Kellogg Company

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of Incorporation

or organization)

38-0710690
(I.R.S. Employer Identification No.)

One Kellogg Square

Battle Creek, Michigan 49016-3599

(Address of Principal Executive Offices)

Registrant's telephone number: (269) 961-2000

Edgar Filing: KELLOGG CO - Form 10-K

Securities registered pursuant to Section 12(b) of the Securities Act:

Title of each class:
Common Stock, \$.25 par value per share

Name of each exchange on which registered:
New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Securities Act: None

Indicate by a check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15 (d) of the Act. Yes ☒ No ☐

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☒

Indicate by check mark whether the registrant has submitted electronically and posted on its website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☒

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the common stock held by non-affiliates of the registrant (assuming for purposes of this computation only that the W. K. Kellogg Foundation Trust, directors and executive officers may be affiliates) as of the close of business on June 29, 2013 was approximately \$18.4 billion based on the closing price of \$64.23 for one share of common stock, as reported for the New York Stock Exchange on that date.

As of January 25, 2014, 361,686,112 shares of the common stock of the registrant were issued and outstanding.

Parts of the registrant's Proxy Statement for the Annual Meeting of Shareowners to be held on April 25, 2014 are incorporated by reference into Part III of this Report.

PART I

ITEM 1. BUSINESS

The Company. Kellogg Company, founded in 1906 and incorporated in Delaware in 1922, and its subsidiaries are engaged in the manufacture and marketing of ready-to-eat cereal and convenience foods.

The address of the principal business office of Kellogg Company is One Kellogg Square, P.O. Box 3599, Battle Creek, Michigan 49016-3599. Unless otherwise specified or indicated by the context, Kellogg, we, us and our refer to Kellogg Company, its divisions and subsidiaries.

Financial Information About Segments. Information on segments is located in Note 16 within Notes to the Consolidated Financial Statements.

Principal Products. Our principal products are ready-to-eat cereals and convenience foods, such as cookies, crackers, savory snacks, toaster pastries, cereal bars, fruit-flavored snacks, frozen waffles and veggie foods. These products were, as of February 24, 2014, manufactured by us in 18 countries and marketed in more than 180 countries. Our cereal products are generally marketed under the **Kellogg's** name and are sold to the grocery trade through direct sales forces for resale to consumers. We use broker and distributor arrangements for certain products. We also generally use these, or similar arrangements, in less-developed market areas or in those market areas outside of our focus.

We also market cookies, crackers, crisps, and other convenience foods, under brands such as **Kellogg's**, **Keebler**, **Cheez-It**, **Murray**, **Austin** and **Famous Amos**, to supermarkets in the United States through a direct store-door (DSD) delivery system, although other distribution methods are also used.

Additional information pertaining to the relative sales of our products for the years 2011 through 2013 is located in Note 16 within Notes to the Consolidated Financial Statements, which are included herein under Part II, Item 8.

Raw Materials. Agricultural commodities, including corn, wheat, potato flakes, soy bean oil, sugar and cocoa, are the principal raw materials used in our products. Cartonboard, corrugated, and plastic are the principal packaging materials used by us. We continually monitor world supplies and prices of such commodities (which include such packaging materials), as well as government trade policies. The cost of such commodities may fluctuate widely due to government policy and regulation, weather conditions, climate change or other unforeseen circumstances. Continuous efforts are made to maintain and improve the quality and supply of such commodities for purposes of our short-term and long-term requirements.

The principal ingredients in the products produced by us in the United States include corn grits, wheat and wheat derivatives, potato flakes, oats, rice, cocoa and chocolate, soybeans and soybean derivatives, various fruits, sweeteners, flour, vegetable oils, dairy products, eggs, and other filling ingredients, which are obtained from various sources. Most of these commodities are purchased principally from sources in the United States.

We enter into long-term contracts for the commodities described in this section and purchase these items on the open market, depending on our view of possible price fluctuations, supply levels, and our relative negotiating power. While the cost of some of these commodities has, and may continue to, increase over time, we believe that we will be able to purchase an adequate supply of these items as needed. As further discussed herein under Part II, Item 7A, we also use commodity futures and options to hedge some of our costs.

Raw materials and packaging needed for internationally based operations are available in adequate supply and are sometimes imported from countries other than those where used in manufacturing.

Natural gas and propane are the primary sources of energy used to power processing ovens at major domestic and international facilities, although certain locations may use oil or propane on a back-up or alternative basis. In addition, considerable amounts of diesel fuel are used in connection with the distribution of our products. As further discussed herein under Part II, Item 7A, we use over-the-counter commodity price swaps to hedge some of our natural gas costs.

Trademarks and Technology. Generally, our products are marketed under trademarks we own. Our principal trademarks are our housemarks, brand names, slogans, and designs related to cereals and convenience foods manufactured and marketed by us, and we also grant licenses to third parties to use these marks on various goods. These trademarks include **Kellogg's** for cereals, convenience foods and our other products, and the brand names of certain ready-to-eat cereals, including **All-Bran**, **Apple Jacks**, **Bran Buds**, **Cinnamon Crunch Crispix**, **Choco Zucaritas**, **Cocoa Krispies**, **Complete**, **Kellogg's Corn Flakes**, **Corn Pops**, **Cracklin' Oat Bran**, **Crispix**, **Cruncheroos**, **Crunchmania**, **Crunchy Nut**, **Eggo**, **Kellogg's FiberPlus**, **Froot Loops**, **Kellogg's Frosted Flakes**, **Krave**, **Frosted Krispies**, **Frosted Mini-Wheats**, **Fruit Harvest**, **Just Right**, **Kellogg's Low Fat Granola**, **Mueslix**, **Pops**, **Product 19**, **Kellogg's Raisin Bran**, **Raisin Bran Crunch**, **Rice Krispies**, **Rice Krispies**

Treats, Smacks/Honey Smacks, Smart Start, Kellogg's Smorz, Special K, Special K Red Berries and *Zucaritas* in the United States and elsewhere; *Crusli, Sucrilhos, Vector, Musli, NutriDia*, and *Choco Krispis* for cereals in Latin America; *Vive* and *Vector* in Canada; *Coco Pops, Chocos, Frosties, Fruit 'N Fibre, Kellogg's Crunchy Nut Corn Flakes, Krave, Honey Loops, Kellogg's Extra, Sustain, Muslix, Country Store, Ricicles, Smacks, Start, Pops, Optima* and *Tresor* for cereals in Europe; and *Cerola, Sultana Bran, Chex, Frosties, Goldies, Rice Bubbles, Nutri-Grain, Kellogg's Iron Man Food*, and *BeBig* for cereals in Asia and Australia. Additional trademarks are the names of certain combinations of ready-to-eat *Kellogg's* cereals, including *Fun Pak, Jumbo*, and *Variety*.

Other brand names include *Kellogg's* Corn Flake Crumbs; *All-Bran, Choco Krispis, Froot Loops, Special K, NutriDia, Kuadri-Krispis, Zucaritas* and *Crusli* for cereal bars, *Komplete* for biscuits; and *Kaos* for snacks in Mexico and elsewhere in Latin America; *Pop-Tarts* and *Pop-Tarts Ice Cream Shoppe* for toaster pastries; *Pop-Tarts Mini Crisps* for crackers; *Eggo, Eggo FiberPlus* and *Nutri-Grain* for frozen waffles and pancakes; *Rice Krispies Treats* for convenience foods; *Special K* and *Special K2O* for flavored protein water mixes and protein shakes; *Nutri-Grain* cereal bars, *Nutri-Grain* yogurt bars, for convenience foods in the United States and elsewhere; *K-Time, Rice Bubbles, Day Dawn, Be Natural, Sunibrite* and *LCMs* for convenience foods in Asia and Australia; *Nutri-Grain Squares, Nutri-Grain Elevenses*, and *Rice Krispies Squares* for convenience foods in Europe; *Kashi* and *GoLean* for certain cereals, nutrition bars, and mixes; *TLC* for granola and cereal bars, crackers and cookies; *Special K* and *Vector* for meal replacement products; *Bear Naked* for granola cereal, bars and trail mix, *Pringles* for potato crisps and sticks, and *Morningstar Farms, Loma Linda, Natural Touch, Gardenburger* and *Worthington* for certain meat and egg alternatives.

We also market convenience foods under trademarks and tradenames which include *Keebler, Austin, Keebler Baker's Treasures, Cheez-It, Chips Deluxe, Club, E. L. Fudge, Famous Amos, Fudge Shoppe, Kellogg's FiberPlus, Gripz, Jack's, Jackson's, Krispy, Mother's, Murray, Murray Sugar Free, Ready Crust, Right Bites, Sandies, Special K, Soft Batch, Stretch Island, Sunshine, Toasteds, Town House, Vienna Creams, Vienna Fingers, Wheatables* and *Zesta*. One of our subsidiaries is also the exclusive licensee of the *Carr's* cracker line in the United States.

Our trademarks also include logos and depictions of certain animated characters in conjunction with our products, including *Snap!Crackle!Pop!* for *Cocoa Krispies* and *Rice Krispies* cereals and *Rice Krispies Treats* convenience foods; *Tony the Tiger* for *Kellogg's Frosted Flakes, Zucaritas, Sucrilhos* and *Frosties* cereals and convenience foods; *Ernie Keebler* for cookies, convenience foods and other products; the *Hollow Tree* logo for certain convenience foods; *Toucan Sam* for *Froot Loops* cereal; *Dig 'Em* for *Smacks/Honey Smacks* cereal; *Sunny* for *Kellogg's Raisin Bran* and *Raisin Bran Crunch* cereals, *Coco the Monkey* for *Coco Pops* cereal; *Cornelius* for *Kellogg's Corn Flakes*; *Melvin the Elephant* for certain cereal and convenience foods; *Chocos the Bear, Sammy the Seal* (aka *Smaxe* the Seal) for certain cereal products and *Mr. P* or *Julius Pringles* for *Pringles* potato crisps and sticks.

The slogans *The Best To You Each Morning, The Original & Best, They're Gr-r-reat!, The Difference is K, Supercharged, Earn Your Stripes* and *Gotta Have My Pops*, are used in connection with our ready-to-eat cereals, along with *L Eggo my Eggo*, used in connection with our frozen waffles and pancakes, *Elfin Magic, Childhood Is Calling, The Cookies in the Passionate Purple Package. Uncommonly Good* and *Baked with Care* used in connection with convenience food products, *Seven Whole Grains on a Mission* used in connection with *Kashi* natural foods and *See Veggies Differently* used in connection with meat and egg alternatives and *Everything Pops With Pringles* used in connection with potato crisps are also important Kellogg trademarks.

The trademarks listed above, among others, when taken as a whole, are important to our business. Certain individual trademarks are also important to our business. Depending on the jurisdiction, trademarks are generally valid as long as they are in use and/or their registrations are properly maintained and they have not been found to have become generic. Registrations of trademarks can also generally be renewed indefinitely as long as the trademarks are in use.

We consider that, taken as a whole, the rights under our various patents, which expire from time to time, are a valuable asset, but we do not believe that our businesses are materially dependent on any single patent or group of related patents. Our activities under licenses or other franchises or concessions which we hold are similarly a valuable asset, but are not believed to be material.

Seasonality. Demand for our products has generally been approximately level throughout the year, although some of our convenience foods have a bias for stronger demand in the second half of the year due to events and holidays. We also custom-bake cookies for the Girl Scouts of the U.S.A., which are principally sold in the first quarter of the year.

Working Capital. Although terms vary around the world and by business types, in the United States we

generally have required payment for goods sold eleven or sixteen days subsequent to the date of invoice as 2% 10/net 11 or 1% 15/net 16. Receipts from goods sold, supplemented as required by borrowings, provide for our payment of dividends, repurchases of our common stock, capital expansion, and for other operating expenses and working capital needs.

Customers. Our largest customer, Wal-Mart Stores, Inc. and its affiliates, accounted for approximately 21% of consolidated net sales during 2013, comprised principally of sales within the United States. At December 28, 2013, approximately 18% of our consolidated receivables balance and 30% of our U.S. receivables balance was comprised of amounts owed by Wal-Mart Stores, Inc. and its affiliates. No other customer accounted for greater than 10% of net sales in 2013. During 2013, our top five customers, collectively, including Wal-Mart, accounted for approximately 32% of our consolidated net sales and approximately 45% of U.S. net sales. There has been significant worldwide consolidation in the grocery industry in recent years and we believe that this trend is likely to continue. Although the loss of any large customer for an extended length of time could negatively impact our sales and profits, we do not anticipate that this will occur to a significant extent due to the consumer demand for our products and our relationships with our customers. Our products have been generally sold through our own sales forces and through broker and distributor arrangements, and have been generally resold to consumers in retail stores, restaurants, and other food service establishments.

Backlog. For the most part, orders are filled within a few days of receipt and are subject to cancellation at any time prior to shipment. The backlog of any unfilled orders at December 28, 2013 and December 29, 2012 was not material to us.

Competition. We have experienced, and expect to continue to experience, intense competition for sales of all of our principal products in our major product categories, both domestically and internationally. Our products compete with advertised and branded products of a similar nature as well as unadvertised and private label products, which are typically distributed at lower prices, and generally with other food products. Principal methods and factors of competition include new product introductions, product quality, taste, convenience, nutritional value, price, advertising and promotion.

Research and Development. Research to support and expand the use of our existing products and to develop new food products is carried on at the W. K. Kellogg Institute for Food and Nutrition Research in Battle Creek, Michigan, and at other locations around the world. Our expenditures for research and development were approximately (in millions): 2013-\$199; 2012-\$206; 2011-\$192.

Regulation. Our activities in the United States are subject to regulation by various government agencies, including the Food and Drug Administration, Federal Trade Commission and the Departments of Agriculture, Commerce and Labor, as well as voluntary regulation by other bodies. Various state and local agencies also regulate our activities. Other agencies and bodies outside of the United States, including those of the European Union and various countries, states and municipalities, also regulate our activities.

Environmental Matters. Our facilities are subject to various U.S. and foreign, federal, state, and local laws and regulations regarding the release of material into the environment and the protection of the environment in other ways. We are not a party to any material proceedings arising under these regulations. We believe that compliance with existing environmental laws and regulations will not materially affect our consolidated financial condition or our competitive position.

Employees. At December 28, 2013, we had approximately 30,277 employees.

Financial Information About Geographic Areas. Information on geographic areas is located in Note 16 within Notes to the Consolidated Financial Statements, which are included herein under Part II, Item 8.

Executive Officers. The names, ages, and positions of our executive officers (as of February 24, 2014) are listed below, together with their business experience. Executive officers are elected annually by the Board of Directors.

James M. Jenness
Chairman of the Board

67

Mr. Jenness has been our Chairman since February 2005 and has served as a Kellogg director since 2000. From February 2005 until December 2006, he also served as our Chief Executive Officer. He was Chief Executive Officer of Integrated Merchandising Systems, LLC, a leader in outsource management of retail promotion and branded merchandising from 1997 to December 2004. He is also Lead Director of Kimberly-Clark Corporation.

John A. Bryant
President and Chief Executive Officer

48

Mr. Bryant has served as a Kellogg director since July 2010. In January 2011, he was appointed President and Chief Executive Officer after having served as our Executive Vice President and Chief Operating Officer

since August 2008. Mr. Bryant joined Kellogg in March 1998, and was promoted during the next eight years to a number of key financial and executive leadership roles. He was appointed Executive Vice President and Chief Financial Officer, Kellogg Company, President, Kellogg International in December 2006. In July 2007, Mr. Bryant was appointed Executive Vice President and Chief Financial Officer, Kellogg Company, President, Kellogg North America and in August 2008, he was appointed Executive Vice President, Chief Operating Officer and Chief Financial Officer. Mr. Bryant served as Chief Financial Officer through December 2009.

Ronald L. Dissinger

55

Senior Vice President and Chief Financial Officer

Ron Dissinger was appointed Senior Vice President and Chief Financial Officer effective January 2010. Mr. Dissinger joined Kellogg in 1987 as an accounting supervisor, and during the next 14 years served in a number of key financial leadership roles, both in the United States and Australia. In 2001, he was promoted to Vice President and Chief Financial Officer, U.S. Morning Foods. In 2004, Mr. Dissinger became Vice President, Corporate Financial Planning, and CFO, Kellogg International. In 2005, he became Vice President and CFO, Kellogg Europe and CFO, Kellogg International. In 2007, Mr. Dissinger was appointed Senior Vice President and Chief Financial Officer, Kellogg North America.

Alistair D. Hirst

54

Senior Vice President, Global Supply Chain

Mr. Hirst assumed his current position in April 2012. He joined the company in 1984 as a Food Technologist at the Springs, South Africa, plant. While at the facility, he was promoted to Quality Assurance Manager and Production Manager. From 1993-2001, Mr. Hirst held numerous positions in South Africa and Australia, including Production Manager, Plant Manager, and Director, Supply Chain. In 2001, Mr. Hirst was promoted to Director, Procurement at the Manchester, England, facility and was later named European Logistics Director. In 2005, he transferred to the U.S. when promoted to Vice President, Global Procurement. In 2008, he was promoted to Senior Vice President, Snacks Supply Chain and to Senior Vice President, North America Supply Chain, in October 2011.

Samantha J. Long

46

Senior Vice President, Global Human Resources

Ms. Long assumed her current position January 1, 2013. She joined the company in 2003 as Director, Human Resources for the United Kingdom, Republic of Ireland and Middle East/Mediterranean businesses as well as the European finance, sales, human resources, research and development, information technology, communications and innovations functions. In 2006, Ms. Long transferred to the United States when she was promoted to Vice President, Human Resources, U.S. Morning Foods & Kashi. She also served as human resources business partner to the senior vice president of global human resources. From 2008 to 2013, she held the position of Vice President, Human Resources, Kellogg North America. Before joining the company, she was head of human resources for Sharp Electronics based in the United Kingdom. Prior to that role, she held a number of positions in her 15-year tenure with International Computers Limited, part of the Fujitsu family of companies.

Paul T. Norman

49

Senior Vice President, Kellogg Company

Chief Growth Officer

Paul Norman was appointed Senior Vice President, Kellogg Company in December 2005 and Chief Growth Officer in October 2013. Mr. Norman joined Kellogg's U.K. sales organization in 1987. From 1989 to 1996, Mr. Norman was promoted to several marketing roles in France and Canada. He was promoted to director, marketing, Kellogg de Mexico in January 1997; to Vice President, Marketing, Kellogg USA in February 1999; to President, Kellogg Canada Inc. in December 2000; and to Managing Director, United Kingdom/Republic of Ireland in February 2002. In September 2004, Mr. Norman was appointed to Vice President, Kellogg Company, and President, U.S. Morning Foods. In August 2008, Mr. Norman was promoted to President, Kellogg International.

Gary H. Pilnick

49

Senior Vice President, General Counsel,

Corporate Development and Secretary

Mr. Pilnick was appointed Senior Vice President, General Counsel and Secretary in August 2003 and assumed responsibility for Corporate Development in June 2004. He joined Kellogg as Vice President Deputy General Counsel and Assistant Secretary in September 2000 and served in that position until August 2003. Before joining Kellogg, he served as Vice President and Chief Counsel of Sara Lee Branded Apparel and as Vice President and Chief Counsel, Corporate Development and Finance at Sara Lee Corporation.

Maribeth A. Dangel

48

Vice President and Corporate Controller

Ms. Dangel assumed her current position in April 2012. She joined Kellogg Company in 1997 as a manager in the tax department. In 2006, Ms. Dangel became a manager for accounting research, was promoted to director, corporate financial reporting in 2007, and was promoted to vice president, financial

5

reporting in May 2010. Before joining the company, she was a tax manager for Price Waterhouse in Indianapolis, Indiana. Prior to that role, she worked as a tax specialist for Dow Corning Corporation in Midland, Michigan.

Availability of Reports; Website Access; Other Information. Our internet address is <http://www.kelloggcompany.com>. Through Investor Relations Financials SEC Filings on our home page, we make available free of charge our proxy statements, our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K, SEC Forms 3, 4 and 5 and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission. Our reports filed with the Securities and Exchange Commission are also made available to read and copy at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information about the Public Reference Room by contacting the SEC at 1-800-SEC-0330. Reports filed with the SEC are also made available on its website at www.sec.gov.

Copies of the Corporate Governance Guidelines, the Charters of the Audit, Compensation and Nominating and Governance Committees of the Board of Directors, the Code of Conduct for Kellogg Company directors and Global Code of Ethics for Kellogg Company employees (including the chief executive officer, chief financial officer and corporate controller) can also be found on the Kellogg Company website. Any amendments or waivers to the Global Code of Ethics applicable to the chief executive officer, chief financial officer and corporate controller can also be found in the Investor Relations section of the Kellogg Company website. Shareowners may also request a free copy of these documents from: Kellogg Company, P.O. Box CAMB, Battle Creek, Michigan 49016-9935 (phone: (800) 961-1413), Investor Relations Department at that same address (phone: (269) 961-2800) or investor.relations@kellogg.com.

Forward-Looking Statements. This Report contains forward-looking statements with projections concerning, among other things, the Company's global growth and efficiency program (Project K), the integration of the *Pringles*® business, our strategy, financial principles, and plans; initiatives, improvements and growth; sales, gross margins, advertising, promotion, merchandising, brand building, operating profit, and earnings per share; innovation; investments; capital expenditures; asset write-offs and expenditures and costs related to productivity or efficiency initiatives; the impact of accounting changes and significant accounting estimates; our ability to meet interest and debt principal repayment obligations; minimum contractual obligations; future common stock repurchases or debt reduction; effective income tax rate; cash flow and core working capital improvements; interest expense; commodity and energy prices; and employee benefit plan costs and funding. Forward-looking statements include predictions of future results or activities and may contain the words expect, believe, will, can, anticipate, estimate, should, or words or phrases of similar meaning. For example, forward-looking statements are found in this Item 1 and in several sections of Management's Discussion and Analysis. Our actual results or activities may differ materially from these predictions. Our future results could be affected by a variety of factors, including the ability to implement Project K as planned, whether the expected amount of costs associated with Project K will exceed forecasts, whether the Company will be able to realize the anticipated benefits from Project K in the amounts and times expected, the ability to realize the anticipated benefits and synergies from the *Pringles*® acquisition in the amounts and at the times expected, the impact of competitive conditions; the effectiveness of pricing, advertising, and promotional programs; the success of innovation, renovation and new product introductions; the recoverability of the carrying value of goodwill and other intangibles; the success of productivity improvements and business transitions; commodity and energy prices; labor costs; disruptions or inefficiencies in supply chain; the availability of and interest rates on short-term and long-term financing; actual market performance of benefit plan trust investments; the levels of spending on systems initiatives, properties, business opportunities, integration of acquired businesses, and other general and administrative costs; changes in consumer behavior and preferences; the effect of U.S. and foreign economic conditions on items such as interest rates, statutory tax rates, currency conversion and availability; legal and regulatory factors including changes in food safety, advertising and labeling laws and regulations; the ultimate impact of product recalls; business disruption or other losses from war, terrorist acts, or political unrest; other items; and the risks and uncertainties described in Item 1A below. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to publicly update them.

ITEM 1A. RISK FACTORS

In addition to the factors discussed elsewhere in this Report, the following risks and uncertainties could materially adversely affect our business, financial condition and results of operations. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations and financial condition.

We may not realize the benefits that we expect from our global four-year efficiency and effectiveness program (Project K).

In November 2013, the Company announced a global four-year efficiency and effectiveness program (Project K). The successful implementation of Project K presents significant organizational design and infrastructure challenges and in many cases will require successful negotiations with third parties, including labor organizations, suppliers, business partners, and other stakeholders. In addition, the project may not advance our business strategy as expected. As a result, we may not be able to implement Project K as planned, including realizing, in full or in part, the anticipated benefits from our program. Events and circumstances, such as financial or strategic difficulties, delays and unexpected costs may occur that could result in our not realizing all or any of the anticipated benefits or our not realizing the anticipated benefits on our expected timetable. If we are unable to realize the anticipated savings of the program, our ability to fund other initiatives may be adversely affected. Any failure to implement Project K in accordance with our expectations could adversely affect our financial condition, results of operations and cash flows.

In addition, the complexity of Project K will require a substantial amount of management and operational resources. Our management team must successfully implement administrative and operational changes necessary to achieve the anticipated benefits of Project K. These and related demands on our resources may divert the organization's attention from existing core businesses, integrating or separating personnel and financial or other systems, have adverse effects on existing business relationships with suppliers and customers, and impact employee morale. As a result our financial condition, results of operations or cash flows may be adversely affected.

Our results may be materially and adversely impacted as a result of increases in the price of raw materials, including agricultural commodities, fuel and labor.

Agricultural commodities, including corn, wheat, soybean oil, sugar and cocoa, are the principal raw materials used in our products. Cartonboard, corrugated, and plastic are the principal packaging materials used by us. The cost of such commodities may fluctuate widely due to government policy and regulation, weather conditions, climate change or other unforeseen circumstances. To the extent that any of the foregoing factors affect the prices of such commodities and we are unable to increase our prices or adequately hedge against such changes in prices in a manner that offsets such changes, the results of our operations could be materially and adversely affected. In addition, we use derivatives to hedge price risk associated with forecasted purchases of raw materials. Our hedged price could exceed the spot price on the date of purchase, resulting in an unfavorable impact on both gross margin and net earnings.

Cereal processing ovens at major domestic and international facilities are regularly fueled by natural gas or propane, which are obtained from local utilities or other local suppliers. Short-term stand-by propane storage exists at several plants for use in case of interruption in natural gas supplies. Oil may also be used to fuel certain operations at various plants. In addition, considerable amounts of diesel fuel are used in connection with the distribution of our products. The cost of fuel may fluctuate widely due to economic and political conditions, government policy and regulation, war, or other unforeseen circumstances which could have a material adverse effect on our consolidated operating results or financial condition.

A shortage in the labor pool, failure to successfully negotiate collectively bargained agreements, or other general inflationary pressures or changes in applicable laws and regulations could increase labor cost, which could have a material adverse effect on our consolidated operating results or financial condition.

Additionally, our labor costs include the cost of providing benefits for employees. We sponsor a number of defined benefit plans for employees in the United States and various foreign locations, including pension, retiree health and welfare, active health care, severance and other postemployment benefits. We also participate in a number of multiemployer pension plans for certain of our manufacturing locations. Our major pension plans and U.S. retiree health and welfare plans are funded with trust assets invested in a globally diversified portfolio of equity securities with smaller holdings of bonds, real estate and other investments. The annual cost of benefits can vary significantly from year to year and is materially affected by such factors as changes in the assumed or actual rate of return on major plan assets, a change in the weighted-average discount rate used to measure obligations, the rate or trend of health care cost inflation, and the outcome of collectively-bargained wage and benefit agreements. Many of our employees are covered by collectively-bargained agreements and other employees may seek to be covered by collectively-bargained agreements. Strikes or work stoppages and interruptions could occur if we are unable to renew these agreements on satisfactory terms or enter into new agreements on satisfactory terms, which could adversely impact our operating results. The terms and conditions of existing, renegotiated or new agreements could also increase our costs or otherwise affect our ability to fully implement future operational changes to enhance our efficiency.

Multiemployer Pension Plans could adversely affect our business.

We participate in various multiemployer pension plans administered by labor unions representing some of our employees. We make periodic contributions to these plans to allow them to meet their pension benefit obligations to their participants. Our required contributions to these funds could increase because of a shrinking contribution base as a result of the insolvency or withdrawal of other companies that currently contribute to these funds, inability or failure of withdrawing companies to pay their withdrawal liability, lower than expected returns on pension fund assets or other funding deficiencies. In the event that we withdraw from participation in one of these plans, then applicable law could require us to make an additional lump-sum contribution to the plan, and we would have to reflect that as an expense in our consolidated statement of operations and as a liability on our consolidated balance sheet. Our withdrawal liability for any multiemployer plan would depend on the extent of the plan's funding of vested benefits. In the ordinary course of our renegotiation of collective bargaining agreements with labor unions that maintain these plans, we may decide to discontinue participation in a plan, and in that event, we could face a withdrawal liability. Some multiemployer plans in which we participate are reported to have significant underfunded liabilities. Such underfunding could increase the size of our potential withdrawal liability.

We operate in the highly competitive food industry.

We face competition across our product lines, including ready-to-eat cereals and convenience foods, from other companies which have varying abilities to withstand changes in market conditions. Most of our competitors have substantial financial, marketing and other resources, and competition with them in our various markets and product lines could cause us to reduce prices, increase capital, marketing or other expenditures, or lose category share, any of which could have a material adverse effect on our business and financial results. Category share and growth could also be adversely impacted if we are not successful in introducing new products.

We may be unable to maintain our profit margins in the face of a consolidating retail environment. In addition, the loss of one of our largest customers could negatively impact our sales and profits.

Our largest customer, Wal-Mart Stores, Inc. and its affiliates, accounted for approximately 21% of consolidated net sales during 2013, comprised principally of sales within the United States. At December 28, 2013, approximately 18% of our consolidated receivables balance and 30% of our U.S. receivables balance was comprised of amounts owed by Wal-Mart Stores, Inc. and its affiliates. No other customer accounted for greater than 10% of net sales in 2013. During 2013, our top five customers, collectively, including Wal-Mart, accounted for approximately 32% of our consolidated net sales and approximately 45% of U.S. net sales. As the retail grocery trade continues to consolidate and mass marketers become larger, our large retail customers may seek to use their position to improve their profitability through improved efficiency, lower pricing and increased promotional programs. If we are unable to use our scale, marketing expertise, product innovation and category leadership positions to respond, our profitability or volume growth could be negatively affected. The loss of any large customer for an extended length of time could negatively impact our sales and profits.

Our results may be negatively impacted if consumers do not maintain their favorable perception of our brands.

We have a number of iconic brands with significant value. Maintaining and continually enhancing the value of these brands is critical to the success of our business. Brand value is based in large part on consumer perceptions. Success in promoting and enhancing brand value depends in large part on our ability to provide high-quality products. Brand value could diminish significantly due to a number of factors, including consumer perception that we have acted in an irresponsible manner, adverse publicity about our products (whether or not valid), our failure to maintain the quality of our products, the failure of our products to deliver consistently positive consumer experiences, or the products becoming unavailable to consumers. The growing use of social and digital media by consumers, Kellogg and third parties increases the speed and extent that information or misinformation and opinions can be shared. Negative posts or comments about Kellogg, our brands or our products on social or digital media could seriously damage our brands and reputation. If we do not maintain the favorable perception of our brands, our results could be negatively impacted.

Tax matters, including changes in tax rates, disagreements with taxing authorities and imposition of new taxes could impact our results of operations and financial condition.

Our profits earned outside the U.S. are generally taxed at lower rates than the U.S. statutory rates. The cash we generate outside the U.S. is principally to be used to fund our international development. If the funds generated by our U.S. business are not sufficient to meet our need for cash in the U.S., we may need to repatriate a portion of our future international earnings to the U.S. Such international earnings would be subject to U.S. tax which could cause our worldwide effective tax rate to increase.

We are subject to income taxes as well as non-income based taxes, such as payroll, sales, use, value-added, net worth, property, withholding and franchise taxes in both the U.S. and various foreign jurisdictions. We are also subject to regular reviews, examinations and audits by the Internal Revenue Service and other taxing authorities with respect to such income and non-income based taxes inside and outside of the U.S. Although we believe our tax estimates are reasonable, if a taxing authority disagrees with the positions we have taken, we could face additional tax liability, including interest and penalties. There can be no assurance that payment of such additional amounts upon final adjudication of any disputes will not have a material impact on our results of operations and financial position.

The enactment of or increases in tariffs, including value added tax, or other changes in the application of existing taxes, in markets in which we are currently active, for example, in Mexico, or may be active in the future, or on specific products that we sell or with which our products compete, may have an adverse effect on our business or on our results of operations.

If our food products become adulterated, misbranded or mislabeled, we might need to recall those items and may experience product liability if consumers are injured as a result.

Selling food products involves a number of legal and other risks, including product contamination, spoilage, product tampering, allergens, or other adulteration. We may need to recall some of our products if they become adulterated or misbranded. We may also be liable if the consumption of any of our products causes injury, illness or death. A widespread product recall or market withdrawal could result in significant losses due to their costs, the destruction of product inventory, and lost sales due to the unavailability of product for a period of time. For example, in October 2012, we initiated a recall of certain packages of *Mini-Wheats* cereal due to the possible presence of fragments of flexible metal mesh from a faulty manufacturing part. We could also suffer losses from a significant product liability judgment against us. A significant product recall or product liability case could also result in adverse publicity, damage to our reputation, and a loss of consumer confidence in our food products, which could have a material adverse effect on our business results and the value of our brands. Moreover, even if a product liability or consumer fraud claim is meritless, does not prevail or is not pursued, the negative publicity surrounding assertions against our company and our products or processes could adversely affect our reputation or brands.

We could also be adversely affected if consumers lose confidence in the safety and quality of certain food products or ingredients, or the food safety system generally. Adverse publicity about these types of concerns, whether or not valid, may discourage consumers from buying our products or cause production and delivery disruptions.

Disruption of our supply chain could have an adverse effect on our business, financial condition and results of operations.

Our ability, including manufacturing or distribution capabilities, and that of our suppliers, business partners and contract manufacturers, to make, move and sell products is critical to our success. Damage or disruption to our or their manufacturing or distribution capabilities due to weather, including any potential effects of climate change, natural disaster, fire or explosion, terrorism, pandemics, strikes, repairs or enhancements at our facilities, or other reasons, could impair our ability to manufacture or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events, or to effectively manage such events if they occur, could adversely affect our business, financial condition and results of operations, as well as require additional resources to restore our supply chain.

Evolving tax, environmental, food quality and safety or other regulations or failure to comply with existing licensing, labeling, trade, food quality and safety and other regulations and laws could have a material adverse effect on our consolidated financial condition.

Our activities, both in and outside of the United States, are subject to regulation by various federal, state, provincial and local laws, regulations and government agencies, including the U.S. Food and Drug Administration, U.S. Federal Trade Commission, the U.S. Departments of Agriculture, Commerce and Labor, as well as similar and other authorities outside the United States, International Accords and Treaties and others, including voluntary regulation by other bodies. In addition, legal and regulatory systems in emerging and developing markets may be less developed, and less certain. These laws and regulations and interpretations thereof may change, sometimes dramatically, as a result of a variety of factors, including political, economic or social events. The manufacturing, marketing and distribution of food products are subject to governmental regulation that impose additional regulatory requirements. Those regulations control such matters as food quality and safety, ingredients, advertising, product or production requirements, labeling, import or export of our products or ingredients, relations with distributors and retailers, health and safety, the environment, and restrictions on the use of government programs, such as Supplemental Nutrition Assistance Program, to purchase certain of our products. We are also regulated with respect to matters such as licensing requirements, trade and pricing practices, tax,

anticorruption standards, and environmental matters. The need to comply with new, evolving or revised tax, environmental, food quality and safety or other laws or regulations, or new, evolving or changed interpretations or enforcement of existing laws or regulations, may have a material adverse effect on our business and results of operations. Further, if we are found to be out of compliance with applicable laws and regulations in these areas, we could be subject to civil remedies, including fines, injunctions, termination of necessary licenses or permits, or recalls, as well as potential criminal sanctions, any of which could have a material adverse effect on our business. Even if regulatory review does not result in these types of determinations, it could potentially create negative publicity or perceptions which could harm our business or reputation.

Our operations face significant foreign currency exchange rate exposure and currency restrictions which could negatively impact our operating results.

We hold assets and incur liabilities, earn revenue and pay expenses in a variety of currencies other than the U.S. dollar, including the euro, British pound, Australian dollar, Canadian dollar, Mexican peso, Venezuelan bolivar fuerte and Russian ruble. Because our consolidated financial statements are presented in U.S. dollars, we must translate our assets, liabilities, revenue and expenses into U.S. dollars at then-applicable exchange rates. Consequently, changes in the value of the U.S. dollar may unpredictably and negatively affect the value of these items in our consolidated financial statements, even if their value has not changed in their original currency.

If we pursue strategic acquisitions, alliances, divestitures or joint ventures, we may not be able to successfully consummate favorable transactions or successfully integrate acquired businesses.

From time to time, we may evaluate potential acquisitions, alliances, divestitures or joint ventures that would further our strategic objectives. With respect to acquisitions, we may not be able to identify suitable candidates, consummate a transaction on terms that are favorable to us, or achieve expected returns and other benefits as a result of integration challenges. With respect to proposed divestitures of assets or businesses, we may encounter difficulty in finding acquirers or alternative exit strategies on terms that are favorable to us, which could delay the accomplishment of our strategic objectives, or our divestiture activities may require us to recognize impairment charges. Companies or operations acquired or joint ventures created may not be profitable or may not achieve sales levels and profitability that justify the investments made. Our corporate development activities may present financial and operational risks, including diversion of management attention from existing core businesses, integrating or separating personnel and financial and other systems, and adverse effects on existing business relationships with suppliers and customers. Future acquisitions could also result in potentially dilutive issuances of equity securities, the incurrence of debt, contingent liabilities and/or amortization expenses related to certain intangible assets and increased operating expenses, which could adversely affect our results of operations and financial condition.

We may not be able to fully realize the anticipated benefits and synergies of the Pringles acquisition or in the expected time frame.

The overall success of the Pringles acquisition will depend, in part, on our ability to realize the anticipated benefits and synergies from combining and integrating the Pringles business into our existing business. We may not be able to fully achieve these objectives, or may not be able to achieve these objectives on a timely basis, and the anticipated future benefits and synergies therefore may not be realized fully or at all. We may also incur unanticipated costs. The acquisition involves challenges and risks, including risks that the transaction does not advance our business strategy or that we will not realize a satisfactory return. Any integration difficulties could decrease or eliminate the anticipated benefits and synergies of the Pringles acquisition and could negatively affect the trading prices of our stock and our future business and financial results.

Potential liabilities and costs from litigation could adversely affect our business.

There is no guarantee that we will be successful in defending our self in civil, criminal or regulatory actions, including under general, commercial, employment, environmental, food quality and safety, anti-trust and trade, and environmental laws and regulations, or in asserting its rights under various laws. In addition, we could incur substantial costs and fees in defending our self or in asserting our rights in these actions or meeting new legal requirements. The costs and other effects of potential and pending litigation and administrative actions against us, and new legal requirements, cannot be determined with certainty and may differ from expectations.

Our consolidated financial results and demand for our products are dependent on the successful development of new products and processes.

There are a number of trends in consumer preferences which may impact us and the industry as a whole. These include changing consumer dietary trends and the availability of substitute products.

Our success is dependent on anticipating changes in consumer preferences and on successful new product and process development and product relaunches in

response to such changes. We aim to introduce products or new or improved production processes on a timely basis in order to counteract obsolescence and decreases in sales of existing products. While we devote significant focus to the development of new products and to the research, development and technology process functions of our business, we may not be successful in developing new products or our new products may not be commercially successful. Our future results and our ability to maintain or improve our competitive position will depend on our capacity to gauge the direction of our key markets and upon our ability to successfully identify, develop, manufacture, market and sell new or improved products in these changing markets.

Our postretirement benefit-related costs and funding requirements could increase as a result of volatility in the financial markets, changes in interest rates and actuarial assumptions.

Increases in the costs of postretirement medical and pension benefits may continue and negatively affect our business as a result of increased usage of medical benefits by retired employees and medical cost inflation, the effect of potential declines in the stock and bond markets on the performance of our pension and post-retirement plan assets, potential reductions in the discount rate used to determine the present value of our benefit obligations, and changes to our investment strategy that may impact our expected return on pension and post-retirement plan assets assumptions. U.S. generally accepted accounting principles require that we calculate income or expense for the plans using actuarial valuations. These valuations reflect assumptions about financial markets and interest rates, which may change based on economic conditions. The Company's accounting policy for defined benefit plans may subject earnings to volatility due to the recognition of actuarial gains and losses, particularly those due to the change in the fair value of pension and post-retirement plan assets and interest rates. In addition, funding requirements for our plans may become more significant. However, the ultimate amounts to be contributed are dependent upon, among other things, interest rates, underlying asset returns, and the impact of legislative or regulatory changes related to pension and post-retirement funding obligations.

We have a substantial amount of indebtedness.

We have indebtedness that is substantial in relation to our shareholders' equity. As of December 28, 2013, we had total debt of approximately \$7.4 billion and total Kellogg Company equity of \$3.5 billion.

Our substantial indebtedness could have important consequences, including:

impairing the ability to access global capital markets to obtain additional financing for working capital, capital expenditures or general corporate purposes, particularly if the ratings assigned to our debt securities by rating organizations were revised downward or if a rating organization announces that our ratings are under review for a potential downgrade;

a downgrade in our credit ratings, particularly our short-term credit rating, would likely reduce the amount of commercial paper we could issue, increase our commercial paper borrowing costs, or both;

restricting our flexibility in responding to changing market conditions or making us more vulnerable in the event of a general downturn in economic conditions or our business;

requiring a substantial portion of the cash flow from operations to be dedicated to the payment of principal and interest on our debt, reducing the funds available to us for other purposes such as expansion through acquisitions, paying dividends, repurchasing shares, marketing spending and expansion of our product offerings; and

causing us to be more leveraged than some of our competitors, which may place us at a competitive disadvantage.

Our ability to make scheduled payments or to refinance our obligations with respect to indebtedness will depend on our financial and operating performance, which in turn, is subject to prevailing economic conditions, the availability of, and interest rates on, short-term financing, and financial, business and other factors beyond our control.

Our performance is affected by general economic and political conditions and taxation policies.

Edgar Filing: KELLOGG CO - Form 10-K

Customer and consumer demand for our products may be impacted by recession, financial and credit market disruptions, or other economic downturns in the United States or other nations. Our results in the past have been, and in the future may continue to be, materially affected by changes in general economic and political conditions in the United States and other countries, including the interest rate environment in which we conduct business, the financial markets through which we access capital and currency, political unrest and terrorist acts in the United States or other countries in which we carry on business.

Current economic conditions globally may delay or reduce purchases by our customers and consumers. This could result in reductions in sales of our products, reduced acceptance of innovations, and increased price competition. Deterioration in economic conditions in any of the countries in which we do business could also cause slower collections on accounts receivable which may adversely impact our liquidity and financial condition. Financial institutions

may be negatively impacted by economic conditions and may consolidate or cease to do business which could result in a tightening in the credit markets, a low level of liquidity in many financial markets, and increased volatility in fixed income, credit, currency and equity markets. There could be a number of effects from a financial institution credit crisis on our business, which could include impaired credit availability and financial stability of our customers, including our suppliers, co-manufacturers and distributors. A disruption in financial markets may also have an effect on our derivative counterparties and could also impair our banking partners on which we rely for operating cash management. Any of these events would likely harm our business, results of operations and financial condition.

An impairment of the carrying value of goodwill or other acquired intangibles could negatively affect our consolidated operating results and net worth.

The carrying value of goodwill represents the fair value of acquired businesses in excess of identifiable assets and liabilities as of the acquisition date. The carrying value of other intangibles represents the fair value of trademarks, trade names, and other acquired intangibles as of the acquisition date. Goodwill and other acquired intangibles expected to contribute indefinitely to our cash flows are not amortized, but must be evaluated by management at least annually for impairment. If carrying value exceeds current fair value, the intangible is considered impaired and is reduced to fair value via a charge to earnings. Events and conditions which could result in an impairment include changes in the industries in which we operate, including competition and advances in technology; a significant product liability or intellectual property claim; or other factors leading to reduction in expected sales or profitability. Should the value of one or more of the acquired intangibles become impaired, our consolidated earnings and net worth may be materially adversely affected.

As of December 28, 2013, the carrying value of intangible assets totaled approximately \$7.4 billion, of which \$5.0 billion was goodwill and \$2.4 billion represented trademarks, tradenames, and other acquired intangibles compared to total assets of \$15.5 billion and total Kellogg Company equity of \$3.5 billion.

Economic downturns could limit consumer demand for our products.

Retailers are increasingly offering private label products that compete with our products. Consumers' willingness to purchase our products will depend upon our ability to offer products that appeal to consumers at the right price. It is also important that our products are perceived to be of a higher quality than less expensive alternatives. If the difference in quality between our products and those of store brands narrows, or if such difference in quality is perceived to have narrowed, then consumers may not buy our products. Furthermore, during periods of economic uncertainty, consumers tend to purchase more private label or other economy brands, which could reduce sales volumes of our higher margin products or there could be a shift in our product mix to our lower margin offerings. If we are not able to maintain or improve our brand image, it could have a material effect on our market share and our profitability.

We may not achieve our targeted cost savings and efficiencies from cost reduction initiatives.

Our success depends in part on our ability to be an efficient producer in a highly competitive industry. We have invested a significant amount in capital expenditures to improve our operational facilities. Ongoing operational issues are likely to occur when carrying out major production, procurement, or logistical changes and these, as well as any failure by us to achieve our planned cost savings and efficiencies, could have a material adverse effect on our business and consolidated financial position and on the consolidated results of our operations and profitability.

Technology failures could disrupt our operations and negatively impact our business.

We increasingly rely on information technology systems to process, transmit, and store electronic information. For example, our production and distribution facilities and inventory management utilize information technology to increase efficiencies and limit costs. Information technology systems are also integral to the reporting of our results of operations. Furthermore, a significant portion of the communications between, and storage of personal data of, our personnel, customers, consumers and suppliers depends on information technology. Our information technology systems may be vulnerable to a variety of interruptions, as a result of updating our SAP platform or due to events beyond our control, including, but not limited to, natural disasters, terrorist attacks, telecommunications failures, computer viruses, hackers, and other security issues. Moreover, our computer systems have been, and will likely continue to be subjected to computer viruses or other malicious codes, unauthorized access attempts, and cyber- or phishing-attacks. These events could compromise our confidential information, impede or interrupt our business operations, and may result in other negative consequences, including remediation costs, loss of revenue, litigation and reputational damage. Furthermore, if a breach or other breakdown results in disclosure of confidential or personal information, we may suffer reputational, competitive and/or business harm. To date, we have not experienced a material breach of cybersecurity. While

we have implemented administrative and technical controls and taken other preventive actions to reduce the risk of cyber incidents and protect our information technology, they may be insufficient to prevent physical and electronic break-ins, cyber-attacks or other security breaches to our computer systems.

Our intellectual property rights are valuable, and any inability to protect them could reduce the value of our products and brands.

We consider our intellectual property rights, particularly and most notably our trademarks, but also including patents, trade secrets, copyrights and licensing agreements, to be a significant and valuable aspect of our business. We attempt to protect our intellectual property rights through a combination of patent, trademark, copyright and trade secret laws, as well as licensing agreements, third party nondisclosure and assignment agreements and policing of third party misuses of our intellectual property. Our failure to obtain or adequately protect our trademarks, products, new features of our products, or our technology, or any change in law or other changes that serve to lessen or remove the current legal protections of our intellectual property, may diminish our competitiveness and could materially harm our business.

We may be unaware of intellectual property rights of others that may cover some of our technology, brands or products. Any litigation regarding patents or other intellectual property could be costly and time-consuming and could divert the attention of our management and key personnel from our business operations. Third party claims of intellectual property infringement might also require us to enter into costly license agreements. We also may be subject to significant damages or injunctions against development and sale of certain products.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters and principal research and development facilities are located in Battle Creek, Michigan.

We operated, as of February 24, 2014, manufacturing plants and distribution and warehousing facilities totaling more than 35 million square feet of building area in the United States and other countries. Our plants have been designed and constructed to meet our specific production requirements, and we periodically invest money for capital and technological improvements. At the time of its selection, each location was considered to be favorable, based on the location of markets, sources of raw materials, availability of suitable labor, transportation facilities, location of our other plants producing similar products, and other factors. Our manufacturing facilities in the United States include four cereal plants and warehouses located in Battle Creek, Michigan; Lancaster, Pennsylvania; Memphis, Tennessee; and Omaha, Nebraska and other plants or facilities in San Jose, California; Atlanta, Augusta, Columbus, and Rome, Georgia; Chicago, Illinois; Seelyville, Indiana; Kansas City, Kansas; Florence, Louisville, and Pikeville, Kentucky; Grand Rapids and Wyoming, Michigan; Blue Anchor, New Jersey; Cary and Charlotte, North Carolina; Cincinnati and Zanesville, Ohio; Muncy, Pennsylvania; Jackson and Rossville, Tennessee; Clearfield, Utah; and Allyn, Washington.

Outside the United States, we had, as of February 24, 2014, additional manufacturing locations, some with warehousing facilities, in Australia, Belgium, Brazil, Canada, Colombia, Ecuador, Germany, Great Britain, India, Japan, Mexico, Poland, Russia, South Africa, South Korea, Spain, Thailand, and Venezuela.

We generally own our principal properties, including our major office facilities, although some manufacturing facilities are leased, and no owned property is subject to any major lien or other encumbrance. Distribution facilities (including related warehousing facilities) and offices of non-plant locations typically are leased. In general, we consider our facilities, taken as a whole, to be suitable, adequate, and of sufficient capacity for our current operations.

ITEM 3. LEGAL PROCEEDINGS

We are subject to various legal proceedings, claims, and governmental inspections, audits or investigations arising out of our business which cover matters such as general commercial, governmental regulations, antitrust and trade regulations, product liability, environmental, intellectual property, employment and other actions. In the opinion of management, the ultimate resolution of these matters will not have a material adverse effect on our financial position or results of operations.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Information on the market for our common stock, number of shareowners and dividends is located in Note 15 within Notes to Consolidated Financial Statements.

In December 2012, our board of directors approved a share repurchase program authorizing us to repurchase shares of our common stock amounting to \$300 million during 2013. On April 26, 2013, the board of directors approved an authorization to repurchase up to \$1 billion in shares through April 2014. In February 2014, the board of directors approved a new authorization to repurchase up to \$1.5 billion in shares through December 2015. This authorization supersedes the April 2013 authorization and is intended to allow us to repurchase shares for general corporate purposes and to offset issuances for employee benefit programs. During 2013, the Company repurchased approximately 9 million shares for a total of \$544 million.

The following table provides information with respect to purchases of common shares under programs authorized by our board of directors during the quarter ended December 28, 2013.

(millions, except per share data)

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
Month #1: 9/29/13-10/26/13				\$ 456
Month #2: 10/27/13-11/23/13				\$ 456
Month #3: 11/24/13-12/28/13				\$ 456

(a) Underlying gross profit as a percentage of net sales, underlying operating profit, underlying operating profit as a percentage of net sales, and underlying net income attributable to Kellogg Company, are non-GAAP measures that exclude the impact of pension and commodity mark-to-market adjustments and cost related to Project K. We believe the use of such non-GAAP measures provides increased transparency and assists in understanding our underlying operating performance. These non-GAAP measures are reconciled to the directly comparable measures in accordance with U.S. GAAP within our Management's Discussion and Analysis.

(b) Comparable basic earnings per share and comparable diluted earnings per share are non-GAAP measures that exclude the impact of pension and commodity mark-to-market adjustments, the impact of Project K costs, and the impact of integration costs, net of one-time benefits, related to the acquisition of the Pringles business.

Edgar Filing: KELLOGG CO - Form 10-K

- (c) We use this non-GAAP financial measure, which is reconciled above, to focus management and investors on the amount of cash available for debt repayment, dividend distribution, acquisition opportunities, and share repurchase.
- (d) Interest coverage ratio is calculated based on underlying net income attributable to Kellogg Company before interest expense, underlying income taxes, depreciation and amortization, divided by interest expense.
- (e) 2012 Balances have been revised as discussed in Note 2 to the financial statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Kellogg Company and Subsidiaries

RESULTS OF OPERATIONS

Business overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to help the reader understand Kellogg Company, our operations and our present business environment. MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes thereto contained in Item 8 of this report.

For more than 100 years, consumers have counted on Kellogg for great-tasting, high-quality and nutritious foods. Kellogg is the world's leading producer of cereal, second largest producer of cookies and crackers, and a leading producer of savory snacks and frozen foods. Additional product offerings include toaster pastries, cereal bars, fruit-flavored snacks and veggie foods. Kellogg products are manufactured and marketed globally.

We manage our operations through eight operating segments that are based on product category or geographic location. These operating segments are evaluated for similarity with regards to economic characteristics, products, production processes, types or classes of customers, distribution methods and regulatory environments to determine if they can be aggregated into reportable segments. We report results of operations in the following reportable segments: U.S. Morning Foods; U.S. Snacks; U.S. Specialty; North America Other; Europe; Latin America; and Asia Pacific. The reportable segments are discussed in greater detail in Note 16 within Notes to Consolidated Financial Statements.

We manage our Company for sustainable performance defined by our long-term annual growth targets. These targets are 3 to 4% for internal net sales, mid-single-digit (4 to 6%) for underlying internal operating profit, and high-single-digit (7 to 9%) for currency-neutral comparable diluted net earnings per share.

During 2013 we announced Project K, a four-year efficiency and effectiveness program. The program is expected to generate a significant amount of savings, once all phases are approved and implemented, that will be invested in key strategic areas of focus for the business. We expect that this investment will drive future growth in revenues, gross margin, operating profit, and cash flow. See the Exit or disposal activities section for more information.

Comparability

Internal net sales growth excludes the impact of foreign currency translation and, if applicable, acquisitions, dispositions and integration costs associated with the acquisition of the *Pringles*® business (Pringles).

Comparability of certain financial measures is impacted significantly by two types of charges: 1) Mark-to-market adjustments that are recorded for pensions and commodity derivative contracts; and 2) Charges related to Project K. To provide increased transparency and assist in understanding our underlying operating performance we use non-GAAP financial measures within the MD&A that exclude the impact of these charges. These non-GAAP financial measures include underlying gross margin, underlying gross profit, underlying SGA%, underlying operating margin, underlying operating profit, underlying operating profit growth, underlying income taxes, underlying effective tax rate, and underlying net income attributable to Kellogg Company. Underlying internal operating profit growth excludes the following impacts, if applicable: foreign currency translation, mark-to-market adjustments, acquisitions, dispositions, transaction and integration costs associated with the acquisition of the Pringles business, and charges related to Project K.

Additionally, integration costs associated with the acquisition of the Pringles business are excluded from comparable basic earnings per share (EPS), comparable diluted EPS, and comparable diluted EPS growth.

Financial results

For the full year 2013, our reported net sales increased by 4.2% and internal net sales increased by 0.3%. We experienced solid internal net sales growth in U.S. Specialty, North America Other, Europe, Latin America, and Asia Pacific while internal net sales in U.S. Morning Foods and U.S. Snacks declined. Reported operating profit increased by 81.6%, and underlying internal operating profit increased by 1.3%. The increased

Edgar Filing: KELLOGG CO - Form 10-K

profit was driven by the slight increase in sales and cost management across selling, general and administrative expense partially offset by cost of goods sold inflation and business mix driven by softness in several developed markets.

Diluted EPS of \$4.94 was up 85.0% compared to the prior year of \$2.67. Comparable diluted EPS of \$3.77 increased by 4.4% compared to prior year of \$3.61 and was in line with our expectations.

Reconciliation of certain non-GAAP Financial Measures

Consolidated results

(dollars in millions, except

per share data)	2013	2012	2011
Reported operating profit	\$ 2,837	\$ 1,562	\$ 1,427

Comparable diluted EPS growth (f)	4.4%	(0.3)%	6.5%

- (a) Includes mark-to-market adjustments for pension plans and commodity contracts as reflected in selling, general and administrative expense as well as cost of goods sold. Actuarial gains/losses for pension plans are recognized in the year they occur. In 2013, asset returns exceeded expectations by \$545 million and discount rates exceeded expectations by 65 basis points resulting in a favorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2013. A portion of this mark-to-market adjustment was capitalized as inventoriable cost at the end of 2013. In 2012, asset returns exceeded expectations by \$211 million but discount rates fell almost 100 basis points resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2012. A portion of the 2012 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2012. This amount has been recorded in earnings in the first quarter of 2013. In 2011, asset returns were lower than expected by \$471 million and discount rates declined resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2011. A portion of the 2011 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2011. This amount was recorded in earnings in the first quarter of 2012. Mark-to-market adjustments for commodities reflect the changes in the fair value of contracts for the difference between contract and market prices for the underlying commodities. The resulting gains/losses are recognized in the quarter they occur.
- (b) Costs incurred related to execution of Project K, a four-year efficiency and effectiveness program. The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value added innovation. The program is expected to provide a number of benefits, including an optimized supply chain infrastructure, the implementation of global business services and a new global focus on categories.
- (c) Underlying operating profit, underlying operating profit growth, underlying income taxes, underlying effective income tax rate, and underlying net income attributable to Kellogg Company, are non-GAAP measures that exclude the impact of pension and commodity mark-to-market adjustments and Project K costs. Underlying operating profit growth excludes the impact of foreign currency translation, mark-to-market adjustments, and, if applicable, acquisitions, dispositions, and transaction and integration costs associated with the acquisition of Pringles. We believe the use of such non-GAAP measures provides increased transparency and assists in understanding our underlying operating performance. These non-GAAP measures are reconciled to the directly comparable measures in accordance with U.S. GAAP within this table.

- (d) Underlying operating profit for the years ended December 28, 2013 and December 29, 2012 includes postretirement benefit plan income of \$12 million and \$20 million, respectively. Underlying net income attributable to Kellogg Company for the years ended December 28, 2013 and December 29, 2012 includes postretirement benefit plan income of \$9 million and \$14 million, respectively.
- (e) In 2013, net income from mark-to-market adjustments, in general, were incurred in jurisdictions with tax rates higher than our reported effective tax rate. Costs incurred related to the execution of Project K, in general, were incurred in jurisdictions with tax rates lower than our reported effective tax rate. In 2012 and 2011, net losses from mark-to-market adjustments, in general, were incurred in jurisdictions with tax rates higher than our reported effective tax rate.
- (f) Comparable EPS is a non-GAAP measure that excludes the impact of pension and commodity mark-to-market adjustments, the impact of Project K costs, and the impact of integration costs, net of one-time benefits, related to the acquisition of the Pringles business.

Net sales and operating profit

2013 compared to 2012

The following table provides an analysis of net sales and operating profit performance for 2013 versus 2012:

(dollars in millions)	U.S. Morning Foods	U.S. Snacks	U.S. Specialty	North America Other	Europe	Latin America	Asia Pacific	Corp- orate	Consol- idated
2013 net sales	\$ 3,465	\$ 3,534	\$ 1,202	\$ 1,515	\$ 2,860	\$ 1,195	\$ 1,021	\$	\$ 14,792
2012 net sales	\$ 3,533	\$ 3,400	\$ 1,121	\$ 1,485	\$ 2,527	\$ 1,121	\$ 1,010	\$	\$ 14,197
% change 2013 vs. 2012:									
As Reported	(1.9)%	4.0 %	7.2 %	2.0 %	13.2 %	6.6 %	1.1 %	%	4.2 %

Underlying internal (f)	(.3)%	(10.6)%	7.7 %	8.0 %	2.6 %	.1 %	8.4 %	61.6 %	1.3 %

(a) Impact of results for the year ended December 28, 2013 and December 29, 2012 from the acquisition of Pringles and the divestiture of Navigable Foods.

(b) Includes impact of integration costs associated with the Pringles acquisition.

(c) Internal net sales growth for 2013 excludes the impact of acquisitions, divestitures, integration costs and impact of foreign currency translation. Internal net sales growth is a non-GAAP financial measure which is reconciled to the directly comparable measure in accordance with U.S. GAAP within these tables.

(d) Includes mark-to-market adjustments for pension plans and commodity contracts as reflected in selling, general and administrative expense as well as cost of goods sold. Actuarial gains/losses for pension plans are recognized in the year they occur. In 2013, asset returns exceeded expectations by \$545 million and discount rates exceeded expectations by 65 basis points resulting in a favorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2013. A portion of this mark-to-market adjustment was capitalized as inventoriable cost at the end of 2013. In 2012, asset returns exceeded expectations by \$211 million but discount rates fell almost 100 basis points resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2012. A portion of the 2012 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2012. This amount has been recorded in earnings in the first quarter of 2013. In 2011, asset returns were lower than expected by \$471 million and discount rates declined resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2011. A portion of the 2011 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2011. This amount was recorded in earnings in the first quarter of 2012. Mark-to-market adjustments for commodities reflect the changes in the fair value of contracts for the difference between contract and market prices for the underlying commodities. The resulting gains/losses are recognized in the quarter they occur.

(e) Costs incurred related to execution of Project K, a four-year efficiency and effectiveness program. The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value-added innovation. The program is expected to provide a number of benefits, including an optimized supply chain infrastructure, the implementation of global business services, and a new global focus on categories.

- (f) Underlying internal operating profit growth excludes the impact of foreign currency translation, pension and commodity mark-to-market adjustments, Project K costs and, if applicable, acquisitions, dispositions, and integration costs associated with the acquisition of Pringles. The Company believes the use of this non-GAAP measure provides increased transparency and assists in understanding underlying operating performance. This non-GAAP measure is reconciled to the directly comparable measure in accordance with U.S. GAAP within this table.

Internal net sales for U.S. Morning Foods declined 1.9% as a result of unfavorable volume and flat pricing/mix. This segment consists of cereal, toaster pastries, health and wellness bars, and beverages. Cereal category growth has been challenging throughout the year due to the timing of innovation, weakness in the adult segment of the portfolio and reduced retailer inventories. Despite this category performance, *Raisin Bran*® posted a solid consumption increase behind good innovation and advertising that has resonated with consumers, and *Froot Loops*® posted consumption growth as a result of innovation launched during the year. Toaster pastries reported solid growth behind innovations which resulted in consumption and share gains for the year. Beverages continued to report increased consumption resulting from expanded distribution.

Internal net sales in U.S. Snacks declined by 2.9% as a result of unfavorable volume which was partially offset by favorable pricing/mix. This business consists of crackers, cereal bars, cookies, savory snacks and fruit-flavored snacks. The sales decline was the result of lower shipments in crackers, cereal bars, cookies, and fruit-flavored snacks. Crackers decline was the result of *Special K Cracker Chips*® lapping a strong year-ago launch. This decline was partially offset with innovations by the *Cheez-it*® and *Town House*® brands. Sales declined in cereal bars across most brands. Cereal bars reported gains in *Nutri-Grain*® and *Rice Krispies Treats*® where we invested behind innovations. Cookies sales declined for the year. This was partially driven by reductions in retailer inventories and strong competitor actions resulting in weakness across many of our brands. Savory snacks reported a solid sales increase for the year as *Pringles*® consumption gains continued throughout the year.

Internal net sales in U.S. Specialty increased by 4.1% as a result of favorable pricing/mix and volume. Sales growth was due to strong results from innovation launches, expanded points of distribution, and pricing.

Internal net sales in North America Other (U.S. Frozen and Canada) increased by 2.2% due to favorable pricing/mix and volume. Sales growth was the result of our U.S. Frozen business posting solid growth for the year while gaining share as a result of increased brand-building support behind innovation activity.

Europe's internal net sales increased 1.7% for the year driven by increased volume and favorable pricing/mix. Competitive conditions in Europe remained challenging. The cereal category in the UK continued to be difficult, although new *Crunchy Nut*® granola contributed to sales and *Crunchy Nut*®, *Rice Krispies*®, and *Corn Flakes*® all gained share. We also posted sales growth in the Mediterranean/Middle East businesses and in Russia and are pleased with results in these developing growth regions. Latin America's internal net sales growth was 5.5% due to a strong increase in pricing/mix partially offset by a decline in volume. Latin America experienced growth in both cereal and snacks. Cereal performed very well in Venezuela and Brazil. The Snacks business growth was primarily the result of strong results from our *Pringles*® brand. Internal net sales in Asia Pacific grew 3.0% as a result of favorable volume partially offset by unfavorable pricing/mix. Asia Pacific's growth was driven by solid cereal performance in India, Southeast Asia, and Japan. In addition, the snacks business reported strong performance behind the *Pringles*® brand. The Australia business experienced declines in the cereal business and gains in the snacks business.

Underlying internal operating profit in U.S. Morning Foods declined by 0.3%, U.S. Snacks declined by 10.6%, U.S. Specialty increased by 7.7%, North America Other grew by 8.0%, Europe increased by 2.6%, Latin America increased by 0.1% and Asia Pacific increased by 8.4%. U.S. Morning Foods' decline was attributable to increased commodity costs being partially offset by overhead cost containment, reduced consumer promotion investment, and the favorable impact of lapping a 2012 product recall. U.S. Snacks' decline was attributable to significantly increased commodity costs, being partially offset by reduced advertising investment, reduced consumer promotion investment, and overhead cost containment. U.S. Specialty's increase was attributable to favorable pricing, flat commodity costs, and reduced advertising investment. North America Other's increase was attributable to favorable pricing and overhead cost containment which was partially offset by slight increases in commodity costs and increased brand-building investment. Europe's operating profit improved due to reduced investment in consumer promotions and advertising along with overhead cost containment. These benefits were partially offset by increased commodity costs. The slight increase in Latin America's operating profit was due to favorable pricing and reduced investment in advertising being offset by the impact of a supply disruption in our Venezuela business due to the difficult operating environment. Asia Pacific's operating profit improvement was primarily the result of solid sales growth and 2012 charges related to the closure of a plant in Australia. Refer to Note 3 within Notes to Consolidated Financial Statements for further information on the Australian plant closure.

Underlying internal operating profit for Corporate improved as a result of reduced pension costs incurred resulting from the combination of lower interest cost and higher expected return on assets for the plans.

2012 compared to 2011

The following table provides an analysis of net sales and operating profit performance for 2012 versus 2011:

(dollars in millions)	U.S. Morning Foods	U.S. Snacks	U.S. Specialty	North America	Other	Europe	Latin America	Asia Pacific	Corp- orate	Consol- idated
2012 net sales	\$ 3,533	\$ 3,400	\$ 1,121	\$ 1,485	\$ 2,527	\$ 1,121	\$ 1,010	\$	\$	\$ 14,197

- (a) Impact of results for the year ended December 29, 2012 and December 31, 2011 from the acquisition of Pringles and the divestiture of Navigable Foods.
- (b) Includes impact of integration costs associated with the Pringles acquisition.
- (c) Internal net sales growth for 2012 excludes the impact of acquisitions, divestitures, integration costs and impact of foreign currency translation. Internal net sales growth is a non-GAAP financial measure which is reconciled to the directly comparable measure in accordance with U.S. GAAP within these tables.
- (d) Includes mark-to-market adjustments for pension plans and commodity contracts as reflected in selling, general and administrative expense as well as cost of goods sold. Actuarial gains/losses for pension plans are recognized in the year they occur. In 2012, asset returns exceeded expectations by \$211 million but discount rates fell almost 100 basis points resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2012. A portion of the 2012 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2012. In 2011, asset returns were lower than expected by \$471 million and discount rates declined resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2011. A portion of the 2011 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2011. This amount was recorded in earnings in the first quarter of 2012. Mark-to-market adjustments for commodities reflect the changes in the fair value of contracts for the difference between contract and market prices for the underlying commodities. The resulting gains/losses are recognized in the quarter they occur.
- (e) Underlying internal operating profit growth excludes the impact of foreign currency translation, pension and commodity mark-to-market adjustments, Project K costs and, if applicable, acquisitions, dispositions, and integration costs associated with the acquisition of Pringles. The Company believes the use of this non-GAAP measure provides increased transparency and assists in understanding underlying operating performance. This non-GAAP measure is reconciled to the directly comparable measure in accordance with U.S. GAAP within this table.

Internal net sales for U.S. Morning Foods increased 2.4% as a result of favorable pricing/mix and approximately flat volume. This segment consists of cereal, toaster pastries, health and wellness bars, and beverages. Cereal's internal net sales increased by 2.4% resulting from strong innovation launches and increased investment in brand-building supporting brands such as *Frosted Flakes*®. Toaster pastries reported consumption growth and share gains. Beverages reported increased consumption resulting from expanded distribution and strong innovation

launches.

Internal net sales in U.S. Snacks increased by 2.2% as a result of favorable pricing/mix and a slight decline in volume. This business consists of crackers, cereal bars, cookies, savory snacks and fruit-flavored snacks. The sales growth was the result of strong crackers consumption behind the launch of *Special K Cracker Chips*® and *Cheez-it*® innovation. Sales declined in cereal bars versus a difficult year-ago comparison while *Special K*® bars continued strong growth behind innovations. Cookies sales were flat versus a difficult year-ago comparison.

Internal net sales in U.S. Specialty increased by 7.4% as a result of favorable pricing/mix and volume. Sales growth was due to strong results from innovation launches and expanded points of distribution.

Internal net sales in North America Other (U.S. Frozen and Canada) increased by 7.0% due to favorable pricing/mix and volume. Sales growth was the result of our U.S. Frozen business posting double-digit growth for the year while gaining share as a result of increased brand-building support behind innovation activity.

Europe's internal net sales declined 3.8% for the year driven by a decline in volume, partially offset by favorable pricing/mix. The operating environment in Europe continued to be difficult as a result of economic conditions and competitive activity although we are experiencing continued improvement in sales trends. Latin America's internal net sales growth was 6.7% due to a strong increase in pricing/mix partially offset by a decline in volume. Latin America experienced growth in both cereal and snacks behind an increase in brand-building investment to support innovations. Growth was broad-based across nearly every market in the segment. Internal net sales in Asia Pacific grew 2.7% as a result of favorable volume partially offset by unfavorable pricing/mix. Asia Pacific's growth was driven by solid performance across most of Asia, as well as South Africa. Australia posted a slight decline in sales, but experienced continued improvement throughout the year, while gaining share in both the cereal and snacks categories.

The third quarter 2012 recall impacted internal operating profit growth as follows: Kellogg Consolidated (1.8%), U.S. Morning Foods (3.1%), U.S. Specialty (1.6%), North America Other (1.4%).

Underlying internal operating profit in U.S. Morning Foods declined by 3.4%, U.S. Snacks increased by 0.1%, U.S. Specialty increased by 1.2%, North America Other grew by 5.2%, Europe declined by 15.8%, Latin America declined by 3.7% and Asia Pacific declined by 28.7%. U.S. Morning Foods' decline was attributable to the impact of the third-quarter recall and increased commodity costs, partially offset by sales growth in cereal and toaster pastries. U.S. Snacks' increase was attributable to sales growth which was partially offset by cost inflation and a double-digit increase in brand-building investments. U.S. Specialty's increase was attributable to strong sales growth being partially offset by increased commodity costs and a double-digit increase in brand-building investment. North America Other's increase was attributable to strong sales growth being partially offset by increased commodity costs and a double-digit increase in brand-building investment. Europe's operating profit declined due to lower sales resulting from the continued difficult operating environment and increased commodity costs, partially offset by reduced brand-building investment. The decline in Latin America's operating profit was due to cost inflation and increased brand-building investment more than offsetting the impact of higher sales. Asia Pacific's operating profit decline was due to cost inflation, charges related to the closure of a plant in Australia, and increased brand-building investment more than offsetting the impact of higher sales. Refer to Note 3 within Notes to Consolidated Financial Statements for further information on the Australian plant closure.

Underlying internal operating profit for Corporate declined as a result of increased pension costs incurred resulting from the combination of lower interest cost and higher expected return on assets for the plans.

Margin performance

Margin performance was as follows:

				Change vs. prior year (pts.)	
	2013	2012	2011	2013	2012
Reported gross margin (a)	41.3%	38.3%	39.0%	3.0	(.7)
Mark-to-market (COGS) (b)	3.4%	(1.8)%	(2.9)%	5.2	1.1
Project K (COGS) (c)	(1.1)%	%	%	(1.1)	
Underlying gross margin (d)	39.0%	40.1%	41.9%	(1.1)	(1.8)
Reported SGA%	(22.1)%	(27.3)%	(28.2)%	5.2	.9
Mark-to-market (SGA) (b)	3.0%	(1.4)%	(2.3)%	4.4	.9
Project K (SGA) (c)	(.3)%	%	%	(.3)	
Underlying SGA% (d)	(24.8)%	(25.9)%	(25.9)%	1.1	
Reported operating margin	19.2%	11.0%	10.8%	8.2	.2
Mark-to-market (b)	6.4%	(3.2)%	(5.2)%	9.6	2.0
Project K (c)	(1.4)%	%	%	(1.4)	
Underlying operating margin (d)	14.2%	14.2%	16.0%		(1.8)

(a) Reported gross margin as a percentage of net sales. Gross margin is equal to net sales less cost of goods sold.

- (b) Includes mark-to-market adjustments for pension plans and commodity contracts as reflected in selling, general and administrative expense as well as cost of goods sold. Actuarial gains/losses for pension plans are recognized in the year they occur. In 2013, asset returns exceeded expectations by \$545 million and discount rates exceeded expectations by 65 basis points resulting in a favorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2013. A portion of this mark-to-market adjustment was capitalized as inventoriable cost at the end of 2013. In 2012, asset returns exceeded expectations by \$211 million but discount rates fell almost 100 basis points resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2012. A portion of the 2012 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2012. This amount has been recorded in earnings in the first quarter of

2013. In 2011, asset returns were lower than expected by \$471 million and discount rates declined resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2011. A portion of the 2011 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2011. This amount was recorded in earnings in the first quarter of 2012. Mark-to-market adjustments for commodities reflect the changes in the fair value of contracts for the difference between contract and market prices for the underlying commodities. The resulting gains/losses are recognized in the quarter they occur.

- (c) Costs incurred related to execution of Project K, a four-year efficiency and effectiveness program. The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value-added innovation. The program is expected to provide a number of benefits, including an optimized supply chain infrastructure, the implementation of global business services, and a new global focus on categories.
- (d) Underlying gross margin, underlying SGA%, and underlying operating margin are non-GAAP measures that exclude the impact of pension plans and commodity contracts mark-to-market adjustments and Project K costs. We believe the use of such non-GAAP measures provides increased transparency and assists in understanding our underlying operating performance.

Underlying gross margin declined by 110 basis points in 2013 due to the impact of inflation, net of productivity savings, lower operating leverage due to lower sales volume, and the impact of the lower margin structure of the Pringles business. Underlying SG&A% improved by 110 basis points as a result of favorable overhead leverage and synergies resulting from the Pringles acquisition, as well as reduced investment in consumer promotions.

Underlying gross margin declined by 180 basis points in 2012 as a result of cost inflation, net of cost savings, and the lower margin structure of the Pringles business. Underlying SGA% was consistent with 2011.

Our underlying gross profit, underlying SGA, and underlying operating profit measures are reconciled to the most comparable GAAP measure as follows:

(dollars in millions)	2013	2012	2011
Reported gross profit (a)	\$ 6,103	\$ 5,434	\$ 5,152
Mark-to-market (COGS) (b)	510	(259)	(377)
Project K (COGS) (c)	(174)		
Underlying gross profit (d)	\$ 5,767	\$ 5,693	\$ 5,529
Reported SGA	\$ 3,266	\$ 3,872	\$ 3,725
Mark-to-market (SGA) (b)	437	(193)	(305)
Project K (SGA) (c)	(34)		
Underlying SGA (d)	\$ 3,669	\$ 3,679	\$ 3,420
Reported operating profit	\$ 2,837	\$ 1,562	\$ 1,427
Mark-to-market (b)	947	(452)	(682)
Project K (c)	(208)		
Underlying operating profit (d)	\$ 2,098	\$ 2,014	\$ 2,109

- (a) Gross profit is equal to net sales less cost of goods sold.
- (b) Includes mark-to-market adjustments for pension plans and commodity contracts as reflected in selling, general and administrative expense as well as cost of goods sold. Actuarial gains/losses for pension plans are recognized in the year they occur. In 2013, asset returns exceeded expectations by \$545 million and discount rates exceeded expectations by 65 basis points resulting in a favorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2013. A portion of this mark-to-market adjustment was capitalized as inventoriable cost at the end of 2013. In 2012, asset returns exceeded expectations by \$211 million but discount rates fell almost 100 basis points resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2012. A portion of the 2012 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2012. This amount has been recorded in earnings in the first quarter of 2013. In 2011, asset returns were lower than expected by \$471 million and discount rates declined resulting in an unfavorable mark-to-market adjustment recorded in earnings in the fourth quarter of 2011. A portion of the 2011 pension mark-to-market adjustment was capitalized as an inventoriable cost at the end of 2011. This amount was recorded in earnings in the first quarter of 2012. Mark-to-market adjustments for commodities reflect the changes in the fair value of contracts for the difference between contract and market prices for the underlying commodities. The resulting gains/losses are recognized in the quarter they occur.

(c)

Edgar Filing: KELLOGG CO - Form 10-K

Costs incurred related to execution of Project K, a four-year efficiency and effectiveness program. The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value-added innovation. The program is expected to provide a number of benefits, including an optimized supply chain infrastructure, the implementation of global business services, and a new global focus on categories.

- (d) Underlying gross profit, underlying SGA, and underlying operating profit are non-GAAP measures that exclude the impact of pension plans and commodity contracts mark-to-market adjustments and Project K costs. We believe the use of such non-GAAP measures provides increased transparency and assists in understanding our underlying operating performance.

Restructuring and cost reduction activities

We view our continued spending on restructuring and cost reduction activities as part of our ongoing operating principles to provide greater visibility in achieving our long-term profit growth targets. Initiatives undertaken are currently expected to recover cash implementation costs within a five-year period of completion. Upon completion (or as each major stage is completed in the case of multi-year programs), the project begins to deliver cash savings and/or reduced depreciation.

Cost reduction initiatives

Prior to the announcement of Project K in 2013, we commenced various COGS and SGA cost reduction initiatives. The COGS initiatives are intended to optimize our global manufacturing network, reduce waste, and develop best practices on a global basis. The SGA initiatives focus on improvements in the efficiency and effectiveness of various global support functions.

During 2013, we recorded \$42 million of charges associated with cost reduction initiatives. The charges

were comprised of \$21 million being recorded in COGS and \$21 million recorded in SGA expense. At December 28, 2013, exit cost reserves were \$1 million, related to severance payments which will be made in 2014.

We recorded \$56 million of costs in 2012 associated with cost reduction initiatives. The charges were comprised of \$43 million being recorded in COGS and \$13 million recorded in SGA expense. At December 29, 2012, exit cost reserves were \$1 million, related to severance payments.

During 2011, we recorded \$61 million of costs associated with cost reduction initiatives. The charges were comprised of \$36 million being recorded in COGS and \$25 million recorded in SGA expense. Exit cost reserves at December 31, 2011 were \$1 million related to severance payments.

The tables below provide the details for the charges incurred during the years ended 2013, 2012 and 2011 and program costs to date for programs currently active as of December 28, 2013.

(millions)	2013	2012	2011	Program costs to date December 28, 2013
Employee related costs	\$ 7	\$	\$ 18	\$ 38
Asset related costs	4	4	4	8
Asset impairment	4	17		21
Other costs	27	35	39	76
Total	\$ 42	\$ 56	\$ 61	\$ 143

(millions)	2013	2012	2011	Program costs to date December 28, 2013
U.S. Morning Foods	\$ 9	\$ 16	\$ 11	\$ 21
U.S. Snacks	11	10	24	47
U.S. Specialty	2	1	1	6
North America Other	2	6	6	4
Europe	8	3	16	37
Latin America	1	2	1	2
Asia Pacific	8	18	2	26
Corporate	1			
Total	\$ 42	\$ 56	\$ 61	\$ 143

Other costs incurred in 2013, 2012 and 2011 consist primarily of third-party incremental costs related to the development and implementation of new business capabilities primarily in North America.

Project K

In 2013, we announced Project K, a four-year efficiency and effectiveness program. The program is expected to generate a significant amount of savings, once all phases are approved and implemented, that will be invested in key strategic areas of focus for the business. We expect that this investment will drive future growth in revenues, gross margin, operating profit, and cash flow.

The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value-added innovation. The program is expected to provide a number of benefits, including an optimized supply chain infrastructure, the implementation of global business services, and a new global focus on categories.

We currently anticipate that the program will result in total pre-tax charges, once all phases are approved and implemented, of \$1.2 to \$1.4 billion, with after-tax cash costs, including incremental capital investments, estimated to be \$900 million to \$1.1 billion. Cash expenditures of approximately \$30 million were incurred in 2013. Future cash expenditures are expected to be approximately \$300 to \$400 million in 2014 and the balance of \$570 to \$670 million thereafter. We currently expect the charges will consist of asset-related costs totaling \$450 to \$500 million which will consist primarily of asset impairments accelerated depreciation and other exit-related costs; employee-related costs totaling \$425 to \$475 million which will include severance, pension and other termination benefits; and other costs totaling \$325 to \$425 million which will consist primarily of charges related to the design and implementation of global business capabilities. A significant portion of other costs are the result of the implementation of global business service centers which are intended to simplify and standardize business support processes.

Edgar Filing: KELLOGG CO - Form 10-K

We currently expect that total pre-tax charges will impact reportable segments as follows: U.S. Morning Foods (approximately 17%), U.S. Snacks (approximately 7%), U.S. Specialty (approximately 1%), North America Other (approximately 3%), Europe (approximately 7%), Latin America (approximately 2%), Asia-Pacific (approximately 6%), and Corporate (approximately 57%). A majority of the costs impacting Corporate relate to additional initiatives to be executed after 2014 that are currently not fully defined. As the development of these initiatives is completed, we will update our estimated costs by reportable segment as needed.

We expect annual cost savings generated from Project K will be approximately \$425 to \$475 million by 2018, with approximately two-thirds the cost savings to be realized in cost of goods sold. We realized \$15 million of savings in 2013 and expect \$50 to \$60 million of savings in 2014, approximately 40% of which will come from cost of goods sold. Cost savings will be reinvested into the business through additional investments in advertising, in-store execution, and in the design and quality of our products. We will also invest in production capacity in developing and emerging markets, and in global category teams.

As a result of Project K, we anticipate that capital spending will be impacted for at least the next two

years. Our current business model assumes capital spending to be approximately 3-4% of net sales annually. For the next two years, capital spending is expected to be approximately 4-5% as a result of Project K activities.

Due to the difference in timing between expected cash costs for the project and expected future cash savings, we anticipate funding the project through a combination of cash on hand and short-term debt.

We also expect that the project will have an impact on our consolidated effective income tax rate during the execution of the project due to the timing of charges being taken in different tax jurisdictions. The impact of this project on our consolidated effective income tax rate will be excluded from the underlying income tax rate that will be disclosed on a quarterly basis.

In 2013, we recognized charges of \$208 million that have been attributed to the program. The charges comprised of \$174 million being recorded in COGS and \$34 million recorded in SGA. The tables below outline the details of these charges:

Project K

(millions)	2013
Employee related costs	\$ 107
Asset related costs	6
Asset impairment	66
Other costs	29
Total	\$ 208

(millions)	2013
U.S. Morning Foods	\$ 100
U.S. Snacks	19
U.S. Specialty	3
North America Other	9
Europe	19
Latin America	4
Asia Pacific	24
Corporate	30
Total	\$ 208

Employee related costs consisted of severance and pension charges. Asset impairments were recorded for fixed assets that were determined to be impaired and were written down to their estimated fair value. Asset related costs relate primarily to accelerated depreciation. Other costs incurred during the year ended December 28, 2013 consist primarily of third-party incremental costs related to the development and implementation of global business capabilities.

At December 28, 2013 exit cost reserves for Project K were \$77 million, related to severance payments and other costs of which a substantial portion will be paid in 2014 and 2015. The following table provides details for Project K exit cost reserves.

	Employee Related Costs	Asset Impairment	Other Asset Related Costs	Other Costs	Total
Liability as of December 29, 2012	\$ 107	\$ 66	\$ 6	\$ 29	\$ 208
2013 restructuring charges	(7)		(1)	(17)	(25)
Cash payments	(35)	(66)	(5)		(106)
Non-cash charges and other (a)					
Liability as of December 28, 2013	\$ 65	\$	\$ 12	\$	\$ 77

(a) Employee related non-cash charges consist of pension curtailment expense.

Foreign currency translation

Edgar Filing: KELLOGG CO - Form 10-K

The reporting currency for our financial statements is the U.S. dollar. Certain of our assets, liabilities, expenses and revenues are denominated in currencies other than the U.S. dollar, primarily in the Euro, British pound, Mexican peso, Australian dollar and Canadian dollar. To prepare our consolidated financial statements, we must translate those assets, liabilities, expenses and revenues into U.S. dollars at the applicable exchange rates. As a result, increases and decreases in the value of the U.S. dollar against these other currencies will affect the amount of these items in our consolidated financial statements, even if their value has not changed in their original currency. This could have significant impact on our results if such increase or decrease in the value of the U.S. dollar is substantial.

Interest expense

Annual interest expense is illustrated in the following table. The decline in 2013 was primarily due to refinancing of maturing long-term debt at lower interest rates and lower interest rates on long-term debt which has effectively been converted to floating rate obligations through the use of interest rate swaps. The increase in 2012 was primarily due to increased debt levels associated with the acquisition of Pringles, partially offset by lower interest rates on our long-term debt. Interest income (recorded in other income (expense), net) was (in millions), 2013-\$7; 2012-\$9; 2011-\$11. We currently expect that our 2014 gross interest expense will be approximately \$225 to \$235 million.

(dollars in millions)	2013	2012	2011	2013	Change vs. prior year	2012
Reported interest expense	\$ 235	\$ 261	\$ 233			
Amounts capitalized	2	2	5			
Gross interest expense	\$ 237	\$ 263	\$ 238	-9.9%		10.5%

Income taxes

Our reported effective tax rates for 2013, 2012 and 2011 were 30.4%, 27.4% and 27.0% respectively. Underlying effective tax rates for 2013, 2012 and 2011 were 28.3%, 28.8%, and 29.3%, respectively. The impact of discrete adjustments reduced our reported effective income tax rate by less than 1 percentage point for 2013. For 2012 and 2011 the impact of discrete adjustments on the reported effective income tax rate was a reduction of 3 and 5 percentage points, respectively. The 2012 effective income tax rate benefited from the elimination of a tax liability related to certain international earnings now considered indefinitely reinvested. Refer to Note 11 within Notes to Consolidated Financial Statements for further information. Fluctuations in foreign currency exchange rates could impact the expected effective income tax rate as it is dependent upon U.S. dollar earnings of foreign subsidiaries doing business in various countries with differing statutory tax rates. Additionally, the rate could be impacted if pending uncertain tax matters, including tax positions that could be affected by planning initiatives, are resolved more or less favorably than we currently expect.

Product withdrawal

Refer to Note 13 within Notes to Consolidated Financial Statements.

LIQUIDITY AND CAPITAL RESOURCES

Our principal source of liquidity is operating cash flows supplemented by borrowings for major acquisitions and other significant transactions. Our cash-generating capability is one of our fundamental strengths and provides us with substantial financial flexibility in meeting operating and investing needs.

We believe that our operating cash flows, together with our credit facilities and other available debt financing, will be adequate to meet our operating, investing and financing needs in the foreseeable future. However, there can be no assurance that volatility and/or disruption in the global capital and credit markets will not impair our ability to access these markets on terms acceptable to us, or at all.

As of December 28, 2013, we had \$255 million of cash and cash equivalents held in international jurisdictions which will be used to fund capital and other cash requirements of international operations. These amounts include \$42 million at December 28, 2013, subject to currency exchange controls in Venezuela, limiting the total amount of cash and cash equivalents held by our foreign subsidiaries that can be repatriated at any particular point in time.

The following table sets forth a summary of our cash flows:

(dollars in millions)	2013	2012	2011
Net cash provided by (used in):			
Operating activities	\$ 1,807	\$ 1,758	\$ 1,595
Investing activities	(641)	(3,245)	(587)
Financing activities	(1,141)	1,317	(957)
Effect of exchange rates on cash and cash equivalents	(33)	(9)	(35)
Net increase (decrease) in cash and cash equivalents	\$ (8)	\$ (179)	\$ 16

Operating activities

The principal source of our operating cash flows is net earnings, meaning cash receipts from the sale of our products, net of costs to manufacture and market our products.

Our net cash provided by operating activities for 2013 amounted to \$1,807 million, an increase of \$49 million compared with 2012. The increase compared to the prior year is primarily due to improved performance in core and other working capital. Our net cash provided by operating activities for 2012 amounted to \$1,758 million, an increase of \$163 million compared with 2011, reflecting improved performance in working capital including the one-time benefit of approximately \$150 million derived from the Pringles acquisition.

Our cash conversion cycle (defined as days of inventory and trade receivables outstanding less days of trade payables outstanding, based on a trailing 12 month average) is relatively short, equating to approximately 30 days for 2013 and 2012. Core working capital in 2013 and 2012

Edgar Filing: KELLOGG CO - Form 10-K

averaged 7.8% of net sales, compared to 6.9% in 2011. For 2013 compared to 2012 and 2012 compared to 2011, core working capital was negatively impacted by higher trade receivables, offset by lower days of inventory. For 2011, higher days of inventory was necessary to support our new product introductions and to maintain appropriate levels of service while investing in our supply chain infrastructure. In 2011, higher days of trade receivables resulted from strong sales at year-end due to our innovation launches and *Special K*® New Year's resolution programs.

Our total pension and postretirement benefit plan funding amounted to \$48 million, \$51 million and \$192 million, in 2013, 2012 and 2011, respectively.

The Pension Protection Act (PPA), and subsequent regulations, determines defined benefit plan minimum funding requirements in the United States. We believe that we will not be required to make any contributions under PPA requirements until 2015 or beyond. Our projections concerning timing of PPA funding requirements are subject to change primarily based on

general market conditions affecting trust asset performance, future discount rates based on average yields of high quality corporate bonds and our decisions regarding certain elective provisions of the PPA.

We currently project that we will make total U.S. and foreign benefit plan contributions in 2014 of approximately \$57 million. Actual 2014 contributions could be different from our current projections, as influenced by our decision to undertake discretionary funding of our benefit trusts versus other competing investment priorities, future changes in government requirements, trust asset performance, renewals of union contracts, or higher-than-expected health care claims cost experience.

We measure cash flow as net cash provided by operating activities reduced by expenditures for property additions. We use this non-GAAP financial measure of cash flow to focus management and investors on the amount of cash available for debt repayment, dividend distributions, acquisition opportunities, and share repurchases. Our cash flow metric is reconciled to the most comparable GAAP measure, as follows:

(dollars in millions)	2013	2012	2011
Net cash provided by operating activities	\$ 1,807	\$ 1,758	\$ 1,595
Additions to properties	(637)	(533)	(594)
Cash flow	\$ 1,170	\$ 1,225	\$ 1,001
year-over-year change	(4.5)%	22.4%	

The decrease in cash flow (as defined) in 2013 compared to 2012 was due primarily to higher capital expenditures. The increase in cash flow in 2012 compared to 2011 was driven by improved performance in working capital resulting from the one-time benefit derived from the Pringles acquisition, as well as changes in the level of capital expenditures during the three-year period.

Investing activities

Our net cash used in investing activities for 2013 amounted to \$641 million, a decrease of \$2,604 million compared with 2012 primarily attributable to the \$2,668 million acquisition of Pringles in 2012.

Capital spending in 2013 included investments in our supply chain infrastructure, and to support capacity requirements in certain markets, including Pringles. In addition, we continued the investment in our information technology infrastructure related to the reimplementation and upgrade of our SAP platform.

Net cash used in investing activities of \$3,245 million in 2012 increased by \$2,658 million compared with 2011, due to the acquisition of Pringles in 2012.

Cash paid for additions to properties as a percentage of net sales has increased to 4.3% in 2013, from 3.8% in 2012, which was a decrease from 4.5% in 2011.

Financing activities

Our net cash used by financing activities was \$1,141 million for 2013, compared to net cash provided by financing activities of \$1,317 million for 2012 and net cash used in financing activities of \$957 million for 2011. The increase in cash provided from financing activities in 2012 compared to 2013 and 2011, was primarily due to the issuance of debt related to the acquisition of Pringles.

Total debt was \$7.4 billion at year-end 2013 and \$7.9 billion at year-end 2012.

In February 2013, we issued \$250 million of two-year floating-rate U.S. Dollar Notes, and \$400 million of ten-year 2.75% U.S. Dollar Notes, resulting in aggregate net proceeds after debt discount of \$645 million. The proceeds from these Notes were used for general corporate purposes, including, together with cash on hand, repayment of the \$750 million aggregate principal amount of our 4.25% U.S. Dollar Notes due March 2013.

In May 2012, we issued \$350 million of three-year 1.125% U.S. Dollar Notes, \$400 million of five-year 1.75% U.S. Dollar Notes and \$700 million of ten-year 3.125% U.S. Dollar Notes, resulting in aggregate net proceeds after debt discount of \$1.442 billion. The proceeds of these Notes were used for general corporate purposes, including financing a portion of the acquisition of Pringles.

In May 2012, we issued Cdn. \$300 million of two-year 2.10% fixed rate Canadian Dollar Notes, using the proceeds from these Notes for general corporate purposes, which included repayment of intercompany debt. This repayment resulted in cash available to be used for a portion of the acquisition of Pringles.

Edgar Filing: KELLOGG CO - Form 10-K

In December 2012, we repaid \$750 million five-year 5.125% U.S. Dollar Notes at maturity with commercial paper.

In April 2011, we repaid \$945 million ten-year 6.60% U.S. Dollar Notes at maturity with commercial paper.

In May 2011, we issued \$400 million of seven-year 3.25% fixed rate U.S. Dollar Notes, using the proceeds of \$397 million for general corporate purposes and repayment of commercial paper.

In November 2011, we issued \$500 million of five-year 1.875% fixed rate U. S. Dollar Notes, using the proceeds of \$498 million for general corporate purposes and repayment of commercial paper.

In April 2010, our board of directors approved a share repurchase program authorizing us to repurchase shares of our common stock amounting to \$2.5 billion during 2010 through 2012.

Under this program, we repurchased approximately 1 million and 15 million shares of common stock for \$63 million and \$793 million during 2012 and 2011, respectively.

In December 2012, our board of directors approved a share repurchase program authorizing us to repurchase shares of our common stock amounting to \$300 million during 2013. In April 2013, the board of directors approved a \$1 billion share repurchase program expiring in April 2014. In February 2014, the board of directors approved a new authorization to repurchase up to \$1.5 billion in shares through December 2015. This authorization supersedes the April 2013 authorization and is intended to allow us to repurchase shares for general corporate purposes and to offset issuances for employee benefit programs. In May 2013, we entered into an Accelerated Share Repurchase (ASR) Agreement with a financial institution counterparty and paid \$355 million for the purchase of shares during the term of the agreement which extended through August 2013. The total number of shares delivered upon settlement of the ASR was based upon the volume weighted average price of the Company's stock over the term of the agreement. Total purchased in 2013, including shares delivered under the ASR, amounted to approximately 9 million shares totaling \$544 million.

We paid quarterly dividends to shareholders totaling \$1.80 per share in 2013, \$1.74 per share in 2012 and \$1.67 per share in 2011. Total cash paid for dividends increased by 5.0% in 2013 and 3.0% in 2012. In February 2014, the board of directors declared a dividend of \$.46 per common share, payable on March 17, 2014 to shareholders of record at the close of business on March 4, 2014.

In March 2011, we entered into an unsecured Four-Year Credit Agreement which allows us to borrow, on a revolving credit basis, up to \$2.0 billion.

Our long-term debt agreements contain customary covenants that limit Kellogg Company and some of its subsidiaries from incurring certain liens or from entering into certain sale and lease-back transactions. Some agreements also contain change in control provisions. However, they do not contain acceleration of maturity clauses that are dependent on credit ratings. A change in our credit ratings could limit our access to the U.S. short-term debt market and/or increase the cost of refinancing long-term debt in the future. However, even under these circumstances, we would continue to have access to our Four-Year Credit Agreement, which expires in March 2015. This source of liquidity is unused and available on an unsecured basis, although we do not currently plan to use it.

We monitor the financial strength of our third-party financial institutions, including those that hold our cash and cash equivalents as well as those who serve as counterparties to our credit facilities, our derivative financial instruments, and other arrangements.

We are in compliance with all covenants as of December 28, 2013. We continue to believe that we will be able to meet our interest and principal repayment obligations and maintain our debt covenants for the foreseeable future, while still meeting our operational needs, including the pursuit of selected bolt-on acquisitions. This will be accomplished through our strong cash flow, our short-term borrowings, and our maintenance of credit facilities on a global basis

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

Off-balance sheet arrangements

As of December 28, 2013 and December 29, 2012 we did not have any material off-balance sheet arrangements.

Contractual obligations

The following table summarizes our contractual obligations at December 28, 2013:

Contractual obligations (millions)	Payments due by period						
	Total	2014	2015	2016	2017	2018	2019 and beyond
Long-term debt:							
Principal	\$ 6,660	\$ 289	610	\$ 1,253	\$ 403	\$ 403	\$ 3,702

Edgar Filing: KELLOGG CO - Form 10-K

Interest (a)	2,521	221	224	214	193	187	1,482
Capital leases (b)	7	1	1	1	1	1	2
Operating leases (c)	673	172	145	119	85	71	81
Purchase obligations (d)	1,483	1,116	215	151	1		
Uncertain tax positions (e)	10	10					
Other long-term obligations (f)	599	140	66	72	55	56	210
Total	\$ 11,953	\$ 1,949	\$ 1,261	\$ 1,810	\$ 738	\$ 718	\$ 5,477

- (a) Includes interest payments on our long-term debt and payments on our interest rate swaps. Interest calculated on our variable rate debt was forecasted using the LIBOR forward rate curve as of December 28, 2013.

- (b) The total expected cash payments on our capital leases include interest expense totaling approximately \$1 million over the periods presented above.
- (c) Operating leases represent the minimum rental commitments under non-cancelable operating leases.
- (d) Purchase obligations consist primarily of fixed commitments for raw materials to be utilized in the normal course of business and for marketing, advertising and other services. The amounts presented in the table do not include items already recorded in accounts payable or other current liabilities at year-end 2013, nor does the table reflect cash flows we are likely to incur based on our plans, but are not obligated to incur. Therefore, it should be noted that the exclusion of these items from the table could be a limitation in assessing our total future cash flows under contracts.
- (e) As of December 28, 2013, our total liability for uncertain tax positions was \$79 million, of which \$10 million is expected to be paid in the next twelve months. We are not able to reasonably estimate the timing of future cash flows related to the remaining \$69 million.
- (f) Other long-term obligations are those associated with noncurrent liabilities recorded within the Consolidated Balance Sheet at year-end 2013 and consist principally of projected commitments under deferred compensation arrangements, multiemployer plans, and supplemental employee retirement benefits. The table also includes our current estimate of minimum contributions to defined benefit pension and postretirement benefit plans through 2019 as follows: 2014-\$57; 2015-\$40; 2016-\$40; 2017-\$41; 2018-\$41; 2019-\$42.

CRITICAL ACCOUNTING ESTIMATES

Promotional expenditures

Our promotional activities are conducted either through the retail trade or directly with consumers and include activities such as in-store displays and events, feature price discounts, consumer coupons, contests and loyalty programs. The costs of these activities are generally recognized at the time the related revenue is recorded, which normally precedes the actual cash expenditure. The recognition of these costs therefore requires management judgment regarding the volume of promotional offers that will be redeemed by either the retail trade or consumer. These estimates are made using various techniques including historical data on performance of similar promotional programs. Differences between estimated expense and actual redemptions are normally insignificant and recognized as a change in management estimate in a subsequent period. On a full-year basis, these subsequent period adjustments represent approximately 0.4% of our company's net sales. However, our company's total promotional expenditures (including amounts classified as a revenue reduction) are significant, so it is likely our results would be materially different if different assumptions or conditions were to prevail.

Property

Long-lived assets such as property, plant and equipment are tested for impairment when conditions indicate that the carrying value may not be recoverable. Management evaluates several conditions, including, but not limited to, the following: a significant decrease in the market price of an asset or an asset group; a significant adverse change in the extent or manner in which a long-lived asset is being used, including an extended period of idleness; and a current expectation that, more likely than not, a long-lived asset or asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. For assets to be held and used, we project the expected future undiscounted cash flows generated by the long-lived asset or asset group over the remaining useful life of the primary asset. If the cash flow analysis yields an amount less than the carrying amount we determine the fair value of the asset or asset group by using comparable market data. There are inherent uncertainties associated with the judgments and estimates we use in these analyses.

At December 28, 2013, we have property, plant and equipment of \$3.9 billion, net of accumulated depreciation, on our balance sheet. Included in this amount are approximately \$54 million of idle assets.

Goodwill and other intangible assets

We perform an impairment evaluation of goodwill and intangible assets with indefinite useful lives at least annually during the fourth quarter of each year in conjunction with our annual budgeting process. Our 2012 analysis excluded goodwill and other intangible assets related to the Pringles acquisition on May 31, 2012. To comply with the requirement that all goodwill and indefinite-lived intangible assets are tested for impairment within one year of acquisition, intangible assets recognized as part of the Pringles acquisition were tested for impairment during the second quarter of 2013 in addition to the evaluation during the fourth quarter of 2013.

Edgar Filing: KELLOGG CO - Form 10-K

Goodwill impairment testing first requires a comparison between the carrying value and fair value of a reporting unit with associated goodwill. Carrying value is based on the assets and liabilities associated with the operations of that reporting unit, which often requires allocation of shared or corporate items among reporting units. For the 2013 goodwill impairment test, the fair value of the reporting units was estimated based on market multiples. Our approach employs market multiples based on earnings before interest, taxes, depreciation and amortization (EBITDA), earnings for companies comparable to our reporting units and discounted cash flows. Management believes the assumptions used for the impairment test are consistent with those utilized by a market participant performing similar valuations for our reporting units.

Similarly, impairment testing of indefinite-lived intangible assets requires a comparison of carrying value to fair value of that particular asset. Fair values of non-goodwill intangible assets are based primarily on projections of future cash flows to be generated from that asset. For instance, cash flows related to a particular trademark would be based on a projected royalty stream attributable to branded product sales discounted at rates consistent with rates used by market participants. These estimates are made using various inputs including historical data, current and anticipated market conditions, management plans, and market comparables.

We also evaluate the useful life over which a non-goodwill intangible asset with a finite life is expected to contribute directly or indirectly to our cash flows. Reaching a determination on useful life requires significant judgments and assumptions regarding the future effects of obsolescence, demand, competition, other economic factors (such as the stability of the industry, known technological advances, legislative action that results in an uncertain or changing regulatory environment, and expected changes in distribution channels), the level of required maintenance expenditures, and the expected lives of other related groups of assets.

At December 28, 2013, goodwill and other intangible assets amounted to \$7.4 billion, consisting primarily of goodwill and brands associated with the 2001 acquisition of Keebler Foods Company and the 2012 acquisition of Pringles. Within this total, approximately \$2.3 billion of non-goodwill intangible assets were classified as indefinite-lived, comprised principally of Keebler and Pringles trademarks. We currently believe that the fair value of our goodwill and other intangible assets exceeds their carrying value and that those intangibles so classified will contribute indefinitely to our cash flows. The percentage of excess fair value over carrying value of the U.S. Snacks reporting unit was approximately 57% and 43% in 2013 and 2012, respectively. However, if we had used materially different assumptions, which we do not believe are reasonably possible, regarding the future performance of our business or a different market multiple in the valuation, this could have resulted in significant impairment losses. Additionally, we have \$57 million of goodwill related to our 2008 acquisition of United Bakers in Russia. The percentage of excess fair value over carrying value of the Russian reporting unit was approximately 30% in 2013 and 2012. If we used modestly different assumptions regarding sales multiples and EBITDA in the valuation, this could have resulted in an impairment loss. For example, if our projection of EBITDA margins had been lower by 200 basis points, this change in assumption may have resulted in impairment of some or all of the goodwill in the Russian reporting unit. Management will continue to monitor the situation closely.

Retirement benefits

Our company sponsors a number of U.S. and foreign defined benefit employee pension plans and also provides retiree health care and other welfare benefits in the United States and Canada. Plan funding strategies are influenced by tax regulations and asset return performance. A substantial majority of plan assets are invested in a globally diversified portfolio of equity securities with smaller holdings of debt securities and other investments. We recognize the cost of benefits provided during retirement over the employees' active working life to determine the obligations and expense related to our retiree benefit plans. Inherent in this concept is the requirement to use various actuarial assumptions to predict and measure costs and obligations many years prior to the settlement date. Major actuarial assumptions that require significant management judgment and have a material impact on the measurement of our consolidated benefits expense and accumulated obligation include the long-term rates of return on plan assets, the health care cost trend rates, and the interest rates used to discount the obligations for our major plans, which cover employees in the United States, United Kingdom and Canada.

Our expense recognition policy for pension and nonpension postretirement benefits is to immediately recognize actuarial gains and losses in our operating results in the year in which they occur. Actuarial gains and losses are recognized annually as of our measurement date, which is our fiscal year-end, or when remeasurement is otherwise required under generally accepted accounting principles.

Additionally, for purposes of calculating the expected return on plan assets related to pension and nonpension postretirement benefits we use the fair value of plan assets.

To conduct our annual review of the long-term rate of return on plan assets, we model expected returns over a 20-year investment horizon with respect to the specific investment mix of each of our major plans. The return assumptions used reflect a combination of rigorous historical performance analysis and forward-looking views of the financial markets including consideration of current yields on long-term bonds, price-earnings ratios of the major stock market indices, and long-term inflation. Our U.S. plan model, corresponding to approximately 68% of our trust assets globally, currently incorporates a long-term inflation assumption of 2.5% and an active management premium of 1% (net of fees) validated by historical analysis and future return expectations. Although we review our expected long-term rates of return annually, our benefit trust investment performance for one particular year does not, by itself, significantly influence our evaluation. Our expected rates of return have generally not been revised, provided these rates continue to fall within a more

likely than not corridor of between the 25th and 75th percentile of expected long-term returns, as determined by our modeling process. Our assumed rate of return for U.S. plans in 2014 of 8.5% equates to approximately the 60th percentile expectation of our model. Similar methods are used for various foreign plans with invested assets, reflecting local economic conditions. Foreign trust investments represent approximately 32% of our global benefit plan assets.

Based on consolidated benefit plan assets at December 28, 2013, a 100 basis point increase or decrease in the assumed rate of return would correspondingly increase or decrease 2014 benefits expense by approximately \$61 million. For each of the three fiscal years, our actual return on plan assets exceeded (was less than) the recognized assumed return by the following amounts (in millions): 2013-\$545; 2012-\$211; 2011 \$(471).

To conduct our annual review of health care cost trend rates, we model our actual claims cost data over a five-year historical period, including an analysis of pre-65 versus post-65 age groups and other important demographic components in our covered retiree population. This data is adjusted to eliminate the impact of plan changes and other factors that would tend to distort the underlying cost inflation trends. Our initial health care cost trend rate is reviewed annually and adjusted as necessary to remain consistent with recent historical experience and our expectations regarding short-term future trends. In comparison to our actual five-year compound annual claims cost growth rate of approximately 5.64%, our initial trend rate for 2014 of 5.25% reflects the expected future impact of faster-growing claims experience for certain demographic groups within our total employee population. Our initial rate is trended downward by 0.5% per year, until the ultimate trend rate of 4.5% is reached. The ultimate trend rate is adjusted annually, as necessary, to approximate the current economic view on the rate of long-term inflation plus an appropriate health care cost premium. Based on consolidated obligations at December 28, 2013, a 100 basis point increase in the assumed health care cost trend rates would increase 2014 benefits expense by approximately \$11 million and generate an immediate loss recognition of \$132 million. A 100 basis point excess of 2014 actual health care claims cost over that calculated from the assumed trend rate would result in an experience loss of approximately \$8 million and would increase 2014 expense by \$0.4 million. Any arising health care claims cost-related experience gain or loss is recognized in the year in which they occur. The experience gain arising from recognition of 2013 claims experience was approximately \$13 million.

To conduct our annual review of discount rates, we selected the discount rate based on a cash-flow matching analysis using Towers Watson's proprietary RATE:Link tool and projections of the future benefit payments constituting the projected benefit obligation for the plans. RATE:Link establishes the uniform discount rate that produces the same present value of the estimated future benefit payments, as is generated by discounting each year's benefit payments by a spot rate applicable to that year. The spot rates used in this process are derived from a yield curve created from yields on the 40th to 90th percentile of U.S. high quality bonds. A similar methodology is applied in Canada and Europe, except the smaller bond markets imply that yields between the 10th and 90th percentiles are preferable. The measurement dates for our defined benefit plans are consistent with our fiscal year end. Accordingly, we select discount rates to measure our benefit obligations that are consistent with market indices during December of each year.

Based on consolidated obligations at December 28, 2013, a 25 basis point decline in the weighted-average discount rate used for benefit plan measurement purposes would increase 2014 benefits expense by approximately \$1 million and would result in an immediate loss recognition of \$212 million. All obligation-related actuarial gains and losses are recognized immediately in the year in which they occur.

Despite the previously-described rigorous policies for selecting major actuarial assumptions, we periodically experience material differences between assumed and actual experience. During 2013, we recognized a net actuarial gain of approximately \$1,097 million compared to a net actuarial loss of approximately \$445 million in 2012. Of the total net gain recognized in 2013, approximately \$552 million was related primarily to favorable changes in the discount rate and \$545 million in asset gains. Of the \$445 million net loss recognized in 2012, approximately \$656 million was related to unfavorable changes in the discount rate, offset by approximately \$211 million of asset gains in 2012.

During 2013, we made contributions in the amount of \$34 million to Kellogg's global tax-qualified pension programs. This amount was mostly non-discretionary. Additionally we contributed \$14 million to our retiree medical programs.

Income taxes

Our consolidated effective income tax rate is influenced by tax planning opportunities available to us in the various jurisdictions in which we operate. The calculation of our income tax provision and deferred income tax assets and liabilities is complex and requires the use of estimates and judgment. Income taxes are provided on the portion of foreign earnings that is expected to be remitted to and taxable in the United States.

We recognize tax benefits associated with uncertain tax positions when, in our judgment, it is more likely than not that the positions will be sustained upon examination by a taxing authority. For tax positions that meet the more likely than not recognition threshold, we initially and subsequently measure the tax benefits as the largest amount that we judge to have a greater than 50% likelihood of being realized upon ultimate settlement. Our liability associated with unrecognized tax benefits is adjusted periodically due to changing circumstances, such as the progress of tax audits, new or emerging legislation and tax planning. The tax position will be derecognized when it is no longer more likely than not of being sustained. Significant adjustments to our liability for unrecognized tax benefits impacting our effective tax rate are separately presented in the rate reconciliation table of Note 11 within Notes to Consolidated Financial Statements.

ACCOUNTING STANDARDS TO BE ADOPTED IN FUTURE PERIODS

In July 2013, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) which provides guidance on financial statement presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This ASU is expected to eliminate diversity in practice resulting from lack of existing guidance. It applies to all entities with unrecognized tax benefits that also have tax loss or tax credit carryforwards in the same tax jurisdiction as of the reporting date. The ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013, with early adoption permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. We will adopt the updated standard in the first quarter of 2014. We do not expect the adoption of this guidance to have a significant impact on our financial statements.

FUTURE OUTLOOK

We expect during 2014 that Project K will enable us to begin to increase investment in certain businesses and the categories in which we compete. We expect internal net sales will increase by approximately 1 percent, underlying gross margin to improve approximately 40-50 basis points due to a moderate amount of deflation, net of cost savings initiatives, underlying internal operating profit to be flat to up 2 percent, and currency-neutral comparable EPS to grow by 1 to 3 percent. This outlook excludes the impact of mark-to-market adjustments, Project K costs, Pringles integration costs, and the 53rd week which will occur in 2014.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our company is exposed to certain market risks, which exist as a part of our ongoing business operations. We use derivative financial and commodity instruments, where appropriate, to manage these risks. As a matter of policy, we do not engage in trading or speculative transactions. Refer to Note 12 within Notes to Consolidated Financial Statements for further information on our derivative financial and commodity instruments.

Foreign exchange risk

Our company is exposed to fluctuations in foreign currency cash flows related primarily to third-party purchases, intercompany transactions, and when applicable, nonfunctional currency denominated third-party debt. Our company is also exposed to fluctuations in the value of foreign currency investments in subsidiaries and cash flows related to repatriation of these investments. Additionally, our company is exposed to volatility in the translation of foreign currency denominated earnings to U.S. dollars. Primary exposures include the U.S. dollar versus the euro, British pound, Australian dollar, Canadian dollar, and Mexican peso, and in the case of inter-subsidary transactions, the British pound versus the euro. We assess foreign currency risk based on transactional cash flows and translational volatility and may enter into forward contracts, options, and currency swaps to reduce fluctuations in long or short currency positions. Forward contracts and options are generally less than 18 months duration. Currency swap agreements may be established in conjunction with the term of underlying debt issuances.

The total notional amount of foreign currency derivative instruments at year-end 2013 was \$517 million, representing a settlement obligation of \$1 million. The total notional amount of foreign currency derivative instruments at year-end 2012 was \$570 million, representing a settlement receivable of \$1 million. All of these derivatives were hedges of anticipated transactions, translational exposure, or existing assets or liabilities, and mature within 18 months. Assuming an unfavorable 10% change in year-end exchange rates, the settlement obligation would have increased by approximately \$52 million at year-end 2013 and the settlement receivable would have decreased by approximately \$57 million at year-end 2012. These unfavorable changes would generally have been offset by favorable changes in the values of the underlying exposures.

Venezuela was designated as a highly inflationary economy as of the beginning of our 2010 fiscal year. Gains and losses resulting from the translation of the financial statements of subsidiaries operating in highly inflationary economies are recorded in earnings. For 2012 and 2011, the

impact of the translation of our

Venezuelan subsidiary's financial statements to U.S. dollars was not significant. In February 2013, the Venezuelan government announced a 46.5% devaluation of the official exchange rate. Additionally, the Transaction System for Foreign Currency Denominated Securities (SITME), used between May 2010 and January 2013 to translate our Venezuelan subsidiary's financial statements to U.S. dollars, was eliminated. Accordingly, in February 2013 we began using the official exchange rate to translate our Venezuelan subsidiary's financial statements to U.S. dollars. During 2013 we recognized a \$15 million charge as a result of the devaluation of the official Venezuelan exchange rate. At year-end 2013, our Venezuela subsidiary's Bolivar Fuerte-denominated net monetary asset position, which would be subject to remeasurement in the event of a further devaluation, was approximately \$63 million.

Interest rate risk

Our company is exposed to interest rate volatility with regard to future issuances of fixed rate debt and existing and future issuances of variable rate debt. Primary exposures include movements in U.S. Treasury rates, London Interbank Offered Rates (LIBOR), and commercial paper rates. We periodically use interest rate swaps and forward interest rate contracts to reduce interest rate volatility and funding costs associated with certain debt issues, and to achieve a desired proportion of variable versus fixed rate debt, based on current and projected market conditions.

During 2013 and 2012, we entered into interest rate swaps in connection with certain U.S. Dollar Notes. Refer to disclosures contained in Note 6 within Notes to Consolidated Financial Statements. The total notional amount of interest rate swaps at year-end 2013 was \$2.4 billion, representing a settlement obligation of \$59 million. The total notional amount of interest rate swaps at year-end 2012 was \$2.2 billion, representing a settlement receivable of \$64 million. Assuming average variable rate debt levels during the year, a one percentage point increase in interest rates would have increased interest expense by approximately \$35 million at year-end 2013 and \$24 million at year-end 2012.

Price risk

Our company is exposed to price fluctuations primarily as a result of anticipated purchases of raw and packaging materials, fuel, and energy. Primary exposures include corn, wheat, soybean oil, sugar, cocoa, cartonboard, natural gas, and diesel fuel. We have historically used the combination of long-term contracts with suppliers, and exchange-traded futures and option contracts to reduce price fluctuations in a desired percentage of forecasted raw material purchases over a duration of generally less than 18 months. During 2006, we entered into two separate 10-year over-the-counter commodity swap transactions to reduce fluctuations in the price of natural gas used principally in our manufacturing processes. The notional amount of the swaps totaled \$63 million as of December 28, 2013 and equates to approximately 50% of our North America manufacturing needs over the remaining hedge period. At year-end December 29, 2012 the notional amount was \$84 million.

The total notional amount of commodity derivative instruments at year-end 2013, including the North America natural gas swaps, was \$361 million, representing a settlement obligation of approximately \$32 million. The total notional amount of commodity derivative instruments at year-end 2012, including the natural gas swaps, was \$320 million, representing a settlement obligation of approximately \$36 million. Assuming a 10% decrease in year-end commodity prices, the settlement obligation would have increased by approximately \$18 million at year-end 2013, and \$9 million at year-end 2012, generally offset by a reduction in the cost of the underlying commodity purchases.

In addition to the commodity derivative instruments discussed above, we use long-term contracts with suppliers to manage a portion of the price exposure associated with future purchases of certain raw materials, including rice, sugar, cartonboard, and corrugated boxes. It should be noted the exclusion of these contracts from the analysis above could be a limitation in assessing the net market risk of our company.

Reciprocal collateralization agreements

In some instances we have reciprocal collateralization agreements with counterparties regarding fair value positions in excess of certain thresholds. These agreements call for the posting of collateral in the form of cash, treasury securities or letters of credit if a net liability position to us or our counterparties exceeds a certain amount. As of December 28, 2013, we had posted collateral of \$9 million in the form of cash, which was reflected as an increase in accounts receivable, net on the Consolidated Balance Sheet. As of December 29, 2012, we had received \$8 million cash collateral from a counterparty, which was reflected as a decrease in other assets on the Consolidated Balance Sheet.

Kellogg Company and Subsidiaries

Notes to Consolidated Financial Statements

NOTE 1

ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements include the accounts of the Kellogg Company, those of the subsidiaries that it controls due to ownership of a majority voting interest and the accounts of the variable interest entities (VIEs) of which Kellogg Company is the primary beneficiary (Kellogg or the Company). The Company continually evaluates its involvement with VIEs to determine whether it has variable interests and is the primary beneficiary of the VIE. When these criteria are met, the Company is required to consolidate the VIE. The Company's share of earnings or losses of nonconsolidated affiliates is included in its consolidated operating results using the equity method of accounting when it is able to exercise significant influence over the operating and financial decisions of the affiliate. The Company uses the cost method of accounting if it is not able to exercise significant influence over the operating and financial decisions of the affiliate. Intercompany balances and transactions are eliminated.

The Company's fiscal year normally ends on the Saturday closest to December 31 and as a result, a 53rd week is added approximately every sixth year. The Company's 2013, 2012 and 2011 fiscal years each contained 52 weeks and ended on December 28, 2013, December 29, 2012 and December 31, 2011, respectively. The next fiscal year which will contain a 53rd week for the Company will be 2014, ending on January 3, 2015.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods reported. Actual results could differ from those estimates.

Cash and cash equivalents

Highly liquid investments with remaining stated maturities of three months or less when purchased are considered cash equivalents and recorded at cost.

Accounts receivable

Accounts receivable consists principally of trade receivables, which are recorded at the invoiced amount, net of allowances for doubtful accounts and prompt payment discounts. Trade receivables do not bear interest. The allowance for doubtful accounts represents management's estimate of the amount of probable credit losses in existing accounts receivable, as determined from a review of past due balances and other specific account data. Account balances are written off against the allowance when management determines the receivable is uncollectible. The Company does not have off-balance sheet credit exposure related to its customers.

Inventories

Inventories are valued at the lower of cost or market. Cost is determined on an average cost basis.

Property

The Company's property consists mainly of plants and equipment used for manufacturing activities. These assets are recorded at cost and depreciated over estimated useful lives using straight-line methods for financial reporting and accelerated methods, where permitted, for tax reporting. Major property categories are depreciated over various periods as follows (in years): manufacturing machinery and equipment 5-30; office equipment 4-5; computer equipment and capitalized software 3-7; building components 15-25; building structures 50. Cost includes interest associated with significant capital projects. Plant and equipment are reviewed for impairment when conditions indicate that the carrying

value may not be recoverable. Such conditions include an extended period of idleness or a plan of disposal. Assets to be disposed of at a future date are depreciated over the remaining period of use. Assets to be sold are written down to realizable value at the time the assets are being actively marketed for sale and a sale is expected to occur within one year. As of year-end 2013 and 2012, the carrying value of assets held for sale was insignificant.

Goodwill and other intangible assets

Goodwill and indefinite-lived intangibles are not amortized, but are tested at least annually for impairment of value and whenever events or changes in circumstances indicate the carrying amount of the asset may be impaired. An intangible asset with a finite life is amortized on a straight-line basis over the estimated useful life.

For the goodwill impairment test, the fair value of the reporting units are estimated based on market multiples. This approach employs market multiples based on earnings before interest, taxes, depreciation and amortization, earnings for companies that are comparable to the Company's reporting units and discounted cash flow. The assumptions used for the impairment test are consistent with those utilized by a market participant performing similar valuations for the Company's reporting units.

Similarly, impairment testing of other intangible assets requires a comparison of carrying value to fair value of that particular asset. Fair values of non-goodwill intangible assets are based primarily on projections of future cash flows to be generated from that asset. For instance, cash flows related to a particular trademark would be based on a projected royalty stream attributable to branded product sales, discounted at rates consistent with rates used by market participants.

These estimates are made using various inputs including historical data, current and anticipated market conditions, management plans, and market comparables.

Revenue recognition

The Company recognizes sales upon delivery of its products to customers. Revenue, which includes shipping and handling charges billed to the customer, is reported net of applicable provisions for discounts, returns, allowances, and various government withholding taxes. Methodologies for determining these provisions are dependent on local customer pricing and promotional practices, which range from contractually fixed percentage price reductions to reimbursement based on actual occurrence or performance. Where applicable, future reimbursements are estimated based on a combination of historical patterns and future expectations regarding specific in-market product performance.

Advertising and promotion

The Company expenses production costs of advertising the first time the advertising takes place. Advertising expense is classified in selling, general and administrative (SGA) expense.

The Company classifies promotional payments to its customers, the cost of consumer coupons, and other cash redemption offers in net sales. The cost of promotional package inserts is recorded in cost of goods sold (COGS). Other types of consumer promotional expenditures are recorded in SGA expense.

Research and development

The costs of research and development (R&D) are expensed as incurred and are classified in SGA expense. R&D includes expenditures for new product and process innovation, as well as significant technological improvements to existing products and processes. The Company's R&D expenditures primarily consist of internal salaries, wages, consulting, and supplies attributable to time spent on R&D activities. Other costs include depreciation and maintenance of research facilities and equipment, including assets at manufacturing locations that are temporarily engaged in pilot plant activities.

Stock-based compensation

The Company uses stock-based compensation, including stock options, restricted stock, restricted stock units, and executive performance shares, to provide long-term performance incentives for its global workforce.

The Company classifies pre-tax stock compensation expense principally in SGA expense within its corporate operations. Expense attributable to awards of equity instruments is recorded in capital in excess of par value in the Consolidated Balance Sheet.

Certain of the Company's stock-based compensation plans contain provisions that accelerate vesting of awards upon retirement, disability, or death of eligible employees and directors. A stock-based award is considered vested for expense attribution purposes when the employee's retention of the award is no longer contingent on providing subsequent service. Accordingly, the Company recognizes compensation cost immediately for awards granted to retirement-eligible individuals or over the period from the grant date to the date retirement eligibility is achieved, if less than the stated vesting period.

The Company recognizes compensation cost for stock option awards that have a graded vesting schedule on a straight-line basis over the requisite service period for the entire award.

Corporate income tax benefits realized upon exercise or vesting of an award in excess of that previously recognized in earnings (windfall tax benefit) is recorded in other financing activities in the Consolidated Statement of Cash Flows. Realized windfall tax benefits are credited to capital in excess of par value in the Consolidated Balance Sheet. Realized shortfall tax benefits (amounts which are less than that previously recognized in earnings) are first offset against the cumulative balance of windfall tax benefits, if any, and then charged directly to income tax expense. The Company currently has sufficient cumulative windfall tax benefits to absorb arising shortfalls, such that earnings were not affected during the periods presented. Correspondingly, the Company includes the impact of pro forma deferred tax assets (i.e., the as if windfall or shortfall) for purposes of determining assumed proceeds in the treasury stock calculation of diluted earnings per share.

Income taxes

The Company recognizes uncertain tax positions based on a benefit recognition model. Provided that the tax position is deemed more likely than not of being sustained, the Company recognizes the largest amount of tax benefit that is greater than 50 percent likely of being ultimately realized upon settlement. The tax position is derecognized when it is no longer more likely than not of being sustained. The Company classifies income tax-related interest and penalties as

interest expense and SGA expense, respectively, on the Consolidated Statement of Income. The current portion of the Company's unrecognized tax benefits is presented in the Consolidated Balance Sheet in other current assets and other current liabilities, and the amounts expected to be settled after one year are recorded in other assets and other liabilities.

Income taxes are provided on the portion of foreign earnings that is expected to be remitted to and taxable in the United States.

Derivative Instruments

The fair value of derivative instruments is recorded in other current assets, other assets, other current liabilities or other liabilities. Gains and losses representing either hedge ineffectiveness, hedge components excluded from the assessment of effectiveness, or hedges of translational exposure are recorded in the Consolidated Statement of Income in other income (expense), net (OIE). In the Consolidated Statement of Cash Flows, settlements of cash flow and fair value hedges are classified as an operating activity; settlements of all other derivative instruments, including instruments for which hedge accounting has been discontinued, are classified consistent with the nature of the instrument.

Cash flow hedges. Qualifying derivatives are accounted for as cash flow hedges when the hedged item is a forecasted transaction. Gains and losses on these instruments are recorded in other comprehensive income until the underlying transaction is recorded in earnings. When the hedged item is realized, gains or losses are reclassified from accumulated other comprehensive income (loss) (AOCI) to the Consolidated Statement of Income on the same line item as the underlying transaction.

Fair value hedges. Qualifying derivatives are accounted for as fair value hedges when the hedged item is a recognized asset, liability, or firm commitment. Gains and losses on these instruments are recorded in earnings, offsetting gains and losses on the hedged item.

Net investment hedges. Qualifying derivative and nonderivative financial instruments are accounted for as net investment hedges when the hedged item is a nonfunctional currency investment in a subsidiary. Gains and losses on these instruments are included in foreign currency translation adjustments in AOCI.

Derivatives not designated for hedge accounting. Gains and losses on these instruments are recorded in the Consolidated Statement of Income, on the same line item as the underlying hedged item.

Other contracts. The Company periodically enters into foreign currency forward contracts and options to reduce volatility in the translation of foreign currency earnings to U.S. dollars. Gains and losses on these instruments are recorded in OIE, generally reducing the exposure to translation volatility during a full-year period.

Foreign currency exchange risk. The Company is exposed to fluctuations in foreign currency cash flows related primarily to third-party purchases, intercompany transactions and when applicable, nonfunctional currency denominated third-party debt. The Company is also exposed to fluctuations in the value of foreign currency investments in subsidiaries and cash flows related to repatriation of these investments. Additionally, the Company is exposed to volatility in the translation of foreign currency denominated earnings to U.S. dollars. Management assesses foreign currency risk based on transactional cash flows and translational volatility and may enter into forward contracts, options, and currency swaps to reduce fluctuations in long or short currency positions. Forward contracts and options are generally less than 18 months duration. Currency swap agreements are established in conjunction with the term of underlying debt issues.

For foreign currency cash flow and fair value hedges, the assessment of effectiveness is generally based on changes in spot rates. Changes in time value are reported in OIE.

Interest rate risk. The Company is exposed to interest rate volatility with regard to future issuances of fixed rate debt and existing and future issuances of variable rate debt. The Company periodically uses interest rate swaps, including forward-starting swaps, to reduce interest rate volatility and funding costs associated with certain debt issues, and to achieve a desired proportion of variable versus fixed rate debt, based on current and projected market conditions.

Fixed-to-variable interest rate swaps are accounted for as fair value hedges and the assessment of effectiveness is based on changes in the fair value of the underlying debt, using incremental borrowing rates currently available on loans with similar terms and maturities.

Price risk. The Company is exposed to price fluctuations primarily as a result of anticipated purchases of raw and packaging materials, fuel, and energy. The Company has historically used the combination of long-term contracts with suppliers, and exchange-traded futures and option contracts to reduce price fluctuations in a desired percentage of forecasted raw material purchases over a duration of generally less than 18 months.

Edgar Filing: KELLOGG CO - Form 10-K

Certain commodity contracts are accounted for as cash flow hedges, while others are marked to market through earnings. The assessment of effectiveness for

exchange-traded instruments is based on changes in futures prices. The assessment of effectiveness for over-the-counter transactions is based on changes in designated indices.

Pension benefits, nonpension postretirement and postemployment benefits

The Company sponsors a number of U.S. and foreign plans to provide pension, health care, and other welfare benefits to retired employees, as well as salary continuance, severance, and long-term disability to former or inactive employees.

The recognition of benefit expense is based on actuarial assumptions, such as discount rate, long-term rate of compensation increase, long-term rate of return on plan assets and health care cost trend rate, and is reported in COGS and SGA expense on the Consolidated Statement of Income.

Postemployment benefits. The Company recognizes an obligation for postemployment benefit plans that vest or accumulate with service. Obligations associated with the Company's postemployment benefit plans, which are unfunded, are included in other current liabilities and other liabilities on the Consolidated Balance Sheet. All gains and losses are recognized over the average remaining service period of active plan participants.

Postemployment benefits that do not vest or accumulate with service or benefits to employees in excess of those specified in the respective plans are expensed as incurred.

Pension and nonpension postretirement benefits. The Company recognizes actuarial gains and losses in operating results in the year in which they occur. Experience gains and losses are recognized annually as of the measurement date, which is the Company's fiscal year-end, or when remeasurement is otherwise required under generally accepted accounting principles. The Company uses the fair value of plan assets to calculate the expected return on plan assets.

Reportable segments are allocated service cost and amortization of prior service cost. All other components of pension and postretirement benefit expense, including interest cost, expected return on assets, and experience gains and losses are considered unallocated corporate costs and are not included in the measure of reportable segment operating results. See Note 16 for more information on reportable segments.

Management reviews the Company's expected long-term rates of return annually; however, the benefit trust investment performance for one particular year does not, by itself, significantly influence this evaluation. The expected rates of return are generally not revised provided these rates fall between the 25th and 75th percentile of expected long-term returns, as determined by the Company's modeling process.

For defined benefit pension and postretirement plans, the Company records the net overfunded or underfunded position as a pension asset or pension liability on the Consolidated Balance Sheet.

New accounting standards

Reporting of amounts reclassified out of Accumulated Other Comprehensive Income. In February 2013, the Financial Accounting Standards Board (FASB) issued an updated accounting standard requiring entities to present information about reclassifications out of accumulated other comprehensive income in a single note or on the face of the financial statements. The Company adopted the updated standard in 2013.

Indefinite-lived intangible asset impairment testing. In July 2012, the FASB issued an updated accounting standard to allow entities the option to first assess qualitative factors to determine whether it is necessary to perform the quantitative indefinite-lived intangible asset impairment test. Under the updated standard an entity would not be required to perform the quantitative impairment test unless the entity determines, based on a qualitative assessment, that it is more likely than not that an indefinite-lived intangible asset is impaired. The Company adopted the revised guidance in 2013, with no impact to the Consolidated Financial Statements.

Presentation of Comprehensive Income. In June 2011, the Financial Accounting Standards Board (FASB) issued a new accounting standard requiring most entities to present items of net income and other comprehensive income either in one continuous statement referred to as the statement of comprehensive income or in two separate, but consecutive, statements of net income and comprehensive income. The update does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The Company adopted this new standard in 2012.

Goodwill impairment testing. In September 2011, the FASB issued an updated accounting standard to allow entities the option to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under the updated standard an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The Company adopted the revised guidance in 2012,

with no impact to the Consolidated Financial Statements.

Multiemployer pension and postretirement benefit plans. In September 2011, the FASB issued an updated accounting standard to provide more information about an employer's financial obligations to multiemployer pension and postretirement benefit plans. Previously, employers were only required to disclose their total contributions to all multiemployer plans in which they participate and certain year-to-year changes in circumstances. The enhanced disclosures required under the revised guidance provide additional information regarding the overall financial health of the plan and the level of the employer's participation in the plan. The Company adopted the revised guidance in 2012. Refer to Note 10 for disclosures regarding multiemployer plans in which the Company participates.

NOTE 2

GOODWILL AND OTHER INTANGIBLE ASSETS

Pringles® acquisition

On May 31, 2012, the Company completed its acquisition of the *Pringles*® business (Pringles) from The Procter & Gamble Company (P&G) for \$2.695 billion, or \$2,683 billion net of cash and cash equivalents, subject to certain purchase price adjustments, which resulted in a reduction of the purchase price by approximately \$15 million to \$2.668 billion net of cash and cash equivalents. The acquisition was accounted for under the purchase method and was financed through a combination of cash on hand, and short-term and long-term debt. The assets and liabilities of Pringles are included in the Consolidated Balance Sheet as of December 28, 2013 and December 29, 2012 and the results of the Pringles operations subsequent to the acquisition date are included in the Consolidated Statement of Income.

The purchase price allocation, including the allocation to reportable segments, was completed during the quarter ended June 29, 2013 when the valuations of fixed assets and intangible assets were finalized resulting in a reallocation from that reported as of December 29, 2012 of goodwill between the Company's reportable segments. Prior year amounts were revised to reflect these changes as of the date of the acquisition, resulting in reductions to goodwill and the foreign currency translation component of other comprehensive income (OCI) of \$15 million as of December 29, 2012.

During the quarter ended September 28, 2013, the Company recorded an immaterial correction of an error to the purchase price allocation for Pringles that was outside of the measurement period, which resulted in an increase to other non-current liabilities, goodwill and non-current deferred tax assets of \$15 million, \$13 million and \$2 million, respectively. The goodwill of \$13 million was allocated to our operating segments as follows: Europe, \$10 million and Asia Pacific, \$3 million.

The final acquired assets and assumed liabilities include the following:

	May 31,
(millions)	2012
Accounts receivable, net	\$ 128
Inventories	103
Other prepaid assets	18
Property	317
Goodwill	1,319
Other intangibles:	
Definite-lived intangible assets	79
Brand	776
Other assets:	
Deferred income taxes	23
Other	16
Notes payable	(3)
Accounts payable	(9)
Other current liabilities	(24)
Other liabilities	(75)
	\$ 2,668

Goodwill of \$645 million is expected to be deductible for statutory tax purposes.

Goodwill is calculated as the excess of the purchase price over the fair value of the net assets recognized. The goodwill recorded as part of the acquisition primarily reflects the value of providing an established platform to leverage the Company's existing brands in the international snacks category, synergies expected to arise from the combined brand portfolios, as well as any intangible assets that do not qualify for separate recognition.

Edgar Filing: KELLOGG CO - Form 10-K

For the year ended December 28, 2013, the Company incurred integration-related costs as part of the Pringles acquisition as follows: \$46 million recorded in SGA, \$15 million recorded in COGS and \$5 million in net sales. Transaction fees and other integration-related costs incurred through December 29, 2012 were as follows: \$73 million recorded in SGA, \$3 million recorded in COGS and \$5 million in fees for a bridge financing facility which are recorded in OIE.

For the year ended December 28, 2013, Pringles contributed net revenues of \$1,658 million and net earnings of \$132 million, including the integration-related costs discussed above. Through December 29, 2012, Pringles contributed net revenues of \$887 million and net earnings of \$31 million, including the transaction fees and other integration-related costs discussed above. The unaudited pro forma combined historical results, as if Pringles had been acquired at the beginning of fiscal 2011 are estimated to be:

(millions, except per share data)	2012	2011
Net sales	\$ 14,862	\$ 14,722
Net income	\$ 1,001	\$ 954
Net income (loss) attributable to noncontrolling interests		(2)
Net income attributable to Kellogg Company	\$ 1,001	\$ 956
Net earnings per share	\$ 2.78	\$ 2.63

The pro forma results include transaction and bridge financing costs, interest expense on the debt issued to finance the acquisition, amortization of the definite lived intangible assets, and depreciation based on estimated fair value and useful lives. The pro forma results are not necessarily indicative of what actually would have occurred if the acquisition had been completed as of the beginning of 2011, nor are they necessarily indicative of future consolidated results.

In December 2012, the Company also entered into a series of agreements with a third party including a loan of \$44 million which is convertible into approximately 85% of the equity of the entity. Due to this convertible loan and other agreements, the Company determined that the entity is a VIE and the Company is the primary beneficiary. Accordingly, the Company has consolidated the financial statements of the VIE in 2012 and treated the consolidation as a business acquisition within the U.S. Snacks reportable segment, which resulted in the following as of December 29, 2012: current assets, \$14 million; property, \$36 million; amortizable intangibles and other non-current assets, \$26 million; goodwill, \$76 million; current liabilities, \$2 million; notes payable and long-term debt, \$39 million; non-current deferred tax liabilities, \$8 million; and noncontrolling interests, \$59 million. During 2013, the allocation was completed resulting in increases to goodwill and non-current deferred tax liabilities of \$12 million.

This entity had property and equipment with a carrying value of \$35 million and notes payable and current and long-term debt of \$30 million as of December 28, 2013. The liabilities recognized as a result of consolidating this entity do not represent additional claims on the Company's general assets. Conversely, general creditors would not have claims against the assets of the VIE.

Changes in the carrying amount of goodwill are presented in the following table.

Changes in the carrying amount of goodwill

	U.S.		North

NOTE 3**RESTRUCTURING AND COST REDUCTION ACTIVITIES**

The Company views its continued spending on restructuring and cost reduction activities as part of its ongoing operating principles to provide greater visibility in achieving its long-term profit growth targets. Initiatives undertaken are currently expected to recover cash implementation costs within a five-year period of completion. Upon completion (or as each major stage is completed in the case of multi-year programs), the project begins to deliver cash savings and/or reduced depreciation.

Cost reduction initiatives

Prior to the announcement of Project K in 2013, the Company commenced various COGS and SGA cost reduction initiatives. The COGS initiatives are intended to optimize the Company's global manufacturing network, reduce waste, and develop best practices on a global basis. The SGA initiatives focus on improvements in the efficiency and effectiveness of various global support functions.

During 2013, the Company recorded \$42 million of charges associated with cost reduction initiatives. The charges were comprised of \$21 million being recorded in COGS and \$21 million recorded in SGA expense. At December 28, 2013, exit cost reserves were \$1 million, related to severance payments which will be made in 2014.

The Company recorded \$56 million of costs in 2012 associated with cost reduction initiatives. The charges were comprised of \$43 million being recorded in COGS and \$13 million recorded in SGA expense. At December 29, 2012, exit cost reserves were \$1 million, related to severance payments.

During 2011, the Company recorded \$61 million of costs associated with cost reduction initiatives. The charges were comprised of \$36 million being recorded in COGS and \$25 million recorded in SGA expense. Exit cost reserves at December 31, 2011 were \$1 million related to severance payments.

The tables below provide the details for the charges incurred during the years ended 2013, 2012 and 2011 and program costs to date for programs currently active as of December 28, 2013.

(millions)	2013	2012	2011	Program costs to date December 28, 2013

Asia Pacific	8	18	2	26
Corporate	1			
Total	\$ 42	\$ 56	\$ 61	\$ 143

Other costs incurred in 2013, 2012, and 2011 consist primarily of third-party incremental costs related to the development and implementation of new business capabilities primarily in North America.

Project K

In 2013, the Company announced Project K, a four-year efficiency and effectiveness program. The program is expected to generate a significant amount of savings, once all phases are approved and implemented, that will be invested in key strategic areas of focus for the business. The Company expects that this investment will drive future growth in revenues, gross margin, operating profit, and cash flow.

The focus of the program will be to strengthen existing businesses in core markets, increase growth in developing and emerging markets, and drive an increased level of value-added innovation. The program is expected to provide a number of benefits, including

an optimized supply chain infrastructure, the implementation of global business services, and a new global focus on categories.

The Company currently anticipates that the program will result in total pre-tax charges, once all phases are approved and implemented, of \$1.2 to \$1.4 billion, with after-tax cash costs, including incremental capital expenditures, estimated to be \$900 million to \$1.1 billion. The Company currently expects the charges will consist of asset-related costs totaling \$450 to \$500 million which will consist primarily of asset impairments, accelerated depreciation and other exit-related costs; employee-related costs totaling \$425 to \$475 million which will include severance, pension and other termination benefits; and other costs totaling \$325 to \$425 million which will consist primarily of charges related to the design and implementation of global business capabilities. A significant portion of other costs are the result of the implementation of global business service centers which are intended to simplify and standardize business support processes.

The Company currently expects that total pre-tax charges will impact reportable segments as follows: U.S. Morning Foods (approximately 17%), U.S. Snacks (approximately 7%), U.S. Specialty (approximately 1%), North America Other (approximately 3%), Europe (approximately 7%), Latin America (approximately 2%), Asia-Pacific (approximately 6%), and Corporate (approximately 57%). A majority of the costs impacting Corporate relate to additional initiatives to be executed after 2014 that are currently not fully defined. As the development of these initiatives is completed, the Company will update its estimated costs by reportable segment as needed.

In 2013, the Company recognized charges of \$208 million that have been attributed to the program. The charges comprised of \$174 million being recorded in COGS and \$34 million recorded in SGA. The tables below outline the details of these charges:

Project K

(millions)	2013
Employee related costs	\$ 107
Asset related costs	6
Asset impairment	66
Other costs	29
Total	\$ 208

(millions)	2013
U.S. Morning Foods	\$ 100
U.S. Snacks	19
U.S. Specialty	3
North America Other	9
Europe	19
Latin America	4
Asia Pacific	24
Corporate	30
Total	\$ 208

Employee related costs consisted of severance and pension charges. Asset impairments were recorded for fixed assets that were determined to be impaired and were written down to their estimated fair value. Asset related costs relate primarily to accelerated depreciation. See Note 12 for more information. Other costs incurred consist primarily of third-party incremental costs related to the development and implementation of global business capabilities.

At December 28, 2013 exit cost reserves for Project K were \$77 million, related to severance payments and other costs of which a substantial portion will be paid in 2014 and 2015. The following table provides details for Project K exit cost reserves.

	Employee Related Costs	Asset Impairment	Asset Related Costs	Other Costs	Total
Liability as of December 29, 2012	\$	\$	\$	\$	\$

Edgar Filing: KELLOGG CO - Form 10-K

2013 restructuring charges	107	66	6	29	208
Cash payments	(7)		(1)	(17)	(25)
Non-cash charges and other (a)	(35)	(66)	(5)		(106)
Liability as of December 28, 2013	\$ 65	\$	\$	12	\$ 77

(a) Employee related non-cash charges consist of pension curtailment expense.

NOTE 4**EQUITY****Earnings per share**

Basic earnings per share is determined by dividing net income attributable to Kellogg Company by the weighted average number of common shares outstanding during the period. Diluted earnings per share is similarly determined, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all dilutive potential common shares had been issued. Dilutive potential common shares consist principally of employee stock options issued by the Company, and to a lesser extent, certain contingently issuable performance shares. Basic earnings per share is reconciled to diluted earnings per share in the following table:

	Net income		
	attributable	Average	Earnings
	to Kellogg	shares	per
(millions, except per share data)	Company	outstanding	share
2013			
Basic	\$ 1,807	363	\$ 4.98
Dilutive potential common shares		2	(0.04)
Diluted	\$ 1,807	365	\$ 4.94
2012			
Basic	\$ 961	358	\$ 2.68
Dilutive potential common shares		2	(0.01)
Diluted	\$ 961	360	\$ 2.67
2011			
Basic	\$ 866	362	\$ 2.39
Dilutive potential common shares		2	(0.01)
Diluted	\$ 866	364	\$ 2.38

The total number of anti-dilutive potential common shares excluded from the reconciliation for each period was (in millions): 2013-5.0; 2012-9.9; 2011-4.2.

Stock transactions

The Company issues shares to employees and directors under various equity-based compensation and stock purchase programs, as further discussed in Note 7. The number of shares issued during the periods presented was (in millions): 2013 10; 2012 5; 2011 7. The Company issued shares totaling less than one million in each of the years presented under *Kellogg DirectTM*, a direct stock purchase and dividend reinvestment plan for U.S. shareholders.

In December 2012, the Company's board of directors approved a share repurchase program authorizing the repurchase of up to \$300 million during 2013. In April 2013, the Company's board of directors approved an authorization to repurchase up to \$1 billion in shares through April 2014. In February 2014, the Company's board of directors approved a new authorization to repurchase up to \$1.5 billion in shares through December 2015. This authorization supersedes the April 2013 authorization and is intended to allow the Company to repurchase shares for general corporate purposes and to offset issuances for employee benefit programs. In May 2013, the Company entered into an Accelerated Share Repurchase (ASR) Agreement with a financial institution counterparty and paid \$355 million for the repurchase of shares during the term of the Agreement which extended through August 2013. During the second quarter of 2013, 4.9 million shares were initially delivered to the Company and accounted for as a reduction to Kellogg Company equity. The transaction was completed during the third quarter, at which time the Company received 0.6 million additional shares. The total number of shares delivered upon settlement of the ASR was based upon the volume weighted average price of the Company's stock over the term of the agreement.

During 2013, the Company repurchased 9 million shares of common stock for a total of \$544 million. During 2012, the Company repurchased 1 million shares of common stock for a total of \$63 million. During 2011, the Company repurchased 15 million shares of common stock at a total cost of \$793 million.

Comprehensive income

Comprehensive income includes net income and all other changes in equity during a period except those resulting from investments by or distributions to shareholders. Other comprehensive income for all years presented consists of foreign currency translation adjustments, fair value adjustments associated with cash flow hedges and adjustments for net experience losses and prior service cost related to employee benefit plans.

Reclassifications out of Accumulated Other Comprehensive Income (AOCI) for the year ended December 28, 2013 consisted of the following:

(millions)	Amount reclassified	Line item impacted
Details about AOCI		
components	from AOCI	within Income Statement
Gains and losses on cash flow hedges:		
Foreign currency exchange contracts	\$ (10)	COGS
Foreign currency exchange contracts	(2)	SGA
Interest rate contracts	(4)	Interest expense
Commodity contracts	10	COGS
	\$ (6)	Total before tax
		Tax (expense) benefit
	\$ (6)	Net of tax
Amortization of postretirement and postemployment benefits:		
Net experience loss	\$ 5	See Notes 8 and 9 for further details
Prior service cost	13	See Notes 8 and 9 for further details
	\$ 18	Total before tax
	(6)	Tax (expense) benefit
	\$ 12	Net of tax
Total reclassifications	\$ 6	Net of tax

Accumulated other comprehensive income (loss) as of December 28, 2013 and December 29, 2012 consisted of the following:

	December 28, 2013	December 29, 2012
(millions)		
Foreign currency translation adjustments	\$ (856)	\$ (832)
Cash flow hedges unrealized net gain (loss)	1	(3)
Postretirement and postemployment benefits:		
Net experience loss	(15)	(29)
Prior service cost	(66)	(82)
Total accumulated other comprehensive income (loss)	\$ (936)	\$ (946)

NOTE 5

LEASES AND OTHER COMMITMENTS

The Company's leases are generally for equipment and warehouse space. Rent expense on all operating leases was (in millions): 2013-\$174; 2012-\$174; 2011-\$166. During 2013, the Company entered into less than \$1 million in capital lease agreements. In 2012, the Company entered into approximately \$4 million in capital lease agreements to finance the purchase of equipment. The Company did not enter into any material capital lease agreements during 2011.

At December 28, 2013, future minimum annual lease commitments under non-cancelable operating and capital leases were as follows:

	Operating leases	Capital leases
(millions)		
2014	\$ 172	\$ 1
2015	145	1
2016	119	1
2017	85	1
2018	71	1
2019 and beyond	81	2

Edgar Filing: KELLOGG CO - Form 10-K

Total minimum payments	\$ 673	\$ 7
Amount representing interest		(1)
Obligations under capital leases		6
Obligations due within one year		(1)
Long-term obligations under capital leases		\$ 5

The Company has provided various standard indemnifications in agreements to sell and purchase business assets and lease facilities over the past several years, related primarily to pre-existing tax, environmental, and employee benefit obligations. Certain of these indemnifications are limited by agreement in either amount and/or term and others are unlimited. The Company has also provided various hold harmless provisions within certain service type agreements. Because the Company is not currently aware of any actual exposures associated with these indemnifications, management is unable to estimate the maximum potential future payments to be made. At December 28, 2013, the Company had not recorded any liability related to these indemnifications.

NOTE 6

DEBT

The following table presents the components of notes payable at year end December 28, 2013 and December 29, 2012:

(millions)	2013		2012	
	Principal amount	Effective interest rate	Principal amount	Effective interest rate
U.S. commercial paper	\$ 249	0.22%	\$ 853	0.26%
Europe commercial paper	437	0.23	159	0.18
Bank borrowings	53		53	
Total	\$ 739		\$ 1,065	

The following table presents the components of long-term debt at year end December 28, 2013 and December 29, 2012:

(millions)	2013	2012
(a) 7.45% U.S. Dollar Debentures due 2031	\$ 1,089	\$ 1,091
(b) 4.0% U.S. Dollar Notes due 2020	974	993
(c) 4.45% U.S. Dollar Notes due 2016	767	772
(d) 3.125% U.S. Dollar Debentures due 2022	682	694
(e) 1.875% U.S. Dollar Notes due 2016	505	509
(f) 4.15% U.S. Dollar Notes due 2019	488	513
(g) 3.25% U.S. Dollar Notes due 2018	411	420
(h) 2.75% U.S. Dollar Notes due 2023	398

(j) 1.125% U.S. Dollar Notes due 2015	350	350
(k) 2.10% Canadian Dollar Notes 2014	282	302
(l) Floating-rate U.S. Dollar Notes due 2015	250	
(m) 4.25% U.S. Dollar Notes due 2013		754
Other	28	41
	6,619	6,837
Less current maturities	(289)	(755)
Balance at year end	\$ 6,330	\$ 6,082

- (a) In March 2001, the Company issued long-term debt instruments, primarily to finance the acquisition of Keebler Foods Company, of which \$1.1 billion of thirty-year 7.45% Debentures remain outstanding. The effective interest rate on the Debentures, reflecting issuance discount and hedge settlement, was 7.54%. The Debentures contain standard events of default and covenants, and can be redeemed in whole or in part by the Company at any time at prices determined under a formula (but not less than 100% of the principal amount plus unpaid interest to the redemption date).
- (b) In December 2010, the Company issued \$1.0 billion of ten-year 4.0% fixed rate U.S. Dollar Notes, using net proceeds from these Notes for incremental pension and postretirement benefit plan contributions and to retire a portion of its commercial paper. The effective interest rate on these Notes, reflecting issuance discount and hedge settlement, was 2.90%. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. In March 2013, the Company entered into interest rate swaps with notional amounts totaling \$400 million, which effectively converted a portion of these Notes from a fixed rate to a floating rate obligation for the remainder of the ten-year term. These derivative instruments were designated as fair value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$20 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013.
- (c) In May 2009, the Company issued \$750 million of seven-year 4.45% fixed rate U.S. Dollar Notes, using net proceeds from these Notes to retire a portion of its commercial paper. The effective interest rate on these Notes, reflecting issuance discount, hedge settlement and interest rate swaps was 3.45% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. The Company entered into interest rate swaps in February 2011 and March 2012 with notional amounts totaling \$200 million and \$550 million, respectively, which effectively converted these Notes from a fixed rate to a floating rate obligation. These derivative instruments were designated as fair value hedges of the debt obligation. In April 2013, the Company terminated all of the interest rate swaps. The resulting unamortized gain of \$18 million at December 28, 2013 will be amortized to interest expense over the remaining term of the Notes.
- (d) In May 2012, the Company issued \$700 million of ten-year 3.125% U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes, including financing a portion of the acquisition of Pringles. The effective interest rate on these Notes, reflecting issuance discount and interest rate swaps, was 2.74% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. In May 2013, the Company entered into interest rate swaps with notional amounts totaling \$200 million, which effectively converted a portion of these Notes from a fixed rate to a floating rate obligation for the remainder of the ten-year term. These derivative instruments were designated as fair value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$13 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013.
- (e) In November 2011, the Company issued \$500 million of five-year 1.875% fixed rate U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes including repayment of a portion of its commercial paper. The effective interest rate on these Notes, reflecting issuance discount, hedge settlement and interest rate swaps was 0.98% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change

Edgar Filing: KELLOGG CO - Form 10-K

of control provision. In March 2012, the Company entered into interest rate swaps which effectively converted these Notes from a fixed rate to a floating rate obligation. These derivative instruments were designated as fair value hedges of the debt obligation. In April 2013, the Company terminated all of the interest rate swaps, and the resulting unamortized gain of \$8 million at December 28, 2013 will be amortized to interest expense over the remaining term of the Notes. In May 2013, the Company entered into interest rate swaps with notional amounts totaling \$500 million, which effectively converted this debt from a fixed rate to a floating rate obligation for the remainder of the five-year term. These derivative instruments were designated as fair value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$3 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013.

- (f) In November 2009, the Company issued \$500 million of ten-year 4.15% fixed rate U.S. Dollar Notes, using net proceeds from these Notes to retire a portion of its 6.6% U.S. Dollar Notes due 2011. The effective interest rate on these Notes, reflecting issuance discount, hedge settlement and interest rate swaps was 2.72% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. In March 2012, the Company entered into interest rate swaps which effectively converted these Notes from a fixed rate to a floating rate obligation for the remainder of the ten-year term. These derivative instruments were designated as fair

value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$11 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013.

- (g) In May 2011, the Company issued \$400 million of seven-year 3.25% fixed rate U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes including repayment of a portion of its commercial paper. The effective interest rate on these Notes, reflecting issuance discount, hedge settlement and interest rate swaps, was 1.86% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. In October 2011, the Company entered into interest rate swaps with notional amounts totaling \$400 million, which effectively converted these Notes from a fixed rate to a floating rate obligation. These derivative instruments were designated as fair value hedges of the debt obligation. During February and April 2013, the Company terminated all of the interest rate swaps, and the resulting unamortized gain of \$17 million at December 28, 2013 will be amortized to interest expense over the remaining term of the Notes. In May 2013, the Company entered into interest rate swaps with notional amounts totaling \$400 million, which effectively converted these Notes from a fixed rate to a floating rate obligation for the remainder of the seven-year term. These derivative instruments were designated as fair value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$6 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013 and December 29, 2012, respectively.
 - (h) In February 2013, the Company issued \$400 million of ten-year 2.75% U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes, including, together with cash on hand, a portion of the repayment of \$750 million aggregate principal amount of the Company's 4.25% U.S. Dollar Notes that matured in March 2013. The effective interest rate on these Notes, reflecting issuance discount and hedge settlement, was 2.74%. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision.
 - (i) In May 2012, the Company issued \$400 million of five-year 1.75% U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes, including financing a portion of the acquisition of Pringles. The effective interest rate on these Notes, reflecting issuance discount and interest rate swaps, was 1.32%. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision. In March and May 2013, the Company entered into interest rate swaps with notional amounts totaling \$400 million, which effectively converted the Notes from a fixed rate to a floating rate obligation for the remainder of the ten-year term. These derivative instruments were designated as fair value hedges of the debt obligation. The fair value adjustment for the interest rate swaps was \$4 million, and was recorded as a decrease in the hedged debt balance at December 28, 2013.
 - (j) In May 2012, the Company issued \$350 million of three-year 1.125% U.S. Dollar Notes, using net proceeds from these Notes for general corporate purposes, including financing a portion of the acquisition of Pringles. The effective interest rate on these Notes, reflecting issuance discount, was 1.16%. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision.
 - (k) In May 2012, the Company issued Cdn.\$300 million of two-year 2.10% fixed rate Canadian Dollar Notes, using net proceeds from these Notes for general corporate purposes, which included repayment of intercompany debt. This repayment resulted in cash available to be used for a portion of the acquisition of Pringles. The effective interest rate on these Notes, reflecting issuance discount, was 2.11%. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision.
 - (l) In February 2013, the Company issued \$250 million of floating-rate U.S. Dollar Notes bearing interest at LIBOR plus 0.23% due February 2015. The proceeds from these Notes were used for general corporate purposes, including, together with cash on hand, a portion of the repayment of \$750 million aggregate principal amount of the Company's 4.25% U.S. Dollar Notes that matured in March 2013. The effective interest rate on these Notes was 0.47% at December 28, 2013. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contain a change of control provision.
 - (m) In March 2008, the Company issued \$750 million of five-year 4.25% fixed rate U.S. Dollar Notes, using net proceeds from these Notes to retire a portion of its U.S. commercial paper. The Notes contained customary covenants that limited the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions. The customary covenants also contained a change of control provision. In conjunction with this debt issuance, the Company entered into interest rate swaps with notional amounts totaling \$750 million, which effectively converted this debt from a fixed rate to a floating rate obligation. These derivative instruments were designated as fair value hedges of the debt obligation. During 2011, the Company transferred a portion of the interest rate swaps to another counterparty and subsequently terminated all the interest rate swaps. The Company redeemed the Notes in March 2013.
- In March 2012, the Company entered into an unsecured 364-Day Term Loan Agreement (the "New Credit Agreement") to fund, in part, the acquisition of Pringles from P&G. The New Credit Agreement allowed the Company to borrow up to \$1 billion to fund, in part, the acquisition and pay related fees and expenses. The loans under the New Credit Agreement were to mature and be payable in full 364 days after the date on

which the loans were made. The New Credit Agreement contained customary representations, warranties and covenants, including restrictions on indebtedness, liens, sale and leaseback transactions, and a specified interest expense coverage ratio. If an event of default occurred, then, to the extent permitted under the New Credit Agreement,

the administrative agent could (i) not earlier than the date on which the acquisition is or is to be consummated, terminate the commitments under the New Credit Agreement and (ii) accelerate any outstanding loans under the New Credit Agreement. The Company had no borrowings against the New Credit Agreement and, in May 2012, upon issuance of the U.S. Dollar Notes described above, the available commitments under the New Credit Agreement were automatically and permanently reduced to \$0.

The Company and two of its subsidiaries (the Issuers) maintain a program under which the Issuers may issue euro-commercial paper notes up to a maximum aggregate amount outstanding at any time of \$750 million or its equivalent in alternative currencies. The notes may have maturities ranging up to 364 days and will be senior unsecured obligations of the applicable Issuer. Notes issued by subsidiary Issuers will be guaranteed by the Company. The notes may be issued at a discount or may bear fixed or floating rate interest or a coupon calculated by reference to an index or formula. There was \$437 million and \$159 million outstanding under this program as of December 28, 2013 and December 29, 2012, respectively.

At December 28, 2013, the Company had \$2.2 billion of short-term lines of credit, virtually all of which were unused and available for borrowing on an unsecured basis. These lines were comprised principally of an unsecured Four-Year Credit Agreement, which the Company entered into in March 2011 and expires in 2015. The Four-Year Credit Agreement allows the Company to borrow, on a revolving credit basis, up to \$2.0 billion, to obtain letters of credit in an aggregate amount up to \$75 million, U.S. swingline loans in an aggregate amount up to \$200 million and European swingline loans in an aggregate amount up to \$400 million and to provide a procedure for lenders to bid on short-term debt of the Company. The agreement contains customary covenants and warranties, including specified restrictions on indebtedness, liens, sale and leaseback transactions, and a specified interest coverage ratio. If an event of default occurs, then, to the extent permitted, the administrative agent may terminate the commitments under the credit facility, accelerate any outstanding loans under the agreement, and demand the deposit of cash collateral equal to the lender's letter of credit exposure plus interest.

The Company was in compliance with all covenants as of December 28, 2013.

Scheduled principal repayments on long-term debt are (in millions): 2014 \$289; 2015 \$610; 2016 \$1,253; 2017 \$403; 2018 \$403; 2019 and beyond \$3,702.

Interest paid was (in millions): 2013 \$234; 2012 \$254; 2011 \$249. Interest expense capitalized as part of the construction cost of fixed assets was (in millions): 2013 \$2; 2012 \$2; 2011 \$5.

NOTE 7

STOCK COMPENSATION

The Company uses various equity-based compensation programs to provide long-term performance incentives for its global workforce. Currently, these incentives consist principally of stock options, and to a lesser extent, executive performance shares, restricted stock units and restricted stock grants. The Company also sponsors a discounted stock purchase plan in the United States and matching-grant programs in several international locations. Additionally, the Company awards restricted stock to its outside directors. These awards are administered through several plans, as described within this Note.

The 2013 Long-Term Incentive Plan (2013 Plan), approved by shareholders in 2013, permits awards to employees and officers in the form of incentive and non-qualified stock options, performance units, restricted stock or restricted stock units, and stock appreciation rights. The 2013 Plan, which replaced the 2009 Long-Term Incentive Plan (2009 Plan), authorizes the issuance of a total of (a) 22 million shares; plus (b) the total number of shares remaining available for future grants under the 2009 Plan. The total number of shares remaining available for issuance under the 2013 Plan will be reduced by two shares for each share issued pursuant to an award under the 2013 Plan other than a stock option or stock appreciation right, or potentially issuable pursuant to an outstanding award other than a stock option or stock appreciation right, which will in each case reduce the total number of shares remaining by one share for each share issued. The 2013 Plan includes several limitations on awards or payments to individual participants. Options granted under the 2013 and 2009 Plans generally vest over three years. At December 28, 2013, there were 27 million remaining authorized, but unissued, shares under the 2013 Plan. This amount includes 5 million shares remaining available under the 2009 Plan.

The Non-Employee Director Stock Plan (2009 Director Plan) was approved by shareholders in 2009 and allows each eligible non-employee director to receive shares of the Company's common stock annually. The number of shares granted pursuant to each annual award will be determined by the Nominating and Governance Committee of the Board of Directors. The 2009 Director Plan, which replaced the 2000 Non-Employee Director Stock Plan (2000 Director Plan), reserves 500,000 shares for issuance, plus the total number of shares as to which awards granted under the 2009 Director Plan or the 2000 Director Plans expire or are forfeited, terminated or settled in cash. Under both the 2009 and 2000 Director Plans, shares (other than stock options) are placed in the Kellogg Company Grantor Trust for Non-Employee Directors (the Grantor Trust). Under the terms of the Grantor Trust, shares are available to a director only upon

termination of service on the Board. Under the 2009 Director Plan, awards were as follows (number of shares): 2013-26,504; 2012-26,940; 2011-24,850.

The 2002 Employee Stock Purchase Plan was approved by shareholders in 2002 and permits eligible employees to purchase Company stock at a discounted price. This plan allows for a maximum of 2.5 million shares of Company stock to be issued at a purchase price equal to 95% of the fair market value of the stock on the last day of the quarterly purchase period. Total purchases through this plan for any employee are limited to a fair market value of \$25,000 during any calendar year. At December 28, 2013, there were approximately 0.5 million remaining authorized, but unissued, shares under this plan. Shares were purchased by employees under this plan as follows (approximate number of shares): 2013 85,000; 2012 107,000; 2011 110,000. Options granted to employees to purchase discounted stock under this plan are included in the option activity tables within this note.

Additionally, an international subsidiary of the Company maintains a stock purchase plan for its employees. Subject to limitations, employee contributions to this plan are matched 1:1 by the Company. Under this plan, shares were granted by the Company to match an equal number of shares purchased by employees as follows (approximate number of shares): 2013 58,000; 2012 71,000; 2011 68,000.

Compensation expense for all types of equity-based programs and the related income tax benefit recognized were as follows:

(millions)	2013	2012	2011
Pre-tax compensation expense	\$ 38	\$ 46	\$ 37
Related income tax benefit	\$ 14	\$ 17	\$ 13

As of December 28, 2013, total stock-based compensation cost related to non-vested awards not yet recognized was \$43 million and the weighted-average period over which this amount is expected to be recognized was 2 years.

Cash flows realized upon exercise or vesting of stock-based awards in the periods presented are included in the following table. Tax benefits realized upon exercise or vesting of stock-based awards generally represent the tax benefit of the difference between the exercise price and the strike price of the option.

Cash used by the Company to settle equity instruments granted under stock-based awards was insignificant.

(millions)	2013	2012	2011
Total cash received from option exercises and similar instruments	\$ 475	\$ 229	\$ 291
Tax benefits realized upon exercise or vesting of stock-based awards:			
Windfall benefits classified as financing cash flow	\$ 24	\$ 6	\$ 11

Shares used to satisfy stock-based awards are normally issued out of treasury stock, although management is authorized to issue new shares to the extent permitted by respective plan provisions. Refer to Note 4 for information on shares issued during the periods presented to employees and directors under various long-term incentive plans and share repurchases under the Company's stock repurchase authorizations. The Company does not currently have a policy of repurchasing a specified number of shares issued under employee benefit programs during any particular time period.

Stock options

During the periods presented, non-qualified stock options were granted to eligible employees under the 2013 and 2009 Plans with exercise prices equal to the fair market value of the Company's stock on the grant date, a contractual term of ten years, and a three-year graded vesting period.

Management estimates the fair value of each annual stock option award on the date of grant using a lattice-based option valuation model. Composite assumptions are presented in the following table. Weighted-average values are disclosed for certain inputs which incorporate a range of assumptions. Expected volatilities are based principally on historical volatility of the Company's stock, and to a lesser extent, on implied volatilities from traded options on the Company's stock. Historical volatility corresponds to the contractual term of the options granted. The Company uses historical data to estimate option exercise and employee termination within the valuation models; separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The expected term of options granted represents the period of time that options granted are expected to be outstanding; the weighted-average expected term for all employee groups is presented in the following table. The risk-free rate for periods within the contractual life of the options is based on the U.S. Treasury yield curve in effect at the time of grant.

Stock option valuation model
assumptions for grants within the
year ended:

	2013	2012	2011
Weighted-average expected volatility	15.00%	16.00%	17.00%
Weighted-average expected term (years)	7.44	7.53	6.99
Weighted-average risk-free interest rate	1.49%	1.60%	3.06%
Dividend yield	2.90%	3.30%	3.10%
Weighted-average fair value of options granted	\$ 5.92	\$ 5.23	\$ 7.59

A summary of option activity for the year ended December 28, 2013 is presented in the following table:

Employee and director stock options	Shares (millions)	Weighted- average exercise price	Weighted- average remaining contractual term (yrs.)	Aggregate intrinsic value (millions)
Outstanding, beginning of period	25	\$ 50		
Granted	6	60		
Exercised	(10)	48		
Forfeitures and expirations	(1)	55		
Outstanding, end of period	20	\$ 54	7.0	\$ 143
Exercisable, end of period	9	\$ 50	5.4	\$ 101

Additionally, option activity for the comparable prior year periods is presented in the following table:

(millions, except per share data)	2012	2011
Outstanding, beginning of year	24	26
Granted	6	5
Exercised	(4)	(6)
Forfeitures and expirations	(1)	(1)
Outstanding, end of year	25	24
Exercisable, end of year	14	16
Weighted-average exercise price:		
Outstanding, beginning of year	\$ 48	\$ 47
Granted	52	53
Exercised	44	45
Forfeitures and expirations	53	52
Outstanding, end of year	\$ 50	\$ 48
Exercisable, end of year	\$ 48	\$ 47

The total intrinsic value of options exercised during the periods presented was (in millions): 2013 \$139; 2012 \$34; 2011 \$63.

Other stock-based awards

During the periods presented, other stock-based awards consisted principally of executive performance shares and restricted stock granted under the 2013 and 2009 Plans.

In 2013, 2012 and 2011, the Company made performance share awards to a limited number of senior executive-level employees, which entitles these employees to receive a specified number of shares of the Company's common stock on the vesting date, provided cumulative three-year targets are achieved. The cumulative three-year targets involved operating profit and internal net sales growth. Management estimates the fair value of performance share awards based on the market price of the underlying stock on the date of grant, reduced by the present value of estimated dividends foregone during the performance period. The 2013, 2012 and 2011 target grants (as revised for non-vested forfeitures and other adjustments) currently correspond to approximately 208,000, 183,000 and 117,000 shares, respectively, with a grant-date fair value of \$54, \$47, and \$48 per share. The actual number of shares issued on the vesting date could range from zero to 200% of target, depending on actual performance achieved. Based on the market price of the Company's common stock at year-end 2013, the maximum future value that could be awarded on the vesting date was (in millions): 2013 award \$23; 2012 award \$17; and 2011 award \$11. The 2010 performance share award,

Edgar Filing: KELLOGG CO - Form 10-K

payable in stock, was settled at 40% of target in February 2013 for a total dollar equivalent of \$4 million.

The Company also periodically grants restricted stock and restricted stock units to eligible employees under the 2013 Plan. Restrictions with respect to sale or transferability generally lapse after three years and, in the case of restricted stock, the grantee is normally entitled to receive shareholder dividends during the vesting period. Management estimates the fair value of restricted stock grants based on the market price of the underlying stock on the date of grant. A summary of restricted stock activity for the year ended December 28, 2013, is presented in the following table:

Employee restricted stock and restricted stock units	Shares (thousands)	Weighted- average grant-date fair value
Non-vested, beginning of year	316	\$ 50
Granted	139	52
Vested	(117)	51
Forfeited	(20)	47
Non-vested, end of year	318	\$ 52

Grants of restricted stock and restricted stock units for comparable prior-year periods were: 2012 160,000, 2011 102,000.

The total fair value of restricted stock and restricted stock units vesting in the periods presented was (in millions): 2013 \$6; 2012 \$4; 2011 \$7.

NOTE 8**PENSION BENEFITS**

The Company sponsors a number of U.S. and foreign pension plans to provide retirement benefits for its employees. The majority of these plans are funded or unfunded defined benefit plans, although the Company does participate in a limited number of multiemployer or other defined contribution plans for certain employee groups. See Note 10 for more information regarding the Company's participation in multiemployer plans. Defined benefits for salaried employees are generally based on salary and years of service, while union employee benefits are generally a negotiated amount for each year of service.

Obligations and funded status

The aggregate change in projected benefit obligation, plan assets, and funded status is presented in the following tables.

(millions)	2013	2012
Change in projected benefit obligation		
Beginning of year	\$ 5,135	\$ 4,367
Service cost	133	110
Interest cost	203	207
Plan participants' contributions	2	2
Amendments	4	23
Actuarial (gain)/loss	(407)	535
Benefits paid	(218)	(213)
Acquisitions	17	47
Curtailment and special termination benefits	26	
Foreign currency adjustments	(7)	57
End of year	\$ 4,888	\$ 5,135
Change in plan assets		
Fair value beginning of year	\$ 4,374	\$ 3,931
Actual return on plan assets	802	508
Employer contributions	34	38
Plan participants' contributions	2	2
Benefits paid	(200)	(187)
Acquisitions		23
Foreign currency adjustments	2	59
Fair value end of year	\$ 5,014	\$ 4,374
Funded status	\$ 126	\$ (761)
Amounts recognized in the Consolidated Balance Sheet consist of		
Other assets	\$ 419	\$ 145
Other current liabilities	(16)	(20)
Other liabilities	(277)	(886)
Net amount recognized	\$ 126	\$ (761)
Amounts recognized in accumulated other comprehensive income consist of		
Prior service cost	\$ 73	\$ 94
Net amount recognized	\$ 73	\$ 94

The accumulated benefit obligation for all defined benefit pension plans was \$4.5 billion and \$4.7 billion at December 28, 2013 and December 29, 2012, respectively. Information for pension plans with accumulated benefit obligations in excess of plan assets were:

(millions)	2013	2012
Projected benefit obligation	\$ 327	\$ 3,707
Accumulated benefit obligation	\$ 251	\$ 3,442
Fair value of plan assets	\$ 58	\$ 2,823
Expense		

The components of pension expense are presented in the following table. Pension expense for defined contribution plans relates to certain foreign-based defined contribution plans and multiemployer plans in the United States in which the Company participates on behalf of certain unionized workforces.

Edgar Filing: KELLOGG CO - Form 10-K

(millions)	2013	2012	2011
Service cost	\$ 133	\$ 110	\$ 96
Interest cost	203	207	209
Expected return on plan assets	(359)	(344)	(361)
Amortization of unrecognized prior service cost	16	14	14
Recognized net (gain)loss	(854)	372	747
Curtailment and special termination benefits	34		
Pension (income)expense:			
Defined benefit plans	(827)	359	705
Defined contribution plans	35	29	35
Total	\$ (792)	\$ 388	\$ 740

The estimated prior service cost for defined benefit pension plans that will be amortized from accumulated other comprehensive income into pension expense over the next fiscal year is approximately \$14 million.

The Company and certain of its subsidiaries sponsor 401(k) or similar savings plans for active employees. Expense related to these plans was (in millions): 2013 \$41; 2012 \$39; 2011- \$36. These amounts are not included in the preceding expense table. Company contributions to these savings plans approximate annual expense. Company contributions to multiemployer and other defined contribution pension plans approximate the amount of annual expense presented in the preceding table.

See discussion in Note 3 related to curtailment and special termination benefit costs recognized in 2013.

Assumptions

The worldwide weighted-average actuarial assumptions used to determine benefit obligations were:

	2013	2012	2011
Discount rate	4.7%	4.0%	4.8%
Long-term rate of compensation increase	4.1%	4.1%	4.2%

The worldwide weighted-average actuarial assumptions used to determine annual net periodic benefit cost were:

	2013	2012	2011
Discount rate	4.1%	4.8%	5.4%
Long-term rate of compensation increase	4.1%	4.2%	4.2%
Long-term rate of return on plan assets	8.5%	8.9%	8.9%

To determine the overall expected long-term rate of return on plan assets, the Company models expected returns over a 20-year investment horizon with respect to the specific investment mix of its major plans. The return assumptions used reflect a combination of rigorous historical performance analysis and forward-looking views of the financial markets including consideration of current yields on long-term bonds, price-earnings ratios of the major stock market indices, and long-term inflation. The U.S. model, which corresponds to approximately 68% of consolidated pension and other postretirement benefit plan assets, incorporates a long-term inflation assumption of 2.5% and an active management premium of 1% (net of fees) validated by historical analysis. Similar methods are used for various foreign plans with invested assets, reflecting local economic conditions. The expected rate of return for 2013 of 8.5% equated to approximately the 60th percentile expectation. Refer to Note 1.

To conduct the annual review of discount rates, the Company selected the discount rate based on a cash-flow matching analysis using Towers Watson's proprietary RATE:Link tool and projections of the future benefit payments that constitute the projected benefit obligation for the plans. RATE:Link establishes the uniform discount rate that produces the same present value of the estimated future benefit payments, as is generated by discounting each year's benefit payments by a spot rate applicable to that year. The spot rates used in this process are derived from a yield curve created from yields on the 40th to 90th percentile of U.S. high quality bonds. A similar methodology is applied in Canada and Europe, except the smaller bond markets imply that yields between the 10th and 90th percentiles are preferable. The measurement dates for the defined benefit plans are consistent with the Company's fiscal year end. Accordingly, the Company selected discount rates to measure the benefit obligations consistent with market indices during December of each year.

Plan assets

The Company categorized Plan assets within a three level fair value hierarchy described as follows:

Investments stated at fair value as determined by quoted market prices (Level 1) include:

Cash and cash equivalents: Value based on cost, which approximates fair value.

Corporate stock, common: Value based on the last sales price on the primary exchange.

Investments stated at estimated fair value using significant observable inputs (Level 2) include:

Cash and cash equivalents: Institutional short-term investment vehicles valued daily.

Mutual funds: Valued at the net asset value of shares held by the Plan at year end.

Collective trusts: Value based on the net asset value of units held at year end.

Bonds: Value based on matrices or models from pricing vendors.

Limited partnerships: Value based on the ending net capital account balance at year end.

Investments stated at estimated fair value using significant unobservable inputs (Level 3) include:

Real Estate: Value based on the net asset value of units held at year end. The fair value of real estate holdings is based on market data including earnings capitalization, discounted cash flow analysis, comparable sales transactions or a combination of these methods.

Bonds: Value based on matrices or models from brokerage firms. A limited number of the investments are in default.

Edgar Filing: KELLOGG CO - Form 10-K

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Company's practice regarding the timing of transfers between levels is to measure transfers in at the beginning of the month and transfers out at the end of the month. For the year ended December 28, 2013, the Company had no transfers between Levels 1 and 2.

Edgar Filing: KELLOGG CO - Form 10-K

The fair value of Plan assets as of December 28, 2013 summarized by level within the fair value hierarchy are as follows:

	Total	Total	Total	
(millions)	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 28	\$ 83	\$	\$ 111
Corporate stock, common:				
Domestic	576			576
International	297			297
Mutual funds:				
International equity		726		726
International debt		54		54
Collective trusts:				
Domestic equity		737		737
International equity		982		982
Eurozone sovereign debt		14		14
Other international debt		288		288
Limited partnerships		468		468
Bonds, corporate		370	1	371
Bonds, government		123		123
Bonds, other		52		52
Real estate			125	125
Other		82	8	90
Total	\$ 901	\$ 3,979	\$ 134	\$ 5,014

The fair value of Plan assets at December 29, 2012 are summarized as follows:

	Total	Total	Total	
(millions)	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 29	\$ 32	\$	\$ 61
Corporate stock, common:				
Domestic	466			466
International	259			259
Mutual funds:				
International equity		717		717
International debt		58		58
Collective trusts:				
Domestic equity		535		535
International equity		920		920
Eurozone sovereign debt		17		17
Other international debt		274		274
Limited partnerships		275		275
Bonds, corporate		441		441
Bonds, government		150		150
Bonds, other		66		66
Real estate			115	115
Other	4	7	9	20
Total	\$ 758	\$ 3,492	\$ 124	\$ 4,374

There were no unfunded commitments to purchase investments at December 28, 2013 or December 29, 2012.

The Company's investment strategy for its major defined benefit plans is to maintain a diversified portfolio of asset classes with the primary goal of meeting long-term cash requirements as they become due. Assets are invested in a prudent manner to maintain the security of funds while maximizing returns within the Plan's investment policy. The investment policy specifies the type of investment vehicles appropriate for the Plan, asset allocation guidelines, criteria for the selection of investment managers, procedures to monitor overall investment performance as well as investment manager performance. It also provides guidelines enabling Plan fiduciaries to fulfill their responsibilities.

The current weighted-average target asset allocation reflected by this strategy is: equity securities 72%; debt securities 22%; other 6%. Investment in Company common stock represented 1.2% and 1.3% of consolidated plan assets at December 28, 2013 and December 29, 2012, respectively.

Edgar Filing: KELLOGG CO - Form 10-K

Plan funding strategies are influenced by tax regulations and funding requirements. The Company currently expects to contribute approximately \$43 million to its defined benefit pension plans during 2014.

Level 3 gains and losses

Changes in the fair value of the Plan's Level 3 assets are summarized as follows:

(millions)	Bonds, corporate	Real estate	Other	Total
December 31, 2011	\$ 1	\$ 105	\$ 6	\$ 112
Purchases			1	1
Sales	(1)			(1)
Realized and unrealized gain		6	2	8
Transfer out		4		4
December 29, 2012	\$	\$ 115	\$ 9	\$ 124
Purchases	1	1	1	3
Sales			(1)	(1)
Realized and unrealized gain		8		8
Currency translation		1	(1)	
December 28, 2013	\$ 1	\$ 125	\$ 8	\$ 134

The net change in Level 3 assets includes a gain attributable to the change in unrealized holding gains or losses related to Level 3 assets held at December 28, 2013 and December 29, 2012 totaling \$8 million for both years.

Benefit payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid (in millions): 2014 \$252; 2015 \$418; 2016 \$263; 2017 \$254; 2018 \$263; 2019 to 2023 \$1,498.

NOTE 9

NONPENSION POSTRETIREMENT AND POSTEMPLOYMENT BENEFITS

Postretirement

The Company sponsors a number of plans to provide health care and other welfare benefits to retired employees in the United States and Canada, who have met certain age and service requirements. The majority of these plans are funded or unfunded defined benefit plans, although the Company does participate in a limited number of multiemployer or

other defined contribution plans for certain employee groups. The Company contributes to voluntary employee benefit association (VEBA) trusts to fund certain U.S. retiree health and welfare benefit obligations.

Obligations and funded status

The aggregate change in accumulated postretirement benefit obligation, plan assets, and funded status is presented in the following tables.

(millions)	2013	2012
Change in accumulated benefit obligation		
Beginning of year	\$ 1,323	\$ 1,155
Service cost	34	27
Interest cost	50	53

Benefits paid	(56)	(62)
Curtailments	1	
Acquisitions		34
Foreign currency adjustments	(5)	1
End of year	\$ 1,202	\$ 1,323
Change in plan assets		
Fair value beginning of year	\$ 1,040	\$ 965
Actual return on plan assets	188	132
Employer contributions	14	13
Benefits paid	(64)	(70)
Fair value end of year	\$ 1,178	\$ 1,040
Funded status	\$ (24)	\$ (283)
Amounts recognized in the Consolidated Balance Sheet consist of		
Other non-current assets	\$ 47	\$
Other current liabilities	(3)	(2)
Other liabilities	(68)	(281)
Net amount recognized	\$ (24)	\$ (283)
Amounts recognized in accumulated other comprehensive income consist of		
Prior service credit	(1)	(3)
Net amount recognized	\$ (1)	\$ (3)
Expense		

Components of postretirement benefit expense (income) were:

(millions)	2013	2012	2011
Service cost	\$ 34	\$ 27	\$ 23
Interest cost	50	53	62
Expected return on plan assets	(86)	(84)	(87)
Amortization of unrecognized prior service credit	(3)	(2)	(3)
Recognized net (gain) loss	(247)	66	(16)
Curtailment	1		
Postretirement benefit expense:			
Defined benefit plans	(251)	60	(21)
Defined contribution plans	13	13	14
Total	\$ (238)	\$ 73	\$ (7)

The estimated prior service cost credit that will be amortized from accumulated other comprehensive income into nonpension postretirement benefit expense over the next fiscal year is expected to be approximately \$3 million.

See discussion in Note 3 regarding curtailment expense recognized in 2013.

Assumptions

The weighted-average actuarial assumptions used to determine benefit obligations were:

Edgar Filing: KELLOGG CO - Form 10-K

	2013	2012	2011
Discount rate	4.8%	3.9%	4.6%

The weighted-average actuarial assumptions used to determine annual net periodic benefit cost were:

	2013	2012	2011
Discount rate	3.9%	4.6%	5.3%
Long-term rate of return on plan assets	8.5%	8.9%	8.9%

The Company determines the overall discount rate and expected long-term rate of return on VEBA trust obligations and assets in the same manner as that described for pension trusts in Note 8.

The assumed health care cost trend rate is 5.3% for 2014, decreasing gradually to 4.5% by the year 2017 and remaining at that level thereafter. These trend rates reflect the Company's historical experience and management's expectations regarding future trends. A one percentage point change in assumed health care cost trend rates would have the following effects:

(millions)	One percentage point increase	One percentage point decrease
Effect on total of service and interest cost components	\$ 11	\$ (9)
Effect on postretirement benefit obligation	132	(110)

Plan assets

The fair value of Plan assets as of December 28, 2013 summarized by level within fair value hierarchy described in Note 8, are as follows:

(millions)	Total Level 1	Total Level 2	Total Level 3	Total
Cash and cash equivalents	\$ 7	\$ 39	\$	\$ 46
Corporate stock, common:				
Domestic	231			231
International	15			15
Mutual funds:				
Domestic equity		167		167
International equity		124		124
Domestic debt		57		57
Collective trusts:				
Domestic equity		14		14
International equity		169		169
Limited partnerships		169		169
Bonds, corporate		130		130
Bonds, government		39		39
Bonds, other		16		16
Other		1		1
Total	\$ 253	\$ 925	\$	\$ 1,178

The fair value of Plan assets at December 29, 2012 are summarized as follows:

(millions)	Total Level 1	Total Level 2	Total Level 3	Total
Cash and cash equivalents	\$ 5	\$ 12	\$	\$ 17
Corporate stock, common:				
Domestic	174			174
International	18			18
Mutual funds:				
Domestic equity		63		63
International equity		161		161
Domestic debt		60		60
Collective trusts:				
Domestic equity		126		126
International equity		110		110
Limited partnerships		101		101
Bonds, corporate		142		142
Bonds, government		49		49
Bonds, other		17		17
Other	2			2
Total	\$ 199	\$ 841	\$	\$ 1,040

The Company's asset investment strategy for its VEBA trusts is consistent with that described for its pension trusts in Note 8. The current target asset allocation is 75% equity securities and 25% debt securities. The Company currently expects to contribute approximately \$14 million to its VEBA trusts during 2014.

There were no Level 3 assets during 2013 and 2012.

Postemployment

Under certain conditions, the Company provides benefits to former or inactive employees, including salary continuance, severance, and long-term disability, in the United States and several foreign locations. The Company's postemployment benefit plans are unfunded. Actuarial assumptions used are generally consistent with those presented for pension benefits in Note 8. The aggregate change in accumulated postemployment benefit obligation and the net amount recognized were:

(millions)	2013	2012
Change in accumulated benefit obligation		
Beginning of year	\$ 103	\$ 93
Service cost	7	7
Interest cost	3	4
Actuarial (gain) loss	(17)	7
Benefits paid	(9)	(8)
End of year	\$ 87	\$ 103
Funded status	\$ (87)	\$ (103)
Amounts recognized in the Consolidated Balance Sheet consist of		
Other current liabilities	\$ (8)	\$ (10)
Other liabilities	(79)	(93)
Net amount recognized	\$ (87)	\$ (103)
Amounts recognized in accumulated other comprehensive income consist of		
Net experience loss	\$ 25	\$ 46
Net amount recognized	\$ 25	\$ 46

Components of postemployment benefit expense were:

(millions)	2013	2012	2011
Service cost	\$ 7	\$ 7	\$ 6
Interest cost	3	4	4
Recognized net loss	5	5	5

Edgar Filing: KELLOGG CO - Form 10-K

Postemployment benefit expense \$ 15 \$ 16 \$ 15
 The estimated net experience loss that will be amortized from accumulated other comprehensive income into postemployment benefit expense over the next fiscal year is approximately \$3 million.

Benefit payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

(millions)	Postretirement	Postemployment
2014	\$ 68	\$ 8
2015	69	8
2016	70	7
2017	71	8
2018	72	8
2019-2023	385	41

NOTE 10

MULTIEMPLOYER PENSION AND POSTRETIREMENT PLANS

The Company contributes to multiemployer defined contribution pension and postretirement benefit plans under the terms of collective-bargaining agreements that cover certain unionized employee groups in the United States. Contributions to these plans are included in total pension and postretirement benefit expense as reported in Notes 8 and 9, respectively.

Pension benefits

The risks of participating in multiemployer pension plans are different from single-employer plans. Assets contributed to a multiemployer plan by one employer may be used to provide benefits to employees of other participating employers. If a participating employer stops contributing to the plan, the unfunded obligations of the plan are borne by the remaining participating employers.

Edgar Filing: KELLOGG CO - Form 10-K

The Company's participation in multiemployer pension plans for the year ended December 28, 2013, is outlined in the table below. The EIN/PN column provides the Employer Identification Number (EIN) and the three-digit plan number (PN). The most recent Pension Protection Act (PPA) zone status available for 2013 and 2012 is for the plan year-ends as indicated below. The zone status is based on information that the Company received from the plan and is certified by the plan's actuary. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are between 65 percent and 80 percent funded, and plans in the green zone are at least 80 percent funded. The FIP/RP Status Pending/Implemented column indicates plans for which a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented. In addition to regular plan contributions, the Company may be subject to a surcharge if the plan is in the red zone. The Surcharge Imposed column indicates whether a surcharge has been imposed on contributions to the plan. The last column lists the expiration date(s) of the collective-bargaining agreement(s) (CBA) to which the plans are subject.

Pension trust fund	EIN/PN	PPA Zone Status		FIP/RP Status	Contributions by the Company (millions)			Surcharge Imposed	Expiration Date of CBA
		2013	2012		2013	2012	2011

		6/30/2013	6/30/2012						
Other Plans					2.2	2.1	2.0		
Total contributions:					\$ 14.5	\$ 13.5	\$ 12.6		

- (a) The Company is party to multiple CBAs requiring contributions to this fund, each with its own expiration date. Over 70 percent of the Company's participants in this fund are covered by a single CBA that expires on 4/30/2017. Another CBA, covering 15% of the Company's participants in this fund, expired in 2013 and is currently under negotiation.
- (b) The Company is party to multiple CBAs requiring contributions to this fund, each with its own expiration date. Over 40 percent of the Company's participants in this fund are covered by a single CBA that expires on 7/27/2014.
- (c) The Company is party to multiple CBAs requiring contributions to this fund, each with its own expiration date. Over 40 percent of the Company's participants in this fund are covered by a single CBA that expires on 3/24/2018.

Edgar Filing: KELLOGG CO - Form 10-K

The Company was listed in the Forms 5500 of the following plans as of the following plan year ends as providing more than 5 percent of total contributions:

	Contributions to the plan exceeded more than 5% of total contributions (as of the Plan's year end)
Pension trust fund	
Hagerstown Motor Carriers and Teamsters Pension Fund	6/30/2013, 6/30/2012 and 6/30/2011
Local 734 Pension Plan	4/30/2013 and 4/30/2012
Twin Cities Bakery Drivers Pension Plan	12/31/2012, 12/31/2011 and 12/31/2010
Upstate New York Bakery Drivers and Industry Pension Fund	6/30/2013 and 6/30/2012

At the date the Company's financial statements were issued, Forms 5500 were not available for the plan years ending after June 30, 2013.

In addition to regular contributions, the Company could be obligated to pay additional amounts, known as a withdrawal liability, if a multiemployer pension plan has unfunded vested benefits and the Company decreases or ceases participation in that plan. The Company has recognized net estimated withdrawal expense related to curtailment and special termination benefits associated with the Company's withdrawal from certain multiemployer plans aggregating (in millions): 2013 \$0; 2012 \$(5); 2011 \$5.

The final calculation of the withdrawal liability initially recognized in 2012 is pending the finalization of certain plan year-related data and is therefore subject to adjustment. The associated cash obligation is payable over a maximum 20 year period; management has not determined the actual period over which the payments will be made.

Postretirement benefits

Multiemployer postretirement benefit plans provide health care and other welfare benefits to active and retired employees who have met certain age and service requirements. Contributions to multiemployer postretirement benefit plans were (in millions): 2013 \$13; 2012 \$13; 2011 \$14.

NOTE 11

INCOME TAXES

The components of income before income taxes and the provision for income taxes were as follows:

(millions)	2013	2012	2011
Income before income taxes			
United States	\$ 2,102	\$ 1,008	\$ 935
Foreign	504	317	249
	2,606	1,325	1,184
Income taxes			
Currently payable			
Federal	302	383	285
State	68	34	26
Foreign	105	105	108
	475	522	419
Deferred			
Federal	331	(129)	(57)
State	(2)	8	3
Foreign	(12)	(38)	(45)
	317	(159)	(99)
Total income taxes	\$ 792	\$ 363	\$ 320

The difference between the U.S. federal statutory tax rate and the Company's effective income tax rate was:

	2013	2012	2011
U.S. statutory income tax rate	35.0%	35.0%	35.0%
Foreign rates varying from 35%	(3.5)	(4.4)	(4.9)
State income taxes, net of federal benefit	1.7	2.1	1.6
Cost (benefit) of remitted and unremitted foreign earnings	(0.4)	(1.8)	(1.8)
Tax audit activity	(0.1)		(0.5)
Net change in valuation allowances	0.4	0.8	0.9
Statutory rate changes, deferred tax impact	(0.5)	(0.3)	(0.5)
U.S. deduction for qualified production activities	(0.9)	(2.1)	(1.8)
Other	(1.3)	(1.9)	(1.0)
Effective income tax rate	30.4%	27.4%	27.0%

As presented in the preceding table, the Company's 2013 consolidated effective tax rate was 30.4%, as compared to 27.4% in 2012 and 27.0% in 2011.

The 2013 effective income tax rate was negatively impacted by income generated from mark-to-market adjustments for the Company's pension plans that was generally incurred in jurisdictions with tax rates higher than the effective income tax rate. As of December 28, 2013, the Company recorded a deferred tax liability of \$2 million related to \$24 million of foreign earnings not considered indefinitely reinvested. Accumulated foreign earnings of approximately \$2.2 billion, primarily in Europe and Mexico, were considered indefinitely reinvested. Accordingly, deferred income taxes have not been provided on these earnings and it is not practical to estimate the deferred tax impact of those earnings.

Edgar Filing: KELLOGG CO - Form 10-K

The 2012 effective income tax rate benefited from the elimination of a tax liability related to certain international earnings now considered indefinitely reinvested. As of December 29, 2012, the Company recorded a deferred tax liability of \$5 million related to \$258 million of earnings. Accumulated foreign earnings of approximately \$1.7 billion, primarily in Europe, were considered indefinitely reinvested. Accordingly, deferred income taxes have not been provided on these earnings and it is not practical to estimate the deferred tax impact of those earnings.

The 2011 effective income tax rate benefited from an international legal restructuring reflected in the cost (benefit) of remitted and unremitted foreign earnings. During the third quarter of 2011, the Company recorded a benefit of \$7 million from the decrease in the statutory rate in the United Kingdom.

Management monitors the Company's ability to utilize certain future tax deductions, operating losses and tax credit carryforwards, prior to expiration. Changes resulting from management's assessment will result in impacts to deferred tax assets and the corresponding impacts on the effective income tax rate. Valuation allowances were recorded to reduce deferred tax assets to an amount that will, more likely than not, be realized in the future. The total tax benefit of carryforwards at year-end 2013 and 2012 were \$55 million and \$61 million, respectively, with related valuation allowances at year-end 2013 and 2012 of \$49 million and \$50 million, respectively. Of the total carryforwards at year-end 2013, substantially all will expire after 2018.

The following table provides an analysis of the Company's deferred tax assets and liabilities as of year-end 2013 and 2012. Deferred tax assets on employee benefits decreased in 2013 due to increased asset returns and discount rate increases associated with the Company's pension and postretirement plans.

(millions)	Deferred tax assets		Deferred tax liabilities	
	2013	2012	2013	2012
U.S. state income taxes	\$ 13	\$ 7	\$ 61	\$ 63
Advertising and promotion-related	23	23		
Wages and payroll taxes	36	26		
Inventory valuation	37	22		
Employee benefits	65	426		
Operating loss and credit carryforwards	55	61		
Hedging transactions	10	2		
Depreciation and asset disposals			366	386
Trademarks and other intangibles			529	496
Deferred compensation	36	39		
Stock options	36	51		
Unremitted foreign earnings			2	5
Other	109	90		
	420	747	958	950
Less valuation allowance	(61)	(59)		
Total deferred taxes	\$ 359	\$ 688	\$ 958	\$ 950
Net deferred tax asset (liability)	\$ (599)	\$ (262)		
Classified in balance sheet as:				
Other current assets	\$ 195	\$ 159		
Other current liabilities	(13)	(8)		
Other assets	147	110		
Other liabilities	(928)	(523)		
Net deferred tax asset (liability)	\$ (599)	\$ (262)		

The change in valuation allowance reducing deferred tax assets was:

(millions)	2013	2012	2011
Balance at beginning of year	\$ 59	\$ 46	\$ 36
Additions charged to income tax expense	17	12	12
Reductions credited to income tax expense	(3)		(1)
Other (a)	(10)		
Currency translation adjustments	(2)	1	(1)
Balance at end of year	\$ 61	\$ 59	\$ 46

(a) Reduction due to the disposition of a business resulting in deferred tax asset and valuation allowance being eliminated.

Cash paid for income taxes was (in millions): 2013 \$426; 2012 \$508; 2011 \$271. Income tax benefits realized from stock option exercises and deductibility of other equity-based awards are presented in Note 7.

Uncertain tax positions

The Company is subject to federal income taxes in the U.S. as well as various state, local, and foreign jurisdictions. The Company's annual provision for U.S. federal income taxes represents approximately 80% of the Company's consolidated income tax provision. The Company was chosen to participate in the Internal Revenue Service (IRS) Compliance Assurance Program (CAP) beginning with the 2008 tax year. As a result, with limited exceptions, the Company is no longer subject to U.S. federal examinations by the IRS for years prior to 2012. The Company is under examination for income and non-income tax filings in various state and foreign jurisdictions. The assessments previously issued by the Spanish tax authorities for the 2005 and 2006 tax years related to intercompany activity have been resolved in the current year with no material impact to the financial results.

As of December 28, 2013, the Company has classified \$10 million of unrecognized tax benefits as a current liability. Management's estimate of reasonably possible changes in unrecognized tax benefits during the next twelve months is comprised of the current liability balance expected to be settled within one year, offset by approximately \$9 million of projected additions related primarily to ongoing intercompany transfer pricing

Edgar Filing: KELLOGG CO - Form 10-K

activity. Management is currently unaware of any issues under review that could result in significant additional payments, accruals, or other material deviation in this estimate.

Following is a reconciliation of the Company's total gross unrecognized tax benefits as of the years ended December 28, 2013, December 29, 2012 and December 31, 2011. For the 2013 year, approximately \$56 million represents the amount that, if recognized, would affect the Company's effective income tax rate in future periods.

(millions)	2013	2012	2011
Balance at beginning of year	\$ 80	\$ 66	\$ 104
Tax positions related to current year:			
Additions	9	8	7
Tax positions related to prior years:			
Additions	17	14	8
Reductions	(13)	(4)	(19)
Settlements	(14)	(1)	(27)
Lapses in statutes of limitation		(3)	(7)
Balance at end of year	\$ 79	\$ 80	\$ 66

For the year ended December 28, 2013, the Company recognized an increase of \$4 million of tax-related interest and penalties and cash settlements of \$6 million, resulting in an accrual balance of \$17 million at year end. For the year ended December 29, 2012, the Company recognized an increase of \$4 million of tax-related interest and penalties and had \$19 million accrued at December 29, 2012. For the year ended

December 31, 2011, the Company recognized a decrease of \$3 million of tax-related interest and penalties and had approximately \$16 million accrued at December 31, 2011.

NOTE 12

DERIVATIVE INSTRUMENTS AND FAIR VALUE MEASUREMENTS

The Company is exposed to certain market risks such as changes in interest rates, foreign currency exchange rates, and commodity prices, which exist as a part of its ongoing business operations. Management uses derivative financial and commodity instruments, including futures, options, and swaps, where appropriate, to manage these risks. Instruments used as hedges must be effective at reducing the risk associated with the exposure being hedged and must be designated as a hedge at the inception of the contract.

The Company designates derivatives as cash flow hedges, fair value hedges, net investment hedges, and uses other contracts to reduce volatility in interest rates, foreign currency and commodities. As a matter of policy, the Company does not engage in trading or speculative hedging transactions.

Total notional amounts of the Company's derivative instruments as of December 28, 2013 and December 29, 2012 were as follows:

(millions)	2013	2012
Foreign currency exchange contracts	\$ 517	\$ 570
Interest rate contracts	2,400	2,150
Commodity contracts	361	320
Total	\$ 3,278	\$ 3,040

Following is a description of each category in the fair value hierarchy and the financial assets and liabilities of the Company that were included in each category at December 28, 2013 and December 29, 2012, measured on a recurring basis.

Level 1 Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market. For the Company, level 1 financial assets and liabilities consist primarily of commodity derivative contracts.

Level 2 Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. For the Company, level 2 financial assets and liabilities consist of interest rate swaps and over-the-counter commodity and currency contracts.

The Company's calculation of the fair value of interest rate swaps is derived from a discounted cash flow analysis based on the terms of the contract and the interest rate curve. Over-the-counter commodity derivatives are valued using an income approach based on the commodity index prices less the contract rate multiplied by the notional amount. Foreign currency contracts are valued using an income approach based on forward rates less the contract rate multiplied by the notional amount. The Company's calculation of the fair value of level 2 financial assets and liabilities takes into consideration the risk of nonperformance, including counterparty credit risk.

Level 3 Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability. The Company did not have any level 3 financial assets or liabilities as of December 28, 2013 or December 29, 2012.

The following table presents assets and liabilities that were measured at fair value in the Consolidated Balance Sheet on a recurring basis as of December 28, 2013 and December 29, 2012:

Derivatives designated as hedging instruments:

(millions)	Level 1	2013 Level 2	Total	Level 1	2012 Level 2	Total
Assets:						
Foreign currency exchange contracts:						
Other current assets	\$	\$ 7	\$ 7	\$	\$ 4	\$ 4
Interest rate contracts (a):						
Other assets					64	64
Total assets	\$	\$ 7	\$ 7	\$	\$ 68	\$ 68
Liabilities:						
Foreign currency exchange contracts:						
Other current liabilities	\$	\$ (8)	\$ (8)	\$	\$ (3)	\$ (3)
Interest rate contracts:						
Other liabilities		(59)	(59)			
Commodity contracts:						
Other current liabilities		(9)	(9)		(11)	(11)
Other liabilities		(19)	(19)		(27)	(27)
Total liabilities	\$	\$ (95)	\$ (95)	\$	\$ (41)	\$ (41)

(a) The fair value of the related hedged portion of the Company's long-term debt, a level 2 liability, was \$2.5 billion as of December 28, 2013 and \$2.3 billion as of December 29, 2012:

Derivatives not designated as hedging instruments:

(millions)	Level 1	2013 Level 2	Total	Level 1	2012 Level 2	Total
Assets:						
Commodity contracts:						
Other current assets	\$ 3	\$	\$ 3	\$ 5	\$	\$ 5
Total assets	\$ 3	\$	\$ 3	\$ 5	\$	\$ 5
Liabilities:						
Commodity contracts:						
Other current liabilities	\$ (7)	\$	\$ (7)	\$ (3)	\$	\$ (3)
Total liabilities	\$ (7)	\$	\$ (7)	\$ (3)	\$	\$ (3)

The effect of derivative instruments on the Consolidated Statement of Income for the years ended December 28, 2013 and December 29, 2012 were as follows:

Derivatives in fair value hedging relationships

(millions)	Location of gain (loss) recognized in income	Gain (loss) recognized in income (a)
		2013 2012
Foreign currency exchange contracts	OIE	\$ 2 \$ (1)
Interest rate contracts	Interest expense	(5) 5
Total		\$ (3) \$ 4

(a) Includes the ineffective portion and amount excluded from effectiveness testing.

Derivatives in cash flow hedging relationships

(millions)	Gain (loss)		Location of		Location of

During the next 12 months, the Company expects \$5 million of net deferred losses reported in accumulated other comprehensive income (AOCI) at December 28, 2013 to be reclassified to income, assuming market rates remain constant through contract maturities.

Certain of the Company's derivative instruments contain provisions requiring the Company to post collateral on those derivative instruments that are in a liability position if the Company's credit rating falls below BB+ (S&P), or Baa1 (Moody's). The fair value of

all derivative instruments with credit-risk-related contingent features in a liability position on December 28, 2013 was \$87 million. If the credit-risk-related contingent features were triggered as of December 28, 2013, the Company would be required to post additional collateral of \$78 million. In addition, certain derivative instruments contain provisions that would be triggered in the event the Company defaults on its debt agreements. There were no collateral posting requirements as of December 28, 2013 triggered by credit-risk-related contingent features, however there was \$9 million of collateral posted under the reciprocal agreements as discussed under the counterparty credit risk concentration below.

Other fair value measurements

2013 Fair Value Measurements on a Nonrecurring Basis

On November 4, 2013, the Company announced Project K, a four-year efficiency and effectiveness program. As part of Project K the Company will be consolidating the usage of and disposing certain long-lived assets, including manufacturing facilities and Corporate owned assets over the term of the program. In the fourth quarter of 2013, long-lived assets of \$97 million, including manufacturing facilities in our U.S. Morning Foods and Asia Pacific reporting units and certain Corporate owned assets, were written down to an estimated fair value of \$31 million due to Project K. The Company's calculation of the fair value of long-lived assets is based on Level 3 inputs, including market comparables, market trends and the condition of the assets. See Note 3 for more information.

During 2013, the Company recognized asset impairment charges totaling \$4 million on the manufacturing facility in Australia closed during 2012 and currently held for sale.

2012 Fair Value Measurements on a Nonrecurring Basis

In the fourth quarter of 2012, a \$17 million asset impairment was recognized related the closure of a manufacturing facility in Australia. The long-lived assets and supplies associated with this facility were written down to fair value of \$11 million. The Company's calculation of the fair value of long-lived assets was based on Level 3 inputs, including market comparables, market trends and the condition of the assets. See Note 3 for more information.

The following table presents level 3 assets that were measured at fair value on the Consolidated Balance Sheet on a nonrecurring basis as of December 28, 2013:

(millions)	Fair Value	Total Loss
Description:		
Long-lived assets	\$ 38	\$ (70)
Total	\$ 38	\$ (70)

The following table presents level 3 assets that were measured at fair value on the Consolidated Balance Sheet on a nonrecurring basis as of December 29, 2012:

(millions)	Fair Value	Total Loss
Description:		
Long-lived assets	\$ 11	\$ (17)
Total	\$ 11	\$ (17)

Financial instruments

The carrying values of the Company's short-term items, including cash, cash equivalents, accounts receivable, accounts payable and notes payable approximate fair value. The fair value of the Company's long-term debt, which are level 2 liabilities, is calculated based on broker quotes and was as follows at December 28, 2013:

(millions)	Fair Value	Carrying Value
Current maturities of long-term debt	\$ 289	\$ 289
Long-term debt	6,715	6,330
Total	\$ 7,004	\$ 6,619

Counterparty credit risk concentration

Edgar Filing: KELLOGG CO - Form 10-K

The Company is exposed to credit loss in the event of nonperformance by counterparties on derivative financial and commodity contracts. Management believes a concentration of credit risk with respect to derivative counterparties is limited due to the credit ratings and use of master netting and reciprocal collateralization agreements with the counterparties and the use of exchange-traded commodity contracts.

Master netting agreements apply in situations where the Company executes multiple contracts with the same counterparty. If these counterparties fail to perform according to the terms of derivative contracts, this could result in a loss to the Company. As of December 28, 2013, there were no counterparties that represented a significant concentration of credit risk to the Company.

For certain derivative contracts, reciprocal collateralization agreements with counterparties call for the posting of collateral in the form of cash, treasury securities or letters of credit if a fair value loss position to the Company or its counterparties exceeds a certain amount. As of December 28, 2013, the Company had posted collateral of \$9 million in the form of cash, which was reflected as an increase in accounts receivable on the Consolidated Balance Sheet.

Management believes concentrations of credit risk with respect to accounts receivable is limited due to the generally high credit quality of the Company's major customers, as well as the large number and geographic dispersion of smaller customers. However, the Company conducts a disproportionate amount of business with a small number of large multinational

grocery retailers, with the five largest accounts encompassing approximately 29% of consolidated trade receivables at December 28, 2013.

Refer to Note 1 for disclosures regarding the Company's accounting policies for derivative instruments.

NOTE 13

PRODUCT RECALL

During 2012 the Company recorded charges in connection with a recall of certain packages of *Mini-Wheats* cereal in the U.S. and Canada due to the possible presence of fragments of flexible metal mesh from a faulty manufacturing part. The Company recorded estimated customer returns and consumer rebates as a reduction of net sales and costs associated with returned product and the disposal and write-off of inventory as COGS.

The following table presents a summary of charges related to the above recall for the year ended December 29, 2012:

(millions, except per share amount)	2012
Reduction of net sales	\$ 14
COGS	12
Total	\$ 26
Impact on earnings per diluted share	\$ (0.05)

NOTE 14

CONTINGENCIES

The Company is subject to various legal proceedings, claims, and governmental inspections or investigations in the ordinary course of business covering matters such as general commercial, governmental regulations, antitrust and trade regulations, product liability, environmental, intellectual property, workers' compensation, employment and other actions. These matters are subject to uncertainty and the outcome is not predictable with assurance. The Company uses a combination of insurance and self-insurance for a number of risks, including workers' compensation, general liability, automobile liability and product liability.

The Company has established accruals for certain matters where losses are deemed probable and reasonably estimable. There are other claims and legal proceedings pending against the Company for which accruals have not been established. It is reasonably possible that some of these matters could result in an unfavorable judgment against the Company and could require payment of claims in amounts that cannot be estimated at December 28, 2013. Based upon current information, management does not expect any of the claims or legal proceedings pending against the Company to have a material impact on the Company's consolidated financial statements.

NOTE 16

REPORTABLE SEGMENTS

Kellogg Company is the world's leading producer of cereal, second largest producer of cookies and crackers and a leading producer of savory snacks and frozen foods. Additional product offerings include toaster pastries, cereal bars, fruit-flavored snacks and veggie foods. Kellogg products are manufactured and marketed globally. Principal markets for these products include the United States and United Kingdom.

The Company has the following reportable segments: U.S. Morning Foods; U.S. Snacks; U.S. Specialty; North America Other; Europe; Latin America; and Asia Pacific. The Company manages its operations through eight operating segments that are based on product category or geographic location. These operating segments are evaluated for similarity with regards to economic characteristics, products, production processes, types or classes of customers, distribution methods and regulatory environments to determine if they can be aggregated into reportable segments. Beginning in the first quarter of 2013, the Kashi operating segment, which was formerly aggregated with the U.S. Morning Foods operating segment and reported as U.S. Morning Foods and Kashi, was revised due to a reorganization of the business. Kashi operating segment results of prior years were recast between U.S. Morning Foods and U.S. Snacks to conform with current presentation. The reportable segments are discussed in greater detail below.

The U.S. Morning Foods operating segment includes cereal, toaster pastries, and health and wellness business bars, and beverages.

U.S. Snacks includes cookies, crackers, cereal bars, savory snacks and fruit-flavored snacks.

U.S. Specialty includes the food service and Girl Scouts business. The food service business is mostly non-commercial, serving institutions such as schools and hospitals.

North America Other includes the U.S. Frozen and Canada operating segments. As these operating segments are not considered economically similar enough to aggregate with other operating segments and are immaterial for separate disclosure, they have been grouped together as a single reportable segment.

The three remaining reportable segments are based on geographic location – Europe which consists principally of European countries; Latin America which is comprised of Central and South America and includes Mexico; and Asia Pacific which is comprised of South Africa, Australia and other Asian and Pacific markets.

The measurement of reportable segment results is based on segment operating profit which is generally consistent with the presentation of operating profit in the Consolidated Statement of Income. Intercompany transactions between operating segments were insignificant in all periods presented.

NOTE 18**SUBSEQUENT EVENTS**

On February 24, 2014, the Company announced an offer to purchase up to \$700 million aggregate principal of its 3.125% U.S. Dollar Debentures due 2022, 2.75% U.S. Dollar Notes due 2023 and 4.0% U.S. Dollar Notes due 2020. The offer to purchase expires March 21, 2014,

subject to early termination or extension at the Company's discretion. The Company intends to fund the purchase with the issuance of commercial paper.

Management's Responsibility for Financial Statements

Management is responsible for the preparation of the Company's consolidated financial statements and related notes. We believe that the consolidated financial statements present the Company's financial position and results of operations in conformity with accounting principles that are generally accepted in the United States, using our best estimates and judgments as required.

The independent registered public accounting firm audits the Company's consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board and provides an objective, independent review of the fairness of reported operating results and financial position.

The board of directors of the Company has an Audit Committee composed of four non-management Directors. The Committee meets regularly with management, internal auditors, and the independent registered public accounting firm to review accounting, internal control, auditing and financial reporting matters.

Formal policies and procedures, including an active Ethics and Business Conduct program, support the internal controls and are designed to ensure employees adhere to the highest standards of personal and professional integrity. We have a rigorous internal audit program that independently evaluates the adequacy and effectiveness of these internal controls.

Management's Report on Internal Control over Financial Reporting

Management is responsible for designing, maintaining and evaluating adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

We conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Based on our evaluation under the framework in Internal Control Integrated Framework (1992), management concluded that our internal control over financial reporting was effective as of December 28, 2013. The effectiveness of our internal control over financial reporting as of December 28, 2013 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which follows.

John A. Bryant
President and Chief Executive Officer

Ronald L. Dissinger
Senior Vice President and Chief Financial Officer

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Kellogg Company

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Kellogg Company and its subsidiaries at December 28, 2013 and December 29, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 28, 2013 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 28, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Detroit, Michigan
February 24, 2014

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure under Rules 13a-15(e) and 15d-15(e). Disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable, rather than absolute, assurance of achieving the desired control objectives.

As of December 28, 2013, management carried out an evaluation under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

(b) Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we have included a report of management's assessment of the design and effectiveness of our internal control over financial reporting as part of this Annual Report on Form 10-K. The independent registered public accounting firm of PricewaterhouseCoopers LLP also attested to, and reported on, the effectiveness of our internal control over financial reporting. Management's report and the independent registered public accounting firm's attestation report are included in our 2013 financial statements in Item 8 of this Report under the captions entitled "Management's Report on Internal Control over Financial Reporting" and "Report of Independent Registered Public Accounting Firm" and are incorporated herein by reference.

(c) During the first quarter of 2012, we initiated the implementation of an upgrade to our existing enterprise resource planning (ERP) system within North America. This implementation has resulted in the modification of certain business processes and internal controls impacting financial reporting. During the implementation, which is expected to continue into 2014, we have taken the necessary steps to monitor and maintain appropriate internal controls impacting financial reporting. It is anticipated that, upon completion, implementation of this new ERP will enhance internal controls due to increased automation and further integration of related processes.

There have been no other changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors Refer to the information in our Proxy Statement to be filed with the Securities and Exchange Commission for the Annual Meeting of Shareowners to be held on April 25, 2014 (the "Proxy Statement"), under the caption "Proposal 1 Election of Directors," which information is incorporated herein by reference.

Identification and Members of Audit Committee; Audit Committee Financial Expert Refer to the information in the Proxy Statement under the caption "Board and Committee Membership," which information is incorporated herein by reference.

Executive Officers of the Registrant Refer to "Executive Officers" under Item 1 of this Report.

For information concerning Section 16(a) of the Securities Exchange Act of 1934 Refer to the information under the caption "Security Ownership - Section 16(a) Beneficial Ownership Reporting Compliance" of the Proxy Statement, which information is incorporated herein by

reference.

Code of Ethics for Chief Executive Officer, Chief Financial Officer and Controller We have adopted a Global Code of Ethics which applies to our chief executive officer, chief financial officer, corporate controller and all our other employees, and which can be found at www.kelloggcompany.com. Any amendments or waivers to the Global Code of Ethics applicable to our chief executive officer, chief financial officer or corporate controller may also be found at www.kelloggcompany.com.

ITEM 11. EXECUTIVE COMPENSATION

Refer to the information under the captions 2013 Director Compensation and Benefits, Compensation Discussion and Analysis, Executive Compensation, Retirement and Non-Qualified Defined Contribution and Deferred Compensation Plans, and Potential Post-Employment Payments of the Proxy Statement, which is incorporated herein by reference. See also the information under the caption Compensation Committee Report of the Proxy Statement, which information is incorporated herein by reference; however, such information is only furnished hereunder and not deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Refer to the information under the captions Security Ownership Five Percent Holders and Security Ownership Officer and Director Stock Ownership of the Proxy Statement, which information is incorporated herein by reference.

Securities Authorized for Issuance Under Equity Compensation Plans

(millions, except per share data)			
Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights as of December 28, 2012 (a)	Weighted-average exercise price of outstanding options, warrants and rights as of December 28, 2013 (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a) as of December 28, 2013 (c)*
Equity compensation plans approved by security holders	19.2	\$ 54	27.5
Equity compensation plans not approved by security holders		NA	0.3
Total	19.2	\$ 54	27.8

* The total number of shares remaining available for issuance under the 2013 Long-term Incentive Plan will be reduced by two shares for each share issued pursuant to an award other than a stock option or stock appreciation right, or potentially issuable pursuant to an outstanding award other than a stock option or stock appreciation right, which will in each case reduce the total number of shares remaining by one share for each share issued.

Three plans are considered Equity compensation plans not approved by security holders. The Kellogg Share Incentive Plan, which was adopted in 2002 and is available to most U.K. employees of specified Kellogg Company subsidiaries; a similar plan, which is available to employees in the Republic of Ireland; and the Deferred Compensation Plan for Non-Employee Directors, which was adopted in 1986 and amended in 1993 and 2002.

Under the Kellogg Share Incentive Plan, eligible U.K. employees may contribute up to 1,500 Pounds Sterling annually to the plan through payroll deductions. The trustees of the plan use those contributions to buy shares of our common stock at fair market value on the open market, with Kellogg matching those contributions on a 1:1 basis. Shares must be withdrawn from the plan when employees cease employment. Under current law, eligible employees generally receive certain income and other tax benefits if those shares are held in the plan for a specified number of years. A similar plan is also available to employees in the Republic of Ireland. As these plans are open market plans with no set overall maximum, no amounts for these plans are included in the above table. However, approximately 58,000 shares were purchased by eligible employees under the Kellogg Share Incentive Plan, the plan for the Republic of Ireland and other similar predecessor plans during 2013, with approximately an additional 58,000 shares being provided as matched shares.

The Deferred Compensation Plan for Non-Employee Directors was amended and restated during 2013. Under the Deferred Compensation Plan for Non-Employee Directors, non-employee Directors may elect to defer all or part of their compensation (other than expense reimbursement)

into units which are credited to their accounts. The units have a value equal to the fair market value of a share of our common stock on the appropriate date, with dividend equivalents being earned on the whole units in non-employee Directors' accounts. Units must be paid in shares of our common stock, either in a lump sum or in up to ten annual installments, with the installments to begin as soon as practicable after the non-employee Director's service as a Director terminates. No more than 300,000 shares are authorized for use under this plan, of which approximately 1,000 had been issued as of December 28, 2013.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Refer to the information under the captions "Corporate Governance," "Director Independence," and "Related Person Transactions" of the Proxy Statement, which information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Refer to the information under the captions Proposal 4 Ratification of PricewaterhouseCoopers LLP Fees Paid to Independent Registered Public Accounting Firm and Proposal 4 Ratification of PricewaterhouseCoopers LLP Preapproval Policies and Procedures of the Proxy Statement, which information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

The Consolidated Financial Statements and related Notes, together with Management's Report on Internal Control over Financial Reporting, and the Report thereon of PricewaterhouseCoopers LLP dated February 24, 2014, are included herein in Part II, Item 8.

(a) 1. Consolidated Financial Statements

Consolidated Statement of Income for the years ended December 28, 2013, December 29, 2012 and December 31, 2011.

Consolidated Statement of Comprehensive Income for the years ended December 28, 2013, December 29, 2012 and December 31, 2011.

Consolidated Balance Sheet at December 28, 2013 and December 29, 2012.

Consolidated Statement of Equity for the years ended December 28, 2013, December 29, 2012 and December 31, 2011.

Consolidated Statement of Cash Flows for the years ended December 28, 2013, December 29, 2012 and December 31, 2011.

Notes to Consolidated Financial Statements.

Management's Report on Internal Control over Financial Reporting.

Report of Independent Registered Public Accounting Firm.

(a) 2. Consolidated Financial Statement Schedule

All financial statement schedules are omitted because they are not applicable or the required information is shown in the financial statements or the notes thereto.

(a) 3. Exhibits required to be filed by Item 601 of Regulation S-K

The information called for by this Item is incorporated herein by reference from the Exhibit Index included in this Report.
