as Freddie Mac. Under loan sale and servicing agreements with the investor, the Company generally continues to service the residential real estate mortgages. The Company pays the investor an agreed-upon rate on the loan, which is less than the

Table of Contents

interest rate the Company receives from the borrower. The Company retains the difference as a fee for servicing the residential real estate mortgages. As required by SFAS No. 156, *Accounting for Servicing of Financial Assets - an amendment of SFAS No. 140*, the Company capitalizes mortgage servicing rights at their fair value upon sale of the related loans, amortizes the asset over the estimated life of the serviced loan, and periodically assesses the asset for impairment. The balance of capitalized mortgage servicing rights, net of a valuation allowance, included in other assets at September 30, 2007 and 2006 and December 31, 2006 was \$180,450, \$380,700, and \$324,000, respectively, which equaled the net book value of these rights. The fair market value of the mortgage servicing rights approximated \$846,000, \$725,000 and \$1.0 million, respectively, at September 30, 2007 and 2006 and December 31, 2006. In evaluating the reasonableness of the carrying values of mortgage servicing rights, the Company obtains third party valuations based on loan level data including note rate, type and term of the underlying loans. The model utilizes a variety of assumptions, the most significant of which are loan prepayment assumptions and the discount rate used to discount future cash flows. Prepayment assumptions, which are impacted by loan rates and terms, are calculated using a three-month moving average of weekly prepayment data published by the Public Securities Association and modeled against the serviced loan portfolio by the third party valuation specialist. The discount rate is the quarterly average 10-year US Treasury rate plus 5.0%. Other assumptions include delinquency rates, foreclosure rates, servicing cost inflation, and annual unit loan cost. All assumptions are adjusted periodically to reflect current circumstances. Amortization of the mortgage servicing rights, as well as write-offs of capitalized rights due to prepayments of the related mortgage loans, are recorded as a charge against mortgage servicing income.

The following summarizes mortgage servicing rights capitalized and amortized, along with the activity in the related valuation allowance:

<i>(Dollars in thousands)</i>	Nine Months Ended September 30,	
	2007	2006
Balance of loans serviced for others	\$ 103,837	\$ 110,368
Mortgage Servicing Rights:		
Balance at beginning of year	\$ 324	\$ 529
Amortization charged against mortgage servicing income	(145)	(149)
Change in valuation allowance	1	1
Balance at end of period	\$ 180	\$ 381
Valuation allowance:		
Balance at beginning of year	\$ (2)	\$ (3)
Reduction of impairment reserve	1	1
Balance at end of period	\$ (1)	\$ (2)

NOTE 10 EMPLOYEE BENEFIT PLANS**Post-retirement Plan**

The Company's post-retirement plan provides medical and life insurance to certain eligible retired employees. The components of the net periodic benefit cost are:

<i>(Dollars in thousands)</i>	Nine Months Ended September 30,	
	2007	2006
Service cost	\$ 42	\$ 33
Interest cost	54	45
Amortization of prior service cost	(15)	(12)
Recognized net actuarial loss	3	3
Net periodic benefit cost	\$ 84	\$ 69

Table of Contents

	Three Months Ended September 30,	
	2007	2006
Service cost	\$ 14	\$ 11
Interest cost	18	15
Amortization of prior service cost	(5)	(4)
Recognized net actuarial loss	1	1
Net periodic benefit cost	\$ 28	\$ 23

Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive loss:

	September 30,	
	2007	2006
Net actuarial loss	\$ 87	\$
Net deferred tax benefit	(30)	
Total accumulated other comprehensive loss	\$ 57	\$
Weighted-average discount rate assumption used to determine benefit obligation	6.00%	5.70%
Weighted-average discount rate assumption used to determine net benefit cost	6.00%	5.70%

The Company's expected benefit payments for the fourth quarter of 2007 are \$8,750 and the expected benefit payments for all of 2007 are \$35,000. The expected contribution for 2007 is \$136,600.

Supplemental Executive Retirement Plan

The Company also sponsors an unfunded, non-qualified supplemental executive retirement plan (SERP) for certain officers. The agreement provides that current active participants, with 5 years of service (vested) and a calculated benefit under the plan, will be paid a life annuity upon retirement at age 55 or older, while vested participants who leave the Company prior to age 55 will be paid a 15-year benefit starting at age 65. For those eligible for benefits, the agreement provides for a minimum 15-year guaranteed benefit for all vested participants. The components of the net periodic benefit cost are:

<i>(Dollars in thousands)</i>	Nine Months Ended September 30,	
	2007	2006
Service cost	\$ 231	\$ 234
Interest cost	195	177
Amortization of transition obligation		21
Amortization of prior service cost	15	15
Recognized net actuarial loss	39	57
Net periodic benefit cost	\$ 480	\$ 504

	Three Months Ended September 30,	
	2007	2006
Service cost	\$ 77	\$ 78
Interest cost	65	59
Amortization of transition obligation		7
Amortization of prior service cost	5	5
Recognized net actuarial loss	13	19

Net periodic benefit cost	\$	160	\$	168
---------------------------	----	-----	----	-----

Table of Contents

Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive loss:

	September 30,	
	2007	2006
Net actuarial loss	\$ 931	\$
Prior service cost	158	
Net deferred tax benefit	(381)	
Total accumulated other comprehensive loss	\$ 708	\$
Weighted-average discount rate assumption used to determine benefit obligation	5.90%	5.55%
Weighted-average discount rate assumption used to determine net benefit cost	5.90%	5.55%

The Company's expected benefit payments for the fourth quarter of 2007 are \$53,000 and the expected benefit payments for all of 2007 are \$211,000. The expected contribution for 2007 is \$640,000.

NOTE 11 RECENT ACCOUNTING PRONOUNCEMENTS

In July 2006, the Financial Accounting Standards Board (FASB) issued Financial Accounting Standards Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken, or expected to be taken, in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. FIN 48 is effective for fiscal years beginning after December 15, 2006. The implementation of FIN 48 did not have a material impact on our financial statements. Although not currently in review, tax years 2004 through 2006 are open for audit by the IRS and Maine Revenue Services. If the Company, as a result of an audit, was assessed interest and penalties, the amounts would be recorded through other non-interest expense.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, which gives entities the option to measure eligible financial assets and financial liabilities at fair value on an instrument-by-instrument basis. The election to use the fair value option is available when an entity first recognizes a financial asset or financial liability. Subsequent changes in fair value must be recorded in earnings. SFAS No. 159 contains provisions to apply the fair value option to existing eligible financial instruments at the date of adoption. This statement is effective as of the beginning of an entity's first fiscal year after November 15, 2007. The Company is in the process of analyzing the impact of SFAS No. 159.

In September 2006, FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and early application is encouraged. Although this Statement does not require any new fair value measurements, it is expected to expand fair value disclosures.

NOTE 12 LITIGATION

The Company is a party to litigation and claims arising in the normal course of business. In addition to the routine litigation incidental to its business, Camden National Bank was a defendant in a lawsuit brought by a former commercial customer, Steamship Navigation Company. The former customer claimed Camden National Bank broke a verbal promise for a \$300,000 loan to fund operating expenses of its ski resort. As a result of this litigation, 20 of the original 21 counts were dismissed, leaving only the single breach of oral contract count, on which the jury returned a verdict against Camden National Bank and awarded damages of \$1.5 million. Management of Camden National Bank and the Company reviewed this matter with counsel and the Company's outside auditors. Management believed that the allegations were unfounded and that it was

Table of Contents

probable that the judgment would be reversed upon appeal. As such, the Company filed a motion asking the judge to reverse the jury verdict and accompanying award of damages. On January 11, 2005, the motion was denied. On February 1, 2005, Camden National Bank filed an appeal of the verdict with the Law Court. On October 20, 2005, oral arguments were held to determine if the jury verdict should be upheld. On February 7, 2006, the Maine Supreme Judicial Court upheld a judgment for the plaintiff in the principal amount of \$1.5 million. Camden National Bank also obtained and recorded judgments in the principal amount of \$865,000 against Steamship Navigation Company, which partially set off the awarded damages. Based upon the assessment of settlement negotiations, Camden National Bank recorded a charge to earnings of \$645,000 in 2006, which was the expected net amount of the offsetting judgments. On August 31, 2006, the Court denied Steamship Navigation Company's motion to revise or set aside Camden National Bank's judgment. The plaintiff's attorney filed an appeal arguing that the Court committed errors in this case, and on April 11, 2007, the Law Court heard oral arguments for the appeal. On May 8, 2007, the Law Court denied Steamship Navigation's appeal ruling that the trial court did not abuse its discretion or err in the case. Camden National Bank filed motions to authorize payment into the Court to satisfy its obligations to Steamship Navigation and to waive post judgment interest. On August 17, 2007, the Law Court decided that post judgment interest should be paid and calculated the amount of post judgment interest due. On August 22, 2007, Camden National Bank recorded an additional charge of approximately \$94,000 related to post judgment interest and, combined with the original \$645,000, paid the full amount owed of \$739,000.

NOTE 13 PROPOSED MERGER

Camden National Corporation and Union Bankshares Company entered into an Agreement and Plan of Merger on August 13, 2007, as amended. The merger agreement provides for the merger of Union Bankshares Company with and into Camden National Corporation, with Camden National Corporation being the surviving corporation. Promptly thereafter, Union Bankshares Company's subsidiary, Union Trust, will merge with and into Camden National Bank with Camden National Bank being the surviving institution. The proposed merger will occur following approval of the proposal by the shareholders of Union Bankshares Company, and satisfaction or waiver of all other conditions to the merger. If the merger is completed, each share of Union Bankshares Company common stock will be converted into the right to receive either \$68.00 in cash or 1.9106 shares of Camden National Corporation common stock, plus cash in lieu of any fractional share. The merger agreement includes allocation procedures intended to ensure that 40% of the outstanding shares of Union Bankshares Company common stock immediately prior to the effective time of the merger will be converted into the right to receive cash, and 60% of these shares of Union Bankshares common stock will be converted into the right to receive Camden National Corporation common stock. In connection with the proposed merger, Camden National Corporation and Union Bankshares have filed relevant materials with the Securities and Exchange Commission (SEC), including the registration statement on Form S-4 containing a proxy statement/prospectus that was filed on September 21, 2007 and amended on October 23, 2007. The proxy statement/prospectus, which contains more detailed information regarding the merger, has been distributed to Union Bankshares shareholders and is publicly available on the SEC's website at www.sec.gov.

Table of Contents

**ITEM 2. MANAGEMENT'S DISCUSSION OF FINANCIAL CONDITION
AND RESULTS OF OPERATION**

FORWARD LOOKING INFORMATION

The discussions set forth below and in the documents we incorporate by reference herein contain certain statements that may be considered forward-looking statements under the Private Securities Litigation Reform Act of 1995. The Company may make written or oral forward-looking statements in other documents we file with the SEC, in our annual reports to stockholders, in press releases and other written materials, and in oral statements made by our officers, directors or employees. You can identify forward-looking statements by the use of the words believe, expect, anticipate, intend, estimate, assume, will, should, and other expressions which predict or indicate future events or trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the control of the Company. These risks, uncertainties and other factors may cause the actual results, performance or achievements of the Company to be materially different from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements. Some of the factors that might cause these differences include, but are not limited to, the following:

general, national or regional economic conditions could be less favorable than anticipated, impacting the performance of the Company's investment portfolio, quality of credits or the overall demand for services;

changes in loan default and charge-off rates could affect the allowance for loan and lease losses;

adverse weather conditions and increases in energy costs could negatively impact State and local tourism, thus potentially affecting the ability of loan customers to meet their repayment obligations;

declines in the equity markets which could result in impairment of goodwill;

reductions in deposit levels could necessitate increased and/or higher cost borrowing to fund loans and investments;

declines in mortgage loan refinancing, equity loan and line of credit activity which could reduce net interest and non-interest income;

changes in the domestic interest rate environment and inflation, as substantially all of the assets and virtually all of the liabilities are monetary in nature;

continuation of increases in short-term market interest rates without a corresponding increase in longer-term market interest rates, adversely affecting net interest income;

misalignment of the Company's interest-bearing assets and liabilities;

increases in loan repayment rates affecting net interest income and the value of mortgage servicing rights;

Edgar Filing: CAMDEN NATIONAL CORP - Form 10-Q

changes in accounting rules, Federal and State laws, regulations and policies governing financial holding companies and their subsidiaries;

changes in industry-specific and information system technology creating operational issues or requiring significant capital investment;

changes in the size and nature of the Company's competition, including industry consolidation and financial services provided by non-bank entities affecting customer base and profitability;

changes in the global geo-political environment, such as acts of terrorism and military action; and

changes in the assumptions used in making such forward-looking statements; and

risks related to the merger of Camden National Corporation and Union Bankshares Company as set forth in the proxy statement/prospectus relating to the transaction, which is available on the SEC's website at www.sec.gov.

You should carefully review all of these factors, and you should be aware that there might be other factors that could cause these differences, including, among others, the risk factors listed in Item 1A. Risk Factors within our Annual Report on Form 10-K for the year ended December 31, 2006. Readers should carefully review the risk factors described therein and should not place undue reliance on our forward-looking statements.

These forward-looking statements were based on information, plans and estimates at the date of this report, and we do not promise to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

Table of Contents**CRITICAL ACCOUNTING POLICIES**

Management's discussion and analysis of our financial condition are based on the consolidated financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of such financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those noted below. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis in making judgments about the carrying values of assets that are not readily apparent from other sources. Under different assumptions or conditions, actual results could differ from the amount derived from our existing estimates.

Allowance for Loan and Lease Losses. In preparing the Consolidated Financial Statements, the ALLL requires the most significant amount of management estimates and assumptions. The ALLL, which is established through a charge to the provision for loan and lease losses, is based on our evaluation of the level of the allowance required in relation to the estimated loss exposure in the loan portfolio. We regularly evaluate the ALLL for adequacy by taking into consideration, among other factors, local industry trends, management's ongoing review of individual loans, trends in levels of watched or criticized assets, an evaluation of results of examinations by regulatory authorities and other third parties, analyses of historical trends in charge-offs and delinquencies, the character and size of the loan portfolio, business and economic conditions and our estimation of probable losses. We use a risk rating system to determine the credit quality of our loans. In assessing the risk rating of a particular loan, among the factors considered include the obligor's debt capacity and financial flexibility, the level of the obligor's earnings, the amount and sources of repayment, the level and nature of contingencies, management strength, and the industry and geography in which the obligor operates. These factors are based on an evaluation of historical information, as well as subjective assessment and interpretation. Emphasizing one factor over another, or considering additional factors that may be relevant in determining the risk rating of a particular loan but which are not currently an explicit part of our methodology, could impact the risk rating assigned by us to that loan. We also apply judgment to derive loss factors associated with each credit facility. These loss factors are determined by facility structure, collateral and type of obligor. The use of different estimates or assumptions could produce different provisions for loan and lease losses, which would affect our earnings. A smaller provision for loan and lease losses results in higher net income, and when a greater amount of provision for loan and lease losses is necessary, the result is lower net income. Monthly, the Corporate Risk Management group reviews the ALLL with the CNB Board of Directors. On a quarterly basis, a more in-depth review of the ALLL, including the methodology for calculating and allocating the ALLL, is reviewed with our Board of Directors, as well as the Camden National Bank Board of Directors. For further ALLL information, refer to Item 1A. Risk Factors and the Notes to Consolidated Financial Statements.

Other Real Estate Owned. Periodically, we acquire property in connection with foreclosures or in satisfaction of debt previously contracted. The valuation of this property is accounted for individually at the lower of the book value of the loan satisfied or its net realizable value on the date of acquisition. At the time of acquisition, if the net realizable value of the property is less than the book value of the loan, a change or reduction in the ALLL is recorded. If the value of the property becomes permanently impaired, as determined by an appraisal or an evaluation in accordance with our appraisal policy, we will record the decline by showing a charge against current earnings. Upon acquisition of a property valued at \$25,000 or more, a current appraisal or a broker's opinion must substantiate market value for the property.

Allowance for Credit Losses. The allowance for credit losses covers our portfolio of lending related commitments. We assess the need for an allowance for lending-related commitments based upon, among other factors, the amount of open commitments, the financial condition of the borrower, and historical losses on credit commitments. In addition, all drawdowns on credit commitments undergo underwriting processes in accordance with our Loan Policy, thus must meet the same underwriting standards.

Other-Than-Temporary Impairment. We record an investment impairment charge at the point we believe an investment has experienced a decline in value that is other than temporary. In determining whether an other-than-temporary impairment has occurred, we review information about the underlying investment that is publicly available, analysts reports, applicable industry data and other pertinent information, and assess our ability to

Table of Contents

hold the securities for the foreseeable future. The investment is written down to its current market value at the time the impairment is deemed to have occurred. Future adverse changes in market conditions, continued poor operating results of underlying investments or other factors could result in further losses that may not be reflected in an investment's current carrying value, possibly requiring an additional impairment charge in the future.

Mortgage Servicing Rights. Servicing assets are recognized as separate assets when servicing rights are acquired through sale of residential mortgage assets. Capitalized servicing rights are reported in other assets and are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial residential mortgage assets. Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized costs. Fair value is determined based upon discounted cash flows using market-based assumptions. In periods of falling market interest rates, accelerated loan prepayment speeds can adversely impact the fair value of these mortgage-servicing rights relative to their book value. In the event that the fair value of these assets were to increase in the future, we can recognize the increased fair value to the extent of the impairment allowance but cannot recognize an asset in excess of its amortized book value. When the book value exceeds the fair value, an impairment of these servicing assets, as a result of changes in observable market data relating to market interest rates, loan prepayment speeds and other factors, could impact our financial condition and results of operations either positively or adversely. We have engaged a recognized third party to periodically evaluate the valuation of the mortgage servicing rights asset.

Valuation of Acquired Assets and Liabilities. We are required to record assets acquired and liabilities assumed at their fair value, which is an estimate determined by the use of internal or other valuation techniques. These valuation estimates result in goodwill and other intangible assets. Such assets are subject to ongoing periodic impairment tests and are evaluated using various fair value techniques.

Impairment of Goodwill and Other Intangibles. SFAS No. 142, *Goodwill and Other Intangibles*, addresses the method of identifying and measuring goodwill and other intangible assets acquired in a business combination, eliminates further amortization of goodwill, and requires periodic impairment evaluations of goodwill. Impairment evaluations are required to be performed annually and may be required more frequently if certain conditions indicating potential impairment exist. If we were to determine that our goodwill was impaired, the recognition of an impairment charge could have an adverse impact on our results of operations in the period that the impairment occurred or on our financial position. Goodwill is evaluated for impairment using several standard valuation techniques including discounted cash flow analyses, as well as an estimation of the impact of business conditions. The use of different estimates or assumptions could produce different estimates of carrying value. We prepare the valuation analyses, which are then reviewed by the Board of Directors. Different estimates or assumptions are also utilized to determine the appropriate carrying value of other assets including, but not limited to, property, plant and equipment, core deposit intangible, and the overall collectibility of loans and receivables.

Interest Income Recognition. Interest on loans is included in income as earned based upon interest rates applied to unpaid principal. Interest is not accrued on loans 90 days or more past due unless they are adequately secured and in the process of collection or on other loans when we believe collection is doubtful. All loans considered impaired are non-accruing. Interest on non-accruing loans is recognized as income when the ultimate collectibility of interest is no longer considered doubtful. When a loan is placed on non-accrual status, all interest previously accrued, but not collected, is reversed against current-period interest income; therefore, an increase in loans on non-accrual status reduces interest income. If a loan is removed from non-accrual status, all previously unrecognized interest is collected and recorded as interest income.

Accounting for Post-retirement Plans. We use a December 31 measurement date to determine the expenses for our post-retirement plans and related financial disclosure information. Post-retirement plan expense is sensitive to changes in eligible employees (and their related demographics) and to changes in the discount rate and other expected rates, such as medical cost trends rates. As with the computations on plan expense, cash contribution requirements are also sensitive to such changes.

Table of Contents

Tax Estimates. We account for income taxes by deferring income taxes based on estimated future tax effects of differences between the tax and book basis of assets and liabilities considering the provisions of enacted tax laws. These differences result in deferred tax assets and liabilities, which are included in the Consolidated Statement of Condition. We must also assess the likelihood that any deferred tax assets will be recovered from future taxable income and establish a valuation allowance for those assets determined not likely to be recoverable. Judgment is required in determining the amount and timing of recognition of the resulting deferred tax assets and liabilities, including projections of future taxable income. Although we have determined a valuation allowance is not required for all deferred tax assets, there is no guarantee that these assets will be recognizable.

RESULTS OF OPERATIONS***Executive Overview***

For the nine months ended September 30, 2007:

Net income declined \$609,000, or 4.0%, for the nine-month period ended September 30, 2007 compared to the nine-month period ended September 30, 2006. However, reflecting the favorable impact of the tender offer stock repurchase completed on May 3, 2006, as well as current year common stock repurchases, net income per diluted share increased 2.8% to \$2.24, compared to \$2.18 per diluted share earned during the first nine months of 2006. The following were major factors contributing to the results of the first nine months of 2007 compared to the same period of 2006:

Net interest income decreased \$3.9 million, or 9.6%, which was a net result of:

- o an increase in interest income of \$1.5 million, or 1.9%, which was primarily due to increased investment balances and earnings on investments as new investments are being added at higher yields, and
- o an increase in interest expense of \$5.4 million, or 14.0%, primarily due to increased average borrowings, the increase in interest rates paid on time deposits and borrowings, and the interest expense on the junior subordinated debentures, which did not occur until the second quarter of 2006.

Provision for loan and lease losses decreased \$1.6 million primarily due to an improvement in our non-performing assets, and an overall decline in loan balances.

Non-interest income increased \$706,000, or 8.1%, primarily due to an increase in income from fiduciary services at Acadia Trust, N.A., in brokerage and insurance commission income at Acadia Financial Consultants (AFC), and increased income on our debit card product.

Non-interest expense decreased \$190,000, or 0.7%, primarily due to the first quarter 2006 charge of \$645,000 resulting from the Steamship Navigation et al litigation involving Camden National Bank and the one-time expenses incurred in 2006 as part of the consolidation of the two banking subsidiaries, partially offset by increased premises and equipment costs due to the Rockland branch relocation and renovation (Spear Block), technology initiatives, and a charge of \$94,000 related to the final settlement of the Steamship Navigation litigation.

For the three months ended September 30, 2007:

Net income declined \$138,000, or 2.7%, for the three-month period ended September 30, 2007 compared to the three-month period ended September 30, 2006. Reflecting the favorable impact of stock repurchases, net income per diluted share was \$0.77 for the third quarter of 2007, which was equal to the \$0.77 per diluted share earned during the third quarter of 2006. The following were major factors contributing to the results of the third quarter of 2007 compared to the same period of 2006:

Net interest income decreased \$987,000, or 7.5%, which was a net result of:

- o a decrease in interest income of \$594,000, or 2.2%, which was primarily a function of a decline in loan balances and the related interest income on loans, and
- o an increase in interest expense of \$393,000, or 2.8%, due to the increase in interest rates paid on deposits and borrowings.

Page 22

Table of Contents

Provision for loan and lease losses decreased \$552,000 primarily due to an improvement in our non-performing assets, and an overall decline in loan balances.

Non-interest income increased \$162,000, or 5.4%, primarily due to an increase in income from fiduciary services at Acadia Trust, N.A., brokerage and insurance commissions at AFC, and increased income on the debit card product.

Non-interest expense increased \$222,000, or 2.7%, primarily due to the adjustment to record the derivatives as economic hedges, normal salary increases, increased premises and equipment costs due to the Spear Block renovation, technology initiatives and the final settlement charge on the Steamship litigation, all partially offset by the one-time expenses incurred in 2006 as part of the consolidation of the two banking subsidiaries.

Financial condition at September 30, 2007 compared to December 31, 2006:

Loans decreased \$43.8 million, or 3.6%, as payoffs in commercial real estate loans more than offset the growth in municipal and consumer loans.

Investments increased \$14.3 million, or 3.2%, due to a reinvestment of anticipated cash flows and increases in federal funds sold during this period.

Deposits decreased \$8.4 million, or 0.7%, as total certificates of deposit declined \$52.9 million, or 9.5%, primarily in brokered deposits, which was partially offset by increases in total transaction accounts of \$19.5 million, or 7.2%, and money market accounts of \$32.1 million, or 12.3%.

Total borrowings increased \$2.1 million, or 0.48%, as the Company shifted from brokered deposits to wholesale borrowings due to favorable pricing, which was partially offset by declines in overnight borrowing.

Net Interest Income

Net interest income, on a fully taxable equivalent basis, for the nine months ended September 30, 2007 was \$38.0 million, a \$3.7 million, or 8.9%, decline compared to the net interest income of \$41.7 million for the first nine months of 2006. We experienced an increase in interest income on investments of \$2.3 million, or 15.3%, during the first nine months of 2007 compared to the same period in 2006, due to increases in volume and an increase in yields as a result of new investments being added to the portfolio at higher yields than maturing investments. Interest income on loans decreased \$500,000, or 0.8%, during the nine-month period of 2007 compared to the same period of 2006, due to an overall decrease in the average balance of loans outstanding, and a 50 basis point decrease in the Prime Rate which had a negative impact on income on adjustable rate loans. Total interest expense increased \$5.6 million, or 14.4%, during the first nine months of 2007 compared to the same period in 2006. This increase was the result of volume increases in higher-cost deposits and borrowings, as well as a competitive and volatile interest rate environment which affected the costs of both deposits and borrowings, primarily in money market accounts, certificates of deposit, and borrowings from the Federal Home Loan Bank of Boston (FHLBB). In addition, during the first nine months of 2007, we recorded \$1.8 million of interest expense related to the junior subordinated debentures, which was \$744,000 higher than the first nine months of 2006 as the debt was not issued until April 25, 2006. Reflecting the continued margin compression resulting from the on-going flatness of the yield curve and a full nine months of interest on the junior subordinated debentures, the net interest margin (net interest income expressed as a percentage of average interest-earning assets) for the first nine months of 2007 was 3.06%, a 33 basis point decline from the 3.39% reported for the same period of 2006.

Net interest income, on a fully taxable equivalent basis, for the three months ended September 30, 2007 was \$12.6 million, a 7.0%, or \$939,000, decrease compared to \$13.5 million in net interest income for the same period in 2006. The decrease was primarily due to declines in loan volumes and increases in deposit and FHLBB borrowing volumes as well as the rising interest rates paid on both deposits and FHLBB borrowings, partially offset by growth in investment balances and increases in the market rate environment which had a positive impact on investment yields.

Table of Contents

The following tables, which present changes in interest income and interest expense by major asset and liability category for nine months ended September 30, 2007 and 2006, illustrate the impact of average volume growth and rate changes. The income from tax-exempt assets, municipal investments and loans, has been adjusted to a tax-equivalent basis, thereby allowing a uniform comparison to be made between asset yields. Changes in net interest income are the result of interest rate movements, changes in the amounts and mix of interest-earning assets and interest-bearing liabilities, and changes in the level of non-interest-earning assets and non-interest-bearing liabilities. We may utilize derivative financial instruments, such as interest rate swap agreements, which could have an effect on net interest income. The average amount of non-accrual loans can also affect the average yield on all outstanding loans. Average non-accrual loans for the periods ended September 30, 2007 and 2006 were \$8.2 million and \$8.7 million, respectively.

ANALYSIS OF CHANGES IN NET INTEREST MARGIN

<i>(Dollars in thousands)</i>	Nine Months Ended September 30, 2007		Nine Months Ended September 30, 2006	
	Amount of Interest	Average Yield/Cost	Amount of Interest	Average Yield/Cost
Interest-earning assets:				
Investments <i>(including federal funds sold)</i>	\$ 17,609	5.09%	\$ 15,273	4.89%
Loans	64,602	7.21%	65,102	7.10%
Total interest-earning assets	82,211	6.62%	80,375	6.54%

Table of Contents***Provision for Loan and Lease Losses***

Provisions are made to the ALLL in order to maintain the ALLL at a level that we believe is reasonable and reflective of the overall risk of loss inherent in the loan portfolio. During the first nine months of 2007, we provided \$100,000 of expense to the ALLL compared to \$1.7 million in the same period of 2006. The determination of an appropriate level of ALLL, and subsequent provision for loan and lease losses which affects earnings, is based on our analysis of various economic factors and review of the loan portfolio, which may change due to numerous factors including loan growth, payoffs of lower quality loans, recoveries on previously charged-off loans, improvement in the financial condition of the borrowers, risk rating downgrades/upgrades and charge-offs. We utilize a comprehensive approach toward determining the ALLL, which includes an expanded risk rating system that enables us to more adequately identify the risks being undertaken, as well as migration within the overall loan portfolio. We recorded net charge-offs of \$1.1 million for the first nine months of 2007 compared to \$1.4 million in 2006. In addition, non-performing assets decreased from \$13.8 million, or 1.13%, of total loans at December 31, 2006, to \$5.9 million, or 0.50% of total loans at September 30, 2007. The decrease in non-performing assets primarily related to two commercial credits placed on nonaccrual during 2006, on which we recovered full principal balance in the first quarter of 2007. We have also experienced a decline in outstanding loan balances due to large pay-offs and the continued conservative posture in our commercial real estate lending activity due to an environment of increased competition highlighted by relaxed credit structures and low long-term fixed rate commitments, which we feel does not provide an adequate reward for the inherent risks. We believe that the ALLL at September 30, 2007 of \$13.9 million, or 1.19% of total loans outstanding was appropriate given the current economic conditions in our service area and the condition of the loan portfolio. As a percentage of total loans outstanding, the ALLL was 1.16% and 1.23% at September 30, 2006 and December 31, 2006, respectively.

Non-interest Income

Total non-interest income increased \$706,000, or 8.1%, for the nine months ended September 30, 2007, compared to the nine months ended September 30, 2006. Income from fiduciary services increased \$378,000, or 11.5%, due to increases in assets under management and employee benefit administration fee income at Acadia Trust, N.A. Brokerage and insurance commission income increased \$221,000, or 59.7%, due to increased sales activity at AFC. Other service charges and fees increased \$109,000, or 8.6%, primarily due to increased debit card transaction fee income.

Total non-interest income increased \$162,000, or 5.4%, during the third quarter of 2007 compared to the third quarter of 2006 as income from fiduciary services increased \$101,000, or 8.9%, due to increases in assets under management and employee benefit administration fee income at Acadia Trust, N.A., and brokerage and insurance commission income increased \$32,000, or 24.6%, due to increased sales activity at AFC. Other service charges and fees increased \$86,000, or 20.7%, primarily due increased income on the debit card product.

Non-interest Expense

Total non-interest expense decreased \$190,000, or 0.7%, for the nine-month period ended September 30, 2007 compared to the nine months ended September 30, 2006. Other non-interest expenses decreased \$677,000, or 8.6%, for the first nine months of 2007 compared to the first nine months of 2006. This was primarily due to a charge in 2006 of \$645,000 resulting from the Steamship Navigation, partially offset by increases in salaries and employee benefit costs of \$231,000, or 1.7%, primarily due to normal salary increases, occupancy costs of \$142,000, or 7.6%, due to increased rent, real estate tax, energy costs, and costs related to the Spear Block renovation, and furniture, equipment and data processing costs of \$122,000, or 7.6%, primarily due to outfitting the Spear Block branch and investments in technology.

Total non-interest expense increased \$222,000, or 2.7%, for the quarter ended September 30, 2007 compared to the same period of 2006. This was primarily due to increased salary and employee benefit costs of \$154,000, or 3.5%, due to normal salary increases and higher incentive costs related to increased performance at AFC, occupancy costs of \$53,000, or 9.2%, due to increased real estate tax, energy costs, and costs related to the Spear Block renovation, and furniture and equipment costs of \$62,000, or 11.4%, primarily due to outfitting the Spear Block branch and investments in technology. Other non-interest expense decreased \$48,000, or 2.0%, primarily due to overall declines in legal costs and costs incurred in 2006 to merge the two banking franchises, partially offset by the adjustment to record the derivatives as economic hedges.

Table of Contents**FINANCIAL CONDITION*****Assets***

During the nine months of 2007, average assets of \$1.7 billion increased \$18.5 million, or 1.1%, compared to the same period in 2006. This increase was the result of an increase in the investment portfolio, in which average investments increased \$45.2 million, or 10.8%, to \$463.0 million for the first nine months of 2007 from \$417.8 million for the first nine months of 2006. The increase in the investment portfolio primarily resulted from the preinvestment of anticipated cash flows during 2007. The loan portfolio, which averaged \$1.2 billion during the first nine months of 2007, declined \$28.9 million, or 2.4%, as compared to \$1.2 billion during the first nine months of 2006. The largest decrease in average loan balances was in commercial real estate loans, which decreased \$58.5 million, or 13.7%, due to large pay-offs and the continued conservative posture in our commercial real estate lending activity due to an environment of increased competition highlighted by relaxed credit structures and low long-term fixed rate commitments, which we feel does not provide an adequate reward for the inherent risks. Residential real estate loans increased \$20.2 million, or 5.2%, reflecting a steady demand for mortgage loans fueled by continued low long-term interest rates. In addition, average municipal loans increased \$7.8 million, or 35.8%, and average consumer loans increased \$2.6 million, or 1.3%, primarily reflecting home equity loan activity.

Total assets of \$1.7 billion have decreased \$22.1 million, or 1.2%, since December 31, 2006, as loan balances decreased \$43.8 million, or 3.6%, due to reasons similar to those stated above, while securities balances have increased \$14.3 million, or 3.2%, as a result of the preinvestment of anticipated cash flows during 2007.

Liabilities and Shareholders Equity

During the first nine months of 2007, average deposits of \$1.2 billion decreased \$45.0 million, or 3.7%, compared to the same period in 2006. Reflecting the increase in rates paid on time deposits, average money market and retail certificate of deposit account balances have increased \$44.4 million and \$20.5 million, respectively, while average brokered certificates of deposit and savings account balances have decreased \$102.6 million and \$6.5 million, respectively. We have increased our use of wholesale borrowings as a funding source, which resulted in average borrowings and long-term debt increasing \$66.0 million to \$458.3 million, the majority of which are with the FHLBB.

Total liabilities have decreased \$29.1 million, or 1.8%, since December 31, 2006, to \$1.6 billion at September 30, 2007. Total deposits decreased \$8.4 million primarily due to declines of \$46.5 million in brokered certificates of deposit reflecting the shift to wholesale borrowings due to favorable pricing, of \$6.4 million in retail certificates of deposit and \$7.1 million in savings accounts. The declines were partially offset by increases in transaction accounts of \$19.5 million reflecting seasonal balance increases, and money market accounts of \$32.1 million due to increases in a new money market sweep account product and seasonal increases in money market account balances. We increased our borrowings \$2.1 million which was the net of a \$77.4 million decrease in borrowings with the FHLBB (primarily overnight), and a \$79.5 million increase in other borrowed funds, primarily wholesale repurchase agreement transactions. In addition, we settled the \$24.4 million due to broker liability related to the year-end trade date security purchase.

Total shareholders equity at September 30, 2007 increased \$7.1 million, or 6.6%, over the balance at December 31, 2006, as a result of current year net income of \$14.7 million and a \$1.1 million decrease in other comprehensive loss primarily due to decreases in the unrealized losses on the available for sale investment portfolio, partially offset by the \$4.5 million used to repurchase common stock and the \$4.8 million paid year-to-date as a shareholder dividend.

Table of Contents**LIQUIDITY**

Liquidity needs require the availability of cash to meet the withdrawal demands of depositors and credit commitments to borrowers. Liquidity is defined as our ability to maintain availability of funds to meet customer needs, as well as to support our asset base. The primary objective of liquidity management is to maintain a balance between sources and uses of funds to meet our cash flow needs in the most economical and expedient manner. Due to the potential for unexpected fluctuations in both deposits and loans, active management of liquidity is necessary. We maintain various sources of funding and levels of liquid assets in excess of regulatory guidelines in order to satisfy varied liquidity demands. We monitor liquidity in accordance with internal guidelines and all applicable regulatory requirements. As of September 30, 2007 and 2006, our level of liquidity exceeded target levels. We believe that we currently have appropriate liquidity available to respond to liquidity demands. Sources of funds that we utilized consist of deposits, borrowings from the FHLBB and other sources, cash flows from operations, prepayments and maturities of outstanding loans, investments and mortgage-backed securities and the sales of mortgage loans.

Deposits continue to represent our primary source of funds. For the first nine months of 2007, average deposits of \$1.2 billion decreased by \$45.0 million, or 3.7%, compared to the first nine months of 2006. Comparing average deposits for the first nine months of 2007 to 2006, average money market and retail certificate of deposit account balances have increased \$44.4 million and \$20.5 million, respectively, while average brokered certificates of deposit and savings account balances have decreased \$102.6 million and \$6.5 million, respectively. Included in the money market deposit category are deposits from Acadia Trust, N.A., representing client funds. The balance in the Acadia Trust, N.A. client money market account, which was \$84.3 million on September 30, 2007, could increase or decrease depending upon changes in the portfolios of the clients of Acadia Trust, N.A. The increase in money market accounts and certificates of deposit during the first nine months of 2007 was the result of an increase in rates paid in 2007 compared to 2006, thus attracting increased customer balances, and increases in a new money market sweep account product.

Borrowings are used to supplement deposits as a source of liquidity. In addition to borrowings from the FHLBB, we purchase federal funds, sell securities under agreements to repurchase and utilize treasury tax and loan accounts. Average borrowings and long-term debt for the first nine months of 2007 was \$458.3 million, an increase of \$66.0 million, from \$392.3 million during the first nine months of 2006. The increase included the impact of the \$36.1 million of junior subordinated debentures and an increase of \$48.0 million in average wholesale borrowings. We secure borrowings from the FHLBB, whose advances remained the largest non-deposit-related, interest-bearing funding source, with qualified residential real estate loans, certain investment securities and certain other assets available to be pledged. The carrying value of loans pledged as collateral at the FHLBB was \$456.7 million and \$348.4 million at September 30, 2007 and 2006, respectively. The carrying value of securities pledged as collateral at the FHLBB was \$137.4 million and \$177.2 million at September 30, 2007 and 2006, respectively. Through our bank subsidiary, we have an available line of credit with FHLBB of \$13.0 million at September 30, 2007 and 2006. We had no outstanding balance on the line of credit with the FHLBB at September 30, 2007 and 2006.

In addition to the liquidity sources discussed above, we believe the investment portfolio and residential loan portfolio provide a significant amount of contingent liquidity that could be accessed in a reasonable time period through sales of those portfolios. We also believe that we have additional untapped access to the national brokered deposit market and commercial reverse repurchase transaction market. These sources are considered as liquidity alternatives in our contingent liquidity plan. We believe that the level of liquidity is sufficient to meet current and future funding requirements. However, changes in economic conditions, including consumer saving habits and availability or access to the national brokered deposit and commercial repurchase markets, could significantly impact our liquidity position.

Table of Contents**CAPITAL RESOURCES**

Under Federal Reserve Board (FRB) guidelines, bank holding companies are required to maintain capital based on risk-adjusted assets. These capital requirements represent quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices.

Our capital classification is also subject to qualitative judgments by our regulators about components, risk weightings and other factors. Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum amounts and ratios of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital to average assets (as defined). These guidelines apply to us on a consolidated basis. Under the current guidelines, banking organizations must maintain a risk-based capital ratio of 8%, of which at least 4% must be in the form of core capital (as defined). Our capital ratios and those of our bank subsidiary exceeded regulatory guidelines at September 30, 2007 and 2006. Our Tier 1 to risk-weighted assets was 12.28% and 10.74% at September 30, 2007 and 2006, respectively. In addition to risk-based capital requirements, the FRB requires bank holding companies to maintain a minimum leverage capital ratio of core capital to total assets of 4.0%. Total assets for this purpose do not include goodwill and any other intangible assets and investments that the FRB determines should be deducted. Our leverage ratio at September 30, 2007 and 2006 was 8.06% and 7.36%, respectively.

Although the junior subordinated debentures are recorded as a liability on our Statement of Condition, we are permitted, in accordance with regulatory guidelines, to include, subject to certain limits, the trust preferred securities in our calculation of risk-based capital. At September 30, 2007, the full \$35.0 million of the trust preferred securities was included in Tier 1 and total risk-based capital.

Our principal cash requirement is the payment of dividends on our common stock as and when declared by the Board of Directors. We are primarily dependent upon the payment of cash dividends by our subsidiaries to service our commitments. We, as the sole shareholder of our subsidiaries, are entitled to dividends when and as declared by each subsidiary's Board of Directors from legally available funds. We paid dividends to shareholders in the aggregate amount of \$4.8 million for first nine months of 2007 and 2006.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

In the normal course of business, we are a party to credit-related financial instruments with off-balance sheet risk, which are not reflected in the Consolidated Statements of Condition. These financial instruments include lending commitments and letters of credit. Those instruments involve varying degrees of credit risk in excess of the amount recognized in the Consolidated Statements of Condition.

We follow the same credit policies in making commitments to extend credit and conditional obligations as we do for on-balance sheet instruments, including requiring similar collateral or other security to support financial instruments with credit risk. Our exposure to credit loss in the event of nonperformance by the customer is represented by the contractual amount of those instruments. Since many of the commitments are expected to expire without being drawn upon, the total amount does not necessarily represent future cash requirements. At September 30, 2007, we had the following levels of commitments to extend credit:

	Total Amount		Commitment Expires in:			
	Committed	<1 year	1-3 years	4-5 years	>5 years	
<i>(Dollars in thousands)</i>						
Letters of Credit	\$ 1,253	\$ 547	\$ 685	\$ 21	\$ 21	
Other Commitments to Extend Credit	245,468	41,072	63,977	1,866	138,553	
Total	\$ 246,721	\$ 41,619	\$ 64,662	\$ 1,866	\$ 138,574	

We are a party to several off-balance sheet contractual obligations through lease agreements on a number of branch facilities. We have an obligation and commitment to make future payments under these contracts. Borrowings from the FHLBB consist of short- and long-term fixed and variable rate borrowings and are collateralized by all stock in the FHLBB and a blanket lien on qualified collateral consisting primarily of loans with first mortgages secured by one-to-four family properties, certain pledged investment securities and other qualified assets. Other borrowed funds include treasury, tax and loan deposits and securities sold under

Table of Contents

repurchase agreements. We have an obligation and commitment to repay all borrowings and debentures. These commitments, borrowings, junior subordinated debentures and the related payments are made during the normal course of business. At September 30, 2007, we had the following levels of contractual obligations for the remainder of 2007 and the fiscal years thereafter:

	Total Amount of Obligations	Payments Due Per Period			
		<1 year	1-3 years	4-5 years	>5 years
<i>(Dollars in thousands)</i>					
Operating Leases	\$ 2,801	\$ 150	\$ 973	\$ 654	\$ 1,024
Capital Leases					
Borrowings from the FHLBB	263,084	1,309	206,679	27,000	28,096
Junior Subordinated Debentures	36,083				36,083
Other Borrowed Funds	140,278	70,278		20,000	50,000
Other Long-Term Obligations					
Total	\$ 442,246	\$ 71,737	\$ 207,652	\$ 47,654	\$ 115,203

We may use derivative instruments as partial hedges against large fluctuations in interest rates. We may also use interest rate swap and floor instruments to partially hedge against potentially lower yields on the variable prime rate loan category in a declining rate environment. If rates were to decline, resulting in reduced income on the adjustable rate loans, there would be an increased income flow from the interest rate swap and floor instruments. We may also use cap instruments to partially hedge against increases in short-term borrowing rates. If rates were to rise, resulting in an increased interest cost, there would be an increased income flow from the cap instruments. These financial instruments are factored into our overall interest rate risk position. We regularly review the credit quality of the counterparty from which the instruments have been purchased. At September 30, 2007, we had only floor agreements with a notional amount of \$50.0 million.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE**ABOUT MARKET RISK****MARKET RISK**

Market risk is the risk of loss in a financial instrument arising from adverse changes in market rates/prices, such as interest rates, foreign currency exchange rates, commodity prices and equity prices. Our primary market risk exposure is interest rate risk. The ongoing monitoring and management of this risk is an important component of our asset/liability management process, which is governed by policies established by the CNB Board of Directors, and are reviewed and approved annually. The Board of Directors Asset/Liability Committee (Board ALCO) delegates responsibility for carrying out the asset/liability management policies to the Management Asset/Liability Committee (Management ALCO). In this capacity, Management ALCO develops guidelines and strategies impacting our asset/liability management-related activities based upon estimated market risk sensitivity, policy limits and overall market interest rate levels/trends. The Management ALCO and Board ALCO jointly meet on a quarterly basis to review strategies, policies, economic conditions and various activities as part of the management of these risks.

Interest Rate Risk

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with our financial instruments also change, thereby impacting net interest income (NII), the primary component of our earnings. Board and Management ALCO utilize the results of a detailed and dynamic simulation model to quantify the estimated exposure of NII to sustained interest rate changes. While Board and Management ALCO routinely monitor simulated NII sensitivity over a rolling 2-year horizon, they also utilize additional tools to monitor potential longer-term interest rate risk.

The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest-earning assets and interest-bearing liabilities reflected on our Statement of Condition, as well as for derivative financial instruments. None of the assets used in the simulation were held for trading purposes. This sensitivity analysis is compared to ALCO policy limits, which specify a maximum

Table of Contents

tolerance level for NII exposure over a 1-year horizon, assuming no balance sheet growth, given a 200 basis point upward and 200 basis point downward shift in interest rates. A parallel and pro rata shift in rates over a 12-month period is assumed. The following reflects our NII sensitivity analysis as measured during the third quarter of 2007.

Rate Change	Estimated Changes in NII
+200bp	(2.00%)
-200bp	1.10%

The preceding sensitivity analysis does not represent a forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including, among others, the nature and timing of interest rate levels, yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits and reinvestment/replacement of asset and liability cash flows. While assumptions are developed based upon current economic and local market conditions, we cannot make any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

The most significant factors affecting the changes in market risk exposure during the first nine months of 2007 were the flat yield curve up until the end of the third quarter, the reduction of earning assets, the increase in fixed rate loans, and the level of shorter-term borrowings. If rates remain at or near current levels and the balance sheet mix remains similar, net interest income is expected to remain relatively flat through the first two years, after which margins begin to widen as assets reprice and replace at higher levels, offsetting increased funding costs. In a sustained rising interest rate environment, net interest income is expected to decline during the first two years, as asset yield increases are unable to offset rising funding costs. As funding costs stabilize in the second year, the asset base continues to reprice and replace at higher rates, resulting in a widening of spreads and improving levels of net interest income. In a falling interest rate environment, net interest income is expected to initially increase, as liability sensitivity drives short-term funding costs down more quickly with falling market rates, while asset yields are slower to react. Once funding costs stabilize in the second year, assets continue to replace and reprice into the lower rate environment. Accordingly, net interest income declines in a sustained lower rate environment. Should the yield curve steepen as rates fall, pressure on net interest income will be significantly reduced or eliminated entirely. The risk in the various rate scenarios is well within our policy limits.

Periodically, if deemed appropriate, we use interest rate swaps, floors and caps, which are common derivative financial instruments, to hedge interest rate risk position. The Board of Directors has approved hedging policy statements governing the use of these instruments. As of September 30, 2007, we had a notional principal amount of \$50.0 million in floor agreements. Board and Management ALCO monitor derivative activities relative to its expectation and our hedging policies.

ITEM 4. CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act), the Company's management conducted an evaluation with the participation of the Company's Chief Executive Officer and Chief Financial Officer (Principal Financial & Accounting Officer), regarding the effectiveness of the Company's disclosure controls and procedures, as of the end of the last fiscal quarter covered by this report. In designing and evaluating the Company's disclosure controls and procedures, the Company and its management recognize that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating and implementing possible controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer (Principal Financial & Accounting Officer) concluded that they believe the Company's disclosure controls and procedures are reasonably effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. The Company intends to continue to review and document the disclosure controls and procedures, including the internal controls and procedures for financial reporting, and may from time to time make changes to the disclosure controls and procedures to enhance their effectiveness and to ensure that the systems evolve with the Company's business.

Table of Contents

There was no change in the internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is a party to litigation and claims arising in the normal course of business. In addition to the routine litigation incidental to its business, Camden National Bank was a defendant in a lawsuit brought by a former commercial customer, Steamship Navigation Company. The former customer claimed Camden National Bank broke a verbal promise for a \$300,000 loan to fund operating expenses of its ski resort. As a result of this litigation, 20 of the original 21 counts were dismissed, leaving only the single breach of oral contract count, on which the jury returned a verdict against Camden National Bank and awarded damages of \$1.5 million. Management of Camden National Bank and the Company reviewed this matter with counsel and the Company's outside auditors. Management believed that the allegations were unfounded and that it was probable that the judgment would be reversed upon appeal. As such, the Company filed a motion asking the judge to reverse the jury verdict and accompanying award of damages. On January 11, 2005, the motion was denied. On February 1, 2005, Camden National Bank filed an appeal of the verdict with the Law Court. On October 20, 2005, oral arguments were held to determine if the jury verdict should be upheld. On February 7, 2006, the Maine Supreme Judicial Court upheld a judgment for the plaintiff in the principal amount of \$1.5 million. Camden National Bank also obtained and recorded judgments in the principal amount of \$865,000 against Steamship Navigation Company, which partially set off the awarded damages. Based upon the assessment of settlement negotiations, Camden National Bank recorded a charge to earnings of \$645,000 in 2006, which was the expected net amount of the offsetting judgments. On August 31, 2006, the Court denied Steamship Navigation Company's motion to revise or set aside Camden National Bank's judgment. The plaintiff's attorney filed an appeal arguing that the Court committed errors in this case, and on April 11, 2007, the Law Court heard oral arguments for the appeal. On May 8, 2007, the Law Court denied Steamship Navigation's appeal ruling that the trial court did not abuse its discretion or err in the case. Camden National Bank filed motions to authorize payment into the Court to satisfy its obligations to Steamship Navigation and to waive post judgment interest. On August 17, 2007, the Law Court decided that post judgment interest should be paid and calculated the amount of post judgment interest due. On August 22, 2007, Camden National Bank recorded an additional charge of approximately \$94,000 related to post judgment interest and, combined with the original \$645,000, paid the full amount owed of \$739,000.

ITEM 1A. RISK FACTORS

There have been no material changes in the Risk Factors described in Item 1A. of the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

(a) None

(b) None

(c) In June 2007, the Board of Directors of the Company voted to authorize the Company to purchase up to 750,000 shares of its authorized and issued common stock. The authority, which expires on July 1, 2008, may be exercised from time to time and in such amounts as market conditions warrant. Any repurchases are intended to make appropriate adjustments to the Company's capital structure, including meeting share requirements related to employee benefit plans and for general corporate purposes. During the third quarter of 2007, we made no purchases under this plan:

Period		(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c)	(d)
				Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
7/1/07	7/31/07		\$		389,537
8/1/07	8/30/07				389,537
9/1/07	9/30/07				389,537
Total			\$		389,537
