SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-K

(Mark One)

☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2010

Commission File Number: 001-33045

ICF INTERNATIONAL, INC.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of

22-3661438
(IRS Employer

Edgar Filing: ICF International, Inc. - Form 10-K

incorporation or organization)	Identification Number)
9300 Lee Highway	
Fairfax, VA	22031
(Address of principal executive offices)	(Zip Code)
Registrant's telephone number, including area code:	
(703) 934-3000	

Securities Registered Pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Exchange on which Registered
Common Stock, \$0.001 par value	The NASDAQ Stock Market LLC

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the Registrant as of the last business day of the Registrant's most recently completed second fiscal quarter was approximately \$450 million based upon the closing price per share of \$23.93, as quoted on the NASDAQ Global Select Market on June 30, 2010. Shares of the outstanding common stock held by each executive officer and director have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 1, 2011, 19,576,022 shares of the Registrant's common stock, \$0.001 par value, were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates information by reference from the definitive proxy statement for the Annual Meeting of Stockholders expected to be held in June 2011.

FORWARD-LOOKING STATEMENTS

Some of the statements in this Annual Report on Form 10-K constitute forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by such forward-looking statements. In some cases, you can identify these statements by forward-looking words such as anticipate, believe, could, estimate, expect, intend, may, plan, potential, should, will, would, or similar words. You should read these forward-looking statements carefully. The factors described in Item 1A of Part I of this Annual Report on Form 10-K captioned "Risk Factors," or otherwise described in our filings with the Securities and Exchange Commission ("SEC"), as well as any cautionary language in this Annual Report on Form 10-K, provide examples of risks, uncertainties, and events that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements, including, but not limited to:

our dependence on contracts with federal, state, and local government agencies and departments for the majority of our revenue;

changes in the economic and political climate that may affect spending patterns and priorities of our clients;

failure by Congress or other governmental bodies to approve budgets in a timely fashion;

results of government audits and investigations;

failure to receive the full amount of our backlog;

loss of members of management;

difficulties implementing our acquisition strategy;

difficulties expanding our service offerings and client base; and

liabilities arising from our major contract with the State of Louisiana, which was completed in 2009.

The forward-looking statements are based on the beliefs and assumptions of our management and the information available to our management at the time these disclosures were prepared. Although we believe the expectations reflected in these statements are reasonable, we cannot guarantee future results, levels of activity, performance, or achievements. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Annual Report on Form 10-K. We undertake no obligation to update these forward-looking statements, even if our situation changes in the future.

The terms "we," "our," "us," and "the Company," as used throughout this Annual Report on Form 10-K, refer to ICF International, Inc. and its consolidated subsidiaries, unless otherwise indicated. The term "federal government" refers to the U.S. government, unless otherwise indicated.

Table of Contents

PART I

ITEM 1. BUSINESS COMPANY OVERVIEW

We provide management, technology, and policy consulting and implementation services to government, commercial, and international clients. We help our clients conceive, develop, implement, and improve solutions that address complex natural resource, social, and national security issues. Our services primarily address three key markets:

Energy, Environment, and Transportation;

Health, Education, and Social Programs; and

Homeland Security and Defense.

We provide services across these three markets that deliver value throughout the entire life of a policy, program, project, or initiative, from concept analysis and design through implementation and improvement. Our primary services include:

Advisory Services. We provide policy, regulatory, technology, and other advice to our clients to help them address and respond to the challenges they face. Our advisory services include needs and market assessments, policy analysis, strategy and concept development, organizational assessment and strategy, enterprise architecture, and program design.

Implementation Services. We implement and manage technological, organizational, and management solutions for our clients, including information technology solutions, project and program management, project delivery, strategic communications, and training. These services often relate to the advisory services we provide.

Evaluation and Improvement Services. We provide evaluation and improvement services that help our clients increase the effectiveness and transparency of their programs. Our evaluation and improvement services include program evaluations, continuous improvement initiatives, performance management, benchmarking, and return-on-investment analyses.

We serve federal, state, local, and foreign government clients, as well as major domestic and international corporations and multilateral institutions. Our clients utilize our advisory services because we offer a combination of deep subject-matter expertise and institutional experience in our market areas. We believe that our domain expertise and the program knowledge developed from our advisory engagements further position us to provide implementation and evaluation services.

As of December 31, 2010, we had more than 3,700 employees, including many recognized as thought leaders in their respective fields. We serve clients globally from our headquarters in the metropolitan Washington, D.C. area, our more than 50 regional offices throughout the United States, and our international offices in London, Moscow, New Delhi, Rio de Janeiro, Toronto, and Beijing.

We generated revenue of \$764.7 million, \$674.4 million, and \$697.4 million in 2010, 2009, and 2008, respectively. Our total backlog was approximately \$1,367 million and \$1,362 million as of December 31, 2010, and 2009, respectively. See [Contract Backlog](#) for a discussion of how we calculate backlog, as well as our financial statements and the related notes included elsewhere in this Annual Report on Form 10-K.

OUR COMPANY INFORMATION

Edgar Filing: ICF International, Inc. - Form 10-K

Our principal operating subsidiary was founded in 1969. ICF International, Inc. was formed as a Delaware limited liability company in 1999 under the name ICF Consulting Group Holdings, LLC in connection with the

Table of Contents

purchase of our business from a larger services organization. A number of our current senior managers participated in this buyout transaction along with private equity investors. We converted to a Delaware corporation in 2003 and changed our name to ICF International, Inc. in 2006.

We completed our initial public offering (IPO) in October 2006 and filed a shelf registration statement on Form S-3 in September 2009, pursuant to which we sold additional shares of our common stock to the public in December 2009. Since our IPO, we have completed a number of acquisitions, including: Energy and Environmental Analysis, Inc. (EEA) and Advanced Performance Consulting Group, Inc. (APCG) in January 2007; Z-Tech Corporation (Z-Tech) in June 2007; Simat, Helliesen & Eichner, Inc. (SH&E) in December 2007; Jones & Stokes Associates, Inc. (Jones & Stokes) in February 2008; Macro International Inc. (Macro) in March 2009; Jacob & Sundstrom, Inc. (JASI) in December 2009, and Marbek Resource Consultants Ltd. (Marbek) in 2011. Our more recent acquisitions are discussed further in Management's Discussion and Analysis of Financial Condition and Results of Operations Acquisitions.

Our principal executive office is located at 9300 Lee Highway, Fairfax, Virginia 22031, and our telephone number is (703) 934-3000.

We maintain an internet Web site at www.icfi.com. We make available our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, and other information related to us, free of charge, on this site as soon as reasonably practicable after we electronically file those documents with, or otherwise furnish them to, the SEC. Our internet Web site and the information contained therein or connected thereto are not intended to be incorporated into this Annual Report on Form 10-K.

MARKET OPPORTUNITY, SERVICES, AND SOLUTIONS

Complex, long-term market factors, as well as secular trends, are changing the way we live and the way government and industry operate and interact. Some of the most critical factors are centered firmly in our three major market areas. In the energy, environment, and transportation market, these factors include rising energy demand and increasing focus on alternative fuels and energy efficiency, energy independence, aging transportation infrastructure, and environmental degradation. In the health, education, and social programs market, these factors include the increasing level of healthcare expenditures relative to the economy, growing aging populations, increasing military and veteran health demands, continued focus on disease prevention, the perceived declining performance of the U.S. educational system compared to other countries, and the need for job creation. The continuing threat of terrorism, including cyber threats, and changing national security priorities are affecting the defense and homeland security markets, as well as infrastructure protection in the commercial sector. In addition to these market-based factors, secular trends across all of our markets are increasing the demand for advisory and implementation services that drive our business. These trends include: increased government focus on efficiency and measuring outcomes, the aging federal workforce, the emphasis on transparency and accountability, and an increased demand for combining domain knowledge of client mission and programs with information-technology solutions.

We believe that demand for our services will continue to grow as government, industry, and other stakeholders seek to understand and respond to these and other factors within the constraints of growing deficits that drive the need for government agencies at all levels to deliver more with fewer resources. We expect that our government clients will continue to utilize professional services firms with domain expertise in their program areas to assist with designing new programs, enhancing existing ones, and offering transformational solutions based on relevant evaluation and improvement experience. In addition, commercial organizations affected by these programs will need to understand such changes, as well as their implications, in order for them to plan appropriately. We believe that our institutional knowledge and our subject-matter expertise in our three key markets are distinct competitive advantages in providing our clients with practical, innovative solutions, directly applicable to their mission or business, with a faster deployment of the right resources. Moreover, we believe we

Table of Contents

will be able to leverage the domain expertise and program knowledge we have developed through our advisory assignments and our experience on implementation projects to win larger engagements, thereby increasing returns on business development investment and enhancing employee utilization.

Energy, Environment, and Transportation

We have long been involved in advising on energy and environmental issues, including the impact of human activity on natural resources, and in helping develop solutions for infrastructure-related challenges. In addition to addressing government policy and regulation in these areas, our work focuses on industries that are affected by these policies and regulations, particularly the industry's most heavily involved in the production, use, and delivery of energy. Significant factors affecting suppliers, users, and regulators of energy are driving private and public sector demand for professional services firms, including:

Changing power markets and an increased demand for alternative fuels;

Ongoing efforts to upgrade the energy infrastructure to meet new power, transmission, environmental, and cybersecurity requirements;

The need to manage energy demand and increase efficient energy use in an era of supply constraints and environmental concerns; and

The impacts of addressing carbon and other emissions.

We assist energy enterprises and energy consumers worldwide in their efforts to analyze, develop, and implement strategies related to their business operations and the interrelationships of those operations with the environment and applicable government regulations. We utilize our policy expertise, deep industry knowledge, and proprietary modeling tools to advise government and industry clients on key topics related to electric power, traditional fuels, and renewable sources of energy. Our areas of expertise include power market analysis and modeling, transmissions analysis, electric system reliability standards, energy asset valuation and due diligence, regulatory and litigation support, fuels market analysis, air regulatory strategy, and renewable energy and green power. We also support government and commercial clients in designing, implementing, and evaluating demand-side energy management strategies in a wide range of areas, including energy efficiency and peak load management. Our work includes numerous engagements supporting the ENERGY STARSM suite of programs at the federal and state levels.

Although global climate change is no longer part of the U.S. federal legislative agenda, carbon emissions is still an important focus of governments (including many states) and multinational corporations around the world. Reducing or offsetting greenhouse gas (GHG) emissions continues to be the subject of both public and private sector interest, and the regulatory landscape in this area is still evolving. The need to address carbon and other harmful emissions has significantly changed the way the world's governments and industries interact and continues to be one of the drivers of the interest in energy efficiency.

We have decades of experience in designing, evaluating, and implementing environmental policies and transportation infrastructure projects and believe that a number of key issues are driving increased demand for the services we provide in these areas, including:

Increased focus on the proper stewardship and regulation of natural resources;

Historic under-investment in transportation infrastructure; and

Changing patterns of economic development that require transportation systems to adapt to new patterns of demand.

Edgar Filing: ICF International, Inc. - Form 10-K

By leveraging our interdisciplinary skills, which range from finance and economics to earth and life sciences and information technology and program management, we are able to provide a wide range of services

Table of Contents

that includes complex environmental impact assessments, environmental management information systems, air quality assessments, program evaluation, transportation planning, and regulatory reinvention. Our experience in environmental policy and planning allows us to help clients deal specifically with the inter-related environmental, business, and social implications of transportation modes and infrastructure. From the environmental management of complex infrastructure engagements to strategic and operational concerns of airlines and airports, our solutions draw upon our expertise and institutional knowledge in transportation planning, urban and land use planning, industry management practices, financial analysis, environmental sciences, and economics.

Health, Education, and Social Programs

Our advisory, implementation, and improvement expertise is also applied to social resources in areas such as health, education, and social programs. We believe that a confluence of factors is expected to drive an increased need for public spending in the United States on health, human services, and social programs. These factors include, among others:

An aging population;

Attempts to expand healthcare services to under-served segments of the population;

Rising healthcare expenditures, requiring the evaluation of the effectiveness and efficiency of current and new programs;

The emphasis on improving the effectiveness of the educational system;

Growing awareness of the threats from the global spread of disease;

The need to address the foreclosure crisis and its effects on homeowners and communities;

The need for greater transparency and accountability of public sector programs;

Increasing focus on cybersecurity requirements;

Military personnel returning home from active duty with health and social service needs; and

The need to address the potential health and social consequences of threats from terrorism, natural disasters, and epidemics. We believe we are well positioned to provide research, consulting, implementation, and improvement services to help our clients develop and manage effective programs in the areas of health, education, and social programs at the national, regional, and local levels. Our subject-matter expertise includes public health, mental health, international health and development, health communications, education, children and families, disaster recovery, housing and communities, military personnel recruitment and retention, and substance abuse. Our combination of health-domain knowledge and our experience in information technology applications provides us with strong capabilities in health informatics, which we believe will be of increasing importance as the need to manage health and biomedical information grows. We partner with our clients in the government, commercial, and non-profit sectors to increase their knowledge base, support program development, enhance program operations, evaluate program results, and improve program effectiveness.

Edgar Filing: ICF International, Inc. - Form 10-K

In the area of health, we support many programs within the Department of Health & Human Services (HHS), including the National Institutes of Health and the Centers for Disease Control, conducting primary data collection and analyses, assisting in designing, delivering, and evaluating programs, managing technical assistance centers, providing instructional systems, developing information technology applications, and managing information clearinghouse operations. In the area of human services, we provide training and technical assistance for early care and educational programs (such as Head Start), services for victims of crime at the Department of Justice (DOJ), and health and demographic surveys in developing countries for the Department of State (DOS). In the area of social programs, we provide extensive training, technical assistance, and

Table of Contents

program analysis and support services for a number of the housing and rural and community development programs of the Department of Housing and Urban Development (HUD) and the Department of Agriculture (USDA). In the area of education, we provide research, program design, evaluation, and training at the federal and state level.

Homeland Security and Defense

Homeland security programs continue to be a critical priority at the federal level, as well as the state and local levels. We believe that the following key homeland security trends, in both the government and commercial sectors, will continue to drive an increased need for our services in this area:

Vulnerability of critical infrastructure to cyber and terrorist threats;

Broadened homeland security concerns to include areas such as health, food, energy, water, and transportation;

Reassessment of the emergency management function of homeland security in the face of natural disasters;

Increased dependence on private sector personnel and organizations in emergency response; and

The need to ensure that critical functions and sectors are able to recover quickly after attacks.

In addition, the Department of Defense (DoD) is undergoing major transformations in its approach to strategies, processes, organizational structures, and business practices due to several complex, long-term factors, including:

The changing nature of global security threats, including cybersecurity threats;

Family issues associated with globally deployed armed forces; and

The increasing complexity of war-fighting strategies, the need for real-time information sharing and logistics modernization, network-centric warfare requirements, and the global nature of combat arenas.

We provide key services to the Department of Homeland Security (DHS) and DoD. At DHS, we assist in shaping and managing critical programs to ensure the safety of communities, developing critical infrastructure protection plans and processes, establishing goals and capabilities for national preparedness at all levels of government in the United States, and managing the national program to test radiological emergency preparedness at the state and local levels in communities adjacent to nuclear power facilities. We also provide cybersecurity and emergency management services to the commercial sector, especially the utility industry. We support DoD by providing high-end strategic planning, analysis, and technology solutions in the areas of logistics management, operational support, command and control, and cybersecurity. We also provide the defense sector with environmental management, human capital assessment, military community research, and technology-enabled solutions. Finally, we pursue opportunities that reside at the intersection of homeland security and defense and believe that the interrelationships and strengthened ties among traditional defense requirements and homeland security, such as disaster preparedness and response and recovery, create significant demands for professional services.

COMPETITIVE STRENGTHS

We possess the following key business strengths:

We have a highly educated professional staff with deep subject-matter knowledge

We possess strong intellectual capital that provides us with a deep understanding of policies, processes, and programs across our major markets. Our thought leadership is based on years of training, experience, and

Table of Contents

education. Our clients are able to draw on the in-depth knowledge of our subject-matter experts and our experience developed over decades of providing advisory services. As of December 31, 2010, approximately 40% of our benefits-eligible staff held post-graduate degrees in diverse fields such as the social sciences, business and management, physical sciences, public policy, human capital, information technology and mathematics, engineering, planning, economics, life sciences, and law. These qualifications, and the complementary nature of our markets, enable us to deploy multi-disciplinary teams to identify, develop, and implement solutions that are creative, pragmatic, and tailored to our clients specific needs.

We believe our diverse range of markets, services, and projects, provide a stimulating work environment for our employees and enhances their professional development. The use of multi-disciplinary teams provides our staff the opportunity to develop and refine common skills required in many types of engagements. Our approach to managing human resources fosters collaboration and significant cross-utilization of the skills and experience of both industry experts and other personnel who can develop creative solutions by drawing upon their different experiences. The types of services we provide, and the manner in which we do so, enable us to attract and retain talented professionals from a variety of backgrounds while maintaining a culture that fosters teamwork and excellence.

We have strong long-standing relationships with clients across a diverse set of markets

The long-term relationships we maintain with many of our clients reflect our successful track record of fulfilling our clients needs. We have advised both the Environmental Protection Agency (EPA) and HHS for more than 30 years, the Department of Energy (DOE) for more than 25 years, and DoD for more than 20 years, and have multi-year relationships with many of our other clients. We have numerous contacts at various levels within our clients organizations, ranging from key decision-makers to functional managers. The long-standing nature and breadth of our client relationships adds greatly to our institutional knowledge, which, in turn, helps us carry out our client engagements more effectively and maintain and expand such relationships. Our extensive experience and client contacts, together with our prime-contractor position on a substantial majority of our contracts and onsite presence, gives us clearer visibility into future opportunities and emerging requirements. In addition, as of December 31, 2010, approximately 330 of our employees held an active federal security clearance (with approximately 110 additional employees having a terminated clearance eligible for reinstatement), which affords us client access at appropriate levels and further strengthens our client relationships. We believe our balance between civilian and defense agencies, our commercial presence, and the diversity of the markets we serve help mitigate the impact of annual shifts in our clients budgets and priorities.

Our advisory role positions us to capture a full range of engagements

We believe our advisory approach, which is based on our subject-matter expertise combined with an understanding of our clients requirements and objectives, is a significant competitive differentiator that helps us gain access to key client decision-makers during the initial phases of a policy, program, project, or initiative. We use our expertise and understanding to formulate customized recommendations for our clients. We believe this domain expertise and the program knowledge developed from our advisory engagements further position us to provide implementation and evaluation services. Implementation and evaluation engagements, in turn, allow us to understand better our clients requirements and objectives as they evolve over time. We then use this knowledge to provide evaluation and improvement services that maintain the relevance of our recommendations. As a result, we believe we are able to offer services across the entire life cycle of a particular policy, program, project, or initiative.

Our technology solutions are driven by our deep subject-matter expertise

Government and commercial decision-makers have become increasingly aware that, to be effective, technology solutions need to be seamlessly integrated with people and processes. We possess strong knowledge in information technology and a thorough understanding of human and organizational processes. This

Table of Contents

combination of skills, along with our domain knowledge allows us to deliver technology-enabled solutions tailored to our clients' business and organizational needs and with less ramp-up time required to understand customer issues.

Our proprietary analytics and methods allow us to deliver superior solutions to our clients

We believe our innovative, and often proprietary, analytics and methods are key competitive differentiators because they enhance our ability to deliver customized solutions, and enable us to deliver services in a more cost-effective manner than our competitors. For example, we have developed industry-standard energy and environmental models that are used by governments and commercial entities around the world for energy planning and air quality analyses, and have also developed a suite of proprietary climate change tools to help the private sector develop strategies for complying with GHG emission reduction requirements. We maintain proprietary databases that we continually refine and that are available to be incorporated quickly into our analyses on client engagements. In addition, we also have proprietary program management methodologies and services that we believe can help governments improve performance measurement, support chief information officer and science and engineering program activities, and reduce security risks.

We are led by an experienced management team

Our management team, consisting of approximately 230 officers with the title of vice president or higher, possesses extensive industry experience and had an average tenure of 13 years with us as of December 31, 2010 (including prior service with companies we have acquired). This low turnover allows us to retain institutional knowledge. Our managers are experienced both in marketing efforts and in successfully managing and executing advisory, implementation, and evaluation assignments. Our management team also has experience in acquiring other businesses and integrating those operations within our own. A number of our managers are industry-recognized thought leaders. Based on these factors, we believe that our management's successful past performance and deep understanding of our clients' needs have been differentiating factors in competitive situations.

STRATEGY

Our strategy to increase our revenue and stockholder value involves the following key elements:

Leverage advisory work into implementation and full life-cycle solutions

We plan to continue to leverage our advisory services and strong client relationships to increase our revenue from implementation support services. These services include: information services and technology solutions, project and program management, business process solutions, strategic communications, and technical assistance and training. Our advisory services provide us with insight and understanding of our clients' missions and goals. We believe the domain expertise and program knowledge we develop from these advisory assignments position us to capture a greater portion of larger implementation engagements. We will, however, need to undertake such expansion carefully to avoid actual, potential, and perceived conflicts of interest. See **Risk Factors** **Risks Related to our Business**. The diversity of the services we provide and the clients we serve may create actual, potential, and perceived conflicts of interest and conflicts of business that limit our growth and lead to liability for us.

Pursue larger contract opportunities

We believe that continuing to expand our client engagements into implementation, evaluation, and improvement services enables us to pursue larger prime contract opportunities, which should provide a greater return on our business development efforts and allow for enhanced employee utilization. We plan to continue to target larger and longer-term opportunities through greater emphasis on early identification of opportunities, strategic capture and positioning, and enhanced brand recognition. We believe that the resulting increase in the scale, scope, and duration of our contracts will accelerate our growth.

Table of Contents

Expand and deepen our presence in federal and state governmental agencies

Given the growth in the scope of our service offerings, many of our current federal clients are not utilizing the full array of services that we offer, especially with regard to implementation. We will specifically target deeper penetration of those agencies that currently procure services only from one or two of our business areas. We believe we can leverage many of our long-term client relationships by introducing these existing clients, where appropriate, to our other services. For example, we plan to introduce many of our advisory clients to our capabilities to provide associated information technology, cybersecurity, large-scale program management, and strategic communications services. Given the increasing focus on deficit reduction and transparency, we can also offer clients our extensive performance measurement, program evaluation, and performance management services. Finally, having grown to have more than 50 offices across the United States, we can focus more of our business development efforts on addressing the needs of federal agencies with operations outside of the metropolitan Washington, D.C. area. As federal money passes to the states to finance state-level initiatives and programs, we can leverage our growing U.S. geographic footprint to help more state clients employ those federal funds more effectively.

Expand our commercial business

We see growth opportunities in our current commercial business in the utility and air transport industries, as well as significant potential for us to expand our business in other commercial sectors, both domestically and internationally. Although we believe the utility industry will continue to be a strong market for advisory services in light of the growing focus on regulatory actions and alternative fuels, we intend to leverage our existing relationships and institutional expertise to pursue and capture additional, typically higher-margin opportunities. First, we believe we can continue to expand beyond our advisory-based businesses and into implementation services such as assisting with implementing energy efficiency programs for utilities. Second, the growth of interest in sustainability and energy efficiency issues has created opportunities to offer these types of services to new clients in sectors beyond our traditional clients. We expect other sectors, such as information service providers and hotel and tourist-related services, to continue to expand as these industries better understand their energy consumption options and the positive benefits of demonstrating environmental stewardship.

Replicate our business model globally across government and industry

We believe the services we provide to the energy, environment, and transportation markets have especially strong business drivers throughout the world. Europe's growing need for cutting-edge climate change, energy and environmental solutions plays well to our domain expertise. Moreover, four of our offices outside of the United States are located in the BRIC countries (Brazil, Russia, India, and China), each of which represents a substantial market with rapidly growing demands for new sources of energy, a need for transportation infrastructure improvements, and severe air and carbon pollution issues. We believe our ability to offer energy, infrastructure, climate change, and environmental services to both commercial and government clients in these countries from local offices, typically staffed by native citizens, positions us well to help clients address these key issues and therefore to expand our market presence.

Focus on higher-margin projects

We plan to pursue higher-margin commercial projects and to continue to shift our federal, state, and local government contract base to increase margins. We believe we have strong global client relationships in both the commercial energy and air transport markets, where our margins have historically been higher than those in our government business. We view the energy industry as a particularly attractive market for us over the next decade due to concerns over controlling energy costs and limiting climate and environmental impacts, increased state and federal regulation, and the need for cleaner and more diverse sources of energy. We believe these factors, coupled with our expanding national and global footprint, will result in a greater number of engagements that will also be larger in size and scope.

Table of Contents

Pursue strategic acquisitions

We plan to augment our organic growth with selected acquisitions. During the past few years, we have acquired a number of companies, including: Macro and JASI in 2009; Jones & Stokes in 2008; and SH&E, Z-Tech, EEA, and APCG in 2007. Our more recent acquisitions are discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Acquisitions. We plan to continue a disciplined acquisition strategy to obtain new clients, increase our size and market presence, and obtain capabilities that complement our existing portfolio of services, while focusing on cultural compatibility and financial impact.

CONTRACTS

Domestic government clients (including U.S. federal, state, and local governments), domestic commercial clients, and international clients (including government and commercial clients outside the United States) accounted for approximately 81%, 14%, and 5%, respectively, of our 2010 revenue, approximately 80%, 15%, and 5%, respectively, of our 2009 revenue, and approximately 83%, 12%, and 5%, respectively, of our 2008 revenue. Our clients span a broad range of defense and civilian agencies and commercial enterprises. Our contract periods typically extend from one month to five years, including option periods. Many of our government contracts provide for option periods that may be exercised by the client. Our largest contract in 2009 and 2008, The Road Home contract with the State of Louisiana, which was completed in June 2009, accounted for approximately 9% and 38% of our revenue, respectively. In 2010, 2009, and 2008, no other single contract accounted for more than 4% of our revenue. Including The Road Home contract, our top 10 contracts in 2010, 2009, and 2008 collectively accounted for approximately 20%, 21%, and 46%, of our revenue, respectively. Excluding The Road Home contract, our top 10 contracts in 2010, 2009, and 2008, collectively accounted for approximately 20%, 12%, and 9% of our revenue, respectively. In 2010, we received approximately 21%, 8%, and 6% of our revenue, respectively, from our three largest clients, HHS, DoD, and DOS. Most of our revenue is derived from prime contracts, which accounted for approximately 85%, 85% and 90% of our revenue for 2010, 2009, and 2008, respectively. Unless the context otherwise requires, we use the term contracts to refer to contracts and any task orders or delivery orders issued under a contract.

Our U.S. and international clients accounted for revenues of approximately \$728.1 million and \$36.6 million, respectively, in 2010; \$639.8 million and \$34.6 million, respectively, in 2009; and \$664.7 million and \$32.7 million, respectively, in 2008. Our U.S. clients include federal, state, and local governments and domestic commercial clients. Non-profit entities and universities are considered commercial clients. Entities such as the World Bank and the United Nations are considered international clients, while DOS and the U.S. Agency for International Development are considered U.S. government clients. In general, a client is considered international if it is located outside the United States. If we are a subcontractor, then the client is not considered to be the prime contractor but rather the ultimate client receiving the services from the prime contractor team. Our foreign operations pose special risks, as discussed below in Risk Factors Risks Related to Our Business Our international operations pose special and unusual risks to our profitability and operating results.

CONTRACT BACKLOG

We define *total backlog* as the future revenue we expect to receive from our contracts and other engagements. We generally include in backlog the estimated revenue represented by contract options that have been priced, but not exercised. We do not include any estimate of revenue relating to potential future delivery orders that might be awarded under our General Services Administration Multiple Award Schedule (GSA Schedule) contracts, other Indefinite Delivery/Indefinite Quantity (IDIQ) contracts, or other contract vehicles that are also held by a large number of firms and under which potential future delivery orders or task orders might be issued by any of a large number of different agencies or departments, and are likely to be subject to a competitive bidding process. We do, however, include potential future work expected to be awarded under IDIQ contracts that are available to be utilized by a limited number of potential clients and are held either by us alone or by a limited number of firms.

Table of Contents

We include expected revenue in *funded backlog* when we have been authorized by the client to proceed under a contract up to the dollar amount specified by our client, and this amount will be owed to us under the contract after we provide the services pursuant to the authorization. If we do not provide services authorized by a client prior to the expiration of the authorization, we remove amounts corresponding to the expired authorization from backlog. We do include expected revenue under an engagement in funded backlog when we do not have a signed contract or contract modification if we have received client authorization to begin or continue working and we expect to sign a contract or contract modification for the engagement. In this case, the amount of funded backlog is limited to the amount authorized. Our funded backlog does not represent the full revenue potential of our contracts because many government clients, and sometimes other clients, authorize work under a particular contract on a yearly or more frequent basis, even though the contract may extend over several years. Most of our services to commercial clients are provided under contracts with relatively short durations. As a consequence, our backlog attributable to these clients is typically reflected in funded backlog and not in unfunded backlog.

We define *unfunded backlog* as the difference between total backlog and funded backlog. Our revenue estimates for purposes of determining unfunded backlog for a particular contract are based, to a large extent, on the amount of revenue we have recently recognized on that contract, our experience in utilizing contract capacity on similar types of contracts, and our professional judgment. Our revenue estimate for a contract included in backlog is sometimes lower than the revenue that would result from our client utilizing all remaining contract capacity.

Although we expect our contract backlog to result in revenue, the timing of revenue associated with both funded and unfunded backlog will vary based on a number of factors, and we may not recognize revenue associated with a particular component of backlog when anticipated, or at all. Our government clients generally have the right to cancel any contract, or ongoing or planned work under any contract, at any time. In addition, there can be no assurance that revenue from funded or unfunded backlog will have similar profitability to previous work or will be profitable at all. Generally speaking, we believe the risk that a particular component of backlog will not result in future revenue is higher for unfunded backlog than for funded backlog. See **Risk Factors** **Risks Related to Our Business**. We may not receive revenue corresponding to the full amount of our backlog, or may receive it later than we expect, which could materially and adversely affect our revenue and operating results.

Our funded and estimates of unfunded and total backlog at the dates indicated were as follows:

	2010	December 31, 2009 (In millions)	2008
Funded	\$ 649.0	\$ 536.0	\$ 426.6
Unfunded	718.2	825.5	390.7
Total	\$ 1,367.2	\$ 1,361.5	\$ 817.3

BUSINESS DEVELOPMENT

Our business development efforts are critical to our organic growth. A firm-wide business development process, referred to as the Business Development Life Cycle (BDLC), is used to guide sales activities in a disciplined manner from lead identification, through lead qualification, to capture and proposal. An internally developed tool is used to track all sales opportunities throughout the BDLC, as well as to manage our aggregate sales pipeline. The pursuit of major sales opportunities are each led by a capture manager and are reviewed by management during their life cycle to ensure alignment with our corporate strategy and effective use of resources.

Business development efforts in priority market areas, which include some of our largest federal agency accounts (HHS, DOE, DoD, DHS, and EPA) and our commercial business, are executed through account teams,

Table of Contents

each of which is headed by a corporate account executive and supported by dedicated corporate business development professionals and senior staff from the relevant operational area. Each account executive has significant authority and accountability to set priorities and bring to bear the correct resources. Each team participates in regular executive reviews. This account-based approach allows deep insight into the needs of our clients. It also helps us anticipate their evolving requirements over the coming 12 to 18 months and position ourselves to meet those requirements. Each of our operational areas is responsible for maximizing sales in our existing accounts and finding opportunities in closely related accounts. Their efforts are complemented by our corporate business development function, which is responsible for large and strategically important pursuits.

The corporate business development function also includes a market research and competitive intelligence group, a proposal group, a marketing group, a communications group, and a strategic capture unit. Our contracts and administration function leads our pricing decisions in partnership with the business development account teams and operational areas.

COMPETITION

We operate in a highly competitive and fragmented marketplace and compete against a number of firms in each of our key markets. Some of our principal competitors include: Abt Associates Inc.; Booz Allen Hamilton, Inc.; Cambridge Systematics, Inc.; CRA International, Inc.; Deloitte LLP; Eastern Research Group, Inc.; ENTRIX, Inc.; L-3 Communications Corporation; Lockheed Martin Corporation; Navigant Consulting, Inc.; Northrop Grumman Corporation; PA Consulting Group; SAIC, Inc.; Research Triangle Institute; SRA International, Inc.; and Westat, Inc. In addition, within each of our key markets, we have numerous smaller competitors, many of which have narrower service offerings and serve niche markets. Some of our competitors are significantly larger than us and have greater access to resources and stronger brand recognition than we do. See Risk Factors Risks Related to Our Business We face intense competition from many firms that have greater resources than we do, as well as from smaller firms that have narrower service offerings and serve niche markets. This competition could result in price reductions, reduced profitability, and loss of market share.

We consider the principal competitive factors in our market to be client relationships, reputation and past performance of the firm, client references, technical knowledge and industry expertise of employees, quality of services and solutions, scope of service offerings, and pricing.

INTELLECTUAL PROPERTY

We own a number of trademarks and copyrights that help maintain our business and competitive position. We do not have any patents. Sales and licenses of our intellectual property do not currently comprise a substantial portion of our revenue or profit. We rely on the technology and models, proprietary processes, and other intellectual property we own or have rights to use in our analyses and other work we perform for our clients. We use these innovative, and often proprietary, analytical models and tools throughout our service offerings. Our staff regularly maintains, updates, and improves these models based on our corporate experience. In addition, we sometimes retain limited rights in software applications we develop for clients. We use a variety of means to protect our intellectual property, but there can be no assurance that it will be adequately protected.

EMPLOYEES

As of December 31, 2010, we had more than 3,700 benefits-eligible (full-time and regular part-time) employees, approximately 40% of whom held post-graduate degrees in diverse fields such as social sciences, business and management, physical sciences, public policy, human capital, information technology and mathematics, engineering, planning, economics, life sciences, and law, and approximately 82% of whom held a bachelor's degree or equivalent or higher. As of December 31, 2010, approximately 330 of our employees held an active federal security clearance, and approximately 110 additional employees held a terminated clearance eligible for reinstatement.

Table of Contents

Our professional environment encourages advanced training to acquire industry-recognized certifications, rewards strong job performance with advancement opportunities, and fosters ethical and honest conduct. Our salary structure, incentive compensation, and benefit packages are competitive within our industry.

ITEM 1A. RISK FACTORS

The following discussion of risk factors identifies the most significant factors that may adversely affect our business, operations, financial position or future financial performance. This information should be read in conjunction with Management's Discussion and Analysis and the consolidated financial statements and related notes incorporated by reference into this annual report on Form 10-K. These and other factors could cause future results to differ from those in forward-looking statements and from historical trends.

RISKS RELATED TO OUR INDUSTRY

We rely substantially on government clients for our revenue, and government spending priorities may change in a manner adverse to our business.

We derived approximately 71%, 60%, and 36% of our revenue in 2010, 2009, and 2008, respectively, from contracts with federal agencies and departments, and approximately 10%, 19%, and 47% of our revenue from contracts with state and local governments in 2010, 2009, and 2008, respectively. Approximately 9% and 38% of our revenue in 2009 and 2008, respectively, was from The Road Home contract with the State of Louisiana, as discussed in more detail below. Expenditures by our federal clients may be restricted or reduced by presidential or congressional action or by action of the Office of Management and Budget or otherwise limited. In addition, many states are not permitted to operate with budget deficits and nearly all states face considerable challenges in balancing budgets that anticipate reduced revenues. We expect some of our clients will delay some payments due to us, may eventually fail to pay what they owe us, and may delay some programs and projects. For some clients, we may face an unwelcome choice: turn down (or stop) work with the risk of damaging a valuable client relationship, or perform work with the risk of not getting paid in a timely fashion or perhaps at all. Federal, state, and local elections could also affect spending priorities and budgets at all levels of government. For example, the recent change in control of the U.S. House of Representatives may lead to reduced spending in agencies, departments, projects, or programs we support. Even the perception that such reduction could occur could affect the value of our stock.

The failure of Congress to approve budgets in a timely manner for the federal agencies and departments we support could delay and reduce spending, cause us to lose revenue and profit, and affect our cash flow.

On an annual basis, Congress must approve budgets that govern spending by each of the federal agencies and departments we support. When Congress is unable to agree on budget priorities, and thus is unable to pass the annual budget on a timely basis, it typically enacts a continuing resolution. Continuing resolutions generally allow federal agencies and departments to operate at spending levels based on the previous budget cycle. When agencies and departments must operate on the basis of a continuing resolution, funding we expect to receive from clients for work we are already performing and new initiatives may be delayed or cancelled. Thus, the failure by Congress to approve budgets in a timely manner can result in the loss of revenue and profit in the event federal agencies and departments are required to cancel or change existing or new initiatives, or the deferral of revenue and profit to later periods due to delays in implementing existing or new initiatives. There is also the possibility, which has occurred in the past, that Congress will not enact either a budget or a continuing resolution in a timely manner. In such an event, many parts of the federal government, including agencies, departments, programs, and projects we support, may shut down, which will immediately begin substantially negatively affecting our revenue, profit, and cash flow. The budgets of many of our state and local government clients are also subject to similar budget processes, and thus subject us to similar risks and uncertainties.

Table of Contents

Our failure to comply with complex laws, rules, and regulations relating to government contracts could cause us to lose business and subject us to a variety of penalties.

We must comply with laws, rules, and regulations relating to the formation, administration, and performance of government contracts, which affect how we do business with our government clients and impose added costs on our business. Each government client has its own laws, rules, and regulations affecting its contracts. Among the more significant strictures affecting federal government contracts are:

the Federal Acquisition Regulation, and agency and department regulations analogous or supplemental to it;

the Truth in Negotiations Act;

the Procurement Integrity Act;

the Civil False Claims Act;

the Cost Accounting Standards; and

laws, rules and regulations restricting (i) the use and dissemination of information classified for national security purposes, (ii) the exportation of specified products, technologies, and technical data, and (iii) the use and dissemination of sensitive but unclassified data.

The federal government and other governments with which we do business may in the future change their procurement practices or adopt new contracting laws, rules, or regulations, that could be costly to satisfy or that could impair our ability to obtain new contracts and reduce our revenue and profit, for example, by curtailing the use of services firms or increasing the use of firms with a preferred status, such as small business. Any failure to comply with applicable federal, state, or local strictures could subject us to civil and criminal penalties and administrative sanctions, including termination of contracts, repayment of amounts already received under contracts, forfeiture of profits, suspension of payments, fines, and suspension or debarment from doing business with federal and even state and local government agencies and departments, any of which could adversely affect our reputation, our revenue, our operating results, and the value of our stock. Failure to abide by laws applicable to our work for governments outside the United States could have similar effects.

Unfavorable government audit results could force us to adjust previously reported operating results, could affect future operating results, and could subject us to a variety of penalties and sanctions.

Federal government agencies, including the Defense Contract Audit Agency and the National Institutes of Health, and many states, audit and review our contract performance, pricing practices, cost structure, financial responsibility, and compliance with applicable laws, regulations, and standards. Audits could raise issues that have significant adverse effects on our operating results, including, but not limited to, substantial adjustments to our previously reported operating results and substantial effects on future operating results. If a government audit, review, or investigation uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, repayment of amounts already received under contracts, forfeiture of profits, suspension of payments, fines, and suspension or debarment from doing business with federal and even state and local government agencies and departments. We may also lose business if we are found not to be sufficiently financially responsible. In addition, we could suffer serious harm to our reputation and our stock price could decline if allegations of impropriety are made against us, whether or not true. Federal audits have been completed on our incurred contract costs only through 2007; audits for costs incurred on work performed since then have not yet been completed. In addition, non-audit reviews by the government may still be conducted on all our government contracts.

Our U.S. government contracts contain provisions that are unfavorable to us and permit our government clients to terminate our contracts partially or completely at any time prior to completion.

Edgar Filing: ICF International, Inc. - Form 10-K

Our government contracts contain provisions not typically found in commercial contracts, including provisions that allow our clients to terminate or modify these contracts at the government's convenience upon

Table of Contents

short notice. If a government client terminates one of our contracts for convenience, we may only bill the client for work completed prior to the termination, plus any project commitments and settlement expenses the client agrees to pay, but not for any work not yet performed. In addition, many of our government contracts and task and delivery orders are incrementally funded as appropriated funds become available. The reduction or elimination of such funding can result in options not being exercised and further work on existing contracts and orders being curtailed. In any such event, we would have no right to seek lost fees or other damages. If a government client were to terminate, decline to exercise an option under, or curtail further performance under one or more of our significant contracts, our revenue and operating results would be materially harmed.

RISKS RELATED TO OUR BUSINESS

We depend on contracts with federal agencies and departments for a substantial portion of our revenue and profit, and our business, revenue, and profit levels could be materially and adversely affected if our relationships with these agencies and departments deteriorate.

Contracts with U.S. federal agencies and departments accounted for approximately 71%, 60%, and 36%, of our revenue in 2010, 2009, and 2008, respectively. We believe that U.S. federal contracts will continue to be a significant source of our revenue and profit for the foreseeable future.

Because we have a large number of contracts with our clients, we continually bid for and execute new contracts, and our existing contracts continually become subject to recompetition and expiration. Upon the expiration of a contract, we typically seek a new contract or subcontractor role relating to that client to replace the revenue generated by the expired contract. There can be no assurance that those expiring contracts we are servicing will continue after their expiration, that the client will re-procure those requirements, that any such re-procurement will not be restricted in a way that would eliminate us from the competition (e.g., set aside for small business), or that we will be successful in any such re-procurements. If we are not able to replace the revenue from these contracts, either through follow-on contracts or new contracts for those requirements or for other requirements, our revenue and operating results will be materially harmed.

Our reliance on GSA Schedule and other IDIQ contracts creates the risk of volatility in our revenue and profit levels.

We believe that one of the key elements of our success is our position as a prime contractor under GSA Schedule contracts and other IDIQ contracts. As these types of contracts have increased in importance over the last several years, we believe our position as a prime contractor has become increasingly important to our ability to sell our services to federal clients. However, these contracts require us to compete for each delivery order and task order, rather than having a more predictable stream of activity and, therefore, revenue and profit, during the term of a contract. There can be no assurance that we will continue to obtain revenue from such contracts at these levels, or in any amount, in the future. To the extent that federal agencies and departments choose to employ GSA Schedule and other contracts encompassing activities for which we are not able to compete or provide services, we could lose business, which would negatively affect our revenue and profitability.

Our commercial business depends on the energy and air transport sectors of the global economy, both of which are highly cyclical and can lead to substantial variations in revenue and profit from period to period.

Our commercial business is heavily concentrated in the energy and air transport industries, which are highly cyclical. Demand for our services from energy and air transport industry clients has declined when either industry has experienced a downturn, and we expect a decline in demand for our services when either of these industries experiences a downturn in the future. Recent unrest in numerous countries around the world, particularly in the Middle East, could have a negative impact on much of our commercial business. Other factors that could cause a downturn in the energy industry include, but are not limited to, a decline in general economic

Table of Contents

conditions, changes in political stability in oil producing regions, and government regulations affecting the energy sector. Other factors leading to a downturn in the air transport industry include, but are not limited to, a decline in general economic conditions, acts of terrorism or war, changes in the worldwide geopolitical climate, increases in the cost of energy, the financial condition of major airlines or airports, changes in weather patterns, and government regulations affecting the air transport industry.

We may not receive revenue corresponding to the full amount of our backlog, or may receive it later than we expect, which could materially and adversely affect our revenue and operating results.

The calculation of backlog is highly subjective and is subject to numerous uncertainties and estimates, and there can be no assurance that we will in fact receive the amounts we have included in our backlog. Our assessment of a contract's potential value is based on factors such as the amount of revenue we have recently recognized on that contract, our experience in utilizing contract capacity on similar types of contracts, and our professional judgment. In the case of contracts that may be renewed at the option of the client, we generally calculate backlog by assuming that the client will exercise all of its renewal options; however, the client may elect not to exercise its renewal options. In addition, federal contracts rely on congressional appropriation of funding, which is typically provided only partially at any point during the term of federal contracts, and all or some of the work to be performed under a contract may require future appropriations by Congress and the subsequent allocation of funding by the procuring agency or department to the contract. Our estimate of the portion of backlog that we expect to recognize as revenue in any future period is likely to be inaccurate because the receipt and timing of this revenue often depends on subsequent appropriation and allocation of funding and is subject to various contingencies, such as timing of task orders and delivery orders, many of which are beyond our control. In addition, we may never receive revenue from some of the engagements that are included in our backlog, and this risk is greater with respect to unfunded backlog and backlog related to IDIQ contracts. Further, the actual recognition of revenue on engagements included in backlog may never occur or the amount or timing of such revenue may change because client priorities could change, a program or project schedule could change, the program or project could be canceled, the government agency or other client could elect not to exercise renewal options under a contract or could select other contractors to perform services, or a contract could be reduced, modified, or terminated. Although we adjust our backlog periodically to reflect modifications to or renewals of existing contracts, awards of new contracts, or approvals of expenditures, if we fail to realize revenue corresponding to our backlog, our revenue and operating results could be materially adversely affected.

Because much of our work is performed under task orders, delivery orders, and short-term assignments, we are exposed to the risk of not having sufficient work for our staff, which can affect revenue and profit.

We perform some of our work under short-term contracts. Even under many of our longer-term contracts, we perform much of our work under individual task orders and delivery orders, many of which are awarded on a competitive basis. If we cannot obtain new work in a timely fashion, whether through new contracts, task orders, or delivery orders, modifications to existing contracts, task orders, or delivery orders, or otherwise, we may not be able to keep our staff profitably utilized. It is difficult to predict when such new work or modifications will be obtained. There can be no assurance that we can profitably manage the utilization of our staff.

Loss of key members of our senior operating leadership team could impair our relationships with clients and disrupt the management of our business.

Although the depth of our organization has grown in recent years, we believe that our success depends on the continued contributions of the members of our senior operating leadership. We rely on our senior leadership to generate business and manage and execute projects and programs successfully. In addition, the relationships and reputation that many members of our operating leadership team have established and maintain with client personnel contribute to our ability to maintain good client relations and identify new business opportunities. Apart from our most senior executive officers, we do not generally have agreements with members of our operating leadership providing for a specific term of employment. The loss or rumored loss of any member of our senior operating leadership could adversely affect our stock price.

Table of Contents

Growing through acquisitions is a key element of our business strategy, and we are constantly reviewing acquisition opportunities. These activities may be costly and divert the attention of management from existing operations and initiatives.

One of our principal growth strategies is to make selective acquisitions. We believe pursuing acquisitions actively is necessary for a public company of our size in our business. As a result, at any given time, we may be evaluating several acquisition opportunities. Our normal practice is not to disclose potential acquisitions until definitive agreements are executed and, in some cases, material conditions precedent are satisfied. When we are able to identify an appropriate acquisition candidate, we may not be able to negotiate the price and other terms of the acquisition successfully or finance the acquisition on terms satisfactory to us. Our out-of-pocket expenses in identifying, researching, and negotiating potential acquisitions has been and will likely continue to be significant, even if we do not ultimately acquire identified businesses. In addition, negotiations of potential acquisitions and the integration of acquired business operations divert management attention away from day-to-day operations and may reduce staff utilization and adversely affect our revenue and operating results.

When we undertake acquisitions, they may present integration challenges, fail to perform as expected, increase our liabilities, and/or reduce our earnings.

When we complete acquisitions, it may be difficult and costly to integrate the acquired businesses due to differences in the locations of personnel and facilities, differences in corporate cultures, disparate business models, or other reasons. If we are unable to integrate companies we acquire successfully, our revenue and operating results could suffer. In addition, we may not be successful in achieving the anticipated cost efficiencies and synergies from these acquisitions, which could include offering our services to existing clients of acquired companies or offering the services of acquired companies to our existing clients to increase our revenue and profit. In addition, our costs for managerial, operational, financial, and administrative systems may increase and be higher than anticipated. We may also experience attrition, including key employees of acquired and existing businesses, during and following integration of an acquired business into our Company. Any attrition or loss of business could adversely affect our future revenue and operating results and prevent us from achieving the anticipated benefits of the acquisition. Finally, acquisitions of businesses or other material operations may require additional debt or equity financing or both, resulting in additional leverage or dilution of ownership, or both.

As a result of our acquisitions, we have substantial amounts of goodwill and intangible assets, and changes in business conditions could cause these assets to become impaired, requiring substantial write-downs that would adversely affect our operating results.

All of our acquisitions have been accounted for as purchases and involved purchase prices well in excess of tangible asset values, resulting in the creation of a significant amount of goodwill and other intangible assets. As of December 31, 2010, goodwill and purchased intangibles accounted for approximately \$323.5 million and \$26.1 million, or approximately 56.9% and 4.6%, respectively, of our total assets. Under U.S. generally accepted accounting principles, we do not amortize goodwill and intangible assets acquired in a purchase business combination that are determined to have indefinite useful lives, but instead review them annually (or more frequently if impairment indicators arise) for impairment. Although we have to date determined that such assets have not been impaired, future events or changes in circumstances that result in an impairment of goodwill or other intangible assets would have a negative impact on our profitability and financial results.

Ongoing and possible post-contract litigation, disputes, audits, reviews, and investigations in connection with the completed Road Home contract expose us to many different types of liability, may divert management attention, and could increase our costs.

In June 2006, our subsidiary, ICF Emergency Management Services, LLC, was awarded The Road Home contract by the State of Louisiana, Office of Community Development, to manage a program designed primarily

Table of Contents

to help homeowners and landlords of small rental properties affected by Hurricanes Rita and Katrina by providing them compensation for the uninsured, uncompensated damages they suffered from the hurricanes. The Road Home contract was our largest contract throughout its three-year duration. It was completed on June 11, 2009, as scheduled.

The Road Home contract provided us with significant opportunities, but also created substantial risks. A number of these risks continued beyond the term of the contract. We have a number of lawsuits pending and other claims have been made against us in connection with The Road Home contract. New lawsuits may be filed and new claims may be made against us including, but not limited to, claims by homeowners, rental housing owners, and others who are dissatisfied with the amount of money they have received from, or their treatment under, The Road Home program. We have defended such actions vigorously and plan to continue to do so, but we have not prevailed in every case and may not prevail in future cases. Although the contract provides that, with several exceptions, we are allowed to charge as an expense under the contract reasonable costs and fees incurred in defending and paying claims brought by third parties arising out of our performance, there can be no assurance that our costs and fees will be reimbursed. The State of Louisiana has not reimbursed us for most of such costs or fees and has not reimbursed any such costs or fees since 2008.

In addition, The Road Home contract has been, and we expect it to continue to be, audited, investigated, reviewed, and monitored frequently by federal and state authorities and their representatives. These activities consume significant management time and effort; further, the contract provides that we are subject to audits for more than five years after the expiration of the contract. Findings from any audit, investigation, review, monitoring, or similar activity could subject us to civil and criminal penalties and administrative sanctions from state or federal authorities, which could substantially adversely affect our reputation, our revenue, our operating results, and the value of our stock.

We face intense competition from many firms that have greater resources than we do, as well as from smaller firms that have narrower service offerings and serve niche markets. This competition could result in price reductions, reduced profitability, and loss of market share.

We operate in highly competitive markets and generally encounter intense competition to win contracts, task orders, and delivery orders. If we are unable to compete successfully for new business, our revenue and operating margins may decline. Many of our competitors are larger and have greater financial, technical, marketing, and public relations resources, larger client bases, and greater brand or name recognition than we do. We also have numerous smaller competitors, many of which have narrower service offerings and serve niche markets. Our competitors may be able to compete more effectively for contracts and offer lower prices to clients, causing us to lose contracts, as well as lowering our profit or even causing us to suffer losses on contracts that we do win. Some of our subcontractors are also competitors, and some of them may in the future secure positions as prime contractors, which could deprive us of work we might otherwise have won under such contracts. On contracts where we are a subcontractor, the prime contractors or our teaming partners may also deprive us of work we might otherwise have performed. Our competitors may be able to provide clients with different and greater capabilities and benefits than we can provide.

We derive significant revenue and profit from contracts awarded through a competitive bidding process, which can impose substantial costs on us, and we will lose revenue and profit if we fail to compete effectively.

We derive significant revenue and profit from contracts that are awarded through a competitive bidding process. Competitive bidding imposes substantial costs and presents a number of risks, including:

the substantial cost and managerial time and effort that we spend to prepare bids and proposals;

the need to estimate accurately the resources and costs that will be required to service any contracts we are awarded, sometimes in advance of the final determination of their full scope;

Table of Contents

the expense and delay that may arise if our competitors protest or challenge awards made to us pursuant to competitive bidding, and the risk that such protests or challenges could result in the requirement to resubmit bids, and in the termination, reduction, or modification of the awarded contracts; and

the opportunity cost of not bidding on and winning other contracts we might otherwise pursue.

To the extent we engage in competitive bidding and are unable to win particular contracts, we not only incur substantial costs in the bidding process that negatively affect our operating results, but we may lose the opportunity to operate in the market for the services provided under those contracts for a number of years. Even if we win a particular contract through competitive bidding, our profit margins may be depressed or we may even suffer losses as a result of the costs incurred through the bidding process and the need to lower our prices to overcome competition.

We may lose money on some contracts if we underestimate the resources we need to perform under them.

We provide services to clients primarily under three types of contracts: time-and-materials contracts; cost-based contracts; and fixed-price contracts. Each of these types of contracts, to differing degrees, involves the risk that we could underestimate our cost of fulfilling the contract, which may reduce the profit we earn or lead to a financial loss on the contract, which would adversely affect our operating results.

Under time-and-materials contracts, we are paid for labor at negotiated hourly billing rates and for certain expenses, and we assume the risk that our costs of performance may exceed the negotiated hourly rates.

Under our cost-based contracts, which frequently cap many of the various types of costs we can charge and which impose overall and individual task order or delivery order ceilings, we are reimbursed for certain costs incurred, which must be allowable and at or below the caps under the terms of the contract and applicable regulations. If we incur unallowable costs in the performance of a contract, the client will not reimburse those costs, and if our allowable costs exceed any of the applicable caps or ceilings, we will not be able to recover those costs. Under some cost-based contracts, we receive no fees.

Under fixed-price contracts, we perform specific tasks for a set price. Compared to cost-plus-fee contracts and time-and-materials contracts, fixed-price contracts involve greater financial risk because we bear the full impact of cost overruns.

Our clients typically determine which type of contract will be awarded to us. In the past, cost-based contracts have been the least profitable of our contract types, although the relative profitability of the three types of contracts may change in the future. To the extent that the relative profitability of these three types of contracts changes, our mix of contract types changes, our indirect rates change for any reason, or we acquire companies with a different mix of contract types or whose contract types have different levels of profitability than ours, our operating margin and operating results may suffer.

In order to determine the appropriate revenue to recognize on our contracts in each accounting period, we must use judgment relative to assessing risks, estimating contract revenue and costs, and making assumptions for schedule and technical issues. From time to time, facts develop that require us to revise our estimated total costs and revenue on a contract, which could cause us to reduce the amount of revenue or profit previously recognized. In addition, the full amount of an anticipated loss on any type of contract is recognized in the period in which it becomes probable and can be reasonably estimated. As a result, our operating results could be affected by revisions to prior accounting estimates.

Our international operations pose special and unusual risks to our profitability and operating results.

We have offices in London, Moscow, New Delhi, Rio de Janeiro, Toronto, and Beijing. We also perform work in other foreign countries, some of which have a history of political instability or may expose our

Table of Contents

employees and subcontractors to physical danger, and we expect to continue to expand our international operations and offices. One element of our strategy to improve our competitiveness is to perform some of our work in countries with lower cost structures, such as India. There can be no assurance that this strategy will be successful and it could create problems for our ability to compete for U.S. federal, state, or local government contracts to the extent that the clients prefer or mandate that the work be performed in the U.S. or by U.S. citizens. In addition, expansion into new geographic regions requires considerable management and financial resources, the expenditure of which may negatively impact our results, and we may never see any return on our investment.

Our operations are subject to risks associated with operating in, and selling to and in, foreign countries, including, but not limited to:

compliance with the laws, regulations, policies, legal standards, and enforcement mechanisms of the United States and the other countries in which we operate, which are sometimes inconsistent;

currency fluctuations and devaluations and limitations on the conversion of foreign currencies into U.S. dollars;

restrictions on the ability to repatriate profits to the United States or otherwise move funds;

potential personal injury to personnel who may be exposed to military conflicts and other hostile situations in foreign countries, including, but not limited to, Afghanistan and Iraq;

expropriation and nationalization of our assets or those of our subcontractors, and other inability to protect our property rights; and/or

difficulties in managing and staffing foreign operations, dealing with differing local business cultures and practices, and collecting accounts receivable.

Any or all of these factors could, directly or indirectly, adversely affect our international and domestic operations and our overall revenue, profit, and operating results.

If we fail to meet client expectations or otherwise fail to perform our contracts properly, the value of our stock could decrease.

We could lose revenue, profit, and clients, and be exposed to liability if we have disagreements with our clients or fail to meet their expectations. We create, implement, and maintain solutions that are often critical to our clients' operations, and the needs of our clients are rapidly changing. Perceived poor performance on even a single contract could lead to substantial liability and could impair our ability to secure new work and hire and retain qualified staff. For example, a failure by one or more of our subcontractors to perform satisfactorily the agreed-upon services on a timely basis may compromise our ability to perform our obligations as a prime contractor, which could, among other things, cause us to lose future contracts, suffer negative publicity, or otherwise incur liability for performance deficiencies we did not create. Such outcomes could, in turn, have a material adverse effect upon our operations, financial performance, and the value of our stock.

Our failure to obtain and maintain necessary security clearances may limit our ability to perform classified work for federal clients, which could cause us to lose business.

Some federal contracts require us to maintain facility security clearances and require some of our employees to maintain individual security clearances. The federal government has the right to grant and terminate such clearances. If our employees lose or are unable to obtain needed security clearances in a timely manner, or we lose or are unable to obtain a needed facility clearance in a timely manner, federal clients can limit our work under or terminate some contracts. To the extent we cannot obtain the required facility clearances or security clearances for our employees or we fail to obtain them on a timely basis, we may not derive our anticipated revenue and profit, which could harm our operating results. In addition, a security breach relating to any classified or sensitive but unclassified information entrusted to us could cause serious harm to our business, damage our reputation, and result in a loss of our facility or individual employee security clearances.

Table of Contents

Our relations with other contractors are important to our business and, if disrupted, could cause us damage.

We derive a portion of our revenue from contracts under which we act as a subcontractor or from teaming arrangements in which we and other contractors jointly bid on particular contracts, projects, or programs. As a subcontractor or team member, we often lack control over fulfillment of a contract, and poor performance on the contract could tarnish our reputation, result in a reduction of the amount of our work under or termination of that contract or other contracts, and cause us not to obtain future work, even when we perform as required. Moreover, our revenue and operating results could be materially and adversely affected if any prime contractor or teammate does not pay our invoices in a timely fashion, chooses to offer products or services of the type that we provide, teams with other companies to provide such products or services, or otherwise reduces its reliance upon us for such products or services.

The diversity of the services we provide and the clients we serve may create actual, potential, and perceived conflicts of interest and conflicts of business that limit our growth and lead to liability for us.

Because we provide services to a wide array of both government and commercial clients, occasions arise where, due to actual, potential, or perceived conflicts of interest or business conflicts, we cannot perform work for which we are qualified. A number of our contracts contain limitations on the work we can perform for others, such as, for example, when we are assisting a government agency or department in developing regulations or enforcement strategies. Actual, potential, and perceived conflicts limit the work we can do and, consequently, can limit our growth, adversely affect our operating results, and reduce the value of our Company. In addition, if we fail to address actual or potential conflicts properly or even if we simply fail to recognize a perceived conflict, we may be in violation of our existing contracts, may otherwise incur liability, and may lose future business for not preventing the conflict from arising, and our reputation may suffer.

Claims in excess of our insurance coverage could harm our business and financial results.

Our government contracts generally require us to indemnify our clients for liability resulting from our professional acts, errors, and omissions. When entering into contracts with commercial clients, we attempt, where feasible and appropriate, to negotiate indemnification protection from our clients, as well as monetary limitation of liability for our professional acts, errors, and omissions, but it is not always possible to do so. In addition, we cannot be sure that these contractual provisions will protect us from liability for damages if action is taken against us. Claims against us, both under our client contracts and otherwise, have arisen in the past, exist currently, and will arise in the future. These claims include actions by employees, clients, and others. Our insurance coverage may not be sufficient to cover all the claims against us, insurance may not continue to be available on commercially reasonable terms in sufficient amounts to cover such claims, or at all, and our insurers may disclaim coverage as to any or all such claims and otherwise may be unwilling or unable to cover such claims. The successful assertion of any claim or combination of claims against us could seriously harm our business. Even if not successful, such claims could result in significant legal and other costs, harm our reputation, and be a distraction to management.

We depend on our intellectual property and our failure to protect it could enable competitors to market services and products with similar features, which may reduce demand for our services and products.

Our success depends in part upon our internally developed technology and models, proprietary processes, and other intellectual property that we utilize to provide our services and incorporate in our products. If we fail to protect our intellectual property, our competitors could market services or products similar to our services and products, which could reduce demand for our offerings. Federal clients typically retain a perpetual, world-wide, royalty-free right to use the intellectual property we develop for them in a manner defined within the federal regulations, including providing it to other federal agencies or departments, as well as to our competitors in connection with their performance of federal contracts. When necessary, we seek authorization to use intellectual property developed for the federal government or to secure export authorization. Federal clients may grant us the

Table of Contents

right to commercialize software developed with federal funding, but they are not required to do so. If we were to use intellectual property improperly, that was even partially funded by the federal government, the government could seek damages and royalties from us, sanction us, and prevent us from working on future federal contracts. Actions could also be taken against us if we improperly use intellectual property belonging to others besides the federal government.

RISKS RELATED TO OUR CAPITAL STRUCTURE

We do not intend to pay dividends.

We intend to retain our earnings, if any, and we do not anticipate cash dividends on our stock in the foreseeable future. In addition, existing financing arrangements prohibit us from paying such dividends. This lack of dividends may make our stock less attractive to investors.

Provisions of our charter documents and Delaware law may inhibit potential acquisition bids and other actions that you and other stockholders may consider favorable, and the market price of our common stock may be lower as a result.

Our charter documents contain the following provisions that could have an anti-takeover effect:

divide our board of directors into three classes, making it more difficult for stockholders to change the composition of the board;

allow directors to be removed only for cause;

do not permit our stockholders to call a special meeting of the stockholders;

require all stockholder actions to be taken by a vote of the stockholders at an annual or special meeting or by a written consent signed by all of our stockholders;

require our stockholders to comply with advance notice procedures to nominate candidates for election to our board of directors or to place stockholders' proposals on the agenda for consideration at stockholder meetings; and

require the approval of the holders of capital stock representing at least two-thirds of the Company's voting power to amend our indemnification obligations, director classifications, stockholder proposal requirements, and director candidate nomination requirements set forth in our amended and restated certificate of incorporation and amended and restated bylaws.

In addition, we are subject to the anti-takeover provisions of Section 203 of the Delaware General Corporation Law, which regulates corporate acquisitions. These provisions could discourage potential acquisition proposals; delay or prevent a change-in-control transaction; discourage others from making tender offers for our common stock; and/or prevent changes in our management.

We have incurred substantial amounts of debt in the past and expect to incur additional debt, which could substantially reduce our profitability, limit our ability to pursue certain business opportunities, and reduce the value of our stock.

As a result of our business activities and acquisitions, we have incurred substantial debt in the past, and we expect to incur significant additional debt in the future. Such debt could increase the risks described herein and lead to other risks. Our debt could have important consequences for our stockholders, such as:

Edgar Filing: ICF International, Inc. - Form 10-K

our future ability to obtain additional financing for working capital, capital expenditures, product and service development, acquisitions, general corporate purposes, and other purposes may be impaired;

a substantial portion of our cash flow from operations could be dedicated to the payment of the principal and interest on our debt;

our vulnerability to economic downturns and rises in interest rates will be increased;

Table of Contents

our flexibility in planning for and reacting to changes in our business and the marketplace may be limited;

we may be placed at a competitive disadvantage relative to other firms;

in order to comply with the terms of our financing agreements, we may take actions that are based on short-term rather than long-term results; and

we may be unable to comply with the terms of our financing agreements, which could result in a default under these agreements. Servicing our debt in the future may require a significant amount of cash. Our ability to repay or refinance our debt depends on, among other things, our successful financial and operating performance and the interest rates on our debt. Our financial and operating performance and the interest rates we pay in turn depend on a number of factors, many of which are beyond our control.

Our continued success depends in part on our ability to comply with the terms of our financing agreements and raise capital on commercially reasonable terms when, and in the amounts, needed. If additional financing is required, including refinancing existing debt, there can be no assurances that we will be able to obtain such additional financing on terms acceptable to us and at the times required, if at all. In that case, we may be required to raise additional equity by issuing additional stock, alter our business plan materially, curtail all or part of our business expansion plans, sell part or all of our business or other assets, or be subject to actions such as bankruptcy or other financial restructuring in the event of default. Any of these results could have a significant adverse effect on the value of our stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We lease our offices and do not own any real estate. As of December 31, 2010, we leased approximately 280,000 square feet of office space at our corporate headquarters at 9300 Lee Highway, Fairfax, Virginia (in the metropolitan Washington, D.C. area) and an adjoining building through December 2022 (the "Fairfax Offices"). The Fairfax Offices house a portion of our operations and almost all of our corporate functions, including executive management, treasury, accounting, legal, human resources, business and corporate development, facilities management, information services, and contracts.

As of December 31, 2010, we have also leased approximately 650,000 square feet of office space in more than 50 other office locations throughout the United States and around the world, with various lease terms expiring over the next 10 years. As of December 31, 2010, approximately 20,000 square feet of the space we leased was subleased to other parties. We believe that our current office space, together with the office space to be assumed over the next four years under the current Fairfax Offices lease and other office space we expect to be able to lease, will meet our needs for the next several years.

Lastly, a portion of our operations staff is housed at client-provided facilities, pursuant to the terms of a number of our client contracts.

ITEM 3. LEGAL PROCEEDINGS

We are involved in numerous legal matters and proceedings arising in the ordinary course of business. While these matters and proceedings cause us to incur costs, including, but not limited to, attorneys' fees, we currently believe that any ultimate liability arising out of these matters and proceedings will not have a material adverse effect on our financial position, results of operations, or cash flows.

ITEM 4. REMOVED AND RESERVED

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

Our common stock trades on The NASDAQ Global Select Market under the symbol ICFL. The high and low sales prices of our common stock for each quarter for the two years 2010 and 2009 are as follows:

	Sales Price Per Share (in dollars)	
	High	Low
2010 Fourth Quarter	\$ 28.13	\$ 23.39
2010 Third Quarter	\$ 25.34	\$ 20.86
2010 Second Quarter	\$ 25.98	\$ 20.90
2010 First Quarter	\$ 27.23	\$ 22.02
2009 Fourth Quarter	\$ 30.94	\$ 23.74
2009 Third Quarter	\$ 31.06	\$ 24.01
2009 Second Quarter	\$ 28.75	\$ 22.57
2009 First Quarter	\$ 25.94	\$ 21.14

Holders

As of March 1, 2011, there were 55 registered holders of record of our common stock. This number is not representative of the number of beneficial holders because many of the shares are held by depositories, brokers, or nominees.

Dividends

We have neither declared nor paid any cash dividends on our common stock and presently intend to retain our future earnings, if any, to fund the development and growth of our business. Therefore, we do not anticipate paying cash dividends in the foreseeable future.

Table of Contents**Stock Performance Graph**

The following graph compares the cumulative total stockholder return on our common stock from September 28, 2006 (the first day of trading in our common stock), through December 31, 2010, with the cumulative total return on (i) the NASDAQ Composite, (ii) the Russell 2000 stock index, (iii) our previous peer group, which we used for our Annual Report on Form 10-K for the year 2009, composed of other governmental and commercial service providers: CACI International Inc; CRA International, Inc.; Dynamics Research Corporation; FTI Consulting, Inc.; Huron Consulting Group Inc.; ManTech International Corporation; Navigant Consulting, Inc.; NCI, Inc.; SAIC, Inc.; and SRA International, Inc. (the old peer group) and (iv) a new peer group composed of other governmental and commercial service providers: CACI International Inc; CRA International, Inc.; Dynamics Research Corporation; FTI Consulting, Inc.; Huron Consulting Group Inc.; ManTech International Corporation; Maximus, Inc.; Navigant Consulting, Inc.; NCI, Inc.; SAIC, Inc.; and SRA International, Inc. (the new peer group). In 2010 Stanley, Inc. was acquired, and has therefore been removed from the old peer group. We selected the new peer group, which includes Maximus, Inc., because it reflects the companies to which we believe we are comparable. The comparison below assumes that all dividends are reinvested and all returns are market-cap weighted. The historical information set forth below is not necessarily indicative of future performance.

Recent Sales of Unregistered Securities

During the three months ended December 31, 2010, we issued the following securities that were not registered under the Securities Act of 1933, as amended ("Securities Act"). No underwriters were involved in the following issuances of securities.

(a) Issuances of Common Stock:

On October 1, 2010, we issued an aggregate 819 shares of unregistered common stock to two of our directors in lieu of cash for director fee compensation, with an aggregate value of \$20,960.

Each of these issuances was made in reliance upon the exemption from the registration provisions of the Securities Act, set forth in Section 4(2) thereof relative to sales by an issuer not involving any public offering and the rules and regulations thereunder. The recipients of securities in each case acquired the securities for investment only and not with a view to the distribution thereof. Each of the recipients of securities in these transactions was an accredited or sophisticated person and had adequate access, through employment, business, or other relationships, to information about us.

(b) Stock Option Grants/Exercises and Grants of Restricted Stock:

On November 9, 2010, we issued an aggregate 4,746 shares of restricted common stock to seven directors with an aggregate value of \$125,864.

Each of these issuances was made in reliance upon the exemption from the registration provisions of the Securities Act, set forth in Rule 701 promulgated under the Securities Act, as the transactions were effected under compensatory benefit plans and contracts relating to compensation as provided under Rule 701. The recipients of these securities were our directors and received the securities under the ICF International, Inc. 2010 Omnibus Incentive Plan, and no consideration other than the continued service by the director recipients was received by us in connection with any of these issuances of securities. Each of the recipients of securities in these transactions had adequate access, through employment, business, or other relationships, to information about us.

Purchases of Equity Securities by Issuer

During the three months ended December 31, 2010, the Company purchased an aggregate of 38,544 shares of common stock for a total of \$1,012,630 in exchange for the payment of: (1) withholding taxes due upon the vesting of restricted stock and the exercise of stock options; and (2) the exercise price of stock options that were exercised. The weighted average fair value of the common stock purchased was \$26.27 per share.

The following table summarizes stock repurchases for the three months ended December 31, 2010:

Period		(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
October 1	October 31		\$	None	None
November 1	November 30	32,101	26.45	None	None
December 1	December 31	6,443	25.41	None	None
Total		38,544	\$ 26.27	None	None

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The following table presents selected historical financial data derived from our audited financial statements, and other Company information for each of the five years presented. This information should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our audited financial statements. The selected financial data reflect our performance of The Road Home contract from June 2006 through its completion in June 2009. At the client's request, our performance was accelerated during the first half of the contract term. For further information regarding The Road Home contract, see Risk Factors Risks Related to our Business Ongoing and possible post-contract litigation, disputes, audits, reviews and investigations in connection with the completed Road Home contract expose us to many different types of liability, may divert management attention, and could increase our costs. The selected financial data include non-cash compensation recognized related to stock options and awards. The data also reflect our acquisitions of APCG and EEA in January 2007, Z-Tech in June 2007, SH&E in December 2007, Jones & Stokes in February 2008, Macro in March 2009, and JASI in December 2009.

- (1) Indirect and selling expenses for the year ended December 31, 2006, included a second quarter pre-tax charge of approximately \$4.3 million resulting from the abandonment of our San Francisco, California leased facility and the abandonment of a portion of our Lexington, Massachusetts leased facility, and an approximately \$2.7 million bonus payment related to the IPO of our common stock.
- (2) EBITDA, a measure used by us to evaluate performance, is earnings before interest, tax, and depreciation and amortization. We believe EBITDA is useful to investors because similar measures are frequently used by securities analysts, investors, and other interested parties in evaluating companies in our industry. EBITDA is not a recognized term under generally accepted accounting principles and does not purport to be an alternative to net income as a measure of operating performance, or to cash flows from operating activities as a measure of liquidity. Because not all companies use identical calculations, this presentation of EBITDA may not be comparable to other similarly titled measures used by other companies. EBITDA is not intended to be a measure of free cash flow for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments, capital expenditures, and debt service. Our credit agreement includes covenants based on EBITDA, subject to certain adjustments. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources. A reconciliation of net income to EBITDA follows:

	2010	2009	Year ended December 31, 2008 (In thousands)	2007	2006
Net income	\$ 27,171	\$ 22,356	\$ 28,723	\$ 40,556	\$ 11,867

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the Selected Financial Data and the consolidated financial statements and related notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis contains forward-looking statements that involve risks, uncertainties, and assumptions, such as statements of our plans, objectives, expectations, and intentions. The cautionary statements made in this Annual Report on Form 10-K should be read as applying to all related forward-looking statements wherever they appear in this Annual Report on Form 10-K. Our actual results could differ materially from those anticipated in the forward-looking statements. Factors that could cause or contribute to our actual results differing materially from those anticipated include those discussed in Risk Factors and elsewhere in this Annual Report on Form 10-K.

OVERVIEW

We provide management, technology, and policy consulting and implementation services to government, commercial, and international clients. We help our clients conceive, develop, implement, and improve solutions that address complex economic, social, and national security issues. Our services primarily address three key markets: energy, environment, and transportation; health, education, and social programs; and homeland security and defense. We believe that demand for our services will continue to grow as government, industry, and other stakeholders seek to address critical long-term societal and natural resource issues in these market areas due to heightened concerns regarding the need for cleaner and new sources of energy, health concerns about areas such as substance abuse, obesity, and aging populations, and geopolitical changes that drive ever-present homeland security threats.

Our clients utilize our services because we combine diverse institutional knowledge and experience in their activities with the deep subject-matter expertise of our highly educated staff, which we deploy in multi-disciplinary teams. Our federal government clients have included every cabinet-level department, including HHS, DoD, DOS, EPA, DHS, USDA, HUD, Department of Transportation (DOT), Department of Interior (DOI), DOJ, DOE, and Department of Education (ED). U.S. federal government clients generated approximately 71%, 60%, and 36% of our revenue in 2010, 2009, and 2008, respectively. State and local government clients generated approximately 10%, 19%, and 47% of our revenue in 2010, 2009, and 2008, respectively. The Road Home contract with the State of Louisiana, which accounted for the majority of our state and local revenue for its three-year duration, ended as scheduled on June 11, 2009. We also serve domestic commercial and international clients, primarily in the air transportation and energy sectors, including airlines, airports, electric and gas utilities, oil companies, and law firms. Our domestic commercial and international clients, including government clients outside the United States, generated approximately 19%, 21%, and 17% of our revenue in 2010, 2009, and 2008, respectively. We have successfully worked with many of our clients for decades, with the result that we have a unique and knowledgeable perspective on their needs.

We report operating results and financial data as a single segment based on the information used by our chief operating decision-makers in evaluating the performance of our business and allocating resources. Our single segment represents our core business professional services for government and commercial clients. Although we describe our multiple service offerings to three markets to provide a better understanding of our business, we do not manage our business or allocate our resources based on those service offerings or markets.

CRITICAL ACCOUNTING ESTIMATES

The preparation of our financial statements in accordance with accounting principles generally accepted in the United States of America requires that we make estimates and judgments that affect the reported amount of assets, liabilities, revenue, and expenses, as well as the disclosure of contingent assets and liabilities. If any of these estimates or judgments prove to be incorrect, our reported results could be materially affected.

Actual

Table of Contents

results may differ significantly from our estimates under different assumptions or conditions. We believe that the estimates, assumptions, and judgments involved in the accounting practices described below have the greatest potential impact on our financial statements and therefore consider them to be critical accounting policies.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, services have been rendered, the contract price is fixed or determinable, and collectability is reasonably assured. We enter into contracts that are time-and-materials contracts, cost-based contracts, fixed-price contracts, or a combination of these. This mix of contract types requires the application of various accounting rules and increases the complexity of our revenue recognition process.

Revenue recognition requires us to use judgment relative to assessing risks, estimating contract revenue and costs, and making assumptions for schedule and technical issues. Due to the size and nature of many of our contracts, the estimation of revenue and cost at completion can be complicated and is subject to many variables. Contract costs include labor, subcontractor costs, and other direct costs, as well as allocation of allowable indirect costs. We must also make assumptions regarding the length of time to complete the contract because costs also include expected increases in wages, prices for subcontractors, and other direct costs. From time to time, facts develop that require us to revise our estimated total costs and revenue on a contract. To the extent that a revised estimate affects contract profit or revenue previously recognized, we record the cumulative effect of the revision in the period in which the facts requiring the revision become known. Provision for the full amount of an anticipated loss on any type of contract is recognized in the period in which it becomes probable and can be reasonably estimated. As a result, operating results could be affected by revisions to prior accounting estimates.

From time to time, we may proceed with work based on client written direction prior to the completion and signing of formal contract documents. Revenue associated with such work is recognized only when it can reliably be estimated and realization is probable. We base our estimates on a variety of factors, including previous experiences with the client, communications with the client regarding funding status, and our knowledge of available funding for the contract.

Goodwill and the amortization of intangible assets

Costs in excess of the fair value of tangible and identifiable intangible assets acquired and liabilities assumed in a business combination are recorded as goodwill. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but are instead reviewed annually (or more frequently if necessary) for impairment. Intangible assets with estimable useful lives are required to be amortized over their respective estimated useful lives and are also required to be reviewed for impairment if events or circumstances warrant such a review.

We have elected to perform the annual goodwill impairment review during the fourth quarter, as of September 30 of each year. For purposes of performing this test, we have concluded that we are only one business segment/reporting unit. We estimate fair value of our one reporting unit using a market based approach. In 2010, we elected to carry-forward our detailed determination of fair value from the 2009 goodwill impairment test conducted as of September 30, 2009. We believe this is appropriate as our assets and liabilities have not changed significantly from September 30, 2009, the fair value determination performed in 2009 exceeded our carrying value by a substantial margin, and the likelihood that a current fair value determination would be less than our carrying value would be remote. Based upon management's most recent review, we determined that no goodwill impairment charge was required for 2010. Historically, we have not recorded goodwill impairment charges.

Long-lived assets and certain identifiable intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset might not be recoverable. Recoverability

Table of Contents

of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less cost to sell. To date, we have recorded no impairment charges.

New accounting standards

New accounting standards are discussed in *Note B Summary of Significant Accounting Policies Recent Accounting Pronouncements* of our Notes to Consolidated Financial Statements appearing in this Annual Report on Form 10-K.

REVENUE

We earn revenue from services that we provide to clients in three key markets:

energy, environment, and transportation;

health, education, and social programs; and

homeland security and defense.

The following table shows the approximate percentage of our revenue from each of our three markets for the periods indicated. Although we have changed the names of our key markets in 2010, the scope of each market is the same as prior years, and the revenue for prior years for each market is therefore unchanged. For each client, we have attributed all revenue from that client to the market we consider to be the client's primary market, even if a portion of that revenue relates to a different market.

	Year ended December 31,		
	2010	2009	2008
Energy, environment, and transportation	40%	42%	35%
Health, education, and social programs	46%	44%	53%
Homeland security and defense	14%	14%	12%
Total	100%	100%	100%

In 2009, the proportion of revenue from health, education, and social programs decreased compared to 2008, primarily due to the decrease of activity associated with The Road Home contract, partially offset by an increase in revenues from the Macro acquisition. In addition, in 2009, the proportion of revenue from energy, environment, and transportation increased compared to 2008, primarily due to increased work performed in the energy efficiency area.

Our primary clients are the agencies and departments of the U.S. federal government. The following table shows the approximate percentage of our revenue for each type of client for the periods indicated.

	Year ended December 31,		
	2010	2009	2008
U.S. federal government	71%	60%	36%
U.S. state and local government	10%	19%	47%
Domestic commercial	14%	16%	12%
International	5%	5%	5%

Edgar Filing: ICF International, Inc. - Form 10-K

Total	100%	100%	100%
-------	------	------	------

Table of Contents

Revenue generated from U.S. federal contracts increased each year from 2008 to 2010, and revenue generated from our state and local government clients decreased each year from 2008 to 2010, primarily due to increased revenue associated with the acquisition of Macro, and a reduction in revenue resulting from the completion of The Road Home contract with the State of Louisiana.

Most of our revenue is from contracts on which we are the prime contractor, which we believe provides us strong client relationships. In 2010, 2009, and 2008, approximately 85%, 85%, and 90%, of our revenue, respectively, was from prime contracts.

Contract mix

Our contracts with clients include time-and-materials contracts, fixed-price contracts, and cost-based contracts (including cost-based fixed fee, cost-based award fee, and cost-based incentive fee, as well as grants and cooperative agreements). Our contract mix varies from year to year due to numerous factors, including our business strategies and the procurement activities of our clients. Unless the context requires otherwise, we use the term "contracts" to refer to contracts and any task orders or delivery orders issued under a contract.

The following table shows the approximate percentage of our revenue from each of these types of contracts for the periods indicated.

	Year ended December 31,		
	2010	2009	2008
Time-and-materials	49%	51%	67%
Fixed-price	28%	29%	22%
Cost-based	23%	20%	11%
Total	100%	100%	100%

The changes in percentages from 2008 to 2009 were primarily due to the reduction in revenue from The Road Home contract and the acquisition of Macro in 2009 (approximately one-half of its work is cost-based).

Time-and-materials contracts. Under time-and-materials contracts, we are paid for labor at fixed hourly rates and generally reimbursed separately for allowable materials, other direct costs, and out-of-pocket expenses. Our actual labor costs may vary from the expected costs that formed the basis for our negotiated hourly rates if we utilize different employees than anticipated, need to hire additional employees at higher wages, increase the compensation paid to existing employees, or are able to hire employees at lower-than-expected rates. Our non-labor costs, such as fringe benefits, overhead, and general and administrative costs, also may be higher or lower than we anticipated. To the extent that our actual labor and non-labor costs under a time-and-materials contract vary significantly from our expected costs or the negotiated hourly rates, we can generate more or less than the targeted amount of profit or, perhaps incur a loss.

Fixed-price contracts. Under fixed-price contracts, we perform specific tasks for a pre-determined price. Compared to time-and-materials and cost-based contracts, fixed-price contracts involve greater financial risk because we bear the full impact of labor and non-labor costs that exceed our estimates, in terms of costs per hour, number of hours, and all other costs of performance, in return for the full benefit of any cost savings. We therefore may generate more or less than the targeted amount of profit or, perhaps, a loss.

Cost-based contracts. Under cost-based contracts, we are paid based on the allowable costs we incur, and usually receive a fee. All of our cost-based contracts reimburse us for our direct labor and fringe-benefit costs that are allowable under the contract; however, certain contracts limit the amount of overhead and general and administrative costs we can recover, which may be less than our actual overhead and general and administrative costs. In addition, our fees are constrained by fee ceilings and, in certain cases, such as with grants and

Table of Contents

cooperative agreements, we may receive no fee. Because of these limitations, our cost-based contracts, on average, are our least profitable type of contract, and we may generate less than the expected return. Cost-based fixed-fee contracts specify the fee to be paid. Cost-based incentive-fee and cost-based award-fee contracts provide for increases or decreases in the contract fee, within specified limits, based upon actual results as compared to contractual targets for factors such as cost, quality, schedule, and performance.

DIRECT COSTS

Direct costs consist primarily of costs incurred to provide services to clients, the most significant of which are subcontractors and employee salaries and wages, plus associated fringe benefits, relating to specific client engagements. Direct costs also include the costs of third-party materials and any other related direct costs, such as travel expenses.

We generally expect the ratio of direct costs as a percentage of revenue to decline when our own labor increases relative to subcontracted labor or outside consultants. Conversely, as our labor decreases relative to subcontracted labor or outside consultants, we expect the ratio to increase.

Changes in the mix of services and other direct costs provided under our contracts can result in variability in our direct costs as a percentage of revenue. For example, when we perform work in the area of implementation, we expect that more of our services will be performed in client-provided facilities and/or with dedicated staff. Such work generally has a higher proportion of direct costs than much of our current advisory work, and we anticipate that higher utilization of such staff will decrease indirect expenses. In addition, to the extent we are successful in winning larger contracts, our own labor services component could decrease because larger contracts typically are broader in scope and require more diverse capabilities, potentially resulting in more subcontracted labor, more other direct costs, and lower margins. Although these factors could lead to a higher ratio of direct costs as a percentage of revenue, the economics of these larger jobs are nonetheless generally favorable because they increase income, broaden our revenue base, and have a favorable return on invested capital.

OPERATING EXPENSES

Our operating expenses consist of indirect and selling expenses, including non-cash compensation, and depreciation and amortization.

Indirect and selling expenses

Indirect and selling expenses include our management, facilities, and infrastructure costs for all employees, as well as salaries and wages, plus associated fringe benefits, not directly related to client engagements. Among the functions covered by these expenses are marketing, business and corporate development, bids and proposals, facilities, information technology and systems, contracts administration, accounting, treasury, human resources, legal, corporate governance, and executive and senior management. We include all of our cash incentive compensation in this item, as well as all our non-cash compensation, such as stock-based compensation provided to employees, whose compensation and other benefit costs are included in both direct costs and indirect and selling expenses.

Stock Incentive Plans and non-cash compensation

On June 4, 2010, our stockholders ratified the ICF International, Inc. 2010 Omnibus Incentive Plan (the "Omnibus Plan"), which was adopted by us on March 8, 2010. The Omnibus Plan replaced the 2006 Long-Term Equity Incentive Plan (the "2006 Plan"), which we had used for equity and incentive awards since becoming a publicly traded company in 2006. The Omnibus Plan provides for the granting of options, stock appreciation rights, restricted stock, restricted stock units ("RSUs"), performance shares, performance units, cash-based awards, and other stock-based awards to all officers, key employees, and non-employee directors. The Omnibus

Table of Contents

Plan allowed for us to grant an additional 1.8 million shares in addition to the remaining shares from the 2006 Plan, for a total of approximately 2.7 million shares. Shares awarded that are not stock options or stock appreciation rights are counted as 1.9 shares deducted from the Omnibus Plan for every one share delivered under those awards. Shares awarded that are stock options or stock appreciation rights are counted as a single share deducted from the Omnibus Plan for every one share delivered under those awards.

We recognized stock-based compensation expense of \$7.5 million, \$7.2 million and \$6.5 million for the years ended December 31, 2010, 2009, and 2008, respectively.

Depreciation and amortization

Depreciation and amortization includes depreciation of computers, furniture, and other equipment; the amortization of the costs of software we use internally; leasehold improvements; and amortization of other intangible assets arising from acquisitions.

INCOME TAX EXPENSE

Our effective tax rate of approximately 37.8% including state and foreign taxes net of federal benefit for the year ended December 31, 2010, was lower than the statutory tax rate for the year primarily due to one-time downward permanent adjustments, the release of certain unrecognized tax benefits, the generation of foreign tax credits, and the approval of certain state tax credits, partially offset by permanent differences related to expenses not deductible for tax purposes.

ACQUISITIONS

A key element of our growth strategy is to pursue acquisitions. In 2008, we acquired Jones & Stokes, and, in 2009, we acquired Macro and JASI. We did not close any acquisitions in 2010; however, we completed the acquisition of Marbek in January 2011. See Note O Subsequent Events of our Notes to Consolidated Financial Statements appearing in this Annual Report on Form 10-K for additional information.

Jones & Stokes. Effective February 13, 2008, we acquired all of the outstanding common stock of Jones & Stokes. Jones & Stokes provides integrated planning and resource management services, specializing in the transportation, energy, water, and natural resource management sectors. Jones & Stokes supports a broad mix of federal, commercial, state, and local government clients on projects to plan and implement required infrastructure improvements and mandated government programs. We undertook the acquisition to expand our environmental and large project implementation capabilities across such strategic growth areas as transportation and infrastructure, energy, climate change, and water resources. We also undertook the acquisition to expand our presence in the western U.S. markets, where natural resource issues are a growing concern and where Jones & Stokes has outstanding market presence.

The aggregate purchase price was approximately \$50.4 million, including \$49.0 million of cash and \$1.4 million of transaction expenses. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$46.0 million. We have allocated approximately \$41.0 million to goodwill and \$5.0 million to other intangible assets. The results of operations for Jones & Stokes have been included in our statement of earnings since February 13, 2008.

Macro. Effective March 31, 2009, we acquired all of the outstanding common shares of Macro. Macro provides research and evaluation, management consulting, marketing communications, and information services to key agencies and departments of the federal government. Macro is recognized for its expertise in research, evaluation, consulting, and implementation services, particularly in federal health programs, covering a wide range of health issues in the U.S. and internationally. In addition to its health-related expertise, Macro has strong credentials in housing, labor, and veterans affairs issues. We undertook the acquisition to expand our health-related and large project implementation capabilities across key federal markets, to add service offerings and clients in one of our largest markets, and to provide significant growth potential and cross-selling opportunities.

Table of Contents

The aggregate purchase price of approximately \$157.6 million in cash, including the working capital adjustment required by the stock purchase agreement, was funded by our revolving credit facility. We engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$129.5 million. We have allocated approximately \$104.1 million to goodwill and \$25.4 million to other intangible assets. The intangible assets consist of approximately \$24.6 million of customer-related intangibles that are being amortized over seven years, and \$0.8 million of marketing-related intangibles that were amortized over nine months. Macro was purchased under the election provisions of Internal Revenue Code Section 338(h)(10), and, therefore, goodwill and the amortization of intangibles are deductible for tax purposes over a fifteen-year period and will generate deferred taxes. The results of operations for Macro have been included in our statement of earnings for periods beginning after March 31, 2009. See Note E Goodwill and Other Intangible Assets of our Notes to Consolidated Financial Statements appearing in this Annual Report on Form 10-K for a more detailed discussion of this acquisition.

JASI. Effective December 10, 2009, we acquired all of the outstanding common stock of JASI, an information technology firm specializing in providing cybersecurity and identity management services to U.S. federal civilian and defense agencies. With the acquisition, we are able to offer an expanded range of advisory and implementation solutions across our federal and energy industry client base to assist in mitigating emerging cybersecurity threats and vulnerabilities.

The aggregate purchase price of approximately \$32.2 million in cash, including a working capital adjustment required by the stock purchase agreement, was funded by our revolving credit facility. We engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$29.0 million. We allocated approximately \$21.6 million to goodwill and \$7.4 million to other intangible assets. The intangible assets consist of approximately \$7.0 million of customer-related intangibles that are being amortized over seven years and \$0.4 million of marketing-related intangibles that are being amortized over two years. JASI was purchased under the election provisions of Internal Revenue Code Section 338(h)(10) and, therefore, goodwill and the amortization of intangibles are deductible for tax purposes over a fifteen-year period and will generate deferred taxes. The results of operations for JASI have been included in our statement of earnings since December 10, 2009. See Note E Goodwill and Other Intangible Assets of our Notes to Consolidated Financial Statements appearing in this Annual Report on Form 10-K for a more detailed discussion of this acquisition.

Our acquisitions to date have all involved purchase prices well in excess of tangible asset values, resulting in the creation of a significant amount of goodwill and other intangible assets. Increased levels of finite-lived intangible assets will increase our amortization charges. At December 31, 2010, goodwill accounted for approximately 57% of our total assets, and purchased intangibles accounted for approximately 5% of our total assets. We test our goodwill for impairment at least annually, and if we conclude that it is impaired, we will be required to write down its carrying value on our balance sheet and record an impairment charge in our statement of earnings.

We plan to continue to acquire businesses if and when opportunities arise. We expect future acquisitions to generate significant amounts of goodwill and other intangible assets. We expect to incur additional debt for future acquisitions and, in some cases, to use our stock as acquisition consideration in addition to, or in lieu of, cash. Any issuance of stock may have a dilutive effect on our stock outstanding.

FLUCTUATION OF QUARTERLY RESULTS AND CASH FLOW

Our results of operations and cash flow may vary significantly from quarter to quarter depending on a number of factors, including, but not limited to:

progress of contract performance;

Table of Contents

number of billable days in a quarter;

timing of client orders;

timing of award fee notices;

changes in the scope of contracts;

variations in purchasing patterns under our contracts;

federal and state government and other clients' spending levels;

timing of billings to, and payments by, clients;

timing of receipt of invoices from, and payments to, employees and vendors;

commencement, completion, and termination of contracts;

strategic decisions we make, such as acquisitions, consolidations, divestments, spin-offs, joint ventures, strategic investments, and changes in business strategy;

timing of significant costs and investments (such as bid and proposal costs and the costs involved in planning or making acquisitions);

our contract mix and use of subcontractors;

additions to and departures of staff;

changes in staff utilization;

vacation and sick days taken by our employees;

level and cost of our debt;

changes in accounting principles and policies; and/or

general market and economic conditions.

Because a significant portion of our expenses, such as personnel, facilities, and related costs, are fixed in the short term, contract performance and variation in the volume of activity, as well as in the number and volume of contracts commenced or completed during any quarter, may cause significant variations in operating results from quarter to quarter.

EFFECT OF APPROVAL OF FEDERAL BUDGET

The federal government's fiscal year ends on September 30 of each year. If a federal budget for the next fiscal year has not been approved by that date, some of our clients may have to suspend engagements on which we are working or may delay new engagements until a budget has been approved. Any such suspension or delay may reduce our revenue in the quarter ending September 30 (our third quarter) or the subsequent quarter. The federal government's fiscal year end can also trigger increased contracting activity, which could affect our third or fourth quarter revenue, profit, and cash flow. In addition, it is possible that Congress could enact a continuing resolution or, in the alternative, fail to approve a budget or a continuing resolution in a timely manner, resulting in a government shut down. A continuing resolution could delay or reduce our revenue, profit, or cash flow, while a government shut down will more immediately and substantially reduce our revenue, profit, and cash flow.

EFFECTS OF INFLATION

We generally have been able to price our contracts in a manner to accommodate the rates of inflation experienced in recent years, although we cannot ensure that we will be able to do so in the future.

Table of Contents**RESULTS OF OPERATIONS**

The following table sets forth certain items from our consolidated statements of operations as an approximate percentage of revenue for the periods indicated.

Consolidated Statement of Earnings**Years Ended December 31, 2010, 2009, and 2008****(dollars in thousands)**

	Year Ended December 31,						Year to Year Change

Table of Contents

Year ended December 31, 2010, compared to year ended December 31, 2009

Gross Revenue. Revenue for the year ended December 31, 2010, was \$764.7 million, compared to \$674.4 million for the year ended December 31, 2009, representing an increase of \$90.3 million, or 13.4%. The increase was primarily due to growth in contracts of \$89.2 million, and revenue associated with the operations of Macro, acquired March 31, 2009, whose revenue is included in the twelve months ended December 31, 2010, but is not included in the first three months of 2009, and the operations of JASI, acquired in December 2009, whose revenue is included in the twelve months ended December 31, 2010, but is only included in December of 2009, partially offset by a reduction in revenue of \$60.4 million associated with the conclusion of The Road Home contract in June 2009.

Direct costs. Direct costs for the year ended December 31, 2010, were \$476.2 million, compared to \$411.3 million for the year ended December 31, 2009, an increase of \$64.9 million or 15.8%. The increase in direct costs was primarily due to costs associated with a growth in contracts, the operations of Macro, acquired March 31, 2009, whose results are included in the twelve months ended December 31, 2010, but are not included in the first three months of 2009, and the operations of JASI, acquired in December 2009, whose results are included in the twelve months ended December 31, 2010, but are only included in December of 2009, partially offset by the effect of the conclusion of The Road Home contract in June 2009.

Indirect and selling expenses. Indirect and selling expenses for the year ended December 31, 2010, were \$218.5 million, or 28.6% of revenue, compared to \$203.4 million, or 30.2% of revenue for the year ended December 31, 2009. The decrease in indirect and selling expenses as a percentage of revenue was due principally to increased contract revenue, partially offset by an increase in indirect and selling expenses of 7.4%, for the year ended December 31, 2010, compared to the year ended December 31, 2009. The increase in indirect and selling expenses of \$15.1 million is primarily attributable to costs associated with a growth in contracts and the operations of JASI, acquired in December 2009, and the operations of Macro, acquired March 31, 2009, whose results are included in the twelve months ended December 31, 2010, but are partially included in the twelve months ended December 31, 2009.

Depreciation and amortization. Depreciation and amortization for the year ended December 31, 2010, was \$10.8 million, compared to \$9.4 million for the year ended December 31, 2009. The 14.4% increase in depreciation and amortization resulted primarily from depreciation related to assets from recently acquired businesses and new assets placed into service in 2010.

Amortization of intangible assets. Amortization of intangible assets for the year ended December 31, 2010, was \$12.3 million, compared to \$11.1 million for the year ended December 31, 2009. The 10.7% increase in amortization expense was primarily due to the amortization of intangibles related to acquisitions we completed in 2009, partially offset by a decrease in amortization expense related to earlier acquisitions.

Operating Income. For the year ended December 31, 2010, operating income was \$46.9 million, compared to \$39.1 million for the year ended December 31, 2009, an increase of \$7.8 million or 20%. Operating income increased primarily due to increased contract revenue, partially offset by an increase in operating costs and expenses of 7.9% for the year ended December 31, 2010, compared to the year ended December 31, 2009.

Interest expense. For the year ended December 31, 2010, interest expense was \$3.4 million, compared to \$5.1 million for the year ended December 31, 2009. The decrease was due primarily to a lower average debt balance in 2010 as compared to the average debt balance in 2009.

Other income. For the year ended December 31, 2010, other income was \$0.2 million, compared to \$1.0 million for the year ended December 31, 2009. The activity in other income for the year ended December 31, 2009, was primarily attributable to funds received from indemnity claims related to prior acquisitions.

Provision for income taxes. Our income tax rate for the year ended December 31, 2010 was 37.8% compared to 36.1% for the year ended December 31, 2009. The increase was predominately related

Table of Contents

to a greater release of certain unrecognized tax benefits and greater one-time prior year adjustments in 2009, partially offset by a reduction of the permanent differences related to expenses not deductible for tax purposes and an increase in state tax credits during 2010.

Year ended December 31, 2009, compared to year ended December 31, 2008

Gross Revenue. Revenue for the year ended December 31, 2009, was \$674.4 million, compared to \$697.4 million for the year ended December 31, 2008, representing a decrease of \$23.0 million, or 3.3%. The decrease was primarily due to a reduction in revenue of \$204.4 million associated with the declining activities and the conclusion of The Road Home contract in June 2009. The decrease in revenue on The Road Home contract was partially offset by: (1) revenue associated with newly acquired Macro and JASI; (2) growth in other contracts of \$62.4 million; and (3) revenue associated with the operations of Jones & Stokes that was acquired in February 2008, whose results are included in operating results for the entire twelve months ended December 31, 2009, but only partially included in the operating results for the year ended December 31, 2008.

Direct costs. Direct costs for the year ended December 31, 2009, were \$411.3 million, or 61.0% of revenue, compared to \$460.0 million, or 66.0% of revenue, for the year ended December 31, 2008. The decrease was primarily due to the declining activities and conclusion of The Road Home contract in June 2009. The decrease was partially offset by: (1) direct costs associated with the operations of Macro and JASI, both acquired in 2009; (2) an increase in direct costs associated with growth in other contracts; and (3) direct costs associated with the operations of Jones & Stokes, whose results are included in operating results for the entire twelve months ended December 31, 2009, but only partially included in the operating results for the year ended December 31, 2008. The decrease in direct costs as a percentage of revenue was primarily attributable to the decreased work on The Road Home contract, which consisted of relatively more work performed by subcontractors, and increased revenue from Macro and other contracts, which had a relatively lower direct cost component.

Indirect and selling expenses. Indirect and selling expenses for the year ended December 31, 2009, were \$203.4 million, or 30.2% of revenue, compared to \$170.4 million, or 24.4% of revenue for the year ended December 31, 2008. The increase in indirect and selling expenses was due principally to: (1) indirect costs associated with the operations of Macro, acquired in 2009; (2) indirect costs associated with the operations of Jones & Stokes, whose results are included in operating results for the entire twelve months ended December 31, 2009, but only partially included in the operating results for the year ended December 31, 2008; (3) \$1.4 million of expenses associated with the acquisitions of Macro and JASI; and (4) an increase of \$0.7 million of expenses associated with non-cash compensation. The increase in indirect costs as a percentage of revenue for the year ended December 31, 2009, was primarily attributable to a change in contract mix. The decrease in the activity of The Road Home contract was partially offset by growth through acquisition and organic growth, both of which have a relatively higher indirect cost component.

Depreciation and amortization. Depreciation and amortization for the year ended December 31, 2009, was \$9.4 million, or 1.4% of revenue, compared to \$5.4 million, or 0.8% of revenue for the year ended December 31, 2008. This 74.1% increase in depreciation and amortization resulted primarily from an increase in capital expenditures during the latter part of 2008 and depreciation related to Macro.

Amortization of intangible assets. Amortization of intangible assets for the year ended December 31, 2009, was \$11.1 million, or 1.7% of revenue, compared to \$8.7 million, or 1.2% of revenue for the year ended December 31, 2008. The increase in amortization expense was primarily due to the amortization of intangibles related to the Macro acquisition, partially offset by a decrease to amortization expense related to other earlier acquisitions.

Operating income. For the year ended December 31, 2009, earnings from operations were \$39.1 million, or 5.8% of revenue, compared to \$53.0 million, or 7.6% of revenue, for the year ended December 31, 2008. Earnings from operations and earnings from operations as a percentage of revenue decreased primarily due to the decrease in revenue associated with the declining activities of The Road Home contract and increased depreciation and amortization expense.

Table of Contents

Interest expense. For the year ended December 31, 2009, interest expense was approximately \$5.1 million, compared to approximately \$4.1 million for the year ended December 31, 2008. The increase was due primarily to an increase in debt associated with the acquisition of Macro, partially offset by lower interest rates.

Other income. For the year ended December 31, 2009, other income was approximately \$1.0 million, or 0.1% of revenue, compared to approximately \$0.6 million, or 0.1% of revenue, for the year ended December 31, 2008. The activity in other income for the year ended December 31, 2008, was primarily attributable to the reduction of a subcontractor indemnification obligation. The activity in other income for the year ended December 31, 2009, was primarily attributable to funds received from indemnity claims related to prior acquisitions.

Provision for income taxes. Our income tax rate for the year ended December 31, 2009, was approximately 36.1% compared to approximately 41.9% for the year ended December 31, 2008. The decrease was predominately related to one-time downward permanent adjustments, the release of certain unrecognized tax benefits, the generation of foreign tax credits in lieu of foreign income tax deductions, and the approval of certain state tax credits, partially offset by permanent differences related to expenses not deductible for tax purposes.

LIQUIDITY AND CAPITAL RESOURCES

Credit Facility. We entered into the Second Amended and Restated Business Loan and Security Agreement (Credit Facility) on February 20, 2008, with a syndication of nine commercial banks to allow for borrowings of up to \$350.0 million for a period of five years (maturing February 20, 2013) under a revolving line of credit. The Credit Facility provides for borrowings of up to \$275.0 million without a borrowing base requirement and also provides for an accordion feature, which permits additional revolving credit commitments of up to \$75.0 million, subject to lenders approval. The Credit Facility has provided pre-approval by the lenders for acquisitions with individual purchase prices of up to \$75.0 million, if certain conditions are met. The Credit Facility is collateralized by substantially all of our assets, and requires that we remain in compliance with certain financial and non-financial covenants. The financial covenants, as defined by the Credit Facility, require that we maintain, on a consolidated basis for each quarter, a Fixed Charge Coverage Ratio of not less than 1.25 to 1.00 and a Leverage Ratio of not more than 3.50 to 1.00. As of December 31, 2010, we were in compliance with the covenants under the Credit Facility.

On March 31, 2009, the Credit Facility was amended to allow for the acquisition of Macro, for permission to sell capital stock in one or more offerings (provided that the proceeds are used to pay down the Credit Facility), and to increase the interest rate margins we pay to borrow funds under the Credit Facility. We have the ability to borrow funds under our Credit Facility at interest rates based on both LIBOR and prime rates, at our discretion, plus their applicable margins. Interest rates on debt outstanding ranged from 2.13% to 2.50% in 2010.

Financial Condition. There were several significant changes in our balance sheet during the year ended December 31, 2010. Total property and equipment, net, declined to \$18.9 million, compared to \$22.6 million as of December 31, 2009, due to greater depreciation than new capital expenditures during the year. Other intangible assets, net, decreased to \$26.1 million as of December 31, 2010, from \$38.5 million as of December 31, 2009, due to amortization. Current liabilities grew to \$116.2 million as of December 31, 2010, from \$100.3 million as of December 31, 2009, due to increases in accrued salaries and benefits and accrued expenses. Long-term debt decreased to \$85.0 million on December 31, 2010, from \$145.0 million on December 31, 2009, due to operating cash flow and a decrease in working capital requirements during the year. Total stockholders equity grew to \$352.7 million at the end of 2010 from \$317.6 million at the end of 2009 due to the net income of 2010 and additional paid-in capital. Days-sales-outstanding were 72 days at December 31, 2010, and 80 days at December 31, 2009, while our days-payable-outstanding were 48 days at December 31, 2010, and 46 days at December 31, 2009.

Liquidity and Borrowing Capacity. Short-term liquidity requirements are created by our use of funds for working capital, capital expenditures, and the need to provide any debt service. We expect to meet these

Table of Contents

requirements through a combination of cash flow from operations and borrowings under our Credit Facility. As of December 31, 2010, we had \$85.0 million borrowed under our revolving line of credit, outstanding letters of credit of \$1.3 million, resulting in unused borrowing capacity of \$188.7 million on our Credit Facility, which is available for our working capital needs and for other purposes.

We anticipate that our long-term liquidity requirements, including any future acquisitions, will be funded through a combination of cash flow from operations, borrowings under our Credit Facility, additional secured or unsecured debt, or the issuance of common or preferred stock, each of which may be initially funded through borrowings under our Credit Facility.

We believe that the combination of internally generated funds, available bank borrowings, and cash and cash equivalents on hand will provide the required liquidity and capital resources necessary to fund on-going operations, customary capital expenditures, and other working capital requirements. We are continuously analyzing our capital structure to ensure we have sufficient capital to fund future acquisitions and internal growth. We monitor the state of the financial markets on a regular basis to assess the availability and cost of additional capital resources both from debt and equity sources. We believe that we will be able to access these markets on commercially reasonable terms and conditions if we need additional borrowings or capital.

Cash and Cash Equivalents. We consider cash on deposit and all highly liquid investments with original maturities of three months or less to be cash and cash equivalents. Cash was \$3.3 million and \$2.4 million on December 31, 2010, and December 31, 2009, respectively.

Cash Flow. The following table sets forth our sources and uses of cash for the following years.

	2010	Year ended December 31, 2009 (In thousands)	2008
Net cash provided by operating activities	\$ 68,178	\$ 48,554	\$ 24,634
Net cash used in investing activities	(7,677)	(197,177)	(61,692)
Net cash (used in) provided by financing activities	(59,366)	149,505	36,494
Effect of exchange rate on cash	(187)	(65)	(633)
Increase (decrease) in cash	\$ 948	\$ 817	\$ (1,197)

Our operating cash flow is primarily affected by the overall profitability of our contracts, our ability to invoice and collect from our clients in a timely manner, and our ability to manage our vendor payments. We bill most of our clients monthly after services are rendered. Operating activities provided cash in each of the years 2010, 2009, and 2008 of \$68.2 million, \$48.6 million, and \$24.6 million, respectively. Cash flows from operating activities for 2010 were positively impacted by net income, depreciation and amortization, and accrued salaries and benefits, partially offset by deferred income taxes and contract receivables. Cash flows from operating activities in 2009 were positively impacted by net income, depreciation and amortization and contract receivables, partially offset by accrued expenses and prepaid expenses and other assets. Cash flows from operating activities in 2008 were positively impacted by net income, contract receivables and depreciation and amortization, partially offset by accounts payable and accrued expenses.

Our cash flow used in investing activities consists primarily of capital expenditures and acquisitions. During the year ended 2010, we paid for purchased capital assets totaling \$7.3 million. During the year ended 2009, we paid approximately \$188.7 million for business acquisitions, net of cash acquired, and purchased capital assets totaling \$8.1 million. During the year ended 2008, we paid approximately \$51.4 million for business acquisitions, net of cash acquired, and purchased capital assets totaling approximately \$9.9 million.

Our cash flow from financing activities consists primarily of debt and equity transactions. For the year ended 2010, cash flow used in financing activities was primarily due to a net pay down on our Credit Facility of

Table of Contents

\$60.0 million. For the year ended 2009, cash flow provided by financing activities included approximately \$83.3 million in net proceeds from our secondary offering and \$65.0 million from our Credit Facility. For the year ended 2008, cash flow provided by financing activities was primarily due to net borrowings of approximately \$32.9 million from our Credit Facility.

OFF-BALANCE SHEET ARRANGEMENTS

We use off-balance sheet arrangements to finance the lease of facilities. We have financed the use of all of our office and storage facilities through operating leases. Operating leases are also used from time to time to finance the use of computers, servers, copiers, telephone systems, and to a lesser extent, other fixed assets, such as furnishings, and we also obtain operating leases in connection with business acquisitions. We generally assume the lease rights and obligations of companies acquired in business combinations and continue financing equipment under operating leases until the end of the lease term following the acquisition date.

The Credit Facility provides for stand-by letters of credit aggregating up to \$5.0 million that reduce the funds available under the revolving line of credit when issued. As of December 31, 2010, we had five outstanding letters of credit with a total value of \$1.3 million. We have no other material off-balance sheet financing arrangements.

CONTRACTUAL OBLIGATIONS

The following table summarizes our contractual obligations as of December 31, 2010 that require us to make future cash payments. For contractual obligations, we included payments that we have an unconditional obligation to make.

	Total	Payments due by Period (In thousands)			
		Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Rent of facilities	\$ 186,649	\$ 25,086	\$ 42,666	\$ 28,427	\$ 90,470
Operating lease obligations	\$ 4,797	\$ 2,245	\$ 2,032	\$ 520	
Long-term debt obligation	\$ 85,000		\$ 85,000		
Total	\$ 276,446	\$ 27,331	\$ 129,698	\$ 28,947	\$ 90,470

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain financial market risks, the most predominant being fluctuations in interest rates for borrowings under our Credit Facility, as well as foreign exchange rate risk.

Interest rate fluctuations are monitored by our management as an integral part of our overall risk management program, which recognizes the unpredictability of financial markets and seeks to reduce the potentially adverse effect on our results of operations. As part of this strategy, we may use interest rate swap arrangements to manage or hedge our interest rate risk. We do not use derivative financial instruments for speculative or trading purposes.

Our exposure to market risk includes changes in interest rates for borrowings under our Credit Facility. These borrowings accrue interest at variable rates. Based upon our borrowings under this facility in 2010, a 1% increase in interest rates would have increased interest expense by approximately \$1.1 million and would have decreased our annual pre-tax cash flow by a comparable amount.

Since our IPO, we have followed an investment policy that requires that we invest excess cash in high-quality investments that preserve principal, provide liquidity, and minimize investment risk. During 2010, any excess cash was applied to repayment of outstanding borrowings incurred under our Credit Facility.

Table of Contents

Because of the size and nature of our international operations, we are not currently exposed to substantial risks relating to exchange rate fluctuations. As our mix of business changes in the future, however, this exposure could become material.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The consolidated financial statements of ICF International, Inc. and subsidiaries are provided in Part IV in this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (Exchange Act). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance as of the end of the period covered by this report.

Management's Annual Report on Internal Control Over Financial Reporting. Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an assessment of the effectiveness of our internal control over financial reporting as of the end of the period covered by this report, based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of the end of the period covered by this report. Grant Thornton LLP, our independent registered public accounting firm, has audited the financial statements included in this report and issued an opinion on our internal control over financial reporting. This opinion appears in the Report of Independent Registered Public Accounting Firm on page F-1 of this Annual Report on Form 10-K.

Change in Internal Controls. During the fourth quarter of fiscal year 2010, there were no changes in our internal control over financial reporting that have materially affected these controls, or are reasonably likely to materially affect these controls subsequent to the evaluation of these controls.

Limitations on the Effectiveness of Controls. Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Because of the inherent limitations in any control system, misstatements due to error or fraud may occur and not be detected.

ITEM 9B. OTHER INFORMATION

Not applicable.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders

ICF International, Inc., and Subsidiaries

We have audited the accompanying consolidated balance sheets of ICF International, Inc., and Subsidiaries (a Delaware corporation) as of December 31, 2010 and 2009, and the related consolidated statements of earnings, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. We also have audited ICF International, Inc., and Subsidiaries' internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). ICF International, Inc., and Subsidiaries' management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for their assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on ICF International, Inc., and Subsidiaries' internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ICF International, Inc., and Subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

Also in our opinion, ICF International, Inc., and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by COSO.

NOTE A BASIS OF PRESENTATION AND NATURE OF OPERATIONS

Basis of Presentation and Nature of Operations

The accompanying consolidated financial statements include the accounts of ICF International, Inc. (**ICFI**), and its subsidiary, ICF Consulting Group, Inc. (**Consulting**), (collectively, **the Company**). Consulting is a wholly owned subsidiary of ICFI. ICFI is a holding company with no operations or assets, other than its investment in the common stock of Consulting. The operations of Consulting are conducted within the following subsidiaries:

ICF Incorporated, L.L.C.

ICF Resources, L.L.C.

Systems Applications International, L.L.C.

ICF Associates, L.L.C.

ICF Services Company, L.L.C.

ICF Consulting Services, L.L.C.

ICF Emergency Management Services, LLC

ICF Consulting Limited (UK)

ICF Consulting Canada, Inc.

ICF Consulting Pty Ltd. (Australia)

ICF/EKO (Russia)

Edgar Filing: ICF International, Inc. - Form 10-K

ICF Consultoria do Brasil, Ltda.

ICF Consulting India Private Ltd.

Caliber Associates, Inc.

Advanced Performance Consulting Group, Inc.

Z-Tech Corporation

Simat, Helliesen & Eichner, Inc.

SH&E Limited (UK)

Jones & Stokes Associates, Inc.

ICF International Consulting (Beijing) Company, Ltd.

Macro International Inc.

Jacob & Sundstrom, Inc.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires estimates and judgments that affect the reported amount of assets, liabilities, revenue, and expenses, as well as the disclosure of contingent assets and liabilities. If any of these estimates or judgments prove to be incorrect, reported results could be materially affected. Actual results may differ significantly from estimates under different assumptions or conditions. All subsidiaries are wholly owned by Consulting. All significant intercompany transactions and balances have been eliminated.

F-6

Table of Contents

Nature of Operations

The Company provides management, technology, and policy professional services in the areas of energy, environment, and transportation; health, education, and social programs; and homeland security and defense. The Company's major clients are United States (U.S.) government departments and agencies, especially the Department of Health and Human Services (HHS), Department of Defense (DoD), Department of State (DOS), Environmental Protection Agency (EPA), Department of Homeland Security (DHS), Department of Agriculture (USDA), Department of Housing and Urban Development (HUD), Department of Transportation (DOT), Department of Interior (DOI), Department of Justice (DOJ), Department of Energy (DOE), and Department of Education (ED); state and local government departments and agencies; commercial and international clients, primarily in the air transportation and energy sectors, including airlines, airports, electric and gas utilities, oil companies, and law firms; and other government organizations throughout the U.S. and the world. The Company offers a full range of services to these clients, including strategy, analysis, program management, and information technology solutions that combine experienced professional staff, industry and institutional knowledge, and analytical methods.

The Company, incorporated in Delaware, is headquartered in Fairfax, Virginia, with over 50 domestic regional offices (as of December 31, 2010), and international offices in Brazil, Canada, India, Russia, China, and the United Kingdom.

Reclassifications

Certain amounts in the 2009 and 2008 consolidated financial statements have been reclassified to conform to the current year presentation.

NOTE B SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, services have been rendered, the contract price is fixed or determinable, and collectability is reasonably assured. We enter into contracts that are time-and-materials, cost-based, fixed-price, or a combination of these.

Time-and-Materials Contracts. Revenue for time-and-materials contracts is recorded on the basis of allowable labor hours worked multiplied by the contract-defined billing rates, plus the costs of other items used in the performance of the contract. Profit and losses on time-and-materials contracts result from the difference between the cost of services performed and the contract-defined billing rates for these services.

Cost-Based Contracts. Revenue under cost-based contracts is recognized as costs are incurred. Applicable estimated profit, if any, is included in earnings in the proportion that incurred costs bear to total estimated costs. Incentives, award fees, or penalties related to performance are also considered in estimating revenue and profit rates based on actual and anticipated awards.

Fixed-Price Contracts. Revenue for fixed-price contracts is recognized when earned, generally as work is performed. Services performed vary from contract to contract and are not always uniformly performed over the term of the arrangement. We recognize revenue in a number of different ways on fixed-price contracts, including:

Proportional Performance: Revenue on certain fixed-price contracts is recorded each period based upon certain contract performance measures (labor hours, labor costs, or total costs) incurred expressed as a proportion of a total project estimate. Thus, labor hours, labor costs, or total contract costs incurred to date are compared with the total estimate for these items at

Table of Contents

completion. Performance is based on the ratio of the incurred hours or costs to the total estimate. Progress on a contract is monitored regularly to ensure that revenue recognized reflects project status. When hours or costs incurred are used as the basis for revenue recognition, the hours or costs incurred represent a reasonable surrogate for output measures of contract performance, including the presentation of deliverables to the client. Clients are obligated to pay as services are performed, and in the event that a client cancels the contract, payment for services performed through the date of cancellation is negotiated with the client.

Contractual Outputs: Revenue on certain fixed-price contracts is recognized based upon outputs completed to date expressed as a percentage of total outputs required in the contract or based upon units delivered to the customer multiplied by the contract-defined unit price.

Straight-Line: When services are performed or are expected to be performed consistently throughout an arrangement, revenue on those fixed-price contracts is recognized ratably over the period benefited.

Completed Contract: Revenue on certain fixed-price contracts is recognized at completion if the final act is so significant to the arrangement that value is deemed to be transferred only at completion.

Revenue recognition requires us to use judgment relative to assessing risks, estimating contract revenue and costs or other variables, and making assumptions for schedule and technical issues. Due to the size and nature of many of our contracts, the estimation of revenue and estimates at completion can be complicated and are subject to many variables. Contract costs include labor, subcontracting costs, and other direct costs, as well as an allocation of allowable indirect costs. We must also make assumptions regarding the length of time to complete the contract because costs include expected increases in wages, prices for subcontractors, and other direct costs. From time to time, facts develop that require us to revise our estimated total costs or hours and thus the associated revenue on a contract. To the extent that a revised estimate affects contract profit or revenue previously recognized, we record the cumulative effect of the revision in the period in which the facts requiring the revision become known. Provision for the full amount of an anticipated loss on any type of contract is recognized in the period in which it becomes probable and can be reasonably estimated. As a result, operating results could be affected by revisions to prior accounting estimates.

We generate invoices to clients in accordance with the terms of the applicable contract, which may not be directly related to the performance of services. Unbilled receivables are invoiced based upon the achievement of specific events as defined by each contract, including deliverables, timetables, and incurrence of certain costs. Unbilled receivables are classified as a current asset. Advanced billings to clients in excess of revenue earned are recorded as deferred revenue until the revenue recognition criteria are met. Reimbursements of out-of-pocket expenses are included in revenue with corresponding costs incurred by us included in cost of revenue.

We may proceed with work based upon written client direction prior to the completion and signing of formal contract documents. We have a formal review process for approving any such work. Revenue associated with such work is recognized only when it can reliably be estimated and realization is probable. We base our estimates on a variety of factors, including previous experiences with the client, communications with the client regarding funding status, and our knowledge of available funding for the contract.

Approximately 71 percent, 60 percent, and 36 percent of the Company's revenue for the years 2010, 2009, and 2008, respectively, were derived under prime contracts and subcontracts with agencies and departments of the U.S. federal government.

Table of Contents

The approximate percentage of revenue by contract type was as follows:

	2010	2009	2008
Cost-based	23%	20%	11%
Time-and-materials	49%	51%	67%
Fixed-price	28%	29%	22%
Total	100%	100%	100%

For the years ending December 31, 2010, 2009, and 2008, revenue from various branches of the Department of Health and Human Services (HHS) accounted for approximately 21 percent or \$157.7 million, 17 percent or \$113.6 million, and 9 percent or \$60.9 million, respectively, of the Company's revenue. The accounts receivable due from HHS contracts as of December 31, 2010 and 2009 was approximately \$25.0 million and \$27.0 million, respectively.

In June of 2006, the Company was awarded a contract by the State of Louisiana, which ended in June 2009. For the year ending December 31, 2009 and 2008, revenue from the State of Louisiana accounted for approximately 9 percent or \$60.4 million, and 38 percent or \$264.8 million, respectively, of the Company's revenue.

Payments to the Company on cost-based contracts with the U.S. government are provisional payments subject to adjustment upon audit by the government. Such audits have been finalized through December 31, 2006 and any adjustments have been immaterial. Contract revenue for subsequent periods has been recorded in amounts that are expected to be realized upon final audit and settlement of costs in those years.

Cash and Cash Equivalents

The Company considers cash on deposit and all highly liquid investments with original maturities of three months or less to be cash and cash equivalents.

Property and Equipment

Property and equipment are carried at cost and are depreciated using the straight-line method over their estimated useful lives, which range from two to seven years. Leasehold improvements are amortized on a straight-line basis over the shorter of the economic life of the improvement or the related lease term. Assets acquired in acquisitions are recorded at fair value.

Goodwill and Other Intangible Assets

Goodwill represents the excess of costs over fair value of assets of businesses acquired. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead reviewed annually (or more frequently if impairment indicators arise) for impairment. Intangible assets with estimable useful lives must be amortized over such lives and reviewed for impairment.

The Company has elected to perform the annual goodwill impairment review during the fourth quarter, as of September 30 of each year. For purposes of performing this test, the Company has concluded that it is one business segment/reporting unit. The Company estimates fair value of its one reporting unit using a market based approach. In 2010, the Company elected to carry-forward its detailed determination of fair value from the 2009 goodwill impairment test conducted as of September 30, 2009. The Company believes this is appropriate as its assets and liabilities have not changed significantly from September 30, 2009, the fair value determination performed in 2009 exceeded its carrying value by a substantial margin, and the likelihood that a current fair value determination would be less than its carrying value would be remote. Based upon management's review, it was determined that no goodwill impairment charge was required for 2010, 2009, or 2008.

Table of Contents

Capitalized Software

The Company capitalizes eligible, internally developed costs for enhancements and upgrades to software. Amortization expense is recorded on a straight-line basis over the expected economic life, typically five years.

Equity Compensation

Incentive stock awards are measured at fair value. The Company has elected to use the Black-Scholes-Merton option pricing model to value any options granted and to amortize compensation expense relating to share-based payments on a straight-line basis over the requisite service period. The Company will reconsider its use of the Black-Scholes-Merton model if additional information becomes available in the future that indicates another model would be more appropriate or if grants issued in future periods have characteristics that prevent their value from being reasonably estimated using this model.

Long-lived Assets

The Company is required to review long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset might not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair value. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less cost to sell.

Foreign Currency Translation

As of December 31, 2010 and 2009, the Company held approximately \$3.0 million and \$1.9 million, respectively, in foreign financial institutions.

The financial positions and results of operations of the Company's foreign affiliates are based on the local currency as the functional currency and translated to U.S. dollars for financial reporting purposes. Assets and liabilities of the affiliates are translated at the exchange rate in effect at year-end. Income statement accounts are translated at the average rate of exchange prevailing during the year. Translation adjustments arising from the use of differing exchange rates from period to period are included in accumulated other comprehensive income in stockholders' equity. Gains and losses resulting from foreign currency transactions included in operations are not material for any of the periods presented.

Deferred Rent

The Company recognizes rent expense on a straight-line basis over the term of each lease. Lease incentives or abatements received at or near the inception of leases are accrued and amortized ratably over the life of the lease.

Fair Value of Financial Instruments

We believe the carrying values of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, and other current liabilities approximate their estimated fair values at December 31, 2010, due to their short maturities. We believe the carrying value of our lines of credit payable approximate the estimated fair value for debt with similar terms, interest rates, and remaining maturities currently available to companies with similar credit ratings at December 31, 2010.

Income Taxes

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement carrying amounts of existing assets and liabilities and their

Table of Contents

respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The Company evaluates its ability to benefit from all deferred tax assets and establishes valuation allowances for amounts it believes are not more likely than not to be realizable. For uncertain tax positions, the Company uses a more likely than not recognition threshold based on the technical merits of the income tax position taken. Income tax positions that meet the more likely than not recognition threshold are measured in order to determine the tax benefit recognized in the financial statements.

Treasury Shares

Treasury shares are accounted for under the cost method.

Segment

The Company has concluded that it operates in one segment based upon the information used by its chief operating decision maker in evaluating the performance of its business and allocating resources. This single segment represents the Company's core business, professional services primarily for government clients. Although the Company describes multiple service offerings to three markets to provide a better understanding of the Company's business operations, the Company does not manage its business or allocate resources based upon those service offerings or markets.

Risks and Uncertainties

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents and contract receivables. The majority of the Company's cash transactions are processed through one U.S. commercial bank. Cash in excess of daily requirements is used to reduce any amounts outstanding under the Company's Credit Facility or invested in overnight investment sweeps. To date, the Company has not incurred losses related to cash and cash equivalents.

The Company's contract receivables consist principally of contract receivables from agencies and departments of, as well as from prime contractors to, the U.S. government, other governments, and commercial organizations. The Company extends credit in the normal course of operations and does not require collateral from its clients.

The Company has historically been, and continues to be, heavily dependent upon contracts with the U.S. government and is subject to audit by audit agencies of the government. Such audits determine, among other things, whether an adjustment of invoices rendered to the government is appropriate under the underlying terms of the contracts. Management does not expect any significant adjustments, as a result of government audits, that will adversely affect the Company's financial position.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and contingent liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

Recent Accounting Pronouncements

ASU 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. In June 2009, the Financial Accounting Standards Board (FASB), issued amended guidance on the accounting and disclosure requirements for variable interest entities (VIEs). The

Table of Contents

amendment requires an entity to qualitatively, rather than quantitatively, assess the determination of the primary beneficiary of a VIE. This determination, among other things, should be based upon whether the entity has the ability to direct the activities that most significantly impact the economic performance of the VIE. This amendment became effective on January 1, 2010 for the Company. The adoption did not have a material impact on the Company's financial condition and results of operations.

The following accounting standards have been issued, but were not yet effective as of December 31, 2010, and thus have yet to be adopted by the Company.

ASU 2009-13, Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements. In October 2009, the FASB revised the accounting guidance pertaining to revenue arrangements with multiple deliverables. Prior to this guidance, in order for deliverables within an arrangement to be separated, the items must have stand-alone value as defined by the statement and there must be objective and reliable evidence of fair value for all elements or at a minimum the undelivered elements within the arrangement. Objective and reliable evidence of fair value meant there was vendor-specific-objective-evidence (VSOE) of fair value, which consisted of the price charged when the deliverable was sold separately or a price established by management with the authority to establish the price for the item before it was to be sold separately. If VSOE did not exist, third-party evidence was also acceptable. The new standard allows for the use of an estimated management selling price to determine the value of deliverables within an arrangement when VSOE or third-party evidence does not exist. The new guidance also eliminates the use of the residual method of allocation allowed in the previous guidance. The Company has multiple-deliverable arrangements. The guidance will be effective for the Company beginning January 1, 2011. At this time, the Company is assessing the impact of this revised guidance. The Company does not believe that this new guidance will have a material impact on its financial condition and results of operations.

ASU 2009-14, Software (Topic 985): Certain Revenue Arrangements That Include Software Elements. In October 2009, the FASB also revised the guidance related to software revenue and multiple-element arrangements with software components. The new guidance related to software revenue recognition excludes arrangements with tangible products containing software and non-software components that function together to deliver a product's essential functionality. Prior to the new guidance, VSOE of fair value was required for the undelivered elements in the arrangement in order for the Company to account for the elements separately. However, as a result of the new guidance noted above with respect to multiple-deliverable arrangements and the guidance related to software revenue recognition, VSOE may not be required if another topic of the accounting standards codification provides guidance on how to allocate the consideration for contract deliverables. Thus, if there are software and non-software components within the same contract and the software components fall within the scope of the *Software Elements* topic of the code, but that topic addresses solely separation and not allocation, one can now refer back to the *Multiple Deliverables* topic of the codification for guidance on consideration allocation. The *Multiple Deliverables* guidance allows consideration to be allocated based upon a relative fair value basis using the entity's best estimate of fair value, which is no longer limited to VSOE or third-party evidence, but may entail management's best estimate of selling price. The guidance will be effective for the Company beginning January 1, 2011. At this time, the Company is assessing the impact of this revised guidance. The Company does not believe that this new guidance will have a material impact on its financial condition and results of operations.

Table of Contents**NOTE C CONTRACT RECEIVABLES**

Contract receivables consisted of the following at December 31:

	2010	2009
Billed	\$ 126,448	\$ 141,269
Unbilled	49,102	32,893
Retainages	2,331	1,965
Other	1,004	326
Allowance for doubtful accounts	(1,922)	(2,333)
Contract receivables, net	\$ 176,963	\$ 174,120

Contract receivables, net of the established allowance, are stated at amounts expected to be realized in future periods. Unbilled receivables result from revenue that has been earned in advance of billing. Unbilled receivables can be invoiced at contractually defined intervals or milestones, as well as upon completion of the contract or government audits. The Company anticipates that the majority of unbilled receivables will be substantially billed and collected within one year, and therefore, classifies them as current assets in accordance with industry practice.

The allowance for doubtful accounts is determined based upon management's best estimate of potentially uncollectible contract receivables. The factors that influence management's estimate include historical experience and management's expectations of future losses on a contract-by-contract basis. The Company writes off contract receivables when such amounts are determined to be uncollectible. Losses have historically been within management's expectations.

NOTE D PROPERTY AND EQUIPMENT

Property and equipment consisted of the following at December 31:

	2010	2009
Leasehold improvements	\$ 8,003	\$ 8,425
Software	19,430	17,369
Furniture and equipment	7,991	6,558
Computers	15,707	13,987
	51,131	46,339
Accumulated depreciation and amortization	(32,244)	(23,739)
	\$ 18,887	\$ 22,600

Depreciation expense for property and equipment for the years ended December 31, 2010, 2009, and 2008, was approximately \$10.3 million, \$9.0 million, and \$5.1 million, respectively.

Table of Contents**NOTE E GOODWILL AND OTHER INTANGIBLE ASSETS*****Goodwill***

The changes in the carrying amount of goodwill for the fiscal years ended December 31 were as follows:

	2010	2009
Balance as of January 1	\$ 323,467	\$ 198,724
Goodwill resulting from the Macro acquisition		104,126
Goodwill and adjustments resulting from the Jacob & Sundstrom acquisition		21,572
Goodwill and adjustments resulting from the Jones & Stokes acquisition		(1,929)
Goodwill and adjustments resulting from the other prior acquisitions		974
Balance as of December 31	\$ 323,467	\$ 323,467

Jacob & Sundstrom, Inc.

Effective December 10, 2009, the Company acquired all of the outstanding common stock of Jacob & Sundstrom, Inc. (JASI), an information technology firm specializing in providing cybersecurity and identity management services to U.S. federal civilian and defense agencies. With the acquisition, the Company is able to offer an expanded range of advisory and implementation solutions across our federal and energy industry client base to assist in mitigating emerging cybersecurity threats and vulnerabilities.

The aggregate purchase price of approximately \$32.2 million in cash, including a working capital adjustment required by the stock purchase agreement, was funded by our Credit Facility. The Company engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The purchase price allocation was finalized during the second quarter of 2010. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$29.0 million. The Company allocated approximately \$21.6 million to goodwill and \$7.4 million to other intangible assets. The intangible assets consist of approximately \$7.0 million of customer-related intangibles that are being amortized over seven years and \$0.4 million of marketing-related intangibles that are being amortized over two years. JASI was purchased under the election provisions of Internal Revenue Code Section 338(h)(10) and, therefore, goodwill and the amortization of intangibles are deductible for tax purposes over a fifteen-year period and will generate deferred taxes. The results of operations for JASI are included in the Company's statement of earnings since December 10, 2009.

The Company incurred approximately \$0.4 million of transaction expenses related to the acquisition. The expenses were recorded on the statement of earnings as indirect and selling expenses.

Macro International Inc.

Effective March 31, 2009, the Company acquired all of the outstanding common shares of Macro International Inc. (Macro). Macro provides research and evaluation, management consulting, marketing communications, and information services to key agencies of the federal government. Macro is recognized for its expertise in research, evaluation, consulting, and implementation services, particularly in federal health programs, covering a wide range of health issues in the U.S. and internationally. In addition to its health-related expertise, Macro has strong credentials in housing, labor, and veterans affairs issues. The Company undertook

Table of Contents

the acquisition to expand its health-related and large project implementation capabilities across key federal markets, to add service offerings and clients in one of its largest markets, and to provide significant growth potential and cross-selling opportunities.

The aggregate purchase price of approximately \$157.6 million in cash, including the working capital adjustment required by the stock purchase agreement, was funded by the Company's Credit Facility. The Company engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$129.5 million. The Company has allocated approximately \$104.1 million to goodwill and \$25.4 million to other intangible assets. The intangible assets consist of approximately \$24.6 million of customer-related intangibles that are being amortized over seven years, and \$0.8 million of marketing-related intangibles that were amortized over nine months. Macro was purchased under the election provisions of Internal Revenue Code Section 338(h)(10), and, therefore, goodwill and the amortization of intangibles are deductible for tax purposes over a fifteen-year period and will generate deferred taxes. The results of operations for Macro are included in the Company's statement of earnings for periods beginning after March 31, 2009.

The Company incurred approximately \$1.0 million of transaction expenses in the first quarter of 2009 related to the acquisition. The expenses were recorded on the statement of earnings as indirect and selling expenses. In addition, the Company incurred \$0.6 million in debt issuance costs related to the acquisition. The debt issuance costs were recorded as other assets and will be amortized over the remaining life of the Credit Facility.

Jones & Stokes Associates, Inc.

In February 2008, the Company acquired 100 percent of the outstanding common stock of Jones & Stokes Associates, Inc. (Jones & Stokes), a privately held firm that provides integrated planning and resource management services, specializing in the transportation, energy, water, and natural resource management sectors. Jones & Stokes supports a broad mix of commercial and federal, state, and local government clients on projects to plan and implement infrastructure improvements and mandated government programs. The Company undertook the acquisition to expand its environmental and large project implementation capabilities across such strategic growth areas as transportation and infrastructure, energy, climate change, and water resources. The Company also undertook the acquisition to expand its presence in the western U.S. markets, where natural resource issues are a growing concern and where Jones & Stokes has outstanding market presence.

The aggregate purchase price was approximately \$50.4 million, including \$49.0 million of cash and \$1.4 million of transaction expenses. The Company engaged an independent valuation firm to assist management in the allocation of the purchase price to goodwill and to other acquired intangible assets. The excess of the purchase price over the estimated fair value of the net tangible assets acquired was approximately \$46 million. The Company allocated approximately \$41.0 million to goodwill and \$5.0 million to other intangible assets. The intangible assets consist of customer-related intangibles and marketing-related intangibles in the amounts of approximately \$2.9 million and \$2.1 million, respectively. The customer-related intangibles and marketing-related intangibles are being amortized over seven years and two years, respectively. Neither the goodwill nor the acquired intangibles are deductible for tax purposes. The results of operations for Jones & Stokes have been included in the Company's statement of earnings since February 13, 2008.

Other Intangible Assets

Intangible assets are primarily amortized over periods ranging from approximately 1 to 8 years. The weighted-average period of amortization for all intangible assets as of December 31, 2010, is 7.3 years. The customer-related intangible assets, which consist of customer contracts, backlog, and non-contractual customer relationships, related to the acquisitions are being amortized based on estimated cash flows and respective

Table of Contents

estimated economic benefit of the assets. The weighted-average period of amortization of the customer-related intangibles is 7.5 years. Intangible assets related to acquired developed technology and marketing trade name obtained in connection with business combinations are being amortized on a straight-line or accelerated basis over their weighted-average periods of amortization of 5.8 years, and 2.1 years, respectively.

Other intangibles consisted of the following at December 31:

	2010	2009
Customer-related intangibles	\$ 41,396	\$ 50,396
Developed technology	2,352	3,339
Marketing trade name	420	420
	44,168	54,155
Less: accumulated amortization	(18,020)	(15,681)
	\$ 26,148	\$ 38,474

Aggregate amortization expense for the years ended December 31, 2010, 2009, and 2008, was approximately \$12.3 million, \$11.1 million, and \$8.7 million, respectively. The estimated future amortization expense relating to intangible assets is as follows:

Year ending December 31,	
2011	\$ 9,328
2012	7,622
2013	5,201
2014	2,436
2015	968
Thereafter	593
	\$ 26,148

Capitalized Software

Capitalized software development costs of \$1.5 million and \$1.1 million are included in other assets for the years ended December 31, 2010 and 2009, respectively. These costs are for enhancements and upgrades to software used in our project management services.

NOTE F ACCRUED SALARIES AND BENEFITS

Accrued salaries and benefits consisted of the following at December 31:

	2010	2009
Accrued bonuses and commissions	\$ 10,656	\$ 8,830
Accrued vacation	12,368	11,486
Accrued salaries	13,569	10,335
Accrued medical	2,027	1,294

Table of Contents**NOTE G ACCRUED EXPENSES**

Accrued expenses consisted of the following at December 31:

	2010	2009
Accrued subcontractor costs	\$ 12,985	\$ 9,663
Deposits	5,402	3,602
Accrued insurance premiums	1,125	880
Accrued professional services	584	965
Accrued rent	335	1,104
Accrued software licensing costs	2,437	2,265
Accrued taxes	461	488
Other accrued expenses	2,193	2,113
	\$ 25,522	\$ 21,080

NOTE H LONG-TERM DEBT

The Company entered into its Credit Facility on February 20, 2008, with a syndication of nine commercial banks to allow for borrowings of up to \$350.0 million for a period of five years (maturing February 20, 2013) under a revolving line of credit. The Credit Facility provides for borrowings of up to \$275.0 million without a borrowing base requirement and also provides for an accordion feature, which permits additional revolving credit commitments of up to \$75.0 million, subject to lenders' approval. The Credit Facility provides for pre-approval by the lenders for acquisitions with individual purchase prices of up to \$75.0 million, if certain conditions are met. The Credit Facility is collateralized by substantially all of the assets of the Company, and requires that the Company remain in compliance with certain financial and non-financial covenants. The financial covenants, as defined by the Credit Facility, require that the Company maintain, on a consolidated basis for each quarter, a Fixed Charge Coverage Ratio of not less than 1.25 to 1.00 and a Leverage Ratio of not more than 3.50 to 1.00. As of December 31, 2010, the Company was in compliance with the covenants under the Credit Facility.

On March 31, 2009, the Credit Facility was amended to allow for the acquisition of Macro, for permission to sell capital stock in one or more offerings (provided that the proceeds are used to pay down the Credit Facility), and to increase the interest rate margins the Company pays to borrow funds under the Credit Facility. The Company has the ability to borrow funds under its Credit Facility at interest rates based on both LIBOR and prime rates, at its discretion, plus their applicable margins. Interest rates on debt outstanding ranged from 2.13% to 2.50% in 2010.

The Company's debt issuance costs are amortized over the term of indebtedness. Amortizable debt issuance costs were \$2.6 million, as of both December 31, 2010 and 2009. Accumulated amortization related to debt issuance costs was \$1.5 million and \$1.0 million, as of December 31, 2010 and 2009, respectively. Amortization expense of \$0.5 million, \$0.4 million, and \$0.3 million was recorded for the years ended December 31, 2010, 2009, and 2008, respectively.

Table of Contents

Long-term debt consisted of the following at December 31:

	2010	2009
Revolving Line of Credit/Swing Line provides for borrowings up to \$275 million and matures in February 2013. Outstanding borrowings bear daily interest at a base rate (based on the U.S. Prime Rate, which was 3.25% at December 31, 2010, and 3.25% at December 31, 2009, plus a spread) or LIBOR (1, 3, or 6 month rates) plus a spread, payable monthly	\$ 85,000	\$ 145,000

Letters of Credit

At December 31, 2010 and 2009, the Company had outstanding letters of credit totaling approximately \$1.3 million. These letters of credit are renewed annually.

NOTE I INCOME TAXES

Income tax expense consisted of the following at December 31:

	2010	2009	2008
Current:

Foreign tax credits	62	55
Other	650	692
Total current deferred tax asset	9,646	5,069
Non-current:		
Foreign net operating loss carryforward (NOL)	148	108
Stock option compensation	1,827	983
Deferred rent	1,028	855
Deferred compensation	668	434
Foreign tax credits	591	387
Other	1,241	794
Total non-current deferred tax assets	5,503	3,561
Total Deferred Tax Assets	15,149	8,630
Deferred Tax Liabilities		
Current:		
Retention	(704)	(746)
Section 481(a) adjustment	(1,934)	(1,733)
Prepays	(936)	(791)
Payroll taxes	(454)	(462)
Amortization	(645)	
Total current deferred liability	(4,673)	(3,732)
Non-current:		
Depreciation	(2,438)	(2,388)
Amortization	(11,160)	(11,161)
Section 481(a) adjustment	(1,347)	(1,261)
Other	(626)	(407)
Total non-current deferred tax liabilities	(15,571)	(15,217)
Total Deferred Tax Liabilities	(20,244)	(18,949)
Total Net Deferred Tax Liability	\$ (5,095)	\$ (10,319)

The need to establish valuation allowances for deferred assets is based on a more-likely-than-not threshold that the benefit of such assets will be realized in future periods. Appropriate consideration is given to all available evidence, including historical operating results, projections of taxable income, and tax planning alternatives. During 2009, the Company determined it was more likely than not that the deferred tax assets of the Company's Brazilian and Russian operations would be realized. Therefore, the Company released the valuation allowance against these deferred assets of \$0.1 million.

Effective January 1, 2009, the Company has made no provisions for deferred U.S. income taxes or additional foreign taxes on any unremitted earnings of our controlled foreign subsidiaries because the Company considers these earnings to be permanently invested. If these earnings were

Edgar Filing: ICF International, Inc. - Form 10-K

repatriated, in the form of dividends or otherwise, the Company would be subject to U.S. income tax on these earnings. Determination of the amount

F-19

Table of Contents

of unrecognized deferred U.S. income tax liability is not practicable due to the complexities associated with this hypothetical calculation; however, unrecognized foreign tax credit carry forwards would be available to reduce some portion of the U.S. tax liability. The Company has \$0.5 million of foreign tax credits available for carry forward related to deemed dividend inclusions from its controlled foreign corporations, as well as its foreign branch operations as of December 31, 2010.

On January 1, 2007, the Company adopted the provisions of accounting for uncertainty in income taxes. The total amount of unrecognized tax benefits as of December 31, 2010, and December 31, 2009, was \$0.9 million and \$1.3 million, respectively. Included in the balance at December 31, 2010, and December 31, 2009, were \$0.5 million and \$0.8 million, respectively, of tax positions that, if recognized, would impact the effective tax rate.

The Company does not anticipate a significant increase or decrease to the total unrecognized tax benefit during 2010. Our 2006 through 2010 tax years remain subject to examination by the Internal Revenue Service for U.S. federal tax purposes.

The unrecognized tax benefit reconciliation, excluding penalty and interest, is as follows:

Unrecognized tax benefits at January 1, 2008	2,223
Increase attributable to tax positions taken during a prior period	74
Decrease attributable to tax positions taken during a prior period	(160)
Increase attributable to tax positions taken during the current period	170
Decrease attributable to settlements with taxing authorities	(908)
Decrease attributable to lapse of statute of limitations	(159)
Unrecognized tax benefits at December 31, 2008	1,240
Increase attributable to tax positions taken during the prior period	92
Increase attributable to tax positions taken during the current period	361
Decrease attributable to settlements with taxing authorities	(168)
Decrease attributable to lapse of statute of limitations	(211)
Unrecognized tax benefits at December 31, 2009	1,314
Decrease attributable to tax positions taken during a prior period	(15)
Increase attributable to tax positions taken during the current period	147
Decrease attributable to settlements with taxing authorities	(83)
Decrease attributable to lapse of statute of limitations	(419)
Unrecognized tax benefits at December 31, 2010	944

During 2008 and 2009, we filed federal, state, and foreign tax returns for prior years related to one of our 2007 acquisitions. The effect of these returns was to reduce our unrecognized tax benefits by a total of \$1.1 million and for us to pay total net tax of \$0.4 million.

Our policy is to not recognize accrued interest and penalties related to unrecognized tax benefits as a component of tax expense. The Company had approximately \$0.4 million of accrued penalty and interest at December 31, 2009. During 2010, there was less than a \$0.1 million change, which was adjusted through the penalty and interest expense and reflected in indirect and selling expenses and interest expense, respectively. The Company had approximately \$0.4 million of accrued penalty and interest at December 31, 2010.

Table of Contents

The Company's provision for income taxes differs from the anticipated United States federal statutory rate. Approximate differences between the statutory rate and the Company's provision are as follows:

	2010	2009	2008
Taxes at statutory rate	35.0%	35.0%	35.0%
State taxes, net of federal benefit	4.6%	4.6%	4.6%
Foreign tax rate differential and U.S. unrepatriated earnings	(0.1)%	(0.6)%	1.0%
Other permanent differences	0.8%	1.6%	1.4%
Change in valuation allowance		(0.4)%	(0.6)%
Prior year tax adjustments and changes in unrecognized tax benefits	(1.3)%	(3.4)%	0.8%
Tax credits	(1.2)%	(0.7)%	(0.3)%
	37.8%	36.1%	41.9%

NOTE J ACCOUNTING FOR STOCK-BASED COMPENSATION

Stock Incentive Plans

On June 4, 2010, the Company's stockholders ratified the ICF International, Inc. 2010 Omnibus Incentive Plan (the "Omnibus Plan"), which was adopted by the Company on March 8, 2010. The Omnibus Plan replaced the 2006 Long-Term Equity Incentive Plan (the "2006 Plan"), which the Company had used for equity and incentive awards since becoming a publicly traded company in 2006. The Omnibus Plan provides for the granting of options, stock appreciation rights, restricted stock, restricted stock units (RSUs), performance shares, performance units, cash-based awards, and other stock-based awards to all officers, key employees of the Company, and non-employee directors. The Omnibus Plan, upon adoption by the Company on March 8, 2010, allowed for the Company to grant an additional 1.8 million shares in addition to the remaining shares from the 2006 Plan, for a total of approximately 2.7 million shares. Shares awarded that are not stock options or stock appreciation rights are counted as 1.9 shares deducted from the Omnibus Plan for every one share delivered under those awards. Shares awarded that are stock options or stock appreciation rights are counted as a single share deducted from the Omnibus Plan for every one share delivered under those awards. As of December 31, 2010, the Company had 2.7 million shares available to grant under the Omnibus Plan.

Total compensation expense relating to stock-based compensation amounted to approximately \$7.5 million, \$7.2 million, and \$6.5 million for the years ended December 31, 2010, 2009, and 2008, respectively.

As of December 31, 2010, the total unrecognized compensation expense related to non-vested stock awards totaled approximately \$14.3 million. These amounts are expected to be recognized over a weighted-average period of 2.8 years.

The assumptions of post-vesting employment termination forfeiture rates used in the determination of fair value of stock awards issued during calendar year 2010 were based on the Company's historical ten-year average. The expected annualized forfeiture rates used varied from 2.1 percent to 6.5 percent, and the Company does not expect these termination rates to vary significantly in the future.

Stock Options

Option awards are granted with an exercise price equal to the fair value of the Company's common stock on the date of grant. All options outstanding as of December 31, 2010, have a 10-year contractual term. The Company expenses the value of these option grants over the requisite service period, generally, the vesting period. The Company recorded approximately \$0.6 million of compensation expense related to stock options for the year ended December 31, 2010. The fair value of the options is estimated on the date of grant using the

Table of Contents

Black-Scholes-Merton pricing model. The fair value assumptions for awards in 2010 were, a range of 5.1 to 5.5 years for the expected life, a range of 45.0% to 45.7% for historical volatility, and a range of 2.27% to 2.60% for the risk-free rate. No options were granted during the years ended December 31, 2009, and December 31, 2008. At December 31, 2010, unrecognized expense related to stock options totaled approximately \$1.5 million, and these costs are expected to be recognized through 2013.

The following table summarizes changes in outstanding stock options:

	Shares	Weighted-Average Exercise Price
Outstanding at January 1, 2008	1,043,561	\$ 8.48
Exercised	(383,729)	\$ 5.54
Forfeited/Expired	(1,000)	\$ 5.00
Outstanding at December 31, 2008	658,832	\$ 10.19
Exercised	(336,956)	\$ 8.40
Forfeited/Expired	(8,903)	\$ 9.98
Outstanding at December 31, 2009	312,973	\$ 12.12
Exercised	(110,237)	\$ 8.76
Granted	196,133	\$ 24.44
Forfeited/Expired	(6,500)	\$ 6.16
Outstanding at December 31, 2010	392,369	\$ 19.32
Vested plus expected to vest at December 31, 2010	387,280	\$ 19.32
Exercisable at December 31, 2010	196,236	\$ 14.20

The aggregate intrinsic value of the options outstanding in the preceding table was approximately \$2.5 million and represents the total pre-tax intrinsic value of in-the-money options based on the Company's closing stock price of \$25.72 as of December 31, 2010, which would have been received by the option holders had all option holders exercised their options as of that date. The aggregate intrinsic value of options exercisable was approximately \$2.3 million. The intrinsic value of options vested and expected to vest was approximately \$2.5 million, and the intrinsic value of options exercised during the year ended December 31, 2010 was approximately \$1.7 million. As of December 31, 2010, the weighted-average remaining contractual term for options vested and expected to vest was 7.1 years, and 5.0 years for exercisable options.

Information regarding stock options outstanding as of the dates indicated is summarized below:

Range of Exercise Prices	OPTIONS OUTSTANDING			OPTIONS EXERCISABLE	
	Number Outstanding As of 12/31/10	Weighted Average Remaining Contractual Term	Weighted Average Exercise Price	Number Exercisable As of 12/31/10	Weighted Average Exercise Price

Restricted Stock Awards

Edgar Filing: ICF International, Inc. - Form 10-K

Pursuant to the Omnibus Plan, the Company issued 20,002 shares of restricted stock to its directors in the year ended December 31, 2010. The average grant date fair value of these restricted stock awards was \$24.38.

F-22

Table of Contents

Compensation expense related to restricted stock awards computed under the fair value method for the year ended December 31, 2010, was approximately \$0.6 million. Unrecognized expense related to restricted stock awards totaled less than \$0.1 million, and is expected to be recognized over a weighted-average period of 0.2 years.

A summary of the Company's restricted stock awards is presented below.

	Number of Shares	Weighted- Average Grant Date Fair Value	Aggregate Intrinsic Value (in thousands)
Non-vested restricted stock awards at January 1, 2008	92,665	\$ 12.00	\$ 2,483
Granted	22,967	\$ 19.85	\$ 616
Vested	57,607	\$ 13.50	\$ (1,544)
Cancelled		\$	\$
Non-vested restricted stock awards at December 31, 2008	58,025	\$ 13.62	\$ 1,555
Granted	7,615	\$ 25.99	\$ 204
Vested	(54,346)	\$ 14.54	\$ (1,456)
Cancelled	(4,500)	\$ 12.00	\$ (121)
Non-vested restricted stock awards at December 31, 2009	6,794	\$ 21.20	\$ 182
Granted	20,002	\$ 24.38	\$ 514
Vested	(23,400)	\$ 23.92	\$ (601)
Cancelled		\$	\$
Non-vested restricted stock awards at December 31, 2010	3,396	\$ 21.19	\$ 87

The aggregate intrinsic value in the preceding table is based on the Company's closing stock price of \$25.72 as of December 31, 2010.

Restricted Stock Units

During the year ended December 31, 2010, the Company awarded 423,092 restricted stock units to employees that vest over four years. Upon vesting, the employee is issued one share of stock for each restricted stock unit he or she holds. Restricted stock units were valued based on the grant date value of a share of common stock and are expensed on a straight-line basis over the vesting period of the award. The weighted-average grant date fair value of restricted stock units granted during the year ended December 31, 2010 was \$24.90.

Compensation expense related to restricted stock units computed under the fair value method for the year ended December 31, 2010, was approximately \$6.3 million.

At December 31, 2010, unrecognized expense related to restricted stock units totaled approximately \$12.8 million. These costs are expected to be recognized over a weighted-average period of 3.2 years. The aggregate intrinsic value of restricted stock units at December 31, 2010 that are expected to vest was approximately \$16.8 million.

Table of Contents

A summary of the Company's restricted stock units is presented below.

	Number of Shares	Weighted- Average Grant Date Fair Value	Aggregate Intrinsic Value (in thousands)
Non-vested restricted stock units at January 1, 2008	889,165	\$ 19.02	\$ 23,830
Granted	47,257	\$ 21.10	\$ 1,266
Vested	(267,835)	\$ 18.97	\$ (7,178)
Cancelled	(44,916)	\$ 19.49	\$ (1,204)
Non-vested restricted stock units at December 31, 2008	623,671	\$ 19.16	\$ 16,714
Granted	306,883	\$ 25.78	\$ 8,244
Vested	(409,084)	\$ 28.33	\$ (10,963)
Cancelled	(35,453)	\$ 21.13	\$ (950)
Non-vested restricted stock units at December 31, 2009	486,017	\$ 15.48	\$ 13,025
Granted	423,092	\$ 24.90	\$ 10,882
Vested	(206,400)	\$ 24.62	\$ (5,298)
Cancelled	(50,385)	\$ 25.64	\$ (1,296)
Non-vested restricted stock units at December 31, 2010	653,324	\$ 25.05	\$ 16,803
Restricted stock units expected to vest in the future	632,086	\$ 25.05	\$ 16,275

The aggregate intrinsic value in the preceding table is based on the Company's closing stock price of \$25.72 as of December 31, 2010.

Employee Stock Purchase Plan

The Company has a 2006 Employee Stock Purchase Plan (ESPP). The ESPP allows eligible employees to purchase shares of the Company's stock at a discount not to exceed 5% of the market value on the date of purchase. The Company does not recognize compensation expense related to the ESPP.

NOTE K EARNINGS PER SHARE

Earnings Per Share

Basic earnings per share (EPS) is computed by dividing reported net income by the weighted-average number of shares outstanding. Diluted EPS considers the potential dilution that could occur if common stock equivalents were exercised or converted into stock. The difference between the basic and diluted weighted-average equivalent shares with respect to the Company's EPS calculation is due entirely to the assumed exercise of stock options and the vesting of restricted stock and restricted stock units. The effect of 541 restricted stock units had no impact upon the year ended December 31, 2010 because they were anti-dilutive to EPS. The dilutive effect of stock options and awards for each period reported is summarized below:

	2010	2009 (in thousands)	2008
Basic weighted-average shares outstanding	19,375	15,433	14,641
Effect of potential exercise of stock options and unvested restricted stock and restricted stock units	251	481	629

Edgar Filing: ICF International, Inc. - Form 10-K

---	--------	--------	--------

F-24

Table of Contents**NOTE L SECONDARY OFFERING**

On December 16, 2009, the Company sold 3,565,000 shares of its common stock at \$24.56 per share in conjunction with a secondary public offering, which included 465,000 shares sold following exercise by the underwriters of their over-allotment option to purchase additional shares. The \$83.3 million of proceeds (net of underwriting fees and expenses) from the sale of stock was applied to repayment of outstanding borrowings incurred under the Company's Credit Facility.

NOTE M COMMITMENTS AND CONTINGENCIES***Litigation and Claims***

We are involved in numerous legal matters and proceedings arising in the ordinary course of business. While these matters and proceedings cause us to incur costs, including, but not limited to, attorneys' fees, we currently believe that any ultimate liability arising out of these matters and proceedings will not have a material adverse effect on our financial position, results of operations, or cash flows.

Operating Leases

On March 8, 2010, the Company entered into a new lease that replaced its prior headquarters lease, which was due to expire in October 2012. The new lease is initially for 201,707 square feet, with 57,025 square feet of additional space to be subsequently added. The lease commenced on April 1, 2010, and will expire on December 31, 2022. Base rent under the agreement is approximately \$0.5 million per month with annual escalations fixed at 2.5% per year, yielding a total lease commitment of approximately \$89.3 million over the twelve-year term of the lease. The Company did not incur any early termination penalties for the termination of the original lease.

The Company has entered into various other operating leases for equipment and office space. Certain facility leases may contain fixed escalation clauses, certain facility leases require that the Company pay operating expenses in addition to base rental amounts, and five leases require the Company to maintain letters of credit. Rent expense is recognized on a straight-line basis over the lease term. Rent expense and sub-lease income for operating leases was approximately \$31.2 million and \$0.3 million, respectively, for 2010, approximately \$29.5 million and \$0.9 million, respectively, for 2009, and approximately \$21.2 million and \$0.4 million, respectively, for 2008.

Future minimum rental payments under all non-cancelable operating leases are as follows:

Year ending December 31,	
2011	\$ 27,331
2012	24,519
2013	20,179
2014	15,094
2015	13,853
Thereafter	90,470
	\$ 191,446
Less: Sublease Income	(280)
	\$ 191,166

Table of Contents

Long-Term Agreements

The Company entered into an amended and restated employment agreement with Chief Executive Officer Sudhakar Kesavan as of the effective date of the initial public offering, which was subsequently amended on December 29, 2008, to bring it into compliance with Section 409A of the Internal Revenue Code. Mr. Kesavan may terminate this agreement by giving 45 days prior written notice to the Company, and the Company may terminate this agreement either without cause upon 30 days prior written notice or at any time for cause upon written notice. Absent a change in control, if he is involuntarily terminated without cause or resigns for good reason, as defined in the agreement, he will be paid all accrued salary, a severance payment equal to two times his base salary payable in 24 equal monthly installments, and bonus and other incentive compensation prorated through his termination date and payable pursuant to its regular payment schedule. Additionally, the vesting of his unvested options, if any, on his termination date will be accelerated in connection with such a termination and exercisable for the balance of their term(s).

The Company has entered into severance protection agreements with Messrs. Kesavan, Wasson (Chief Operating Officer and President) and Vargo (Chief Financial Officer and Executive Vice President), allowing them to receive certain payments and benefits if they are terminated without cause or resign for good reason within 24 months following a change in control. In the event of such termination, the executive will receive, among other payments and benefits, (i) his base salary earned through the date of termination and pro rata bonus for the year of termination and (ii) a lump-sum payment equal to three times the executive's average annual taxable W-2 compensation during the three years prior to termination subject to reduction after taking into account the excise tax under Section 4999 of the Internal Revenue Code to maximize the net amount after taxes (with certain assumptions for Mr. Vargo in the event he is terminated before he has been with the Company for three years, given his recent employment).

The Company has also entered into other severance arrangements with Messrs. Wasson and Vargo pursuant to a separate severance letter agreement with Mr. Wasson and within Mr. Vargo's same severance protection agreement, entitling such officers to certain payments in the event of termination of employment by the Company other than for cause. In the event of termination under such circumstances, the executives would be entitled to (i) continuation of their base salary for 12 months and (ii) an amount equal to the average annual bonus paid to the executive over the three years prior to his termination (with certain assumptions for Mr. Vargo in the event he is terminated before he has been with the Company for three years, given his recent employment).

NOTE N EMPLOYEE BENEFIT PLANS

Retirement Savings Plan

Effective June 30, 1999, the Company established the ICF Consulting Group Retirement Savings Plan (the Retirement Savings Plan). The Retirement Savings Plan is a defined contribution profit sharing plan with a cash or deferred arrangement under Section 401(k) of the Internal Revenue Code.

Participants in the Retirement Savings Plan are able to elect to defer up to 70 percent of their compensation subject to statutory limitations, and were entitled to receive 100% employer matching contributions for the first 3% and 50% for the next 2% of their compensation. Contribution expense related to the Retirement Savings Plan for the years ended December 31, 2010, 2009, and 2008, was approximately \$9.1 million, \$7.7 million, and \$5.7 million, respectively.

Deferred Compensation Plan

Certain key employees of the Company are eligible to defer a specified percentage of their cash compensation by having it contributed to a nonqualified deferred compensation plan. Eligible employees may elect to defer up to 80% of their base salary and up to 100% of performance bonuses, reduced by any amounts

Table of Contents

withheld for the payment of taxes or other deductions required by law. Participants are at all times 100% vested in their account balances. The Company funds its deferred compensation liabilities by making cash contributions to a Rabbi Trust at the time the salary or bonus being deferred would otherwise be payable to the employee. Gains or losses on amounts held by the Rabbi Trust are fully allocable to plan participants. As a result, the plan has no net impact on the Company's results of operations and the liability to plan participants is fully funded at all times.

NOTE O SUBSEQUENT EVENT

In January 2011, the Company completed the acquisition of Marbek, a Canadian energy and environmental consulting firm. The acquisition was immaterial to the financial statements taken as a whole. The acquisition creates an integrated energy, climate, and environmental consultancy with a strong presence in Canada.
