ADAPTEC, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Basis of Presentation

In the opinion of management, the accompanying Unaudited Condensed Consolidated Interim Financial Statements (Consolidated Financial Statements) of Adaptec, Inc. and its wholly-owned subsidiaries (collectively, Adaptec or the Company) have been prepared on a consistent basis with the March 31, 2009 audited consolidated annual financial statements and include all adjustments, consisting of only normal recurring adjustments, necessary to fairly state the information set forth therein. This includes the Company's purchase of Aristos Logic Corporation (Aristos), a Delaware corporation, in September 2008, through a merger in which Aristos became a wholly-owned subsidiary of the Company, as further discussed in Note 4. The Consolidated Financial Statements have been prepared in accordance with the regulations of the Securities and Exchange Commission (the SEC) and, therefore, omit certain information and footnote disclosure necessary to present the statements in accordance with accounting principles generally accepted in the United States of America. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009, which was filed with the SEC on June 4, 2009. The results of operations for the third quarter of fiscal 2010 are not necessarily indicative of the results to be expected for the entire fiscal year. The Company has evaluated subsequent events through February 3, 2010, the date that the financial statements were issued and determined that no subsequent events have occurred that require recognition or disclosure in the Company's Consolidated Financial Statements for the third quarter of fiscal 2010.

Certain reclassifications have been made to prior period reported amounts to conform to the current year presentation, including the Company's disclosures surrounding its available-for-sale marketable securities.

The key acronyms used in the Company's industry and accounting rules and regulations referred to within this Quarterly Report on Form 10-Q are listed in alphabetical order in Note 20 to the Consolidated Financial Statements.

2. Recent Accounting Pronouncements

In December 2007, the FASB updated the accounting and reporting requirements for minority interests such that minority interests will be recharacterized as non-controlling interests and will be required to be reported as a component of equity. In addition, the update requires the purchases or sales of equity interests that do not result in a change in control be accounted for as equity transactions and, upon a loss of control, requires the interest sold, as well as any interest retained, to be recorded at fair value with any gain or loss recognized in earnings. The adoption of the accounting standard related to the accounting and reporting for minority interest, which was effective for fiscal years beginning after December 15, 2008, or the beginning of the Company's fiscal 2010, did not have an impact on the Company's Consolidated Financial Statements.

In May 2008, the FASB issued an accounting standard, which requires issuers of convertible debt that may be settled wholly or partly in cash when converted to account for the debt and equity components separately in a manner that reflects the issuer's nonconvertible debt borrowing rate. The adoption of the accounting standard related to the accounting of debt with conversion and other option features, which was effective for fiscal years beginning after December 15, 2008, or the beginning of the Company's fiscal 2010, did not have an impact on the Company's Consolidated Financial Statements as its 3/4% Convertible Senior Subordinated Notes (3/4% Notes) may not be settled in cash or other assets upon conversion.

In April 2009, the FASB amended the requirements for the recognition and measurement of other-than-temporary impairments for debt securities by modifying the current intent and ability indicator and to record impairments related to credit losses in earnings while all other factors are to be recognized in other comprehensive income. An other-than-temporary impairment must be recognized if the Company has the intent to sell the debt security or if it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery. An impairment related to credit losses is when there is a difference between the present value of the cash flows expected to be collected and the amortized cost basis for each security. The adoption of the accounting standard related to the accounting and reporting requirements for debt and equity securities for the recognition of other-than-temporary impairment, including impairments for credit losses, which was effective for interim and annual periods ending after June 15, 2009, or the Company's first quarter of fiscal 2010, did not have a financial impact on the Company's Consolidated Financial Statements; however, the disclosure requirements mandated by this accounting standard are discussed further in Note 6 to the Consolidated Financial Statements.

Table of Contents

ADAPTEC, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

In April 2009, the FASB extended the requirement for a publicly traded company to disclose the fair value of its financial instruments in interim periods or whenever it issues summarized financial information, as well as in its annual financial statements. The adoption of the accounting standard related to the reporting requirements for the fair value of its financial instruments, which was effective for interim and annual periods ending after June 15, 2009, or the Company's first quarter of fiscal 2010, did not have a financial impact on the Company's Consolidated Financial Statements; however, the disclosure requirements mandated by this accounting standard are discussed further in Note 6 and 7 to the Consolidated Financial Statements.

In May 2009, the FASB established general standards of accounting for the disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The disclosure requirement includes a statement of the date through which the Company has evaluated subsequent events and the basis for that date, including a statement that it has not evaluated subsequent events after that date in the set of financial statements being presented. The adoption of the accounting standard related to accounting and disclosure requirements for subsequent events, which was effective for interim and annual periods ending after June 15, 2009, or the Company's first quarter of fiscal 2010, did not have a financial impact on the Company's Consolidated Financial Statements; however, the disclosure requirements mandated by this accounting standard are discussed further in Note 1 to the Consolidated Financial Statements.

In June 2009, the FASB issued the Accounting Standard Codification, which becomes the single source of authoritative, nongovernmental GAAP, except for rules and interpretive releases of the SEC, which are sources of authoritative GAAP for SEC registrants. All other literature, with exception of non-grandfathered and non-SEC, will be considered non-authoritative. All guidance contained in the Codification carries an equal level of authority. The Accounting Standard Codification, which was effective for interim and annual periods ending after September 15, 2009, or the Company's second quarter of fiscal 2010, did not have an impact on the Company's Consolidated Financial Statements as the Codification does not change GAAP, but is intended to make it easier to find and research applicable GAAP guidance to a particular transaction or specific accounting issue.

In September 2009, the FASB amended the requirements for revenue recognition, which eliminates the use of the residual method and incorporates the use of an estimated selling price to allocate arrangement consideration. In addition, the revenue recognition guidance amends the scope to exclude tangible products that contain software and non-software components that function together to deliver the product's essential functionality. The amendments to the accounting standards related to revenue recognition are effective for fiscal years beginning after June 15, 2010, which will be the Company's first quarter of fiscal 2012, unless adopted early. Upon adoption, the Company may apply the guidance retrospectively or prospectively for new or materially modified arrangements. The Company is currently evaluating the financial impact that this accounting standard will have on its Consolidated Financial Statements.

In January 2010, the FASB amended the disclosure requirements for the fair value measurements for recurring and nonrecurring non-financial assets and liabilities. The guidance provides that an entity shall disclose any significant transfers of assets and liabilities between those that are actively traded in markets (level 1) and those that are not actively traded but have observable inputs (level 2), and the reasons for the transfers. This guidance is effective for interim or fiscal periods beginning after December 15, 2009, which will be the Company's fourth quarter of fiscal 2010. The guidance also provides that disclosures for assets and liabilities with significant unobservable inputs (level 3) should separately disclose the purchases, sales, issuances and settlements in a rollforward as opposed to aggregating it as one. This guidance is effective for fiscal years beginning after December 15, 2010, which will be the Company's first quarter of fiscal 2012. The Company does not anticipate that the additional disclosure requirements will have a material impact on its Consolidated Financial Statements.

3. Employee Stock Benefit Plans

Stock Benefit Plans

The Company grants stock options and other stock-based awards to employees, directors and consultants under two equity incentive plans, the 2004 Equity Incentive Plan and the 2006 Director Plan. In addition, the Company has outstanding options issued under equity incentive plans that have terminated and equity plans that it assumed in connection with its previous acquisitions. For a complete discussion of these plans, please refer to Note 9 of the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal

Edgar Filing: ADAPTEC INC - Form 10-Q

year ended March 31, 2009. During the third quarter of fiscal 2010, each non-employee director of the Company received an option to purchase 12,500 shares of the Company's common stock, with such option vesting quarterly over one year and 12,500 shares of restricted stock, which will fully vest one year after the date of grant. However, both the option to purchase 12,500 shares of the Company's common stock and 12,500 shares of restricted stock will vest immediately if the relationship between the Company and the non-employee director ceases for any reason. These equity awards resulted in stock-based compensation expense of \$0.3 million during the third quarter of fiscal 2010.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

As of January 1, 2010, the Company had an aggregate of 20.2 million shares of its common stock reserved for issuance under its 2004 Equity Incentive Plan, of which 7.1 million shares were subject to outstanding options and other stock awards, and 13.1 million shares were available for future grants of options and other stock awards. As of January 1, 2010, the Company had an aggregate of 2.0 million shares of its common stock reserved for issuance under its 2006 Director Plan, of which 0.8 million shares were subject to outstanding options and other stock awards, and 1.2 million shares were available for future grants of options and other stock awards. As of January 1, 2010, the Company had minimal shares of common stock reserved that are subject to outstanding options under assumed plans.

Stock Benefit Plans Activities

Equity Incentive Plans: A summary of option activity under all of the Company's equity incentive plans as of January 1, 2010 and changes during the first nine months of fiscal 2010 was as follows:

	Shares (in thousands, except exercise price and contractual terms)	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at March 31, 2009	5,372	\$ 5.21		
Granted	1,584	\$ 2.87		
Exercised	(62)	\$ 2.44		
Cancelled	(328)	\$ 3.19		
Forfeited	(744)	\$ 7.33		
Outstanding at January 1, 2010	5,822	\$ 4.44	4.21	\$ 930
Options vested and expected to vest at January 1, 2010	5,420	\$ 4.55	4.04	\$ 762
Options exercisable at January 1, 2010	4,015	\$ 5.08	3.19	\$ 247

The aggregate intrinsic value is calculated as the difference between the price of the Company's common stock on The NASDAQ Global Market and the exercise price of the underlying awards for the 2.0 million shares subject to options that were in-the-money at January 1, 2010. During the third quarter and first nine months of fiscal 2010, the aggregate intrinsic value of options exercised under the Company's equity incentive plans were \$0.2 million in each period, determined as of the date of option exercise. During the first nine months of fiscal 2009, the aggregate intrinsic value of options exercised under the Company's equity incentive plans was \$0.3 million. As of January 1, 2010, the total unamortized stock-based compensation expense related to non-vested stock options, net of estimated forfeitures, was \$1.8 million, and this expense is expected to be recognized over a remaining weighted-average period of 2.27 years.

Restricted Stock: Restricted stock awards and restricted stock units (collectively, restricted stock) have been granted under the Company's 2004 Equity Incentive Plan and 2006 Director Plan. The Company's right to repurchase shares of restricted stock awards lapses upon vesting, at which time the shares of restricted stock awards are released to the employees or directors. Restricted stock units are converted into common stock upon the release to the employees or directors upon vesting. Upon the vesting of restricted stock, the Company primarily uses the net share settlement approach, which withholds a portion of the shares to cover the applicable taxes. As of January 1, 2010, there were 1.1 million shares of service-based restricted stock awards and 1.0 million shares of restricted stock units outstanding, all of which are subject to forfeiture if employment terminates prior to the release of restrictions, exclusive of certain change of control provisions. The cost of these awards,

Edgar Filing: ADAPTEC INC - Form 10-Q

determined to be the fair market value of the shares at the date of grant, is expensed ratably over the period the restrictions lapse; except for those restricted stock units that would vest over a specified period based upon meeting certain performance criteria from the date of grant, which would then be evaluated on a quarterly basis. Under the 2004 Equity Incentive Plan, the specified period for restricted stock units with performance-based vesting generally ranges from 18 months to 36 months. Of the 1.0 million shares of restricted stock units outstanding at January 1, 2010, 0.9 million represented

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

restricted stock units with performance-based vesting. The Company assessed the probability of these performance criteria being achieved at January 1, 2010 and determined its probability was remote. Therefore, the Company did not record any stock-based compensation expense associated with these restricted stock units with performance-based vesting in the third quarter and first nine months of fiscal 2010. In addition, any previously recorded stock-based compensation expense associated with these restricted stock units with performance-based vesting, of which \$0.1 million was recorded in the third quarter of fiscal 2009, was reversed in the respective quarter in which the probability of achieving the performance criteria was determined to be remote, resulting in no stock-based compensation expense to date. For a complete discussion on how the restrictions generally lapse for restricted stock, please refer to Note 9 of the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

A summary of activity for restricted stock as of January 1, 2010 and changes during the first nine months of fiscal 2010 was as follows:

	Shares (in thousands, except per share amounts)	Weighted Average Grant-Date Fair Value per Share
Non-vested restricted stock at March 31, 2009	2,181	\$ 3.43
Granted	1,687	\$ 2.82
Vested	(1,172)	\$ 3.65
Cancelled	(554)	\$ 2.90
Non-vested restricted stock at January 1, 2010	2,142	\$ 2.97

All restricted stock was awarded at the par value of \$0.001 per share. As of January 1, 2010, the total unrecognized compensation expense related to non-vested restricted stock, net of estimated forfeitures, which is inclusive of the restricted stock units with performance-based vesting discussed above, was \$4.8 million, and this expense is expected to be recognized over a remaining weighted-average period of 1.84 years.

Stock-Based Compensation

The Company measured and recognized compensation expense for all stock-based awards made to its employees and directors, including employee stock options and other stock-based awards, based on estimated fair values using a straight-line amortization method over the respective requisite service period of the awards and adjusted it for estimated forfeitures. Stock-based compensation expense included in the Unaudited Condensed Consolidated Statements of Operations for the third quarters and first nine months of fiscal 2010 and 2009 was as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
	(in thousands)			
Stock-based compensation expense by caption:				
Cost of revenues	\$ 139	\$ 83	\$ 364	\$ 304
Research and development (2)	505	220	1,213	(46)
Selling, marketing and administrative	2,255	639	3,524	1,851

Edgar Filing: ADAPTEC INC - Form 10-Q

Stock-based compensation expense effect on income (loss) from continuing operations, net of taxes (1)	\$ 2,899	\$ 942	\$ 5,101	\$ 2,109
Stock-based compensation expense by type of award:				
Stock options (1)	\$ 1,277	\$ 316	\$ 1,865	\$ 784
Restricted stock (1)	1,622	626	3,236	1,325
Stock-based compensation expense effect on income (loss) from continuing operations, net of taxes (1)	\$ 2,899	\$ 942	\$ 5,101	\$ 2,109

- (1) In the third quarter and first nine months of fiscal 2010, the Company's Unaudited Condensed Consolidated Statements of Operations included additional compensation expense of \$1.7 million in each period relating to accelerated vesting of certain options and shares of restricted stock or extending the period to exercise stock options after termination. Of this amount, \$0.9 million was attributable to options and \$0.8 million was attributable to restricted stock. Of the \$1.7 million additional compensation expense recorded in the third quarter and first nine months of fiscal 2010, \$0.8 million related to the modification of stock-based awards in connection with the Separation Agreement of Subramanian Sundaresh, the former CEO.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

- (2) The Company recorded a credit to the Unaudited Condensed Consolidated Statements of Operations in the first nine months of fiscal 2009 based on a true-up of actual forfeitures on restricted stock that fully vested prior to the end of the first quarter of fiscal 2009 and in the second quarter of fiscal 2009. This was further impacted by the Company's reduction in headcount through reductions in force, the sale of the Snap Server NAS business and, to a lesser extent, general attrition in the Company's workforce.

Stock-based compensation expense in the above table does not reflect any significant income taxes, which is consistent with the Company's treatment of income or loss from its U.S. operations. For the third quarters and first nine months of fiscal 2010 and 2009, there were no income tax benefits realized for the tax deductions from option exercises of the stock-based payment arrangements. In addition, there were no stock-based compensation costs capitalized as part of an asset in the third quarters and first nine months of fiscal 2010 and 2009 as the amounts are not material.

Valuation Assumptions

The Company used the Black-Scholes option pricing model for determining the estimated fair value for stock options and stock-based awards. The fair value of the Company's outstanding stock options and other stock-based awards granted in the third quarters and first nine months of fiscal 2010 and 2009 was estimated using the following weighted-average assumptions:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
Expected life (in years)	3.81	4.22	4.04	4.37
Risk-free interest rates	1.76%	2.24%	2.18%	2.76%
Expected volatility	48%	38%	49%	38%
Dividend yield				
Weighted average fair value:				
Stock options	\$ 1.26	\$ 1.00	\$ 1.16	\$ 1.21
Restricted stock	\$ 3.29	\$ 2.84	\$ 2.83	\$ 3.46

Common Stock Repurchase Program

In July 2008, the Company's board of directors authorized a stock repurchase program to purchase up to \$40.0 million of the Company's common stock. No common stock repurchases occurred during the third quarter of fiscal 2010. During the first nine months of fiscal 2010, the Company purchased approximately 0.7 million shares of its common stock at an average price of \$2.46 per share for an aggregate purchase price of \$1.7 million, excluding brokerage commissions. The Company has accounted for these treasury shares, which have not been retired or reissued, under the treasury method. All purchases made under the program were made in the open market. As of January 1, 2010, \$35.9 million remained available for repurchase under the authorized stock repurchase program.

Warrants

In June 2004, the Company issued a warrant to IBM to purchase up to 250,000 shares of the Company's common stock at an exercise price of \$8.13 per share; however, the warrant expired unexercised in June 2009. The Company issued a warrant to IBM in August 2004 to purchase up to 250,000 shares of the Company's common stock at an exercise price of \$6.94 per share; however, the warrant expired unexercised in August 2009. For further discussion on these warrants, please refer to Note 16 of the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****4. Acquisition**

In September 2008, the Company acquired Aristos, a provider of RAID technology to the data storage industry, for a purchase price of approximately \$38.9 million, which consisted of: (i) approximately \$28.7 million that was paid to certain Aristos senior preferred stockholders and warrant holders, of which approximately \$2.1 million is being withheld in an escrow account to secure potential indemnification obligations of Aristos stockholders as of January 1, 2010; (ii) approximately \$3.2 million under a management liquidation pool established by Aristos prior to completion of the merger, which was immediately paid upon closing of the transaction; (iii) payments made of approximately \$6.2 million to retire and satisfy certain commercial obligations and payables of Aristos; and (iv) \$0.8 million accrued for direct transaction fees, including legal, valuation and accounting fees.

The Aristos acquisition was accounted for as a business combination and, accordingly, the results of Aristos have been included in the Company's unaudited condensed consolidated results of operation and financial position from the date of acquisition. The allocation of the Aristos purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed was based on valuation techniques such as the discounted cash flows and weighted average cost methods used in the high technology industry using assumptions and estimates from management to calculate fair value.

Pro forma financial information: The following unaudited pro forma financial information for the first nine months of fiscal 2009 presents the combined results of the Company and Aristos, as if the acquisition had occurred at the beginning of the period presented. Such pro forma results are not necessarily indicative of what actually would have occurred had the Aristos acquisition been in effect for the periods presented nor are they indicative of results that could occur in the future. Certain adjustments have been made to the combined results of operations, including the amortization of acquired other intangible assets, a reduction to interest income to reflect the cash paid for the acquisition, a reduction to interest expense related to the Aristos debt, the elimination of the change in fair value of preferred stock warrants, which were extinguished as part of the merger agreement, and the elimination of share-based compensation expense recognized by Aristos, as the Company did not assume any share-based awards as part of the merger. The pro forma financial results for the first nine months of fiscal 2009 were as follows:

	Nine-Month Period Ended December 26, 2008	
	(in thousands, except per share amounts)	
Net revenues	\$	93,149
Loss from continuing operations, net of taxes	\$	(7,304)
Income from discontinued operations, net of taxes		3,664
Net loss	\$	(3,640)
Income (loss) per common share:		
Basic and diluted		
Continuing operations	\$	(0.06)
Discontinued operations	\$	0.03
Net loss	\$	(0.03)
Shares used in computing income (loss) per share:		
Basic and Diluted		119,702

5. Business Dispositions

Snap Server NAS Business:

On June 27, 2008, the Company entered into an asset purchase agreement with Overland Storage, Inc. (Overland) for the sale of the Snap Server NAS portion of the Company's former SSG segment (Snap Server NAS business) for \$3.3 million, of which \$2.1 million was received by the Company upon the closing of the transaction and the remaining \$1.2 million was to be received on the 12 month anniversary of the closing of the transaction. This resulted in a recorded gain of \$5.8 million on the disposal of the Snap Server NAS business in the first quarter of fiscal 2009 in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations. In the third quarter of fiscal

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

2009, the Company established a reserve for the full remaining \$1.2 million of this receivable due to the financial difficulties Overland has reported. In the first quarter of fiscal 2010, the Company amended the promissory note agreement with Overland, which allows Overland to pay the Company the remaining \$1.2 million receivable plus accrued interest by March 31, 2010. Due to the continued concern of Overland's ability to pay the Company, the Company will release the reserve on the receivable as cash is collected. As a result, in the third quarter and first nine months of fiscal 2010, the Company recorded a gain of \$0.2 million and \$1.0 million, respectively, in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations, based on the cash received in connection with the amended promissory note agreement. To date, the Company has recorded a cumulative gain of \$5.6 million through the first nine months of fiscal 2010 on the disposal of the Snap Server NAS business in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations.

Net revenues and the components of loss related to the Snap Server NAS business included in discontinued operations for the third quarter and first nine months of fiscal 2009, which were previously included in the Company's SSG segment, were as follows:

	Three-Month Period Ended December 26, 2008	Nine-Month Period Ended December 26, 2008
	(in thousands)	
Net revenues	\$ 105	\$ 4,413
Loss from discontinued operations before income taxes	(207)	(941)
Provision for income taxes		
Loss from discontinued operations, net of taxes	\$ (207)	\$ (941)

6. Marketable Securities

The Company's investment policy focuses on three objectives: to preserve capital, to meet liquidity requirements and to maximize total return. The Company's investment policy establishes minimum ratings for each classification of investment and investment concentration is limited to minimize risk. The policy also limits the final maturity on any investment and the overall duration of the portfolio. Given the overall market conditions, the Company regularly reviews its investment portfolio to ensure adherence to its investment policy and to monitor individual investments for risk analysis and proper valuation.

The Company's portfolio of marketable securities at January 1, 2010 was as follows:

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
Available-for-Sale Marketable Securities:				
Short-term deposits	\$ 26,526	\$	\$	\$ 26,526

Amounts classified as cash equivalents	(46,341)			(46,341)
Amounts classified as marketable securities	\$ 290,869	\$ 3,751	\$ (161)	\$ 294,459

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

The Company's portfolio of marketable securities at March 31, 2009 was as follows:

	Cost	Gross Unrealized Gains (in thousands)	Gross Unrealized Losses	Estimated Fair Value
Available-for-Sale Marketable Securities:				
Short-term deposits	\$ 62,657	\$	\$	\$ 62,657
United States government securities	6,511	144		6,655
Government agencies	86,746	1,751		88,497
Mortgage-backed securities	43,366	654	(9)	44,011
Corporate obligations	92,311	1,071	(559)	92,823
Asset-backed securities	32,755	198	(71)	32,882
Total available-for-sale securities	324,346	3,818	(639)	327,525
Amounts classified as cash equivalents	(62,657)			(62,657)
Amounts classified as marketable securities	\$ 261,689	\$ 3,818	\$ (639)	\$ 264,868

The gross realized gains and losses from the sales of marketable securities for the third quarters and first nine months of fiscal 2010 and 2009 were as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
	(in thousands)			
Gross realized gains	\$ 191	\$ 146	\$ 580	\$ 1,231
Gross realized losses	\$ (12)	\$ (118)	\$ (166)	\$ (684)

The following table summarizes the fair value and gross unrealized losses of the Company's available-for-sale marketable securities, aggregated by type of investment instrument and length of time that individual securities have been in a continuous unrealized loss position, at January 1, 2010:

	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(in thousands)					
United States government securities	\$ 5,429	\$ (20)	\$	\$	\$ 5,429	\$ (20)
Government agencies	14,523	(75)			14,523	(75)
Mortgage-backed securities	5,240	(13)			5,240	(13)

Edgar Filing: ADAPTEC INC - Form 10-Q

Corporate obligations	14,474	(52)		14,474	(52)
Asset-backed securities	475	(1)		475	(1)
 Total	 \$ 40,141	 \$ (161)	 \$	 \$	 \$ 40,141
					 \$ (161)

The Company's investment portfolio consists of both corporate and government securities that generally mature within three years. The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As yields increase, those securities purchased with a lower yield-at-cost show a mark-to-market unrealized loss. All unrealized losses are due to liquidity challenges and changes in interest rates and bond yields. The Company has considered all available evidence and determined that the marketable securities in which unrealized losses were recorded in the third quarters and first nine months of fiscal 2010 and 2009 were not deemed to be other-than-temporary. The Company holds its marketable securities as available-for-sale and marks them to market. The Company expects to realize the full value of all its marketable securities upon maturity or sale, as the Company has the intent and ability to hold the securities until the full value is realized. However, the Company cannot provide any assurance that its invested cash, cash equivalents and marketable securities will not be impacted by adverse conditions in the financial markets, which may require the Company to record an impairment charge that could adversely impact its financial results.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

The amortized cost and estimated fair value of investments in available-for-sale debt securities at January 1, 2010, by contractual maturity, were as follows:

	Cost	Estimated Fair Value
	(in thousands)	
Mature in one year or less	\$ 170,132	\$ 171,592
Mature after one year through three years	166,721	168,850
Mature after three years	357	358
Total	\$ 337,210	\$ 340,800

The maturities of asset-backed and mortgage-backed securities were estimated primarily based upon assumed prepayment forecasts utilizing interest rate scenarios and mortgage loan characteristics.

7. Fair Value Measurements

On April 1, 2008, the Company partially adopted the accounting and disclosure requirements for measuring fair value related to all of the Company's recurring non-financial assets and liabilities. On April 1, 2009, the Company adopted the remaining accounting and disclosure requirements for the non-recurring fair value measurements of non-financial assets and liabilities, including guidance provided by the FASB on how to determine the fair value of assets and liabilities when the volume and level of activity for the asset or liability has significantly decreased when compared with normal market activity for the asset or liability as well as guidance on identifying circumstances that indicate a transaction is not orderly. The adoption of these accounting standards did not have a material impact on the Company's Consolidated Financial Statements.

Fair value is defined as the price that would be received for selling an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The accounting standard surrounding fair value measurements establishes a fair value hierarchy, consisting of three levels, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The Company utilized levels 1 and 2 to value its financial assets on a recurring basis. Level 1 instruments use quoted prices in active markets for identical assets or liabilities, which include the Company's cash accounts, short-term deposits and money market funds as these specific assets are highly liquid. Level 1 instruments also include United States government securities, government agencies and substantially all mortgage-backed securities as these securities are backed by the federal government and traded in active markets frequently with sufficient volume. Level 2 instruments use quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities and include corporate obligations and asset-backed securities as similar or identical instruments can be found in active markets. At both January 1, 2010 and March 31, 2009, the Company did not have any assets utilizing level 3 to value its financial assets on a recurring basis. Level 3 is supported by little or no market activity and requires a high level of judgment to determine fair value.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

Financial assets measured at fair value on a recurring basis at January 1, 2010 and March 31, 2009 were as follows:

	January 1, 2010			March 31, 2009		
	Fair Value Measurements At Reporting Date Using Quoted Prices			Fair Value Measurements At Reporting Date Using Quoted Prices		
	in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)	Total	in Active Markets for Identical Assets (Level 1)	
	Total	(Level 1)	(Level 2)	Total	(Level 1)	Inputs (Level 2)
(in thousands)						
Cash, including short-term deposits (1)	\$ 66,115	\$ 66,115	\$	\$ 111,724	\$ 111,724	\$
United States government securities (2)	17,634	17,634		6,655	6,655

Total	\$ 380,389	\$ 213,743	\$ 166,646	\$ 376,592	\$ 248,697	\$ 127,895

- (1) At January 1, 2010, the Company recorded \$66,001,000 and \$ 114,000 within Cash and cash equivalents and Marketable securities, respectively. At March 31, 2009, the Company recorded \$111,724,000 within Cash and cash equivalents.
- (2) Recorded within Marketable securities.
- (3) At January 1, 2010, the Company recorded \$19,929,000 and \$133,139,000 within Cash and cash equivalents and Marketable securities, respectively. At March 31, 2009, the Company recorded \$92,823,000 within Marketable securities.

At January 1, 2010, the Company utilized level 3, which is categorized as significant unobservable inputs, to value its non-financial assets on a non-recurring basis. The non-financial assets related to the Company's non-controlling interest in certain non-public companies through two venture capital funds, Pacven Walden Ventures V Funds and APV Technology Partners II, L.P. At January 1, 2010 and March 31, 2009, the carrying value of such investments aggregated \$1.2 million for each period, and was included within Other Long Term Assets on the Unaudited Condensed Consolidated Balance Sheets. The Company regularly monitors these investments by recording these investments based on quarterly statements the Company receives from the funds. The statements are generally received one quarter in arrears, as more timely valuations are not practical. In the event that the carrying value of its equity investments exceeds their fair value, or the decline in value is determined to be other-than-temporary, the carrying value is reduced to its current fair value, which is recorded in Interest and Other Income, Net, in the Unaudited Condensed Consolidated Statements of Operations.

In July 2009, the Company entered into a software license agreement with Synopsys, Inc. for \$1.8 million, of which \$0.7 million was paid in the first nine months of fiscal 2010 and the remaining \$1.1 million will be paid through March 2011. The amortization of the software license agreement will be recorded in Research and development over an estimated useful life of three years reflecting the pattern in which economic benefits of the assets are realized.

Amortization of other intangible assets, net was \$1.4 million and \$1.5 million in the third quarters of fiscal 2010 and 2009, respectively. Amortization of other intangible assets, net was \$4.1 million and \$2.0 million in the first nine months of fiscal 2010 and 2009, respectively.

In December 2009, the Company announced that it has initiated a process to pursue the potential sale or disposition of certain of its assets or business operations. As a result of this announcement, the Company evaluated its long-lived assets to determine whether the net book value would be recoverable. Based on the Company's analysis, its long-lived assets were not considered impaired in the third quarter of fiscal 2010 as the sum of the expected undiscounted future cash flows exceeded the net book value of its long-lived assets. The sum of the expected undiscounted future cash flows was weighted to take into consideration the possible outcomes of whether the long-lived assets would be retained and utilized as opposed to sold or disposed.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

The annual amortization expense of the other intangible assets, net, that existed as of January 1, 2010, is expected to be as follows:

	Estimated Amortization Expense (in thousands)
Fiscal Years:	
2010 (remaining three months)	\$ 1,410
2011	5,645
2012	4,887
2013	3,931
2014	1,567
Total	\$ 17,440

10. Commitments and Contingencies

The Company is a party to litigation matters and claims, including those related to intellectual property, which are normal in the course of its operations, and while the results of such litigation matters and claims cannot be predicted with certainty, the Company believes that the final outcome of such matters will not have a material adverse impact on its financial position or results of operations. However, because of the nature and inherent uncertainties of litigation, should the outcome of these actions be unfavorable, the Company's business, financial condition, results of operations and cash flows could be materially and adversely affected.

In connection with the Company's acquisitions of Aristos and Eurologic, a portion of the respective purchase prices and other future payments totaling \$4.3 million and \$3.8 million, respectively, were held back (the "Holdback") to secure potential indemnification obligations of Aristos and Eurologic stockholders for unknown liabilities that may have existed as of each acquisition date. \$2.2 million of the Aristos Holdback was paid in the second quarter of fiscal 2010. As of January 1, 2010, the Aristos Holdback of \$2.1 million remains outstanding for potential unknown liabilities that may arise. In the first nine months of fiscal 2009, the Company resolved the remaining disputed, outstanding claims against the Eurologic Holdback by entering into a deed of indemnity and a written settlement agreement with the representative of the Eurologic shareholders, which resulted in additional payments of \$1.3 million. The Company's initial payment of \$2.3 million to the Eurologic shareholders was recorded in fiscal 2005. The remaining Eurologic Holdback balance of \$0.2 million was retained by the Company and was recognized as a gain in the first nine months of fiscal 2009 in "Loss from discontinued operations, net of taxes" in the Unaudited Condensed Consolidated Statements of Operations.

Contractual Obligations

As of January 1, 2010, the Company did not have any significant changes to the contractual obligations that were disclosed in Note 10 of the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009, other than the Consulting Service Agreement that the Company entered into with Subramanian Sundaresh, its former CEO, and other contractual arrangements with certain executive officers in which the Company may be required to make additional payments based on the achievement of specified objectives, including objectives related to the potential sale or other disposition of the Company's certain assets and business operations.

Risks and Uncertainties

Edgar Filing: ADAPTEC INC - Form 10-Q

In December 2009, the Company announced that it has initiated a process to pursue the potential sale or disposition of certain of its assets or business operations. If the Company is successful in completing a sale or disposition of its assets or business operations within the next twelve months, it is reasonably possible that the Company may incur significant charges in the future, which the Company can not estimate at this time. However, the Company believes its exposure includes, but is not limited to, the following:

Impairment of its long-lived assets;

Restructuring charges;

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

Acceleration of unvested stock-based awards; and

Payments of its contractual obligations.

11. Restructuring Charges

In the third quarter of fiscal 2010, the Company committed to a new restructuring plan to better align its operating costs with the continued decline in its net revenues, resulting in a restructuring charge of \$1.0 million. The Company reduced its workforce primarily in the general administrative functions and provided severance and related benefits of \$0.8 million. The Company also consolidated its facilities further and incurred a net estimated loss of \$0.2 million for vacating the premises. The actions from this restructuring plan are expected to continue in the fourth quarter of fiscal 2010 with expected expenses of approximately \$0.2 million for severance and related benefits.

In addition, in the first nine months of fiscal 2010, the Company recorded minimal adjustments to the restructuring accrual primarily related to the estimated loss on facilities that the Company subleased related to its previous acquisition-related restructuring plan. All expenses, including adjustments, associated with the Company's restructuring plans are included in Restructuring charges in the Unaudited Condensed Consolidated Statements of Operations and are managed at the corporate level. For a complete discussion of all restructuring actions that were implemented prior to fiscal 2010, which were to bring its operational expenses to appropriate levels relative to the Company's net revenues, while simultaneously implementing extensive company-wide expense-control programs, please refer to Note 11 of the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

The activity in the restructuring accrual was as follows for the first nine months of fiscal 2010:

	Severance and Benefits	Other Charges	Total
	(in thousands)		
Accrual balance at March 31, 2009	\$ 1,086	\$ 1,803	\$ 2,889
Q3 10 Restructuring Plan charges	742	220	962
Accrual adjustments	(16)	73	57
Cash paid	(1,429)	(1,053)	(2,482)
Accrual balance at January 1, 2010	\$ 383	\$ 1,043	\$ 1,426

The Company anticipates that the remaining restructuring severance and benefits balance of \$0.4 million at January 1, 2010, will be substantially paid out by the first quarter of fiscal 2011 while the remaining restructuring other charges balance of \$1.0 million, relating to lease obligations, will be paid out through the third quarter of fiscal 2012. Of the remaining restructuring accrual balance at January 1, 2010, \$1.1 million was reflected in Accrued and other liabilities and \$0.3 million was reflected in Other long-term liabilities in the Unaudited Condensed Consolidated Balance Sheets.

The activity in the restructuring accrual was as follows for the first nine months of fiscal 2009:

	Severance and Benefits	Other Charges	Total
	(in thousands)		

Edgar Filing: ADAPTEC INC - Form 10-Q

Accrual balance at March 31, 2008	\$ 21	\$ 2,778	\$ 2,799
Q1 09 Restructuring Plan charges	3,054	354	3,408
Q3 09 Restructuring Plan charges	946		946
Accrual adjustments	(58)	(127)	(185)
Cash paid	(2,983)	(1,125)	(4,108)
Accrual balance at December 26, 2008	\$ 980	\$ 1,880	\$ 2,860

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****12. Interest and Other Income, Net**

The components of interest and other income, net, for the third quarters and first nine months of fiscal 2010 and 2009 were as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
	(in thousands)			
Interest income	\$ 1,990	\$ 3,421	\$ 6,609	\$ 14,016
Realized currency transaction gains (losses)	(34)	(207)	439	(581)
Gain on extinguishment of debt, net		360		1,643
Gain on settlement of class action suit	944		944	
Gain on sale of investments	440		440	
Other	246		165	
Interest and other income, net	\$ 3,586	\$ 3,574	\$ 8,597	\$ 15,078

In the third quarter of fiscal 2010, the Company received \$0.9 million from Micron Technology, Inc. as part of a class action settlement regarding DRAM antitrust matters. The Company also recorded a gain of \$0.4 million from the sale of an investment in a non-controlling interest of a non-public company.

In the third quarter of fiscal 2009, the Company repurchased \$52.5 million in principal amount of its 3/4% Notes on the open market for an aggregate price of \$52.0 million, resulting in a gain on extinguishment of debt of \$0.4 million (net of unamortized debt issuance costs of \$0.1 million). In the first nine months of fiscal 2009, the Company repurchased \$191.0 million in principal amount of its 3/4% Notes on the open market for an aggregate price of \$188.9 million, resulting in a gain on extinguishment of debt of \$1.7 million (net of unamortized debt issuance costs of \$0.4 million). In addition, the majority of the remaining holders of the 3/4% Notes exercised their put option in December 2008, which required the Company to purchase their 3/4% Notes at a price equal to 100.25% of the principal of the 3/4% Notes, resulting in the redemption of the 3/4% Notes for an aggregate cost of \$32.5 million, plus accrued and unpaid interest.

13. Income Taxes

The Company recorded a tax provision of \$0.1 million in the third quarter of fiscal 2010 compared to a tax benefit of \$3.9 million in the third quarter of fiscal 2009. The Company recorded tax benefits of \$2.7 million and \$1.4 million in the first nine months of fiscal 2010 and 2009, respectively. Income tax provisions for interim periods are based on the Company's estimated annual income tax rate for entities that were profitable. Entities that had operating losses with no tax benefit were excluded. The estimated annual tax for fiscal years 2010 and 2009 includes foreign taxes related to the Company's foreign subsidiaries and certain state minimum taxes. Interest is accrued on prior years' tax disputes and refund claims as a discrete item each period. Although the Company believes its tax estimates are reasonable, the ultimate tax outcome may materially differ from the tax amounts recorded in its Consolidated Financial Statements and may cause a higher effective tax rate that could materially affect its income tax provision, results of operations or cash flows in the period or periods for which such determination is made.

In the third quarter and first nine months of fiscal 2010, the tax provision and tax benefit, respectively, included discrete tax benefits of \$1.3 million in each period related to additional tax refunds that became available to the Company during the third quarter of fiscal 2010 due to the enactment of the Worker, Homeownership and Business Act of 2009, which allowed for an extension of the net operating loss carryback period from two to five years for United States federal tax purposes. The Company also recorded discrete tax benefits of \$1.8 million and \$4.4 million, in the third quarter and first nine months of fiscal 2010, respectively, primarily due to reaching final settlement with the German Tax Authorities for fiscal years 2001 through 2004 and the Singapore Tax Authorities for fiscal year 2001, reflecting the reversal of previously accrued liabilities

Edgar Filing: ADAPTEC INC - Form 10-Q

and refunded tax amounts. This was partially offset by discrete tax expense of \$3.2 million in both the third quarter and first nine months of fiscal 2010, primarily due to the on-going audits in its foreign jurisdictions.

For the first nine months of fiscal 2010 and 2009, the Company's tax provision included changes in judgment in other uncertain tax positions in the U.S. and certain foreign jurisdictions based on new information received and new uncertain tax positions that were identified. In the first nine months of fiscal 2009, the IRS concluded its audit of the Company's federal income tax returns for the fiscal 2004 through 2006 audit cycle. The IRS issued a No Change Report indicating no change to the Company's tax liability; however, the IRS continues to have the ability to adjust tax attributes relating to these years in subsequent audits. The Company believes that it has provided sufficient tax provisions for these years and that the ultimate outcome of any future IRS audits that include the tax attributes will not have a material adverse impact on its financial position or results of operations in future periods. The tax authorities in the foreign jurisdictions that the Company operates in continue

Table of Contents

ADAPTEC, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

to audit its tax returns for fiscal years subsequent to 1999. The potential outcome of these audits is uncertain and could result in material tax provisions or benefits in future periods. However, the Company cannot predict with certainty how these matters will be resolved and whether it will be required to make additional tax payments for the tax exposures in its foreign jurisdictions.

As of January 1, 2010, the Company's total gross unrecognized tax benefits were \$24.7 million, of which \$4.3 million, if recognized, would affect the effective tax rate. There was an overall decrease of \$3.1 million in the Company's gross unrecognized tax benefits in the first nine months of fiscal 2010 due to benefits from the Singapore and Germany audit settlements noted above, offset by changes in judgment related to foreign audits as a result of new information that the Company received in the first nine months of fiscal 2010.

The Company is subject to U.S. federal income tax as well as income taxes in many U.S. states and foreign jurisdictions. As of January 1, 2010, fiscal years 2004 onward remained open to examination by the U.S. taxing authorities and fiscal years 1999 onward remained open to examination in various foreign jurisdictions. U.S. tax attributes generated in tax years 2004 onward also remain subject to adjustment in subsequent audits when they are utilized. Management believes that events that could occur in the next 12 months and cause a material change in unrecognized tax benefits include, but are not limited to, the following:

completion of examinations of the Company's tax returns by the U.S. or foreign tax authorities; and

expiration of statutes of limitations on the Company's tax returns

The calculation of unrecognized tax benefits involves dealing with uncertainties in the application of complex global tax regulations. Management regularly assesses the Company's tax positions in light of legislative, bilateral tax treaty, regulatory and judicial developments in the countries in which the Company does business. Management believes that it is not reasonably possible that the gross unrecognized tax benefits will change significantly within the next 12 months.

14. Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted net income per share gives effect to all potentially dilutive common shares outstanding during the period, which include certain stock-based awards and warrants, calculated using the treasury stock method, and convertible notes which are potentially dilutive at certain earnings levels, and are computed using the if-converted method.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

A reconciliation of the numerator and denominator of the basic and diluted income (loss) per share computations for continuing operations, discontinued operations and net income (loss) for the third quarters and first nine months of fiscal 2010 and 2009 was as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008 (1)	January 1, 2010	December 26, 2008
(in thousands, except per share amounts)				
Numerators:				
Income (loss) from continuing operations, net of taxes - basic	\$ (7,494)	\$ 90	\$ (11,431)	\$ 3,355
Income (loss) from discontinued operations, net of taxes - basic	212	(1,396)	970	3,664
Net income (loss) - basic	\$ (7,282)	\$ (1,306)	\$ (10,461)	\$ 7,019
Adjustments:				
Adjustment for interest expense on 3/4% Notes, net of taxes	\$	\$	\$	\$ 1,388
Adjustment for gain on repurchase of 3/4% Notes, net of taxes				(1,643)
Total adjustments	\$	\$	\$	\$ (255)
Adjusted income (loss) from continuing operations, net of taxes - diluted	\$ (7,494)	\$ 90	\$ (11,431)	\$ 3,100
Adjusted income (loss) from discontinued operations, net of taxes - diluted	212	(1,396)	970	3,664
Adjusted net income (loss) - diluted	\$ (7,282)	\$ (1,306)	\$ (10,461)	\$ 6,764
Denominators:				
Weighted average shares outstanding - basic	119,137	120,231	119,127	119,702
Effect of dilutive securities:				
Stock options and other stock-based awards		242		689
3/4% Notes				12,374
Weighted average shares and potentially dilutive common shares outstanding - diluted	119,137	120,473	119,127	132,765
Income (loss) per share:				
Basic				
Continuing operations	\$ (0.06)	\$ 0.00	\$ (0.10)	\$ 0.03
Discontinued operations	\$ 0.00	\$ (0.01)	\$ 0.01	\$ 0.03
Net income (loss)	\$ (0.06)	\$ (0.01)	\$ (0.09)	\$ 0.06
Diluted				
Continuing operations	\$ (0.06)	\$ 0.00	\$ (0.10)	\$ 0.02
Discontinued operations	\$ 0.00	\$ (0.01)	\$ 0.01	\$ 0.03
Net income (loss)	\$ (0.06)	\$ (0.01)	\$ (0.09)	\$ 0.05

(1)

Edgar Filing: ADAPTEC INC - Form 10-Q

For presentation purposes, the Company excluded the dilutive effect of the convertible notes, including the associated interest expense and gain on early extinguishment of debt during the third quarter of fiscal 2009 as the amounts yielded the same diluted earnings per share calculation.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

Diluted loss per share for the third quarter and first nine months of fiscal 2010 was based only on the weighted-average number of shares outstanding during each of the periods, as the inclusion of any common stock equivalents would have been anti-dilutive. As a result, the same weighted-average number of common shares outstanding during each of those periods was used to calculate both the basic and diluted earnings per share. In addition, certain potential common shares were excluded from the diluted computation for the third quarter and first nine months of fiscal 2009 because their inclusion would have been anti-dilutive. The weighted-average number of common shares used to calculate the diluted earnings per share for income (loss) from continuing operations, net of taxes, during that period was also used to compute all other reported diluted earnings per share, even though it could result in anti-dilution. The potential common shares excluded for the third quarters and first nine months of fiscal 2010 and 2009 were as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
	(in thousands)			
Outstanding stock options	6,038	6,428	5,624	6,808
Outstanding restricted stock	2,461	7	2,442	3
Warrants(1)		4,244	225	12,873
3/4% Notes	35	3,744	35	

- (1) In connection with the issuance of its 3/4% Notes, the Company entered into a derivative financial instrument to repurchase up to 19,224,000 shares of its common stock, at the Company's option, at specified prices in the future to mitigate any potential dilution as a result of the conversion of the 3/4% Notes. However, this warrant expired unexercised in December 2008. For further discussion on this derivative financial instrument, please refer to Note 8 of the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

15. Comprehensive Income (Loss)

The Company's comprehensive income (loss), net of taxes, which consisted of net income (loss) and the changes in net unrealized gains (losses) on marketable securities and foreign currency translation adjustments, net of taxes, for the third quarters and first nine months of fiscal 2010 and 2009 was as follows:

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008
	(in thousands)			
Net income (loss)	\$ (7,282)	\$ (1,306)	\$ (10,461)	\$ 7,019
Net unrealized gains (losses) on marketable securities, net of taxes	(1,370)	5,966	410	(1,972)
Foreign currency translation adjustment, net of taxes	116	(664)	1,590	(2,596)
Comprehensive income (loss), net of taxes	\$ (8,536)	\$ 3,996	\$ (8,461)	\$ 2,451

The Company has considered all available evidence and determined that the marketable securities in which unrealized losses were recorded in the third quarters and first nine months of fiscal 2010 and 2009 were not deemed to be other-than-temporary. The Company holds its marketable

Edgar Filing: ADAPTEC INC - Form 10-Q

securities as available-for-sale and marks them to market. The Company expects to realize the full value of all its marketable securities upon maturity or sale, as the Company has the intent and ability to hold the securities until the full value is realized. However, the Company cannot provide any assurance that its invested cash, cash equivalents and marketable securities will not be impacted by adverse conditions in the financial markets, which may require the Company to record an impairment charge that could adversely impact its financial results.

The components of accumulated other comprehensive income, net of taxes, at January 1, 2010 and March 31, 2009 were as follows:

	January 1, 2010	March 31, 2009
	(in thousands)	
Unrealized gains on marketable securities, net of taxes	\$ 2,230	\$ 1,820
Foreign currency translation, net of taxes	2,734	1,144
Accumulated other comprehensive income, net of taxes	\$ 4,964	\$ 2,964

16. Guarantees

Intellectual Property and Other Indemnification Obligations

The Company has entered into agreements with customers and suppliers that include intellectual property indemnification obligations. These indemnification obligations generally require the Company to compensate the other party for certain damages and costs incurred as a result of third party intellectual property claims arising from these transactions. In each of these circumstances, payment by the Company is conditional on the other party making a claim pursuant to the procedures specified in the particular contract, which procedures typically allow the Company to challenge the other party's

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

claims. Further, the Company's obligations under these agreements may be limited in terms of time and/or amount, and in some instances, the Company may have recourse against third parties for certain payments made by it under these agreements. In addition, the Company has agreements whereby it indemnifies its directors and certain of its officers for certain events or occurrences while the officer or director is, or was, serving at the Company's request in such capacity. These indemnification agreements are not subject to a maximum loss clause; however, the Company maintains a director and officer insurance policy which may cover all or a portion of the liabilities arising from its obligation to indemnify its directors and officers. It is not possible to make a reasonable estimate of the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, the Company has not incurred significant costs to defend lawsuits or settle claims related to such agreements and no amount has been accrued in the accompanying Consolidated Financial Statements with respect to these indemnification guarantees.

Product Warranty

The Company provides an accrual for estimated future warranty costs based upon the historical relationship of warranty costs to sales. The estimated future warranty obligations related to product sales are recorded in the period in which the related revenue is recognized. The estimated future warranty obligations are affected by sales volumes, product failure rates, material usage and replacement costs incurred in correcting a product failure. If actual product failure rates, material usage or replacement costs differ from the Company's estimates, revisions to the estimated warranty obligations would be required; however, the Company made no adjustments to pre-existing warranty accruals in the first nine months of fiscal 2010 and 2009.

A reconciliation of the changes to the Company's warranty accrual for the first nine months of fiscal 2010 and 2009 was as follows:

	Nine-Month Period Ended	
	January 1, 2010	December 26, 2008
	(in thousands)	
Balance at beginning of period	\$ 400	\$ 741
Warranties provided	476	747
Actual costs incurred	(556)	(834)
Warranty obligations transferred with discontinued operations		(154)
Balance at end of period	\$ 320	\$ 500

Other

In the third quarter of fiscal 2010, the Company recorded guaranteed cash payments of \$0.7 million associated with the execution of a Separation and Consulting Service Agreements with Subramanian Sundares, the Company's former CEO, which was reflected in Selling, marketing and administrative expense in the Unaudited Condensed Consolidated Statements of Operations.

17. Related Party Transactions

Warren G. Lichtenstein, Steel Partners, LLC and Steel Partners II, L.P. (collectively, Steel Partners) became a 5% stockholder of the Company in March 2007. Jack L. Howard, John J. Quicke and John Mutch were nominated for election at the 2007 Annual Meeting of Stockholders. At such time, both Mr. Howard and Mr. Quicke were deemed to be affiliates of Steel Partners under the rules of the Securities Exchange Act of 1934, as amended; however, Mr. Mutch was not deemed to be an affiliate of Steel Partners at such time. Messrs. Howard, Quicke and Mutch continue to serve on the Company's board of directors and Mr. Quicke currently serves as the Interim President and CEO of the Company. Each of the three directors, including the two directors who are deemed affiliates of Steel Partners, are compensated with equity awards or

Edgar Filing: ADAPTEC INC - Form 10-Q

equity-based awards in amounts that are consistent with the Company's Non-Employee Director Compensation Policy. As of January 1, 2010, Steel Partners beneficially owned approximately 19.5% of the Company's common stock. In the third quarter and first nine months of fiscal 2010, the Company accrued for the potential payment of a requested expense reimbursement of \$0.7 million related to professional fees that Steel Partners, Steel Partners Holdings L.P., Steel Partners LLC, Steel Partners II GP LLC, Warren Lichtenstein, Jack L. Howard, and John J. Quicke incurred for the consent solicitation as it is probable that the Company's board of directors will authorize the payment. Subsequent to the third quarter of fiscal 2010, the Company agreed to pay Mr. Quicke \$30,000 per month, effective, January 4, 2010, in connection with his role as Interim President and CEO, in addition to the compensation he receives as a non-executive board member.

Table of Contents**ADAPTEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****18. Segment Information and Significant Customers**

Since the sale of its Snap Server NAS business in June 2008, the Company has operated in one segment. The Company provides data protection storage products and currently sells a broad range of the Company's storage technologies, including ASICs, board-level I/O and RAID controllers, and software. The Company sells these products directly to OEMs, ODMs that supply OEMs, system integrators, VARs and end users through its network of distribution and reseller channels. The Company considers all of its products to be similar in nature and function. The Company does not derive a significant amount of revenue from services or support.

A small number of the Company's customers account for a substantial portion of its net revenues. In the third quarter of fiscal 2010, Ingram Micro, Bell Micro and IBM accounted for 19%, 15% and 11% of the Company's total net revenues, respectively. In the third quarter of fiscal 2009, IBM accounted for 37% of the Company's total net revenues. In the first nine months of fiscal 2010, IBM, Ingram Micro and Bell Micro accounted for 21%, 15% and 13% of the Company's total net revenues, respectively. In the first nine months of fiscal 2009, IBM accounted for 36% of the Company's total net revenues.

19. Supplemental Disclosure of Cash Flows

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. The statements contained in this document that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or strategies regarding our business, including, but not limited to, general economic conditions, successful completion of a sale or disposition of our assets or business operations, declines in consumer spending, failure to achieve our operational objectives, our anticipated declines in revenues from our parallel SCSI products and our serial legacy products sold to our OEM customers, the expected impact on our future revenues due in part to our failure to receive design wins for the next generation serial products, failure to receive anticipated long-term benefits from new products to materialize, the possibility that additional significant charges may be recorded by us in the future in light of an ongoing review of our business by management, the potential need to record impairment charges for other intangible assets, long-lived assets or marketable securities based on current market conditions, the amount by which we expect to reduce our annual operating expenses due to our third quarter of fiscal 2010 restructuring plan, the possibility that we might enter into strategic alliances or partnerships to scale our business, and our expected liquidity in future periods. We may identify these statements by the use of words such as anticipate, believe, continue, could, estimate, expect, intend, may, might, plan, potential, predict, project, should, will, would and other similar expressions. All forward-looking statements in this document are based on information available to us on the date hereof, and except as required by law, we assume no obligation to update any such forward-looking statements, except as may otherwise be required by law.

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth in the Risk Factors section and elsewhere in this document and in our Annual Report on Form 10-K. In evaluating our business, current and prospective investors should consider carefully these factors in addition to the other information set forth in this report.

While management believes that the discussion and analysis in this report is adequate for a fair presentation of the information presented, we recommend that you read this discussion and analysis in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

Basis of Presentation

In June 2008, we sold the Snap Server NAS portion of our former SSG segment, or Snap Server NAS business, to Overland Storage, Inc., or Overland. Unless otherwise indicated, the following discussion pertains only to our continuing operations.

For your convenience, we have included, in Note 20 to the Notes to the Unaudited Condensed Consolidated Financial Statements, a Glossary that contains a brief description of a few key acronyms commonly used in our industry and a few accounting acronyms, including accounting regulatory bodies, that are used in this Quarterly Report. These acronyms are listed in alphabetical order.

Overview

In December 2009, we announced that we have initiated a process to pursue the potential sale or disposition of certain of our assets or business operations and that we have retained Blackstone Advisory Partners L.P. as our exclusive financial advisor to assist us with this process. While we undergo the potential sale of our business operations, we remain committed to service and support our customers. Our revenues, however, may be negatively impacted by this sales process as it creates uncertainty in the marketplace with our customers and suppliers, and may prevent us from attracting new customers or obtaining new OEM design wins. If we are successful in completing a sale or disposition of our assets or business operations within the next twelve months, it is reasonably possible that we may incur significant charges in the future, which we can not estimate at this time. However, we believe our exposure includes, but is not limited to, impairment of its long-lived assets, restructuring charges, acceleration of unvested stock-based awards and payments of our contractual obligations.

We provide innovative data center I/O solutions that protect, accelerate, optimize, and condition data in today's most demanding data center environments. Our products are used in IT environments ranging from traditional enterprise environments to fast growing, on-demand cloud computing data centers. Our products enable data center managers, channel partners and OEMs to deploy best-in-class storage solutions to meet their customers' evolving IT and business requirements. Around the world, leading corporations, government organizations, and medium and small businesses trust Adaptec technology. Our software and hardware products include ASICs, HBAs, RAID controllers, Adaptec RAID software, storage management software, storage virtualization software and other solutions that span SCSI, SAS, SATA and iSCSI interface technologies, including both hard disk and solid state drives. System integrators and white box suppliers build server and storage solutions based on Adaptec technology to deliver products with superior price and performance, data protection and interoperability to their clients and customers.

Table of Contents

Our Data Conditioning Platform, or DCP, enables us to deliver new and improved methods for intelligently routing, optimizing and protecting data as it moves through the I/O path. DCP will enable next-generation data centers by optimizing and protecting data, and reducing capital and operating costs, through maximizing system utilization and performance, while achieving Green IT objectives. New capabilities delivered via our DCP can be deployed in fast-growing data centers easily and non-disruptively: no changes are required to existing storage architectures, application software or operating systems. We have been developing products and features based on our DCP since early fiscal 2008. For example, in July 2008, we introduced our Intelligent Power Management software, which increases the energy efficiency of attached hard disk drives without impacting performance. In June 2009, we launched a new product in the unified serial RAID controller family, Series 5Z, which reduces the cost of data center maintenance by leveraging solid state technology to eliminate the need to monitor battery charge levels or power down servers for battery replacement. In September 2009, we launched our MaxIQ SSD Cache Performance Solution, which maximizes performance while minimizing capital and operating costs by utilizing both solid state drives and hard disk drives, to create High-Performance Hybrid Arrays which is expected to deliver up to five times the I/O performance and reduce capital expenditures by as much as 50%, all with minimal disruptions to existing operations.

We also continue to manage the transition of our product portfolio from our declining legacy products, which included our parallel SCSI products and our serial legacy products sold primarily to OEM customers, to our newer serial products and features for the next-generation data centers that were developed under our DCP. Our future revenue growth is largely dependent on the success of our products under our DCP, including our new and future products, obtaining new data center or OEM design wins, fulfilling our obligations on current OEM design wins, and growing our share in the channel product market, as the revenues earned from our newer serial products is currently not enough to offset the decline in revenues from our legacy products due to the loss in market share and the adverse impact on our business caused by current economic conditions. We must continue to retain our current customer base and attract new customers, and innovate and deliver products in the storage I/O space, to increase our revenue levels for our recent product introductions, which may be difficult given the sales process discussed above.

To succeed with our DCP, we must stay ahead of our competitors and continue to focus our development investments on value-added data conditioning products and features. We will also continue to consider additional growth opportunities beyond those presented by our existing product lines by entering into strategic alliances or partnerships to grow our business and increase our operating performance, and we will explore structural alternatives that have the potential to achieve additional stockholder return. We will also continue to evaluate the viability of our existing product portfolio, operating structure and markets. With the continued risks due to macroeconomic conditions, we could experience reduced sales of our products and services in future quarters. If macroeconomic conditions weaken and our expected business performance declines further, we may be required to record impairment charges for other intangible assets or long-lived assets in the future. Our marketable securities may also decline in value and such decline may be deemed to be other-than-temporary, which would require us to record an impairment charge that would adversely impact our financial results. We may also record significant restructuring charges in the future in light of an ongoing strategic review of our business by management.

In the third quarter of fiscal 2010, our net revenues decreased 40% as compared to the third quarter of fiscal 2009 due to the declining revenue base of our legacy products of \$14.2 million, which included our parallel SCSI products and our serial legacy products sold primarily to OEM customers, offset by an increase in sales volumes of our newer serial products and features that were developed under our DCP of \$2.9 million. We expect revenues from our parallel SCSI products and our serial legacy products sold to OEM customers to continue to decline in future quarters. Our gross margins in the third quarter of fiscal 2010 improved to 44% compared to 40% in the third quarter of fiscal 2009 primarily due to improved standard product contributions due to favorable customer mixes and lower inventory-related charges, offset by our lower sales volume over which our fixed costs were distributed. Operating expenses slightly decreased in the third quarter of fiscal 2010 as compared to the third quarter of fiscal 2009 due to our continued cost reductions, including temporary reductions in employees' compensation, reductions in outside service providers and restructuring efforts implemented in the third quarter of fiscal 2010 and fiscal 2009. This was partially offset by higher stock-based compensation expense of \$1.9 million primarily due to the modification of certain stock-based awards, which included modifications of \$0.8 million related to the Separation Agreement of Subramanian Sundaresh, our former CEO, guaranteed cash payments of \$0.7 million associated with the execution of a Separation and Consulting Service Agreements with Subramanian Sundaresh, increased professional fees of \$0.5 million related to our response to the consent solicitation initiated by Steel Partners, Steel Partners Holdings L.P., Steel Partners LLC, Steel Partners II GP LLC, Warren Lichtenstein, Jack L. Howard, and John J. Quicke (collectively, the Steel Group) on September 4, 2009 seeking stockholder approval on three proposals relating to our bylaws and the composition of our board of directors and a charge in the third quarter of fiscal 2010 for the potential payment of a requested expense reimbursement of \$0.7 million related to professional fees that the Steel Group incurred for the consent solicitation.

Table of Contents**Results of Operations**

The following table sets forth the items in the Unaudited Condensed Consolidated Statements of Operations as a percentage of net revenues (references to notes in the footnotes to this table are to the Notes to Unaudited Condensed Consolidated Financial Statements appearing in this report):

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010 (1)	December 26, 2008 (2)	January 1, 2010 (3)	December 26, 2008 (4)
Net revenues	100%	100%	100%	100%
Cost of revenues (inclusive of amortization of acquisition-related intangible assets)	56	60	55	57
Gross margin	44	40	45	43
Operating expenses:				
Research and development	41	28	38	20
Selling, marketing and administrative	60	33	43	30
Amortization of acquisition-related intangible assets	2	1	2	1
Restructuring charges	6	4	2	5
Total operating expenses	109	66	85	56
Loss from continuing operations	(65)	(26)	(40)	(13)
Interest and other income, net	21	13	15	17
Interest expense		(1)	(0)	(2)
Income (loss) from continuing operations before income taxes	(44)	(14)	(25)	2
Benefit from (provision for) income taxes	(0)	14	5	2
Income (loss) from continuing operations, net of taxes	(44)	0	(20)	4
Discontinued operations, net of taxes				
Loss from discontinued operations, net of taxes		(1)		(1)
Gain (loss) on disposal of discontinued operations, net of taxes	1	(4)	2	5
Income (loss) from discontinued operations, net of taxes	1	(5)	2	4
Net income (loss)	(43) %	(5)%	(18)%	8%

The following actions affect the comparability of the data for the periods presented in the above table:

- (1) In the third quarter of fiscal 2010, we implemented a restructuring plan, incurring restructuring charges of \$1.0 million, recorded stock-based compensation expense of \$2.9 million, of which \$1.7 million related to the modification of certain stock-based awards, and received \$0.9 million as part of a class action suit and \$0.4 from the sale of an investment in a non-controlling interest of a non-public company, which was recorded in Interest and other income, net.

Edgar Filing: ADAPTEC INC - Form 10-Q

- (2) In the third quarter of fiscal 2009, we implemented a restructuring plan and recorded adjustments to previous restructuring plans, incurring restructuring charges of \$0.9 million, recorded a gain of \$0.4 million on the repurchase of our 3/4% Notes on the open market, which was recorded in Interest and other income, net, and recorded a tax benefit arising from the resolution of tax disputes and the adjustment of taxes due in a prior period.
- (3) In the first nine months of fiscal 2010, we implemented a restructuring plan and recorded adjustments to previous restructuring plans, incurring restructuring charges of \$1.0 million, recorded stock-based compensation expense of \$5.1 million, of which \$1.7 million related to the modification of certain stock-based awards, and received \$0.9 million as part of a class action suit and \$0.4 from the sale of an investment in a non-controlling interest of a non-public company, which was recorded in Interest and other income, net.
- (4) In the first nine months of fiscal 2009, we implemented two restructuring plans and recorded adjustments to previous restructuring plans, incurring restructuring charges of \$4.2 million, recorded a gain of \$1.7 million on the repurchase of our 3/4% Notes on the open market, which was recorded in Interest and other income, net, and recorded a tax benefit arising from the resolution of tax disputes and the adjustment of taxes due in a prior period.

Table of Contents*Net Revenues.*

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change

(in millions, except percentages)

Net Revenues	\$ 16.9	\$ 28.2	(40)%	\$ 57.1	\$ 91.4	(38)%
--------------	---------	---------	-------	---------	---------	-------

Net revenues decreased by \$11.3 million and \$34.3 million in the third quarter and first nine months of fiscal 2010, respectively, compared to the corresponding periods of fiscal 2009, due to a decline in sales volume of our legacy products, which primarily included our parallel SCSI products and our serial products sold to OEM customers, of \$14.2 million and \$39.7 million, respectively, offset by an increase in sales volumes of our newer serial products and features that were also developed under our DCP of \$2.9 million and \$5.4 million, respectively. The decline in sales volume of our parallel SCSI products was primarily attributable to the industry transition from parallel to serial products, in which we have a lower market share. The decline in sales volume of our serial legacy products sold to OEM customers was primarily attributable to the fact that certain OEM customers have moved to other suppliers to obtain the next generation serial technologies. We expect net revenues for our parallel SCSI products and our serial legacy products sold to OEM customers to continue to decline in future quarters. However, we expect to gain future opportunities to sell serial products to OEMs, due in part to the Aristos acquisition, but our ability to capitalize on these opportunities may be adversely impacted by a reduction in IT spending for servers as a result of current economic conditions.

	Three-Month Period Ended		Nine-Month Period Ended	
	January 1, 2010	December 26, 2008	January 1, 2010	December 26, 2008

Geographical Revenues:

North America	42%	38%	39%	35%
Europe	36%	29%	32%	32%
Pacific Rim	22%	33%	29%	33%
Total Geographical Revenues	100%	100%	100%	100%

Our Pacific Rim revenues decreased as a percentage of our total revenues in the third quarter and first nine months of fiscal 2010 compared to the corresponding periods of fiscal 2009 primarily due to a decline in revenues from our largest customer, IBM, who predominately purchases products in this region, as we did not receive design wins for their current generation products. We expect our Pacific Rim revenues to decrease as a percentage of our total revenues in the future as we expect the revenues from IBM to continue to decline. Our European revenues increased in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009 due to strengthened sales of our newer serial products made to channel customers, combined with the negative impact on our revenues from the deterioration of macroeconomic conditions in the third quarter of fiscal 2009.

A small number of our customers account for a substantial portion of our net revenues. In the third quarter of fiscal 2010, Ingram Micro, Bell Micro and IBM accounted for 19%, 15% and 11% of our total net revenues, respectively. In the third quarter of fiscal 2009, IBM accounted for 37% of our total net revenues. In the first nine months of fiscal 2010, IBM, Ingram Micro and Bell Micro accounted for 21%, 15% and 13% of our total net revenues, respectively. In the first nine months of fiscal 2009, IBM accounted for 36% of our total net revenues.

Gross Margin.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change

(in millions, except percentages)

Gross Profit	\$ 7.5	\$ 11.1	(33)%	\$ 25.7	\$ 39.2	(34)%
Gross Margin	44%	40%	4%	45%	43%	2%

The improvement in gross margin in the third quarter and first nine months of fiscal 2010 compared to the corresponding periods of fiscal 2009 was primarily due to improved standard product contributions due to a shift in revenue mix from OEM to channel customers, with channel

Edgar Filing: ADAPTEC INC - Form 10-Q

customers having higher average margins and our end-to-end supply chain efficiencies, including a reduction to our inventory-related charges of \$1.4 million and \$2.2 million, respectively. This was partially offset by the amortization of acquisition-related intangible assets of \$1.2 million in the first nine months of fiscal 2010 compared to the corresponding periods of fiscal 2009 related to the purchased intangible assets for core and existing technologies and backlog from the acquisition of Aristos in September 2008. Although our fixed operating costs declined from the third quarter and first nine months of fiscal 2010 compared to the corresponding periods of fiscal 2009, our gross margins were also impacted by these costs as they were distributed over lower sales volumes.

Table of Contents*Research and Development Expense.*

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change

Research and

Development Expense	\$ 7.0	\$ 7.8	(10)%	\$ 21.7	\$ 18.5	17%
---------------------	--------	--------	-------	---------	---------	-----

The decrease in research and development expense in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009 was primarily due to reduced headcount as a result of attrition in our workforce, which was reflected by a 5% decrease in average headcount for employees engaged in research and development, and the temporary reductions in employees' compensation, which began in the first quarter of fiscal 2010. We also decreased our infrastructure spending. This was partially offset by higher stock-based compensation expense of \$0.3 million primarily due to the modification of certain stock-based awards.

The increase in research and development expense in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 was primarily due to the acquisition of the Aristos engineering team in September 2008 and the costs associated with the development of our technology to achieve new OEM design wins and to expand our channel offerings as well as engineering expenses related to certain chip design projects. We also recorded higher stock-based compensation expense of \$1.3 million primarily due to the impact from the true-up of actual forfeitures that occurred in the first nine months of fiscal 2009, which reduced our stock-based compensation expense during that period, and to a lesser extent, the modification of certain stock-based awards that increased stock-based compensation expense in the first nine months of fiscal 2010. This was partially offset by the temporary reductions in employees' compensation, which began in the first quarter of fiscal 2010.

Selling, Marketing and Administrative Expense.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change

Selling, Marketing and

Administrative Expense	\$ 10.1	\$ 9.4	8%	\$ 24.7	\$ 27.6	(11)%
------------------------	---------	--------	----	---------	---------	-------

The increase in selling, marketing and administrative expense in the third quarter of fiscal 2010 compared to the first nine months of fiscal 2009 was primarily due to higher stock-based compensation expense of \$1.6 million, due to the modification of certain stock-based awards, which included modifications of \$0.8 million related to the Separation Agreement of Subramanian Sundaresh, our former CEO, a fiscal 2010 expense related to guaranteed cash payments of \$0.7 million associated with the execution of a Separation and Consulting Service Agreements with Subramanian Sundaresh, increased professional fees of \$0.5 million incurred in the third quarter of fiscal 2010 related to the consent solicitation initiated by the Steel Group on September 4, 2009 seeking stockholder approval on three proposals relating to our bylaws and the composition of our board of directors, and a charge in the third quarter of fiscal 2010 for the potential payment of a requested expense reimbursement of \$0.7 million, related to professional fees that the Steel Group incurred for the consent solicitation. This was partially offset by reductions in our workforce and infrastructure spending due to the restructuring plans we implemented in the third quarter of fiscal 2010 and fiscal 2009 and reductions in outside service providers.

The decrease in selling, marketing and administrative expense in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 was primarily a result of reductions in our workforce and infrastructure spending due to the restructuring plans we implemented in the third quarter of fiscal 2010 and fiscal 2009, which resulted in a 32% decrease in our average headcount for employees engaged in selling, marketing and administrative functions, temporary reductions in employees' compensation, which began in the first quarter of fiscal 2010, and reductions in outside service providers. This was partially offset by higher stock-based compensation expense of \$1.7 million, primarily due to the modification of certain stock-based awards, a fiscal 2010 expense related to guaranteed cash payments of \$0.7 million associated with the execution of a Separation and Consulting Service Agreements with Subramanian Sundaresh, increased professional fees of \$1.2 million incurred in the first nine months of fiscal 2010, related to the consent solicitation initiated by the Steel Group, and a charge in the first nine months of fiscal 2010 for the potential payment of a requested expense reimbursement of \$0.7 million, related to professional fees that the Steel Group incurred for the consent solicitation.

Amortization of Acquisition-Related Intangible Assets.

Edgar Filing: ADAPTEC INC - Form 10-Q

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change (in millions, except percentages)	January 1, 2010	December 26, 2008	Percentage Change
Amortization of Acquisition- Related Intangible Assets	\$ 0.3	\$ 0.3	%	\$ 1.0	\$ 0.4	125%

Table of Contents

The amortization of acquisition-related intangible assets remained flat in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009. The increase in amortization of acquisition-related intangible assets in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 was due to the amortization of purchased intangible assets from the Aristos acquisition in September 2008 for customer relationships of \$0.5 million. The amortization of purchased intangible assets from the Aristos acquisition for the core and existing technologies and backlog were reflected in cost of revenues.

Restructuring Charges.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change
Restructuring Charges	\$ 1.0	\$ 0.9	3%	\$ 1.0	\$ 4.2	(76)%

All expenses, including adjustments, associated with our restructuring plans are included in Restructuring charges in the Unaudited Condensed Consolidated Statements of Operations and are managed at the corporate level. For a complete discussion of all restructuring actions that were implemented prior to fiscal 2010, which were to bring our operational expenses to appropriate levels relative to our net revenues, while simultaneously implementing extensive company-wide expense-control programs, please refer to Note 11 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

In the third quarter of fiscal 2010, we committed to a new restructuring plan to better align our operating costs with the continued decline in our net revenues, resulting in a restructuring charge of \$1.0 million. We reduced our workforce primarily in the general administrative functions and provided severance and related benefits of \$0.8 million. We also consolidated our facilities further and incurred a net estimated loss of \$0.2 million for vacating the premises. The actions from this restructuring plan are expected to continue in the fourth quarter of fiscal 2010 with expected expenses of approximately \$0.2 million for severance and related benefits. We expect to reduce our annual operating expenses by approximately \$2.2 million as a result of the actions taken in the third quarter of fiscal 2010 related to this plan. Approximately 15%, 7% and 78% of the expected restructuring cost savings will be reflected as a reduction in cost of revenues, research and development expense, and selling, marketing and administrative expense, respectively, beginning primarily in the fourth quarter of fiscal 2010.

In addition, in the first nine months of fiscal 2010, we recorded minimal adjustments to the restructuring accrual primarily related to the estimated loss on facilities that we subleased related to our previous acquisition-related restructuring plan.

Interest and Other Income, Net.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change
Interest and Other Income, Net:						
Interest income	\$ 2.0	\$ 3.4	(42)%	\$ 6.6	\$ 14.0	(53)%
Realized currency transaction gains (losses)	(0.0)	(0.2)	(84)%	0.4	(0.6)	n/a
Gain on extinguishment of debt, net		0.4	(100)%		1.7	(100)%
Gain on settlement of class action suit	0.9		100%	0.9		100%
Gain on sale of investments	0.4		100%	0.4		100%
Other	0.3		100%	0.3		100%
Total Interest and Other Income, Net	\$ 3.6	\$ 3.6	0%	\$ 8.6	\$ 15.1	(43)%

The slight increase in interest and other income, net, in the third quarter of fiscal 2010 compared to the third quarter of fiscal 2009 was primarily due to the receipt of \$0.9 million from Micron Technology, Inc. as part of a class action settlement regarding DRAM antitrust matters and a gain of \$0.4 million from the sale of an investment in a non-controlling interest of a non-public company, offset by less interest earned on lower average cash balances.

Edgar Filing: ADAPTEC INC - Form 10-Q

The decrease in interest and other income, net, in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 was primarily due to less interest earned on lower average cash balances as we used cash for the repurchase of our 3/4% Notes and for the acquisition of Aristos in fiscal 2009, combined with lower interest rates. This was partially offset by the receipt of \$0.9 million from Micron Technology, Inc. as part of a class action settlement regarding DRAM antitrust matters and a gain of \$0.4 million from the sale of an investment in a non-controlling interest of a non-public company. We expect that our interest and other income, net, will continue to decline in future periods due to lower interest rates earned on our cash, cash equivalents and marketable securities balances.

Table of Contents*Interest Expense.*

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change (in millions, except percentages)	January 1, 2010	December 26, 2008	Percentage Change
Interest Expense	\$	\$ (0.1)	(100)%	\$ (0.0)	\$ (1.5)	(100)%

The decrease in interest expense in the third quarter and first nine months of fiscal 2010 compared to the corresponding periods of fiscal 2009 was primarily due to the reduction in the outstanding principal amount plus premium of the 3/4% Notes of \$225.0 million in fiscal 2009. We have repurchased all but \$0.4 million of our 3/4% Notes as of January 1, 2010 and will not incur significant interest expense from these notes in future periods.

Income Taxes.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change (in millions, except percentages)	January 1, 2010	December 26, 2008	Percentage Change
Benefit From (Provision For) Income Taxes	\$ (0.1)	\$ 3.9	n/a	\$ 2.7	\$ 1.4	95%

Income tax provisions for interim periods are based on our estimated annual income tax rate for entities that were profitable. Entities that had operating losses with no tax benefit were excluded. The estimated annual tax for fiscal years 2010 and 2009 includes foreign taxes related to our foreign subsidiaries and certain state minimum taxes. Interest is accrued on prior years' tax disputes and refund claims as a discrete item each period. Although we believe our tax estimates are reasonable, the ultimate tax outcome may materially differ from the tax amounts recorded in our Consolidated Financial Statements and may cause a higher effective tax rate that could materially affect our income tax provision, results of operations or cash flows in the period or periods for which such determination is made.

In the third quarter and first nine months of fiscal 2010, our tax provision and tax benefit included discrete tax benefits of \$1.3 million related to additional tax refunds that became available to us during the third quarter of fiscal 2010 due to the enactment of the Worker, Homeownership and Business Act of 2009, which allowed for an extension of the net operating loss carryback period from two to five years for United States federal tax purposes. We also recorded discrete tax benefits of \$1.8 million and \$4.4 million, in the third quarter and first nine months of fiscal 2010, respectively, primarily due to reaching final settlement with the German Tax Authorities for fiscal years 2001 through 2004 and the Singapore Tax Authorities for fiscal year 2001, reflecting the reversal of previously accrued liabilities and refunded tax amounts. This was partially offset by discrete tax expense of \$3.2 million in both the third quarter and first nine months of fiscal 2010, primarily due to the on-going audits in its foreign jurisdictions.

For the first nine months of fiscal 2010 and 2009, our tax provision included changes in judgment in other uncertain tax positions in the U.S. and certain foreign jurisdictions based on new information received and new uncertain tax positions that were identified. In the first nine months of fiscal 2009, the IRS concluded its audit of our federal income tax returns for the fiscal 2004 through 2006 audit cycle. The IRS issued a No Change Report indicating no change to our tax liability; however, the IRS continues to have the ability to adjust tax attributes relating to these years in subsequent audits. We believe that we have provided sufficient tax provisions for these years and that the ultimate outcome of any future IRS audits that include the tax attributes will not have a material adverse impact on our financial position or results of operations in future periods. The tax authorities in the foreign jurisdictions that we operate in continue to audit our tax returns for fiscal years subsequent to 1999. The potential outcome of these audits is uncertain and could result in material tax provisions or benefits in future periods. However, we cannot predict with certainty how these matters will be resolved and whether we will be required to make additional tax payments and believes that it has provided sufficient tax provisions for the tax exposures in our foreign jurisdictions.

As of January 1, 2010, our total gross unrecognized tax benefits were \$24.7 million, of which \$4.3 million, if recognized, would affect the effective tax rate. There was an overall decrease of \$3.1 million in our gross unrecognized tax benefits in the first nine months of fiscal 2010 due to benefits from the Singapore and Germany audit settlements noted above, offset by changes in judgment related to foreign audits as a result of new information that we received in the first nine months of fiscal 2010.

Table of Contents

We are subject to U.S. federal income tax as well as income taxes in many U.S. states and foreign jurisdictions. As of January 1, 2010, fiscal years 2004 onward remained open to examination by the U.S. taxing authorities and fiscal years 1999 onward remained open to examination in various foreign jurisdictions. U.S. tax attributes generated in tax years 2004 onward also remain subject to adjustment in subsequent audits when they are utilized. Management believes that events that could occur in the next 12 months and cause a material change in unrecognized tax benefits include, but are not limited to, the following:

completion of examinations of our tax returns by the U.S. or foreign tax authorities; and

expiration of statutes of limitations on our tax returns

The calculation of unrecognized tax benefits involves dealing with uncertainties in the application of complex global tax regulations. Management regularly assesses our tax positions in light of legislative, bilateral tax treaty, regulatory and judicial developments in the countries in which we do business. Management believes that it is not reasonably possible that the gross unrecognized tax benefits will change significantly within the next 12 months.

Discontinued Operations.

	Three-Month Period Ended			Nine-Month Period Ended		
	January 1, 2010	December 26, 2008	Percentage Change	January 1, 2010	December 26, 2008	Percentage Change
Income (Loss) From Discontinued Operations, Net of Taxes	\$ 0.2	\$ (1.4)	n/a	\$ 1.0	\$ 3.7	(74)%

(in millions, except percentages)

Discontinued Operations related to the sale of the Snap Server NAS business to Overland in June 2008. At the time of sale, which was in the first quarter of fiscal 2009, we recorded a gain of \$5.8 million on the disposal of the Snap Server NAS business in Gain (loss) on disposal of discontinued operations, net of taxes, and incurred a Loss from discontinued operations, net of taxes of \$0.7 million in the Unaudited Condensed Consolidated Statements of Operations. The gain on disposal of the Snap Server NAS business included a receivable of \$1.2 million that was due on the 12 month anniversary of the closing of the transaction; however, in the third quarter of fiscal 2009, we reserved this receivable against the Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations due to the financial difficulties Overland has reported. In the first nine months of fiscal 2010, we amended the promissory note agreement with Overland, which allows Overland to pay us the remaining \$1.2 million receivable plus accrued interest by March 31, 2010. Due to the continued concern of Overland's ability to pay us, we will release the reserve on the receivable as cash is collected. As a result, in the third quarter and first nine months of fiscal 2010, we recorded a gain of \$0.2 million and \$1.0 million, respectively, in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations, based on the cash received in connection with the amended promissory note agreement.

*Liquidity and Capital Resources**Key Components of Cash Flows*

Working Capital: Our principal sources of liquidity are cash on hand. We focus on managing the critical components of working capital, which include receivables, inventory, payables and short-term debt. Our working capital at January 1, 2010 and March 31, 2009 was \$384.1 million and \$385.2 million, respectively. The decrease in working capital at January 1, 2010 compared to March 31, 2009 of \$1.1 million was attributable to decreases in accounts payables and accrued liabilities of \$3.5 million as we operate on a smaller business scale, which included reducing and streamlining our operating expenses. This was offset by (1) a decrease in prepaid expenses and other current assets of \$2.1 million primarily due to a tax refund received from the State of California and other foreign jurisdictions; (2) a decrease in accounts receivable of \$4.5 million primarily due to lower revenue levels and our improved collection efforts; and (3) a decrease in inventory of \$1.9 million due to improved efficiencies in our inventory and operations management. In addition, we recognized an unrealized gain of \$0.4 million on our investments, as we mark them to market.

Operating Activities: Net cash provided by operating activities was \$6.7 million and \$9.0 million in the first nine months of fiscal 2010 and 2009, respectively. The decline in cash provided by operating activities was primarily due to a change from income from continuing operations,

Edgar Filing: ADAPTEC INC - Form 10-Q

net of taxes in the first nine months of fiscal 2009 to loss from continuing operations, net of taxes in the first nine months of fiscal 2010 of \$14.8 million, a non-cash charge related to a gain on extinguishment of debt of \$1.7 million recorded in the first nine months of fiscal 2009 and a decrease in inventory-related charges of \$2.2 million. This was offset by an increase in non-cash charges related to depreciation and amortization of \$2.0 million primarily due to the amortization of purchased intangible assets from the

Table of Contents

Aristos acquisition in September 2008 and an increase in stock-based compensation of \$3.0 million due primarily to the modification of certain stock-based awards in the first nine months of fiscal 2010 and the impact caused by the true-up of actual forfeitures in the first nine months of fiscal 2009, which reduced our stock-based compensation expense during that period. In the first nine months of fiscal 2010, cash received from customers totaled \$61.6 million and cash paid to suppliers and employees for payroll totaled \$75.1 million. In the first nine months of fiscal 2010, income from continuing operations, net of taxes, included interest income of \$6.6 million.

As our revenues from our legacy products are expected to continue to decline, we may be unable to generate positive cash flows in the future if we are unable to adequately sell our newer serial products under DCP.

Investing Activities: Net cash used in investing activities was \$31.9 million in the first nine months of fiscal 2010 compared to net cash provided by investing activities of \$63.7 million in the first nine months of fiscal 2009. We utilized cash for the net purchases of marketable securities of \$30.8 million in the first nine months of fiscal 2010 while we received cash proceeds from the net sales and maturities of marketable securities of \$101.4 million in the first nine months of fiscal 2009. We continue to manage our cash through interest-bearing accounts. We also acquired Aristos for \$38.0 million in the first nine months of fiscal 2009 and entered into a software license agreement with Synopsys in the first nine months of fiscal 2010 for \$1.8 million, of which \$0.7 million was paid in the first nine months of fiscal 2010 and the remaining \$1.1 million will be paid through March 2011.

Financing Activities: Net cash used in financing activities was \$1.7 million and \$219.8 million in the first nine months of fiscal 2010 and 2009, respectively. In the first nine months of fiscal 2010 and 2009, we repurchased less than \$0.1 million and \$223.5 million, respectively, in principal amount of our 3/4% Notes for an aggregate price of less than \$0.1 million and \$221.4 million, respectively, and repurchased \$1.7 million of our common stock in connection with our authorized stock repurchase program in the first nine months of fiscal 2010. We continued to experience a decline in the issuance of common stock under our equity compensation programs in the first nine months of fiscal 2010 compared to the first nine months of fiscal 2009 as a large number of options held by our employees had exercise prices that were substantially above the current market value of our common stock and a reduction in our headcount.

Common Stock Repurchase Program

In July 2008, our board of directors authorized a stock repurchase program to purchase up to \$40.0 million of our common stock. No common stock repurchases occurred during the third quarter of fiscal 2010. During the first nine months of fiscal 2010, we purchased approximately 0.7 million shares of our common stock at an average price of \$2.46 per share for an aggregate purchase price of \$1.7 million, excluding brokerage commissions. We have accounted for these treasury shares, which have not been retired or reissued, under the treasury method. All purchases made under the program were made in the open market. As of January 1, 2010, \$35.9 million remained available for repurchase under the authorized stock repurchase program.

Liquidity and Capital Resource Requirements

At January 1, 2010, we had \$380.4 million in cash, cash equivalents and marketable securities, of which approximately \$10.1 million was held by our foreign subsidiaries whose functional currency is the local currency. Our available-for-sale securities included short-term deposits, corporate obligations, other debt securities and United States government securities, and were recorded on our Unaudited Condensed Consolidated Balance Sheets at fair market value, with their related unrealized gain or loss reflected as a component of Accumulated other comprehensive income, net of taxes in stockholders' equity.

Our investment policy focuses on three objectives: to preserve capital, to meet liquidity requirements and to maximize total return. Our investment policy establishes minimum ratings for each classification of investment and investment concentration is limited to minimize risk. The policy also limits the final maturity on any investment and the overall duration of the portfolio. Given the overall market conditions, we regularly review our investment portfolio to ensure adherence to our investment policy and to monitor individual investments for risk analysis and proper valuation.

In the third quarters and first nine months of fiscal 2010 and 2009, we did not recognize a material loss on our securities as the unrealized losses incurred were not deemed to be other-than-temporary. We hold our marketable securities as available-for-sale and mark them to market. We expect to realize the full value of all our marketable securities upon maturity or sale, as we have the intent and ability to hold the securities until the full value is realized. However, we can not provide any assurance that our invested cash, cash equivalents and marketable securities will not be impacted by adverse conditions in the financial markets, which may require us to record an impairment charge that could adversely impact our financial results.

Edgar Filing: ADAPTEC INC - Form 10-Q

In addition, we maintain our cash, cash equivalents and marketable securities with certain financial institutions, in which our balances exceed the limits that are insured by the Federal Deposit Insurance Corporation. If the underlying financial institutions fail or other adverse conditions occur in the financial markets, our cash balances may be impacted.

Table of Contents

In the fourth quarter of fiscal 2005, we repatriated \$360.6 million of undistributed earnings from Singapore to the United States and incurred a tax liability of \$17.6 million. The repatriated amounts are being used to fund a qualified Domestic Reinvestment Plan, as required by the American Jobs Creation Act of 2004. If we do not spend the repatriated funds in accordance with our reinvestment plan, we may incur additional tax liabilities. Based on actual and planned spending through fiscal 2010, we believe we will meet the total spending requirements of the Domestic Reinvestment Plan in fiscal 2010; therefore, no further tax liabilities are expected to be incurred related to this distribution.

We may enter into strategic alliances or partnerships that will enable us to better scale our operations relative to our cost basis. If we are successful in identifying attractive strategic alliances or partnerships, we may be required to use a significant portion of our available cash balances.

We have invested in technology companies through two venture capital funds, Pacven Walden Venture V Funds and APV Technology Partners II, L.P. At January 1, 2010 and March 31, 2009, the carrying value of such investments aggregated \$1.2 million for each period, which were based on quarterly statements we receive from each of the funds. The statements are generally received one quarter in arrears, as more timely valuations are not practical. Given the recent downturn in equity investments and current market conditions, we may be required to record an impairment charge against all or a portion of the investments in the future.

We believe that our cash balances and the expected cash flows generated by operations and available sources of equity will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. However, in December 2009, we announced that we have initiated a process to potentially sell or dispose certain of our assets or business operations, which, if successful, may materially change our corporate structure, including our anticipated cash needs. In addition, should prevailing economic conditions and/or financial, business and other factors beyond our control adversely affect our estimates of our future cash requirements, we would be required to fund our cash requirements by alternative financing. In these instances, we may seek to raise such additional funds through public or private equity or debt financings or from other sources. We may not be able to obtain adequate or favorable financing at that time. Any equity financing we obtain may dilute existing ownership interests and any debt financing could contain covenants that impose limitations on the conduct of our business. There can be no assurance that additional financing, if needed, would be available on terms acceptable to us or at all.

Commitments and Contingencies

Legal Proceedings

We are a party to litigation matters and claims, including those related to intellectual property, which are normal in the course of our operations, and while the results of such litigation matters and claims cannot be predicted with certainty, we believe that the final outcome of such matters will not have a material adverse impact on our financial position or results of operations. However, because of the nature and inherent uncertainties of litigation, should the outcome of these actions be unfavorable, our business, financial condition, results of operations and cash flows could be materially and adversely affected.

Holdback

In connection with our acquisition of Aristos, a portion of the purchase price totaling \$4.3 million was held back to secure potential indemnification obligations of Aristos stockholders for unknown liabilities that may have existed as of the acquisition date, of which \$2.2 million was paid in the second quarter of fiscal 2010.

Convertible Subordinated Notes

In the first nine months of fiscal 2010, we repurchased less than \$0.1 million in principal amount of our 3/4% Notes on the open market. At January 1, 2010, we had a remaining liability of \$0.4 million of aggregate principal amount related to our 3/4% Notes that are due in December 2023. Each remaining holder of the 3/4% Notes may require us to purchase all or a portion of our 3/4% Notes on December 22, 2013, on December 22, 2018 or upon the occurrence of a change of control (as defined in the indenture governing the 3/4% Notes) at a price equal to the principal amount of 3/4% Notes being purchased plus any accrued and unpaid interest and we may redeem some or all of the 3/4% Notes for cash at a redemption price equal to 100% of the principal amount of the notes being redeemed, plus accrued interest to, but excluding, the redemption date. We will seek to make open market repurchases of the remaining balance of our 3/4% Notes within the next 12 months (See Note 8 to the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2009 for a detailed discussion of our debt and equity transactions).

Table of Contents

Intellectual Property and Other Indemnification Obligations

We have entered into agreements with customers and suppliers that include intellectual property indemnification obligations. These indemnification obligations generally require us to compensate the other party for certain damages and costs incurred as a result of third party intellectual property claims arising from these transactions. In each of these circumstances, payment by us is conditional on the other party making a claim pursuant to the procedures specified in the particular contract, which procedures typically allow us to challenge the other party's claims. Further, our obligations under these agreements may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments made by it under these agreements. In addition, we have agreements whereby we indemnify our directors and certain of our officers for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. These indemnification agreements are not subject to a maximum loss clause; however, we maintain a director and officer insurance policy which may cover all or a portion of the liabilities arising from our obligation to indemnify our directors and officers. It is not possible to make a reasonable estimate of the maximum potential amount of future payments under these or similar agreements due to the conditional nature of our obligations and the unique facts and circumstances involved in each particular agreement. Historically, we have not incurred significant costs to defend lawsuits or settle claims related to such agreements and no amount has been accrued in the accompanying Consolidated Financial Statements with respect to these indemnification guarantees.

Contractual Obligations

As of January 1, 2010, we did not have any significant changes to the contractual obligations that were disclosed in the Liquidity section of our Annual Report on Form 10-K for the fiscal year ended March 31, 2009, other than the Consulting Service Agreement that we entered into with Subramanian Sundaresh, our former CEO, and other contractual arrangements with certain executive officers in which we may be required to make additional payments based on the achievement of specified objectives, including objectives related to the potential sale or other disposition of certain of our assets and business operations.

Recent Accounting Pronouncements

For a discussion on the impact of recently issued accounting pronouncements, please refer to Note 2 to the Notes to the Unaudited Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Critical Accounting Policies

Our critical accounting policies have not changed from our fiscal year ended March 31, 2009. For a complete description of what we believe to be the critical accounting policies that affect our more significant judgments and estimates used in the preparation of our Unaudited Condensed Consolidated Financial Statements, please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies in our Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

Impairment Review

In December 2009, we announced that we have initiated a process to pursue the potential sale or disposition of certain of our assets or business operations. As a result of this announcement, we evaluated our long-lived assets to determine whether the net book value would be recoverable. Based on our analysis, our long-lived assets were not considered impaired in the third quarter of fiscal 2010 as the sum of the expected undiscounted future cash flows exceeded the net book value of our long-lived assets. The sum of the expected undiscounted future cash flows was weighted to take into consideration the possible outcomes of whether the long-lived assets would be retained and utilized as opposed to sold or disposed. However, as we continue with the potential sale or disposition of certain of our assets or business operations, we may determine that we will not be successful in completing a sale or disposition for favorable terms or in a reasonable timeframe, which may result in negative market perceptions and an inability to realize our expected undiscounted future cash flows. This may lead us to exit or divest some or all of our current operations to focus on new opportunities. As a result, we will continue to reevaluate and reassess whether we may be required to record impairment charges for our other intangible assets or long-lived assets in future periods.

Acquisitions

In September 2008, we acquired Aristos, a provider of RAID technology to the data storage industry, for a purchase price of approximately \$38.9 million, which consisted of: (i) approximately \$28.7 million that was paid to certain Aristos senior preferred stockholders and warrant holders, of which approximately \$2.1 million is being withheld in an escrow account to secure potential indemnification obligations of Aristos stockholders; (ii) approximately \$3.2 million under a management liquidation pool established by Aristos prior to completion of the merger, which was immediately paid upon closing of the transaction as of January 1, 2010; (iii) payments made of approximately \$6.2 million to retire

Edgar Filing: ADAPTEC INC - Form 10-Q

and satisfy certain commercial obligations and payables of Aristos; and (iv) \$0.8 million accrued for direct transaction fees, including legal, valuation and accounting fees.

Table of Contents

The Aristos acquisition was accounted for as a business combination and, accordingly, the results of Aristos have been included in our unaudited condensed consolidated results of operation and financial position from the date of acquisition. The allocation of the Aristos purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed was based on valuation techniques such as the discounted cash flows and weighted average cost methods used in the high technology industry using assumptions and estimates from management to calculate fair value.

Dispositions

On June 27, 2008, we entered into an asset purchase agreement with Overland for the sale of the Snap Server NAS business for \$3.3 million, of which \$2.1 million was received by us upon the closing of the transaction and the remaining \$1.2 million was to be received on the 12 month anniversary of the closing of the transaction. This resulted in a recorded gain of \$5.8 million on the disposal of the Snap Server NAS business in the first quarter of fiscal 2009 in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations. In the third quarter of fiscal 2009, we established a reserve for the full remaining \$1.2 million of this receivable due to the financial difficulties Overland has reported. In the first quarter of fiscal 2010, we amended the promissory note agreement with Overland, which allows Overland to pay us the remaining \$1.2 million receivable plus accrued interest by March 31, 2010. Due to the continued concern of Overland's ability to pay us, we will release the reserve on the receivable as cash is collected. As a result, in the third quarter and first nine months of fiscal 2010, we recorded a gain of \$0.2 million and \$1.0 million, respectively, in Gain (loss) on disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations, based on the cash received in connection with the amended promissory note agreement. To date, we recorded a cumulative gain of \$5.6 million through the first nine months of fiscal 2010 on the disposal of the Snap Server NAS business in Gain (loss) from disposal of discontinued operations, net of taxes, in the Unaudited Condensed Consolidated Statements of Operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

For financial market risks related to changes in interest rates, equity price and foreign currency exchange rates, reference is made to Item 7A:

Quantitative and Qualitative Disclosures About Market Risk contained in Part II of our Annual Report on Form 10-K for the fiscal year ended March 31, 2009. Our exposure to market risk has not changed materially since March 31, 2009.

Item 4. Controls and Procedures.***Evaluation of Disclosure Controls and Procedures***

Under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), we conducted an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, our CEO and our CFO have concluded that the design and operation of our disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by us in reports that we file or submit under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission (SEC) rules and forms and (ii) is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

A control system, no matter how well conceived and operated, can only provide reasonable assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of these inherent limitations, no evaluation of our disclosure controls and procedures or our internal control over financial reporting will provide absolute assurance that misstatements due to error or fraud will not occur.

Table of Contents

PART II. OTHER INFORMATION

Item 1A. Risk Factors.

Our business faces significant risks. The risks described below may not be the only risks we face. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our results of operations and financial condition. If any of the events or circumstances described in the following risks actually occurs, our business, financial condition or results of operations could suffer, and the trading price of our common stock could decline. We have marked with an asterisk (*) those risk factors below that reflect substantive changes from the risk factors included in our Annual Report on Form 10-K for the year ended March 31, 2009, filed with the SEC on June 4, 2009.

*If we are not successful in completing a sale or disposition of our assets or business operations at favorable terms or in a reasonable timeframe, our continued operations of our business may be hindered.** During the third quarter of fiscal 2010, we announced that we have initiated a process to pursue the potential sale or disposition of certain of our assets or business operations. Once a definitive buyer has been determined, we may be required to obtain stockholder approval to proceed with a transaction. While we consider the potential sale or disposition of certain of our assets or our business operations, we continue to proceed with operating our business, which includes seeking growth opportunities beyond those presented by our existing product lines by entering into strategic alliances or partnerships to grow our business and increase our operating performance; however, we may not succeed in these efforts. If we are unable to come to favorable terms with any potential buyers or if our stockholders reject the proposal to sell or dispose of certain of our assets and business operations, we may be adversely affected by negative market perceptions, which may have a material adverse effect on our financial results. This includes, but is not limited to, reassessing whether we may be required to record impairment charges for our other intangible assets or other long-lived assets in the future.

If we are successful in completing a sale or disposition of our assets or business operations, our operating results and financial condition may be impacted by significant charges. If we are successful in completing a sale or disposition of our assets or business operations that we announced in December 2009 within the next twelve months, it is reasonably possible that we may incur significant charges in the future, which we can not estimate at this time. However, we believe our exposure includes, but is not limited to, the following:

Impairment of its long-lived assets;

restructuring charges;

Acceleration of unvested stock-based awards; and,

Payments of its contractual obligations.

In addition, we currently trade our common stock on the NASDAQ Global Market. If we are successful in the sale of substantially all of our assets or business operations, our common stock may be delisted from the NASDAQ Global Market.

*As our revenue base continues to decline from our current operations, we may choose to exit or divest some or all of our current operations to focus on new opportunities.** Our management team continuously reviews and evaluates our product portfolio, operating structure, and markets to determine the future viability of our existing products and market positions. We may determine that the infrastructure and expenses necessary to sustain our existing business or product offerings is greater than the potential contribution margin that will be obtainable in the future. As a result, we may determine that it is in our best interest to exit or divest such business or product offering. During the third quarter of fiscal 2010, we announced that we have initiated a process to pursue the potential sale or disposition of certain of our assets or business operations. This process may create uncertainty in the marketplace with our customers and our suppliers, which could result in the following:

Loss of customers;

Reduced revenue base;

Increased dependency on suppliers;

Inability to obtain products or services in a timely manner for competitive prices;

Increased operating costs;

Employee attrition;

Impairment of our long-lived assets;

Material restructuring charges; and

Loss of liquidity.

We currently depend on a small number of large OEM customers for a significant portion of our revenues, and we have been unsuccessful in the past in obtaining some designs wins, which may prevent us from sustaining or growing our revenues from OEM customers.* A small number of large OEMs have historically been responsible for a significant percentage of our revenues. However, we have failed to secure some design wins from these OEM customers in connection with their new products, which have adversely affected our revenues and will continue to adversely affect our future revenues. For example, in the second quarter of fiscal 2008, IBM notified us that we did not receive design wins for their new serial products, which will have a negative impact on our

Table of Contents

revenues in future quarters. We have evaluated this portion of our business, and we are only opportunistically pursuing future business from OEM customers with our current product portfolio, as the future growth opportunities for our current products are limited. While we have gained new OEM opportunities for products containing unified serial technologies as a result of the Aristos acquisition, we cannot predict the extent to which any such sales will offset the decline in OEM sales from our legacy products.

We depend on a few key customers and the loss of any of them could significantly reduce our net revenues.* Historically, a small number of our customers have accounted for a significant portion of our net revenues. For example, in the first nine months of fiscal 2010, IBM, Ingram Micro and Bell Micro accounted for 21%, 15% and 13% of our total net revenues, respectively, and in the first nine months of fiscal 2009, IBM accounted for 36% of our total net revenues. We believe that our major customers continually evaluate whether or not to purchase products from alternate or additional sources. Additionally, our customers' economic and market conditions frequently change, and many of our customers may be negatively impacted by the current global economic turmoil. Accordingly, we cannot assure you that one or more of our major customers will not reduce, delay or eliminate its purchases from us, which would likely cause our revenues to decline further. For example, in the second quarter of fiscal 2008, IBM notified us that we did not receive design wins for their new serial products, which will have a negative impact on our revenues in future quarters. While we have gained new OEM opportunities for products containing unified serial technologies as a result of the Aristos acquisition, we cannot predict the extent to which any such sales will offset the decline in OEM sales from our legacy products; therefore, we will currently be increasingly dependent on our channel products and customers for future revenue growth. This is particularly critical because our sales are made by means of standard purchase orders rather than long-term contracts. As a result, we cannot assure you that our few key customers will continue to purchase quantities of our products at current levels, or at all.

If our design wins do not result in significant sales, our revenues will continue to decline. A design win occurs when a customer or prospective customer notifies us that our product has been selected to be integrated within its product. The success that we ultimately experience from a design win is largely a factor of the success of the customer's product into which our product has been integrated. We have virtually no control over, and sometimes have very little visibility as to, the success of our customer's products, which is dependent upon a number of factors including current market conditions. If our design wins do not result in significant sales, our revenues will continue to decline which could adversely affect our business.

Our operations depend on the efforts of our workforce, particularly our executives, principal engineers and other key employees, the loss of whom could affect the growth and success of our business.* To be successful, we must retain and motivate our executives, our principal engineers and other key employees, including those in managerial, technical, marketing and information technology support positions. In particular, our product generation efforts depend on hiring and retaining qualified engineers. Competition for experienced management, technical, marketing and support personnel such as these remains intense. We must also continue to motivate all of our other employees and keep them focused on our strategies and goals, which may be particularly difficult due to morale challenges posed by our intent to pursue the potential sale or disposition of certain of our assets or business operations and workforce reductions, including absorbing additional responsibilities as we become a smaller company. Each of our employees is an at-will employee, and, as a result, any of our employees could terminate their employment with us at any time without penalty. Due to the general uncertainty regarding the outlook of our company, we have implemented a retention plan in an effort to retain some of our key employees. The loss of any of our key employees as well as a high level of attrition from all our other employees could have a significant impact on our operations.

If we do not meet our expense reduction and cost containment goals, we may have to continue to implement additional restructuring plans to reduce our operating costs. This may cause us to incur additional material restructuring charges and result in adverse effects on our employee capacities.* We have implemented several restructuring plans and recorded related restructuring charges of \$1.0 million, \$6.1 million, \$6.3 million and \$3.7 million in the first nine months of fiscal 2010, and fiscal years 2009, 2008 and 2007, respectively. These restructuring plans primarily involved the reduction of our workforce and the closure of certain facilities. The goals of our restructuring plans that were implemented were to bring our operational expenses to appropriate levels relative to our net revenues, while simultaneously implementing extensive company-wide expense-control programs. We may not realize the anticipated benefits of the restructuring plan we initiated in the third quarter of fiscal 2010. To the extent that we do not meet our expense reduction goals, we may be required to implement further restructuring plans, which may lead us to incur material restructuring charges. Further, our restructuring plans could result in a potential adverse effect on employee capabilities that could harm our efficiency and our ability to act quickly and effectively in the rapidly changing technology markets in which we sell our products.

If the net book value of our long-lived assets is not recoverable, an impairment loss must be recognized which would adversely affect our financial results.* Certain events or changes in circumstances would require us to assess the recoverability of the net book value amount of our long-lived assets. With the announcement made by us in December 2009 that we initiated a process to pursue the potential sale or disposition of certain of our assets or business operations, we evaluated our long-lived assets to determine whether the net book value would be recoverable. Based on our analysis, our long-lived assets were not considered impaired in the third quarter of fiscal 2010 as the sum of the expected undiscounted future cash flows exceeded the net book value of our long-lived assets. However, as we continue with the potential sale or disposition of certain of our assets or business operations, we may determine that

Table of Contents

we will not be successful in completing a sale or disposition for favorable terms or in a reasonable timeframe, which may result in negative market perceptions and an inability to realize our expected undiscounted future cash flows. This may lead us to exit or divest some or all of our current operations to focus on new opportunities. As a result, we will continue to reevaluate and reassess whether we may be required to record impairment charges for our other intangible assets or long-lived assets in future periods. If the macroeconomic conditions weaken, we may be required to record impairment charges in the future, which could adversely affect our financial results.

Our operating results may be adversely affected by unfavorable economic and market conditions and the uncertain geopolitical environment. Economic conditions have deteriorated significantly in the past in many of the countries and regions in which we do business and may be depressed for the foreseeable future. Global economic conditions have also been challenged by worldwide liquidity and credit concerns and the related effects on economies around the world. While the liquidity crisis has passed and we have seen some improvement in global economic conditions, any adverse global economic conditions in our markets that may occur in the future would likely negatively impact our business, which could result in:

Reduced demand for our products;

Increased price competition for our products;

Increased risk of excess and obsolete inventories;

Increased risk in the collectibility of cash from our customers;

Increased risk in potential reserves for doubtful accounts and write-offs of accounts receivable; and

Higher operating costs as a percentage of revenues.

If the global economic crisis causes demand in the server and network storage markets to decline, demand for our products would also likely be negatively affected. Some of the factors that could influence demand in the server and network storage markets include continuing increases in fuel and other energy costs, labor costs, access to credit, consumer confidence and other macroeconomic factors affecting corporate spending behavior. It is difficult to predict future server sales growth, if any. If global economic conditions remain uncertain or deteriorate further, we may experience material adverse impacts on our business, operating results and financial condition.

We may sustain losses in our investment portfolio due to adverse changes in the global credit markets. Global economic conditions have been challenged in the past by slowing growth and the sub-prime debt devaluation crisis, causing worldwide liquidity and credit concerns. While the liquidity and credit concerns have passed and we have seen some improvement in global economic conditions, any adverse change in global economic conditions may adversely impact our financial results. A substantial portion of our assets consists of our investments in marketable securities that we hold as available-for-sale and mark them to market. While there has been a decline in the trading values of certain of the securities in which we have invested, we have not recognized a material loss on our securities as the unrealized losses incurred were not deemed to be other-than-temporary. We expect to realize the full value of all our marketable securities upon maturity or sale, as we have the intent and ability to hold the securities until the full value is realized. However, we can not provide any assurance that our invested cash, cash equivalents and marketable securities will not be impacted by adverse conditions in the financial markets, which may require us to record an impairment charge that could adversely impact our financial results.

If our customers or financial institutions that maintain our cash, cash equivalents and marketable securities, experience financial difficulties, which is more likely in the current weakened state of the economy, our revenues, operating results or cash balances may be adversely impacted. We do not carry credit insurance on our accounts receivables and any difficulty in collecting outstanding amounts due from our customers, particularly customers that place larger orders or experience financial difficulties, could adversely affect our revenues and our operating results. In addition, we maintain our cash, cash equivalents and marketable securities with certain financial institutions in which our balances exceed the limits that are insured by the Federal Deposit Insurance Corporation. If the underlying financial institutions fail or other adverse conditions occur in the financial markets, our cash balances may be impacted.

We depend on contract manufacturers and subcontractors, and if they fail to meet our manufacturing needs, it could delay shipments of our products and result in the loss of customers or revenues and increased manufacturing costs, which would have an adverse effect on our results.* We rely on contract manufacturers for manufacturing our products and subcontractors for the assembly and packaging of the integrated circuits included in our products. In February 2009, we entered into a three-year manufacturing agreement with Sanmina-SCI to manufacture a majority of our products. We must work closely with Sanmina-SCI to ensure that products are delivered on a timely basis. In addition, we must ensure that Sanmina-SCI continues to provide quality products. However, with our intent to pursue the potential sale or disposition regarding certain of our assets or our business operations, we may encounter difficulties in obtaining products and/or services in a timely manner for competitive prices from our suppliers. If Sanmina-SCI is unwilling or unable to meet our supply needs, as was the case in the earlier stages of our contract with them, including timely delivery and adherence to standard quality, we could lose customers or revenues and incur increased manufacturing costs, which would have an adverse effect on our operating results.

Table of Contents

Due to the nature of this relationship, and the continuous changes in the prices of components and parts, we are in ongoing negotiations with Sanmina-SCI concerning product pricing. Any adverse outcome of future disputes concerning product pricing could adversely impact our gross margins. We have no long-term agreements with our assembly and packaging subcontractors. We also employ Amkor Technology and Advanced Semiconductor Engineering to final assemble and test operations related to our ASIC products. We cannot assure you that these subcontractors will continue to be able and willing to meet our requirements. Any significant disruption in supplies from or degradation in the quality of components or services supplied by these contract manufacturers and subcontractors could delay shipments and result in the loss of customers or revenues, which could have an adverse effect on our operating results.

The impact of industry technology transitions and market acceptance of our new products may cause our revenues to continue to decline.

We have experienced a significant decline in our revenues as the industry continues to transition from parallel to serial connectivity, as the revenues we generate from sales of our serial products has not grown at a fast enough rate to offset declines in sales of our parallel products. We expect this trend to continue in future periods. In addition, products that we may develop may not gain sufficient market acceptance to offset the decline in revenues from certain of our existing products or otherwise contribute significantly to revenues. These factors, individually or in the aggregate, could cause our revenues to continue to decline.

Our dependence on new products may cause our net revenues to fluctuate or decline. Our future success significantly depends upon our completing and introducing enhanced and new products at competitive prices and performance levels in a timely manner. The success of new product introductions depends on several factors, including the following:

Designing products to meet customer needs;

Product costs;

Timely completion and introduction of new product designs;

Quality of new products;

Differentiation of new products from those of our competitors; and

Market acceptance of our products.

Our product life cycles may be as brief as 12 months. As a result, we believe that we may continue to incur significant expenditures for research and development in the future. We may fail to identify new product opportunities and may not develop and bring new products to market in a timely manner. In addition, products or technologies developed by others may render our products or technologies obsolete or noncompetitive, or our targeted customers may not select our products for design or integration into their products. The failure of any of our new product development efforts could have an adverse effect on our business and financial results.

We have introduced RAID-enabled products based on the next generation SATA technology and delivered our products based on SAS technology to certain major customers for testing and integration. We will not succeed in generating significant revenues from our new SATA and SAS technology products if the market does not adapt to these new technologies, which would, over time, adversely affect our net revenues and operating results.

If we lose the cooperation of other hardware and software producers whose products are integral to ours, our ability to sustain or grow our revenues could be adversely affected. We must design our products to operate effectively with a variety of hardware and software products supplied by other manufacturers, including the following:

I/O and RAID ASICs;

Microprocessors;

Peripherals;

Operating system software;

Server and desktop motherboards; and

Enclosures.

We depend on significant cooperation from these manufacturers to achieve our design objectives and develop products that operate successfully with their products. These companies could, from time to time, elect to make it more difficult for us to design our products for successful operability with their products. For example, if one or more of these companies were to determine that as a result of competition or other factors, our products would not be broadly accepted by the markets we target, these companies may no longer work with us to plan for new products and new generations of our products, which would make it more difficult to introduce products on a timely basis or at all. Further, some of these companies might decide not to continue to offer products that are compatible with our technology and our markets could contract. If any of these events were to occur, our revenues and financial results could be adversely affected.

Table of Contents

*If we are unable to compete effectively, our net revenues and gross margins could be adversely affected.** The markets for all of our products are intensely competitive and are characterized by the following:

Rapid technological advances;

Frequent new product introductions;

Evolving industry standards; and

Price erosion.

We must continue to enhance our products on a timely basis to keep pace with market demands. If we do not do so, or if our competition is more effective in developing products that meet the needs of our existing and potential customers, we may lose market share and not participate in the future growth of our target markets. Revenues for our SATA products sold to our OEM customers have declined and we expect these revenues to continue to decline, as our products are at the end of their life cycles and certain of our customers have moved to other suppliers to obtain next generation SATA technologies. We also expect a negative impact on our net revenues from a decline in sales of our serial legacy products sold to OEMs in future quarters as IBM notified us in the second quarter of fiscal 2008 that we did not receive design wins for their new serial products.

Our future revenue growth remains largely dependent on the success of our new products addressing unified serial technologies and growing our market share in the channel, and our future operating results will be influenced by our ability to participate in the development of the network storage market in which we face intense competition from other companies that are also focusing on networked storage products. In June 2009, we launched a new product in the unified serial RAID controller family, Series 5Z, which leverages solid state technology to eliminate the need to monitor battery charge levels or shut down servers for battery replacement. If we experience an incremental decline in our revenues beyond the declines anticipated, and we are unable to effectively manage our inventory levels, we may be required to record additional inventory-related charges, which would adversely impact our gross margins.

We cannot assure you that we will have sufficient resources to accomplish any or all of the following:

Satisfy any growth in demand for our products;

Make timely introductions of new products;

Compete successfully in the future against existing or potential competitors; or

Prevent price competition from eroding margins.

*We depend on the efforts of our distributors, which if reduced, could result in a loss of sales of our products in favor of competitive offerings.** We derived approximately 61% of our total net revenues for the first nine months of fiscal 2010 from independent distributor and reseller channels. Our financial results could be adversely affected if our relationships with these distributors or resellers were to deteriorate or if the financial condition of these distributors or resellers were to decline. We continue to monitor and evaluate our distributors and may terminate distributor relationships to improve our product placement or improve distribution channels; however, the termination of a distributor may adversely affect our financial results in the short term.

Our distributors generally offer a diverse array of products from several different manufacturers. Accordingly, we are at risk that these distributors may give higher priority to selling products from other suppliers. A reduction in sales efforts by our current distributors could

adversely affect our business and financial results. Our distributors build inventories in anticipation of future sales, and if such sales do not occur as rapidly as they anticipate, our distributors will decrease the size of their product orders. If we decrease our price protection or distributor-incentive programs, our distributors may also decrease their orders from us. In addition, we have from time to time taken actions to reduce levels of products at distributors and may do so in the future. These actions may affect our net revenues and negatively affect our financial results.

We currently purchase all of the finished production silicon wafers, chips and other key components used in our products from suppliers, and if they fail to meet our manufacturing needs, it would delay our production and our product shipments to customers and negatively affect our operations. Independent foundries manufacture to our specifications all of the finished silicon wafers and chips used for our products. We currently purchase finished production silicon wafers used in our products from Taiwan Semiconductor Manufacturing Company, or TSMC, and purchase finished production chips from LSI Corporation. In addition, we purchase some of our key components used in our products from sole-source suppliers. The manufacture of semiconductor devices and other components are sensitive to a wide variety of factors, including the following:

The availability of raw materials;

The availability of manufacturing capacity;

Transition to smaller geometries of semiconductor devices;

The level of contaminants in the manufacturing environment;

Table of Contents

Impurities in the materials used; and

The performance of personnel and equipment.

We cannot assure you that manufacturing problems may not occur in the future. A shortage of raw materials or production capacity could lead our suppliers to allocate available capacity to other customers. Any prolonged inability to obtain wafers and other key components with competitive performance and cost attributes, adequate yields or timely deliveries would delay our production and our product shipments, and could have an adverse effect on our business and financial results. We expect that our suppliers will continually seek to convert their processes for manufacturing wafers and key components to more advanced process technologies. Such conversions entail inherent technological risks that can affect yields and delivery times. If for any reason the suppliers we use are unable or unwilling to satisfy our wafer and other key component needs, we will be required to identify and qualify additional suppliers. Additional suppliers for wafers and other key components may be unavailable, may take significant amounts of time to qualify or may be unable to satisfy our requirements on a timely basis.

Because our sales are made by means of standard purchase orders rather than long-term contracts, if demand for our customers' products declines or if our customers do not control their inventories effectively, they may cancel or reschedule shipments previously ordered from us or reduce their levels of purchases from us. The volume and timing of orders received during a quarter are difficult to forecast. Our customers generally order based on their forecasts and they frequently encounter uncertain and changing demand for their products. If demand falls below such forecasts or if our customers do not control their inventories effectively, they may cancel or reschedule shipments previously ordered from us. Our customers have from time to time in the past canceled or rescheduled shipments previously ordered from us, and we cannot assure you that they will not do so in the future. As our sales are made by means of standard purchase orders rather than long-term contracts, we cannot assure you that these customers will continue to purchase quantities of our products at current levels, or at all. Historically, we have set our operating budget based on forecasts of future revenues because we do not have significant backlog. Because much of our operating budget is relatively fixed in the short-term, if revenues do not meet our expectations, then our financial results will be adversely affected.

If we fail to adequately forecast demand for our products, we may incur excess product inventory costs and our financial results will be adversely affected. As the sales of our products are completed through standard purchase orders rather than long-term contracts, we provide our contract manufacturer forecasts based on anticipated future demand from our customers. To the extent that our customers' demands fall below their initial forecasts and we are unable to sell the product to another customer, and because our purchase commitment lead time to manufacture products with our contract manufacturer is longer than the lead time for a customer to cancel or reschedule an order, we may be exposed to excess product inventory costs and our financial results will be adversely affected.

Our operating results have fluctuated in the past, and are likely to continue to fluctuate, and if our future results are below the expectations of investors or securities analysts, the market price of our common stock would likely decline significantly. Our quarterly operating results have fluctuated in the past, and are likely to vary significantly in the future, based on a number of factors related to our industry and the markets for our products. Factors that are likely to cause our operating results to fluctuate include those discussed in this Risk Factors section. For example, in fiscal 2009, our operating results were materially impacted by unusual charges, such as a goodwill impairment charge of \$16.9 million.

Our operating expenses are largely based on anticipated revenues, and a large portion of our expenses, including facility costs and salaries, are fixed in the short term. As a result, lower than anticipated revenues for any reason could cause significant variations in our operating results from quarter to quarter.

Due to the factors summarized above, and the other risks described in this section, we believe that you should not rely on period-to-period comparisons of our financial results as an indication of our future performance. In the event that our operating results fall below the expectations of securities analysts or investors, the market price of our common stock could decline substantially.

We may be subject to a higher effective tax rate that could negatively affect our results of operations and financial position. We are subject to income and other taxes in the United States and in the foreign taxing jurisdictions in which we operate. The determination of our worldwide provision for income taxes and current and deferred tax assets and liabilities requires judgment and estimation and is subject to audit and redetermination by the taxing authorities. Although we believe our tax estimates are reasonable, the following factors could cause our effective tax rate to be materially different than tax amounts recorded in our Unaudited Condensed Consolidated Financial Statements:

The jurisdiction in which profits are determined to be earned and taxed;

Edgar Filing: ADAPTEC INC - Form 10-Q

Adjustments to estimated taxes upon finalization of various tax returns;

Changes in available tax credits;

Changes in share-based compensation expense;

Changes in tax laws, the interpretation of tax laws either in the United States or abroad or the issuance of new interpretative accounting guidance related to uncertain transactions and calculations where the tax treatment was previously uncertain; and

The resolution of issues arising from tax audits with various tax authorities.

Table of Contents

The factors noted above may cause a higher effective tax rate that could materially affect our income tax provision, results of operations or cash flows in the period or periods for which such determination is made.

Our reliance on industry standards and technological changes in the marketplace may cause our net revenues to fluctuate or decline. The computer industry is characterized by various, evolving standards and protocols. We design our products to conform to certain industry standards and protocols such as the following:

Technologies:

CIFS

Ethernet

Fibre channel

FTP

HTTP

IPsec

iSCSI

NFS

PCI

PCIe

PCI-X

RAID

SAS

SATA

SCSI

SMI-S

Operating Systems:

Linux

MacOS

Netware

UNIX

VMware

Windows

If user acceptance of these standards declines, or if new standards emerge, and if we do not anticipate these changes and develop new products accordingly, these changes could adversely affect our business and financial results.

We are subject to various environmental laws and regulations that could impose substantial costs upon us and may adversely affect our business. We may from time to time be subject to various state, federal, and international laws and regulations governing the environment, including laws regulating the manufacture and distribution of chemical substances and laws restricting the presence of certain substances in electronics products. Although not currently mandated by any laws and regulations, we experienced a delay in sales from some of our customers that required halogen-free products, which eliminated the use of environmentally sensitive materials, including certain salt-formers. If our products become non-compliant with the various environmental laws and regulations, or no longer meets our customer specification for environmental products, we may suffer a loss of revenues, be unable to sell affected products in certain markets or countries and be at a competitive disadvantage. We could also incur substantial costs to comply our products to meet the environmental needs of our customers, laws and regulations, which could negatively affect our results of operations and financial position.

If we do not provide adequate support during our customers' design and development stage, or if we are unable to provide such support in a timely manner, we may lose revenues to our competitors. Certain of our products are designed to meet our customers' specifications and, to the extent we are not able to meet these expectations in a timely manner or provide adequate support during our customers' design and development stage, our customers may choose to buy similar products from another company. If this were to occur, we may lose revenues and market share to our competitors.

If there is a shortage of components used in our customers' products, our sales may decline, which could adversely affect our results of operations and financial position. If our customers are unable to purchase certain components which are embedded into their products, their demand for our products may decline. In addition, we or our customers may be impacted by component shortages if components that comply with the RoHS directive are not available. Similar shortages of components used in our products or our customers' products could adversely affect our net revenues and financial results in future periods.

Table of Contents

Product quality problems could lead to reduced revenues and gross margins. We produce highly complex products that incorporate leading-edge technologies, including both hardware and software. Software often contains bugs which can interfere with expected operations. We cannot assure you that our pre-shipment testing programs will be adequate to detect all defects which might interfere with customer satisfaction, reduce sales opportunities, or affect our gross margins if the costs of remedying the problems exceed reserves established for that purpose. An inability to cure a product defect could result in the failure of a product line, and withdrawal, at least temporarily, from a product or market segment, damage to our reputation, inventory costs, product reengineering expenses, and a material impact on revenues and gross margins.

To execute our strategies, we may enter into strategic alliances with or, partner with companies with complementary or strategic products or technologies or make other structural changes to our business. Costs associated with these strategic alliances or partnerships may adversely affect our results of operations. This impact could be exacerbated if we are unable to integrate the products or technologies. We may pursue strategic transactions or partnerships to scale our business as sales of our core parallel products continue to decline. These may include both strengthening our partnerships in silicon-based technology and broadening our silicon-based intellectual property to improve our business opportunities. To be successful in any strategic alliances or partnerships that we may enter into or make, we must:

Conduct strategic alliances or partnerships that enhance our time to market with new products;

Successfully prevail over competing bidders for target strategic alliances or partnerships at an acceptable price;

Invest in technologies that contribute to the profitable growth of our business;

Develop the capabilities necessary to exploit newly acquired technologies; and

Consider structural changes to achieve additional stockholder return.

The benefits of any strategic alliances or partnerships may prove to be less than anticipated and may not outweigh the costs reported in our financial statements, and we may not obtain the operational leverage or realize the improvements we intend or desire with the actions we take.

Completing any potential future strategic alliances or partnerships could cause significant diversions of management time and resources and divert focus from the activities of our current operations. In addition, we may be required to invest significant resources to perform under a strategic alliance or partnership, which could adversely affect our results of operations, at least in the short-term, even if we believe the strategic alliance or partnership will benefit us in the long-term.

If we are not successful in completing strategic alliances or partnerships with companies with complementary or strategic products or technologies, our future growth may be hindered. To scale our operations relative to our cost basis, we may need to identify attractive strategic alliance or partnership candidates and complete a transaction with them. If we fail to identify and complete successful strategic alliances or partnerships, we expect that our revenues will continue to decline and we may be at a competitive disadvantage or we may be adversely affected by negative market perceptions, any of which may have a material adverse effect on our financial results.

Some of our products contain open source software, and any failure to comply with the terms of one or more of these open source licenses could negatively affect our business. Some of our products are distributed with software licensed by its authors or other third parties under so-called open source licenses, including, for example, the GNU General Public License, or GPL, GNU Lesser General Public License, or LGPL, the Mozilla Public License, the BSD License and the Apache License. Some of those licenses may require as a condition of the license that we make available source code for modifications or derivative works we create based upon, incorporating, or using the open source software, that we provide notices with our products, and/or that we license such modifications or derivative works under the terms of a particular open source license or other license granting third parties certain rights of further use. If an author or other third party that distributes such open source software were to allege that we had not complied with the conditions of one or more of those open source licenses, we could be required to incur legal expenses in defending against such allegations, and if our defenses were not successful we could be enjoined from distribution of the products that contained the open source software and required to either make the source code for the open source software available, to grant third parties certain rights of further use of our software, or to remove the open source software from our products, which could disrupt our

Edgar Filing: ADAPTEC INC - Form 10-Q

distribution and sale of some of our products. In addition, if we combine our proprietary software with open source software in a certain manner, we could under some of the open source licenses, be required to release the source code of our proprietary software. If an author or other third party that distributes open source software were to obtain a judgment against us based on allegations that we had not complied with the terms of any such open source licenses, we could also be subject to liability for copyright infringement damages and breach of contract for our past distribution of such open source software.

Table of Contents

Our international operations involve a number of political, economic and other risks that could adversely affect our ability to sell our products in certain countries, create local economic conditions that reduce demand for our products among our target markets and expose us to potential disruption in the supply of necessary components. Our international operations and sales are subject to political and economic risks, including political instability, currency controls, and changes in import/export regulations, tariffs and freight rates. Many of our subcontractors are primarily located in Asia and we have sales offices and customers located throughout Europe, Japan and other countries. In addition, because our primary wafer supplier, TSMC, is located in Taiwan, we may be subject to certain risks resulting from political instability in Taiwan, including conflicts between Taiwan and the People's Republic of China. These and other international risks could result in the creation of political or other non-economic barriers to our being able to sell our products in certain countries, create local economic conditions that reduce demand for our products among our target markets, expose us to potential disruption in the supply of necessary components or otherwise adversely affect our ability to generate revenues and operate effectively. In addition, the operations of our remote locations are subject to management oversight and control. If our business practices and corporate controls are not adhered to worldwide, our business and financial results could be adversely affected.

We depend on third parties to transport our products. We rely on independent freight forwarders to move our products between manufacturing plants and our customers. Any transport or delivery problems because of their errors, or because of unforeseen interruptions in their activities due to factors such as strikes, political instability, terrorism, natural disasters and accidents, could adversely affect our business, financial condition and results of operations and ultimately impact our relationship with our customers.

If actual results or events differ materially from those contemplated by us in making estimates and assumptions, our reported financial condition and results of operations for future periods could be materially affected. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. For example, we have identified key accounting estimates in our Critical Accounting Policies included in Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended March 31, 2009, which include revenue recognition, cash, cash equivalents and marketable securities valuation, inventory, goodwill, stock-based compensation and income taxes. Furthermore, Note 1 to the Consolidated Financial Statements included in Item 8: Financial Statements and Supplementary Data in our Annual Report on Form 10-K for the year ended March 31, 2009 describes the significant accounting policies essential to preparing our Consolidated Financial Statements. The preparation of these financial statements requires estimates and assumptions that affect the reported amounts and disclosures. Although we believe that our judgments and estimates are appropriate and correct, actual future results may differ materially from our estimates.

If we are unable to protect and enforce our intellectual property rights, we may be unable to compete effectively. Although we actively maintain and defend our intellectual property rights, we may be unable to adequately protect our proprietary rights. In addition, the laws of certain territories in which our products are or may be developed, manufactured or sold, including Asia and Europe, may not protect our products and intellectual property rights to the same extent as the laws of the United States. Because we conduct a substantial portion of our operations outside of the United States and sell to a worldwide customer base, we are more dependent on our ability to protect our intellectual property in international environments than would be the case if a larger portion of our operations were domestic.

Despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property, which could harm our business and ability to compete effectively. We have from time to time discovered counterfeit copies of our products being manufactured or sold by others. Although we have programs to detect and deter the counterfeiting of our products, significant availability of counterfeit products could reduce our revenues and damage our reputation and goodwill with customers.

Third parties may assert infringement claims against us, which may be expensive to defend and could divert our resources. From time to time, third parties assert exclusive patent, copyright and other intellectual property rights to our key technologies, and we expect to continue to receive such claims in the future. The risks of receiving additional claims from third parties may be increased in periods when we begin to offer product lines employing new technologies relative to our existing products.

We cannot assure you that third parties will not assert other infringement claims against us, directly or indirectly, in the future, that assertions by third parties will not result in costly litigation or that we would prevail in such litigation or be able to license any valid and infringed intellectual property from third parties on commercially reasonable terms. These claims may be asserted in respect of intellectual property that we own or that we license from others. In addition to claims brought against us by third parties, we may also bring litigation against others to protect our rights. Intellectual property litigation, regardless of the outcome, could result in substantial costs to us and diversion of our resources and management time and attention, and could adversely affect our business and financial results.

Table of Contents

We may be required to pay additional income taxes which could negatively affect our results of operations and financial position. Our tax provision continues to reflect judgment and estimation regarding components of the settlement such as interest calculations and the application of the settlements to foreign, state and local taxing jurisdictions. Although we believe our tax estimates are reasonable, the ultimate tax outcome may materially differ from the tax amounts recorded in our Consolidated Financial Statements and may cause a higher effective tax rate that could materially affect our income tax provision, results of operations or cash flows in the period or periods for which such determination is made. In fiscal 2009, the IRS concluded its audit of our federal income tax returns for the fiscal 2004 through 2006 audit cycle. The IRS issued a No Change Report indicating no change to our tax liability; however, the IRS continues to have the ability to adjust tax attributes relating to these years in subsequent audits. We believe that we have provided sufficient tax provisions for these years and that the ultimate outcome of any future IRS audits that include the tax attributes will not have a material adverse impact on our financial position or results of operations in future periods. In addition, in the third quarter of fiscal 2010, we recorded a discrete tax expense of \$3.2 million primarily due to the on-going tax audits in our foreign jurisdictions. While the tax authorities in the foreign jurisdictions that we operate in continue to audit our tax returns for fiscal years subsequent to 1999, the potential outcome of these audits is uncertain and could result in material tax provisions or benefits in future periods. However, we cannot predict with certainty how these matters will be resolved and whether we will be required to make additional tax payments and believes that it has provided sufficient tax provisions for our tax exposures.

Future changes in financial accounting standards or practices or existing taxation rules or practices may cause adverse unexpected revenue fluctuations and affect our reported results of operations.* A change in accounting standards or practices or a change in existing taxation rules or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and taxation rules and varying interpretations of accounting pronouncements and taxation practices have occurred and may occur in the future. For example, on April 1, 2007, we revised our policy in conformity with the liability classification requirements upon our adoption for the accounting of uncertainty in income tax positions. This interpretation requires that we recognize in our financial statements the impact of a tax position if that position is more likely than not to be sustained on audit, based on the technical merits of the position. At January 1, 2010, we had recorded gross liabilities of \$3.5 million for uncertain tax positions, which were reflected in Other long-term liabilities in the Unaudited Condensed Consolidated Balance Sheets, and we continue to recognize interest expense for, and or penalties related to, these uncertain tax positions in the Unaudited Condensed Consolidated Statements of Operations within Benefit from (provision for) income taxes.

We may be engaged in legal proceedings that could cause us to incur unforeseen expenses and could occupy a significant amount of our management's time and attention. From time to time we are subject to litigation or claims that could negatively affect our business operations and financial position. Such disputes could cause us to incur unforeseen expenses, could occupy a significant amount of our management's time and attention, and could negatively affect our business operations and financial position.

We are exposed to fluctuations in foreign currency exchange rates. Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates. These exposures may change over time as business practices evolve and could have an adverse impact on our financial results and cash flows. Historically, our exposures have related to non-dollar-denominated operating expenses in Europe and Asia. We began Euro-denominated sales to our distribution customers in the European Union in the fourth quarter of fiscal 2003; however, we switched back to United States dollar-denominated sales to our distribution customers in the European Union in the fourth quarter of fiscal 2008. An increase in the value of the dollar could increase the real cost to our customers of our products in markets outside the United States where we sell in dollars, and a weakened dollar could increase the cost of local operating expenses and procurement.

We hold non-controlling interests in privately held venture funds, and if these venture funds face financial difficulties in their operations, our investments could be impaired.* We continue to hold non-controlling interest in privately held venture funds. At January 1, 2010, the carrying value of such investments aggregated \$1.2 million. These investments are inherently risky because these venture funds invest in companies that may still be in the development stage or depend on third parties for financing to support their ongoing operations. In addition, the markets for the technologies or products of these companies are typically in the early stages and may never develop. If these companies do not have adequate cash funding to support their operations, or if they encounter difficulties developing their technologies or products, the venture funds' investments in these companies may be impaired, which in turn, could result in impairment of our investment in these venture funds. For example, in fiscal 2009, the value of our non-controlling interest in privately held venture funds, declined resulting in a recorded charge of \$0.4 million. The carrying value of these investments is based on quarterly statements we receive from the funds. The statements are generally received one quarter in arrears, as more timely valuations are not practical. Given the recent downturn in equity investments and current market conditions, we may be required to record an impairment charge against all or a portion of the investments in the future. Such an action would adversely affect our financial results.

Changes in securities laws and regulations have increased and may continue to increase our costs. Changes in the laws and regulations affecting public companies, including the provisions of the Sarbanes-Oxley Act of 2002 and rules promulgated by the SEC, have increased and may continue to increase our expenses as we devote resources to respond to their requirements. In particular, we incurred additional

Edgar Filing: ADAPTEC INC - Form 10-Q

administrative expense to implement Section 404 of the Sarbanes-Oxley Act, which requires management to report on, and our independent registered public accounting firm to attest to, our internal control over financial reporting.

Table of Contents

In addition, the NASDAQ Global Market, on which our common stock is listed, has also adopted comprehensive rules and regulations relating to corporate governance. These laws, rules and regulations have increased and may continue to increase the scope, complexity and cost of our corporate governance, reporting and disclosure practices. We also expect these developments may make it more difficult and more expensive for us to obtain director and officer liability insurance in the future, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage.

Internal control deficiencies or weaknesses that are not yet identified could emerge. Over time we may identify and correct deficiencies or weaknesses in our internal control over financial reporting and, where and when appropriate, report on the identification and correction of these deficiencies or weaknesses. However, the internal control procedures can provide only reasonable, and not absolute, assurance that deficiencies or weaknesses are identified. Deficiencies or weaknesses that are not yet identified could emerge, and the identification and corrections of these deficiencies or weaknesses could have a material impact on our results of operations.

Internal control issues that appear minor now may later become material weaknesses. We are required to publicly report on deficiencies or weaknesses in our internal control over financial reporting that meet a materiality standard as required by law and related regulations and interpretations. Management may, at a point in time, accurately categorize a deficiency or weakness as immaterial or minor and therefore not be required to publicly report such deficiency or weakness. Such determination, however, does not preclude a change in circumstances such that the deficiency or weakness could, at a later time, become a material weakness that could have a material impact on our results of operations.

We may encounter natural disasters, which could cause disruption to our employees or interrupt the manufacturing process for our products. Our operations could be subject to natural disasters and other business disruptions, which could seriously harm our revenues and financial condition and increase our costs and expenses. Our corporate headquarters are located in California, near major earthquake faults. Additionally, our primary wafer supplier, TSMC, is located in Taiwan, which has experienced significant earthquakes in the past. A severe earthquake could cause disruption to our employees or interrupt the manufacturing process, which could affect TSMC's ability to supply wafers to us, which would negatively affect our business and financial results. The ultimate impact on us and our general infrastructure of being located near major earthquake faults is unknown, but our net revenues and financial condition and our costs and expenses could be significantly impacted in the event of a major earthquake.

Manmade problems such as computer viruses or terrorism may disrupt our operations and harm our operating results. Despite our implementation of network security measures, our servers are vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems. Any such event could have an adverse effect on our business, operating results, and financial condition. In addition, the effects of war or acts of terrorism could have an adverse effect on our business, operating results, and financial condition. In addition, as a company with headquarters and significant operations located in the United States, we may be impacted by actions against the United States. We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war.

We may experience significant fluctuations in our stock price. Our stock has experienced substantial price volatility, particularly as a result of quarterly variations in our operating results, the published expectations of securities analysts and as a result of announcements by our competitors and us. In addition, the stock market has experienced significant price and volume fluctuations, particularly in recent months, that have affected the market price of many technology companies, in particular, and that have often been related to the extraordinary conditions in the broader macroeconomic and financial markets. These factors, either individually or in the aggregate, could result in significant variations in the price of our common stock during any given period of time.

In July 2008, our board of directors authorized a stock repurchase program to purchase up to \$40.0 million of our common stock. No common stock repurchases occurred during the third quarter of fiscal 2010. We have repurchased approximately \$4.1 million in shares of our common stock in the open market through January 1, 2010. As of January 1, 2010, \$35.9 million remained available for repurchase under the authorized stock repurchase program.

In the third quarter of fiscal 2010, we withheld approximately 0.1 million shares to cover the applicable taxes, relating to the vesting of shares of restricted stock. The average price per share of the shares withheld was \$3.29. The shares withheld for tax purposes are not considered common stock repurchases under our authorized plan.

Item 4. Submission of Matters to a Vote of Security Holders.

Reference is made to (i) the Definitive Consent Revocation Statement filed by Adaptec with the SEC on September 29, 2009 and (ii) the Definitive Consent Statement filed by the Steel Group on September 25, 2009. On October 30, 2009, the Steel Group delivered information to us, which indicated that the Steel Group received the requisite number of written consents from our stockholders to pass all three proposals regarding our amended and restated bylaws and the composition of our board of directors, which was subsequently certified by IVS Associates, Inc. on November 6, 2009. Our common stock outstanding as of the record date on September 3, 2009 was 120,522,797, which entitled stockholders to execute, withhold or revoke consents for each share held. The details of the three proposals and the votes for each proposal were as follows:

(i) The vote on a proposal made by the Steel Group to repeal any provision of our Amended and Restated Bylaws, or the Bylaws, in effect at the time this proposal becomes effective that was not included in the Bylaws that became effective on May 6, 2009 and were filed with the SEC on May 12, 2009, or the Bylaw Proposal. The Bylaw Proposal received 69,321,793 consenting votes, 386,436 consent votes withheld and 488,512 abstentions.

(ii) The vote on a proposal made by the Steel Group to remove without cause Subramanian Sundi Sundaresh and Robert J. Loarie as our directors and any other person or persons elected or appointed to our board of directors prior to the effective date of the proposal, or the Removal Proposal. The table below presents the voting results for the removal of each director.

Director	Consenting Votes	Consent Votes Withheld and/or Abstentions
Subramanian Sundi Sundaresh	61,100,735	9,112,206
Robert J. Loarie	69,278,153	933,588

(iii) The vote on a proposal made by the Steel Group to amend section 2.1 of the Bylaws to fix the number of directors serving on our board of directors at seven (7), or the Board Size Proposal. The Board Size Proposal received 69,239,745 consenting votes, 407,221 consent votes withheld and 551,075 abstentions.
