NON-GAAP FINANCIAL MEASURES

5

This communication includes the presentation and discussion of certain financial information that differs from what is reported in our financial statements. These non-GAAP financial measures, including, but not limited to, adjusted diluted EPS, adjusted cash provided by operating activities, adjusted cash and cash equivalents, adjusted total revenues, adjusted gross profit, adjusted operating income, adjusted net earnings attributable to Mylan, adjusted constant currency total revenues, adjusted constant currency third party net sales, EBITDA, adjusted R&D, adjusted SG&A, and adjusted effective tax rate, are presented in order to supplement investors' and other readers' assessment of the Company's financial performance. Mylan has also presented certain non-GAAP financial measures for Perrigo, including adjusted diluted EPS and adjusted EBITDA margin, which have been taken from published sources. Management uses these measures for forecasting, budgeting and measuring its operating performance. In addition, primarily due to acquisitions, Mylan believes that comparing its operations (and comparisons of its current operations with historical and future operations) would be difficult if the disclosure was limited to financial measures prepared only in accordance with GAAP. In addition, Mylan believes that including EBITDA and supplementing with adjusted EBITDA pursuant to our debt agreements is appropriate to provide additional information to investors to determine the Company's financial performance.

to comply with financial debt covenants (which are calculated using a measure similar to adjusted EBITDA) and assess the Company's indebtedness. We also report sales performance using the non-GAAP financial measure of "constant currency" total revenues, third party net sales, and adjusted third party net sales. This measure provides information on the change in net sales assuming that foreign exchange rates had not changed between the prior and current period. The comparisons presented as constant currency rates reflect comparative rates to the prior year's foreign exchange rates. We routinely evaluate our third party net sales performance at constant currency so that sales performance is not distorted by the impact of foreign currency exchange rates, thereby facilitating a period-to-period comparison of our operational activities. The presentation also provides useful information to investors for the same reason. The "Summary of Adjusted Revenues by Segment" table compares adjusted third party net sales on an actual and constant currency basis for each reportable segment and the geographical segment for the three and nine months ended September 30, 2015 and 2014. Also, set forth below, Mylan has provided reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures (which in the case of Perrigo's reconciliations, include third party sources), other than Perrigo's adjusted diluted EPS company guidance and Thomson Reuters consensus estimates of adjusted diluted EPS which cannot be reconciled as they are from a third party source. Mylan does not endorse or adopt Thomson Reuters consensus estimates. Other readers are encouraged to review the related GAAP financial measures and the reconciliations of the non-GAAP measures to the most directly comparable GAAP measures set forth in the Appendix, and investors and other readers should consider non-GAAP measures only as substitutes for or as superior measures to, the measures of financial performance prepared in accordance with GAAP.

Source: Perrigo public filings and Thomson Reuters consensus estimates as used by Perrigo in its September 17, 2015 Investor Presentation. Mylan does not endorse or adopt Thomson Reuters consensus estimate and indicative only and not a target or profit forecast. Nothing in this slide is intended to be a profit forecast. Pro-Forma adjusted diluted EPS, share price and P/E should not be treated as targets or profit forecasts. Adjusted diluted EPS is a non-GAAP financial measure. The combined company per September 17, 2015 Perrigo Investor presentation. Full run-rate synergies for the combined company at consummation of the offer. Implied Mylan / Perrigo PF adjusted diluted EPS assumes that Mylan acquires 100% of Perrigo and all synergies realized in the transaction.

Assumes \$75 / share is received by Perrigo shareholders is reinvested at Mylan current share price of \$44.09 as of October 30, 2015

5

Run-rate synergies implied based on difference between "No Synergies" and "Ramped Synergies" of 25% per Perrigo's presentation. 2016E EPS implies \$3.96 PF adjusted diluted EPS. With ramped synergies, 12% dilution on \$4.72 of 2016E adjusted diluted EPS (\$4.15 - \$3.96) = \$0.19 of earnings. If \$0.19 of earnings is 25% of run-rate synergies, then implied 2016E run-rate synergies is \$0.74. If synergies then are (\$3.96 + \$0.74) = \$4.71 2016E adjusted diluted EPS.

Mylan commenced the tender offer for Perrigo shares on September 14, 2015.

The offer and withdrawal rights are scheduled to expire on November 13, 2015 at 8:00am ET.

The acceptance condition for the offer requires more than 50% of Perrigo ordinary shares to be tendered into the offer.

Mylan has received U.S. FTC clearance, which represents the final regulatory clearance needed by Mylan to close its acquisition of Perrigo.

Once
the
offer
has
become
unconditional
in
all
respects,
Mylan
is
obliged
to
purchase
all
Perrigo ordinary shares tendered
with the goal to achieve 100% ownership of Perrigo.

Mylan believes it will reach at least 80% acceptances once it crosses the 50% acceptance condition

Otherwise, Mylan is prepared to manage the business as a controlled subsidiary.

Mylan is confident it will maintain an investment grade credit profile.
