Alcoa and subsidiaries

Notes to the Consolidated Financial Statements (unaudited)

(dollars in millions, except per-share amounts)

A. Basis of Presentation The interim Consolidated Financial Statements of Alcoa Inc. and its subsidiaries (Alcoa or the Company) are unaudited. These Consolidated Financial Statements include all adjustments, consisting of normal recurring adjustments, considered necessary by management to fairly state the Company's results of operations, financial position, and cash flows. The results reported in these Consolidated Financial Statements are not necessarily indicative of the results that may be expected for the entire year. The 2011 year-end balance sheet data was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP). This Form 10-Q report should be read in conjunction with Alcoa's Annual Report on Form 10-K for the year ended December 31, 2011, which includes all disclosures required by GAAP.

B. Recently Adopted and Recently Issued Accounting Guidance

Adopted

On January 1, 2012, Alcoa adopted changes issued by the Financial Accounting Standards Board (FASB) to conform existing guidance regarding fair value measurement and disclosure between GAAP and International Financial Reporting Standards. These changes both clarify the FASB's intent about the application of existing fair value measurement and disclosure requirements and amend certain principles or requirements for measuring fair value or for disclosing information about fair value measurements. The clarifying changes relate to the application of the highest and best use and valuation premise concepts, measuring the fair value of an instrument classified in a reporting entity's shareholders' equity, and disclosure of quantitative information about unobservable inputs used for Level 3 fair value measurements. The amendments relate to measuring the fair value of financial instruments that are managed within a portfolio; application of premiums and discounts in a fair value measurement; and additional disclosures concerning the valuation processes used and sensitivity of the fair value measurement to changes in unobservable inputs for those items categorized as Level 3, a reporting entity's use of a nonfinancial asset in a way that differs from the asset's highest and best use, and the categorization by level in the fair value hierarchy for items required to be measured at fair value for disclosure purposes only. Other than the additional disclosure requirements (see Note N), the adoption of these changes had no impact on the Consolidated Financial Statements.

On January 1, 2012, Alcoa adopted changes issued by the FASB to the presentation of comprehensive income. These changes give an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements; the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity was eliminated. The items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income were not changed. Additionally, no changes were made to the calculation and presentation of earnings per share. Management elected to present the two-statement option. Other than the change in presentation, the adoption of these changes had no impact on the Consolidated Financial Statements.

C. Restructuring and Other Charges In the second quarter and six-month period of 2012, Alcoa recorded Restructuring and other charges of \$15 (\$10 after-tax and noncontrolling interests) and \$25 (\$17 after-tax and noncontrolling interests), respectively.

Restructuring and other charges in the 2012 second quarter included \$9 (\$5 after-tax) for lease termination costs; \$6 (\$4 after-tax and noncontrolling interests) for the layoff of approximately 110 employees (25 in the Alumina segment, 10 in the Primary Metals segment, and 75 in Corporate); \$1 (\$1 after-tax) in other miscellaneous charges; and \$1 (less than \$1 after-tax) for the reversal of a number of small layoff reserves related to prior periods.

In the 2012 six-month period, Restructuring and other charges included \$17 (\$12 after-tax and noncontrolling interests) for the layoff of approximately 330 employees (160 in the Primary Metals segment, 70 in the Engineered Products and Solutions segment, 25 in the Alumina segment, and 75 in Corporate), including \$6 (\$4 after-tax) for the layoff of an additional 150 employees related to the previously reported smelter curtailments in Spain; \$9 (\$5 after-tax) for lease termination costs; \$2 (\$2 after-tax) in other miscellaneous charges; and \$3 (\$2 after-tax and noncontrolling interests) for the reversal of a number of small layoff reserves related to prior periods.

In the second quarter and six-month period of 2011, Alcoa recorded Restructuring and other charges of \$34 (\$16 after-tax and noncontrolling interests) and \$40 (\$21 after-tax and noncontrolling interests), respectively.

Restructuring and other charges in the 2011 second quarter included \$20 (\$8 after-tax and noncontrolling interests) for a litigation matter related to the former St. Croix location (see the Litigation section of Note G); \$8 (\$4 after-tax and noncontrolling interests) for the layoff of approximately 120 employees (70 in the Primary Metals segment, 30 in the Engineered Products and Solutions segment, and 20 in the Alumina segment); a \$6 (\$4 after-tax) charge for an adjustment to the fair value of the one remaining foil location classified as held for sale due to foreign currency movements (this business was removed from held for sale classification in the fourth quarter of 2011); a net charge of \$2 (\$2 after-tax) for other various items; and \$2 (\$2 after-tax) for the reversal of a number of small, previously recorded layoff reserves.

In the 2011 six-month period, Restructuring and other charges included the previously mentioned \$20 (\$8 after-tax and noncontrolling interests); \$13 (\$8 after-tax and noncontrolling interests) for the layoff of approximately 480 employees (350 in the Global Rolled Products segment, 70 in the Primary Metals segment, 30 in the Alumina segment, and 30 in the Engineered Products and Solutions segment); an \$8 (\$5 after-tax) charge for an adjustment to the fair value of the one remaining foil location classified as held for sale due to foreign currency movements (this business was removed from held for sale classification in the fourth quarter of 2011); a net charge of \$3 (\$3 after-tax) for other various items; and \$4 (\$3 after-tax) for the reversal of a number of small, previously recorded layoff reserves.

Alcoa does not include Restructuring and other charges in the results of its reportable segments. The pretax impact of allocating such charges to segment results would have been as follows:

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Alumina	\$ 1	\$ 25	\$ 1	\$ 26
Primary Metals	1		6	2
Global Rolled Products			1	2
Engineered Products and Solutions		3	3	3
Segment total	2	28	11	33
Corporate	13	6	14	7
Total restructuring and other charges	\$ 15	\$ 34	\$ 25	\$ 40

As of June 30, 2012, approximately 40 of the 330 employees associated with 2012 restructuring programs, approximately 535 of the 1,600 employees associated with 2011 restructuring programs, approximately 810 of the 875 employees associated with 2010 restructuring programs, and approximately 5,810 of the 6,000 employees associated with 2009 restructuring programs were separated. The remaining separations for a portion of the 2012 restructuring programs and all of the 2011, 2010, and 2009 restructuring programs are expected to be completed by the end of 2012.

In the 2012 second quarter and six-month period, cash payments of \$1 and \$3, respectively, were made against the layoff reserves related to the 2012 restructuring programs; \$6 and \$14, respectively, were made against the layoff reserves related to the 2011 restructuring programs; and less than \$1 and \$2, respectively, were made against the layoff reserves related to the 2010 restructuring programs.

Activity and reserve balances for restructuring charges were as follows:

	Layoff costs	Other exit costs	Total
Reserve balances at December 31, 2010	\$ 53	\$ 63	\$ 116
2011:			
Cash payments	(45)	(9)	(54)
Restructuring charges	93	37	130
Other*	(24)	(34)	(58)
Reserve balances at December 31, 2011	77	57	134
2012:			
Cash payments	(20)	(6)	(26)
Restructuring charges	17	2	19
Other*	(6)	(1)	(7)
Reserve balances at June 30, 2012	\$ 68	\$ 52	\$ 120

* Other includes reversals of previously recorded restructuring charges and the effects of foreign currency translation.

The remaining reserves are expected to be paid in cash during 2012, with the exception of approximately \$45 to \$50, which is expected to be paid over the next several years for lease termination costs, ongoing site remediation work, and special separation benefit payments.

D. Acquisitions and Divestitures In June 2012, Alcoa reached an agreement to sell its 351-megawatt Tapoco Hydroelectric Project (Tapoco) to Brookfield Renewable Energy Partners for \$600 in cash, subject to certain post-closing adjustments. Tapoco is a four-station hydroelectric project located on the Little Tennessee and Cheoah Rivers in eastern Tennessee and western North Carolina. The transaction, which is subject to customary federal and state regulatory approvals, will include four generating stations and dams, 86 miles of transmission line, and approximately 14,500 acres of land associated with and surrounding Tapoco. The power generated by Tapoco was primarily consumed by Alcoa's smelter in Tennessee, which was temporarily idled in 2009 and permanently shutdown in 2011. Since 2009, the power generated from Tapoco was sold into the open market. The net carrying value of the assets to be sold was \$169 and \$146 as of June 30, 2012 and December 31, 2011, respectively, which consist mostly of properties, plants, and equipment. These assets, along with an allocation of goodwill (\$94) from the Primary Metals reporting unit, were classified as held for sale (included in Other noncurrent assets) for all periods presented on the accompanying Consolidated Balance Sheet.

E. Inventories

	June 30, 2012	December 31, 2011
Finished goods	\$ 558	\$ 537
Work-in-process	987	911
Bauxite and alumina	673	656
Purchased raw materials	565	532
Operating supplies	268	263
	\$ 3,051	\$ 2,899

At June 30, 2012 and December 31, 2011, the total amount of inventories valued on a last in, first out (LIFO) basis was 35%. If valued on an average-cost basis, total inventories would have been \$772 and \$801 higher at June 30, 2012 and December 31, 2011, respectively.

Edgar Filing: ALCOA INC - Form 10-Q

F. Debt In January 2012, Alcoa repaid the \$322 in outstanding principal of its 6% Notes as scheduled using available cash on hand.

Also in January 2012, Alcoa entered into two term loan agreements, totaling \$350, with two separate financial institutions and a revolving credit agreement, providing a \$100 credit facility, with a third financial institution. In February 2012, Alcoa entered into another revolving credit agreement, providing a \$100 credit facility, with a fourth financial institution. In June 2012, Alcoa entered into a third revolving credit agreement, providing a \$150 credit facility, with a fifth institution. The purpose of any borrowings under all five arrangements will be to provide working capital and for other general corporate purposes, including contributions to Alcoa's pension plans (\$139 and \$352 was contributed in the 2012 second quarter and six-month period, respectively). The two term loans were fully drawn on the same dates as the agreements and are subject to an interest rate equivalent to the 1-month LIBOR (changed from the 3-month LIBOR in April 2012) plus a 1.5% margin. In February 2012, Alcoa borrowed the \$100 under the first credit facility. This borrowing is subject to an interest rate equivalent to the 6-month LIBOR plus a 1.25% margin. The two term loans mature in December 2012 (originally July 2012, extended in June 2012), the first two revolving credit facilities expire in December 2012, and the third revolving credit facility expires in March 2013. The

covenants contained in all five arrangements are the same as Alcoa's Five-Year Revolving Credit Agreement (see the Commercial Paper section of Note K to the Consolidated Financial Statements included in Alcoa's 2011 Form 10-K).

Furthermore in January 2012, Alcoa's subsidiary, Alumínio, borrowed \$280 in new loans with a weighted-average interest rate of 2.32% and a weighted-average maturity of 172 days from two financial institutions. The purpose of these borrowings is to support Alumínio's export operations. During the second quarter and six-month period of 2012, \$215 and \$275, respectively, was repaid.

G. Contingencies and Commitments

Contingencies

Litigation

On February 27, 2008, Alcoa Inc. received notice that Aluminium Bahrain B.S.C. (Alba) had filed suit against Alcoa Inc. and Alcoa World Alumina LLC (collectively, Alcoa), and others, in the U.S. District Court for the Western District of Pennsylvania (the Court), Civil Action number 08-299, styled Aluminium Bahrain B.S.C. v. Alcoa Inc., Alcoa World Alumina LLC, William Rice, and Victor Phillip Dahdaleh. The complaint alleges that certain Alcoa entities and their agents, including Victor Phillip Dahdaleh, have engaged in a conspiracy over a period of 15 years to defraud Alba. The complaint further alleges that Alcoa and its employees or agents (1) illegally bribed officials of the government of Bahrain and (or) officers of Alba in order to force Alba to purchase alumina at excessively high prices, (2) illegally bribed officials of the government of Bahrain and (or) officers of Alba and issued threats in order to pressure Alba to enter into an agreement by which Alcoa would purchase an equity interest in Alba, and (3) assigned portions of existing supply contracts between Alcoa and Alba for the sole purpose of facilitating alleged bribes and unlawful commissions. The complaint alleges that Alcoa and the other defendants violated the Racketeer Influenced and Corrupt Organizations Act (RICO) and committed fraud. Alba seeks treble damages with respect to its RICO claims. Alba's complaint seeks compensatory, consequential, exemplary, and punitive damages, rescission of the 2005 alumina supply contract, and attorneys fees and costs.

On February 26, 2008, Alcoa Inc. had advised the U.S. Department of Justice (the DOJ) and the Securities and Exchange Commission (the SEC) that it had recently become aware of these claims, had already begun an internal investigation, and intended to cooperate fully in any investigation that the DOJ or the SEC may commence. On March 17, 2008, the DOJ notified Alcoa that it had opened a formal investigation and Alcoa has been cooperating with the government.

In response to a motion filed by the DOJ on March 27, 2008, the Court ordered the suit filed by Alba to be administratively closed and that all discovery be stayed to allow the DOJ to fully conduct an investigation without the interference and distraction of ongoing civil litigation. The Court further ordered that the case will be reopened at the close of the DOJ's investigation. On November 8, 2011, at Alcoa's request, the Court removed the case from administrative stay and ordered Alba to file an Amended Complaint by November 28, 2011, and a RICO Case Statement 30 days thereafter for the limited purpose of allowing Alcoa to move to dismiss Alba's lawsuit. Alba's Amended Complaint was filed on November 28, 2011, and its RICO Case Statement was filed on December 28, 2011. Alcoa filed its motion to dismiss the Amended Complaint on January 27, 2012, which was denied on June 11, 2012. On June 25, 2012, the Court held a status conference to discuss discovery and directed the parties to enter into mandatory alternative dispute resolution. On July 25, 2012, Alcoa filed a Consent Motion to extend the date upon which Alcoa's Answer to the Amended Complaint is due to September 7, 2012, an extension to which Alba has agreed. During the second quarter of 2012, Alcoa proposed to settle the suit by offering Alba a cash payment of \$45. Alcoa has also offered Alba a long-term alumina supply contract. Based on the cash offer, Alcoa recorded a \$45 (\$18 after-tax and noncontrolling interest) charge in the 2012 second quarter representing Alcoa's estimate of the minimum end of the range probable to settle the case. Alcoa currently estimates an additional reasonably possible charge of up to \$75 to settle the suit. Alba has claimed damages in excess of \$1,000 and sought treble damages under RICO.

The DOJ's and the SEC's investigations are ongoing. Alcoa has been in dialogue with both the DOJ and the SEC and is exploring whether a settlement can be reached. Given the uncertainty regarding whether a settlement can be reached and what the terms of any such settlement would be, Alcoa is unable to estimate a range of reasonably possible loss with regard to any such settlement. However, Alcoa expects the amount of any such settlement would be material in a particular period to Alcoa's results of operations. If a settlement cannot be reached, Alcoa will proceed to trial with the DOJ and the SEC and under those circumstances is unable to predict an outcome or to estimate a range of reasonably possible loss. There can be no assurance that the final outcome of the government's investigations would not have a material adverse effect on Alcoa.

In November 2006, in *Curtis v. Alcoa Inc.*, Civil Action No. 3:06cv448 (E.D. Tenn.), a class action was filed by plaintiffs representing approximately 13,000 retired former employees of Alcoa or Reynolds Metals Company and spouses and dependents of such retirees alleging violation of the Employee Retirement Income Security Act (ERISA) and the Labor-Management Relations Act by requiring plaintiffs, beginning

January 1, 2007, to pay health insurance premiums and increased co-payments and co-insurance for certain medical procedures and prescription drugs. Plaintiffs alleged these changes to their retiree health care plans violated their rights to vested health care benefits. Plaintiffs additionally alleged that Alcoa had breached its fiduciary duty to plaintiffs under ERISA by misrepresenting to them that their health benefits would never change. Plaintiffs sought injunctive and declaratory relief, back payment of benefits, and attorneys' fees. Alcoa had consented to treatment of plaintiffs' claims as a class action. During the fourth quarter of 2007, following briefing and argument, the court ordered consolidation of the plaintiffs' motion for preliminary injunction with trial, certified a plaintiff class, bifurcated and stayed the plaintiffs' breach of fiduciary duty claims, struck the plaintiffs' jury demand, but indicated it would use an advisory jury, and set a trial date of September 17, 2008. In August 2008, the court set a new trial date of March 24, 2009 and, subsequently, the trial date was moved to September 22, 2009. In June 2009, the court indicated that it would not use an advisory jury at trial. Trial in the matter was held over eight days commencing September 22, 2009 and ending on October 1, 2009 in federal court in Knoxville, TN before the Honorable Thomas Phillips, U.S. District Court Judge. At the conclusion of evidence, the court set a post-hearing briefing schedule for submission of proposed findings of fact and conclusions of law by the parties and for replies to the same. Post trial briefing was submitted on December 4, 2009.

On March 9, 2011, the court issued a judgment order dismissing plaintiffs' lawsuit in its entirety with prejudice for the reasons stated in its Findings of Fact and Conclusions of Law. On March 23, 2011, plaintiffs filed a motion for clarification and/or amendment of the judgment order, which seeks, among other things, a declaration that plaintiffs' retiree benefits are vested subject to an annual cap and an injunction preventing Alcoa, prior to 2017, from modifying the plan design to which plaintiffs are subject or changing the premiums and deductibles that plaintiffs must pay. Also on March 23, 2011, plaintiffs filed a motion for award of attorneys' fees and expenses. Alcoa filed its opposition to both motions on April 11, 2011. On June 11, 2012, the court issued its memorandum and order denying plaintiffs' motion for clarification and/or amendment to the original judgment order. On July 6, 2012, plaintiffs filed a notice of appeal of the court's March 9, 2011 judgment. On July 12, 2012, the court stayed Alcoa's motion for assessment of costs pending resolution of plaintiffs' appeal.

On April 23, 2004, St. Croix Renaissance Group, L.L.P. (SCRG), Brownfield Recovery Corp., and Energy Answers Corporation of Puerto Rico (collectively referred to as Plaintiffs) filed a suit against St. Croix Alumina L.L.C. and Alcoa World Alumina, LLC (collectively referred to as Alcoa) in the Territorial Court of the Virgin Islands, Division of St. Croix for claims related to the sale of Alcoa's former St. Croix alumina refinery to Plaintiffs. Alcoa thereafter removed the case to federal court and after a several year period of discovery and motion practice, a jury trial on the matter took place in St. Croix from January 11, 2011 to January 20, 2011. The jury returned a verdict in favor of Plaintiffs and awarded damages as described: on a claim of breaches of warranty, the jury awarded \$13; on the same claim, the jury awarded punitive damages in the amount of \$6; and on a negligence claim for property damage, the jury awarded \$10. Plaintiffs filed a motion seeking pre-judgment interest on the jury award. On February 17, 2011, Alcoa filed post-trial motions seeking judgment notwithstanding the verdict or, in the alternative, a new trial. On May 31, 2011, the court granted Alcoa's motion for judgment regarding Plaintiffs' \$10 negligence award and denied the remainder of Alcoa's motions. Additionally, the court awarded Plaintiffs pre-judgment interest of \$2 on the breach of warranty award. As a result of the court's post-trial decisions, Alcoa recorded a charge of \$20 in 2011. On June 14, 2011, Alcoa filed a notice of appeal with the U.S. Court of Appeals for the Third Circuit regarding Alcoa's denied post-trial motions. On June 22, 2011, SCRG filed a notice of cross appeal with the Third Circuit Court related to certain pre-trial decisions of the court and of the court's post-trial ruling on the negligence claim. The Third Circuit Court referred this matter to mediation as is its standard practice in appeals. Following mediation and further, separate settlement discussions, the parties executed an agreement dated September 30, 2011 resolving the matter in its entirety, and subsequently jointly petitioned (i) the District Court to release Alcoa from the jury verdict and (ii) the Third Circuit Court of Appeals to dismiss the matter. On March 13, 2012, the District Court entered an order discharging Alcoa from the jury verdict and, on March 14, 2012, the Third Circuit Court of Appeals dismissed the matter. This matter is now fully resolved.

Before 2002, Alcoa purchased power in Italy in the regulated energy market and received a drawback of a portion of the price of power under a special tariff in an amount calculated in accordance with a published resolution of the Italian Energy Authority, Energy Authority Resolution n. 204/1999 (204/1999). In 2001, the Energy Authority published another resolution, which clarified that the drawback would be calculated in the same manner, and in the same amount, in either the regulated or unregulated market. At the beginning of 2002, Alcoa left the regulated energy market to purchase energy in the unregulated market. Subsequently, in 2004, the Energy Authority introduced regulation no. 148/2004 which set forth a different method for calculating the special tariff that would result in a different drawback for the regulated and unregulated

markets. Alcoa challenged the new regulation in the Administrative Court of Milan and received a favorable judgment in 2006. Following this ruling, Alcoa continued to receive the power price drawback in accordance with the original calculation method, through 2009, when the European Commission declared all such special tariffs to be impermissible state aid. In 2010, the Energy Authority appealed the 2006 ruling to the Consiglio di Stato (final court of appeal). On December 2, 2011, the Consiglio di Stato ruled in favor of the Energy Authority and against Alcoa, thus presenting the opportunity for the energy regulators to seek reimbursement from Alcoa of an amount equal to the difference between the actual drawback amounts received over the relevant time period, and the drawback as it would have been calculated in accordance with regulation 148/2004. On February 23, 2012, Alcoa filed its appeal of the decision of the Consiglio di Stato, and that appeal remains pending. On March 26, 2012, Alcoa received a letter from the agency (Cassa Conguaglio per il Settore Elettrico (CCSE)) responsible for making and collecting payments on behalf of the Energy Authority demanding payment in the amount of approximately \$105 (€ 85), including interest. By letter dated April 5, 2012, Alcoa informed CCSE that it disputes the payment demand of CCSE since (i) CCSE was not authorized by the Consiglio di Stato decisions to seek payment of any amount, (ii) the decision of the Consiglio di Stato has been appealed and that appeal remains pending, and (iii) in any event, no interest should be payable. On April 29, 2012, Law No. 44 of 2012 (44/2012) came into effect, changing the method to calculate the drawback. Alcoa believes that under 44/2012 its range of reasonably possible loss is from \$0 to \$48 (€ 39). Following the effectiveness of 44/2012, Alcoa has received no further demands from CCSE. At this time, the company is unable to reasonably predict an outcome for this matter.

European Commission Matters

In July 2006, the European Commission (EC) announced that it had opened an investigation to establish whether an extension of the regulated electricity tariff granted by Italy to some energy-intensive industries complies with European Union (EU) state aid rules. The Italian power tariff extended the tariff that was in force until December 31, 2005 through November 19, 2009 (Alcoa has been incurring higher power costs at its smelters in Italy subsequent to the tariff end date). The extension was originally through 2010, but the date was changed by legislation adopted by the Italian Parliament effective on August 15, 2009. Prior to expiration of the tariff in 2005, Alcoa had been operating in Italy for more than 10 years under a power supply structure approved by the EC in 1996. That measure provided a competitive power supply to the primary aluminum industry and was not considered state aid from the Italian Government. The EC's announcement expressed concerns about whether Italy's extension of the tariff beyond 2005 was compatible with EU legislation and potentially distorted competition in the European market of primary aluminum, where energy is an important part of the production costs.

On November 19, 2009, the EC announced a decision in this matter stating that the extension of the tariff by Italy constituted unlawful state aid, in part, and, therefore, the Italian Government is to recover a portion of the benefit Alcoa received since January 2006 (including interest). The amount of this recovery will be based on a calculation that is being prepared by the Italian Government (see below). In late 2009, after discussions with legal counsel and reviewing the bases on which the EC decided, including the different considerations cited in the EC decision regarding Alcoa's two smelters in Italy, Alcoa recorded a charge of \$250 (€ 173), which included \$20 (€ 14) to write off a receivable from the Italian Government for amounts due under the now expired tariff structure and \$230 (€ 159) to establish a reserve. On April 19, 2010, Alcoa filed an appeal of this decision with the General Court of the EU. Alcoa will pursue all substantive and procedural legal steps available to annul the EC's decision. On May 22, 2010, Alcoa also filed with the General Court a request for injunctive relief to suspend the effectiveness of the decision, but, on July 12, 2010, the General Court denied such request. On September 10, 2010, Alcoa appealed the July 12, 2010 decision to the European Court of Justice (ECJ); this appeal was dismissed on December 16, 2011.

In June 2012, Alcoa received formal notification from the Italian Government with a calculated recovery amount of \$375 million (€ 303 million); this amount was reduced by \$65 million (€ 53 million) of amounts owed by the Italian Government to Alcoa, resulting in a net payment request of \$310 million (€ 250 million). Alcoa has been in discussions with the Italian Government regarding the timing of such payment. Alcoa will commence payment of the requested amount in five quarterly installments of \$62 million (€ 50 million) beginning in the fourth quarter of 2012. It is possible that Alcoa may be required to accelerate payment or pay in a lump sum. Notwithstanding the payment request or the timing of such payments, Alcoa's reserve remains \$197 million (€ 159 million) (the U.S. dollar amount reflects the effects of foreign currency movements since 2009), which represents Alcoa's estimate of the most probable loss of the ultimate outcome of this matter and the low end of the range of reasonably possible loss, which is \$197 million (€ 159 million) to \$375 million (€ 303 million). The full extent of the loss will not be known until the final judicial determination, which could be a period of several years.

Separately, on November 29, 2006, Alcoa filed an appeal before the General Court (formerly the European Court of First Instance) seeking the annulment of the EC's decision to open an investigation alleging that such decision did not follow the applicable procedural rules. On March 25, 2009, the General Court denied Alcoa's appeal. On May 29, 2009, Alcoa appealed the March 25, 2009 ruling before the ECJ. The hearing of the May 29, 2009 appeal was held on June 24, 2010. On July 21, 2011, the ECJ denied Alcoa's appeal.

As a result of the EC's November 19, 2009 decision, management had contemplated ceasing operations at its Italian smelters due to uneconomical power costs. In February 2010, management agreed to continue

to operate its smelters in Italy for up to six months while a long-term solution to address increased power costs could be negotiated.

Also in February 2010, the Italian Government issued a decree, which was converted into law by the Italian Parliament in March 2010, to provide interruptibility rights to certain industrial customers who were willing to be subject to temporary interruptions in the supply of power (i.e. compensation for power interruptions when grids are overloaded) over a three-year period. Alcoa applied for and was granted such rights (expiring on December 31, 2012) related to its Portovesme smelter. In May 2010, the EC stated that, based on their review of the validity of the decree, the interruptibility rights should not be considered state aid. On July 29, 2010, Alcoa executed a new power agreement effective September 1, 2010 through December 31, 2012 for the Portovesme smelter, replacing the short-term, market-based power contract that was in effect since early 2010.

Additionally in May 2010, Alcoa and the Italian Government agreed to a temporary idling of the Fusina smelter. As of June 30, 2010, the Fusina smelter was fully curtailed (44 kmt-per-year).

At the end of 2011, as part of a restructuring of Alcoa's global smelting system, management decided to curtail operations at the Portovesme smelter during the first half of 2012. This action may lead to the permanent closure of the Portovesme smelter, due to the uncertain prospects for viable, long-term power once the current agreement expires at the end of 2012, along with rising raw materials costs and falling global aluminum prices (mid-2011 to late 2011). In March 2012, Alcoa decided to delay the curtailment of the Portovesme smelter until the second half of 2012 based on negotiations with the Italian Government and other stakeholders.

In January 2007, the EC announced that it had opened an investigation to establish whether the regulated electricity tariffs granted by Spain comply with EU state aid rules. At the time the EC opened its investigation, Alcoa had been operating in Spain for more than nine years under a power supply structure approved by the Spanish Government in 1986, an equivalent tariff having been granted in 1983. The investigation is limited to the year 2005 and is focused both on the energy-intensive consumers and the distribution companies. The investigation provided 30 days to any interested party to submit observations and comments to the EC. With respect to the energy-intensive consumers, the EC opened the investigation on the assumption that prices paid under the tariff in 2005 were lower than a pool price mechanism, therefore being, in principle, artificially below market conditions. Alcoa submitted comments in which the company provided evidence that prices paid by energy-intensive consumers were in line with the market, in addition to various legal arguments defending the legality of the Spanish tariff system. It is Alcoa's understanding that the Spanish tariff system for electricity is in conformity with all applicable laws and regulations, and therefore no state aid is present in the tariff system. While Alcoa does not believe that an unfavorable decision is probable, management has estimated that the total potential impact from an unfavorable decision could be approximately \$85 (70) pretax. Also, while Alcoa believes that any additional cost would only be assessed for the year 2005, it is possible that the EC could extend its investigation to later years. If the EC's investigation concludes that the regulated electricity tariffs for industries are unlawful, Alcoa will have an opportunity to challenge the decision in the EU courts.

Environmental Matters

Alcoa continues to participate in environmental assessments and cleanups at a number of locations (more than 100). These include owned or operating facilities and adjoining properties, previously owned or operating facilities and adjoining properties, and waste sites, including Superfund (Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)) sites. A liability is recorded for environmental remediation when a cleanup program becomes probable and the costs or damages can be reasonably estimated.

As assessments and cleanups proceed, the liability is adjusted based on progress made in determining the extent of remedial actions and related costs and damages. The liability can change substantially due to factors such as the nature and extent of contamination, changes in remedial requirements, and technological changes, among others.

Alcoa's remediation reserve balance was \$365 and \$347 at June 30, 2012 and December 31, 2011 (of which \$67 and \$58 was classified as a current liability), respectively, and reflects the most probable costs to remediate identified environmental conditions for which costs can be reasonably estimated. In the 2012 second quarter and six-month period, the remediation reserve was increased by \$28 and \$30, respectively. The change in the second quarter of 2012 was due to charges totaling \$51 related to the Massena West, NY and East St. Louis, IL sites (see below), a reversal of \$30 for the Sherwin, TX site (see below), and a net increase of \$7 associated with a number of other sites. The change in the six-month period of 2012 was due to the previously mentioned charges of \$51 and reversal of \$30, and \$9 associated with a number of other sites. In both periods, the changes to the remediation reserve were recorded in Cost of goods sold on the accompanying Statement of Consolidated Operations. Payments related to remediation expenses applied

against the reserve were \$5 and \$11 in the 2012 second quarter and six-month period, respectively. These amounts include expenditures currently mandated, as well as those not required by any regulatory authority or third party. In the 2012 second quarter and six-month period, the change in the reserve also reflects a decrease of \$2 and \$1, respectively, due to the effects of foreign currency translation.

Included in annual operating expenses are the recurring costs of managing hazardous substances and environmental programs. These costs are estimated to be approximately 2% of cost of goods sold.

The following discussion provides details regarding the current status of certain significant reserves related to current or former Alcoa sites.

Massena West, NY Alcoa has been conducting investigations and studies of the Grasse River, adjacent to Alcoa's Massena plant site, under a 1989 order from the U.S. Environmental Protection Agency (EPA) issued under CERCLA. Sediments and fish in the river contain varying levels of polychlorinated biphenyls (PCBs).

Alcoa submitted various Analysis of Alternatives Reports to the EPA starting in 1998 through 2002 that reported the results of river and sediment studies, potential alternatives for remedial actions related to the PCB contamination, and additional information requested by the EPA.

In June 2003, the EPA requested that Alcoa gather additional field data to assess the potential for sediment erosion from winter river ice formation and breakup. The results of these additional studies, submitted in a report to the EPA in April 2004, suggest that this phenomenon has the potential to occur approximately every 10 years and may impact sediments in certain portions of the river under all remedial scenarios. The EPA informed Alcoa that a final remedial decision for the river could not be made without substantially more information, including river pilot studies on the effects of ice formation and breakup on each of the remedial techniques. Alcoa submitted to the EPA, and the EPA approved, a Remedial Options Pilot Study (ROPS) to gather this information. The scope of this study included sediment removal and capping, the installation of an ice control structure, and significant monitoring.

From 2004 through 2008, Alcoa completed the work outlined in the ROPS. In November 2008, Alcoa submitted an update to the EPA incorporating the new information obtained from the ROPS related to the feasibility and costs associated with various capping and dredging alternatives, including options for ice control. As a result, Alcoa increased the reserve associated with the Grasse River by \$40 for the estimated costs of a proposed ice control remedy and for partial settlement of potential damages of natural resources.

In late 2009, the EPA requested that Alcoa submit a complete revised Analysis of Alternatives Report in March 2010 to address questions and comments from the EPA and various stakeholders. On March 24, 2010, Alcoa submitted the revised report, which included an expanded list of proposed remedial alternatives, as directed by the EPA. Alcoa increased the reserve associated with the Grasse River by \$17 to reflect an increase in the estimated costs of the Company's recommended capping alternative as a result of changes in scope that occurred due to the questions and comments from the EPA and various stakeholders. While the EPA reviewed the revised report, Alcoa continued with its on-going monitoring and field studies activities. In late 2010, Alcoa increased the reserve by \$2 based on the then most recent estimate of costs expected to be incurred for on-going monitoring and field studies activities. In late 2011, the EPA and various stakeholders completed their review of the March 2010 revised report and submitted questions and comments to Alcoa. As a result, Alcoa increased the reserve by \$1 to reflect a revision in the estimate of costs expected to be incurred for on-going monitoring and field studies activities.

In the first half of 2012, Alcoa received final questions and comments from the EPA and other stakeholders on the revised Analysis of Alternatives Report submitted in March 2010, including a requirement that would increase the scope of the recommended capping alternative. In June 2012, Alcoa submitted a revised Analysis of Alternatives Report, which included four less alternatives than the previous report and addressed the final questions and comments from all stakeholders. These final questions and comments resulted in a change to Alcoa's recommended capping alternative by increasing the area to be remediated. Consequently, Alcoa increased the reserve associated with the Grasse River by \$37 in the 2012 second quarter to reflect the changes to the recommended alternative.

The ultimate selection of a remedy may result in additional liability. Alternatives analyzed in the most recent Analysis of Alternatives report that are equally effective as the recommended capping remedy range in additional estimated costs between \$30 and \$130. Alcoa may be required to record a subsequent reserve adjustment that may exceed this estimated range at the time the EPA issues either a Proposed Remedial Action Plan or a final Record of Decision.

Sherwin, TX In connection with the sale of the Sherwin alumina refinery, which was required to be divested as part of the Reynolds merger in 2000, Alcoa agreed to retain responsibility for the remediation of the then existing environmental conditions, as well as a pro rata share of the final closure of the active bauxite residue waste disposal areas (known as the Copano facility). Alcoa's share of the closure costs is proportional to the total period of operation of the active waste disposal areas. Alcoa estimated its liability for the active waste disposal areas by making certain assumptions about the period of operation, the amount of material placed in the area prior to closure, and the appropriate technology, engineering, and regulatory status applicable to final closure. The most probable cost for remediation was reserved.

For a number of years, Alcoa has been working directly with Sherwin Alumina Company to develop a sustainable closure plan for the active waste disposal areas, which is partly conditioned on Sherwin's operating plan for the Copano facility. In the second quarter of 2012, Alcoa received the technical analysis of the closure plan and the operating plan from Sherwin in order to develop a closure cost estimate, including an assessment of Alcoa's potential liability. It was determined that the most probable course of action would result in a smaller liability than originally reserved due to new information related to the amount of storage capacity in the waste disposal areas and revised assumptions regarding Alcoa's share of the obligation based on the operating plan provided by Sherwin. As such, Alcoa reduced the reserve associated with Sherwin by \$30 in the 2012 second quarter.

East St. Louis, IL In response to questions regarding environmental conditions at the former East St. Louis operations, Alcoa and the City of East St. Louis, the owner of the site, entered into an administrative order with the EPA in December 2002 to perform a remedial investigation and feasibility study of an area used for the disposal of bauxite residue from historic alumina refining operations. A draft feasibility study was submitted to the EPA in April 2005. The feasibility study included remedial alternatives that ranged from no further action to significant grading, stabilization, and water management of the bauxite residue disposal areas. As a result, Alcoa increased the environmental reserve for this location by \$15 in 2005.

In April 2012, in response to comments from the EPA and other stakeholders, Alcoa submitted a revised feasibility study to the EPA, which soon thereafter issued a Proposed Remedial Action Plan that identified a soil cover as the EPA's recommended alternative. Based on this recommendation, Alcoa submitted a detailed design and cost estimate for implementation of the remedy. A draft consent decree was issued in May 2012 by the EPA and all parties are actively engaged in negotiating the consent decree and statement of work. As a result, Alcoa increased the reserve associated with East St. Louis by \$14 in the 2012 second quarter to reflect the necessary costs for this remedy.

The ultimate outcome of the negotiations and the bidding of the construction work could result in additional liability. Alcoa may be required to record a subsequent reserve adjustment at the time the EPA's Record of Decision is issued, which is expected in the 2012 third quarter.

Fusina and Portovesme, Italy In 1996, Alcoa acquired the Fusina smelter and rolling operations and the Portovesme smelter, both of which are owned by Alcoa's subsidiary Alcoa Trasformazioni S.r.l., from Alumix, an entity owned by the Italian Government. At the time of the acquisition, Alumix indemnified Alcoa for pre-existing environmental contamination at the sites. In 2004, the Italian Ministry of Environment (MOE) issued orders to Alcoa Trasformazioni S.r.l. and Alumix for the development of a clean-up plan related to soil contamination in excess of allowable limits under legislative decree and to institute emergency actions and pay natural resource damages. Alcoa Trasformazioni S.r.l. appealed the orders and filed suit against Alumix, among others, seeking indemnification for these liabilities under the provisions of the acquisition agreement. In 2009, Ligestra S.r.l., Alumix's successor, and Alcoa Trasformazioni S.r.l. agreed to a stay on the court proceedings while investigations were conducted and negotiations advanced towards a possible settlement.

In December 2009, Alcoa Trasformazioni S.r.l. and Ligestra S.r.l. reached an agreement for settlement of the liabilities related to Fusina while negotiations continued related to Portovesme. The agreement outlines an allocation of payments to the MOE for emergency action and natural resource damages and the scope and costs for a proposed soil remediation project, which was formally presented to the MOE in mid-2010. The agreement is contingent upon final acceptance of the remediation project by the MOE. As a result of entering into this agreement, Alcoa increased the reserve by \$12 for Fusina. Based on comments received from the MOE and local and regional environmental authorities, Alcoa Trasformazioni S.r.l. submitted a revised remediation plan in the first half of 2012; however, such revisions did not require any change to the existing reserve.

Additionally, due to new information derived from the site investigations conducted at Portovesme, Alcoa increased the reserve by \$3 in 2009. In November 2011, Alcoa Trasformazioni S.r.l. and Ligestra S.r.l. reached an agreement for settlement of the liabilities related to Portovesme, similar to the one for Fusina. A proposed soil remediation project for Portovesme was formally presented to the MOE in June 2012. Neither the agreement with Ligestra S.r.l. nor the proposal to the MOE resulted in a change to the reserve for Portovesme.

Other

In addition to the matters discussed above, various other lawsuits, claims, and proceedings have been or may be instituted or asserted against Alcoa, including those pertaining to environmental, product liability, and safety and health matters. While the amounts claimed in these other matters may be substantial, the ultimate liability cannot now be determined because of the considerable uncertainties that exist. Therefore, it is possible that the Company's liquidity or results of operations in a particular period could be materially affected by one or more of these other matters. However, based on facts currently available, management believes that the disposition of these other matters that are pending or asserted will not have a material adverse effect, individually or in the aggregate, on the financial position of the Company.

Commitments

Investments

Alcoa has an investment in a joint venture for the development, construction, ownership, and operation of an integrated aluminum complex (bauxite mine, alumina refinery, aluminum smelter, and rolling mill) in Saudi Arabia. The joint venture is owned 74.9% by the Saudi Arabian Mining Company (known as Ma'aden) and 25.1% by Alcoa and consists of three separate companies as follows: one each for the mine and refinery, the smelter, and the rolling mill. Alcoa accounts for its investment in the joint venture under the equity method. Capital investment in the project is expected to total approximately \$10,800 (SAR 40.5 billion). Alcoa's equity investment in the joint venture will be approximately \$1,100 over a four-year period (2010 through 2013), and Alcoa will be responsible for its pro rata share of the joint venture's project financing. Alcoa has contributed \$573, including \$72 and \$165 in the 2012 second quarter and six-month period, respectively, towards the \$1,100 commitment. As of June 30, 2012 and December 31, 2011, the carrying value of Alcoa's investment in this project was \$733 and \$565, respectively.

In late 2010, the smelting and rolling mill companies entered into project financing totaling \$4,035, of which \$1,013 represents Alcoa's share (the equivalent of Alcoa's 25.1% interest in the smelting and rolling mill companies). In conjunction with the financing, Alcoa issued guarantees on behalf of the smelting and rolling mill companies to the lenders in the event that such companies default on their debt service requirements through June 2017 and December 2018, respectively, (Ma'aden issued similar guarantees for its 74.9% interest). Alcoa's guarantees for the smelting and rolling mill companies cover total debt service requirements of \$108 in principal and up to a maximum of approximately \$50 in interest per year (based on projected interest rates). At June 30, 2012 and December 31, 2011, the combined fair value of the guarantees was \$9 and \$8, respectively, and was included in Other noncurrent liabilities and deferred credits on the accompanying Consolidated Balance Sheet. Under the project financing, a downgrade of Alcoa's credit ratings below investment grade by at least two agencies would require Alcoa to provide a letter of credit or fund an escrow account for a portion or all of Alcoa's remaining equity commitment to the joint venture project in Saudi Arabia.

In late 2011, the refining and mining company entered into project financing totaling \$1,992, of which \$500 represents Alcoa World Alumina and Chemicals (AWAC) 25.1% interest in the refining and mining company. In conjunction with the financing, Alcoa, on behalf of AWAC, issued guarantees to the lenders in the event that the refining and mining company defaults on its debt service requirements through June 2019 (Ma'aden issued similar guarantees for its 74.9% interest). Alcoa's guarantees for the refining and mining company cover total debt service requirements of \$60 in principal and up to a maximum of approximately \$25 in interest per year (based on projected interest rates). At June 30, 2012, the combined fair value of the guarantees was \$5 and was included in Other noncurrent liabilities and deferred credits on the accompanying Consolidated Balance Sheet. In the event Alcoa would be required to make payments under the guarantees, 40% of such amount would be contributed to Alcoa by Alumina Limited, consistent with its ownership interest in AWAC. Under the project financing, a downgrade of Alcoa's credit ratings below investment grade by at least two agencies would require Alcoa to provide a letter of credit or fund an escrow account for a portion or all of Alcoa's remaining equity commitment to the joint venture project in Saudi Arabia.

Alcoa Alumínio (Alumínio), a wholly-owned subsidiary of Alcoa, is a participant in several hydroelectric power projects in Brazil for purposes of increasing its energy self-sufficiency and providing a long-term, low-cost source of power for its facilities. Two of these projects, Machadinho and Barra Grande, were completed in 2002 and 2006, respectively.

Alumínio committed to taking a share of the output of the Machadinho and Barra Grande projects each for 30 years at cost (including cost of financing the project). In the event that other participants in either one of these projects fail to fulfill their financial responsibilities, Alumínio may be required to fund a portion of the deficiency. In accordance with the respective agreements, if Alumínio funds any such deficiency, its participation in and share of the output from the respective project will increase proportionately.

Alumínio accounts for the Machadinho and Barra Grande hydroelectric projects as equity method investments. Alumínio's investment participation in these projects is 30.99% for Machadinho and 42.18% for Barra Grande. Its total investment in these projects was \$255 (R\$515) and \$266 (R\$496) at June 30, 2012 and December 31, 2011, respectively. Alcoa's maximum exposure to loss on these completed projects is approximately \$280 (R\$570), which represents Alumínio's investments in both projects and guarantee of debt for only Machadinho as of June 30, 2012.

In early 2006, Alumínio acquired an additional 6.41% share in the Estreito hydroelectric power project, reaching 25.49% of total participation in the consortium. This additional share entitles Alumínio to 38 megawatts of assured energy. Alumínio's share of the project is estimated to have installed capacity of approximately 280 megawatts and assured power of approximately 150 megawatts. In December 2006, the

consortium obtained the environmental installation license, after completion of certain socioeconomic and cultural impact studies as required by a governmental agency. Construction began in early 2007 and is expected to be completed at the end of 2012 (start-up of the facility began in April 2011 with full capacity expected to be reached by the end of 2012). In early 2010, the consortium approved an increase of approximately \$720 (R\$1,300) in estimated costs to complete the Estreito project as a result of currency, inflation, and the price and scope of construction, among other factors. In the 2012 second quarter, the consortium approved an additional increase of approximately \$130 (R\$270) in estimated costs to complete the Estreito project due to further changes in the previously mentioned items. Total estimated project costs are approximately \$2,560 (R\$5,170) and Alumínio's share is approximately \$650 (R\$1,320). As of June 30, 2012, approximately \$600 (R\$1,210) of Alumínio's commitment was expended on the project.

Construction began on the Serra do Facão hydroelectric power project in early 2007 and was completed in the first half of 2011 (this facility is operating at full capacity). Alumínio's share of the Serra do Facão project is 34.97% and entitles Alumínio to approximately 65 megawatts of assured power. Total estimated project costs are approximately \$500 (R\$1,000) and Alumínio's share is approximately \$170 (R\$350). Through March 31, 2009, the participants in the consortium were required to provide capital for their respective share of the project costs. In April 2009, the consortium obtained long-term financing for the estimated remaining costs of construction. At that time, the participants in this project were no longer required to provide capital for their share of the project costs. Instead, the participants were each required to guarantee (expires 2027) a portion of the consortium's debt. In mid-2010, the capacity under the long-term financing arrangement was exhausted; therefore, the participants were once again required to begin providing capital for their share of the remaining costs. As of June 30, 2012, approximately \$170 (R\$340) of Alumínio's commitment was expended on the project (includes both funds provided by Alumínio and Alumínio's share of the long-term financing). Alumínio accounts for the Serra do Facão hydroelectric power project as an equity method investment and its total investment in this project was \$98 (R\$198) and \$105 (R\$196) at June 30, 2012 and December 31, 2011, respectively. Alcoa's maximum exposure to loss on this project is approximately \$200 (R\$400), which represents Alumínio's investment and guarantee of debt as of June 30, 2012.

With Machadinho, Barra Grande, Serra do Facão, and part of Estreito, Alumínio's current power self-sufficiency is 67% (will be approximately 70% once the Estreito hydroelectric power project described above is completed and operating at full capacity), to meet a total energy demand of approximately 690 megawatts from two smelters (São Luís (Alumar) and Poços de Caldas) and one refinery (Poços de Caldas) in Brazil.

In 2004, Alcoa acquired a 20% interest in a consortium, which subsequently purchased the Dampier to Bunbury Natural Gas Pipeline (DBNGP) in Western Australia, in exchange for an initial cash investment of \$17 (A\$24). The investment in the DBNGP, which is classified as an equity investment, was made in order to secure a competitively priced long-term supply of natural gas to Alcoa's refineries in Western Australia. Alcoa has made additional contributions of \$141 (A\$176) for its share of the pipeline capacity expansion and other operational purposes of the consortium through September 2011. No further expansion of the pipeline's capacity is planned at this time. In late 2011, the consortium initiated a three-year equity call plan to improve its capitalization structure. This plan requires Alcoa to contribute \$40 (A\$40), of which \$12 (A\$12) was made through June 30, 2012, including \$3 (A\$3) and \$7 (A\$6) in the 2012 second quarter and six-month period, respectively. In addition to its equity ownership, Alcoa has an agreement to purchase gas transmission services from the DBNGP. At June 30, 2012, Alcoa has an asset of \$349 (A\$346) representing prepayments made under the agreement for future gas transmission services. Alcoa's maximum exposure to loss on the investment and the related contract is approximately \$500 (A\$500) as of June 30, 2012.

H. Other Expenses (Income), Net

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Equity loss (income)	\$ 10	\$ (22)	\$ 12	\$ (26)
Interest income	(4)	(5)	(10)	(11)
Foreign currency losses (gains), net	11	(9)	(1)	(30)

Sales:					
Third-party sales	\$ 1,736	\$ 4,125	\$ 3,977	\$ 2,617	\$ 12,455
Intersegment sales	1,356	1,761	131		3,248
Total sales	\$ 3,092	\$ 5,886	\$ 4,108	\$ 2,617	\$ 15,703

Edgar Filing: ALCOA INC - Form 10-Q

Profit and loss:

Equity income	\$	25	\$		\$	1	\$	26	
Depreciation, depletion, and amortization		215		283		118		79	695
Income taxes		104		108		68		134	414
ATOI		328		403		180		279	1,190

The following table reconciles total segment ATOI to consolidated net (loss) income attributable to Alcoa:

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Total segment ATOI	\$ 275	\$ 635	\$ 571	\$ 1,190
Unallocated amounts (net of tax):				
Impact of LIFO	19	(27)	19	(51)
Interest expense	(80)	(106)	(160)	(178)
Noncontrolling interests	17	(55)	12	(113)
Corporate expense	(69)	(76)	(133)	(143)
Restructuring and other charges	(10)	(22)	(17)	(28)
Discontinued operations		(4)		(5)
Other	(154)	(23)	(200)	(42)
Consolidated net (loss) income attributable to Alcoa	\$ (2)	\$ 322	\$ 92	\$ 630

Items required to reconcile total segment ATOI to consolidated net (loss) income attributable to Alcoa include: the impact of LIFO inventory accounting; interest expense; noncontrolling interests; corporate expense (general administrative and selling expenses of operating the corporate headquarters and other global administrative facilities, along with depreciation and amortization on corporate-owned assets); restructuring and other charges; discontinued operations; and other items, including intersegment profit eliminations and other metal adjustments, differences between tax rates applicable to the segments and the consolidated effective tax rate, the results of the soft alloy extrusions business in Brazil, and other nonoperating items such as foreign currency transaction gains/losses and interest income.

J. Earnings Per Share Basic earnings per share (EPS) amounts are computed by dividing earnings, after the deduction of preferred stock dividends declared and dividends and undistributed earnings allocated to participating securities, by the average number of common shares outstanding. Diluted EPS amounts assume the issuance of common stock for all potentially dilutive share equivalents outstanding not classified as participating securities.

The information used to compute basic and diluted EPS attributable to Alcoa common shareholders was as follows (shares in millions):

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
(Loss) income from continuing operations attributable to Alcoa common shareholders	\$ (2)	\$ 326	\$ 92	\$ 635
Less: preferred stock dividends declared			1	1
(Loss) income from continuing operations available to common equity	(2)	326	91	634
Less: dividends and undistributed earnings allocated to participating securities		1		2
(Loss) income from continuing operations available to Alcoa common shareholders basic	(2)	325	91	632
Add: interest expense related to convertible notes		8		15
(Loss) income from continuing operations available to Alcoa common shareholders diluted	\$ (2)	\$ 333	\$ 91	\$ 647
Average shares outstanding basic	1,067	1,064	1,066	1,058
Effect of dilutive securities:				
Stock options		9	4	9
Stock and performance awards		3	5	3

Edgar Filing: ALCOA INC - Form 10-Q

Convertible notes			89		89
Average shares outstanding	diluted	1,067	1,165	1,075	1,159

Participating securities are defined as unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) and are included in the computation of earnings per share pursuant to the two-class method. Prior to January 1, 2010, under Alcoa's stock-based compensation programs, certain employees were granted stock and performance awards, which entitle those employees to receive nonforfeitable dividends during the vesting period on a basis equivalent to the dividends paid to holders of Alcoa's common stock. As such, these unvested stock and performance awards met the definition of a participating security. Under the two-class method, all earnings, whether distributed or undistributed, are allocated to each class of common stock and participating securities based on their respective rights to receive dividends. At June 30, 2012 and 2011, there were less than 1 million and 2 million such participating securities outstanding, respectively.

Effective January 1, 2010, new grants of stock and performance awards do not contain a nonforfeitable right to dividends during the vesting period. As a result, an employee will forfeit the right to dividends accrued on unvested awards if that person does not fulfill their service requirement during the vesting period. As such, these awards are not treated as participating securities in the EPS calculation as the employees do not have equivalent dividend rights as common shareholders. These awards are included in the EPS calculation utilizing the treasury stock method similar to stock options. At June 30, 2012 and 2011, there were 12 million and 7 million such awards outstanding, respectively.

In the 2012 second quarter, basic average shares outstanding and diluted average shares outstanding were the same because the effect of potential shares of common stock was anti-dilutive since Alcoa generated a loss from continuing operations. As a result, 89 million share equivalents related to convertible notes, 12 million stock awards, and 19 million stock options were not included in the computation of diluted EPS. Had Alcoa generated sufficient income from continuing operations in the second quarter of 2012, 89 million, 6 million, and 4 million potential shares of common stock related to the convertible notes, stock awards, and stock options, respectively, would have been included in diluted average shares outstanding. In the 2012 six-month period, 89 million share equivalents related to convertible notes were not included in the computation of diluted EPS because their effect was anti-dilutive.

Options to purchase 28 million and 19 million shares of common stock at a weighted average exercise price of \$15.44 and \$28.61 per share were outstanding as of June 30, 2012 and 2011, respectively, but were not included in the computation of diluted EPS because they were anti-dilutive, as the exercise prices of the options were greater than the average market price of Alcoa's common stock.

K. Income Taxes The effective tax rate for the second quarter of 2012 and 2011 was 216.7% (provision on a loss) and 26.3% (provision on income), respectively.

The rate for the 2012 second quarter differs from the U.S. federal statutory rate of 35% primarily due to an \$8 discrete income tax charge related to prior year U.S. taxes on certain depletable assets and a net \$2 discrete income tax charge for other miscellaneous items.

The rate for the 2011 second quarter differs from the U.S. federal statutory rate of 35% primarily due to foreign income taxed in lower rate jurisdictions.

The effective tax rate for the 2012 and 2011 six-month periods was 39.4% (provision on income) and 26.9% (provision on income), respectively.

The rate for the 2012 six-month period differs from the U.S. federal statutory rate of 35% primarily due to the previously mentioned discrete income tax charges, partially offset by foreign income taxed in lower rate jurisdictions.

The rate for the 2011 six-month period differs from the U.S. federal statutory rate of 35% primarily due to foreign income taxed in lower rate jurisdictions.

L. Receivables Alcoa has three arrangements, each with a different financial institution, to sell certain customer receivables outright without recourse on a continuous basis. As of June 30, 2012, sold receivables, which were derecognized from the accompanying Consolidated Balance Sheet, in the amount of \$118 under the three arrangements combined were uncollected. Alcoa services the customer receivables for the financial institutions at market rates; therefore, no servicing asset or liability was recorded.

On March 30, 2012, Alcoa finalized a one-year arrangement with a financial institution to sell certain customer receivables without recourse on a revolving basis. The sale of such receivables will be completed through the use of a bankruptcy remote special purpose entity, which is a consolidated subsidiary of Alcoa. This arrangement provides for minimum funding of \$50 up to a maximum of \$250 for receivables sold. In the 2012 first quarter, Alcoa initially sold \$304 of customer receivables in exchange for \$50 in cash and \$254 of

deferred purchase price under this arrangement. Alcoa received additional cash funding of \$100 in the 2012 second quarter. As of June 30, 2012, the deferred purchase price receivable was \$141, which was included in Other receivables on the accompanying Consolidated Balance Sheet. The deferred purchase price receivable is reduced as collections of the underlying receivables occur; however, as this is a revolving program, the sale of new receivables will result in an increase in the deferred purchase price receivable. The net change in the deferred purchase price receivable was reflected in the (Increase) in receivables line item on the accompanying Statement of Consolidated Cash Flows. The gross amount of receivables sold and total cash collections under this program since its inception was \$1,281 and \$990, respectively. Alcoa services the customer receivables for the financial institution at market rates; therefore, no servicing asset or liability was recorded.

M. Pension and Other Postretirement Benefits The components of net periodic benefit cost were as follows:

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Pension benefits				
Service cost	\$ 46	\$ 41	\$ 93	\$ 82
Interest cost	160	171	320	340
Expected return on plan assets	(201)	(202)	(403)	(403)
Amortization of prior service cost	4	4	9	9
Recognized net actuarial loss	95	62	191	124
Net periodic benefit cost	\$ 104	\$ 76	\$ 210	\$ 152

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Other postretirement benefits				
Service cost	\$ 3	\$ 4	\$ 7	\$ 8
Interest cost	33	39	66	79
Expected return on plan assets				(1)
Amortization of prior service benefit	(4)	(4)	(8)	(8)
Recognized net actuarial loss	6	6	12	13
Net periodic benefit cost	\$ 38	\$ 45	\$ 77	\$ 91

N. Derivatives and Other Financial Instruments

Derivatives

Alcoa is exposed to certain risks relating to its ongoing business operations, including financial, market, political, and economic risks. The following discussion provides information regarding Alcoa's exposure to the risks of changing commodity prices, interest rates, and foreign currency exchange rates.

Alcoa's commodity and derivative activities are subject to the management, direction, and control of the Strategic Risk Management Committee (SRMC), which is composed of the chief executive officer, the chief financial officer, and other officers and employees that the chief executive officer selects. The SRMC meets on a monthly basis to review derivative positions and strategy and reports to Alcoa's Board of Directors on the scope of its activities.

The aluminum, energy, interest rate, and foreign exchange contracts are held for purposes other than trading. They are used primarily to mitigate uncertainty and volatility, and to cover underlying exposures. Alcoa is not involved in trading activities for energy, weather derivatives, or other nonexchange commodity trading activities.

The fair values and corresponding classifications under the appropriate level of the fair value hierarchy of outstanding derivative contracts recorded as assets in the accompanying Consolidated Balance Sheet were as follows:

Asset Derivatives	Level	June 30, 2012	December 31, 2011
Derivatives designated as hedging instruments:			
Prepaid expenses and other current assets:			
Aluminum contracts	1	\$ 59	\$ 51
Aluminum contracts	3	7	5
Interest rate contracts	2	7	8
Other noncurrent assets:			
Aluminum contracts	1	1	6
Energy contracts	3		2
Interest rate contracts	2	40	37

Total Asset Derivatives		\$ 94	\$ 94

* See the "Other" section within Note N for additional information on Alcoa's purpose for entering into derivatives not designated as hedging instruments and its overall risk management strategies.

** All margin held is in the form of cash and is valued under a Level 1 technique. The levels that correspond to the margin held in the table above reference the level of the corresponding asset for which it is held. Alcoa elected to net the margin held against the fair value amounts recognized for derivative instruments executed with the same counterparties under master netting arrangements.

The fair values and corresponding classifications under the appropriate level of the fair value hierarchy of outstanding derivative contracts recorded as liabilities in the accompanying Consolidated Balance Sheet were as follows:

Liability Derivatives	Level	June 30, 2012	December 31, 2011
Derivatives designated as hedging instruments:			
Other current liabilities:			
Aluminum contracts	1	\$ 44	\$ 47
Aluminum contracts	3	28	32
Other noncurrent liabilities and deferred credits:			
Aluminum contracts	1	18	4
Aluminum contracts	3	502	570
Energy contracts	3	10	
Total derivatives designated as hedging instruments		\$ 602	\$ 653
Derivatives not designated as hedging instruments*:			
Other current liabilities:			
Aluminum contracts	1	\$ 9	\$ 12
Aluminum contracts	2	17	23
Embedded credit derivative	3	4	
Other noncurrent liabilities and deferred credits:			
Aluminum contracts	1	1	1
Aluminum contracts	2	13	21
Embedded credit derivative	3	35	28
Total derivatives not designated as hedging instruments		\$ 79	\$ 85
Less margin posted**:			
Other current liabilities:			
Aluminum contracts	1	\$	\$ 1
Total Liability Derivatives		\$ 681	\$ 737

* See the "Other" section within Note N for additional information on Alcoa's purpose for entering into derivatives not designated as hedging instruments and its overall risk management strategies.

** All margin posted is in the form of cash and is valued under a Level 1 technique. The levels that correspond to the margin posted in the table above reference the level of the corresponding liability for which it is posted. Alcoa elected to net the margin posted against the fair value amounts recognized for derivative instruments executed with the same counterparties under master netting arrangements.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs that are both significant to the fair value measurement and unobservable.

The following section describes the valuation methodologies used by Alcoa to measure derivative contracts at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified. Where appropriate, the description includes details of the valuation models, the key inputs to those models, and any significant assumptions. These valuation models are reviewed and tested at least on an annual basis.

Derivative contracts are valued using quoted market prices and significant other observable and unobservable inputs. Such financial instruments consist of aluminum, energy, interest rate, and foreign exchange contracts. The fair values for the majority of these derivative contracts are based upon current quoted market prices. These financial instruments are typically exchange-traded and are generally classified within Level 1 or Level 2 of the fair value hierarchy depending on whether the exchange is deemed to be an active market or not.

For certain derivative contracts whose fair values are based upon trades in liquid markets, such as interest rate swaps, valuation model inputs can generally be verified through over-the-counter markets and valuation techniques do not involve significant management judgment. The fair values of such financial instruments are generally classified within Level 2 of the fair value hierarchy.

Alcoa has other derivative contracts that do not have observable market quotes. For these financial instruments, management uses significant other observable inputs (e.g., information concerning time premiums and volatilities for certain option type embedded derivatives and regional premiums for aluminum contracts). For periods beyond the term of quoted market prices for aluminum, Alcoa uses a model that estimates the long-term price of aluminum by extrapolating the 10-year London Metal Exchange (LME) forward curve. For periods beyond the term of quoted market prices for energy, management has developed a forward curve based on independent consultant market research. Where appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads, and credit considerations. Such adjustments are generally based on available market evidence (Level 2). In the absence of such evidence, management's best estimate is used (Level 3). If a significant input that is unobservable in one period becomes observable in a subsequent period, the related asset or liability would be transferred to the appropriate level classification (1 or 2) in the period of such change.

The following table presents Alcoa's derivative contract assets and liabilities that are measured and recognized at fair value on a recurring basis classified under the appropriate level of the fair value hierarchy (there were no transfers in or out of Levels 1 and 2 during the periods presented):

	June 30, 2012	December 31, 2011
Assets:		
Level 1	\$ 60	\$ 57
Level 2	48	47
Level 3	10	12
Margin held	(24)	(22)
Total	\$ 94	\$ 94
Liabilities:		
Level 1	\$ 72	\$ 64
Level 2	30	44
Level 3	579	630
Margin posted		(1)
Total	\$ 681	\$ 737

Financial instruments classified as Level 3 in the fair value hierarchy represent derivative contracts in which management has used at least one significant unobservable input in the valuation model. The following tables present a reconciliation of activity for such derivative contracts:

	Assets		Liabilities	
	Aluminum contracts	Energy contracts	Embedded credit derivative	Energy contracts
Second quarter ended June 30, 2012				
Opening balance March 31, 2012	\$ 8	\$	\$ 28	\$ 10
Total gains or losses (realized and unrealized) included in:				
Sales	(2)	(8)		
Cost of goods sold			1	
Other expenses, net	(1)		10	
Other comprehensive loss	5	(136)		
Purchases, sales, issuances, and settlements*				
Transfers into and (or) out of Level 3*				
Closing balance June 30, 2012	\$ 10	\$ 530	\$ 39	\$ 10

Change in unrealized gains or losses included in earnings for derivative contracts held at June 30, 2012:

Sales	\$	\$	\$	\$
Cost of goods sold				
Other expenses, net			10	

* There were no purchases, sales, issuances or settlements of Level 3 financial instruments. Additionally, there were no transfers of financial instruments into or out of Level 3.

		Assets		Liabilities	
		Aluminum contracts	Energy contracts	Embedded credit derivative	Energy contracts
Six months ended June 30, 2012					
Opening balance	December 31, 2011	\$ 10	\$ 2	\$ 28	\$
Total gains or losses (realized and unrealized) included in:					
Sales		(5)		(18)	
Cost of goods sold				1	
Other expenses, net		(2)		10	
Other comprehensive loss		7	(2)	(54)	10
Purchases, sales, issuances, and settlements*					
Transfers into and (or) out of Level 3*					
Closing balance	June 30, 2012	\$ 10	\$	\$ 39	\$ 10

Change in unrealized gains or losses included in earnings for derivative contracts held at June 30, 2012:

Sales	\$	\$	\$	\$	\$
Cost of goods sold					
Other expenses, net				10	

* There were no purchases, sales, issuances or settlements of Level 3 financial instruments. Additionally, there were no transfers of financial instruments into or out of Level 3.

As reflected in the tables above, the net unrealized loss on derivative contracts using Level 3 valuation techniques was \$569 as of June 30, 2012. This loss was mainly attributed to embedded derivatives in power contracts that index the price of power to the LME price of aluminum. These embedded derivatives are primarily valued using observable market prices. However, due to the length of the contracts, the valuation model also requires management to estimate the long-term price of aluminum based upon an extrapolation of the 10-year LME forward curve. Significant increases or decreases in the actual LME price beyond 10 years would result in a higher or lower fair value measurement. An increase of actual LME price over the inputs used in the valuation model will result in a higher cost of power and a corresponding increase to the liability. The embedded derivatives have been designated as hedges of forward sales of aluminum and their realized gains and losses were included in Sales on the accompanying Statement of Consolidated Operations.

Also, Alcoa has a six-year natural gas supply contract, which has an LME-linked ceiling. This contract is valued using probabilities of future LME aluminum prices and the price of Brent crude oil (priced on Platts), including the interrelationships between the two commodities subject to the ceiling. Any change in the interrelationship would result in a higher or lower fair value measurement. An LME ceiling was embedded into the contract price to protect against an increase in the price of oil without a corresponding increase in the price of LME. An increase in oil prices with no similar increase in the LME price would limit the increase of the price paid for natural gas. At inception, this contract had a fair value of \$5. Unrealized gains and losses from this contract were included in Other expenses (income), net on the accompanying Statement of Consolidated Operations, while realized gains and losses will be included in Cost of goods sold on the accompanying Statement of Consolidated Operations as gas purchases are made under the contract.

Additionally, included within Level 3 measurements are derivative financial instruments that hedge the cost of electricity. Alcoa has derivative contracts to hedge the anticipated power requirements at two smelters in Australia. These derivatives hedge forecasted power purchases through December 2036. Beyond the

term where market information is available, management has developed a forward curve, for valuation purposes, based on independent consultant market research. The effective portion of gains and losses on these contracts were recorded in Other comprehensive (loss) income on the accompanying Consolidated Balance Sheet until the designated hedge periods begin in 2014 and 2016. Once the hedge periods begin, realized gains and losses will be recorded in Cost of goods sold. Significant increases or decreases in the power market may result in a higher or lower fair value measurement. Higher prices in the power market would cause the derivative asset to increase in value.

Furthermore, an embedded derivative in a power contract that indexes the difference between the long-term debt ratings of Alcoa and the counterparty from any of the three major credit rating agencies is included in Level 3. Management uses market prices, historical relationships, and forecast services to determine fair value. Significant increases or decreases in any of these inputs would result in a lower or higher fair value measurement. A wider credit spread between Alcoa and the counterparty would result in an increase of the future liability and a higher cost of power. Realized gains and losses for this embedded derivative were included in Cost of goods sold on the accompanying Statement of Consolidated Operations and unrealized gains and losses were included in Other expenses (income), net on the accompanying Statement of Consolidated Operations.

The following table presents quantitative information for Level 3 derivative contracts:

	Fair value at June 30, 2012	Valuation technique	Unobservable input	Range (\$ in full amounts)
Assets:				
Aluminum contract	\$ 3	Discounted cash flow	Interrelationship of future aluminum and oil prices	Aluminum: \$1,828 - \$2,390 per metric ton Oil: \$88 - \$91 per barrel
Liabilities:				
Aluminum contracts	523	Discounted cash flow	Price of aluminum beyond forward curve	\$2,658 per metric ton in 2022 to \$2,896 per metric ton in 2027
Embedded credit derivative	39	Discounted cash flow	Credit spread between Alcoa and counterparty	2.03% - 2.46% (2.25%) median
Energy contracts	10	Discounted cash flow	Price of electricity beyond forward curve	\$77 per megawatt hour in 2012 to \$170 per megawatt hour in 2036

Fair Value Hedges

For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative as well as the loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The gain or loss on the hedged items are included in the same line items as the loss or gain on the related derivative contracts as follows (there were no contracts that ceased to qualify as a fair value hedge in any of the periods presented):

	Location of Gain or (Loss) Recognized in Earnings on Derivatives	Amount of Gain or (Loss) Recognized in Earnings on Derivatives			
		Second quarter ended		Six months ended	
		June 30, 2012	2011	June 30, 2012	2011
Derivatives in Fair Value Hedging Relationships					
Aluminum contracts	Sales	\$ (93)	\$ (27)	\$ (57)	\$ 22
Interest rate contracts	Interest expense	2	42	5	53
Total		\$ (91)	\$ 15	\$ (52)	\$ 75

Hedged Items in Fair Value Hedging Relationships	Location of Gain or (Loss) Recognized in Earnings on Hedged Items	Amount of Gain or (Loss) Recognized in Earnings on Hedged Items			
		Second quarter ended		Six months ended	
		June 30,		June 30,	
		2012	2011	2012	2011
Aluminum contracts	Sales	\$ 89	\$ 26	\$ 41	\$ (26)
Interest rate contracts	Interest expense	(2)	(9)	(5)	(20)
Total		\$ 87	\$ 17	\$ 36	\$ (46)

Aluminum. Alcoa is a leading global producer of primary aluminum and fabricated aluminum products. As a condition of sale, customers often require Alcoa to enter into long-term, fixed-price commitments. These commitments expose Alcoa to the risk of fluctuating aluminum prices between the time the order is committed and the time that the order is shipped. Alcoa's aluminum commodity risk management policy is to manage, principally through the use of futures and contracts, the aluminum price risk associated with a portion of its firm commitments. These contracts cover known exposures, generally within three years. As of June 30, 2012, Alcoa had 462 kmt of aluminum futures designated as fair value hedges. The effects of this hedging activity will be recognized over the designated hedge periods in 2012 to 2016.

Interest Rates. Alcoa uses interest rate swaps to help maintain a strategic balance between fixed- and floating-rate debt and to manage overall financing costs. As of June 30, 2012, the Company had pay floating, receive fixed interest rate swaps that were designated as fair value hedges. These hedges effectively convert the interest rate from fixed to floating on \$200 of debt through 2018.

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Derivatives in Cash Flow Hedging Relationships	Amount of Gain or (Loss) Recognized in OCI on Derivatives (Effective Portion)				Location of Gain or (Loss) Reclassified from Accumulated OCI into Earnings (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated OCI into Earnings (Effective Portion)*				Location of Gain or (Loss) Recognized in Earnings on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)	Amount of Gain or (Loss) Recognized in Earnings on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)**				
	Second quarter ended		Six months ended			Second quarter ended		Six months ended			Second quarter ended		Six months ended		
	June 30,		June 30,			June 30,		June 30,			June 30,		June 30,		
	2012	2011	2012	2011		2012	2011	2012	2011		2012	2011	2012	2011	
Aluminum contracts	\$ 145	\$ 97	\$ 66	\$ (92)	Sales	\$ 2	\$ (38)	\$ 2	\$ (76)	Other expenses (income), net	\$ 2	\$ (1)	\$ 9	\$	
Energy contracts			8	(5)	8	Cost of goods sold		(3)		(6)	Other expenses (income), net				
Foreign exchange contracts			1		2	Sales		1		2	Other expenses (income), net				
Interest rate contracts	(2)					Interest expense	(1)		(1)		Other expenses (income), net				
Interest rate contracts	(3)	(2)	(3)	(2)		Other expenses (income), net	1	(2)		(2)	Other expenses (income), net				
Total	\$ 140	\$ 104	\$ 58	\$ (84)			\$ 2	\$ (42)	\$ 1	\$ (82)		\$ 2	\$ (1)	\$ 9	\$

* Assuming market rates remain constant with the rates at June 30, 2012, a gain of \$31 is expected to be recognized in earnings over the next 12 months.

** For the second quarter and six months ended June 30, 2012, the amount of gain or (loss) recognized in earnings represents \$1 and \$10, respectively, related to the ineffective portion of the hedging relationships. There was also \$1 and \$(1) recognized in earnings related to the amount excluded from the assessment of hedge effectiveness for the second quarter and six months ended June 30, 2012, respectively. For the second quarter and six months ended June 30, 2011, the amount of gain or (loss) recognized in earnings related to the ineffective portion of the hedging relationships.

Aluminum and Energy. Alcoa anticipates the continued requirement to purchase aluminum and other commodities, such as electricity and natural gas, for its operations. Alcoa enters into futures and forward contracts to reduce volatility in the price of these commodities. Alcoa has also entered into power supply and other contracts that contain pricing provisions related to the LME aluminum price. The LME-linked pricing features are considered embedded derivatives. A majority of these embedded derivatives have been designated as cash flow hedges of future sales of aluminum.

Also, Alcoa has contracts to hedge the anticipated power requirements at two smelters in Australia. These derivatives hedge forecasted power purchases through December 2036.

Interest Rates. Alcoa had no outstanding cash flow hedges of interest rate exposures as of June 30, 2012. An investment accounted for on the equity method by Alcoa has entered into interest rate contracts, which are designated as cash flow hedges. Alcoa's share of the activity of these cash flow hedges is reflected in the table above.

Foreign Exchange. Alcoa is subject to exposure from fluctuations in foreign currency exchange rates. Alcoa had no outstanding cash flow hedges of foreign currency exposures as of June 30, 2012. Contracts may be used from time to time to hedge the variability in cash flows from the forecasted payment or receipt of currencies other than the functional currency. These contracts covered periods consistent with known or expected exposures through 2011.

Alcoa had the following outstanding forward contracts that were entered into to hedge forecasted transactions:

	June 30, 2012	December 31, 2011
Aluminum contracts (kmt)	1,190	1,294
Energy contracts:		
Electricity (megawatt hours)	100,578,295	100,578,295
Natural gas (million British thermal units)	17,780,000	

Other

Alcoa has certain derivative contracts that do not qualify for hedge accounting treatment and, therefore, the fair value gains and losses on these contracts are recorded in earnings as follows:

	Location of Gain or (Loss) Recognized in Earnings on	Amount of Gain or (Loss) Recognized in Earnings on Derivatives			
		Second quarter ended		Six months ended	
		June 30,		June 30,	
		2012	2011	2012	2011
Derivatives Not Designated as Hedging Instruments	Derivatives				
Aluminum contracts	Sales	\$ (6)	\$ (2)	\$ (3)	\$ 1
Aluminum contracts	Other expenses (income), net	10	3	3	(11)
Embedded credit derivative	Other expenses (income), net	(10)	(6)	(10)	3
Energy contract	Other expenses (income), net		19		31
Foreign exchange contracts	Other expenses (income), net	(2)	2	(2)	4
Total		\$ (8)	\$ 16	\$ (12)	\$ 28

The aluminum contracts relate to derivatives (recognized in Sales) and embedded derivatives (recognized in Other expenses (income), net) entered into to minimize Alcoa's price risk related to other customer sales and certain pricing arrangements.

The embedded credit derivative relates to a power contract that indexes the difference between the long-term debt ratings of Alcoa and the counterparty from any of the three major credit rating agencies. If the counterparty's lowest credit rating is greater than one rating category above Alcoa's credit ratings, an independent investment banker would be consulted to determine a hypothetical interest rate for both parties. The two interest rates would be netted and the resulting difference would be multiplied by Alcoa's equivalent percentage of the outstanding principal of the counterparty's debt obligation as of December 31 of the year preceding the calculation date. This differential would be added to the cost of power in the period following the calculation date.

The energy contract is associated with a smelter in the U.S. for a power contract that no longer qualified for the normal purchase normal sale exception and a financial contract that no longer qualified as a hedge under derivative accounting in late 2009. Alcoa's obligations under the contracts expired in September 2011.

Alcoa has a forward contract to purchase \$57 (C\$58) to mitigate the foreign currency risk related to a Canadian-denominated loan due in 2014. All other foreign exchange contracts were entered into and settled within each of the periods presented.

Material Limitations

The disclosures with respect to commodity prices, interest rates, and foreign currency exchange risk do not take into account the underlying commitments or anticipated transactions. If the underlying items were included in the analysis, the gains or losses on the futures contracts may be offset. Actual results will be determined by a number of factors that are not under Alcoa's control and could vary significantly from those factors disclosed.

Alcoa is exposed to credit loss in the event of nonperformance by counterparties on the above instruments, as well as credit or performance risk with respect to its hedged customers' commitments. Although nonperformance is possible, Alcoa does not anticipate nonperformance by any of these parties. Contracts are with creditworthy counterparties and are further supported by cash, treasury bills, or irrevocable letters of credit issued by carefully chosen banks. In addition, various master netting arrangements are in place with counterparties to facilitate settlement of gains and losses on these contracts.

Other Financial Instruments

The carrying values and fair values of Alcoa's other financial instruments were as follows:

	June 30, 2012		December 31, 2011	
	Carrying value	Fair value	Carrying value	Fair value
Cash and cash equivalents	\$ 1,712	\$ 1,712	\$ 1,939	\$ 1,939
Restricted cash	20	20	25	25
Noncurrent receivables	21	21	30	30
Available-for-sale securities	86	86	92	92
Short-term borrowings	559	559	62	62
Commercial paper	318	318	224	224
Long-term debt due within one year	118	118	445	445
Long-term debt, less amount due within one year	8,547	9,274	8,640	9,274

The following methods were used to estimate the fair values of other financial instruments:

Cash and cash equivalents, Restricted cash, Short-term borrowings, Commercial paper, and Long-term debt due within one year. The carrying amounts approximate fair value because of the short maturity of the instruments. The fair value amounts for Cash and cash equivalents, Restricted cash, and Commercial paper were classified in Level 1 and for Short-term borrowings and Long-term debt due within one year were classified in Level 2 of the fair value hierarchy.

Noncurrent receivables. The fair value of noncurrent receivables was based on anticipated cash flows, which approximates carrying value, and was classified in Level 2 of the fair value hierarchy.

Edgar Filing: ALCOA INC - Form 10-Q

Available-for-sale securities. The fair value of such securities was based on quoted market prices. These financial instruments consist of exchange-traded fixed income and equity securities, which are carried at fair value and were classified in Level 1 of the fair value hierarchy.

Long-term debt, less amount due within one year. The fair value was based on quoted market prices for public debt and on interest rates that are currently available to Alcoa for issuance of debt with similar terms and maturities for non-public debt. At June 30, 2012 and December 2011, \$8,679 and \$8,576, respectively, was classified in Level 1 of the fair value hierarchy for public debt and \$595 and \$698, respectively, was classified in Level 2 of the fair value hierarchy for non-public debt.

O. Subsequent Events Management evaluated all activity of Alcoa and concluded that no subsequent events have occurred that would require recognition in the Consolidated Financial Statements or disclosure in the Notes to the Consolidated Financial Statements.

Report of Independent Registered Public Accounting Firm*

To the Shareholders and Board of Directors of Alcoa Inc.

We have reviewed the accompanying consolidated balance sheet of Alcoa Inc. and its subsidiaries (Alcoa) as of June 30, 2012, and the related statements of consolidated operations, consolidated comprehensive (loss) income, and changes in consolidated equity for each of the three-month and six-month periods ended June 30, 2012 and 2011, and the statement of consolidated cash flows for the six-month periods ended June 30, 2012 and 2011. These consolidated interim financial statements are the responsibility of Alcoa's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2011, and the related statements of consolidated operations, changes in consolidated equity, consolidated comprehensive (loss) income, and consolidated cash flows for the year then ended (not presented herein), and in our report dated February 16, 2012, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2011, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(dollars in millions, except per share amounts and ingot prices; production and shipments in thousands of metric tons [kmt])

Results of Operations***Selected Financial Data:***

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Sales	\$ 5,963	\$ 6,585	\$ 11,969	\$ 12,543
Amounts attributable to Alcoa common shareholders:				
(Loss) income from continuing operations	\$ (2)	\$ 326	\$ 92	\$ 635
Loss from discontinued operations		(4)		(5)
Net (loss) income	\$ (2)	\$ 322	\$ 92	\$ 630
Earnings per share attributable to Alcoa common shareholders:				
Diluted (Loss) income from continuing operations	\$	\$ 0.28	\$ 0.08	\$ 0.56
Diluted Net (loss) income		0.28	0.08	0.55
Shipments of alumina (kmt)	2,194	2,378	4,487	4,584
Shipments of aluminum products (kmt)	1,305	1,268	2,600	2,480
Alcoa's average realized price per metric ton of aluminum	\$ 2,329	\$ 2,830	\$ 2,382	\$ 2,757

Loss from continuing operations attributable to Alcoa was \$2 in the 2012 second quarter compared with income from continuing operations of \$326, or \$0.28 per diluted share, in the 2011 second quarter. The decline of \$328 was primarily the result of lower realized prices for aluminum and alumina, higher input costs, charges for adjustments to litigation and environmental remediation reserves, and a net unfavorable change in mark-to-market derivative contracts. These items were somewhat offset by net productivity improvements, a significant decrease in income taxes due to lower operating results, a favorable LIFO (last in, first out) impact, and the absence of a charge related to the early retirement of outstanding debt.

Income from continuing operations attributable to Alcoa was \$92, or \$0.08 per share, in the 2012 six-month period compared with \$635, or \$0.56 per share, in the 2011 six-month period. The decrease of \$543 was principally due to lower realized prices for aluminum and alumina, higher input costs, charges for adjustments to litigation and environmental remediation reserves, and a net unfavorable change in mark-to-market derivative contracts. These items were somewhat offset by a significant decrease in income taxes due to lower operating results, net productivity improvements, a favorable LIFO impact, and the absence of a charge related to the early retirement of outstanding debt.

Sales for the 2012 second quarter and six-month period declined \$622, or 9%, and \$574, or 5%, respectively, compared to the same periods in 2011. The decrease in both periods was mainly caused by a decline in realized prices for aluminum and alumina, driven by lower London Metal Exchange (LME) prices, and unfavorable foreign currency movements, mostly due to a weaker euro, slightly offset by higher volumes in the midstream and downstream segments.

Cost of goods sold (COGS) as a percentage of Sales was 86.4% in the 2012 second quarter and 85.7% in the 2012 six-month period compared with 79.7% in the 2011 second quarter and 79.4% in the 2011 six-month period. In both periods, the percentage was negatively impacted by the previously mentioned lower realized prices, higher input costs, particularly caustic and carbon in the 2012 six-month period, a charge for a litigation reserve (\$45), and a net charge for adjustments to three environmental reserves (\$21). These items were somewhat offset by net favorable foreign currency movements due to a stronger U.S. dollar, net productivity improvements, and a change in LIFO adjustments from unfavorable to favorable, primarily due to lower prices for alumina and metal.

Selling, general administrative, and other expenses (SG&A) decreased \$8 and \$12 in the 2012 second quarter and six-month period, respectively, compared to the corresponding periods in 2011. The decline in

both periods was primarily driven by less spending across various expenses, including travel expenses, selling and marketing expenses, and charges for stock-based compensation, mostly offset by an increase in professional service and consulting fees. SG&A as a percentage of Sales increased from 3.8% in the 2011 second quarter to 4.1% in the 2012 second quarter, and from 4.0% in the 2011 six-month period to 4.1% in the 2012 six-month period.

Restructuring and other charges were \$15 (\$10 after-tax and noncontrolling interests) and \$25 (\$17 after-tax and noncontrolling interests) in the 2012 second quarter and six-month period, respectively.

In the 2012 second quarter, Restructuring and other charges included \$9 (\$5 after-tax) for lease termination costs; \$6 (\$4 after-tax and noncontrolling interests) for the layoff of approximately 110 employees (25 in the Alumina segment, 10 in the Primary Metals segment, and 75 in Corporate); \$1 (\$1 after-tax) in other miscellaneous charges; and \$1 (less than \$1 after-tax) for the reversal of a number of small layoff reserves related to prior periods.

In the 2012 six-month period, Restructuring and other charges included \$17 (\$12 after-tax and noncontrolling interests) for the layoff of approximately 330 employees (160 in the Primary Metals segment, 70 in the Engineered Products and Solutions segment, 25 in the Alumina segment, and 75 in Corporate), including \$6 (\$4 after-tax) for the layoff of an additional 150 employees related to the previously reported smelter curtailments in Spain; \$9 (\$5 after-tax) for lease termination costs; \$2 (\$2 after-tax) in other miscellaneous charges; and \$3 (\$2 after-tax and noncontrolling interests) for the reversal of a number of small layoff reserves related to prior periods.

Restructuring and other charges were \$34 (\$16 after-tax and noncontrolling interests) and \$40 (\$21 after-tax and noncontrolling interests) in the 2011 second quarter and six-month period, respectively.

In the 2011 second quarter, Restructuring and other charges included \$20 (\$8 after-tax and noncontrolling interests) for a litigation matter related to the former St. Croix location; \$8 (\$4 after-tax and noncontrolling interests) for the layoff of approximately 120 employees (70 in the Primary Metals segment, 30 in the Engineered Products and Solutions segment, and 20 in the Alumina segment); a \$6 (\$4 after-tax) charge for an adjustment to the fair value of the one remaining foil location classified as held for sale due to foreign currency movements (this business was removed from held for sale classification in the fourth quarter of 2011); a net charge of \$2 (\$2 after-tax) for other various items; and \$2 (\$2 after-tax) for the reversal of a number of small, previously recorded layoff reserves.

In the 2011 six-month period, Restructuring and other charges included the previously mentioned \$20 (\$8 after-tax and noncontrolling interests); \$13 (\$8 after-tax and noncontrolling interests) for the layoff of approximately 480 employees (350 in the Global Rolled Products segment, 70 in the Primary Metals segment, 30 in the Alumina segment, and 30 in the Engineered Products and Solutions segment); an \$8 (\$5 after-tax) charge for an adjustment to the fair value of the one remaining foil location classified as held for sale due to foreign currency movements (this business was removed from held for sale classification in the fourth quarter of 2011); a net charge of \$3 (\$3 after-tax) for other various items; and \$4 (\$3 after-tax) for the reversal of a number of small, previously recorded layoff reserves.

Alcoa does not include Restructuring and other charges in the results of its reportable segments. The pretax impact of allocating such charges to segment results would have been as follows:

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Alumina	\$ 1	\$ 25	\$ 1	\$ 26
Primary Metals	1		6	2
Global Rolled Products			1	2
Engineered Products and Solutions		3	3	3
Segment total	2	28	11	33
Corporate	13	6	14	7
Total restructuring and other charges	\$ 15	\$ 34	\$ 25	\$ 40

As of June 30, 2012, approximately 40 of the 330 employees associated with 2012 restructuring programs, approximately 535 of the 1,600 employees associated with 2011 restructuring programs, approximately 810 of the 875 employees associated with 2010 restructuring programs, and approximately 5,810 of the 6,000 employees associated with 2009 restructuring programs were separated. The remaining separations for a portion of the 2012 restructuring programs and all of the 2011, 2010, and 2009 restructuring programs are expected to be completed by the end

of 2012.

In the 2012 second quarter and six-month period, cash payments of \$1 and \$3, respectively, were made against the layoff reserves related to the 2012 restructuring programs; \$6 and \$14, respectively, were made

against the layoff reserves related to the 2011 restructuring programs; and less than \$1 and \$2, respectively, were made against the layoff reserves related to the 2010 restructuring programs.

Interest expense dropped \$40, or 25%, and \$28, or 10%, in the 2012 second quarter and six-month period, respectively, compared to the corresponding periods in 2011. In both periods, the decrease was principally the result of the absence of a \$41 net charge related to the early retirement of various outstanding notes (\$74 in purchase premiums paid partially offset by a \$33 gain for in-the-money interest rate swaps). Lower capitalized interest (\$10) somewhat offset the absence of the previously mentioned charge in the 2012 six-month period.

Other expenses, net was \$22 in the 2012 second quarter and \$6 in the 2012 six-month period compared with Other income, net of \$50 in the 2011 second quarter and \$78 in the 2011 six-month period. The change in both periods was mainly the result of lower equity income, largely attributable to the absence of a discrete income tax benefit recognized by the consortium related to an investment in a natural gas pipeline in Australia (Alcoa World Alumina and Chemicals share of the benefit was \$24); a net unfavorable change in mark-to-market derivative contracts (\$20 in the second quarter and \$36 in the six-month period comparisons), mostly driven by the absence of a favorable change in an energy contract that expired in September 2011; and net unfavorable foreign currency movements (\$20 in the second quarter and \$29 in the six-month period comparisons). In the 2012 six-month period, the previously mentioned items were slightly offset by a \$10 higher gain recognized for the ineffective portion of aluminum cash flow hedges, due to significantly higher Midwest premiums, which are not hedged.

The effective tax rate for the second quarter of 2012 and 2011 was 216.7% (provision on a loss) and 26.3% (provision on income), respectively.

The rate for the 2012 second quarter differs from the U.S. federal statutory rate of 35% primarily due to an \$8 discrete income tax charge related to prior year U.S. taxes on certain depletable assets and a net \$2 discrete income tax charge for other miscellaneous items.

The rate for the 2011 second quarter differs from the U.S. federal statutory rate of 35% primarily due to foreign income taxed in lower rate jurisdictions.

The effective tax rate for the 2012 and 2011 six-month periods was 39.4% (provision on income) and 26.9% (provision on income), respectively.

The rate for the 2012 six-month period differs from the U.S. federal statutory rate of 35% primarily due to the previously mentioned discrete income tax charges, partially offset by foreign income taxed in lower rate jurisdictions.

The rate for the 2011 six-month period differs from the U.S. federal statutory rate of 35% primarily due to foreign income taxed in lower rate jurisdictions.

Net loss attributable to noncontrolling interests for the 2012 second quarter and six-month period was \$17 and \$12, respectively, compared to Net income attributable to noncontrolling interests of \$55 and \$113 in the 2011 second quarter and six-month period, respectively. The change in both periods was primarily due to lower earnings at Alcoa World Alumina and Chemicals (AWAC), which is owned 60% by Alcoa and 40% by Alumina Limited. The decreased earnings at AWAC were mainly driven by lower realized prices, due to a decrease in contractual LME-based pricing; higher input costs, particularly caustic; and a charge for a litigation reserve of \$18; slightly offset by net favorable foreign currency movements due to a stronger U.S. dollar.

Segment Information

Alumina

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Alumina production (kmt)	4,033	4,144	8,186	8,168
Third-party alumina shipments (kmt)	2,194	2,378	4,487	4,584
Third-party sales	\$ 750	\$ 926	\$ 1,525	\$ 1,736
Intersegment sales	576	723	1,193	1,356
Total sales	\$ 1,326	\$ 1,649	\$ 2,718	\$ 3,092

Edgar Filing: ALCOA INC - Form 10-Q

After-tax operating income (ATOI)	\$ 23	\$ 186	\$ 58	\$ 328
-----------------------------------	-------	--------	-------	--------

Alumina production decreased 3% in the 2012 second quarter and was flat in the 2012 six-month period compared with the corresponding periods in 2011. The decline in the 2012 second quarter was largely due to lower production at the refineries in Suriname, Jamaica, and Spain as a result of the initiation of management's plan to reduce annual production capacity by approximately 390 kmt to align production with smelter curtailments initiated during the first quarter of 2012 and to reflect prevailing market conditions. In the 2012 six-month period, higher production at the three refineries in Australia and the São Luís (Brazil) refinery, due to system process improvements, was mostly offset by lower production at the refineries in Suriname, Jamaica, and Spain.

Third-party sales for the Alumina segment dropped 19% in the 2012 second quarter and 12% in the 2012 six-month period compared with the same periods in 2011. In both periods, the decrease was primarily due to a 17% (second quarter) and 15% (six months) decline in realized prices, driven by a decrease in contractual LME-based pricing, and an 8% (second quarter) and 2% (six months) decline in volumes.

Intersegment sales decreased 20% and 12% in the 2012 second quarter and six-month period, respectively, compared to the corresponding periods in 2011, mostly due to lower realized prices and decreased demand from the Primary Metals segment.

ATOI for this segment declined 88% in the 2012 second quarter and 82% in the 2012 six-month period compared to the same periods in 2011. The decrease in both periods was primarily the result of the previously mentioned lower realized prices and higher input costs, particularly caustic, slightly offset by net favorable foreign currency movements due to a stronger U.S. dollar, especially against the Brazilian real (second quarter and six months) and Australian dollar (second quarter). In the 2012 six-month period, net productivity improvements also positively impacted ATOI.

In the third quarter of 2012, as the shift from LME-linked contracts to the alumina price index continues, approximately 34% of this segment's third-party shipments are expected to be priced on the alumina price index. Also, lower production will continue to occur to reflect prevailing market conditions. Furthermore, the refineries in Australia will be subject to a carbon tax approved by the Australian government in late 2011 related to greenhouse gas emissions; this tax is not expected to have a significant impact on the Alumina segment's results.

Primary Metals

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Aluminum production (kmt)	941	945	1,892	1,849
Third-party aluminum shipments (kmt)	749	724	1,520	1,422
Alcoa's average realized price per metric ton of aluminum	\$ 2,329	\$ 2,830	\$ 2,382	\$ 2,757
Third-party sales	\$ 1,804	\$ 2,145	\$ 3,748	\$ 4,125
Intersegment sales	782	922	1,543	1,761
Total sales	\$ 2,586	\$ 3,067	\$ 5,291	\$ 5,886

ATOI	\$ (3)	\$ 201	\$ 7	\$ 403
------	--------	--------	------	--------

At June 30, 2012, Alcoa had 474 kmt of idle capacity on a base capacity of 4,227 kmt. In the 2012 second quarter, idle capacity increased by 121 kmt compared to March 31, 2012, mostly due to the temporarily curtailment of a portion of the smelters in Spain: Avilés (46 kmt out of 93 kmt-per-year) and La Coruña (44 kmt out of 87 kmt-per-year). The decision to temporarily curtail a portion of these facilities was made at the end of 2011, resulting from uncompetitive energy positions at the smelters, combined with rising material costs and falling aluminum prices.

Aluminum production was flat in the 2012 second quarter and up 2% in the 2012 six-month period compared with the corresponding periods in 2011. In the 2012 second quarter, lower production at the two partially curtailed smelters in Spain was offset by higher production at the smelter in Massena East, NY. The improvement in the 2012 six-month period was primarily due to higher production at the Massena East, Ferndale, WA, and Wenatchee, WA smelters, slightly offset by lower production at the two partially curtailed

smelters in Spain. In both periods, the improvements at the mentioned smelters were due to capacity that was restarted during the first quarter of 2011 (Massena East (125 kmt-per-year), Ferndale (Intalco: 47 kmt-per-year), and Wenatchee (43 kmt-per-year)). The full restarts of this U.S. capacity were achieved by the end of 2011.

Third-party sales for the Primary Metals segment decreased 16% in the 2012 second quarter and 9% in the 2012 six-month period compared with the same periods in 2011. The decline in both periods was mostly the result of an 18% (second quarter) and a 14% (six months) drop in realized prices, driven by 24% (second quarter) and 19% (six months) lower LME prices. In the 2012 six-month period, higher volumes, largely attributable to the previously mentioned restarted U.S. capacity, slightly offset the decrease in realized prices.

Intersegment sales declined 15% and 12% in the 2012 second quarter and six-month period, respectively, compared to the corresponding periods in 2011, mainly as a result of a decrease in realized prices, driven by the lower LME, somewhat offset by higher buy/resell activity.

ATOI for this segment declined \$204 in the 2012 second quarter and \$396 in the 2012 six-month period compared to the same periods in 2011. In both periods, the decrease was primarily due to the previously mentioned drop in realized prices; higher input costs, particularly carbon in the 2012 six-month period; and a \$7 impact as a result of business interruption and repair costs related to a fire in March 2012 at the Massena West, NY cast house; somewhat offset by net favorable foreign currency movements due to a stronger U.S. dollar, particularly against the euro and Brazilian real; lower costs for alumina (LME-linked) and energy; and net productivity improvements.

In the third quarter of 2012, net productivity improvements are expected to continue while energy costs will increase due to higher seasonal pricing. Also, an additional negative impact to ATOI of approximately \$10 related to the fire at the cast house of the Massena West location is expected. Furthermore, the smelters in Australia will be subject to a carbon tax approved by the Australian government in late 2011 related to greenhouse gas emissions; this tax is not expected to have a significant impact on the Primary Metals segment's results.

Global Rolled Products

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Third-party aluminum shipments (kmt)	484	473	936	919
Third-party sales	\$ 1,913	\$ 2,085	\$ 3,758	\$ 3,977
Intersegment sales	44	62	88	131
Total sales	\$ 1,957	\$ 2,147	\$ 3,846	\$ 4,108
ATOI	\$ 95	\$ 99	\$ 191	\$ 180

Third-party sales for the Global Rolled Products segment decreased 8% and 6% in the 2012 second quarter and six-month period, respectively, compared with the corresponding periods in 2011. In both periods, the decline was principally the result of unfavorable pricing due to a decrease in metal prices and unfavorable foreign currency movements, mostly due to a weaker euro. Slightly offsetting these negative impacts in both periods was higher volumes, largely attributable to the packaging, commercial transportation, and aerospace markets, partially offset by the industrial products and building and construction markets.

ATOI for this segment declined 4% in the 2012 second quarter and improved 6% in the 2012 six-month period compared to the same periods in 2011. In the 2012 second quarter, the decrease was principally related to unfavorable pricing and net unfavorable foreign currency movements due to a weaker euro, mostly offset by net productivity improvements across all businesses. The increase in the 2012 six-month period was mainly driven by net productivity improvements across all businesses, somewhat offset by net unfavorable foreign currency movements due to a weaker euro.

In the third quarter of 2012, the aerospace and automotive markets are expected to remain strong, partly offset by seasonal impacts from summer plant shutdowns in Europe. Also, continued net productivity improvements are anticipated. Additionally, slower growth rates in China and Russia are expected, while uncertainty will remain in the European markets.

Engineered Products and Solutions

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Third-party aluminum shipments (kmt)	59	57	117	112
Third-party sales	\$ 1,420	\$ 1,370	\$ 2,810	\$ 2,617
ATOI	\$ 160	\$ 149	\$ 315	\$ 279

Third-party sales for the Engineered Products and Solutions segment rose 4% and 7% in the 2012 second quarter and six-month period, respectively, compared with the corresponding periods in 2011. The increase in both periods was principally due to higher volumes across most businesses, especially related to the aerospace and commercial transportation end markets, somewhat offset in the 2012 second quarter and slightly offset in the 2012 six-month period by unfavorable foreign currency movements due to a weaker euro.

ATOI for this segment improved 7% in the 2012 second quarter and 13% in the 2012 six-month period compared to the same periods in 2011. In both periods, the increase was mainly the result of the previously mentioned volume impacts and net productivity improvements, slightly offset by a \$5 impact from the fire at the Massena West cast house (see Primary Metals above), as aluminum billet that was supplied from this location to certain wheels and forgings/extrusions operations were purchased from other sources resulting in a higher cost.

In the third quarter of 2012, net productivity improvements and share gains through innovation are anticipated. Also, seasonal impacts from summer plant shutdowns in Europe across all sectors and deterioration in the global Building and Construction market are expected. Additionally, the fire at the Massena West cast house will result in an unfavorable impact to ATOI of approximately \$5.

Reconciliation of ATOI to Consolidated Net (Loss) Income Attributable to Alcoa

Items required to reconcile total segment ATOI to consolidated net (loss) income attributable to Alcoa include: the impact of LIFO inventory accounting; interest expense; noncontrolling interests; corporate expense (general administrative and selling expenses of operating the corporate headquarters and other global administrative facilities, along with depreciation and amortization on corporate-owned assets); restructuring and other charges; discontinued operations; and other items, including intersegment profit eliminations and other metal adjustments, differences between tax rates applicable to the segments and the consolidated effective tax rate, the results of the soft alloy extrusions business in Brazil, and other nonoperating items such as foreign currency transaction gains/losses and interest income.

The following table reconciles total segment ATOI to consolidated net (loss) income attributable to Alcoa:

	Second quarter ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Total segment ATOI	\$ 275	\$ 635	\$ 571	\$ 1,190
Unallocated amounts (net of tax):				
Impact of LIFO	19	(27)	19	(51)
Interest expense	(80)	(106)	(160)	(178)
Noncontrolling interests	17	(55)	12	(113)
Corporate expense	(69)	(76)	(133)	(143)
Restructuring and other charges	(10)	(22)	(17)	(28)
Discontinued operations		(4)		(5)
Other	(154)	(23)	(200)	(42)
Consolidated net (loss) income attributable to Alcoa	\$ (2)	\$ 322	\$ 92	\$ 630

The significant changes in the reconciling items between total segment ATOI and consolidated net (loss) income attributable to Alcoa for the 2012 second quarter and six-month period compared with the corresponding periods in 2011 (unless otherwise noted) consisted of:

a change in the Impact of LIFO due to lower prices for alumina and metal, both of which were driven by a decline in LME prices;

a decline in Interest expense, principally caused by the absence of a \$27 net charge related to the early retirement of various outstanding notes (\$48 in purchase premiums paid partially offset by a \$21 gain for in-the-money interest rate swaps), somewhat offset in the 2012 six-month period by lower capitalized interest (\$7);

a decrease in Noncontrolling interests, mainly due to lower earnings at AWAC, principally driven by lower realized prices, due to a decrease in contractual LME-based pricing; higher input costs, particularly caustic; and a charge for a litigation reserve (\$18); slightly offset by net favorable foreign currency movements due to a stronger U.S. dollar; and

a change in Other, mostly driven by a net unfavorable change in mark-to-market derivative contracts (\$13 in the second quarter and \$23 in the six-month period comparisons), largely attributable to the absence of a favorable change in an energy contract that expired in September 2011, net unfavorable foreign currency movements (\$13 in the second quarter and \$19 in the six-month period comparisons), a charge for a litigation reserve (\$18), and a net charge for adjustments to three environmental reserves (\$13).

Environmental Matters

See the Environmental Matters section of Note G to the Consolidated Financial Statements in Part I Item 1 of this Form 10-Q.

Liquidity and Capital Resources

Cash From Operations

Cash provided from operations was \$301 in the 2012 six-month period compared with \$562 in the same period of 2011. The decrease of \$261 was principally due to significantly lower operating results and higher pension contributions of \$249, partially offset by a lower net cash outflow associated with working capital of \$347, a favorable change of \$178 in noncurrent assets, and a higher cash inflow of \$113 in noncurrent liabilities.

The major components of the lower net cash outflow in working capital were as follows: a smaller outflow of \$223 in receivables, primarily related to fewer customer sales; a lower outflow of \$334 in inventories, mostly due to smaller levels of on-hand alumina and aluminum product levels; a positive change of \$35 in prepaid expenses and other current assets, mainly caused by a reduction in outflows for prepaid taxes and value-added taxes; a negative change of \$229 in accounts payable, trade, principally the result of fewer inventory-related purchasing needs; a lower outflow of \$71 in accrued expenses, largely attributable to an increase in deferred revenue; and a negative change of \$87 in taxes, including income taxes, mainly due to less income taxes caused by lower positive operating results.

The higher pension contributions were principally driven by cash contributions made to U.S. pension plans towards maintaining an approximately 80% funded status. In the 2011 six-month period, Alcoa made a \$600 contribution to U.S. pension plans in the form of common stock.

In June 2012, Alcoa received formal notification from the Italian Government requesting a net payment of \$310 (€250) related to a November 2009 European Commission decision on electricity pricing for smelters. Alcoa has been in discussions with the Italian Government regarding the timing of such payment. Alcoa will commence payment of the requested amount in five quarterly installments of \$62 (€50) beginning in the fourth quarter of 2012. It is possible that Alcoa may be required to accelerate payment or pay in a lump sum.

On July 6, 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21) was signed into law by the United States government. MAP-21, in part, provides temporary relief for employers who sponsor defined benefit pension plans related to funding contributions under the Employee Retirement Income Security Act of 1974. Specifically, MAP-21 allows for the use of a 25-year average interest rate within an upper and lower range for purposes of determining minimum funding obligations instead of an average interest rate for the two most recent years, as currently is the case. This relief will have an immediate impact on the calculation of remaining funding contributions in 2012. Management expects to reduce its estimated minimum required pension funding by \$100 to \$130 in 2012 and by \$225 to \$250 in 2013.

Financing Activities

Cash provided from financing activities was \$196 in the 2012 six-month period, an increase of \$156 compared with \$40 in the corresponding period of 2011.

The source of cash in the 2012 six-month period was primarily due to \$735 in additions to debt, principally the result of \$450 in borrowings under three new short-term facilities, mainly for working capital purposes (see below), and \$280 in new short-term loans to support the export operations of a subsidiary in Brazil; a change of \$138 in short-term borrowings and commercial paper; and net cash received from noncontrolling interests of \$40, all of which relates to Alumina Limited's share of AWAC; mostly offset by \$659 in payments on debt, mainly related to \$322 for the repayment of 6% Notes due 2012 as scheduled, \$275 for the repayment of most of the new short-term loans to support the export operations of a subsidiary in Brazil, and \$55 for previous borrowings on the loans supporting the São Luís refinery expansion, Juruti bauxite mine development, and Estreito hydroelectric power project in Brazil; and \$66 in dividends paid to shareholders.

In the 2011 six-month period, the source of cash was primarily due to \$1,254 in additions to long-term debt, \$1,248 of which was for the issuance of 5.40% Notes due 2021, mostly offset by \$1,095 in payments on long-term debt, mostly related to \$881 for the early retirement of all of the 5.375% Notes due 2013 and a portion of the 6.00% Notes due 2013, \$164 for previous borrowings on the loans supporting the São Luís refinery expansion and Juruti bauxite mine development in Brazil, and \$45 for a loan associated with the Samara, Russia facility; \$65 in dividends paid to shareholders; and net cash distributed to noncontrolling interests of \$59, all of which relates to Alumina Limited's share of AWAC.

In January 2012, Alcoa entered into two term loan agreements, totaling \$350, with two separate financial institutions and a revolving credit agreement, providing a \$100 credit facility, with a third financial institution. In February 2012, Alcoa entered into another revolving credit agreement, providing a \$100 credit facility, with a fourth financial institution. In June 2012, Alcoa entered into a third revolving credit agreement, providing a \$150 credit facility, with a fifth institution. The purpose of any borrowings under all five arrangements will be to provide working capital and for other general corporate purposes, including contributions to Alcoa's pension plans (\$139 and \$352 was contributed in the 2012 second quarter and six-month period, respectively). The two term loans were fully drawn on the same dates as the agreements and are subject to an interest rate equivalent to the 1-month LIBOR (changed from the 3-month LIBOR in April 2012) plus a 1.5% margin. In February 2012, Alcoa borrowed the \$100 under the first credit facility. This borrowing is subject to an interest rate equivalent to the 6-month LIBOR plus a 1.25% margin. The two term loans mature in December 2012 (originally July 2012, extended in June 2012), the first two revolving credit facilities expire in December 2012, and the third revolving credit facility expires in March 2013. The covenants contained in all five arrangements are the same as Alcoa's Five-Year Revolving Credit Agreement (see the Financing Activities section of Liquidity and Capital Resources included in Part II Item 7 of Alcoa's 2011 Form 10-K).

Investing Activities

Cash used for investing activities was \$704 in the 2012 six-month period compared with \$902 in the 2011 six-month period, resulting in a decrease in cash used of \$198.

In the 2012 six-month period, the use of cash was mainly due to \$561 in capital expenditures, 31% of which related to growth projects, including the automotive expansion at the Davenport, IA fabrication plant and the Estreito hydroelectric power project; and \$187 in additions to investments, mostly for the equity contributions of \$165 related to the aluminum complex joint venture in Saudi Arabia.

The use of cash in the 2011 six-month period was mainly due to \$476 in capital expenditures, 33% of which related to growth projects, including the Estreito hydroelectric power project and Juruti bauxite mine development; \$239 (net of cash acquired) for the acquisition of an aerospace fastener business; and \$199 in additions to investments, mostly for the equity contributions of \$152 related to the aluminum complex joint venture in Saudi Arabia and of \$16 related to the natural gas pipeline consortium in Australia.

In June 2012, Alcoa reached an agreement to sell its 351-megawatt Tapoco Hydroelectric Project (Tapoco) to Brookfield Renewable Energy Partners for \$600 in cash, subject to certain post-closing adjustments. Tapoco is a four-station hydroelectric project located on the Little Tennessee and Cheoah Rivers in eastern Tennessee and western North Carolina. The transaction, which is subject to customary federal and state regulatory approvals, will include four generating stations and dams, 86 miles of transmission line, and approximately 14,500 acres of land associated with and surrounding Tapoco.

Recently Adopted and Recently Issued Accounting Guidance

See Note B to the Consolidated Financial Statements in Part I Item 1 of this Form 10-Q.

Forward-Looking Statements

This report contains statements that relate to future events and expectations and, as such, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include those containing such words as anticipates, believes, estimates, expects, forecasts, hopes, outlook, plans, projects, should, targets, will, or other words or phrases that reflect Alcoa's expectations, assumptions, or projections about the future other than statements of historical fact. Forward-looking statements, including, without limitation, forecasts concerning global demand for aluminum, end market conditions or other trend projections, anticipated financial results or operating performance, and statements about Alcoa's strategies, objectives, goals, targets, outlook, and business and financial prospects. Forward-looking statements are subject to a number of known and unknown risks, uncertainties, and other factors and are not guarantees of future performance. Actual results, performance, or outcomes may differ materially from those expressed in or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from those in the forward-looking statements include: (a) material adverse changes in aluminum industry conditions, including global supply and demand conditions and fluctuations in London Metal Exchange-based prices for primary aluminum, alumina, and other products, and fluctuations in index-based and spot prices for alumina; (b) global economic and financial market conditions generally, including the risk of another global economic downturn and uncertainties regarding the effects of sovereign debt issues or government intervention into the markets to address economic conditions; (c) unfavorable changes in the markets served by Alcoa, including automotive and commercial transportation, aerospace, building and construction, distribution, packaging, oil and gas, defense, and industrial gas turbine; (d) the impact of changes in foreign currency exchange rates on costs and results, particularly the Australian dollar, Brazilian real, Canadian dollar, euro, and Norwegian kroner; (e) increases in energy costs, including electricity, natural gas, and fuel oil, or the unavailability or interruption of energy supplies; (f) increases in the costs of other raw materials, including caustic soda or carbon products; (g) Alcoa's inability to achieve the level of revenue growth, cash generation, cost savings, improvement in profitability and margins, fiscal discipline, or strengthening of operations anticipated from its restructuring programs, cash sustainability, productivity improvement, and other initiatives; (h) Alcoa's inability to realize expected benefits, in each case as planned and by targeted completion dates, from sales of non-core assets, such as the announced sale of the Tapoco hydroelectric project, or from newly constructed, expanded, or acquired facilities, such as the upstream operations in Brazil and the investments in hydropower projects in Brazil, or from international joint ventures, including the joint venture in Saudi Arabia; (i) political, economic, and regulatory risks in the countries in which Alcoa operates or sells products, including unfavorable changes in laws and governmental policies, civil unrest, and other events beyond Alcoa's control; (j) the outcome of contingencies, including legal proceedings, government investigations, and environmental remediation; (k) the outcome of negotiations with, and the business or financial condition of, key customers, suppliers, and business partners; (l) changes in tax rates or benefits; (m) changes in discount rates or investment returns on pension assets; and (n) the other risk factors summarized in Alcoa's Form 10-K, including under Part I, Item 1A, for the year ended December 31, 2011 and the following sections of this report: Note G and the Derivatives section of Note N to the Consolidated Financial Statements and the discussion included above under Segment Information. Alcoa disclaims any intention or obligation to update publicly any forward-looking statements, whether in response to new information, future events, or otherwise, except as required by applicable law.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

See the Derivatives section of Note N to the Consolidated Financial Statements in Part I Item 1 of this Form 10-Q.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

Alcoa's Chief Executive Officer and Chief Financial Officer have evaluated the company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as of the end of the period covered by this report, and they have concluded that these controls and procedures are effective.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in internal control over financial reporting during the second quarter of 2012, that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

Litigation

As previously reported, on February 27, 2008, Alcoa Inc. received notice that Aluminium Bahrain B.S.C. (Alba) had filed suit against Alcoa Inc. and Alcoa World Alumina LLC (collectively, Alcoa), and others, in the U.S. District Court for the Western District of Pennsylvania (the Court), Civil Action number 08-299, styled Aluminium Bahrain B.S.C. v. Alcoa Inc., Alcoa World Alumina LLC, William Rice, and Victor Phillip Dahdaleh. The complaint alleges that certain Alcoa entities and their agents, including Victor Phillip Dahdaleh, have engaged in a conspiracy over a period of 15 years to defraud Alba. The complaint further alleges that Alcoa and its employees or agents (1) illegally bribed officials of the government of Bahrain and (or) officers of Alba in order to force Alba to purchase alumina at excessively high prices, (2) illegally bribed officials of the government of Bahrain and (or) officers of Alba and issued threats in order to pressure Alba to enter into an agreement by which Alcoa would purchase an equity interest in Alba, and (3) assigned portions of existing supply contracts between Alcoa and Alba for the sole purpose of facilitating alleged bribes and unlawful commissions. The complaint alleges that Alcoa and the other defendants violated the Racketeer Influenced and Corrupt Organizations Act (RICO) and committed fraud. Alba seeks treble damages with respect to its RICO claims. Alba's complaint seeks compensatory, consequential, exemplary, and punitive damages, rescission of the 2005 alumina supply contract, and attorneys' fees and costs.

On February 26, 2008, Alcoa Inc. had advised the U.S. Department of Justice (the DOJ) and the Securities and Exchange Commission (the SEC) that it had recently become aware of these claims, had already begun an internal investigation, and intended to cooperate fully in any investigation that the DOJ or the SEC may commence. On March 17, 2008, the DOJ notified Alcoa that it had opened a formal investigation and Alcoa has been cooperating with the government.

In response to a motion filed by the DOJ on March 27, 2008, the Court ordered the suit filed by Alba to be administratively closed and that all discovery be stayed to allow the DOJ to fully conduct an investigation without the interference and distraction of ongoing civil litigation. The Court further ordered that the case will be reopened at the close of the DOJ's investigation. On November 8, 2011, at Alcoa's request, the Court removed the case from administrative stay and ordered Alba to file an Amended Complaint by November 28, 2011, and a RICO Case Statement 30 days thereafter for the limited purpose of allowing Alcoa to move to dismiss Alba's lawsuit. Alba's Amended Complaint was filed on November 28, 2011, and its RICO Case Statement was filed on December 28, 2011. Alcoa filed its motion to dismiss the Amended Complaint on January 27, 2012, which was denied on June 11, 2012. On June 25, 2012, the Court held a status conference to discuss discovery and directed the parties to enter into mandatory alternative dispute resolution. On July 25, 2012, Alcoa filed a Consent Motion to extend the date upon which Alcoa's Answer to the Amended Complaint is due to September 7, 2012, an extension to which Alba has agreed. During the second quarter of 2012, Alcoa proposed to settle the suit by offering Alba a cash payment of \$45 million. Alcoa has also offered Alba a long-term alumina supply contract. Based on the cash offer, Alcoa recorded a \$45 million (\$18 million after-tax and noncontrolling interest) charge in the 2012 second quarter representing Alcoa's estimate of the minimum end of the range probable to settle the case. Alcoa currently estimates an additional reasonably possible charge of up to \$75 million to settle the suit. Alba has claimed damages in excess of \$1 billion and sought treble damages under RICO.

The DOJ's and the SEC's investigations are ongoing. Alcoa has been in dialogue with both the DOJ and the SEC and is exploring whether a settlement can be reached. Given the uncertainty regarding whether a settlement can be reached and what the terms of any such settlement would be, Alcoa is unable to estimate a range of reasonably possible loss with regard to any such settlement. However, Alcoa expects the amount of any such settlement would be material in a particular period to Alcoa's results of operations. If a settlement cannot be reached, Alcoa will proceed to trial with the DOJ and the SEC and under those circumstances is unable to predict an outcome or to estimate a range of reasonably possible loss. There can be no assurance that the final outcome of the government's investigations would not have a material adverse effect on Alcoa.

On June 19, 2012, Catherine Rubery (plaintiff) filed a shareholder derivative suit in the United States District Court for the Western District of Pennsylvania against Bill Rice, Victor Dahdaleh and current and former members of the Alcoa Board of Directors (collectively, defendants) claiming breach of fiduciary duty and corporate waste. This derivative action stems from the previously disclosed civil litigation brought by Alba against Alcoa, and the subsequent investigation of Alcoa by the DOJ and the SEC described above. This derivative action claims that defendants caused or failed to prevent illegal bribes of foreign officials, failed to implement an internal controls system to prevent bribes from occurring and wasted corporate assets by paying improper bribes and incurring substantial legal liability. Furthermore, plaintiff seeks an order of contribution and indemnification from defendants. The derivative action is in its preliminary stage and Alcoa is unable to reasonably predict an outcome or to estimate a range of reasonably possible loss.

As previously reported, in November 2006, in *Curtis v. Alcoa Inc.*, Civil Action No. 3:06cv448 (E.D. Tenn.), a class action was filed by plaintiffs representing approximately 13,000 retired former employees of Alcoa or Reynolds Metals Company and spouses and dependents of such retirees alleging violation of the Employee Retirement Income Security Act (ERISA) and the Labor-Management Relations Act by requiring plaintiffs, beginning January 1, 2007, to pay health insurance premiums and increased co-payments and co-insurance for certain medical procedures and prescription drugs. Plaintiffs alleged these changes to their retiree health care plans violated their rights to vested health care benefits. Plaintiffs additionally alleged that Alcoa had breached its fiduciary duty to plaintiffs under ERISA by misrepresenting to them that their health benefits would never change. Plaintiffs sought injunctive and declaratory relief, back payment of benefits, and attorneys' fees. Alcoa had consented to treatment of plaintiffs' claims as a class action. During the fourth quarter of 2007, following briefing and argument, the court ordered consolidation of the plaintiffs' motion for preliminary injunction with trial, certified a plaintiff class, bifurcated and stayed the plaintiffs' breach of fiduciary duty claims, struck the plaintiffs' jury demand, but indicated it would use an advisory jury, and set a trial date of September 17, 2008. In August 2008, the court set a new trial date of March 24, 2009 and, subsequently, the trial date was moved to September 22, 2009. In June 2009, the court indicated that it would not use an advisory jury at trial. Trial in the matter was held over eight days commencing September 22, 2009 and ending on October 1, 2009 in federal court in Knoxville, TN before the Honorable Thomas Phillips, U.S. District Court Judge. At the conclusion of evidence, the court set a post-hearing briefing schedule for submission of proposed findings of fact and conclusions of law by the parties and for replies to the same. Post trial briefing was submitted on December 4, 2009.

On March 9, 2011, the court issued a judgment order dismissing plaintiffs' lawsuit in its entirety with prejudice for the reasons stated in its Findings of Fact and Conclusions of Law. On March 23, 2011, plaintiffs filed a motion for clarification and/or amendment of the judgment order, which seeks, among other things, a declaration that plaintiffs' retiree benefits are vested subject to an annual cap and an injunction preventing Alcoa, prior to 2017, from modifying the plan design to which plaintiffs are subject or changing the premiums and deductibles that plaintiffs must pay. Also on March 23, 2011, plaintiffs filed a motion for award of attorneys' fees and expenses. Alcoa filed its opposition to both motions on April 11, 2011. On June 11, 2012, the court issued its memorandum and order denying plaintiffs' motion for clarification and/or amendment to the original judgment order. On July 6, 2012, plaintiffs filed a notice of appeal of the court's March 9, 2011 judgment. On July 12, 2012, the court stayed Alcoa's motion for assessment of costs pending resolution of plaintiff's appeal.

As previously reported, before 2002, Alcoa purchased power in Italy in the regulated energy market and received a drawback of a portion of the price of power under a special tariff in an amount calculated in accordance with a published resolution of the Italian Energy Authority, Energy Authority Resolution n. 204/1999 (204/1999). In 2001, the Energy Authority published another resolution, which clarified that the drawback would be calculated in the same manner, and in the same amount, in either the regulated or unregulated market. At the beginning of 2002, Alcoa left the regulated energy market to purchase energy in the unregulated market. Subsequently, in 2004, the Energy Authority introduced regulation no. 148/2004 which set forth a different method for calculating the special tariff that would result in a different drawback for the regulated and unregulated markets. Alcoa challenged the new regulation in the Administrative Court of Milan and received a favorable judgment in 2006. Following this ruling, Alcoa continued to receive the power price drawback in accordance with the original calculation method, through 2009, when the European Commission declared all such special tariffs to be impermissible state aid. In 2010, the Energy Authority appealed the 2006 ruling to the Consiglio di Stato (final court of appeal). On December 2, 2011, the Consiglio di Stato ruled in favor of the Energy Authority and against Alcoa, thus presenting the opportunity for the energy regulators to seek reimbursement from Alcoa of an amount equal to the difference between the actual drawback amounts received over the relevant time period, and the drawback as it would have been calculated in accordance with regulation 148/2004. On February 23, 2012, Alcoa filed its appeal of the decision of the Consiglio di Stato, and that appeal remains pending. On March 26, 2012, Alcoa received a letter from the agency (Cassa Conguaglio per il Settore Elettrico (CCSE)) responsible for making and collecting payments on behalf of the Energy Authority demanding payment in the amount of approximately \$105 million (85 million), including interest. By letter dated April 5, 2012, Alcoa informed CCSE that it disputes the payment demand of CCSE since (i) CCSE was not authorized by the Consiglio di Stato decisions to seek payment of any amount, (ii) the decision of the Consiglio di Stato has been appealed and that appeal remains pending, and (iii) in any event, no interest should be payable. On April 29, 2012, Law No. 44 of 2012 (44/2012) came into effect, changing the method to calculate the drawback. Alcoa believes that under 44/2012 its range of reasonably possible loss is from \$0 to \$48 million (39 million). Following the effectiveness of 44/2012, Alcoa has received no further demands from CCSE. At this time, the company is unable to reasonably predict an outcome for this matter.

European Commission Matters

As previously reported, in July 2006, the European Commission (EC) announced that it had opened an investigation to establish whether an extension of the regulated electricity tariff granted by Italy to some energy-intensive industries complies with European Union (EU) state aid rules. The Italian power tariff extended the tariff that was in force until December 31, 2005 through November 19, 2009 (Alcoa has been incurring higher power costs at its smelters in Italy subsequent to the tariff end date). The extension was originally through 2010, but the date was changed by legislation adopted by the Italian Parliament effective on August 15, 2009. Prior to expiration of the tariff in 2005, Alcoa had been operating in Italy for more than 10 years under a power supply structure approved by the EC in 1996. That measure provided a competitive power supply to the primary aluminum industry and was not considered state aid from the Italian Government. The EC's announcement expressed concerns about whether Italy's extension of the tariff beyond 2005 was compatible with EU legislation and potentially distorted competition in the European market of primary aluminum, where energy is an important part of the production costs.

On November 19, 2009, the EC announced a decision in this matter stating that the extension of the tariff by Italy constituted unlawful state aid, in part, and, therefore, the Italian Government is to recover a portion of the benefit Alcoa received since January 2006 (including interest). The amount of this recovery will be based on a calculation that is being prepared by the Italian Government (see below). In late 2009, after discussions with legal counsel and reviewing the bases on which the EC decided, including the different considerations cited in the EC decision regarding Alcoa's two smelters in Italy, Alcoa recorded a charge of \$250 million (173 million), which included \$20 million (14 million) to write off a receivable from the Italian Government for amounts due under the now expired tariff structure and \$230 million (159 million) to establish a reserve. On April 19, 2010, Alcoa filed an appeal of this decision with the General Court of the EU. Alcoa will pursue all substantive and procedural legal steps available to annul the EC's decision. On May 22, 2010, Alcoa also filed with the General Court a request for injunctive relief to suspend the effectiveness of the decision, but, on July 12, 2010, the General Court denied such request. On September 10, 2010, Alcoa appealed the July 12, 2010 decision to the European Court of Justice (ECJ); this appeal was dismissed on December 16, 2011.

In June 2012, Alcoa received formal notification from the Italian Government with a calculated recovery amount of \$375 million (303 million); this amount was reduced by \$65 million (53 million) of amounts owed by the Italian Government to Alcoa, resulting in a net payment request of \$310 million (250 million). Alcoa has been in discussions with the Italian Government regarding the timing of such payment. Alcoa will commence payment of the requested amount in five quarterly installments of \$62 million (50 million) beginning in the fourth quarter of 2012. It is possible that Alcoa may be required to accelerate payment or pay in a lump sum. Notwithstanding the payment request or the timing of such payments, Alcoa's reserve remains \$197 million (159 million) (the U.S. dollar amount reflects the effects of foreign currency movements since 2009), which represents Alcoa's estimate of the most probable loss of the ultimate outcome of this matter and the low end of the range of reasonably possible loss, which is \$197 million (159 million) to \$375 million (303 million). The full extent of the loss will not be known until the final judicial determination, which could be a period of several years.

Separately, on November 29, 2006, Alcoa filed an appeal before the General Court (formerly the European Court of First Instance) seeking the annulment of the EC's decision to open an investigation alleging that such decision did not follow the applicable procedural rules. On March 25, 2009, the General Court denied Alcoa's appeal. On May 29, 2009, Alcoa appealed the March 25, 2009 ruling before the ECJ. The hearing of the May 29, 2009 appeal was held on June 24, 2010. On July 21, 2011, the ECJ denied Alcoa's appeal.

Environmental Matters

As previously reported, in January 2006, in *Musgrave v. Alcoa, et al.*, Warrick Circuit Court, County of Warrick, Indiana; 87-C01-0601-CT-0006, Alcoa Inc. and a subsidiary were sued by an individual, on behalf of himself and all persons similarly situated, claiming harm from alleged exposure to waste that had been disposed in designated pits at the Squaw Creek Mine in the 1970s. During February 2007, class allegations were dropped and the matter proceeded as an individual claim. Alcoa filed a renewed motion to dismiss (arguing that the claims are barred by the Indiana Workers' Compensation Act), amended its answer to include Indiana's Recreational Use Statute as an affirmative defense and filed a motion for summary judgment based on the Recreational Use Statute. The court granted Alcoa's motion to dismiss regarding plaintiffs' occupationally-related claims and denied the motion regarding plaintiffs' recreationally-related claims. On January 17, 2012, the court denied all outstanding motions with no opinion issued. A jury trial commenced on April 10, 2012 and on May 1, 2012 the jury returned a verdict in favor of defendants Alcoa Inc. and its subsidiary. The court entered its judgment on May 14, 2012. On May 31, 2012, plaintiffs filed a notice of appeal.

St. Croix Proceedings

Proposed Consent Decree for Certain St. Croix Proceedings. As previously reported, on November 21, 2011, Alcoa, St. Croix Renaissance Group, L.L.L.P. (SCRG), and the Department of Planning and Natural Resources lodged a proposed Consent Decree with the U.S. District Court for the Virgin Islands, which Consent Decree contains terms of a settlement between the parties resolving the following matters (each referred to below as identified in Alcoa's Annual Report on Form 10-K for the fiscal year ended December 31, 2011):

the Contract Action;

the NRD Action;

the SCA-Only Territorial Action;

the Multi-Party Enforcement Action; and

the Cost Recovery Action.

On January 12, 2012, the court held a hearing on the issue of whether to approve and enter the Consent Decree. On February 13, 2012 the court granted the motion to enter the Consent Decree. Pursuant to the Consent Decree, the following actions have now taken place:

- (i) the Contract Action was dismissed on March 14, 2012;
- (ii) the NRD action was dismissed, as to Alcoa and SCRG, on March 27, 2012;
- (iii) the Government of the Virgin Islands filed motions to dismiss the SCA-Only and Multi-Party territorial enforcement actions on March 26, 2012; and
- (iv) the Government of the Virgin Islands appeal of the Cost Recovery action was dismissed, as to Alcoa and SCRG, on April 9, 2012.

The SCA-Only Territorial Action was dismissed as to Alcoa with prejudice on May 9, 2012, and the Multi-Party Enforcement Action was dismissed as to Alcoa and SCRG on May 14, 2012, concluding the legal claims between the parties in these matters.

There will be no further reporting of the Contract Action, NRD Action, SCA-Only Territorial Action, Multi-Party Enforcement Action or Cost Recovery Action.

Item 4. Mine Safety Disclosures.

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Securities and Exchange Commission Regulation S-K (17 CFR 229.104) is included in Exhibit 95 of this report, which is incorporated herein by reference.

Item 6. Exhibits.
